A. To the best of my recollection, I talked with Mr. Warren probably two weeks before we met in the Niagara building to complete the organization of the company.

150. Was he the first one to whom you addressed yourself upon the subject?

Objected to as immaterial.

A. Yes sir.

151. What was the nature of your conversation with Mr. Warren upon this subject?

Objected to as incompetent and immaterial.

A. I told him we were contemplating getting up a company and I wanted him to be one of the parties interested because I thought it would be a good thing for him.

152. During the time that elapsed from your first conception of the idea to the time of this conversation with Warren, what investi-

gation, if any, had you made with respect to the possibility, in the way of profits or otherwise, of a competing company in Peoria?

Objected to same grounds.

A. I had not made any investigation.

153. What report, if any, did you make to Mr. Warren at that time as to the advisability of such an investment?

896 Objected to same grounds.

A. I told him Mr. Clarke and Mr. Walsh were going into it and I would like to have him go in; I don't recollect all that I said to him, of course, but the purport of it was I believed it would be a good thing and wanted him in it.

154. In what way did you represent to him it would be a good thing—what did you say to him upon that subject?

Objected to same grounds.

A. I cannot recall everything I said to him but the purport of it was it was a good business and he was a personal friend of mine and I would like to have him interested.

156. Did you know at that time what were the prices charged in Peoria for both fuel and illuminating gas?

Objected to same grounds.

A. I did.

157. What, if anything passed between you and Mr. Warren at that time with reference to the prices paid for gas in Peoria?

Objected to as incompetent, immaterial, irrelevant.

A. I don't recollect that the matter of prices was brought up.

158. What information did you impart to him at that time which bore upon the probable profits to be derived from the operation of a competing gas company in Peoria?

Objected to same grounds as before.

A. I think in my talk I stated that Mr. Walsh was a man who knew what he was about and would not come down here and put his money in anything unless he thought there was money to be made.

Complainant objects to the foregoing answer as not responsive the witness saying he thinks he said so and so and moves the court to exclude it.

159. Did you or did you not then have any figures per-
897 taining to the subject matter which you considered or discussed with Mr. Warren?

Objected to as incompetent, immaterial, irrelevant.

A. I did not.

160. In how many *interprises* prior to that date had you been interested in with Mr. Warren, if any?

Objected to same grounds.

A. I had been in one real estate deal with him prior to that ti I should say some six or seven years before, that was the only I recollect of.

161. Was that with reference to Peoria property?

Objected to as immaterial.

A. Yes sir.

162. What information, if any, had Mr. Warren at that time far as disclosed by his conversation, touching the question of pr able profits from such an enterprise?

Objected to same grounds.

A. I don't know.

163. Had Mr. Warren been a party interested in the old gas c pany within your knowledge?

A. I think he had not.

164. State whether or not he had any knowledge, technica otherwise, so far as you know, of the production and distributio gas substantially as it was done in the city of Peoria at that ti

Objected to as incompatent and immaterial.

A. I do not know.

165. So far as any statements were made by Mr. Warren to either then or subsequently, what knowledge had he of the ga dustry at the time he became a subscriber to the capital stoc complainant company?

898 Objected to as incompetent and immaterial.

A. I don't know that he had.

166. When with reference to the time of this conversation which you have referred with Mr. Warren did he decide to bec a stockholder, if you know.

Objected to as immaterial.

A. He felt favorably towards going into it when I first mentio it to him at the time.

167. What reasons if any did he then give for his opinion?

Objected to as incompetent, immaterial and irrelevant.

A. I don't recollect that he gave any special reasons.

168. I think you stated you saw him two or three times, peri before he finally subscribed—is my recollection correct?

A. I think during the two or three weeks I met him a nu of times.

169. Did you go to his office to find him or did you meet hi other places?

A. Sometimes I met him at his office and sometimes at other places.

170. What were the subsequent conversations you had with him—you have testified more particularly with reference to the first one?

Objected to as incompetent, immaterial and irrelevant.

A. I cannot state exactly what my conversation was; we talked about matters generally and about whether the prospects of the company was progressing.

171. During the two weeks to which you have referred what if any additional information did you require with respect to the proposed organization of the company?

Objected to as immaterial.

A. Well, I found that the public, those I talked with, were all favorable towards the new company being formed; one of
899 the reasons being that those fellows had had their own way here for forty years, had done what they pleased with us and they would like to see somebody else get in the field.

172. Were those expressions of opinion based upon the probable effect to themselves or otherwise?

Objected to as incompetent and immaterial.

The MASTER: It ought to appear first the witness knows.

A. Of course, I could not tell what was in their minds but that is what they talked.

173. That is, that it would be beneficial to them?

A. That they would be glad to see us form a company and go into the business.

174. What were their reasons so far as they gave them?

Objected to as immaterial, irrelevant and incompetent.

A. Some were sore at Coffey, some were sore at Farrelly and some had been treated badly when they made complaints about their gas bills and all that kind of thing.

175. State whether or not any of those reasons given to you during your investigations, as you have just testified, were based upon a probable reduction in the price of gas in Peoria, or whether that was given as a reason for desiring a competing company.

Objected to same grounds.

A. Possibly so; it was in some cases; I told them of my talk with Thomas Coffey and his threat to put the price to 50 cents if the works were built.

176. Is it or is it not true that that feature of the situation was prominently presented by you to the different people with whom you conversed on the subject?

Objected to same grounds.

A. I did not keep it in the background, sure.

900 177. In a general way, with how many people did you converse during that period in the manner you have just described?

Objected to as immaterial.

A. I could not say.

178. Were it many or comparatively few?

Objected to as immaterial.

A. There was not a great many.

179. Among what class of people did you investigate?

Objected to as incompetent, immaterial, and assuming that he made an investigation.

A. Oh different classes.

180. What differences of opinion did you find among the different people with whom you conferred upon that subject in the manner you have just described?

Objected to as immaterial.

A. There was not any difference of opinion, they were all unanimously glad to see us going ahead with it.

181. To what extent did you participate in procuring the subscription list to the capital stock of this company?

Objected to as immaterial, incompetent and already answered.

A. Outside of Ben Warren's subscription, I don't know that I influenced anyone; I talked to Mr. Bailey and Mr. Miles and perhaps Mr. Corning, although I am not certain about Mr. Corning; I did not spend much time with them.

182. To whom, if to any of them, did you actually present this subscription list for their signatures?

Objected to as immaterial.

A. My recollection is the list was in the office of Messrs. Irwin & Stemmons and was signed there by all the gentlemen who had been seen on the matter about the same time.

183. State whether or not you personally saw any of the 901 subscribers other than those whose names you have specifically mentioned.

Objected to as immaterial.

A. I saw all of the gentlemen whose names are on this paper present at that meeting.

184. When, with reference to the time they became subscribers, if at all, did you see them with reference to becoming such subscribers or becoming interested?

Objected to as immaterial and incompetent.

A. I met them all in the office before the papers were signed and talked with a number of them.

185. Covering what period of time did you do that?

Objected to as immaterial.

A. To the best of my recollection within two weeks, possibly less time than that.

186. That was the two weeks immediately preceding the completion of the subscription list?

Ans. Yes sir.

187. What portion of your time, during those two weeks, did you devote to the preliminaries of procuring this subscription list?

Objected to as immaterial.

A. I don't know exactly but not very much time.

188. Who else, if anyone, was at work in the same direction during that period?

Objected to as immaterial.

A. Sumner R. Clarke.

189. Do you know personally to what extent he gave his personal attention to that matter?

Objected to as immaterial.

A. I think he saw all these gentlemen personally.

190. When, with reference to these interviews you had with John R. Walsh, did you and Mr. Clarke do this work with reference to obtaining the subscription list—I refer now to what you have just testified to as covering two weeks or so.

902

Objected to as immaterial.

A. My recollection is when we got ready and decided to go ahead with the matter that Mr. Clarke wound up these people in two or three days.

191. Was that before or after you had your conference with Mr. Walsh?

Objected to as immaterial.

A. Afterwards.

192. State whether or not before the subscription list was made up there was any agreement between Mr. Walsh and the Peoria gentlemen, proposing to become associated with the company, as to his becoming interested in its formation and the prosecution of the industry?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I think the question ought to be limited to the people that did become interested.

Mr. TICHENOR: That is what I mean, of course.

The MASTER: The witness may answer.

A. I don't know of any of the others except Mr. Clarke having any understanding with Mr. Walsh.

192. Did you personally know of that understanding?

Objected to as incompetent and immaterial.

A. Yes sir, I think Mr. Clarke told me.

Complainant objects to the foregoing answer as incompetent and hearsay and moves the court to exclude it.

193. Did you also know what the arrangement was?

Objected to as incompetent and immaterial and because the witness has already answered his information is what somebody else told him.

903 A. My recollection is—Interrupted.

The MASTER: No, you are asked what you know about it of your own knowledge.

The WITNESS: I know what I heard Mr. Clarke say.

194. State whether or not that arrangement or agreement between Mr. Clarke and Mr. Walsh was verbal or in writing?

Objected to as incompetent and immaterial.

A. I don't know.

195. What was the arrangement?

Objected to as incompetent, immaterial and calling for hearsay.

The MASTER: I doubt the competency of that at the present time.

Mr. TICHENOR: Very well, I will not press it now.

196. State whether or not in any of your interviews with Mr. Walsh he agreed or promised to become a subscriber to the capital stock of complainant company?

Objected to as immaterial and incompetent and the subscription list would show whether he subscribed or not.

A. He certainly gave me to understand he would be interested in the company.

197. State to what extent he told you he would become interested in this company?

Objected to as immaterial and incompetent.

A. I don't remember that he stated to what extent.

198. State whether or not when you were securing prospective subscribers to the subscription list you had any information as to the extent to which he would become interested, or had agreed to become interested, and if so, whether you indicated that to any of those prospective subscribers?

Objected to same grounds as before.

A. I think I did to Ben Warren, Jr.

199. What did you tell him?

(Objected to same grounds.)

04 A. I think I told him Mr. Walsh would take any stock that was not subscribed by the Peoria people.

200. What if any figures did you give him?

Objected to same grounds.

A. I don't recollect that I gave him any figures.

201. State whether or not you know from anything Mr. Warren id at that time such statement on your part had anything to do ith his determining to become a subscriber?

Objected to same grounds.

The MASTER: I don't think that material but if you want to press the witness may answer subject to the objection.

Mr. TICHENOR: I would like to have it answered.

A. I don't know.

202. At the time Mr. Walsh stated to you that he would take any subscribed stock, did you or did you not have information as to w much would be subscribed by Peoria parties?

Objected to as incompetent, immaterial and assuming that Mr. alsh made a statement of that kind.

A. I did not say he did; I got my information from Mr. Clarke.

203. Mr. Walsh never made any such statement to you?

A. He may have made it but I don't recall it.

204. Were you ever present at a conference between Walsh and rke concerning this subject matter?

A. Yes sir.

205. Where was that and when?

Objected to as immaterial.

A. In the private room of the Chicago national bank at Chicago.

206. Had you and Clarke gone to Chicago together on that occan?

Ans. I think so.

5 207. For what reason had you gone there?

Objected to as immaterial.

A. To talk the situation over—this gas and electric light matter.

208. What conversation passed between you three parties at that e?

Objected to as immaterial, incompetent and irrelevant.

A. I cannot recollect all that passed, but Mr. Walsh seemed to be ubtful about my being able to do what I said I could in the way getting frontage consents and he asked me if our streets were not

paved and if I didn't think it would be up hill business to get co
sent to tear them up and things of that kind

209. What was the specific reason, if any, that induced you an
Clarke to go to Chicago on that occasion to confer with Walsh?

Objected to same grounds.

A. We could talk things over better than we could correspon
about it; I don't know of any special reasons for us going there e
cept to talk over the general situation.

210. What, if any conclusion was reached at the time of that co
ference so far as it was expressed by the parties present?

Objected to same grounds.

A. As I now recollect it, Mr. Walsh sent for Mr. Little who wa
living at Akron, Ohio, and he came to Chicago and we stayed ove
until the next day and talked more about the case.

211. Were you present at the interview between Little and Walsh

Objected to as immaterial.

A. I was.

212. Was Clarke also present?

Ans. He was.

213. Where did Mr. Little reside at that time?

Objected to as incompetent and immaterial.

A. Akron, Ohio.

906 214. What, if any particular knowledge, at that time, had
Mr. Little of the gas business in Peoria and of the situation
generally in that regard so far as your own knowledge extends?

Objected to as immaterial.

A. Well, I learned during the conference that he had been here
and looked the situation over some years before—about two years
before, I think.

215. In whose interests was that disclosed?

Objected to as immaterial.

A. I don't know.

216. Was that the first time you ever met Mr. Little?

A. It was.

217. Was that the same Mr. Little who is now connected with the
complainant company?

Ans. Yes sir, F. W. Little.

218. And who has already testified in this case?

A. I believe so.

219. How long did that conference last?

Objected to as immaterial.

A. Mr. Little came to the Grand Pacific hotel shortly after seven

o'clock in the morning and came down to Peoria with us in the evening at 5:45; we were together nearly all day.

220. Do you know what particular reasons, so far as it was stated, Mr. Walsh had for sending for Mr. Little on that occasion?

Objected to as immaterial.

A. Mr. Little was supposed to be an experienced gas man and as I understood it was operating the gas works at Akron, Ohio, for Mr. Walsh at that time.

Complainant objects to the foregoing answer as not responsive, being simply the understanding of the witness and moves the court to exclude it.

907 221. What questions pertaining to the proposed organization of this company in Peoria, were discussed at that time between Walsh, Little, Clarke and yourself in your presence?

Objected to as immaterial.

A. Well, we talked about the number of miles of frontage consents that could be secured; also whether or not a fair and reasonable ordinance could be had.

222. What, if any, information did Mr. Little disclose as to the miles of frontage in Peoria that might be obtained?

Objected to as immaterial.

A. As I now recollect he stated we should have at least 20 miles of frontage in order to be able to do a satisfactory business.

223. What if any special knowledge as disclosed by that discussion did Mr. Little then have with respect to the probability of obtaining what you have designated as a reasonable ordinance in the city of Peoria?

Objected to as incompetent and immaterial.

A. I don't know that he had any knowledge any more than my statement that I believed a fair ordinance could be obtained and also a sufficient amount of frontage.

224. Upon what features of the pending question did Mr. Little advise with the other gentlemen present at that time with respect to the proposed organization of a competing company in Peoria?

Objected to same grounds.

A. As I now recollect it he stated he would not want an ordinance here unless it was liberal as to the length of time it should run and no restriction as to the price to be charged for gas.

225. State whether or not you then advised Mr. Little concerning the prices at that time charged by the Peoria company?

Objected to same grounds.

A. I don't think I did.

908 226. What if anything did Mr. Little advise as to the probable outcome of the company financially through entering into competition with the one already in the field so far as he made any statement whatever?

Objected to same grounds.

A. I don't recollect that he made any statement at that time about it.

227. What knowledge at that time had Mr. Little of the gas consumption in Peoria?

Objected to same grounds.

A. I don't know.

228. Have you now stated all the subjects upon which Mr. Little gave any advice, or made any suggestions, respecting the proposed new company during the interviews which were carried on that day?

Objected to same grounds.

A. All I think of.

229. State if it is not true that on that occasion, in the presence of the three gentlemen whose names you have given, he stated to you that gas could be furnished in Peoria by a competing company at very much lower prices than those then charged by the old company and still make a handsome profit?

Objected to as incompetent, immaterial and leading.

A. I don't recollect any such statement.

230. What if any figures did Mr. Little give these gentlemen at that time with respect to the cost of production and delivery of gas in this territory?

Objected to as incompetent and immaterial.

A. I don't recollect that he gave any figures.

231. What if any discussion was there among you gentlemen upon that question during that day?

909 Objected to as incompetent, immaterial and assuming there was a discussion of that question.

A. As I remember the conversation, it was I might say entirely devoted to the kind of ordinance that could be had and the amount of frontage that could be secured.

232. I am asking you now what information upon those questions Mr. Little brought into that meeting so far as was discussed from anything he said?

Objected to as incompetent and immaterial and assuming there was something said about the matter.

A. I don't recollect that he brought in any statements or figures.

233. And those were the only two subjects under discussion at that time were they?

Objected to as immaterial.

A. So far as I recall.

234. How long was that meeting in session?

Objected to as immaterial.

A. The first meeting at the Grand Pacific hotel between Mr. Clarke, Mr. Little and myself commenced after breakfast and lasted until about 9 o'clock in the morning, which would be about an hour and a half, I should say; we got to Mr. Walsh's bank probably about 11 o'clock in the forenoon and talked awhile and then again after dinner.

235. How much would the time aggregate all together?

A. Mr. Clarke, Mr. Little and I were together pretty much all day but the talk in Mr. Walsh's office did not probably all told exceed an hour and a half to two hours at the different times.

236. Is it not true that one of the principal objects which induced you and Mr. Clarke to go to Chicago on that occasion was to get information and facts relative to the cost of gas production and delivery?

Objected to as incompetent and immaterial.

A. No sir, not as I recollect it.

237. State whether or not that was not one of the principal reasons why Mr. Walsh called Mr. Little from Akron as stated by Mr. Walsh prior to the time he sent for him?

Objected to as incompetent, immaterial and already asked and answered.

(Question withdrawn.)

238. Prior to the time that Mr. Walsh sent for Mr. Little on that occasion, did he express himself to you or to Mr. Clarke in your presence touching the reasons why he desired to call Mr. Little in?

Objected to as immaterial.

A. I think he did.

239. What reasons did he give?

A. He wanted to have Mr. Little hear what Mr. Clarke and I had to say about the situation down here.

240. Anything further?

A. He requested Mr. Little to come down with us and look the matter over himself.

241. I am speaking of the reasons?

A. Yes, he wanted to have Mr. Little hear our story.

242. Were those the only reasons he gave?

Objected to as immaterial.

A. That is all I remember of.

243. Is your recollection of past events reasonably good generally?

Ans. I think so.

244. State whether or not up to that time Mr. Walsh had made any representations to you to the effect that he was skilled in the manufacture and distribution of gas and particularly with
911 reference to the cost of it?

Objected to as incompetent and immaterial.

A. He made no such statement to me.

245. State whether or not within your knowledge he was familiar with gas conditions in Peoria at that time?

Objected to as immaterial.

A. Yes he seemed to know something about the gas situation in Peoria.

246. Upon what features of that question did he express himself at that time and what did he say?

Objected to as immaterial and incompetent.

A. I don't remember all that was said, but he had made an investigation here a year or two before with a view of buying the old gas plant.

247. You say you don't remember what statement he made pertaining to those questions?

Ans. No.

248. Did he or did he not state that he knew the prices paid for gas in Peoria at that time?

Objected to as immaterial.

A. He may have done so I don't remember.

250. State whether or not you, or Mr. Clarke in your presence, acquainted him with the charges made for gas in Peoria both for fuel and lighting purposes?

Objected to as immaterial.

A. I think it possible; we talked about it.

251. Do you remember at this time what those prices were?

Objected to as immaterial.

A. I do.

252. What were they?

Ans. $1.35 for illuminating gas; 85 cents for fuel gas with a discount of 10 cents per thousand for prompt payment before the 10th of each month.

912 253. You are certain are you that those were the prices which prevailed at that time by the old company?

A. Before we came into the field those were the prices, yes.

254. State if it is not true that the old company from the time it

reduced fuel gas to 75 cents per thousand until after your company began operations, it never asked 85 cents for fuel gas but always 75 cents without any reduction for payment before the 10th of the month?

Objected to as incompetent and immaterial.

A. No, I do not so understand it; I think it was 85 cents with 10 cents discount.

255. Were you using fuel gas during any part of that period?

A. I think I was.

256. And you paid the bills, did you?

Ans. I did.

257. State if your recollection upon that question is just as good and just as certain as it is with reference to the other matters concerning which you have testified?

A. I am not infallible; I may be mistaken about it.

258. I asked you whether it is as good with reference to that question as it is with reference to the others?

A. Possibly so.

259. Are not you prepared to state whether it is or is not?

A. No. I know the net amount I paid for fuel gas was 75 cents and I was under the impression there was a 10 cent discount the same as it was on the illuminating gas; as to the other matters I have testified about I know what I have stated.

260. My question is as to the accuracy of your recollection with reference to that fact as compared with your recollection in relation to other facts about which you have testified?

A. My recollection as to other matters is more correct than it is about the price of the gas; I may be mistaken as to that.

913 261. Do you remember about how long prior to that time it was the old company reduced the price of fuel gas to the minimum before your company came into operation?

Objected to as incompetent and immaterial.

A. I do not.

262. Are you able to state whether it was some years before or only a short time before?

Objected to as immaterial.

A. No I could not.

263. How long within your present recollection at the time your company organized had the price of fuel gas in Peoria been 75 cents per thousand feet?

Objected to as immaterial.

A. I don't know.

264. At the time you and your associates were considering the question of the organization of the complainant company, what proportion of the gas consumed in Peoria was for fuel purposes?

Objected to as immaterial.

A. I don't know.

265. State whether or not you had any knowledge upon that question at the time you were negotiating with Mr. Walsh and others relative to the organization of this company?

Objected to as immaterial.

A. I had been told that the illuminating gas used exceeded the fuel gas somewhat at that time.

Complainant objects to the foregoing answer as hearsay and moves the court to exclude it.

266. Had you any personal knowledge or knowledge from reliable sources as to the proportion of fuel gas to the whole consumption in Peoria at that time?

Objected to as incompetent and immaterial and leaving it
914 to the witness to judge as to what were reliable sources?

A. Only from hearsay.

267. Who, if anyone, among your associates in the organization of this enterprise—I refer now to those who subscribed for the stock—was at that time skilled in the gas industry?

Objected to as immaterial.

A. F. W. Little was the only gentleman I knew of.

Mr. IRWIN: He is referring to the subscribers of the stock.

The WITNESS: If that is so, there was not any that I know of.

268. Where did Mr. Little reside during the time you were engaged in your preliminary arrangement for the organization?

A. In Akron, Ohio.

269. How frequently from the time you took up the idea of forming a company to the time of its completion did you see Mr. Little personally?

Objected to as immaterial.

A. To the best of my recollection Mr. Little came down to Peoria with Mr. Clarke and I from Chicago and remained a couple of days.

270. Was that the occasion to which you have already referred?

A. Yes.

271. Was that the only time you saw him during that period?

Objected to as immaterial.

A. I think it was the only time I saw him but I talked with him over the telephone once that I remember of.

272. Did you call him up or did he call you on that occasion?

Objected to as immaterial.

A. I think Mr. Clarke called him up.

273. And did Mr. Clarke talk with him also?

Objected to as immaterial.

A. Yes sir.

915 274. For what purpose was he called if you know?

Objected to as immaterial.

A. It was while we were getting frontage and I made him a report of the frontage I had secured and asked his advice, I think about going on other streets.

Complainant objects to the latter part of the foregoing answer as not responsive and immaterial and moves the court to exclude it.

275. What interest if any had Mr. Little in your company at that time or in your proposed company?

Objected to as immaterial and incompetent.

A. I understood he was to be interested in the company as a stockholder.

Mr. IRWIN: The complainant objects to the foregoing answer as not responsive and not stating the knowledge of the witness and moves the court to exclude it. I wish, Mr. Miller, you would confine your answers to what you know and not state what you think or have heard.

Mr. TICHENOR: You should not attack your own secretary so viciously.

Mr. IRWIN: I think his testimony would be better if he stuck to his own knowledge of affairs.

The MASTER: The witness is intelligent and I think he can take care of himself. The question calls for your personal knowledge, Mr. Miller.

The WITNESS: As I stated before I understood he was to become interested and be a stockholder in the company.

(Mr. TICHENOR:)

276. Had he any interest then within your knowledge or had it reached a point yet where any interest had become definite?

Objected to as incompetent and immaterial.

916 The MASTER: I think it competent in view of the former answer of the witness.

A. It had not reached that point.

277. State whether or not prior to the time you had this conversation with Mr. Little over the telephone Mr. Walsh had instructed you or directed you, to confer with him in matters pertaining to obtaining frontage or any other matters preliminary to the organization of the company?

Objected to as incompetent and immaterial.

A. I think he had.

278. You may state the scope of that instruction as given by M Walsh—to what subjects did it extend.

The MASTER: I think your question objectionable, Mr. Tichenc in that it assumes it was an instruction; if he gave any direction that is one thing, but whether that amounts to instructions or not another thing.

Mr. TICHENOR: What I am trying to find out is what Mr. Wals said. I withdraw the question.

279. What did Mr. Walsh say with reference to that subject?

Objected to as immaterial.

A. As I recollect he told me to work with Mr. Little.

280. Did he specify any particular line in which you were to con sult Mr. Little or confer with him or was his statement only of general character?

Objected to as incompetent and immaterial and if instruction were given what he said would be the best evidence; it is for th court to determine from what was said whether it was an instructio direction or request.

A. Of a general character.

Mr. IRWIN: I move to exclude the answer as incompetent, becaus the only competent evidence would be as to what was said, i anything, and it is for the court to determine the purpor
917 and what was meant by what might have been said.

The MASTER: The answer is responsive and is certainly competent if the question is. The answer may stand.

281. State as accurately as you now remember it what Mr. Walsh said upon that subject?

Objected to as immaterial.

A. As I said before, he said for me to work with Mr. Little

282. State whether or not you had any correspondence with Mr Little touching the matters leading up to the organization of the company?

Objected to as immaterial.

A. No.

283. When, with reference to the time of the completion of the organization, of complainant company did Mr. Little become iden tified with it in an official capacity, if at all?

Objected to as immaterial.

A. It seems to me that the first meeting we had of the directors after the company was organized he was elected a director and vice president and manager.

284. Does your answer refer to the meeting held in the Niagara building at the time of the original election of directors?

Objected to as immaterial.

A. No, my recollection is Mr. Little was not present at that meeting.

285. Was he present at the time he was elected vice president and manager?

Objected to as immaterial.

A. The first meeting that I recollect of Mr. Little being present at was held at our office in the back room No. 211 Main St.

286. And that, you think, was later than the meeting at which the directors were originally elected?

918 A. It is possible he was elected before that, but my recollection is that was the first time he showed up in a meeting.

287. Do you remember at this time who constituted the first board of directors of your company?

Objected to as immaterial and incompetent, the charter being the best evidence of that.

A. I recollect most of them I think.

288. Who were they?

A. (Witness referring to Exhibit "18") Sumner R. Clarke; Ben Warren, Jr.; F. T. Corning; Oliver J. Bailey; George H. Littlewood; Theodore J. Miller and Philo B. Miles.

289. Where did all those gentleman reside at the time of their election as directors?

Objected to as immaterial.

A. They all resided in Peoria.

290. How long had they resided here, if you know.

Objected to as immaterial.

A. With the exception of Mr. Littlewood, I should say they had all resided here at least 20 years.

291. How many of those seven gentlemen, so far as your knowledge extends, were personally acquainted with Mr. Little at that time?

Objected to as immaterial.

A. I don't know.

292. Up to the time Mr. Little was elected vice president and manager as you have stated, who of those directors were personally acquainted with him, if you know?

Objected to as immaterial and already answered.

A. Sumner R. Clarke, was acquainted with him and myself.

293. Do you know of any others in the directory that were?

A. I don't know.

919 294. What knowledge, if you know, had the other directors of Mr. Little's capability or experience in the gas industry?

Objected to as immaterial.

A. I don't know.

295. State whether or not prior to the time he took up the duties of his office in connection with your company Mr. Little had ever been a resident of Peoria or its immediate vicinity?

Objected to as immaterial.

A. I don't think he had.

296. How did it happen if you know that he was elected to the offices you have mentioned?

Objected to as immaterial.

A. He was considered a desirable man to have in the position of manager by all that voted for him.

297. Do you know that of your own knowledge?

A. Yes sir, in a general way it had been discussed and he was said to be a good man for the place.

298. From what source or sources did the remaining five of those directors obtain their information respecting Mr. Little's qualifications for the place?

Objected to as immaterial.

A. I think principally from Sumner R. Clarke.

299. Had they any other knowledge of him than that coming through Mr. Clarke or yourself?

Objected to as immaterial.

A. None that I know of.

300. When within you knowledge did Mr. Clarke first meet Mr. Little?

Objected to as immaterial.

A. Mr. Clarke met Mr. Little in Sioux City, Iowa, at the time he was married: Mr. Little was at Mr. Clarke's wedding 10 or
920 12 years ago.

(Mr. IRWIN:)

301. Were you there?

Ans. No I was not.

(The SAME:)

302. How do you know it then?

Ans. Mr. Clarke told me.

(Mr. TICHENOR:)

303. Within your knowledge when did Mr. Clarke first become acquainted with Mr. Little?

Objected to as immaterial.

A. They were acquainted when Mr. Little walked into the Grand Pacific hotel the morning I have spoken of.

304. At whose suggestion was Mr. Little elected to the offices you have mentioned?

Objected to as immaterial.

A. My recollection is that Mr. Clarke recommended him as a good man for the place.

305. State whether or not that was at the meeting at which he was elected or at some preceding meeting?

Objected to as immaterial.

A. It may have been at a preceding meeting.

306. I think you have stated you first met him in Chicago on the occasion concerning which you have testified?

A. Yes sir, that was the first time I ever saw him.

307. You took the stock, did you not, which you subscribed for?

Objected to as immaterial.

A. Part of it.

308. And you have been a stockholder of that company ever since then and are now?

Ans. Yes sir.

309. State whether or not prior to your election as secretary of complainant company you received any compensation for your services in connection with its organization?

Objected to as immaterial and incompetent.

A. I did.

921 310. Who paid you?

Objected to same grounds.

A. Sumner R. Clarke.

311. On how many different occasions prior to the election to which I have referred did he make payments to you?

Objected to same grounds.

A. I should say four or five times.

312. State whether or not Mr. Clarke paid to you any money other than for your services—I mean by that, money that belonged to others that had been at work in the organization or in obtaining frontage, for services they had rendered?

Objected to same grounds.

A. My recollection is he did not pay any money to me direct for the solicitors I had employed but he furnished the money for their pay.

313. Up to the time of your election as secretary who paid for all services rendered so far as they pertained to obtaining frontage and any work that was preliminary to the organization of the company?

Objected to as immaterial.

A. Sumner R. Clarke.

314. Do you know of your own knowledge whether he made those payments out of his own funds or out of funds that came from some other source?

Objected to as immaterial.

A. Out of his own funds.

315. Do you know of your own knowledge whether such funds so paid out by him have ever been repaid to him?

Objected to as immaterial.

A. I could not say of my own knowledge.

316. What if any action has ever been taken by the board
922 of directors of your company with your knowledge with respect to refunding to him any sums of money by him so advanced.

Objected to as incompetent and immaterial.

A. I suppose it has been refunded, but I don't know it of my own knowledge.

317. What are and have been your duties as secretary of that company and what have you actually performed?

Objected to as immaterial.

A. I have kept the minutes of the meetings, signed checks in Mr. Little's absence and made myself generally useful.

318. Have you authority from the board of directors to sign checks in the absence of Mr. Little?

Objected to as incompetent and immaterial.

A. I don't know really whether I have or not but the bank understands it and I sign checks and they are paid.

319. What portion of the time, since you have been secretary of that company, have you devoted to that service?

A. I cannot tell but I have been there nearly every day and if I do not happen to be there when wanted I go there on telephone call.

320. Are you or are you not regularly employed in that office?

Objected to as immaterial.

A. No, I don't consider myself as regularly employed, that is to the extent of putting in my time there only as required.

321. Have you or have you not any regular hours for duty at that company?

Objected to as immaterial.

A. No, I have not.

322. Have you ever had?

(Objected to as immaterial.)

A. Yes, for awhile I went around there every morning about 10 o'clock and did what was required of me in the way of
923 signing pay checks or signing checks for freight or anything of that kind that was necessary.

323. State whether or not during the time you have been such secretary you have had a regular salary?

Objected to as immaterial.

A. I have received pay regularly every month.

324. State whether or not the members of the board of directors have also had regular salaries as directors that have been paid?

Objected to as immaterial.

A. Not that I know of.

325. State whether or not they have within your knowledge received any compensation for their services as directors?

Objected to as immaterial.

A. Not that I know of.

326. State whether or not any resolution or motion has ever been passed by the board of directors touching their compensation for services as directors?

Objected to as immaterial and incompetent.

A. I don't recollect.

327. If any such resolution or motion had been passed, would you know of it?

Objected to same grounds.

A. I probably would.

328. State whether or not since your election as secretary you have kept all the minutes of the meetings?

Objected to same grounds.

A. I have kept them.

329. State whether or not the record book, containing the minutes of the proceedings before the board of directors, has at all times during your incumbency of the office been in your custody?

Objected to same grounds.

924 A. The minute book has been in the vault of the company but of course I have had access to it at any time.

330. In whose handwriting have those minutes been entered?

Objected to same grounds.

A. A good many of them are in the handwriting of Miss Lizzie Pulsipher a clerk.

331. Who has signed them if anyone?

Objected to same grounds.

A. I have.

Adjourned by agreement until Friday February 21, 1902, at 10 o'clock a. m.

United States court room, Government building.

PEORIA, ILLINOIS, FRIDAY, *February* 21, 1902—10 a. m.

Parties met pursuant to adjournment.
Present same as before.

Direct examination of THEO. J. MILLER resumed by Mr. Tichenor:

332. What is the regular time for the meeting of the board of directors of complainant company and what has it been since its organization?

Objected to as incompetent and immaterial.

A. I don't really remember.

333. How many times per month?

Objected to same grounds.

A. I really don't know.

334. How frequently has such meetings been held?

Objected to same grounds.

A. Meetings have been held whenever there was any business to transact, averaging I should say probably once a month.

335. Does your answer cover the time from its organization up to now?

Objected to same grounds.

925 A. Yes sir.

336. State whether or not all of the directors regularly attend all those meetings and have since the organization of the company.

Objected to same grounds.

A. Most of those that live in the city attend.

337. Were there any members of the first board of directors that were not residents of Peoria?

Objected to same grounds.

A. Not of the first board.

338. When was your second board of directors elected or when were any changes made in the directory after the organization of the company?

Objected to same grounds.

A. There were some resignations and the vacancies were filled.
339. Do you remember when that was?

Objected to same grounds.

A. I cannot be exact but it was something like a month or two perhaps after the organization.
340. Who were those directors that resigned?

Objected to same grounds.

A. Philo B. Miles was one of the gentlemen who resigned and I believe O. J. Bailey.
341. Do you remember any others?
Ans. Not that I think of.
342. State whether those two gentlemen were present at the time they were elected directors of the company?

Objected to same grounds.

A. I think they were.

343. State whether or not there was any arrangement or
926 understanding at that time with reference to their continuing in the directory or otherwise?

Objected to same grounds.

A. I don't know.
344. Were you present at that meeting?
Ans. I was.
345. Why did Philo B. Miles resign if you know?

Objected to same grounds.

A. I don't know.
346. State whether or not his resignation was presented in writing or orally?

Objected to same grounds.

A. My recollection is it was in writing.
347. To whom was that communication addressed if you remember?

Objected to same grounds and also as not the best evidence.

A. I don't remember who it was addressed to.
348. Into whose custody was the paper committed after its receipt?

Objected to as immaterial.

A. I don't really remember.

349. State whether or not you ever saw the communication to which you have referred?

Objected to as immaterial.

A. I think I have.

350. State whether or not as secretary of complainant company that is part of the files and papers of the company in your custody at the present time?

Objected to as immaterial.

A. It is probably with the papers and files.

351. Will you obtain it and produce it in court if it is in your custody?

(Objected to as incompetent and immaterial)

A. Yes sir.

352. Were you present at the time Mr. Miles' resignation
927 was accepted by the board of directors if it was so accepted?

Objected to as incompetent and immaterial.

A. I was.

353. What discussion was there at that time with reference to his resignation, or the advisability of his retiring, or any other questions pertaining to that subject?

Objected to same grounds.

A. I don't remember what discussion took place.

354. Do you remember at this time what the foundation of his retirement was?

Objected to as immaterial.

A. I do not.

355. Have you any knowledge whatever concerning the source or reasons for his retirement?

(Objected to same grounds.)

A. I have not.

356. Up to that time were the board of directors of your company the same as at first election?

Objected to as immaterial.

A. I think it was.

357. Was he the first one to resign?

Objected to same grounds.

A. I think he was.

358. Did he ever personally give you any reason for retiring, or wishing to retire, from the management—I am speaking now of any matters outside of the communication to which you have referred?

Objected to as incompetent and immaterial.

A. I don't recollect of any.

359. How long have you known Philo B. Miles?

Objected to as immaterial.

A. I have known him for some years, I could not tell just how many.

928 360. What was his business at the time in question?

Objected to as immaterial.

A. Grain man at the board of trade.

361. He was at one time mayor of the city of Peoria was he not?

Objected to as immaterial.

A. Yes sir.

362. But was not during the time that these gas questions were pending?

(Objected to as immaterial.)

A. No, he was not mayor at that time.

363. Was the full board of directors present at the time Mr. Miles' resignation was accepted?

Objected to as immaterial and incompetent.

A. I think so.

364. When with reference to Mr. Miles' resignation did Mr. Bailey resign?

(Objected to same grounds.)

A. I think the same day.

365. Was Mr. Bailey present at the time of the original election of directors?

(Objected to as immaterial.)

A. I think he was.

366. Do you remember whether or not any conditions were attached to his election originally?

(Objected to same grounds.)

A. I don't know of any conditions.

367. The two resignations were accepted at the same time, were they?

(Objected to same grounds.)

A. That is my recollection of the matter.

368. Who were elected to fill the vacancies caused by those two resignations?

(Objected to same grounds.)

A. I think Lyman A. Walton of Chicago was one of the gentlemen and I think F. W. Little was the other.

369. What was Mr. Walton's business at that time if you know

Objected to as immaterial.

929 A. I think he was manager of the Equitable Trust Company of Chicago.

370. What relation existed in a business way or otherwise between Mr. Walton and John R. Walsh at that time?

Objected to as incompetent and immaterial.

A. I think Mr. Walsh was interested in the Equitable Trust Company of which Mr. Walton was manager.

371. Do you know whether or not Mr. Walton was then engaged in any other line of business?

Objected to as immaterial.

A. I do not.

372. Do you know at whose recommendation Mr. Walton was elected a director?

Ans. I do not.

373. In what way did Mr. Walton's name get before the meeting at the time of his election, if you know?

Objected to as immaterial.

A. I don't remember.

374. State whether or not you as secretary of your company received any communication from any person pertaining to the proposed election of Mr. Walton as a director of your company?

Objected to as immaterial and incompetent.

A. I don't know whether I did or not.

375. When for the first time did you meet Mr. Walton and under what circumstances?

(Objected to as immaterial.)

A. I first met him I think at Chicago; I don't remember the circumstances.

376. How long prior to his becoming a director in your company did you meet him?

(Objected to as immaterial.)

A. I could not state.

377. State whether or not within your knowledge Mr. Walton was an experienced gas man or otherwise?

(Objected to as immaterial.)

A. I don't know.

930 378. Do you know from any information which you have since received whether or not he was at that time an experienced gas man?

Objected to as immaterial.

A. Yes, I think he knew something about the gas business.

379. State in what manner Mr. Bailey's resignation was presented to your company—whether in writing or orally?

Objected to as immaterial.

A. My recollection is it was in writing.

380. State whether or not that communication is now in your possession as secretary of the company?

Objected to as immaterial.

A. I don't know whether it is or not.

381. Will you look and if you find it produce it in court?

A. I will.

382. In what line or lines of business has Mr. Bailey been engaged during the past years?

Objected to as incompetent and immaterial.

A. O. J. Bailey has been engaged in the banking business, real estate business, money loaning business and cattle business.

383. Do you know what official connection at that time he had with any Peoria bank?

Objected to as immaterial.

A. He is connected with the Dime savings bank and also with the Central national bank.

384. What official positions did he hold in each of those banks, if you know?

(Objected to as immaterial.)

A. He was president or vice president of both.—no I think Mr. Callender was president of the Dime savings bank.

385. Were the resignations, to which you have referred, the only ones which took place in your directory during the first year of the company's business?

Objected to as immaterial and incompetent.

931 A. I could not state.

386. Have there been other resignations than those to which you have referred at any time since the organization of the company?

Objected to as immaterial, incompetent and not the best evidence.

A. Yes sir, I think Geo. H. Littlewood resigned.

387. When?

Ans. I don't remember the date.

388. Do you know under what circumstances Mr. Littlewood resigned as a director?

Objected to as immaterial and incompetent.

A. I do not.

389. Were you present at the time the resignation was accepted?

Objected to as immaterial.

A. I don't remember.

390. Who was elected to fill the vacancy occasioned by his resignation?

(Objected to as immaterial.)

A. I don't know.

391. In what manner were all of those three vacancies filled, if you know?

(Objected to as incompetent, immaterial and not the best evidence.)

A. My recollection is they were elected by a vote of the directors present.

392. State whether or not the records of your company show the causes for those resignations and the manner in which the vacancies were filled and the persons filling them?

Objected to as incompetent, immaterial and not the best evidence.

The MASTER: I think that a good objection, Mr. Tichenor.

393. Are you willing to produce in court the records of the company as kept by you as secretary if hereafter called for by counsel for the defendant?

Mr. IRWIN: Complainant objects to the question on the same grounds as before stated and I instruct the witness that in my judgment he has no right to produce those records unless authorized by the board of directors.

932

A. I will not produce the records until I have authority to do so from the board of directors.

394. You have already stated, have you not, that the record book in question is in your custody as secretary?

A. In the vault of the company.

395. And that it always has been in your custody and it is properly in your custody as such secretary, is it not?

Objected to as calling for the conclusion of the witness and a question of law.

A. Yes sir.

396. Will you when this hearing next convenes state positively whether or not you will produce the records to which I have referred?

Objected to as incompetent and immaterial and because the witness has no right to produce the record without authority from the directors.

A. You want me to say whether or not I will then say whether I will produce it or not.

397. Yes sir.

A. I will.

398. State whether or not during the time covered by your incumbency of the office of secretary of complainant company the various questions and matters coming before the board, and the discussion and ultimate disposition of them, have been made a matter of record in your minute book?

Objected to as incompetent, immaterial, irrelevant and not the best evidence.

933 The MASTER: I think that is competent; the witness may answer the question without attempting to give the contents of the book.

A. Minutes were kept of the business that was transacted.

399. Under whose direction and supervision have those minutes been written into the record, so far as they have been written by you personally?

Objected to as immateria-

A. Miss Pulsipher has written them in from memoranda I hav made and I have not always been present when she has written them and I don't know whether she had any instructions from anyone else or not.

400. She is the only one that has had anything to do with that work except yourself?

Ans. So far as I remember.

401. And within your knowledge she has received no instructions or directions in that regard except from you?

Ans. No sir.

402. Do the changes in the directory, as testified to by you, cover all that have been made since its organization.

Objected to as incompetent and immaterial.

A. All I think of.

403. Since the election of Mr. Walton as a member of the board how frequently has he attended its meetings?

Objected to as immaterial.

A. He has been present at some of the meetings; I don't remember how many.

404. Since the organization of the company how many meetings of the board of directors has John R. Walsh attended so far as your knowledge extends.

Objected to as incompetent and immaterial.

A. I don't recollect.

405. State whether or not he has attended any of them?

Objected to same grounds.

A. I don't know whether he has or not.

934 406. State whether or not if he has attended any of the board meetings the records will so show?

Objected to as incompetent, immaterial, irrelevant and not the best evidence.

The MASTER: I don't think it competent to prove that fact by oral testimony. In other words, I don't think it competent to prove any written fact by oral testimony, still I have not power to exclude the evidence if you want it in.

Mr. TICHENOR: I will withdraw the question, reserving the right to recall Mr. Miller on that point in the event the record does not disclose his presence at any of those meetings.

407. You testified yesterday that in your judgment the inauguration of a competing gas company in Peoria would be a good thing for all concerned, explaining, as I remember your testimony, that you meant the parties interested directly in the company and also the people in Peoria generally—in what way would that benefit or advantage come to the people generally in your judgment?

Objected to as incompetent and immaterial.

A. Well, they would have an opportunity of buying gas from other people besides the old company which had been having its own way here for 40 years.

408. State whether or not at that time and previously the capacity of the old company's works was sufficient for the demand in the territory reached by it so far as your knowledge extends?

Objected to as incompetent, immaterial and irrelevant.

A. Well, I think its capacity was great enough to supply the demand.

409. The old company was then furnishing gas for fuel purposes as well as for illumination, and had been for a number of years?

Objected to same grounds.

A. Yes, sir.

935 410. Will you state accurately and definitely in just what the advantages and benefits in your judgment to accrue to the people in this locality generally, consisted, by the inauguration of a competing gas company here—give the items and details as accurately and definitely as you are able to do so as they then existed in your judgment?

Objected to same grounds and also because it has already been asked and answered.

A. Well, where there is more than one party engaged in a business it is better for a customer as it gives him a chance to buy his goods where it suits him the best or gets them the cheapest whereby if he is compelled to trade with one merchant all together, he is at

the mercy, to a certain extent, of that man's ideas of doing business; he is also apt to receive more polite treatment and I think sometimes better prices if there is competition.

411. State if it is not true that at that time it was your judgment, that the only benefit to be derived by gas consumers in Peoria from competition would come in the reduction of prices then charged in this territory and was not that the only possible benefit that could accrue to them?

Objected to same grounds.

The MASTER: I think that is substantially calling for the same answer he has already given but the witness may answer if you desire.

A. No.

412. What were the others?

(Objected to same grounds)

The MASTER: If he can give any others in addition to those already given, he may answer.

A. Well, putting in free service pipes from the main to the houses and making no charge for setting meters and collecting no meter rents from the customers; those were all benefits to the consumer.

936

413. State whether or not the old gas company at the time of the organization of complainant company was making any charge for meter rents?

(Objected to same grounds.)

A. I don't know that they were making any charge for meter rent but they were charging for setting meters.

414. How many years within your knowledge had it been since that company had made any charge for meter rent?

Objected to as immaterial, incompetent and irrelevant.

A. I don't know.

415. State what if any advantage would accrue to any given customer by having service pipes from the mains of two different companies into his premises, or by having two different companies operating in the same territory, if there were any other than already explained by you?

(Objected to same grounds.)

A. Well, the matter of polite treatment of customers; frequently parties made complaints to the old company about their gas bills and they were told if they did not like it they could take out their meters and such as that.

416. Are you telling that of your own knowledge?

A. I am telling what I have been told.

Mr. TICHENOR: Then I move to exclude that answer from the records.

The MASTER: The answer may stand.

417. In what instance do you personally know of complaints of that character in the last 10 years?

Objected to as incompetent and immaterial.

A. I have had no trouble with them.

418. How many miles of streets to your knowledge over which your company proposed to operate had been paved prior to
937 the time you began to procure frontage as preliminary to making your application for a license to use the streets?

A. I should say about 5 miles.

419. How many miles of paved streets were there in the city of Peoria at that time, if you know?

Objected to as incompetent, immaterial.

A. I don't know exactly how many miles had been paved.

420. So far as your knowledge extends, how many were there?

Objected to same grounds.

A. I should say possibly 40 miles.

421. State whether or not the portions of the city where streets were paved were densely populated or filled with business interests at the time you began to procure frontage for obtaining your license to use the streets?

Objected to as incompetent and immaterial.

A. Reasonably so.

422. How did the density of population and business interests then along the lines of paved streets compare with the density in those portions of the town where the streets were not paved?

Objected to as incompetent, immaterial and irrelevant.

A. There was more business houses and more residence on the paved streets than there were out in the outskirts.

423. At the time you were procuring frontage to be used in connection with procuring a license to use the streets what objections, if any, did you meet with reference to damages to paved streets, inconvenience from having them opened etc., for the purpose of construction—I am asking for your personal knowledge?

Objected to as incompetent, immaterial and irrelevant, especially in view of the testimony of the witness that the actual work of procuring such frontage was done by others and must therefore, necessarily rest on hearsay.

938 A. I remember once — case where a Mr. Merckle on Bridge St., objected to signing his frontage on account of the damage

it might do the pavement; he came to see me personally about it and I assured him we would replace the pavement in as good condition as it was possible to do; that satisfied him and he signed his frontage.

424. What, if any, advantages did you assure Mr. Merckle would accrue to him by having a competing company in the gas business here?

Objected to as incompetent, immaterial and irrelevant.

A. I think I told him if we could get sufficient frontage and get a fair ordinance we would build a works and it would not be like the other people who had been around to see them and trying to get a franchise to sell out, that we meant business and would build a works here.

425. Anything further?

Ans. I don't recall anything more.

426. Is that the only person with whom you had a conversation on that subject so far as you can now recall?

A. No, there were others.

427. State whether or not you held out to any of those prospective customers any advantages to be gained by way of compensation for damages to streets and inconvenience during the time of construction, or anything else from having competition?

Objected to as incompetent, immaterial and irrelevant.

A. I did not promise them any compensation; I, in some cases, told them of Mr. Coffey's threat that if we built he would put the price of gas to fifty cents a thousand, but we were going ahead and build anyway.

428. What, if any, changes in your plans were made consequent upon the threat made by the old gas company to reduce the price of gas to 50c. per thousand feet?

(Objected to same grounds.)

A. Well, in the first place it did not make any difference, but when we came to sell gas we had to sell it for less money in order to get business.

939 429. State whether or not at any time since your company began to deliver gas it has had more than one price for illuminating gas and one price for fuel gas at the same time?

Objected to same grounds as before.

A. Yes, we charged more for illuminating gas than we did for fuel gas.

430. You don't understand me. Have you at any time since you have been furnishing gas, charged to consumers of illuminating gas different prices—I mean at one and the same time?

Objected to same grounds.

A. No.

431. How has it been with reference to fuel gas?

Objected to same grounds.

A. Not that I know of.

432. In other words then, at any one time your prices have been uniform over the whole territory covered by your company?

Objected to same grounds.

A. I think so.

433. What was the price charged for illuminating gas and what for fuel gas when your company first began service? That is, when you were ready to deliver gas and sell it?

Objected to same grounds.

A. My recollection is we charged 40c. per thousand with a discount of 10c. per thousand for prompt payment by the 10th, of the month for both illuminating and fuel gas.

434. Who fixed those prices?

(Objected to same grounds.)

A. I think, Mr. Little.

435. What, if anything, had the board of directors to do with the fixing of those prices?

(Objected to same grounds.)

A. I don't think the board had anything to do with it; I think perhaps Mr. Little talked with some of us.

940 436. State whether or not you, as a member of the board of directors, knew what price was fixed at that time?

Objected to same grounds.

A. I knew it.

437. Do you know whether or not the other members of the board also knew it?

(Objected to same grounds.)

A. I do not.

438. State whether or not the question of charging 40c. for gas, as you have stated, was considered in the board of directors at any time about the time you began to serve gas to consumers?

Objected to same grounds.

A. I don't remember.

439. For how long a period of time did your company continue to furnish gas at the rate which you have stated?

Objected to same grounds.

A. I think from April 1900 until September 1900.

440. State whether or not during that period you were operating

in the same territory covered by the Peoria Gas Light & Coke Co., by its service?

(Objected to same grounds.)

A. I think we were in some places and in some places I think we were in new territory.

441. Who of your company, if you know, made the change in price in September 1900, as you have stated?

(Objected to same grounds.)

A. I don't know.

442. When, with respect to the time that new price went into effect, did you learn of it and in what way?

Objected to same grounds.

A. My recollection is I learned it from Mr. Little.

442. What, if any, discussion of the proposed change had taken place in the board of directors?

(Objected to same grounds.)

A. As I now remember it the talk was we were doing busi-
941 ness at a loss by selling gas—Interrupted——

Mr. RITCHER: I object; if this discussion took place in a meeting of the board of directors it is not the best evidence.

The MASTER: If it is in the minutes it would not be.

The WITNESS: I am not certain this occurred at a meeting of the board of directors.

443. (Int. 442 repeated to the witness.)

A. I don't know of any discussion on that subject taking place in the board of directors.

444. State whether or not the subject was mentioned in any way at any meeting of the board of directors?

(Objected to same grounds.)

A. I don't remember whether it was or not.

445. Who, if anyone, from the time of the organization of the company up to the month of October, 1900, had authority to make prices to be charged for gas?

(Objected to as incompetent and immaterial.)

A. I should say Mr. F. W. Little.

446. Do you know from what source that authority originated? In other words, do you know the primary source for the authority of fixing the price of gas?

A. Well, Mr. Little was manager of the company—Interrupted——

The MASTER: No, answer the question yes or no?

The WITNESS: Yes.

447. Where was it?

(Objected to same grounds as before.)

A. Why, Mr. Little was governed in his actions by consultation with the larger stockholders and the directors who were interested in the affairs of the company.

448. What change was made in the prices at the time you have mentioned in September 1900?

(Objected to same grounds.)

A. I am not positive whether it was in September or October, but my recollection is the net price of illuminating gas was placed at $1.15, and the net price of fuel gas at 75c.

942 449. What were the gross prices of each?

Objected to same grounds.

A. I don't know.

450. Did you personally sign the paper offered in evidence in this case marked Exhibit "19"?

Ans. I did.

451. At about the time it bears date?

Ans. I think so.

452. When you signed that paper did you know the prices charged by the Peoria Gas Light & Coke Co., at that time for fuel and illuminating gas?

(Objected to as incompetent and immaterial.)

A. I did.

453. What were those prices?

(Objected to same grounds.)

A. They had reduced the price of illuminating gas from $1.25 net to $1.00 a short time before that communication was made to the city council—a few weeks before possibly; fuel gas had been 75c. net and they raised it to $1.00.

454. So that, at the time Exhibit "19" was prepared and signed the price of illuminating gas and the price of fuel gas were each $1.00 net?

(Objected to same grounds.)

A. That is my recollection.

455. At that time you were using both fuel and illuminating gas were you not?

Ans. I personally was not—simply illuminating.

456. What were the prices charged by the Peoria Gas Light & Coke Co., from the time your company began to serve gas up to the time it made the change, to which you referred in your testimony a short time ago?

(Objected to as incompetent and immaterial)

A. My recollection is when we got ready to do business they re-

duced the price of gas to 50c. and kept it there for some months and in some cases made even a lower price than that.

457. Do you remember at this time, of your own knowledge, the lowest price made by the old company at any time up to the date of your change in price?

943 A. I am not positive, but I think they were as low as 30c.

458. During that time from which company were you taking gas?

A. I took gas from the old company part of the time, but as soon as I could get our own gas I quit taking from the old company.

459. Do you remember now about when you began taking from the new company?

(Objected to as immaterial.)

A. In May 1900.

460. At that time the price was as you have stated?

Objected to as incompetent and immaterial.

A. That is my recollection of it.

461. Is it not true that there was a change in price charged by your company between April 1900 and September or October 1900?

Objected to as incompetent, immaterial and irrelevant.

A. Not that I remember of.

462. In the statement made by you with reference to prices charged by the old company during the period from April to September or October 1900, did you intend to include both illuminating and fuel gas—in other words, were they the same price?

Objected to same grounds as before.

A. I think they were.

463. And that was true of your company too?

Objected to same grounds.

A. I think so.

464. Up to what time did the price which you have named as charged by the old company remain at 30c.?

Objected to same grounds and also as assuming the general price was 30c. and assuming the witness knows.

A. 5 or 6 months.

465. Do your know of your own knowledge what change the old company made in the prices when such a change was made?

Objected to as incompetent, immaterial and irrelevant.

944 A. I know they increased the price but just what they fixed it I don't remember, but it was increased from what they had been charging.

466. Do you remember at what point the prices were placed?

Objected to same grounds.

A. No, I do not exactly, but my recollection is they raised the price to above a dollar on illuminating gas.

467. Is it your recollection they made the price of illuminating gas the same as your company did?

Objected to same grounds.

A. I believe it was about the same.

468. What was their increased price for fuel gas if you remember?

Objected to same grounds.

A. My recollection is they placed that at 75c.

469. How long did your company continue to furnish gas at the prices which you have mentioned after the increase to which you have referred?

(Objected to same grounds.)

A. My recollection is they continued furnishing gas at those prices until the court decided they could not charge two prices.

470. What court was it and in what case?

Objected to same grounds.

A. It was in a case brought by The Peoria Journal Co., *vs.* The Peoria Gas Light & Coke Co., in the circuit court of Peoria Co., and the result affected us also.

471. Do I understand from your testimony that up to the time of the decision in that case that your net price had been 75c. for fuel gas and $1.15 for illuminating gas?

Objected to same grounds.

A. Yes sir;

472. What change did you make at that time after that decision?

Objected to same grounds

945 A. I think then we changed the price to one dollar for both illuminating and fuel gas.

473. To refresh your recollection I will ask you if the net price for illuminating gas had not then for some time been a dollar instead of $1.15, as you say by your company?

A. My recollection is we charged $1.15 for illuminating gas and when we made the change we made it $1.00 net for illuminating and fuel gas.

474. When, with reference to your placing the net price of gas at 75c. and $1.15 as you have testified, was done in September or October 1900, did the Peoria Gas Light & Coke Co., fix the same price you have mentioned?

(Objected to same grounds and because already answered.)

The MASTER: I think it has already been gone over; I think he has answered that question and said it was about the same time.
Mr. TICHENOR: Did you so answer?
The WITNESS: I did.

475. Do you know whether or not the Peoria Gas Light & Coke Co. after the decision to which you have referred changed its price and if so, where they were placed?

Objected to as incompetent and immaterial.

A. Yes sir; they changed their price also.

Mr. RITCHER: Do you know that? It is not a fact?
The MASTER: The question asked for his knowledge.
The WITNESS: I think they did.
Mr. RITCHER: What do you say you know for when you don't know. They changed a year before that and have not changed it since. You are conducting a hearsay examination here, Mr. Tichenor, when you ought to know the facts as well as we do.
Mr. TICHENOR: If I need any of your assistance I am not too bashful to ask for it. I am conducting this examination and I will conduct it in my own way until the master instructs otherwise.

946 476. Did you know of the presentation to the city council of the ordinance for a license to your company to occupy the streets, alleys etc., of Peoria for the purpose of construction?
Ans. Yes sir.
477. What, if anything, did you have to do with its preparation?

Objected to as incompetent and immaterial.

A. I had nothing to do with the preparation of it.
478. Who of your company, so far as you know, participated in the preparation of that ordinance?

Objected to as incompetent and immaterial.

A. Mr. F. W. Little.
479. Is he the only one within your knowledge?

Objected to same grounds.

A. Possibly Sumner R. Clarke.
480. At the time you signed Exhibit "19" did you know that the ordinance had been presented?
Ans. Yes sir.
481. Do you at this time remember how long it had been pending when Exhibit "19" was prepared and signed?

(Objected to as immaterial.)

A. Yes sir.
482. What is your recollection of that at this time?

Objected to as immaterial.

A. It had been presented to the council two weeks before the signing of that paper.

483. What, if anything, did you have to do with the passage of that ordinance?

(Objected to as incompetent, immaterial and irrelevant.)

A. I talked with Ellis Powell about it; I did all I could with different aldermen.

484. State whether or not during the pendency of that ordinance you saw all of the members of the city council at that time with reference to its passage?

Objected to as incompetent, immaterial and irrelevant.

A. I think I saw most of them.

947 485. Are you able to state at this time how many times you saw the different members of the council on that question?

Ans. No.

486. Was it frequently or only a few times?

Objected to as immaterial.

A. Not very frequently.

487. State whether or not during the time of the pendency of that ordinance you were on any occasion before the committee to which the ordinance had been by the council referred?

Objected to as immaterial.

A. I think I was.

488. Do you remember at this time who composed that committee?

Objected to as immaterial and not the best evidence.

A. I remember going over to the city hall with Mr. Irwin and talking to Mr. Powell and Mr. Gorman who did not see it as we wanted them to.

489. Were they the only ones who were opposed to the ordinance?

A. They were all I remember.

490. Do I understand you to say all the others were in favor of it from the beginning?

A. They seemed to be very favorable to it.

491. State whether or not at the time or times you met the committee you found opposition there against the ordinance?

Objected to as incompetent and immaterial.

A. I do not really know that the two gentlemen I have mentioned were on the committee; they were the only objectors I remember of.

492. I will ask you if Mr. Kellerstrauss was a member of that committee?

A. Possibly he was, but he was in favor of this matter.

493. Was not Mr. Wolschlag also a member of that committee?

A. I don't know.

494. Do you remember whether Mr. Powell was a member
948 of that committee?

Ans. No I do not.

495. From the introduction of the ordinance in question were there any objectors, or any who were antagonistic to it, other than Mr. Powell and Mr. Gorman to whom you have referred?

Objected to as incompetent and immaterial.

A. There may have been, but those are the only two I recollect of.

496. Of how many members did the council consist at that time?

A. 14 I think.

497. If you had any special reason for calling on Mr. Gorman and Mr. Powell at the time you have referred to tell what they were.

(Objected to same grounds.)

A. As I remember it, Mr. Powell was not quite satisfied with the kind of an ordinance we wanted; he had some objections but just what they were I do not now recollect.

498. State whether or not Mr. Powell expressed himself as being disinclined to grant another franchise to any company, if so, state what he said.

Objected to as immaterial, incompetent and irrelevant.

A. My recollection is, Mr. Powell objected to an ordinance being granted without a price fixed at which the gas should be sold.

499. Did he make any other objection to the ordinance?

Objected to as incompetent and immaterial.

A. He may have done so; Ellis was quite a stickler when he was over there—pretty particular.

500. What, if anything, did he say with reference to the damage that would necessarily be caused to the streets by the construction of a new gas plant in Peoria?

Objected to as incompetent and immaterial.

949 The MASTER: I do not see how that inquiry becomes material; damage to the streets is a thing an individual is not concerned in and I am at a loss to know how that inquiry is material in this case.

Mr. TICHENOR: I will withdraw the question.

501. What, if anything, did he say by way of objection concerning the matter of tearing up the streets and possible damage, inconvenience and the like to the citizens and others having occasion to use them?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. I do not really remember what he did say on that subject.

502. What, if any, representations did you make to him with reference to any objections which he made to the proposed ordinance?

Objected to as incompetent and immaterial.

A. I do not remember; I know he wanted a clause in there fixing the price and I believe he objected to the length of time we wanted but I am not positive on that point.

503. Do you refer to the length of time before preparing to distribute?

A. No, I mean the length of the license we wanted.

504. Were Mr. Powell and Mr. Gorman the only ones, to your recollection, that objected?

A. They were the only ones that I remember of; I know they objected and laid it over for two weeks.

505. Did any other gentlemen interested in the proposed new company call on the members of the council, or the committee, with you with reference to this matter?

Objected to as incompetent and immaterial.

A. Yes, I think Ben Warren, Jr., and I talked to Alderman
959 Thede.

506. What was the subject of that conversation?

Objected to same grounds.

A. On the same line, that we wanted a fair ordinance and wanted to have as good a show to do business as the old company had—we did not want any restrictions.

507. Did you see Mr. Thede more than once?

Objected to same grounds.

A. Yes, I think I did.

508. On how many occasions during the pendency of that ordinance did you confer with any members of the council other than Mr. Powell and Mr. Gorman with regard to it?

Objected to same grounds.

A. I don't remember.

509. Were they a number of times or only a few?

Objected to same grounds.

A. Well, I talked to different members of the council at different times; I could not tell how many times or how often.

510. How many times were you before the committee having this ordinance in charge?

(Objected to same grounds.)

A. I don't believe more than once.

511. State whether or not you talked with the members of that committee, or any of them, other than on the occasion when you went before the committee as a body?

(Objected to same grounds.)

A. Probably I did.

512. What discussion was there between you and the members of this committee at the time you met it as stated with reference to this particular ordinance?

Objected to as incompetent and immaterial.

A. I am not positive but my recollection is, any objection any of them made was on the length of time for which we wanted
951 the franchise and they wanted us to cut it down and we told them we could not do it, that we wanted to be on the same footing as the old company, that they had a perpetual franchise and we wanted as long a one as we could get; that was the only objection I think of.

513. Were those the objections principally made by Mr. P-well and Mr. Gorman?

(Objected to same grounds.)

A. No, sir, Mr. Powell, as I stated, wanted to have the price fixed I think at 75 cents and Mr. Gorman was for a delay; he was in the employ of the old company and of course I did not figure he would be very friendly to us.

514. How many conversations, if any, more than the one to which you have referred, did you have with Mr. Gorman upon that question?

(Objected to as incompetent and immaterial.)

A. I could not tell.

515. Were there a number?

A. Possibly I met him nearly every day.

516. You were members of the same club, were you not, and met there almost every day at that time?

A. No, I don't know as he was a member of any club I belonged to.

517. Were you present in the council at the time the ordinance was passed?

Ans. Yes, sir.

518. How many meetings of the council did you attend during its pendency?

(Objected to as incompetent and immaterial.)

A. Two.

519. Were those the only ones held during that period?

Objected to same grounds.

A. I think they were.

520. Have you now stated substantially all you had to do in the council, or its committees, connected with the passage of the
952 ordinance in question?

(Objected to as incompetent and immaterial.)

A. No, I left a copy of the Peoria Journal on the desk of each alderman and the unanimous consent of the property owners and a request that a franchise be granted to our company.

521. What do you mean when you refer to the unanimous consent of the property owners?

A. That was the heading of the article in the paper.

522. At the time of the completion of the organization of your company did you or did you not know the price at which gas could be manufactured and delivered to consumers in Peoria?

Objected to as immaterial and incompetent.

A. I did not.

523. What, if any effort, had you made to inform yourself upon that question?

(Objected to same grounds.)

A. I had not made any.

524. At the time you made your stock subscription was it with the intention of taking and paying for the stock so subscribed?

Objected to same grounds.

A. I expected to get some stock, yes sir.

525. State whether or not you know Charles V. Newman who formerly was employed by the Peoria Gas Light & Coke Co.?

A. I do.

526. Was he at one time an employé of your company?

Ans. Yes.

527. What was his duty and what did he do?

A. I think his principal duty was selling gas stoves while with our company.

528. When, with reference to its organization, did he become associated with your company?

A. My recollection is, he came with us after we got to selling gas.

529. To refresh your recollection I will ask you if you do
953 not remember of his being with your company at the time you attempted to procure frontage or shortly afterwards?

Ans. No, he was not.

530. Will your records show when he became an employé of the company?

Ans. I should judge the books would show.

531. Will you examine them and report later as to the time he became an employé?

Ans. Yes sir.

532. I understood you to state that your recollection was that his principal business with your company was in handling gas stoves. Do you remember at this time any other duties he performed for your company?

A. Yes, I think he solicited gas customers.

533. For how long a period of time?

Ans. That I don't know.

534. Do you know what previous experience Mr. Newman had had as a gas man?

(Objected to as immaterial and irrelevant.)

A. Yes, I have heard him tell about having been with other companies in St. Louis and I knew he had been with the Peoria Gas Light & Coke Co. in this city.

Complainant objects to the foregoing answer as hearsay and not responsive and moves the court to exclude it.

535. Within your knowledge acquired from contact with Mr. Newman, was he a man of some skill and experience in the gas industry?

(Objected to as immaterial and irrelevant.)

A. He was a good deal of a wind bag.

536. Not a gas bag—I wish you would answer my question. (Last question repeated.)

Ans. I don't know.

537. When did his connection with your company cease?

A. When he was discharged; I don't remember the date but it was shortly before he commenced getting up an opposition company.

538. Will your books or files show when he was discharged?

A. I think they will.

539. Will you ascertain that fact and report it later on if
954 called for?

Ans. Yes sir.

540. State whether or not, during the entire time covered by his connection with your company, his duties remained of the character you have described?

A. I think they were the same duties all the time.

541. What, if anything, did you have to do with instructing him concerning his duty?

Ans. Nothing whatever.

542. Were you present or did you participate in the preparation of instructions for him concerning his duty with your company?

Objected to as immaterial and irrelevant.

A. I did not.

543. Do you know under what circumstances he became associated with your company in the first instance, if so, what were they?

Objected — as incompetent, immaterial and irrelevant.

A. Yes sir, he wanted to give us a lot of inside information about the gas business in Peoria.

544. When was that with reference to the time he entered your employment?

(Objected to as immaterial.)

A. It was prior to the time; I don't remember how long it was before.

545. Was the question of taking him into your company under consideration by the board of directors, or by the management, for any considerable length of time before he was actually taken?

Objected to as immaterial.

A. I don't believe the directors ever considered the matter.

546. By whom was he employed, if you know?

A. By the manager, F. W. Little.

547. State whether or not you were consulted with respect to his proposed employment?

(Objected to as immaterial.)

A. Not consulted, but I think Mr. Little mentioned it to me.

548. State whether or not Mr. Little gave any reason or
955 reasons for employing him.

(Objected to same grounds.)

A. I don't know unless he said he thought it was a good thing to take him on.

549. Do you remember at this time any reason he gave why he thought it would be desirable to associate him with your company?

Objected to as incompetent and immaterial.

A. No, not unless it was he thought he might get some information from him.

550. Since the time of his discharge, as you have mentioned, has he been in your employ?

Ans. No sir.

551. Have you since that time seen him or had any conversation or correspondence with him with regard to the affairs of the company?

(Objected to as immaterial.)

A. No.

552. How frequently have you seen him since that time with reference to the affairs of your company?

Objected to as immaterial and irrelevant.

A. I saw him I think along last June when this tax review matter was on.

553. What were the questions pending between you and him at that time, if any?

(Objected to same grounds.)

A. No questions at all; he simply wanted to pull our leg.

554. Had Mr. Newman at that time anything whatever to do with the board of review?

(Objected to same grounds.)

A. He was not a member of it.

555. How long is it since you have seen Mr. Newman at all?

A. I do not think I have seen him since last June.

556. What, if anything, had you to do, by way of suggestion or otherwise, concerning the preparation of "Exhibit 19"?

Objected to as immaterial.

A. I think I talked with Mr. Little about it.

956 557. Do you know with whom the ideas or matters embodied in that exhibit originated.

Objected to as incompetent, immaterial and irrelevant.

A. No, not entirely.

558. Do you at all, if so, where?

(Objected to same grounds.)

A. I think I had something to do with it; the old company were trying to make capital out of having reduced the price and were trying to make the people think that if they would stick to them they would get cheaper gas and trying to keep us from getting a franchise and I think I suggested to Mr. Little it would be a good idea to put a communication into the council.

559. Was there any reason, other than the one to which you have referred, that induced you to participate in the preparation and presentation, if you did, of the paper in question?

Objected to as incompetent and immaterial.

A. I don't think of any other reason.

560. Who, if you know, presented "Exhibit 19" to the different people whose signatures it bears to have them sign it?

Objected to as immaterial.

A. I don't remember distinctly but possibly Mr. Clarke and myself, or both of us.

561. State whether prior to the presentation of that paper to the city council, or shortly after, any of the other gentlemen, whose names are affixed to it, expressed to you any opinion regarding its advisability and the purpose to be accomplished by it?

Objected to as incompetent and immaterial.

A. I don't recollect of any.

562. How long was it pending before it was finally completed and delivered to the council, if you know?

(Objected to same ground.)

A. My recollection is it was simply a day or two.

957 563. State whether or not at the time you signed the paper you believed the matters contained in it were true?

Objected to as incompetent and immaterial.

A. I certainly did.

564. State whether or not at the time you signed it you believed that your company would carry out in good faith the statements made in that paper?

(Objected to as incompetent and immaterial.)

A. I did.

565. State whether or not you then believed that the company would be able to carry out the representations made in that paper?

Objected to same grounds.

A. I did.

566. State whether or not your belief upon those questions remained the same all the time up to the passage of the ordinance granting your company a license to use the streets, etc.

Objected to same grounds.

A. I did.

567. Who presented the paper to the clerk or city council, if you know?

(Objected to as immaterial.)

A. I do not remember who delivered it to the city clerk but it was delivered to him.

568. Who, if anyone, had the paper in charge up to the time it was delivered?

(Objected to as immaterial.)

A. I should say Mr. Irwin, Mr. Clarke or myself.

569. Whose ideas were those embodied in "Exhibit 19"?

Objected to as immaterial and already answered.

A. I think the matter was gone over between Mr. Little, Mr. Clarke and myself.

Mr. TICHENOR: I have now gone as far with the witness as I can in the absence of Mr. Mansfield. There are some questions that I desire to discuss with Mr. Mansfield before going further with

958 the witness and I desire to have the right to recall him and examine him further if there is anything I have forgotten.

The MASTER: You can have the privilege of doing so.

Cross interrogatories by Mr. IRWIN:

1. In your direct examination you stated something about the prices charged for gas by the Peoria Gas Light & Coke Co. I will ask you if all your information with reference to the prices charged for gas at the several times you have testified about, to consumers by the Peoria Gas Light & Coke Co. was not such information as you gathered from rumors and newspaper information?

A. Yes sir, and talk that I heard.

2. Talk with whom?

Ans. I don't remember.

3. Was it talk with any of the officers of that company?

A. No.

4. Was it talk with anybody that had authority to speak for that company?

Ans. Not that I recollect of.

5. Well, it was all hearsay talk you heard upon the street from people you met from time to time was it not? and newspaper reports?

Ans. Yes sir.

6. That is all the knowledge you had about it, was it not?

A. Yes.

7. You said you were one of the signers of "Exhibit 19" in evidence. I will ask you if you believed the representations set forth in "Exhibit 19" to be true at the time they were made?

A. I did.

8. Do you now believe those representations were true?

A. Yes sir.

9. You were asked about representations made to the signers of the petition to the city council by the property owners for the granting of an ordinance to the complainant company. I will
959 ask you if you made any representations at any time to any property owner when asked to sign his consent for frontage that you believed was not true?

Ans. I did not.

10. At the time you made the representations to any property owner to whom you talked with reference to getting his frontage consent, did you believe that the statements made by you at that time were true.

Ans. I certainly did.

11. Did you at any time make any representation to any property owner to obtain his frontage consent on an application for an ordinance from the city council with reference to the price that would be charged for gas by your company to consumers at any time?

A. I did not; the only talk about price that was ever brought up was a statement I made about Mr. Coffey's threat who stated to me that if we built a works he would put the price to 50 cents and keep it there for two years; I told Mr. Coffey if we could get a fair ordinance we would build a works anyhow in spite of his statement.

12. Did any of the canvassers for frontage consents, employed by you as you have testified, make any representations to any of the property owners in order to secure their frontage consents to the city council, as to the price to be charged for gas by the complainant company, by your instructions, or by your authority or approval at that time?

Ans. No.

13. Did you give any instructions to them as to any representations to be made with reference to the price to be charged for gas by the new company?

Ans. No.

Re-direct interrogatories by Mr. TICHENOR:

1. What, if any, representations or statements did you make to any such persons with whom you conversed concerning the threats on the part of the old company to reduce the price of gas to
960 50 cents as to your company's meeting that price in the event it should be done?

Objected to as incompetent, immaterial and not proper re-direct.

A. I think I may have said we would go on and build the works in spite of that statement and were going into the business; the fear of persons was we might not build but simply get a franchise and sell out; they were not bothered about the price; they wanted to know whether they were going to have another gas works.

2. Did you or did you not represent to them you would meet a 50 cent rate if made by the old company?

A. I probably told them we would give them a run for their money, yes, that is, that we would get a share of the business—expected to.

3. I understood you to say on cross-examination that you did not instruct the various persons soliciting frontage with reference to the price they might offer to prospective customers in the event you should succeed in establishing a plant here. State if it is not true you authorized them to say in making such solicitations that if a new company was organized it would result in the production and distribution of gas at lower prices than were then paid in Peoria and also that it would result in a saving to them in other ways with reference to gas service.

Objected to as incompetent and immaterial, not proper re-direct.

A. I don't think I instructed the canvassers; I know I did not instruct them to name any price at which we would furnish gas.

4. Did you or did you not in connection with that work done by them make to them severally, or to any of them, any representations with reference to the two parts of the previous question propounded to you, or with referenee to either of those features of the *u*estion?

(Objected to same grounds as before.)

A. I don't recollect that I told them anything different
961 from what I have stated here.

5. State if it is not true that you authorized those gentlemen, or some of them, to hold out as inducements to property owners in securing their consent to frontage that if a competing company were installed in Peoria it would result in a reduction in the price of gas to the citizens and consumers and also in a saving to them in other ways with reference to gas service.

Objected to as incompetent and immaterial and not proper redirect.

A. I think it is likely I told them it would be a benefit to them to have another company in the business in Peoria.

6. That hardly answers the question—I wish you would answer it more definitely if you are able to do so.

A. I don't think I am.

7. You understand the question thoroughly, do you?

A. Yes sir, I have had it read to me by the stenographer two or three times.

Re-cross interrogatories by Mr. ABBOTT:

1. Is it not a fact that the organization of a new company, the erection of its works and furnishing of gas by it to the inhabitants of the city of Peoria, did result to them in a saving in several ways?

Objected to as calling for a conclusion; the best evidence of that is what has been done.

The MASTER: I think that is true.

Mr. ABBOTT: The question may be open to that technical objection but it strikes me, in view of the character of the evidence given by the witness, a conclusion on a fact is certainly as good as a prophecy.

A. Yes sir.

2. What were some of those ways?

962 Objected to for the same reasons.

The MASTER: I don't think it competent, still the witness may answer subject to the objection.

A. Well, the electric lighting of the city of Peoria has been reduced something over $15,000 a year since our company got into business.

Mr. TICHENOR: The defendant objects to the answer as not responsive and pertains to something that has no connection with the gas question at all.

3. I am referring more particularly in my question to the saving to gas consumers if there were ways in which such saving resulted.

A. Well, there was a saving to gas consumers in this; before we

got into business here the consumers of gas were compelled to pay for the service pipe from the main to the residence and we didn't charge them anything for that, neither do we charge them for the setting of meters for which they used to pay $3.00 in some cases and $2.50 in others.

(The MASTER:)

4. My recollection is you stated that yesterday.
A. Yes sir, I did.

Adjourned by agreement until Tuesday, February 25, 1902, at 10:00 o'clock a. m.

963 On account of the illness of Mr. Henry Mansfield, city attorney, the special commissioner on Tuesday, February 25, 1902, adjourned the further hearing of the case without date, the hearing to be resumed at such time and place as should be designated by the special commissioner.

United States court room, Government building.

PEORIA, ILL., MONDAY, *March* 10, 1902—10 o'clock a. m.

Parties met pursuant to the call of the special commissioner.
Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

GEORGE H. LITTLEWOOD, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?
A. George H. Littlewood; # 1226 Main St., Peoria, Illinois.
2. What is your business?
Ans. Cashier Merchants national bank
3. How long have you been such cashier?
Ans. 12 years any way
4. During all that time have you been a resident of Peoria?
A. Yes sir;
5. In what other line, or lines of business, if any, have you been engaged during any portion of that 12 years?
A. I am a member of the firm of Littlewood & Stimburg, bankers, of Farmington, Fulton county, Illinois.
6. Is that the only other business in which you have been engaged during any part of that time?
A. Yes sir; I don't know of any other special business and I don't give that business any attention; Mr. Stimburg is the manager there.

7. What was your business before coming to Peoria and
963½ what had it been for many years?

A. I started a bank in Farmington in 1868, and before that I was in the dry goods business.

8. Was that the same bank to which you have just referred?

A. Yes sir;

9. State under what circumstances you first became acquainted with the project to organize a rival gas company in the early portion of the year 1899?

(Objected to as immaterial.)

A. I don't know whether I can tell that—it is out of my recollection. I will have to ask if Mr. Little came here about that time?

10. That was the time?

Ans. I got acquainted with Mr. Little and some of the people who had that project and I had always felt a little as if I would like to get into something of the kind.

11. Are you able to state at this time in what manner the subject was brought to your attention and by whom?

A. I could not; I don't know.

12. For how long a period of time had you known any of the officers, or directors, of the Peoria Gas Light & Coke Co., which was then operating in Peoria territory?

A. I had known them simply by their being residents with me in the city and by paying my gas bills.

13. Who were the gentlemen connected with that company with whom you were acquainted in the manner you describe?

A. I was not much acquainted with them only I knew Mr. Gorman, Mr. Farrelly and the Coffey's—simply a speaking acquaintance with them; that was all; I was not intimately acquainted with any of them.

14. Do you know W. A. Herron of Peoria?

Ans. Yes, sir;

15. Do you know whether or not he was an officer of that company for years prior to the organization of the company in question?

963¾ A. I know he had stock, but I didn't know he had any official position there.

16. Do you know Mathew Henebery of Peoria, Ill.?

Ans. Yes sir;

17. How long have you known him?

A. I knew him perhaps before I came to Peoria as an officer of the First national bank.

18. What official connection had Mr. Henebery with the Peoria Gas Light and Coke Co.?

(Objected to as immaterial.)

A. I could not tell you; I don't know what position he had.

19. What other gentlemen, if any, did you know as being associated with that company?

A. At this time I don't know—the Farrelly's, Coffey's, Mr. Henebery and Mr. Gorman was a worker there, I don't know whether he had an official position or not; I think he had a clerical position.

20. Do you know Leslie Robison of Peoria?

Ans. Yes.

21. Did you know him as connected with that company?

Objected to as immaterial.

A. Now, that you mention his name, I did know he had some stock but I would not have thought of him if you had not mentioned his name.

22. State if Leslie Robison was not for many years president of the old gas company, as it is called,—were you not aware of that fact?

(Objected to as immaterial.)

A. I knew Mr. Robison had some connection with the gas company but if he were president he very likely was president before my time here.

23. Do you know what official connection with the company Mr. Henebery had?

(Objected to as immaterial.)

A. No sir.

24. What was the financial standing of all these gentlemen
964 whose names you have mentioned in this community?

A. Very good.

25. What was their general reputation as men of business as well as financially in Peoria?

(Objected to as immaterial.)

A. Very good.

26. During what portion of the time you have been a resident of Peoria were you a consumer of gas taken from the Peoria Gas Light and Coke Co.?

(Objected to as immaterial.)

A. I think from about 1889 that I personally paid for gas; Mr. Hillman and myself occupied a house together and we paid the gas together for a time, then on March 23, 1891, I was married and occupied Mrs. Howe's house on the corner of Fayette & Perry streets and then I commenced paying individually for the gas that was furnished me.

27. Have you continued to be a consumer of the old company up to the present time?

A. No sir, I am not now; I take gas from the Peoria Gas & Electric Co.

28. Since what time have you taken gas from that company?

A. Since perhaps two years ago; I could not give the date, but it has been since I have been on the bluff.

29. Ever since you commenced to take gas from the new company you have resided at your present place of residence?

Ans. Yes sir.

30. State if you were not at one time a tenant of Mathew Henebery?

A. Yes sir, that was when Mr. Hillman and myself occupied one of Mr. Henebery's houses.

31. In what line of business has Mr. Herron been engaged during the time you have known him in Peoria?

Objected to as immaterial.

A. President of the Peoria savings bank.

965 32. Is that an old or new institution and what is its standing in Peoria?

A. It is an old institution and its standing is the very best.

33. Do you know how long Mr. Herron has been connected with that bank in that capacity?

(Objected to as immaterial.)

A. Ever since I have known the institution or known of it he has been connected with it.

34. In a general way, for how long a period of time has that been?

A. Well, very likely from 1868; I commenced in the banking business then and I would be likely to have had a knowledge of him from that time and possibly a little before that.

35. What territory within your knowledge was covered by the service of the old company at the time of the commencement of the agitation towards the organization of the new company?

Objected to as immaterial.

A. I could not say; I know but little about it.

36. How many gas companies were then operating in Peoria?

Objected to as immaterial.

A. But one at the time of the organization of the new company.

37. Do you know how long that old company had been in existence in Peoria?

Ans. I do not.

38. Do you know whether or not it was then an old or new company?

A. I could not say as to that; at the time I first knew it it was the only gas company here; I don't know whether it would be called old or not; it was the first gas company in Peoria perhaps.

30. State whether or not within your knowledge at that time the old gas company was equipped for supplying the entire

966 city of Peoria and suburbs with gas and was so doing?

Objected to as immaterial.

A. I have no personal knowledge as to what ground they cove

40. State whether or not it was then a matter of common notor as to whether or not the old gas company's plant was sufficient furnish gas within the territory previously mentioned?

Objected to as incompetent and immaterial.

A. I don't know how far its service extended and so far as being competent to furnish gas I don't know anything about it a I don't know that I have ever heard they were or were not com tent to furnish it.

41. State under what circumstances you were approached wi reference to the proposed organization of the new gas company ear in the year 1899 or at any other time if earlier than that date?

Objected to as incompetent and immaterial and already answere

The MASTER: I think the question has been asked him befo but he may answer subject to the objection.

A. I could not say.

42. Have you at this time no recollection whatever as to th manner in which you became interested in the proposed organiza tion?

Objected to same grounds as before.

A. As to who spoke to me first about it, I could not say.

44. How long a period of time prior to the making up of the sub scription list of the capital stock in that company, did you know it was proposed to organize a new company?

A. I could not say the time but probably a short time—perhaps a month would cover it.

44. State whether or not you were solicited to become a stock holder or whether you yourself took the initiative in that regard?

Objected to as incompetent, immaterial and already asked
967 and answered.

A. I think it very likely that the solicitation might have come from my side; I could not recollect now; I don't remember just how it was, but in a conversation had with those that were in terested I rather think I said I would be glad to take some stock in the new company.

45. Who were those with whom you had any such conversation?

Objected to as incompetent and immaterial.

A. Mr. Sumner Clarke, Mr. Frank Corning, Mr. O. J. Bailey, Mr. Ben Warren, Jr., Mr. Theodore Miller and Mr. Fred Luthy.

46. With which of those gentlemen, if any, were you then asso ciated in business?

(Objected to as immaterial.)

A. At that time I was not associated with any of them in business excepting as stock holders in the bank of which I was cashier.

47. Were not several of them at that time directors or officers in the bank of which you were cashier?

Objected to as immatertal.

A. Yes sir; Mr. Sumner Clarke was a director and Mr. Ferd Luthy was a director and president of the bank; I believe that was all.

48. What connection with your bank at that time had Henry Sandmeyer, Sr., if you know?

Ans. He was vice president.

49. How many different conversations did you have with any of those gentlemen touching the subject of the proposed organization prior to the time you agreed to become interested in it and what was the nature of those conversations?

A. It would be difficult for me to tell now; I presume the gist of the conversation was that it promised satisfactory results in the subscription of the stock, judging the future by the past of the old company; the people being well aware of the profitable venture
968 of the old company that the new venture would certainly pay well even if not so well as the old company.

50. Was that the opinion of all the gentlemen interested, or to become interested, at that time?

A. It was very generally the opinion because they subscribed for stock afterwards.

51. At that time, what knowledge, if any, had you of the production and distribution of gas, including the expenses and profits?

(Objected to as incompetent and immaterial)

A. None except hearsay.

52. Had you prior to that time ever been a stock holder, or interested in any way, in any gas company?

A. Yes sir, as conservator for Mrs. Farnum I, as such conservator, became possessed of gas stock in Aurora and in Galesburg for that estate and, from my experience in that stock, I felt that it was very likely to be a productive investment here.

53. To what extent, if at all, during your connection with the estate mentioned did you familiarize yourself with the expense of the production of gas?

(Objected to as immaterial.)

A. I did not make myself familiar with the production of gas, or the expense of producing it, but I received the dividend checks very regularly and they were most satisfactory.

54. State whether or not prior to that time you had ever had any discussion or conversation with any of the members of the old gas company, or the company then operating in Peoria, with respect to the profit which it then earned and had been earning in the past?

(Objected to as immaterial.)

A. No sir.

55. At the time you became a stock holder in the new company, what knowledge had you respecting the prices that had been
969 charged in the past and which were then charged by the old company for gas, also concerning changes that had been made in prices and the circumstances under which those changes had been induced?

Objected to as incompetent and immaterial.

A. I had no knowledge of it, never looked anything of that kind up except to pay my gas bills, but my idea is that the prices for gas at that time was $1.25 for illuminating gas and 75 cents for fuel gas; that is my recollection.

56. Did you know at that time how long the old company had been operating at the 75 cent rate for fuel gas?

A. No sir, I don't know that I did. It seems to me now, according to my recollection, that when I first knew about it the price was $1.35 for illuminating gas and 10 cents off if paid by the 10th of the month, and it seems to me the price charged for fuel gas was then a dollar. Now, there was some talk of a competing company which I remember very well, that Mr. Danforth was interested in, and whether that rate was reduced by the old company at the time that flurry came up or not, I am not sure, but I think it had that tendency and possibly there was a reduction in the price.

57. Do you know anything of the previous history of similar reductions in price charged by the old gas company?

A. No sir.

58. Do you know anything about the prices charged in its early history and extending down to the time you came to Peoria?

A. No sir, I never looked that up at all.

58. You have no knowledge whether the prices had been constant or otherwise?

Ans. Not beyond what I have stated.

59. Had you anything whatever to do with the proposed organization of the company in which you say Mr. Danforth was interested?

970 A. No sir, Mr. McCoy, a son-in-law of Mr. Danforth's, was in the bank with me and he claimed to know something about it.

60. How many years ago was that?

A. Quite a little previous to the time—it was not while he was in the bank with us but previous to that time, and he told me about it afterwards; it was previous to the time he told me that this company was started, I don't know how long, perhaps a year or two.

61. Since you have been a resident of Peoria, is that the only time the subject of a competing company had been agitated up to the

early spring of 1899, or about the time of the proposed organization of the new company?

A. Heard talk of the necessity of one, but I would not be apt to know about such things perhaps.

62. Then within your knowledge, nothing of that kind had ever taken any definite shape before?

Ans. No sir.

63. When you finally concluded to become interested as a stock holder in the complainant company, what other gentlemen had already signified to you their intention of becoming similarly interested?

(Objected to as incompetent and immaterial.)

A. I guess Mr. Corning was one, Mr. Sandmeyer one, Ferd Luthy one and Theodore Miller.

64. Did you know to what extent they severally proposed to become subscribers to the capital stock of that company?

Objected to as immaterial.

The MASTER: I don't know about the competency of that question; what they did might be proper but what they proposed to do is another proposition, still the witness may answer subject to the objection.

A. I could not tell the amount now that Mr. Clarke subscribed but it was something over $10,000; Mr. Corning subscribed
971 $10,000; Mr. Sandmeyer $2,500; Mr. Luthy $5,000, and I subscribed $5,000; that was the actual subscription.

The MASTER: That was not the question, as I understood it.

The WITNESS: I thought if I gave that answer it would be sufficient.

65. Are those amounts substantially as you understood them to be at the time you agreed to become a stock holder also?

Objected to as immaterial.

A. I think that is it, yes; I know what I subscribed and I know what Mr. Luthy subscribed very well.

66. Those several amounts you have specified were the several subscriptions made by those gentlemen and the extent to which they became interested to the best of your recollection, were they?

Objected to as immaterial and incompetent.

The MASTER: I think the witness ought to state his knowledge and not his recollection.

A. As to personal knowledge I have none except as to Mr. Luthy's and my own; the other subscriptions may have been increased or reduced; I simply saw the amounts on the subscription list; I do not keep track of other people's business so much.

67. But that was as you understood it at that time?

A. Yes sir.

68. What connection, if any, had Mr. Corning with your bank at that time?

Ans. None.

69. Has he ever had except as doing business with your bank—I mean officially or as a director?

A. No sir.

70. I understand that all of those people, whose names you have mentioned, had arranged for their interest, or had agreed to become interested, prior to the time you did so—is that your statement?

(Objected to as immaterial and incompetent.)

972 A. I think we were together at the same time.

71. Look at the paper now shown you, marked "Exhibit 18," and state whether or not you know all the gentlemen whose names appear as subscribers to the capital stock of complainant company as shown on that exhibit?

Ans. Yes sir, I do.

72. To what extent prior to the organization of, and also prior to your subscription to, the capital stock of the complainant company did you confer with thos- gentlemen with respect to the proposed enterprise?

(Objected to as immaterial.)

A. I don't think there was any special thing said between us about it; if there was anything said there was certainly no inducement given for me to subscribe by any one—Interrupted.

Mr. TICHENOR: That is not an answer to the question I asked, and I move the court to exclude the answer as not responsive.

The MASTER: I don't think the answer responsive.

73. (Interrogatory 72 repeated to witness.)

A. With the exception of the talk I may have had with Mr. Luthy and Mr. Sumner Clarke, I don't think there was anything said by anyone to me.

74. Have you now explained in previous answers all the knowledge you had of the gas industries, or its profits prior to the time you became a subscriber to the stock of complainant company?

A. Yes sir.

75. State whether or not before your subscription was made you had become acquainted with Francis W. Little, who is now the manager of complainant company?

(Objected to as immaterial.)

A. Yes sir. I was trying to think how long he was here before this subscription was made, but I reckon he was here and if here I was acquainted with him.

76. Under what circumstances did you first meet him?

Objected to as immaterial.

973 A. I think my first acquaintance with him was in the bank in the nature of his making a deposit to his own account while here.

77. When, if at all, did you first meet Mr. Little with reference to the proposed organization of this company, or with reference to its affairs, if such meeting was after its organization?

(Objected to as immaterial.)

A. I could not say; I was a very small toad in the puddle and I don't suppose they consulted me very much.

78. How many times prior to your subscription did you confer with Sumner R. Clarke with reference to the proposed new enterprise?

(Objected to as immaterial.)

A. There was no stated meeting ever had between Mr. Clarke and myself regarding the company; casually, in the course of business—he has an office next door to me you know—it might have been a dozen times for all I know.

79. What information if any, did Mr. Clarke give you with respect to the proposed organization?

A. I don't think he ever said anything except he thought it bid fair to be a good investment.

80. Do you know of your own knowledge who was the prime mover in the organization?

(Objected to as immaterial.)

A. I do not know.

81. Who, in any of the negotiations had at that time, appeared to be in charge or be the leader in the proposed organization?

Objected to as immaterial.

A. Francis W. Little.

82. State whether or not he was in Peoria at the time the matters were first shaping themselves with reference to the organization?

(Objected to as immaterial.)

A. I don't know.

974 83. Is it not true that Mr. Little came to Peoria some time after all the preliminaries had been completed and that he was not here as a resident during the time the subscription list was being made up and the arrangement perfected for the completion of the organization?

(Objected to as immaterial.)

A. My idea is he was here, perhaps not as a resident, but here in the city in the interest, perhaps, of the new company.

84. How many times, prior to the completion of the organization of that company, did you confer with Mr. Little, or converse with him with respect to the company itself and its outlook?

Objected to as immaterial.

A. I don't know.

85. State whether or not the purpose in organizing the complainant company was to enter into competition in the production and distribution of gas in the Peoria territory with the Peoria Gas Light & Coke Co.?

Objected to as incompetent and immaterial.

A. That was my understanding.

86. State whether or not it was then further the intention of the organizers ultimately to drive the Peoria Gas Light & Coke Co. out of business in Peoria?

Objected to as incompetent and immaterial.

The MASTER: I don't think it material but the witness may answer subject to the objection.

A. I cannot say as to that; I don't know anything about it; if there was any such talk it was if in the course of business the Peoria Gas Light & Coke Co. got tired—Interrupted.

Mr. TICHENOR: I am not asking you to speculate on it and I asked the master to exclude the last answer from the record; my question called for the nature of the discussion had at that time with reference to the proposed new enterprise.

975 The MASTER: The question called for the opinion of the witness as to the ultimate effect of the organization of the new company.

Mr. TICHENOR: I did not intend to put it in that way, and if I did, I desire to withdraw it. I withdraw the question altogether.

87. State whether or not during your preliminary negotiations and preparations the question of the ultimate expulsion from Peoria territory of the old gas company was also considered by you and your associates?

(Objected to as incompetent, it being a matter for the court to determine from what was said and done.)

Mr. TICHENOR: That is what I am calling for, what was said.

The WITNESS: That is officially, I suppose.

Mr. TICHENOR: The question don't call for an official discussion, it calls for any discussion or conversation had between you and your associates.

A. I have no recollection of such talk.

88. Then you understood it to be an organization for the purpose of entering into competition with the old company in Peoria territory?

Ans. Yes sir.

89. State whether or not at that time you knew substantially the volume of business that was being carried on by the old company?

Objected to as incompetent, immaterial and already asked and answered.

A. No sir.

90. State whether or not in a general way you knew what the profits of the old company were then and what they had been in years past?

(Objected to as incompetent and immaterial.)

A. Simply from hearsay.

91. State whether or not the old gas company had ever kept its account with the bank of which you were cashier?

Ans. No sir.

976 92. Where had it kept its account, if you know?

Objected to as immaterial.

A. At the First national bank.

93. What knowledge, if any, had you at the time you became a subscriber of the amount of the investment of the old company in its plant and equipment in Peoria?

Objected to as incompetent and immaterial.

A. I have no knowledge of the amount of the capital stock except from hearsay. Do you want me to state that?

93. No. The question was aimed at the amount of the investment, not the amount of the capital stock.

Objected to same grounds.

A. I don't know anything about it.

94. Had you, or had you not, ever visited the old gas house which was then in use by that company in its production?

A. No sir.

95. Who of your associates were skilled in the gas industry at the time you were organizing the complainant company?

Objected to as immaterial.

A. I don't know of any who were; they may have had a knowledge of it; I know nothing about it.

96. Who of them within your knowledge were stockholders or had been in any gas company?

Objected to as immaterial.

A. Within my own knowledge I know of none except myself and that only as conservator of the estate I have heretofore mentioned.

97. Who, if anyone, furnished you and your associates with the estimate for the completion of the proposed gas plant in Peoria to be constructed by your company?

(Objected to as immaterial.)

A. I do not think I ever saw any estimate.

98. Up to the time of the completion of the organization
977 of your company what if any knowledge had you of the total expense of installing your gas plant in Peoria of the kind contemplated in your organization?

(Objected to as immaterial.)

A. I have none.

99. When did you, for the first time, obtain knowledge or information with respect to the proposed outlay for the plant complete?

(Objected to as immaterial.)

A. I never had any knowledge as to the amount necessary to complete it.

100. Do you know who had charge of procuring the estimate?

A. I do not.

101. Do you know whether or not up to the time your organization was completed estimates had been furnished?

A. No sir.

102. Do you know at the present time what the plant has cost in construction and equipment?

Objected to as incompetent and immaterial.

A. No sir.

103. State whether or not you were present at the time of the convening of the subscribers to the capital stock for the purpose of completing the preliminaries preparatory to filing with the secretary of state and obtaining your official certificate of organization?

A. I presume I was present, yes sir.

104. Where was that meeting held?

A. I think it was held in Sumner Clarke's office, No. 211 Main street, Peoria, Ill.

105. At the same place his office had been for many years?

A. Yes, and where it is now.

106. State whether or not all of the gentlemen, whose names appear as subscribers to the capital stock, were present at that
978 time?

Ans. I think they were.

107. At the time your arrangements for the organization were being prepared, state whether or not the parties interested were all Peoria people?

(Objected to as immaterial.)

A. Mr. Little was interested but his name does not appear on this list, so they were all Peoria people at that time.

108. State whether or not that is the only subscription list ever made to the capital stock of the complainant company?

A. I don't know of any other, at least I have not seen any other.

109. What was the financial standing of all the gentlemen whose names appear upon that subscription list?

A. Their financial standing is excellent, as good as any class of men.

110. State whether or not all of those gentlemen were then able financially to take all the stock which they had subscribed and pay for it in cash, so far as you know?

(Objected to as immaterial.)

A. With one exception I believe they were abundantly able.

111. State whether or not the exception you make is Sumner R. Clarke?

Ans. No sir.

112. State whether or not within your knowledge all of the gentlemen did take the several amounts for which they subscribed as shown by Exhibit 18?

(Objected to as immaterial.)

A. I understood that Mr. Sandmeyer drew out; he is the only one and I don't know anything about that but I understood he did not take his stock.

113. Do you know of your own knowledge the reason why he did not carry out the terms of his subscription?

A. I do not; it is my recollection that he thought it would not pay, perhaps, and wanted to draw out of it; I think when
979 the subscription was made and the money was to be forthcoming he did not want to carry it out; I know that much because I wanted it.

114. When was the first assessment made upon this stock and what was the amount?

(Objected to as incompetent and immaterial)

The MASTER: I do not think it the best evidence; I think, however, it is a matter that can be proved by parol testimony and the witness may answer subject to the objection.

A. I could not give the date, but 20 % was asked on the subscription on the first assessment.

115. State whether or not within your knowledge that assessment was paid?

(Objected to same grounds as before)

A. Yes sir; that is, those of whom I have knowledge paid it; I know mine was paid and Mr. Luthy's was paid; I have personal knowledge of both of those; beyond that I don't know.

116. Have you also personal knowledge of the payment by Mr. Clerke of his subscription?

Ans. No sir.

117. Are you able to state about how long after the organization was completed, that assessment was called for?

Objected to as incompetent and immaterial.

A. No sir; I could not tell the exact date, but I calculate it was about 3 months, or two months, or a month; somewhere along there.

118. When was it, with reference to the time the ordinance was passed granting a franchise or license to your company to occupy the streets etc., of Peoria?

Ans. I could not say.

119. When was it with reference to the time the company opened an office in Peoria, if you remember?

Objected to as incompetent and immaterial.

A. I don't know.

120. Where was the office of the company when it was first opened here?

Ans. It was right next to where Mr. Clarke's office was at first, then they afterwards rented an office up where Zeigler's un-
980 dertaking establishment is now.

121. How many assessments on the capital stock were made during the year next after the completion of the organization of the company?

(Objected to as incompetent and immaterial.)

A. Just the one assessment.

122. How many assessments upon the capital stock have been made up to the present time?

(Objected to same grounds.)

A. No other assessment has been made.

123. State whether or not you have ever been an officer or director in the complainant company?

(Objected to same grounds.)

A. Yes sir; I was a director from the organization of the company up to about a year ago, perhaps a little less than a year ago.

124. What were the circumstances under which you severed your connection with the company as a director?

Objected to same grounds.

A. I tendered my resignation.

125. State whether or not such resignation was voluntary or involuntary?

(Objected to same grounds.)

A. It was voluntary. It was thought best for the interests of the company that I step out and I stepped out.

126. From whom did that suggestion come?

(Objected to same grou-.)

A. Mr. Little, I think.

127. State whether or not that subject was first presented to you at a meeting of the board of directors of your company?

Objected to as immaterial.

A. I am not sure that it came during a meeting of the directors; I think it came personally from Mr. Little at other than a directors' meeting.

128. Who succeeded you on the directory?

Objected to as incompetent and immaterial.

A. I don't know.

981 129. Do you know when the vacancy was filled with reference to your resignation?

(Objected to as immaterial and incompetent)

A. I do not.

130. What reasons, if any, were given for asking your retirement from the board?

(Objected to same grounds)

A. I don't remember that there was any particular reason given excepting that it was for the good of the company perhaps.

131. To what extent did you attend the directors' meetings during the time you were connected with the company in the capacity which you have stated?

(Objected to same grounds)

A. Usually when notice was given to me I would attend the directors' meetings; sometimes I was called to attend a meeting when notice perhaps had not been given, but I could not say as to how many meetings I attended.

132. You were a director, were you not, during the period of the construction of your company's plant?

(Objected to as immaterial)

A. I must have been.

133. State to what extent the subject of construction and the expenses from time to time, as the work progressed, were under discussion by the directory during the period covered by your membership?

(Objected to as incompetent and immaterial)

A. I suppose the expense of construction was brought up, of course, before the directors; I think it was attended to by the directors as any other well-conducted corporation would be.

134. State whether or not any statements from month to month, or otherwise, showing expense account were presented to the board of directors and considered and passed upon by them?

A. I think there were yes sir.

135. Did you or not examine those expense accounts?

A. No sir.

136. Upon whom devolved the duty of passing upon and approving or disapproving those statements of expenditures?

981½ Objected to as immaterial.

A. Mr. Little was the man in authority and I think he passed upon all of them.

137. What, if any, jurisdiction in that regard was vested in the board of directors?

(Objected to as incompetent and immaterial.)

A. I don't know of any except as I have stated, there were people on the board of directors who were much more largely interested than I to keep track of the work and expenses and the estimates as they were shown.

138. State whether or not your board had a committee to which was entrusted the duty of supervising the construction?

Objected to same grounds as before.

A. The whole of the construction was in the hands of Mr. Little, I don't think there was a committee of the directors other than that; Mr. Little made a report to the board of directors and I don't think there was any other committee than that.

139. State whether or not from time to time the directory took any action with reference to the reports to which you have referred?

(Objected to same grounds.)

A. Many reports were read to the board and passed upon by the directors, whether all of them were or not, of course, I could not say.

140. Who, if any, of the members of the directory were skilled in handling accounts?

(Objected to as immaterial.)

A. In my particular line I have had experience in handling accounts but that was not in the gas line.

141. Is it not true that substantially all of the members of the directory had had very large experience in handling accounts?

Objected to as immaterial.

A. Yes sir.

982 142. State whether or not those reports were incorporated in the minutes of the meetings from time to time?

Objected to as incompetent and immaterial.

A. I don't know; Mr. Miller was the secretary and I presume they were part of the minutes of the board of directors.

143. Who during that time was president of the board?

A. I think Sumner Clarke; he is now at any rate.

144. State whether or not during the time that your company was preparing for its business the old company made any threats or statements with reference to reducing the prices of gas in the event of the introduction into the field of a competing gas company?

(Objected to as incompetent and immaterial.)

A. No sir.

145. What, if any, change in the prices of gas in Peoria were made during the time you were engaged in construction?

Objected to same grounds.

A. As stated before, my impression is that illuminating gas was $1.35 with ten cents off if paid by the 10th of the month and that fuel gas was less than that,—there was a difference between the two at that time but whether it was down to 75 cents or not I could not tell.

146. Do you remember whether or not any further changes were made in those prices during the time you were engaged in construction?

(Objected to same grounds.)

A. I don't remember.

147. To what extent, if at all, was the subject of prices discussed in the directory during the time elapsing prior to the completion of your plant ready for the distribution of gas?

Objected to same grounds.

983 A. Simply the talk of the individual members which was this I remember very well because I favored it; that was, to reduce the price of fuel gas to 65 cents and illuminating gas to 90 cents; that was the talk among a few of our directors as being the thing to do for the dear people.

148. Was that subject also discussed in the board meetings?

Objected to same grounds.

A. I don't know that it was.

149. Were those the only figures ever considered in the manner you have testified so far as your present recollection is concerned?

(Objected to same grounds.)

A. Favoring that amount, as I stated to you, it impressed me as being a good thing to do because I thought it would satisfy the people; I don't think there was anything said further than that; it was, I know, considered by several of the people interested with me there.

150. Did you know during the time those discussions regarding prices were in progress the volume of gas per day distributed in Peoria?

A. Those figures may have been given to me and I not remember

them, for I was not interested in them; I don't remember at al now.

151. Did you have before you any information with reference t the proportion of the distribution that was for fuel purposes an that for illuminating purposes?

(Objected to same grounds)

A. We may have had at that time but I don't remember now the difference.

152. Did you know at that time for how long a period the old company had been furnishing gas for fuel purposes?

A. No, I didn't know.

984 153. State what, if anything, the board of directors had to do with fixing the price of gas furnished by your company at the time it was ready to commence operations?

Objected to as incompetent and immaterial.

A. I think it was considered at that time and thought best to make it the rate that has been made which, you know, was $1.00 for illuminating gas and 75 cents for fuel gas.

154. Were the prices which you have named the ones adopted and at which gas was furnished in the beginning of your company's operations?

(Objected to same grounds.)

A. I think it was.

155. State what if anything had been done or considered by the board, or by the members of it, prior to the fixing of the rates which you have mentioned, so far as pertains to that particular subject?

(Objected to same grounds).

The MASTER: I don't think it competent to show what has been done by individual members; the action by the board is the controlling feature, I think, but the witness may answer subject to the objection.

A. Have not I already answered that, when I told you we had talked of 65 cents for fuel gas and 90 cents for illuminating gas; that was simply the personal ideas of one or two of the directors.

Defendant objects to the foregoin- answer as not responsive and moves the court to exclude it.

156. State whether or not the board of directors at all times, while you were a member, fixed the prices that should be charged by your company?

(Objected to same grounds as before).

A. Yes sir.

157. Who on the board was skilled in the gas manufacture and distribution?

Ans. Mr. Little.

985 158. Was he the only one?

A. I don't know of any one except Mr. Little that was particularly expert in the gas business.

159. To what extent, if at all, did he participate in the discussions having for their object the fixing of prices?

Objected to as incompetent and immaterial.

A. Having the knowledge he had, he had a good deal to say about such things.

160. Upon whom, other than Mr. Little, did you depend for information as to the cost of production and distribution and the prices at which gas could be furnished to consumers?

Objected to same grounds.

A. No one else.

161. During the time of your construction and the early history of your company after it began to furnish gas, did you know to what extent Mr. Little was skilled in the manufacture and distribution of gas?

(Objected to same grounds.)

A. I had known he had been engaged in the manufacture of gas and that otherwise he was a very bright man.

162. Did you know what place he had occupied prior to coming to Peoria?

(Objected to same grounds.)

A. I knew he was connected with the gas business in Souix City, Iowa, and in Lincoln, Neb. from his conversation relating his experiences.

163. State whether or not you also knew he had recently been employed as manager of the Akron, Ohio, gas company?

(Objected to same grounds.)

A. No, I did not; I might have heard something about it, though, in his experiences as related.

164. State whether or not during the time you were a director any changes in the price of gas were made by your company,

986 if so, when and what were they?

(Objected to same grounds.)

A. My recollection is now that the price of fuel gas was raised from 75 cents to $1.00 per thousand, owing to a prosecution that was gotten up, as I understood it, by the Peoria Journal Co., claiming that the company could not sell the same gas going through the same pipe at two different rates, that the rate must be one or the other, and I think the company made the rate $1.00 for both fuel and illuminating gas.

165. State whether or not that was the only change in rates mad during your incumbency of the office mentioned?

Objected to same grounds.

A. I don't know of anything further.

166. State if it is not true that during the time you were a mem ber of the board of directors the complainant may have sometime furnished gas at 50 cents per thousand and also at 30 cents per thou sand to consumers generally in the city of Peoria?

Objected to same grounds.

A. I don't think the company of which I was a member furnished gas at that price; I think that was done by the old company.

167. State if it is not true that your company about July 31, 1900, met the cut in prices made by the old company?

Objected to same grounds.

A. I don't know whether they did or not.

168. Do you know of the making of the contract by your com- pany during the time you were a director to furnish the county of Peoria gas at 25 cents per thousand cubic feet?

(Objected to same grounds.)

A. I knew nothing about it except the report I may have seen in the paper; when I was on the board of directors and attending, I don't know that anything of that kind came up.

169. To what extent did the territory covered by your com-
987 pany at the time it began to serve gas, coincide with that already occupied by the Peoria Gas Light & Coke Co.?

Objected to same grounds.

A. I don't know.

170. State if it is not true that you have many service pipes in buildings where the old company also had services and where they had had them for many years?

(Objected to same grounds.)

A. Yes sir.

171. State further if that state of affairs did not continue for some time after you began to serve gas?

Objected to same grounds.

A. I presume so, I don't know of my own knowledge.

172. Do you know the circumstances under which the prices of gas were restored to $1.00 and 75 cents along about the month of August, 1900?

(Objected to same grounds.)

A. I do not.

173. Did you know that the two companies, yours and the Peoria

Gas Light & Coke Co., about that time were on the point of raising the price and putting it at the rates named?

Objected to as incompetent, immaterial and assuming they did have in contemplation such a raise.

A. No sir, I did not.

174. State whether or not there was any discussion of that question in your directory prior to about the 31st day of July 1900?

(Objected to as incompetent and immaterial and not the best evidence.)

A. I have no recollection of it.

175. State whether or not you now remember a publication of those new rates in the Peoria press on or about the date named, a notice having been given to the press by your company and also on the same date by the Peoria Gas Light & Coke Co.?

988 Objected to as immaterial.

A. I guess I saw something of it in the papers but I don't remember of anything that transpired in our board about it while I was present.

176. Do you know who fixed the rate published in the public press by your company about the 31st day of July, 1900?

Objected to as immaterial and incompetent.

A. I would think our manager, Mr. Little, did.

177. Have you any personal knowledge of it yourself?

Ans. No.

178. Look at page 8, of the answer filed in this case purporting to contain copies of the advertisement in the Peoria press, to which your attention has been directed, and state whether or not you recognize those as having been made out about the time mentioned.

Objected to as incompetent and immaterial.

A. No sir, I don't remember of seeing them.

179. Do you remember any discussion in your board or among the members of your directory, or among the stock holders of your company, with respect to that publication at or about the time it appeared in the Peoria press?

(Objected to same grounds.)

A. No sir.

180. State whether or not you as a director, or otherwise, was ever consulted with reference to the restoration of those rates and the publication of them at or about the time mentioned?

Objected to same grounds.

A. I have no recollection of being consulted about it at all.

181. When did you for the first time know that those rates had been made and from what source did you obtain that information?

Objected to same grounds.

A. I have no knowledge when it was; I have no recollec-
989 tion of the rates being made or being consulted in the matter or having any voice in the making of the rates.

182. State if you remember at what rates those two gas companies were furnishing gas prior to the publication of the notice to which your attention has been directed.

Objected to same grounds.

A. My impression was it was $1.35 for illuminating and 85 cents for fuel with 10 cents off each price if paid before the 10th of the month.

183. Is it your recollection those were the lowest rates made by your company prior to July 31, 1900?

Objected to as immaterial.

A. With the exception of the special rates, if any were made, and you say they were—to my knowledge there were none made—in the way of contracts for two or three years to furnish gas to meet the competition of the Peoria Gas Light and Coke Co.—I don't know of any lower rate made.

184. When with reference to the time your company began to serve gas did you begin to take from that company?

Objected to as immaterial.

A. It was some months after they started; I know I wanted service pipes put into my house but they were busy doing like work for others and I didn't get it as soon as I wanted it.

185. Are you able to state about when your company began to supply gas to the public?

Ans. No sir.

186. State whether or not there was any time prior to July 31, 1900, when the rates you paid for gas were less than those specified in the notices to which your attention has been directed?

(Objected to as incompetent and immaterial.)

A. No sir.

187. Did you personally pay the gas bills for your residence so you would know if a lower rate was given?

Objected to as immaterial.

990 A. My gas bills are brought in the bank as part of the clearings; whatever bank carries the gas account I arrange with them to have the bills brought into the bank, I never go to the office, the bills are paid without question; I don't know as I ever noticed the bills.

188. Was that true of the old company as well as the new?
A. Yes sir, it would be especially true of the old company.
189. And the same arrangement has been continued since the new company went into operation?
Ans. Yes sir.
190. Then within your knowledge no lower rates than those mentioned in these notices were ever made by your company or by the old company?

(Objected to as incompetent, immaterial.)

A. Not to my recollection or knowledge.
191. Was your official connection with the complainant company such that if lower rates had been made you would have known it?

Objected to as immaterial.

A. I might not, as in the case of the contract spoken of, in which it is said because of competition gas was furnished at a less rate for a term of years; I had heard of contracts being made with parties by the old company with parties who took it for one, two or three years, where they got it at a less price, and such contracts may have been made by the new company by the stress of competition, but I was not aware of it.
192. State whether or not it was one of the purposes of your organization to benefit the city and citizens of Peoria by giving them competition and thereby lowering the prices for gas?

Objected to as incompetent and immaterial.

A. That was partially the desire.
193. What, if anything, did you have to do with securing the frontage required by law as a basis upon which to obtain
991 your license from the city of Peoria?

(Objected to as immaterial.)

A. Nothing.
194. Did you as a party interested in the company know of what was being done in that direction?
Ans. Yes sir.
195. What inducements, if any, within your knowledge, were held out to the owners of property in Peoria in approaching them to secure their signatures to frontage required for the purpose indicated?

Objected to as incompetent, immaterial and assuming there were inducements held out.

A. I know of none except the argument of competition perhaps in the disposing of the gas.
196. Do you know who had charge of that portion of the work?
A. I think Theodore Miller.
197. Prior to the presentation of the ordinance granting a license to your company, were you advised of its contents and scope?

Objected to as immaterial.

A. I think I read it before presentation or printed copies made of it.

198. State whether or not you were consulted with reference to its preparation and what it should contain?

Objected to as immaterial.

A. No sir.

199. What if anything did you have to do with the passage of the ordinance in question?

(Objected to as immaterial.)

A. The only thing I had to do with it, I think, was to go up to the council chamber to see what was done there; I don't know that I had any influence on it, though, but I know I was up there.

200. Was that at a meeting of the council or otherwise?

A. Yes sir, it was at a meeting.

992 201. How many meetings of the council did you attend-*ing* during the pendency of this ordinance?

(Objected to as immaterial.)

A. I believe that was the only one.

202. State whether or not you attended any meeting of the committee of the council before whom the ordinance was pending?

A. No sir.

203. Did you know about the time of the presentation of the ordinance?

(Objected to as immaterial.)

A. Yes, or I should not have gone up there.

204. When with reference to the time the ordinance was presented was it you attended that meeting of the council?

Objected to as immaterial.

A. I am not sure whether the ordinance was passed that night or not, but I think it was, and I felt a little as though it was important perhaps for me to be there.

205. What other subscribers to the capital stock of complainant company was present with you?

A. I remember that Robert Clarke was there; Charles Clarke, I think, was there; Sumner Clarke was there, also Theodore Miller; I think Chauncey Clarke was there at that time, and I believe Mr. Warren was there.

206. State whether or not during the pendency of the ordinance before the council you were advised from time to time of its status or the progress being made, or the attitude taken by different members of the council with reference to the proposed ordinance?

Objected to as immaterial.

A. I don't think I was with the exception, perhaps, in a general way; I might have been told things were going along all right.

207. Prior to the passage of the ordinance, did you know how the council stood upon the question of its passage?

993 Objected to as immaterial.

A. No sir.

208. Who were the aldermen in the council from your ward at that time?

A. I cannot say, for I don't know which ward I was living in at the time; I think I moved in October, 1899, up on the *the* bluff into the 5th ward; I think I was living on Perry street in the second ward in May 1899.

209. Do you know John R. Walsh of Chicago?

Ans. Yes.

210. How long have you known him?

A. Perhaps 3 years personally.

211. What is his business?

A. President of the Chicago national bank.

212. Mr. Walsh is interested in the plaintiff company, is he not?

Ans. I believe so.

213. When did you first see Mr. Walsh, and under what circumstances, with reference to any business connected with the complainant company?

(Objected to as immaterial.)

A. I think I met Mr. Walsh in Peoria first to become personally acquainted with him after the new company was organized.

214. When you became a subscriber to the capital stock of this company, did you or not know that Mr. Walsh was to be interested in it?

Ans. I did.

215. Through what channel was that information conveyed to you?

Objected to as immaterial.

A. By Mr. Little, I think.

216. Did you then know in what way he was to become interested?

Objected to as immaterial.

A. No, except as a stockholder as anyone else might be.

217. Did you know at that time what stock he was to have?

994 A. No and I do not to this day know what he has got.

218. Do you know where he obtained the stock he holds at the present time?

(Objected to as immaterial.)

A. I do not.

219. Were you given to understand at the time you came i
tact with Mr. Walsh in connection with this business that h
skilled in the gas industry?

(Objected to as immaterial.)

A. Yes sir.

220. Do you know where he had gas plants or gas holdin
that time?

(Objected to as immaterial.)

A. I do not.

221. Do you know the occasion of Mr. Walsh being in Peori
the time you met him, as testified to?

A. By hearsay, not of my own knowledge, I met him incidenta

222. Do you know it from anything Mr. Walsh said to you
that time?

A. No sir, except in this way; I being in the banking busi
here wanted the business of this new company for our bank
could obtain it and I think I made it my business to see him
garding that.

223. At that time Mr. Walsh was not an officer of the compa
or a director was he?

Ans. No sir.

224. And so far as your knowledge extends he had no interest
the company?

A. Excepting from hearsay, that he had stock.

225. So far as shown by the stock subscription list, he was not
stockholder, was he?

Ans. No, I think not.

226. What, if any conversation, did you have with Mr. Walsh i
that connection with reference to the prospects of the company?

A. I cannot recollect the conversation we had at all.

227. State whether or not the subject of its possibilities
995 were then considered by you and Mr. Walsh?

Objected to as immaterial.

A. I think there was nothing said by me to him regarding the gas
company.

228. On how many occasions about that time did you see Mr.
Walsh in Peoria?

(Objected to as immaterial.)

A. That was, I think, the only time I saw him here, though I
heard he was here afterwards. I have had occasion to see him many
times since in Chicago; I have been going up to see him; I like to
go into his bank building there.

229. Do you know what induced Mr. Walsh to become interested
in the complainant company?

Ans. I do not.

230. Do you know whether or not he was the person who originated the idea of establishing a competitive company here?

A. I do not; I think that idea obtained in the minds of a good many people.

231. I mean the idea of organizing this particular company?

A. No, I don't know.

232. Has Mr. Walsh ever been a member of the board of directors of your company?

Ans. I think not.

233. Has he ever attended board meetings?

A. Not to my knowledge.

234. To what extent within your knowledge did he control the action of the board, or the management of the gas company, and has he up to the present time?

(Objected to as incompetent and immaterial.)

A. He was not there and, of course, I don't know what influence he had with anyone else, but apparently he did not have any control over it.

235. State whether or not at any of the board meetings you attended communications from Mr. Walsh were presented and
996 taken under consideration?

(Objected to same grounds as before.)

A. I believe not.

236. State if at any time you had any conversation with Mr. Walsh with respect to the rates at which gas could be furnished in Peoria, if so, state what the conversation was?

Objected to same grounds.

A. No sir.

237. State whether or not prior to the time your company began to furnish gas there was any discussion between yourself and other members of the board or other stock holders, or with Mr. Walsh, respecting the prices at which gas could profitably be furnished to consumers in Peoria?

Objected to as incompetent, immaterial and already asked and answered.

A. Without regard to the profit which could be made out of it there was a discussion, in fact, I have had several of them with directors and with stock holders regarding the price of gas.

238. Were those the same discussions to which you have already referred in your testimony?

Ans. Yes sir.

239. And those are the only ones?

Ans. Yes sir.

240. Do you remember of any resignations from the board of

directors prior to the time you severed your connection with the board?

(Objected to as immaterial.)

A. I don't remember.

241. Do you remember whether Philo B. Miles and O. J. Bailey were or were not members of the original directory?

A. It seems to me they were members; I know there was some change in the directory but I could not tell what it was.

242. Are you able to state from recollection whether those two gentlemen served their full term?

Ans. I think not.

243. Do you know the circumstances under which they severed their connection with the bank?

997

A. I do not; I barely remember that they were members of it.

244. Did they attend the meetings with regularity while their membership continued?

A. I don't think they were long members; I don't think I sat with them on the board; if I did it was only once or twice.

245. Do you know Lyman A. Walton of Chicago as being connected with the complainant company?

Ans. Yes sir.

246. What is his business, if you know?

A. think he is vice president of the Equitable Trust Co. in Chicago.

247. What if any connection has Mr. Walsh with that company?

A. I think he is president of that company.

248. Was Mr. Walton at one time elected a director of the complainant company?

Ans. I think he was.

249. Do you remember whose place he filled? and whether by resignation or expiration of term?

Ans. I do not.

250. State whether or not Mr. Walton is now or ever has been a stockholder of complainant company within your knowledge?

Objected to as immaterial.

A. He would have to be a stockholder, of course, to become a director, but I don't know what stock he has.

251. And you have no knowledge as to where he obtained it?

A. No sir.

252. In what business was Mr. Miles then engaged and in what business had he been for a number of years?

A. In the grain commission business.

263. In what business has Mr. Bailey been engaged and was he then?

A. He was president of the Central national bank and president

f the Dime savings bank; I think he was also a member of the firm of Bourland and Bailey.

98 264. How long has Mr. Bailey been identified with the banking interests of Peoria in a prominent way?

A. He became president of the Central bank on the death of Mr. ightner and he was identified with the Dime savings bank before iat. Ever since I have known him he has been identified with ie banking interests of the city.

265. State whether the minutes of the proceedings before the oard of directors was kept by your secretary and subsequently pre-ented for approval or disapproval?

(Objected to as immaterial)

A. The minutes were kept by the secretary and read at the next eeting and disposed of at that time as to their correctness.

266. State whether or not all matters of business concerning the ompany discussed before the board were made a matter of record i the manner you have mentioned?

Objected to as immaterial.

A. I think things which came up before the board that were ma-rial to the company were made a matter of record; sometimes a iscussion comes up in a board of that kind that should not properly o on the minutes, but the ordinary business of the meetings were it in the record by the secretary.

267. Look at the paper now shown you marked "Exhibit 19" and ate whether or not it bears your genuine signature?

A. Yes sir, that is my signature.

268. What were the circumstances under which you signed that aper?

A. It was a request, as stated here, for a franchise, I suppose.

269. Who presented the paper to you?

A. I could not say now.

270. When did you first learn of it with reference to the time ou signed it?

Ans. I could not say as to that.

99 271. Did you or did you not know that such a document was to be presented to the council?

A. Yes sir, I knew it was necessary always to have it.

272. State whether or not at the time you signed "Exhibit 19" ie name in advance of yours had already been signed to it?

A. I could not say as to that but I presume so, because I put my ame in a regular line after the other name.

273. State whether or not at the time you signed "Exhibit 19" ou believed the statements that it contained were true?

A. This must have been true because time has shown it was true garding the building of the plant, etc.

Defendant objects to the foregoing answer as not responsive and oves the court to exclude it.

274. (Interrogatory 273 repeated to witness.)
A. Yes sir.
275. Did you at that time in good faith believe that the company would carry out the representations embodied in "Exhibit 19"?
A. Yes sir.
276. Did you also at that time believe that the company would be able to carry them out in good faith?
Ans. Yes sir.
277. State whether or not you signed that paper for the purpose among other things, of inducing the council to which it was presented to grant a franchise to your company to use the streets and alleys of the city of Peoria?

Objected to as incompetent and immaterial.

A. I don't think that entered my mind but simply as a petition to the council to grant the prayer of the petition.
278. What if any discussion passed between you and any of the other gentlemen whose names appear upon Exhibit 19 either than or before or subsequently with reference to the contents of that paper?

A. I don't think any remark was made about it; I don't
1000 think I had any consultation with anyone regarding it.

279. When you signed it, did you know you were doing so for the purpose of having it presented to the city council?
A. I presume so; looking at the heading of the paper, I would naturally know it was to be presented.
280. Did you also know it was to be used in connection with the passage of the ordinance which had previously been presented to the city council?
Ans. Yes sir.
281. At the time you signed that paper, did you know the prices at which gas was being furnished by the Peoria Gas Light & Coke Co.?
A. I presume I did.
282. How long, if at all, at the time Exhibit 19 was signed had you been a consumer of fuel gas in the city of Peoria?
A. I could not answer that question for I don't know; I had been a consumer of fuel gas I think for sometime; I was married in 1891 and I know we went to using fuel gas right away, for we had a gas stove and used it.
283. And you continued using it, did you, up to this time?
A. Yes sir.

Cross interrogatories by Mr. IRWIN:

1. Referring to "Exhibit 19," you stated on direct examination that at the time you signed that exhibit you believed the statements therein to be true—do you now believe those statements to be true?

(Objected to as not cross-examination and also calling for a conclusion.)

A. I do.

Re-direct interrogatories by Mr. TICHENOR:

1. What was the price of fuel gas furnished in Peoria on the day you signed that paper?

Ans. I don't remember I am sure.

1001 2. Was it not 75 cents?

Ans. I think it was.

3. What is the price of fuel gas in Peoria today?

A. $1.00.

4. How long has it been that price?

A. Ever since the Journal Co. suit compelled it to be made so which was sometime last summer, I think.

BENJAMIN WARREN, JR., called on behalf of the defendant, being first duly sworn according to law deposes and says:

Direct examination by Mr. TICHENOR:

1. State your name and place of residence?

A. Benjamin Warren Jr., Peoria, Ill.

2. What is your business?

A. My principal business is the grain business and elevator business.

3. How long have you been engaged in that line of business?

A. 26 years this month.

4. During all of that time in Peoria, Ill.?

A. I have been in business in Peoria 26 years next week, and had been in the grain business some three or four years prior to that time.

5. In what other line of business have you been engaged during the 26 years to which you have just referred?

A. Manufacture of wagons; was in the newspaper business for awhile and have done a little railroad business.

6. With what wagon works have you been identified?

A. I am president of the Peoria Wagon Co.

7. How long have you been its president?

A. About 10 years, I think.

8. That is a company operating in connection with the

1002 Avery Manufacturing Company?

A. It is independent of the Avery Company but we have sold them our product for the last three years.

9. Mr. Avery, president of the Avery Co., is also an officer in the wagon Co.?

A. Yes sir, he is treasurer and manager.

10. With what ne-spaper have you been identified and in what capacity?

A. I was one of the founders of the Peoria Herald and was its president for four or five years.

11. How long is it since you severed your connection with that paper?

A. I think I severed my connection with it about six years ago.

12. You are interested in the complainant company, are you not?

A. Yes sir.

13. And have been since its organization?

Ans. Yes sir.

14. You are the same Benjamin Warren that signed the original stock subscription, are you not?

Ans. Yes sir.

15. When, with reference to the time you became a subscriber, did you begin an investigation with reference to the possibilities of profit or otherwise of a competing gas company in Peoria?

Objected to as immaterial.

A. I had some knowledge for a number of years it was a profitable business, although I don't know that I had any particular knowledge of the dividends the old company paid.

16. Before becoming a subscriber to the stock of this company did you make any special investigation or inquiry for the purpose of informing yourself concerning the advantages to stockholders to accrue from the organization of a company of this character in Peoria?

(Objected to as immaterial.)

A. I made some investigation about that time so far as it
1003 was possible to do so.

17. Through what channels did you prosecute your inquiries?

Objected to as immaterial.

A. I don't think I could answer that except in a general way. There did not seem to be any dispute but what the business was profitable here and always had been.

18. For how long a period of time had you known the management of the Peoria Gas Light & Coke Co.?

A. I had known the management ever since I came to the city.

19. Who were the men prominently identified with the old company at that time?

(Objected to as immaterial.)

A. Thomas Coffey was manager of the company, I believe, and a stock holder, Mathew Henrbery, Wm. A. Herron, Leslie Robison, and I think Peter Coffey was alive at that time, but I am not sure.

20. What was the standing of the gentlemen whose names you have mentioned as regards wealth?

A. I think their standing was good; I never heard any criticism on any of them financially.

21. Were they men of large means or small means?

A. I should say a couple of them were men of large means.

22. Do you know anything about the financial standing of Thomas Coffey, to whom you have referred?

Ans. Very little.

23. In what line of business, other than the gas business, were those gentlemen interested, if at all, to your knowledge?

A. Mathew Henebery's principal business was wholesale liquor and distilling; he was also vice president of the First national bank here and is today; Mr. Herron is a well known banker here.

24. What was Thomas Coffey's official connection with the old gas company in the early part of 1899?

A. My recollection is he was general manager of the company and had been for years.

1004 25. Was he president also at that time?

A. I am inclined to think not, although I could not say certainly; he was president of the electric light company.

26. What portion of Peoria, and the territory tributary thereto where gas would be needed, was covered by the old company in the early part of 1899?

(Objected to as incompetent and immaterial.)

A. I have no knowledge on that question except a general knowledge; I think it had mains in the principal streets, at least there were consumers.

27. Wherever there was any demand for gas, they had mains?

Objected to same grounds.

A. Wherever there was sufficient demand.

28. Do you know how long that company had been in existence in Peoria?

Ans. I do not.

29. Had it been here during all the time covered by your residence in Peoria?

Ans. Yes sir.

30. And it was established prior to the time you took up your residence here?

Ans. Yes sir.

31. State what within your knowledge was the capacity of the old company with respect to the demand for gas in Peoria, and the territory adjacent thereto?

Objected to as incompetent and immaterial.

A. I don't know.

32. What was the daily gas consumption in Peoria at that time, if you know?

(Objected to same grounds.)

A. I don't know.

33. What if any knowledge had you of the gas industry at the time you contemplated becoming interested in the plaintiff company?

A. Very little knowledge.

34. State whether or not prior to becoming a subscriber to the stock in question you had ever been a stock holder in any
1005 other gas company?

Ans. No sir, I had not.

35. State whether or not you then knew the cost of producing and distributing gas in a city like Peoria?

A. I did not.

36. State whether or not at the time you made your subscription you knew substantially the necessary outlay for installing a completed plant in Peoria?

Objected to as incompetent and immaterial.

A. I didn't know the exact figures only in a general way; I knew about what it would cost.

37. From what sources did you obtain that information?

Objected to same grounds.

A. Principally from the projectors of this company.

38. Who among the projectors were skilled in the gas industry or installing of gas plants?

A. Do you mean who had been interested in other companies?

39. Well, who were there that were skilled in the gas industry?

Ans. Mr. Little; Mr. Walsh prior to that had been interested in one or more companies.

40. State whether or not both of those gentlemen were interested, or if it were generally known they were to become interested with the rest of you from the inception of the project?

Objected to as immaterial.

A. I think it was understood that they were.

41. State whether or not any of the people who subscribed the list originally were skilled in the installing of gas plants or had had any previous experience?

A. I don't think I could answer that; I don't know.

42. State whether or not you then knew personally all of the gentlemen who subscribed the stock subscription list with you?

A. Yes sir, I was well acquainted with all of them.

1006 43. How long had you known them?

A. Well, some of them back from the time I came to Peoria; Mr. Littlewood only from the time he came to Peoria and

Mr. Corning from the time he came here; the Clarkes I had known and Mr. Miles I knew before he came here and the rest of them soon after I came.

44. Within your knowledge had any of those gentlemen ever had any experience in the construction or operation of a gas plant?

Objected to as immaterial.

A. Not that I know of.

45. Upon whom did you depend for information relative to the expense of installing and operating a gas plant of the kind in contemplation in Peoria?

(Objected to as immaterial and incompetent.)

A. My information came largely from Theo. Miller; he was the gentleman who spoke to me about it first.

46. What representations, if any, did Mr. Miller make to you with respect to probable profits to be derived from placing and operating a competitive gas plant in Peoria?

Objected to same grounds.

A. I don't think he made any positive statements about the prospective profits.

47. What, if any, knowledge had you at that time with regard to the profit which such a plant might make and reasonably would make?

Objected to as immaterial.

A. I don't think I had any specific knowledge.

48. Had Mr. Miller any acquaintance with the manufacture and distribution of gas, or the construction of a gas plant?

Objected to as immaterial.

A. I don't think he did.

49. What purpose had you and your associates in view in the establishment and operation of a competitive plant of this kind?

Objected to as immaterial and incompetent so far as it relates to anybody except the witness.

1007 A. One thing I think of was better service and better treatment of customers; I also thought it would be a good thing for the city to have competition.

50. Were you at that time familiar with the history of gas questions in other cities where competitive plants had been installed?

Ans. No sir.

51. Did you then have any knowledge of that subject in the city of Chicago, Illinois?

Ans. No sir.

52. State whether or not it was one of the purposes of your organ-

ization to furnish gas at lower prices than those charged by the old company?

(Objected to as incompetent and immaterial.)

A. I think in a general way the intention was to have some lower prices.

53. State whether or not that subject was a matter of discussion between you and your associates prior to the time the subscription list was signed?

(Objected to as immaterial.)

A. I think it was.

54. What was the nature of that discussion—what was said?

Objected to as incompetent and immaterial.

A. I don't remember any particular conversation.

55. State whether or not you ever had any conversation with F. W. Little, who has testified in this case, with respect to the prices at which gas could profitably be furnished to consumers in Peoria?

A. I don't recollect of any.

56. Were there any reasons, other than those you have now mentioned, which led to the organization of the complainant company?

Objected to as immaterial.

A. I don't know of any.

57. Who was the first to interest you in the proposed organization?

Ans. Theo. J. Miller spoke to me first about it.

58. What inducement, if any, did he hold out to you as a 1008 reason why you should become an interested party?

Objected to as incompetent and immaterial.

A. I don't know of anything more than I have stated; he thought it would be a good thing for Peoria to have another company; I think he alluded to the old legal fight I had with Tom Coffey that might induce me to want to go into it.

59. Then in a measure, as I understand you, he made it with you a personal matter, did he?

Ans. Somewhat, yes sir.

60. Is it true then that when the subject was first introduced to you, you were disinclined to participate in the organization and furnish a portion of its capital?

A. I don't think I was disinclined; I didn't say that did I?

61. No, but my inference was drawn from the fact you say he used that as an argument why you should become interested?

A. Not particularly in argument; he stated it as one of the reasons, but I did not allude to that as having any particular bearing on the subject.

62. State what your principal reason was in becoming interested in the proposed organization?

(Objected to as immaterial.)

A. I don't think of any other than I have stated.

63. My question calls for the principal reason that induced you to become interested?

A. It would be pretty hard to give the principal reason; generally, there was a good deal of prejudice against the old company, their methods and treatment of patrons; then there was a pretty good crowd of fellows going into it; I guess I am easy anyway in going into outside matters.

64. With whom, other than with Mr. Miller, did you converse with reference to the proposed organization prior to the time you subscribed the subscription list?

(Objected to as immaterial.)

A. I remember distinctly of having a talk with Sumner R.
1009 Clarke, and that is about all.

65. Did he or you introduce the subject?

Objected to as immaterial.

A. I think I did.

66. What was the nature of that conversation?

Objected to as incompetent and immaterial.

A. The principal thing I wanted to get at was, whether there was really an intention to build a gas works, or if it was a scheme to buy the old company out; I was assured there was nothing of that kind on; that the works were going to be built; I know I satisfied myself on that question.

67. What, if any, representations did Mr. Clarke then make to you with reference to the proposed organization for competitive purposes?

(Objected to same grounds)

A. I think the principal part of my talk with him was with reference to the genuineness of the proposition of building; I did not want to go before the council and ask for a franchise if the proposition was not going to be carried out.

68. State whether or not there was at that time any conversation between you and Mr. Clarke with reference to competition to arise from the installation of a new plant here?

Objected to same grounds as before.

A. I don't remember anything definitely.

69. Was that the only conversation you remember to have had with any of the gentlemen with whom you became associated?

A. It is the only one I remember of; I would not say I did not

talk with some of the others for probably I did; I met Mr. Miles every day several times and very likely I talked with him a little about it.

70. Prior to the time you subscribed for the capital stock which you did, did you know who were to be the subscribers for the
1010 remainder of it?

(Objected to as immaterial)

A. I think I did generally.

71. Did you also know the amounts which they severally proposed to subscribe?

Ans. Most of them.

72. Did you also at that time understand that John R. Walsh was to be a subscriber to the stock?

Objected to as incompetent and immaterial.

A. I knew he was to be largely interested in some way, either in the bonds or the stock.

73. Did you also know the extent to which Sumner R. Clarke was to become a subscriber?

A. Nothing more than he was to be the principal owner here.

74. State whether or not all of the gentlemen who signed that subscription list were able financially to pay for the stock they subscribed?

Ans. I should say they were.

75. Did you take the stock which you subscribed?

Ans. Yes sir

76. Do you know whether or not Mr. Walsh is at present a stock holder in the complainant company?

Objected to as incompetent and immaterial.

A. I think he is; that is my understanding.

77. Where did he get his stock?

(Objected to same grounds)

A. I could not answer that.

78. Have you no knowledge or information upon that question?

A. No definite information.

79. State if it is true that it was understood prior to the time the stock subscription was made, that Mr. Clarke was to appear to be a large subscriber, while, in fact, Mr. Walsh was to take that stock, and if that plan was not carried out?

Objected to same grounds as before.

A. I stated a few minutes ago I knew Mr. Walsh was to have an interest in some way, either in bonds or stock, but I knew
1011 nothing about the amount and don't know to-day what his ownership is.

80. Do you know whether or not Sumner R. Clarke took all the stock which he subscribed and whether or not he paid for it?

Objected to same grounds.

A. I don't know, but I imagine he did though.

81. Do you know, within reasonable limits, Sumner R. Clarke's financial condition at the time he subscribed the stock list in question?

A. I have no definite knowledge but he is regarded as a wealthy man; I think there is no doubt but what he is.

82. Do you know whether or not Mr. Clarke was then able to make a stock subscription of that magnitude and pay for it?

Objected to as incompetent and immaterial and calling for the opinion of the witness.

A. I should suppose he was.

83. State whether or not, from your knowledge of Mr. Clarke's financial ability, an investment of that magnitude would be a great or small one for him to make?

Objected to same grounds and calling for a conclusion.

A. I should think it would be a great one.

84. State whether or not you have ever known of his making any other investment of anything like that magnitude?

Objected to as immaterial.

The MASTER: I don't think it material, but the witness may answer subject to the objection.

A. I have no knowledge of any other unless it be an investment in real estate as large as that, although he has made some large investments in distilling property since I have known him, but nothing as large as that.

85. Or in real estate either?

A. Well, he is known to be a heavy owner of real estate,
1012 but the largest investment I ever knew him to make prior to that time in Peoria was building the Manhattan distillery.

86. How long have you known Mr. Clarke?

A. From the time I came here about 26 years ago.

87. Were you present at a meeting of the subscribers to the capital stock at the time of the organization, or to prepare for obtaining the final certificate of organization?

Ans. Yes sir.

88. What, if any, discussion was had at that time with reference to the prospect and purpose of the company?

Objected to as incompetent and immaterial.

A. I don't think there was any.

89. How many of the several subscribers were there on that occasion?

A. I think nearly all of them; I don't remember whet Chauncey Clarke was there, but I should say at least three-four of the subscribers were there.

90. What, if any, knowledge have you concerning the prepa tion of the franchise or license presented to the city council in half of your company?

A. I don't think I had very much; it was prepared by the att neys.

91. State whether or not you were consulted in any way wi reference to what it should contain?

A. I think I was; I think I read it when it was completed.

92. With whom, if any, of the stockholders or officers did y confer with reference to what should be embodied in that or nance?

A. I cannot remember any particular conversation outside of n talks with the attorneys.

93. Did you know of the presentation of the ordinance at or abo the time it was presented?

Ans. Yes sir;

94. How long was it pending, if you know?

1013 A. I don't believe I could tell but not long.

95. What, if anything, did you have to do with referen to its passage by the council?

Ans. Very little.

96. How many, if any, meetings of the city council did you a tend during its pendency?

A. I don't remember of attending but one, and that was the nig it passed the council.

97. Did you know the committee before which the ordinance w pending?

Ans. I presume I knew at the time, but could not tell now.

98. How did it happen you were present at the time the ord nance passed?

Ans. I don't think I was present when it passed but was the during the meeting; I think I left before it passed the council an learned later it had passed.

99. Do you remember of any other of the subscribers being pre ent at that time?

A. I think Mr. Miller was there and possibly Robert Clarke.

100. Was Summer R. Clarke there?

A. I don't remember but I saw him that night after it passed.

101. To what extent, within your knowledge, did Summer R Clarke participate in the passage of the ordinance, or in the discus sion which led up to its passage?

Ans. I don't know how much he did.

102. Do you know from anything Mr. Clarke said to you at an time?

Ans. No sir.

103. During the time this ordinance was pending, state whether o

not you had any conversation with any members of the council respecting it?

Ans. I think I talked with Alderman Thode.

104. Was he an alderman from your ward?

Ans. No sir.

105. Who introduced the subject, you or Mr. Thode?

A. I guess I did; it was merely in relation to a forfeit he had been talking; that there should be deposited in case the ordinance was never used; I think we talked on change once or twice about it.

1014 106. From what source did you obtain information respecting Mr. Thode's position upon that question?

A. Well, I don't know; I learned it in a general way; I am not certain whether I brought the subject up to him, or he did to me we talked about it two or three times.

107. At the time you were making arrangements to organize this company, did you know the prices charged for gas in Peoria?

A. Yes sir;

108. How long had you been familiar with those prices?

A. I have been a consumer of gas ever since I came here.

109. For how long a period of time had you known the price at which fuel gas was being furnished to consumers in Peoria?

A. I could not give the date, but I probably had known it from the time we commenced to use it, but I could not tell what it was.

110. Have you been a fuel gas consumer for some period of time?

A. Yes sir; but I could not give the date when we commenced using it; we were using it at that time though.

111. At and prior to the time of your organization what, if any, knowledge had you concerning the volume of gas consumed in Peoria?

A. Very little.

112. What, if any, knowledge had you regarding the proportion of the entire consumption used was for fuel gas purposes?

A. None at all.

113. There was a considerable difference in price between the fuel and illuminating gas, was there not?

Ans. Yes sir;

114. And had been for sometime?

Ans. Yes sir;

115. What was the price of fuel gas at that time?

A. My recollection is it was 75c. net; it might have been 85c. with 10c. off; I remember that illuminating gas was $1.35 with 10c. off if paid before the 10th, of the month.

116. That was the price at the time you were organizing your company?

Ans. That is my recollection.

1015 117. State whether or not about the time of your organization, or shortly before, you saw any estimates touching the

st of installing a complete gas plant in Peoria of the kind contemplation by your company?

(Objected to as immaterial.)

A. I didn't see any estimates.

118. State whether or not any estimates were furnished to the mpany, or any of its officers, within your knowledge?

Objected to as immaterial.

A. I presume there were but I didn't examine them.

119. At that time, what specific knowledge had you regarding e prices at which gas could profitably be furnished to consumers Peoria?

Ans. I didn't have any.

120. What official position, if any, have you held in the com- inant company?

Ans. Director.

121. Were you one of the original directors?

Ans. Yes sir;

122. Are you still a director?

Ans. Yes sir;

123. What proportion of the meetings of the directors have you ended during that time?

A. I have attended every meeting when I was in the city; I ppose two-thirds of the meetings more or less.

124. How regularly do the board of directors hold meetings?

A. I don't think we have averaged a meeting a month.

125. Is there a regular time set for the meeting of the directors?

Ans. I don't believe I can answer that question, but I think our laws must provide for regular meetings.

126. State what, if any, discussion was had at any time in the rd of directors prior to the time you were ready to furnish gas ecting the prices to be charged for it?

Objected to as incompetent and immaterial.

A. I don't think we have had an opportunity to make a price, or even discuss it; we had to follow the gait of the old company; they reduced the price before we were ready to furnish any gas, I think, and about all we had to do was to ow suit; whenever they made a price we met it.

127. Do you remember at this time about when such reductions e made and what they were?

bjected to as incompetent and immaterial.

A. My recollection is gas was down to 50 cents before we were to furnish any gas; I may be wrong, but I think the first we ished was at that figure and later it was reduced still more— 0c. net I believe.

28. For how long a period of time were the companies furnish-
gas at 50 cents and 30 cents respectively?
. I could not tell you.
29. What change was made when it was changed from 30c. per
usand?
Objected to same grounds.)
. It was changed to $1.15 net for illuminating gas and 75c. net
fuel gas.
30. Was that change made by both companies at the same time?
bjected to same grounds.
. I don't know much about what the other company did.
31. What, if anything, did you know of the proposed advance in
e prior to the time it went into effect, or was had?
bjected to as immaterial.
. Well, I know when the advance came the prices were put some
ier than any idea I had; I know I made some objection to it
my objection was overruled.
32. Was that in the board of directors?
ns. I don't think so.
33. Was that before or after the new rate had become operative?
bjected to as immaterial.
. Before.
34. You at that time knew what the advance was to be did you
not?
A. No sir; I was consulted as to what price it should be.

(The MASTER:)

35. As I understand you, you were consulted as to what price it
ld be, but your view of the matter was overruled?
. That is right to some extent.

(Mr. TICHENOR:)

36. What position did you take with respect to the rate that
t to be fixed at the time concerning which you have just tes-
i?
bjected to as incompetent and immaterial.)
e MASTER: I doubt the competency of that, but the witness
answer subject to the objection.
. My idea was 75c. for fuel gas and $1.00 for illuminating gas.
37. And did you so express yourself at that time?
ns. Yes sir.
38. Were there any others that took the same position?
bjected to as incompetent and immaterial.
. I think there were.

139. Do you remember about the time the new rate, to which you have referred, went into effect?

(Objected to as immaterial.)

A. I don't think I could give you the date.

140. How long before it became effective was this discussion to which you have just referred?

(Objected to as immaterial.)

A. Within a few weeks.

141. You have stated, as I understand you, that your position was overruled—in what manner was that accomplished?

Objected to as incompetent and immaterial.

A. Well, I will answer by saying instructions from the president, Mr. Clarke.

142. And were those instructions presented at a meeting of the board?

Ans. I don't think so; I don't remember of any board meeting.

143. Where rests the authority to fix rates for your company?

Objected to as incompetent and immaterial.

A. It seemed to rest with the officers, although it properly belongs to the board of directors, I suppose.

1018 144. How then did it happen that on this particular occasion Sumner R. Clarke dictated the prices?

Objected to as incompetent and immaterial.

A. Well, I don't think I can tell.

145. State whether or not the fixing of other prices at times of changes came before the board of directors?

Objected to same grounds.

A. I don't recollect of any directors' meeting on this question of prices.

146. Do you remember any discussion before the board of directors touching the subject of prices?

Objected to same grounds.

A. I don't remember any; undoubtedly there was though, but I cannot locate any specific talk.

147. State whether or not you and the other directors were all the time informed respecting the prices that were being made by the old company?

(Objected to as immaterial.)

A. I think we were.

148. What, if any, action did your board of directors take with reference to the various changes in prices which the old company from time to time made?

(Objected to as incompetent and immaterial.)

A. I think we followed their prices is about all.

149. What were your reasons for doing that?

Objected to same grounds.

The MASTER: I don't see the materiality of it, but the witness may answer subject to the objection.

A. We wanted to start the business and introduce the gas.

150. In what portion of the territory, covered by your company at that time, was the old company also operating in?

Objected to as immaterial.

1019 A. In very nearly all of it I should think.

151. At the time you say you knew of the proposed advance in rates by your company, did you also know that the old company proposed to make the same advance at the same time?

Objected to as immaterial.

A. I presume we had some intimation of it; we were getting tired of doing business at a loss.

152. To what extent, if at all, had that subject been considered by the two companies, or by their representatives, at that time?

Objected to as incompetent and immaterial.

A. I don't know; I never was present at any joint meeting.

153. How did you know that the old company was to advance its price at the same time your company did?

A. I didn't say I knew it; I said our company must have had some intimation of it.

154. And didn't you say you had some knowledge of it?

A. No, I used the word intimation for I had no personal knowledge of it.

155. Look at page 8 of defendant's answer filed in this case, and state whether or not the changes to which you have referred were made about the time that those notices appeared in the Peoria Press?

(Objected to as incompetent and immaterial.)

A. I think they were

156. State whether or not you saw those notices at the time they were published?

(Objected to as immaterial.)

A. Yes sir;

157. State whether they were published simultaneously in a number of the Peoria papers and side by side?

Objected to same grounds.

A. I don't recollect; the papers show for themselves if this is a copy.

020 158. You do remember seeing the two notices in the papers?
A. Yes sir.
159. And about the same time?
Ans. Yes sir;
160. State what, if any, conversation you had with any of the directors, or stockholders, either in board meetings or elsewhere, subsequently to the appearance of those notices, with respect to that.

Objected to same grounds.
The MASTER: I don't think it material to show conversations had with outside parties; the business management of a corporation under our laws is with the board of directors; I think it would be competent for you to show any discussion he had with his associates in the board. The witness may answer subject to the objection.

A. I don't remember any particular conversation.
161. Don't you remember any conversation at all upon that question?
Ans. No, I don't remember of any; very likely there were conversations but I don't remember any specific conversation.
162. State whether or not those notices were the subject of discussion in your board of directors subsequent to the time they were published?
A. No sir; I don't remember of any directors' meeting where they were discussed.
163. Have there been any changes in the price of gas since about the time of the publication of the notices concerning which you have just testified?

Objected to as incompetent and immaterial.

A. I think so. I think at the conclusion of some litigation it was necessary to charge the same price for fuel and illuminating, and it was all put at $1.00 per thousand feet.
164. What had been the price of fuel gas prior to that time?
A. 75 cents net.
165. And it had stood at that figure, had it not, since about the of August, 1900?
Ans. Yes sir;
166. And had that been the price charged by both companies?

Objected to same grounds.

. That is my understanding.
67. Under whose direction was that advance made from 75 cents ne dollar for fuel gas?

Objected to same grounds.)

In our company it must have been ordered by the president manager; I did not hear any discussion about it, but it was

erally understood there had been a judicial decision against
ging two prices and it could not be done any longer as it was.
58. What was the nature of that decision as you understood it?
bjected to as incompetent, immaterial and not the best evi-
ce.
. My understanding of it was that it had been decided it was no
er legal to charge two prices for the same product no matter
t purpose it was used for.
59. During all the time since the organization of your company
e and including the last change to which you have referred,
directed those changes?
bjected to as incompetent and immaterial.
. The manager must have directed them.
60. Did the manager do it in every case?
bjected to same grounds.
. He did it; it might have been done after consultation with the
ident.
61. State whether or not at any time the board of directors took
he subject of prices and fixed it?
bjected to same grounds.
. I have no recollection of any directors' meeting where the
s were fixed; I would not say, however, there never was a di-
rs' meeting of that kind because I missed some of the meetings.
62. During the time you have been connected with the company
state what has been your understanding of the primary
authority for fixing the price of gas?
bjected to same grounds.)
. I suppose the directors would be the primary authority; the
ers of the company have attended to it.
63. State whether or not the directors have always known of the
s which were charged by your company?
bjected to as incompetent and immaterial.
. I think they have.
64. And so far as your knowledge extends there has never been
protest on the part of the directors on the rates that have been
d?
ns. I don't think so.
65. What duties has the president performed since the organiza-
of your company?
. The usual duties of the president of a corporation.
66. What in this particular case?
. I do not know that I can answer that; I think he goes to the

office every day he is in the city and has a general oversight of the business although we have a manager.

177. Is the office of president an active one or otherwise?

A. You could hardly call it a real active office, but the president is not a figure-head by any means—he takes an interest.

178. What jurisdiction or authority has the president over the manager and especially with reference to fixing rates, so far as your knowledge extends?

(Objected to as incompetent and immaterial.)

A. The *the* authority of the president is greater than that of the general manager at all times in everything.

179. Does that hold good in your corporation at this time?

A. So far as I know it does.

180. State whether or not within your knowledge that authority has been exercised during the existence of the company?

Objected to same grounds.

A. I think it has.

1023 181. As a rule at the directors' meetings attended by yourself, has Mr. Clarke been the presiding officer?

Ans. Yes sir;

182. Has he continuously been the president of the company since its organization?

Ans. Yes sir;

183. And is now?

Ans. Yes sir;

184. How many of the directors at the present time are residents of Peoria?

Ans. 4, I believe out of 7—4 or 5—I am not sure.

185. Who are the non-resident directors?

A. John R. Walsh and L. A. Walton.

186. How long have they been directors?

A. I could not give the date of their election.

187. Do you remember the fact of Philo B. Miles resigning as a director of your company?

Ans. Yes sir;

188. Who was elected to fill the vacancy?

A. I could not tell without referring to the minutes—possibly it might have been Mr. Walton—I am not sure about that.

189. Do you remember the occasion of the resignation of Mr. O. J. Bailey?

Ans. I do.

190. Who was elected to fill that vacancy?

A. I could not say without looking at the minutes.

191. Are you able to state who filled those two vacancies without reference to the minutes, and the vacancy filled by each particular man?

Ans. No sir;

192. What non-resident directors of your company have there been since its organization other than Mr. Walsh and Mr. Walton?

A. I don't think of any.

193. Are you able to state in a general way how long those gentlemen have been members of the board?

Ans. No sir;

194. What proportion of the directors' meetings, since they became members, have they attended?

A. Very few meetings; I don't think Mr. Walsh has ever
1024 attended a meeting; Mr. Walton I think has—a very few.

195. Do you know of any special subjects that came before the board of directors on any occasion when Mr. Walton was present?

A. No sir; I may be wrong about that; Mr. Walton has been here occasionally and it is possible he never has attended a directors' meeting, but I rather think he has.

196. If he has attended any meetings would that fact be shown by your minutes?

Ans. Yes sir;

197. Since your company began to furnish gas to what extent have you been familiar with its distribution from day to day?

A. To a very small extent; I don't know much about it.

197. To what extent have you been familiar during that time with its receipts.

Ans. Not at all.

198. To what extent have you been familiar with the financial success of the company?

Ans. I don't know very much about it.

199. How much gas is your company putting out per day at the present time and how much was it putting out on August 1, 1900?

Objected to as incompetent and immaterial.

A. I could not answer that for I don't know.

200. Do you know what amount of gas your company was furnishing on the 31st, day of August 1900, as compared with the amount which the old company was then furnishing?

(Objected to same grounds.)

A. I don't know.

201. Do you know how many service pipes your company had in active use at that time and also how many the old company had in use at that time?

(Objected to same grounds.)

A. I do not.

202. Do you know what amount of gas your company was furnishing on the 31st, of August 1901, as compared with the amount the old company was then furnishing?

(Objected to same grounds.)

A. No, I do not know.

1025 203. Do you know how many service pipes your company had in active use on the date last named, and also the number of service pipes which the old company then had in active use?

A. I do not.

204. Do you know how many service pipes your company has in use at the present time and how many the old company has in use at this time?

Ans. No sir;

205. Do you know how the quantity of gas your company is now furnishing to the citizens and city of Peoria compares with the quantity the Peoria Gas Light & Coke Co., is furnishing in the same territory?

(Objected to as incompetent and immaterial.)

A. No, I don't know.

206. Do you know whether or not the Peoria Gas Light & Coke Co. at the present time is furnishing any gas to the city and citizens of Peoria?

(Objected to same grounds.)

A. I think they are; I don't know anything to the contrary.

207. To what extent, during the time you have been a director, have you been familiar with the affairs of your company—I am speaking, of course, of its business affairs?

A. I have not spent much time there and am not very familiar with it.

208. State if it is not true, within your knowledge, that for several months last past the Peoria Gas Light & Coke Co., has not furnished a foot of gas to the city or citizens of Peoria?

Objected to as incompetent and immaterial.

A. I don't know whether it has or not.

209. State if you don't know that the fires have not been lit in the old company's plant, for a number of weeks or months last past?

Objected to same grounds.

A. I don't know.

210. Do you not know it from your official connection with the complainant company?

Ans. No sir;

1026 211. How frequently do you pass the old company's plant?

Objected to as incompetent and immaterial.

A. Once, twice or three times in as many years.

212. State if you are not at the present time an officer in a railroad which passes over a portion of the premises of the old Peoria Gas Light & Coke Co.,?

Ans. Yes sir;

213. And is it not also true that you frequently pass over that railroad?

Ans. I don't think I have been over that road for a year.

214. How far is the old gas company's plant from your place of business?

Ans. $\frac{3}{4}$ of a mile or possibly a mile.

215. You are well acquainted with the locality?

Ans. Yes sir;

216. At the time you had in contemplation the installation of a new gas plant how large a plant with reference to the demands of the city of Peoria, was considered?

A. Large enough to supply the entire demand.

217. Do you know whether or not the plant has sufficient capacity at the present time to supply the entire demand?

A. I think it has, if not, we can arrange it pretty quick.

218. Are you acquainted with the capacity of the different portions of the plant of the complainant company?

Ans. No sir;

219. Have you ever known those capacities or any of them?

A. No sir; I know nothing whatever about the manufacture of gas.

220. During the period of the construction of your company's plant, to what extent were the investments in the progress of the work presented from time to time to the board of directors?

A. Only in a general way—the amount of expenditures etc.,

221. By whom were those presented?

A. By the manager when presented at all.

222. That was Mr. Little was it?

Ans. Yes sir; he has been the manager from the start; there has been no changes in the organization except these changes in the board of directors.

1027 223. From month to month, or otherwise, were any financial statements presented by Mr. Little to the board of directors during the period covered by your construction?

A. I think he kept the directors advised of the expenditures and the work that was going on.

224. I mean formal statements in writing showing disbursements etc., did he present such statements from time to time?

A. Oh, yes.

225. And that continued, did it, until the plant was completed?

A. Yes sir;

226. Since that time has he also continued to present financial statements in writing?

A. I don't think so; I have not seen one for sometime, but possibly he may when I was not there.

227. Do you know whether there is any requirement of that kind by the board?

Ans. No, I do not.

228. Has the board as such, or any committee of it, ever au
the accounts from time to time as the work progressed or since
A. No sir;
229. Has there ever, within your knowledge, been an aud
committee, or any committee appointed for the purpose of exa
ing and passing upon the accounts presented by the manager?
A. I don't recollect of any still I could not say there had
been.
230. If there had been anything of that kind would that
matter of record also?
Ans. Yes sir;
231. State whether or not from month to month since your
pany began to furnish gas, your manager, or any other person
furnished to the directory statements showing the output?
A. I don't think he has.
232. State whether or not any information upon that q
1028 tion has come before the board officially or otherwise, or
been considered in any manner by the board?
A. Not at any meeting where I was present.
233. Have you as a director or as a stockholder during any
tion of that time had any knowledge of the output?
A. I don't think I have; it is my own fault I have not.
234. Have you no knowledge at the present time of the d
output of your company's plant?
A. No sir; I have not but it is all my own fault for I can g
the books and find out anything I want to.
235. What has been the character of the business under
cussion at the directors' meetings?

Objected to as incompetent and immaterial.

A. Would not that be a proper question to ask of the secretar
someone who has the records?
236. I would like to have you answer it if you can?
A. I don't believe I can; our meetings have been very sh
most everybody being in a hurry that attended them; I cannot
call any particular thing at those meetings that was discussed.
237. Do you know whether or not Mr. Walsh had been interes
in the old company, or was interested in it at the time of the in
guration of the plant for the organization of the new company?

Objected to as incompetent and immaterial.

A. I have no direct knowledge of any interest he had.
238. Have you any knowledge from anything Mr. Walsh s
to you?
A. No sir;
239. To the best of your knowledge then, is this the first of M
Walsh's ventures in the gas business in Peoria?
A. It is to the best of my knowledge; I heard some rumors
some stock purchases but I knew nothing about it.

240. When did you hear at ; rumers of that kind?

Objected to as incompetent and immaterial.

1029 A. I could not tell you when.

241. When with reference to the time of the organizatio of your company?

A. I could not answer that, but it was, of course, since then.

242. That the purchases were since or you heard it since?

A. Well, I heard it since; all I heard was merely rumor, and don't know that it was bought by him either.

243. Do you know of any purchases of stock in the old compan made by Mr. Walsh since the organization of the complainant com pany?

Objected to as incompetent and immaterial.

A. No, I don't know of any.

244. Do you know of any purchases of stock in that company i his interest?

(Objected to same grounds.)

A. I have no knowledge of any.

245. Do you know who, at the present time, are the holders o the stock of the old company?

Ans. No sir;

246. Do you know whether that stock is owned in Peoria or out side?

(Objected to same grounds as before.)

A. I don't know.

247. What knowledge have you, if any, respecting the dividends which the old company has made since the commencement o operations by your company, as compared with its earnings before

Objected to same grounds.

A. I have no knowledge of either its present dividends or before

248. Look at Exhibit "19" now shown you and state whether o not that bears your genuine signature?

Ans. Yes, I signed this.

249. Who presented it to you for your signature?

A. I don't remember.

250. How long before you signed it did you know that such a paper was to be prepared for presentation to the city council?

A. I probably knew it when I signed it; I don't think I 1030 knew it before.

251. Do you know who prepared it, or had its preparation in charge?

Ans. No, I do not even remember who brought this to me to sign —possibly it was Mr. Miller; he did most of the work of this kind

252. Did you know for what purpose the paper was to be used at the time you signed it?

A. I knew it was to be presented to the council.

253. Did you know what object the signers had in preparing it and presenting it to the city council?

A. I supposed the primary object was to assist the passage of the ordinance; it could not have been any other.

254. At the time you signed that paper, did you believe the statements it contained were true?

A. Yes sir; or else I would not have signed it.

255. Did you also believe that the company, if the license were granted, would carry out in good faith the statements and representations contained in that paper?

Ans. I did.

256. From a financial standpoint, did you believe the company would be able to carry out the statements and representations contained in that paper?

A. Yes sir; I had taken pains to be certain of that; I knew they was plenty of money to use and I had been assured a works would be built; I did not want to be a party to any application of this kind to the city council that was not genuine.

257. And did you also know at the time that paper was signed that its statements and representations could be carried out and still enable the company to make a profit on the investment?

Objected to as incompetent and immaterial.

A. Well, I thought so.

258. You believed that to be the fact, did you?

Ans. Yes sir.

Adjourned by agreement until Tuesday, March 11, 1902, at 10 a. m.

1031 United States court room, Government building.

PEORIA, ILL., TUESDAY, *March* 11, 1902—10 o'clock a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner; Mr. E. C. Ritcher and Mr. W. T. Abbott, appearing for complainant; Mr. Henry Mansfield, and Mr. F. H. Tichenor, appearing for the defendant.

OLIVER J. BAILEY, called on behalf of the defendant, being first duly sworn according to law, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. Please state your name and residence?

A. Oliver J. Bailey, Peoria, Illinois.

2. In what business are you engaged?

A. I am a lawyer by profession and I am interested in two banks of this city—I am president of the Central national bank and vice president of the Dime savings bank.

3. How long have you been president of the Central national bank?

Ans. Since the death of Mr. Lightner—some 3 or 4 years.

4. How long have you been connected with the Dime savings bank as an officer?

Ans. Since its organization 15 years ago.

5. You are also a partner in the firm of Bourland & Bailey of this city, are you not?

Ans. I am.

6. Does that firm carry on a real estate and loan business?

A. Yes sir; it does principally a loan brokerage business.

7. You are also interested, to quite a large extent, in real estate in and around the city of Peoria, are you not?

A. I own some real estate.

8. Are you the same O. J. Bailey whose name is attached to the subscription list for stock of the Peoria Gas & Electric Company?

A. I am.

9. Were you acquainted with the various gentlemen, whose
1652 names appear upon the subscription list previous to the time they subscribed to the stock of complainant company?

A. I had known most of them well for a number of years.

10. How long had you known Sumner R. Clarke, Ben. Warren, Jr., and Geo. H. Littlewood?

A. I had known Mr. Clarke probably 10 or 12 years; had known Mr. Warren longer than that; I have known Mr. Littlewood since he has resided in this city, I believe.

11. Previous to the time you became a subscriber to the capital stock of the complainant company, did you have any conversation with any of the gentlemen, who afterwards became stockholders, relative to becoming stockholders in complainant company?

Ans. I did.

12. With whom did you have those conversations?

Objected to as incompetent and immaterial.

A. Principally with Sumner R. Clarke.

13. What was the nature of the conversation you had with him?

Objected to same grounds.

A. Simply with reference to the advantages and advisability of new gas company in Peoria.

14. Did you know anything about the cost of the manufacture of gas at the time you had these conversations with Mr. Clarke?

Objected to same grounds.

A. I know something of the process of the manufacture of gas, but as to the cost of it I knew practically nothing.

15. In the course of these conversations you had with Mr. Clarke was anything said concerning the cost at which gas could be produced, or manufactured in the city of Peoria?

Objected to same grounds.

A. Not definitely, only dealing in generalities.

16. Was anything said at the time as to whether the new company would make a reduction in the price at which gas was furnished to consumers in the city of Peoria?

(Objected to same grounds.)

1033 A. It was claimed that gas could be manufactured at a reasonable profit and furnished at a less price than was then being charged for gas.

17. Do you remember the prices then being charged for gas by the Peoria Gas Light & Coke Company?

A. I don't know with certainty whether I remember the prices that were being charged at that time or not; I think I remember substantially the prices.

18. What were those prices to the best of your recollection?

Objected to same grounds as before.

A. I believe it was $1.35 for illuminating gas and a $1.00 for fuel gas with a discount on each price of 10c. per thousand if paid before the 10th, of the month. That is my best recollection but I am not certain.

19. Were you acquainted with the stockholders of the Peoria Gas Light & Coke Co., at that time?

A. I was acquainted with some of them.

20. Who were the gentlemen you knew that were stockholders in that company?

(Objected to as immaterial.)

A. Mr. Henebery, Mr. Coffey—I knew better perhaps of Mrs. Bradley and her interest by virtue of my connection with the Bradley Institute.

21. Did you know of any stockholder of the Peoria Gas Light & Coke Co., who was a non-resident of the city of Peoria?

Objected to as incompetent and immaterial.

A. No sir; I did not at that time so far as I know.

22. Did you at any time subsequent to the signing of the stock subscription list of the complainant company?

A. No not in any personal way.

23. In what business was Sumner R. Clarke engaged at the time you had these conversations with him relative to the organization of the Peoria Gas & Electric Co.?

(Objected to same grounds.)

1034 A. I knew him as a distiller and a farmer.

24. What was his financial reputation in the city of Peoria at that time?

(Objected to same grounds.)

A. I believe his reputation was that of a man of large means.

25. Look at the stock subscription list before you and state whether or not you believed from general reputation that the men who subscribed to that stock were at that time capable of paying for the amount of stock for which they subscribed?

Objected to as incompetent, immaterial and calling for the opinion of the witness.

A. I should so regard them.

26. Would you consider the amount of stock subscribed for by Sumner R. Clarke a large or a small investment for a man of his reputed wealth?

(Objected to same grounds as before.)

The MASTER: I don't see the materiality of it but the witness may answer subject to the objection.

A. I think I should regard it as a large investment; I should, however, have believed Mr. Clarke entirely competent to carry such an investment if he had undertaken to do so.

27. Did Mr. Clarke, at the time he had these conversations with you relative to your becoming a subscriber to the capital stock of complainant company, impress you with the idea that he had any knowledge concerning the cost of the manufacture of gas in cities of the size of Peoria?

(Objected to same grounds.)

The MASTER: State what he said on that subject, if anything?

A. He did impress me with the fact that he had personally given the matter considerable thought—he so stated to me.

28. What, if anything, did he say to you relative to the cost of the manufacture of gas in cities of the size of Peoria?

Objected to same grounds.

1035 A. I don't think there was any definite figures given; our conversations were always of a general character as to gas stock being a good investment.

29. What, if anything, did he say to you relative to the purpose of the organization of the Peoria Gas & Electric Company?

Objected to same grounds.

A. Well, he said that the purpose primarily was a good financial investment, and secondly, to give to the citizens of Peoria the benefit of a company of more enterprise, general affability in its methods of dealing with the people.

30. Did he say anything in the course of those conversations relative to what would be the conduct of the complainant company with the Peoria Gas Light & Coke Company?

Objected to same grounds.

A. Nothing except it would be a legitimate competitor of that company.

31. Did you have any conversation with any of the other proposed stockholders of the complainant company previous to signing the subscription list of that company?

Objected to same grounds.

A. I think not individually; I have had such conversations collectively before the subscription was signed.

(The MASTER:)

32. Do you mean with parties who afterwards became subscribers? Ans. Yes sir;

(Mr. MANSFIELD:)

33. Where were those conversations had?

Objected to same grounds.

A. My recollection is the first conversation was had in Mr. Irwin's office.

34. Who were present at the time this conversation was had?

Objected to same grounds.

A. I think, Mr. F. T. Corning, Mr. Geo. H. Littlewood, Mr. Benj. Warren, Jr., Mr. Philo B. Miles, Mr. Theo. J. Miller and Mr. Sumner R. Clarke.

1036 35. What was the nature of the conversation held in that office at that time?

(Objected to same grounds.)

A. As to the advisability of organizing a gas & electric company and as to the best methods of procedure to accomplish that end

36. Was it a general discussion, or was it carried on by one individual with the other gentlemen there present?

Objected to same grounds.

A. My recollection is at this time that the discussion was generally engaged in by most of the persons present.

37. What was the nature of the remarks made as to the advisability of forming such a company at that time and who were they made by, if you remember?

(Objected to same grounds.)

A. I remember that the sentiment of that gathering was in favor of the necessity, from a public view, of such an organization; I be-

lieve those views were expressed, as I remember it, by Mr. Miles, Mr. Warren, Mr. Clarke and Mr. Miller.

38. Why was it deemed necessary from a public standpoint that such a company should be organized?

(Objected to same grounds.)

A. Because of the illiberal disposition manifested on the part of the Peoria Gas Light & Coke Company in the matter of the extension of mains and in the matter of general public service as well I think as to prices charged for gas.

39. To what extent was the conversation directed towards the price of gas then charged by the Peoria Gas Light & Coke Company?

Objected to same grounds.

A. I cannot say beyond the general expression that gas could be furnished at a reasonable profit and at the same time for less money than we were paying for it here.

40. What conversation was had there relative to the unfavorable disposition of the Peoria Gas Light & Coke Co., to treat the consumers of gas fairly and courteously?

(Objected to same grounds.)

1037 A. I am not able to state from recollection the definite conversation indulged in on the part of anyone there.

41. Do you know of your own knowledge of any unfavorable disposition on the part of the Peoria Gas Light & Coke Co., to treat its patrons unfairly or discourteously?

(Objected to same grounds.)

A. Not beyond my own experience.

42. Do you know the territory that was proposed to be covered by the pipes of the Peoples' Gas & Electric Co., at the time of the organization of that company?

(Objected to same grounds.)

A. No sir; not with certainty; I know it was said that a certain interior territory would be first piped, and the expectation was to cover the entire city and territory covered by the old company.

43. Are the pipes laid in the streets of the city of Peoria by the complainant company co-extensive with the pipes that were laid and owned by the Peoria Gas Light & Coke Company?

Objected to same grounds.

A. Substantially so in the central part of the city.

44. Did you have any conversation with any other of the proposed stockholders in complainant company, or with any person, relative to the organization of said company, other than with Sumner R. Clarke?

(Objected to same grounds.)

A. I did yes sir;

45. With whom did you have those conversations?

Objected to same grounds.

A. With Mr. Miller, Mr. Littlewood and Mr. Little.

46. At the time you had the conversation with Mr. Little, what, if anything, did he say about his knowledge of the cost of the manufacture of gas in cities of the size of Peoria?

Objected to same grounds.

A. In substance that gas was being furnished at a price in cities the size of Peoria at less money than was being charged for it here.

1038 47. Was there any margin placed upon the price at which gas could be furnished at a profit in cities of the size of Peoria by Mr. Little?

(Objected to same grounds.)

A. Not that I remember of.

48. Did you have this conversation with Mr. Little previous to signing the stock subscription list of complainant company?

Objected to same grounds.

A. I did, at least, I so remember it.

49. Was there any limit placed upon the price at which gas could be manufactured and sold at a profit in the city of Peoria by Mr. Little during any of these conversations which you had with him?

Objected to same grounds.

A. No sir; I think not prior to the subscription for the stock.

50. Is it not a fact that gas used for fuel purposes was being sold in Peoria at that time for 75c. per thousand feet?

Objected to same grounds.

A. I think not at the time of the inception of this organization, but I would not want to dispute the record if it shows that I am simply stating my recollection and I was paying pretty large gas bills for the institutions I was connected with.

51. These conversations you had with Mr. Little at the time in question related to the price that gas was selling for in the city of Peoria at that time, did it not?

(Objected to same grounds.)

A. I think our conversation related to the price of gas and the general management and disposition of companies and the furtherance of public enterprise and public good.

52. Did those conversations which you had with Mr. Little at that time with regard to the price at which gas was being furnished

in the city of Peoria relate to the price of gas being furnished at that time?

(Objected to same grounds.)

A. I think so, as I understood the price at that time.

1039 53. This Mr. Little, with whom you had these conversations, is Francis W. Little now the manager of complainant company?

A. It is the same who is now manager of the company; I would not have remembered his initials.

54. Was Mr. Little present at the meeting that was held, as you have stated, in Mr. Irwin's office for the purpose of organizing the complainant company?

(Objected to same grounds.)

A. He was not.

55. At the time that meeting was held were any arguments advanced which were to be presented to the people for the purpose of obtaining the majority frontage required to obtain a franchise or license from the city of Peoria?

Objected to as incompetent, irrelevant and immaterial.

A. Not so far as I remember at this time.

56. Did you have any conversation with Theo. J. Miller relative to the obtaining of the majority of foot frontage for the purpose of obtaining a franchise or license from the city of Peoria?

Objected to same grounds as last before mentioned.

A. I remember of no personal conversation of that character.

57. Did you at the time of the meeting held in Mr. Irwin's office, know whether or not the stock subscribed by the various people, whose names appear upon the subscription list, was to be taken by them for themselves personally, or for some other person or persons?

(Objected to as incompetent and immaterial.)

A. So far as I knew at that time the stock subscribed, or to be subscribed by these individual persons, was an individual investment to be held by them.

58. What, if any, steps did you take towards obtaining a franchise or license for the complainant company to use the streets of the city of Peoria?

(Objected to same grounds.)

A. Personally I did not take any steps.

1040 59. Were you advised with as to what the contents of the ordinance, which was to be passed by the city of Peoria, should contain?

Objected to same grounds.

A. I think the preparation of the ordinance which the coun was subsequently asked to grant, was submitted to me before it w presented to the council and some changes therein were suggest by me but just what they were I do not remember at this time.

60. Were those changes acquiesced in by the men who were i terested in that company at that time?

(Objected to same grounds.)

A. I think they were.

61. Do you know the general terms of the changes that we recommended by you at that time?

(Objected to same grounds.)

A. No sir; I do not; I have not read the ordinance since the and I do not remember.

62. Were you a director of the Peoples' Gas & Electric Co., at an time?

Ans. I believe I was for a little time.

63. Did you attend the meetings of the board of directors whic were held during the time you were such director?

Objected to as incompetent and immaterial.

A. I believe I did.

64. What, if any, action was taken by the coard of directors rela tive to the prices that should be charged for gas during your term as a director?

(Objected to same grounds.)

A. Not any that I am aware of while I was such director.

65. When were you elected a director of this company?

A. At the time of the election of its first board, I think.

66. How long did you continue to be a director of that company?

A. I don't remember certainly; I think until about the close of the first meeting of the board.

67. Who was elected to fill your place, if you know?

Objected to as immaterial.

1041 A. I don't remember certainly, but I think Mr. Little.

68. What, if any, stock assessment was made by the board of directors during the time you were a director of that company?

Objected to as immaterial.

A. I believe an assessment of 20% was made on the stock while I was a director.

69. Has any other stock assessment been made to your knowledge since that time?

(Objected to as immaterial.)

A. Not so far as I am aware.

70. You are still a stockholder in co mplainant company, are you not?

(Objected to as immaterial.)

A. I am.

71. And as such stockholder you have received no notice of any stock assessment made by your company since that time?

Objected to as immaterial.

A. Not so far as I remember.

72. State whether or not at any meeting of the board of directors attended by you there was any action or conversation had relative to the prices which should be charged consumers of gas in the city of Peoria?

(Objected to as incompetent and immaterial.)

A. I attended a meeting—largely attended, I think, by the stockholders as represented by this list in Exhibit "18," at which the question of the price which should be charged for gas to consumers in the city of Peoria was discussed.

73. Do you remember what that discussion consisted of and what, if any, determination was had on account of that discussion relative to the price that should be charged consumers of gas in the city of Peoria?

(Objected to same grounds.)

A. I don't remember the definite discussion or conversation had at that time; it was not a meeting, as I remember it, at which the question could be determined; our action there was simply advisory from the standpoint of the Peoria stockholders.

1042 74. Who was present at that meeting?

(Objected to same grounds.)

A. I am not able to remember all the persons present, but this list of stockholders appearing in Exhibit "18" was largely represented.

75. What, if any, price was decided upon by the Peoria stockholders, as a fair and reasonable price to be charged consumers of gas in the city of Peoria?

(Objected to same grounds.)

A. The price contended for by a majority of the Peoria stockholders represented at that meeting was one dollar for both fuel and illuminating gas with the usual discount of 10c., as I remember it. That was my argument.

76. Was Sumner R. Clarke present at that meeting?

Objected to as immaterial.

A. He was.

77. Was Ben Warren, Jr., and Geo. H. Littlewood present?

Objected to as immaterial.

A. I think Mr. Warren was present; I am not certain as to Littlewood; I think, however, he was present.

78. Did you personally know at that time whether or not Sum R. Clarke was the owner of the stock subscribed by him to Peoria Gas & Electric Co.?

(Objected to as immaterial and irrelevant.)

A. I had reason at that time to believe he was not the owner all the stock subscribed for by him.

79. Did you know who was the owner of that stock?

Objected to same grounds as before.

A. Not from any personal knowledge; I had my own convictio

80. Was this conversation that was had by the Peoria stockho ers relative to the price they thought should be charged for gas the city of Peoria had at a time previous or subsequent to the co mencement of the furnishing of gas by complainant company to t city and citizens of Peoria?

(Objected to same grounds.)

1043 A. My recol-ection is it was had prior to the time of t commencement of the furnishing of gas, but it may not ha been; it was at the first meeting at which a definite price had be discussed at which I was present.

81. You say you ceased to be a director of this company at th first meeting of the board of directors after its organization? Wa that first meeting held previous, or subsequent to the constructio and completion of complainant's plant in the city of Peoria?

Objected to as immaterial.

A. It was held prior to the completion of the work.

82. It was before then it commenced to furnish any gas to the cit zens of Peoria?

(Objected to as immaterial.)

A. Yes sir.

83. At what price, if you know, was gas furnished to consumer in the city of Peoria immediately after the completion of the con struction of the plant of complainant company?

Objected to as irrelevant and immaterial.

A. I could not say; the price changed so rapidly I could not keep track of it.

84. The prices then varied at that time, did they?

Objected to same grounds.

A. I think they did.

85. What was the lowest price, if you know, for which gas was sold per thousand cubic feet in the city of Peoria by complainant company?

(Objected to same grounds.)

A. I don't believe I remember the lowest price that was reached.

86. Did you have any conversation with Theo. J. Miller relative to the arguments he should use in endeavoring to obtain the signatures to the foot frontage for the purpose of obtaining the franchise or license from the city of Peoria to lay the pipes of complainant company in its streets?

1044 Objected to as incompetent and immaterial.

A. Not that I remember.

87. Did you at that time as a stockholder or director know of the arguments that were being used by Mr. Miller in endeavoring to obtain that front footage?

Objected to as immaterial, incompetent and irrelevant.

A. No sir; I don't know that I did then or do now.

88. Did you at any time during the pendency of the franchise or license before the city council of the city of Peoria, have any conversation with any of the aldermen relative to the passage of that franchise or license?

(Objected to same grounds.)

A. I never sought any such conversation and I am not aware that I ever had such a conversation.

89. Did you at any time during the pendency of that ordinance appear before any committee of the city council for the purpose of advancing any argument, or reason, why such ordinance or franchise should be recommended by the committee for passage?

A. I never did.

90. Were you one of the parties who originated the idea of the organization of the Peoples' Gas & Electric Company?

Objected to as immaterial.

A. No not other than as much as I have testified to.

91. What person, if you know, first called to your attention the idea of the organization of such a company?

Objected to as immaterial.

A. I think Sumner R. Clarke was the first person to mention the matter to me.

92. Then was it upon the solicitation of Sumner R. Clarke that you became a subscriber to the capital stock of complainant company?

Objected to as immaterial and incompetent.

A. I could not say it was upon his solicitation; I think i
1045 was upon my own judgment later that I became a subscribe to the stock.

93. Upon what did you base your judgment?

Objected to same grounds also as irrelevant.

A. Upon the general discussion that had been had as to th benefits which would be derived to the city through such a organization.

94. Was it merely the benefits that would be derived by the citizens generally that led you to become a stockholder in this company?

(Objected to same grounds.)

A. I believe I may say that is literally true, otherwise I should have sought a much larger stock holding than my subscription indicates.

95. In arriving at that judgment you did not take into consideration any of the facts or circumstances surrounding the Peoria Gas Light & Coke Co., and its payment of dividends, did you?

Objected to as incompetent and immaterial.

A. In a general way I think those things entered into my conclusion from the very standpoint I have suggested.

96. Was it or was it not in your judgment considered a good investment at that time for yourself personally?

Objected to same grounds.

A. I had no reason at that time to believe it would prove otherwise than a good investment from a selfish standpoint.

97. Did you take into consideration the fact that there was another gas company doing business in the city of Peoria at the time?

Objected to same grounds.

A. Yes sir; I did, and perhaps was personally instrumental in having a definite pledge that under no circumstances should the new organization dispose of its interests to the management of the old company.

98. At the time you became a stockholder of complainant
1046 company did you know the amount of gas that was consumed daily in the city of Peoria?

(Objected to as immaterial and irrelevant.)

A. No sir; I did not.

99. Did you have any idea as to the amount of gas so consumed?

A. No, I think not.

100. Do you know what the size and character of the plant of the

complainant company is, and its capability to furnish all the gas that is consumed in the city of Peoria at the present time?

Objected to as immaterial and irrelevant.

A. No sir; I never have gone into those details.

101. Was the plant built and constructed for the purpose of furnishing all the gas that might be consumed in the city of Peoria or otherwise?

(Objected to same grounds.)

A. It was certainly started with the idea of a plant that should be capable of supplying the entire city and its future growth.

102. I believe you said you were acquainted with William A. Herron one of the stockholders of the Peoria Gas Light & Coke Co., What is Mr. Herron's business?

A. You are mistaken in saying I said I was acquainted with Mr. Herron; I am however acquainted with him and know him well.

103. You know Mr. Herron to have been a stockholder in the Peoria Gas Light & Coke Co., do you?

(Objected to same grounds.)

A. I believe, now you mention it, I have known the fact that Mr. Herron was a stockholder.

104. How long had you known that Mr. Herron had been a stockholder in the old company at the time you became a subscriber to the stock of the complainant company?

(Objected to same grounds.)

A. I cannot say; I never knew him as being active in the affairs of that company; I think I had known the fact that he was a stockholder in that company for some years, that is, I had heard it said he held stock of that company.

1017 105. What business is Mr. Herron engaged in in the city of Peoria?

(Objected to as immaterial and irrelevant.)

A. He is president of the Peoria savings bank; I have known him as the head of that institution for 25 years or more.

106. Mathew Henebery was another stockholder in the Peoria Gas Light & Coke Co., was he not?

(Objected to same grounds.)

A. He was.

107. What business was Mr. Henebery engaged in at the time you became a stockholder of complainant company?

Objected to same grounds.

A. I am not aware of any business Mr. Henebery was in except his connection with the gas company and with the First national bank.

108. He was and had been a wholesale liquor dealer in the city of Peoria for a number of years?

A. Perhaps he had; I was not aware as to that.

109. How long was he connected with the First National Bank of Peoria, if you know?

(Objected to same grounds.)

A. I don't know, but I think I had known him in that connection for 10 or 12 years.

110. Were you acquainted with the late Peter Coffey?

Ans. I was.

111. What business was he engaged in at the time you became a stockholder in complainant company?

(Objected to same grounds.)

A. I was not aware of any business Mr. Coffey had outside of the gas company with which he was connected.

112. Were you acquainted with Leslie Robison at that time?

A. Yes sir;

113. In what business was he engaged?

Ans. Brewery business.

114. How long had he been engaged in that business to your knowledge?

(Objected to same grounds as before.)

A. I could not say; I had known him in connection with that business for 10 years or more.

1048 115. Do you know whether or not Leslie Robison was a stockholder in the Peoria Gas Light & Coke Co.,?

(Objected to same grounds.)

A. I don't know, I never knew him to be a stockholder in that company.

116. What was the financial reputation in the city of Peoria of the gentlemen you have just been interrogated about?

Objected to as immaterial and irrelevant.

A. I think it was such as to give general public confidence that any check which either of them might draw would be likely to be honored.

117. At the time you became a subscriber to the stock of the complainant company in the city of Peoria, there was another company in the city furnishing gas to its citizens, was there not?

Objected to same grounds.

A. There was.

118. And amongst the men who were stockholders in that company were Mr. Herron, Mr. Henebery, Mr. Robison and Peter Coffey?

Objected to same grounds.

A. I remember distinctly that Mr. Henebery and Mr. Coffey were and I believe the others were.

119. Look at the paper now shown you marked Exhibit "19" and state whether or not that is your genuine signature?

A. I cannot deny it; it is.

120. For what purpose did you sign that paper?

Objected to as immaterial and irrelevant.

A. For the purpose set forth in the paper itself.

121. Did you know at the time you signed that paper that there was an ordinance pending before the city council of the city of Peoria asking for a franchise or license for the Peoples' Gas & Electric Company to use the streets in the city of Peoria?

Objected to same grounds.

A. I knew one of that character was either pending or
1049 was to be presented.

122. Did you at the time you signed that paper believe that the statements therein contained were true?

Objected to as incompetent and immaterial.

A. I certainly did or I would not have signed it.

123. Did you believe at the time that the company would carry out the representations contained in that paper?

Objected to same grounds.

A. I most certainly did.

124. And that the company was capable of carrying out those representations?

(Objected to same grounds.)

A. Yes sir;

And further the witness saith not.

PHILO B. MILES, called on behalf of the defendant, being first duly sworn according to law, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and residence?

A. Philo B. Miles; Peoria, Illinois.

2. What is your occupation?

Ans. Grain & commission merchant.

3. How long have you resided in Peoria?

A. Nearly 32 years, I think.

4. How long have you been engaged in the grain and commission business?

Ans. Something over 25 years.

5. All of that time in Peoria?

Ans. Yes sir;

6. What is the name of your present firm and how long has that been its name?

A. The firm name is P. B. & C. C. Miles, and it has stood in that name about 25 years.

1050 7. In what other lines of business, if any, have you been engaged during the time you have been in the commission business in Peoria?

Ans. I have been in the wholesale coal business.

8. You were mayor of the city of Peoria at one time for one term, were you not?

Ans. Yes sir; I was mayor from the spring of 1893, to the spring of 1895.

9. You are a stockholder in complainant company, are you not?

A. Yes sir; and have been since its organization.

10. State whether or not prior to the time you became interested in the complainant company you had been a stockholder, or interested party, in any gas company?

Ans. No sir; not before that.

11. You were never in any way associated with the Peoria Gas Light & Coke Co., were you?

Ans. No sir;

12. How long prior to the organization, which was perfected in the month of May 1899, did you take up the question of becoming interested in complainant company in the event it should be organized?

Objected to as immaterial and irrelevant.

A. I don't remember; it seems to me it was sometime the year before—sometime along in the spring or summer of the year before, although I am not certain; it was some little time before the ordinance was passed.

13. Do you remember at this time in what way the subject was brought to your attention and by whom?

Objected to same grounds as before.

A. Yes sir; the subject was brought to my attention by Mr. Sumner R. Clarke.

14. How long have you been acquainted with Mr. Clarke?

A. Nearly all the time I have been in Peoria—for 30 years I should say.

15. What transpired on the occasion of his meeting you first with reference to this subject matter?

Objected to as immaterial and irrelevant.

1051 A. Mr. Clarke said they were going to start a new gas company and wanted I should take some stock in it and on his recommendation I did so.

16. What, if any, reasons did he then give why he thought it would be advantageous for you to become a stockholder?

Objected to as incompetent and immaterial.

A. As I remember it, he thought a new gas company here would be a fairly good paying business, and in view of that fact, he thought it would be a good idea to take a little stock.

17. Prior to that time what, if any, business interests had you had in common with Mr. Sumner R. Clarke?

Objected to as immaterial and irrelevant.

A. No business of any particular nature except the business we have often done with him on the board of trade in selling him grain and buying spirits of him.

18. You were never associated with him before in any transaction?

Ans. No sir;

19. What, if any, representations did he then make to you with respect to the probable profit which a competing company in Peoria might make?

(Objected to as incompetent and immaterial.)

A. I don't think he made any; he simply said he thought it was a good investment and would be all right.

20. State whether or not at that time he outlined to you the scope of operation of the proposed company?

Objected to same grounds.

A. No sir; he did not.

21. State whether or not as you then understood it, the proposed new company was going into the field for the purpose of competing with the old company then operating here?

Objected to same grounds.

A. As a matter of fact the new company, as I understood it, would compete with the old.

1052 22. What portion of the city of Peoria and its suburbs, within your knowledge, was covered by the operations of the old company at that time?

(Objected to as immaterial and irrelevant.)

A. My impression is most of the valuable territory was pretty well covered by the old company.

23. How far from your place of business was the plant of the Peoria Gas Light & Coke Co.?

Ans. About half a mile I should say.

24. To what extent during your residence in Peoria had you been familiar with its operations or the magnitude of its business, its extensions, its process of making gas and other kindred questions?

Objected to same grounds.

A. I knew as a matter of fact very little about the extent of business; about all I knew was the price of gas; I was pre familiar with the price of gas, that is, I knew when it was less th it had been.

25. Had you usually been familiar with the price from the ti you came to Peoria up to the time of the proposed organization?

Objected to same grounds.

A. No, I think not as a general thing, not from the time I ca to Peoria; we had been a consumer of gass at our office from t time we started in business here more or less, that was 25 years ag but as a consumer in my home probably not over 15 years.

26. During that period you had known the prices charged by t old company for gas in Peoria, had you not?

A. Well, I could not say exactly that I knew.

27. I mean at the time you knew what the prices were?

A. Yes, I paid the bills.

28. You were acquainted, were you not, with the principal me interested in the old company and had known them for a gre many years?

(Objected to same grounds as before.)

A. Yes sir;

29. State whether or not you also knew their financia
1053 standing in Peoria?

(Objected to same grounds.)

A. Yes sir;

30. State whether or not you knew also the financial standing o the Peoria Gas Light & Coke Company during the period covere by your residence here?

(Objected to same grounds.)

A. Yes sir;

31. What was the financial standing of those persons and of tha corporation during the time you have known them and it?

Objected to as incompetent and immaterial.

A. Good.

32. State whether or not those gentlemen were men of large o small means during that time?

(Objected to same grounds.)

A. Large means, the most of them, as I understood it.

33. Within your knowledge at the time the subject of organizing this new company was called to your attention, what was the capacity of the old company as compared with the demand for gas in Peoria and adjacent territory?

(Objected to same grounds.)

A. I could not answer that from my own knowledge.

34. State to what extent you became familiar with the operations and expansion of the old company during the time you were mayor of the city, if at all?

(Objected to same grounds.)

A. Well, I might say the old company were extending its mains.

35. State whether or not that has been the fact during the period covered by your residence in Peoria?

Objected to same grounds.

A. During the early period of my residence here I did not pay very much attention to it; during the latter period of my residence here—for the last 12 or 15 years—I should say that was a fact.

36. During the early stages of the preparations for the organization of complainant company, what knowledge had you of the quantity of gas consumed in Peoria, either per day, month or year?

Objected to as immaterial and irrelevant.

1054 A. I had no knowledge of the quantity or anything of that kind.

37. State whether or not you knew at that particular time the prices that were then charged for gas in Peoria?

Objected to same grounds.

A. My impression is—I am not positively certain—that fuel gas was 75c. and illuminating gas $1.25.

38. What, if any, conversation passed between you and Mr. Sumner R. Clarke on the occasion mentioned by you with reference to the prices at which gas could be furnished in the Peoria territory and make a good profit on the investment of the kind which was then in contemplation?

(Objected to as incompetent and immaterial.)

A. I don't think there was anything said between us on that subject; I don't think he mentioned that matter.

39. What, if any, inducement did he hold out to you as a reason why you ought to become interested in the new company?

Objected to same grounds.

A. I don't know that he held out any particular inducement; as I said, I had known Mr. Clarke for a good many years; he said they were going to organize a new company and he thought it would be a paying investment and wanted me take a little stock in it and on his recommendation, as I remarked before, I took some stock.

40. State whether or not one of the purposes for the organization

of a competing company was to give the city and citizens of Peoria gas at lower rates than were then paid?

Objected to same grounds.

A. Yes, that was my understanding.

41. State whether or not that was a matter of general discussion among the people proposing to become associated in the new company at the time they were preparing for its organization?

Objected to same grounds.

A. I don't hardly believe it was a matter of general talk among the stockholders; at least I don't remember it.

1055

42. With how many of those who ultimately subscribed for stock did you have interviews pertaining to the proposed company prior to the time that the subscription list was made up? and, for the purpose of refreshing your recollection as to who the subscribers were, I will call your attention to the names of the subscribers appearing in Exhibit "18" now shown you?

(Objected to same grounds.)

A. I had no talk or conversation with any of the subscribers named in this exhibit with the exception of Sumner R. Clarke, that I remember of.

43. State whether or not you were at that time well acquainted with all of the gentlemen whose names appear on that subscription list?

Ans. Yes sir; I was very well acquainted with them.

44. And had you been for a considerable period of time?

A. Yes sir;

45. What part of that list had been made up at the time you became a subscriber, if you remember?

Objected to as immaterial and irrelevant.

A. I don't remember about that; I think the list was only partially made up when I subscribed to the stock.

46. Who presented that paper to you for your signature?

Objected to same grounds.

A. Sumner R. Clarke, as I remember it.

47. State whether or not during those preliminary negotiations there was any discussion in your presence with respect to antagonisms that might be encountered in undertaking to secure a license or franchise, growing out of damage, or possible damage, to paved streets?

Objected to as incompetent and immaterial.

The MASTER: I don't think that material but the witness may answer subject to the objection.

A. None that I remember of.

48. State whether or not that subject came up in any form
1056 either then or during the pendency of the ordinance in the council?

A. Objected to same grounds.

A. Not as I remember it—not among the stockholders.

49. What, if anything, did you have to do with securing the frontage necessary as a basis for the passage of the ordinance?

A. So far as to do anything personally I had nothing to do with it, so I don't remember just what frontage was required, or how they got it.

50. What, if anything, had you to do with that in an official way?

Objected to as immaterial and irrelevant.

A. Nothing.

51. State whether or not you knew that the frontage was being obtained as preliminary to the passage of the ordinance?

A. Yes, I knew it in a general way.

52. Did you or did you not know from time to time what success attended attempts to secure such frontage?

Objected to as immaterial and irrelevant.

A. No sir; I don't think I did.

53. Did you know who were employed as solicitors in that work?

Objected to same grounds.

A. No sir; I don't think so.

54. From what source, were the funds used in the prosecution of the preliminary work, obtained?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know.

55. State whether or not that question ever came up for discussion in your presence?

(Objected to same grounds.)

A. I don't remember that it ever did.

56. State whether or not you were asked to contribute, or did in fact contribute to any such fund?

(Objected to same grounds.)

A. No sir;

1057 57. How long had the work been progressing—speaking now with reference to the time the expenses first begun—before the first assessment on the capital stock was made?

Objected to as incompetent and immaterial.

A. I don't remember that; I don't remember when the first assessment was made.

58. Were you present at the meeting of the subscribers for stock at the time of the preparation of the necessary papers upon which your official certificate was issued?

A. I may have been but I don't think I was.

59. Were you at any time a director in the complainant corporation?

Ans. Yes sir;

60. Under what circumstances did you become a member of the directory at that time?

(Objected to as immaterial and irrelevant.)

A. Well, there were no peculiar circumstances that I remember of; I was simply selected among a number of other gentlemen who were present and elected.

61. Did you or not know prior to the meeting at which you were elected that your name would be proposed as a director of the company?

(Objected to as immaterial.)

A. No sir;

62. What, if anything, did you have to do with making up the list of directors that were elected at the time of the organization of the company?

(Objected to as immaterial.)

A. Nothing.

63. What did you know of it either personally, or from association with the other subscribers?

(Objected to as immaterial.)

A. Nothing.

64. I think you have already testified you were not present at that meeting?

A. I must have misunderstood your former question; I thought you referred to the preliminary arrangements for the delivery
1058 of th- certificate etc., I was present at the original meeting when the directors were elected; I thought it was a subsequent meeting you refer-ed to before.

65. At that meeting were all, or substantially all, of the subscribers present?

(Objected to as immaterial.)

A. Yes sir; I think so—most of them.

66. Who, if anyone, at that meeting made up the list of directors, or in what manner were their names placed before the meeting?

Objected to as immaterial and irrelevant.

A. I don't remember that there was any list made up; some gentleman, I have forgotten who, was elected chairman of the meeting

and the directors seemed to be selected offhand without any previous arrangement.

67. Then you have at this time no recollection as to who proposed the names of the various parties?

Ans. No sir;

68. Do you remember whether they were all proposed by one person, or different persons?

(Objected to same grounds as before.)

A. I think they were proposed by different persons; I am quite certain they were.

69. Do you at this time remember who was the presiding officer at that meeting?

(Objected to same grounds.)

A. No, I don't remember now.

70. Do you remember who the secretary was?

Objected to same grounds.

A. It seems to me Theo. J. Miller was secretary.

71. State whether or not a record of the proceedings of that meeting was made at that time?

(Objected to same grounds.)

A. I presume so.

72. State whether or not the minutes of that meeting were ever presented for approval or disapproval at any subsequent meeting?

Objected to same grounds.

1059 A. I don't remember but I presume they would be.

73. What, if any, arrangement was made at that time, or before or subsequently, with reference to the length of your term of office or your term on the directory?

(Objected to same grounds.)

A. I have forgotten the terms of the directors.

74. Do you remember whether or not you served your full term?

A. No sir; I think not.

75. Do you remember how long you were in the directory?

A. Not very long.

76. What arrangement was made at that time, or before, or after, with reference to the length of your term of office?

Objected to as immaterial and irrelevant.

A. I don't think there was any arrangement made as to the time I was to serve.

77. When did the board of directors then elected meet to organize?

(Objected to same grounds.)

A. I don't remember that; I don't remember whether they ganized at that meeting or at a subsequent meeting.

78. Do you remember who was elected permanent president a secretary of the board of directors?

A. It seems to me Sumner R. Clarke was elected president, bu am not certain, and I think Theo. J. Miller was elected secretary.

79. How many directors' meetings did you attend?

A. I don't remember; not very many.

80. What was the character of the business transacted by t board at such meetings as you attended?

Objected to as immaterial and irrelevant.

A. I don't remember much about the meetings of the board e cept the first one and the last one I attended.

81. State whether or not at those meetings records of the proceed ings were kept and at subsequent meetings presented to th
1060 board for approval and disapproval and passed upon by th board?

Objected to as immaterial and irrelevant.

A. I don't remember about that; I presume they would be.

82. Are you able to state from recollection how long you remained on the board of directors?

Ans. No, but it was not very long.

83. What were the circumstances under which you severed you connection with the board?

Objected to as immaterial and irrelevant.

A. I resigned my position on the board for the reason, first: I did not care about it, and secondly, to allow the stockholders to elect another director in my place.

84. In what manner and under what circumstances did the subject of your resignation first come up for consideration?

Objected to same grounds.

A. As I remember the secretary asked me if I cared to continue to serve on the board of directors any longer and I told him "No;" then, I think, he asked me if I would just as leave resign, and I said, "Yes."

85. That was the first you had heard of the subject?

A. Yes, at the meeting.

86. State whether or not you did at that time present your resignation?

Ans. Yes sir; I did right then.

87. And was it then acted upon?

Ans. I think so.

88. Who was elected to fill the vacancy caused by your resignation?

(Objected to as immaterial and irrelevant.)

A. I don't remember but it seems to me it was some outside man—some man from Chicago or somewhere; I have a name in mind, but whether he was elected in my place or somebody else's I don't remember.

89. Who is the gentleman to whom you refer?

Objected to same grounds.

A. Mr. Walton and it seems to me he was elected.

1061 90. Were you acquainted with Mr. Walton?

Ans. No sir;

91. Who presented his name?

(Objected to same grounds.)

A. I was out of the board then after I resigned.

92. Did you withdraw immediately upon your resignation?

A. I think so.

93. Through what channel did the knowledge come to you that Mr. Walton had been elected to fill the vacancy, if you remember?

Objected to as immaterial and irrelevant.

A. I think I saw it in the newspapers, but I am not certain.

94. State whether or not in the early history of complainant company it was customary for the directors to publish reports of their proceedings and meetings in the Peoria Press?

Objected to same grounds.

A. I don't remember about that.

95. Have you ever met Mr. Walton and formed his acquaintance?

A. No sir; I never have met him.

96. Do you know for how long a period of time O. J. Bailey remained in the directory?

(Objected to same grounds as before.)

A. I don't remember.

97. Were you present when his resignation was presented?

A. Not unless it was presented at the same time mine was and that I don't remember.

98. State, if you know, why your resignation was requested rather than that of any other member of the board?

Objected to as incompetent and immaterial.

A. I don't know.

99. Was any reason at that time given or suggested?

Objected to same grounds.

A. None other than as I have stated; I think it was Mr. Miller asked me if I cared to serve any longer on the board; I told him "No;" he asked me if I would just as leave resign; I said "Yes,"

and I think he said they wanted to elect this man Walton
1062 believe it was, as a member of the board.

100. Was John R. Walsh of Chicago a member of t
board at that time?

(Objected to same grounds.)

A. No sir.

101. Do you know whether or not Mr. Walton was, at the time
his election, a stockholder in complainant company?

Objected to same grounds.

A. No sir; I don't know.

102. When you became a subscriber to the capital stock sta
whether or not you knew that any persons outside of residents
Peoria were to become stockholders, or personally interested in th
new industry?

(Objected to as immaterial and irrelevant.)

A. No sir; I did not.

103. Who did you understand was furnishing the major part o
the capital for the enterprise?

(Objected to as incompetent & immaterial.)

A. Why, I understood the subscribers here were going to build a
gas plant, but how they were going to get the money I never con
sidered.

104. Did you know at that time what the expense of installing a
plant ready for operation would be?

Ans. No sir;

105. Did you see or know of any estimates for the construction?

Objected to as immaterial and irrelevant.

A. No sir;

106. At the time you made your subscription, state whether or
not you knew who the other subscribers were to be and the amount
for which they had severally become liable?

Objected to same grounds.

A. I think I knew some of them.

107. Did you know all of them and the extent to which their
subscriptions would be met?

A. No sir; I didn't know all of them, or the extent, but I knew
several of them who were to become stockholders—I think
1063 some of their names were on the papers.

108. In previous conversations you had had with Mr.
Clarke, state whether or not he had advised you to what extent he
proposed to become a subscriber?

(Objected to as incompetent and immaterial.)

A. I think he had but I don't remember the amount.

109. When you saw the magnitude of his subscription, did it or not cause any surprise to you?

(Objected to same grounds.)

The MASTER: I don't think that material; I do not see any possible view of this evidence by which it could become material, but the witness may answer subject to the objection.

A. Yes, I was rather surprised.

110. At the time the preliminary arrangements for the organization were being made, what was the discussion and understanding with respect to the new enterprise being composed entirely of Peoria men or otherwise?

(Objected to same grounds.)

A. I don't think there was anything said about that except that several good Peoria men were going to be interested in the enterprise.

111. Up to the time you became a subscriber what, if any, knowledge had you that anyone outside of Peoria would be an interested party in the new company?

(Objected to same grounds.)

A. I had no knowledge that anyone outside would be interested in the company.

112. When did you for the first time, if at all, learn that John R. Walsh of Chicago was a stockholder directly or indirectly, in the complainant company?

(Objected to same grounds.)

A. It seems to me it was sometime about the time of the passage of the ordinance, or after the passage of it.

113. In what way did that information come to you?

Objected to same grounds.

A. I don't remember that; I got the information in some way or other that John R. Walsh of Chicago was largely interested
1064 in this company, but from whom I don't remember.

114. What was your information with reference to his being a majority or minority holder?

Objected to as incompetent and immaterial.

A. I don't know that I gained any information as to how much or how little stock he held; I could only give my own conclusion.

115. State whether or not to the best of your recollection at the time of the passage of the ordinance you had any knowledge that Mr. Walsh was to become an interested party, or was then an interested party?

(Objected to as incompetent and immaterial.)

A. No sir; I think not; I had no such knowledge.

116. While arrangements were being made for the organization of your company in what territory, as compared with that occupied by the Peoria Gas Light & Coke Co., did you understand your company proposed to operate?

(Objected to same grounds.)

A. I don't think there was anything said to me on that subject as I remember it.

117. State whether or not you then knew the extent to which it proposed to operate?

(Objected to same grounds.)

A. No sir;

118. Did you or did you not know whether the enterprise was to be a large or small one?

(Objected to same grounds.)

A. I understood it was to be a large one.

119. State whether or not one of the purposes of the organization was to enter into competition with the old Peoria Gas Light & Coke Co., in the Peoria territory?

(Objected to same grounds.)

A. Well, as I understood it the company was to be organized and a plant built for the purpose of doing business and furnishing the people with gas, and, of course, I thought it would naturally come in competition with the old gas company; it was my idea it would. I don't see how it could be otherwise as I understood it at that time.

1065 120. Were you then familiar in detail, or to any considerable extent, with the magnitude of the profits that had been made by the old gas company during your residence in the city?

Objected to same grounds.

A. No, I knew nothing in particular only a general understanding that it was a profitable business.

121. What sized plant did your company propose to build as compared with the demand for gas in this territory?

Objected to as incompetent and immaterial.

A. I don't know.

122. What with reference to its being modern or otherwise?

A. Well, I think they said they would put up a modern plant with all the modern improvements for making gas and delivering it to the people.

123. What, if any, discussions were had with reference to the prices at which your company could furnish gas from its modern plant as compared with the prices at which the old company could supply gas?

(Objected to same grounds.)

A. My impression is it was generally understood they could make a good quality of gas and sell it a little cheaper than it was being sold by the old company and make a profit, but as to what the exact prices should be I don't remember that that was generally talked about.

124. Who, among the stockholders, as you then understood it, was skilled in the gas industry?

(Objected to same grounds.)

A. I didn't understand that any of them were particularly skilled in that business.

125. Upon whom did you and your associates depend for information as to the cost of production and the probable profits which the new enterprise might make?

Objected to as immaterial and irrelevant.

A. So far as I was concerned I didn't depend on anyone;
1066 I didn't know anything about it.

126. During those preliminary suggestions of development, what were the arrangements, if any, with reference to management?

A. I don't remember that there were any.

127. When, for the first time, did the subject of competent and skilled management come up for consideration?

Objected to same grounds as before.

A. So far as I know the first I knew of that was about the time I resigned and another man elected in my place.

128. Was that prior to the time your company commenced the operation of its business of distributing gas?

Objected to same grounds.

A. I think it was.

129. Was there a discussion in that board meeting with reference to the management of the technical part of the business?

Objected to as immaterial and irrelevant.

A. No sir; that is, not at the meeting I attended because I resigned and another man was elected in my place; as I understood it he was elected because he had some skill of some kind in the gas business, but I don't remember that it was discussed before I resigned.

130. Do you remember whether or not the work of construction had been commenced at the time of your resignation?

A. I think not but I am not certain about that.

131. Do you remember whether or not a site for a gas house had then been purchased?

Ans. I don't remember about that.

132. Did you or did you not have anything to do with the purchase of the real estate upon which the plant was constructed?

A. No, I had nothing to do with it.

133. Has this Mr. Walton, to whom you refer, ever been a resident of Peoria?

Ans. Not to my knowledge.

134. State whether or not at that or at any other meeting
1067 he was represented as being a man skilled in gas production?

Objected to as immaterial and irrelevant.

A. No sir; I don't remember that he was.

135. State whether or not at the time your resignation was requested and Mr. Walton was elected in your place, you were also informed that he was an associate of John R. Walsh in Chicago?

Objected to as immaterial and irrelevant.

A. I understood they were connected together in the gas business.

136. Did you or not know that Mr. Walsh was then interested in other gas plants?

(Objected to same grounds.)

A. I had heard that he was.

137. Do you know Francis W. Little the present manager of your company?

Ans. Yes sir;

138. When, with reference to the organization of your company, did you become acquainted with him?

Ans. It seems to me it was some little time after the organization of the company; I don't remember how long; it must have been that spring some time.

139. When, with reference to the passage of the ordinance granting your company a license to use the streets, if you remember?

A. I don't believe I met Mr. Little until after the passage of the ordinance.

140. Do you remember the circumstances under which you first met him?

Ans. No sir;

141. Do you remember where it was?

Ans. I think it was after the company had established an office down near the banks on lower Main street.

142. Do you know whether or not it was after he had associated himself with the company?

A. Oh, yes, he was in the office when I first met him.

143. And to the best of your recollection that was subse-
1068 quent to the date of your resignation?

A. I think it was but I am not so clear on that point, however.

144. Did you know at that time how Mr. Little happened to become interested in your company, or become its manager?

Objected to as immaterial and irrelevant.

A. I understood he was connected in some way with Mr. Walsh in Chicago; I think they were associated, that is, had some interests together in gas at some places and he was here on that account; my memory is not so clear on some of these things because I did not charge my memory with it, or pay much attention to it.

145. Did you know at that time where Mr. Little had previously been employed and in what capacity?

Objected to as immaterial and incompetent.

A. I understood, I believe, that he had been connected with some gas plants down in Ohio, or some of the neighboring States.

146. Did you also know who owned those gas plants?

Objected to same grounds.

A. I understood that Mr. Walsh was interested in them; I did not know he owned them.

147. State whether or not all of those matters pertaining to the relations existing between Mr. Walsh, Mr. Walton and Mr. Little, were known generally among the people interested in the Peoria Gas & Electric Company at the times concerning which you have testified?

Objected to as immaterial, incompetent and calling for a conclusion.

A. I don't know what others knew about it; I cannot testify only to what I knew.

148. State whether or not those questions were discussed between you and others of the stockholders, or by others in your presence?

(Objected to same grounds.)

A. I think there was perhaps some discussion among some
1069 of the stockholders in relation to these men, or some of the matters that came up; I think I had a little talk with Ben. Warren, Jr.,—outside of that I don't remember of any others.

149. Mr. Warren, from his conversation, evidently knew it did he not?

(Objected to same grounds.)

A. What do you mean?

150. At the times concerning which you have testified, when you state you obtained information to the effect that Mr. Walsh, Mr. Little and Mr. Walton were associated in various enterprises?

A. Yes, I think he knew it then; I am satisfied he did.

151. Is it your recollection that Mr. Warren is the only one with whom you discussed those particular matters?

A. Yes, I think he is the only man I had any talk with.

152. What was the character of the work that was being carried on by your company during the period covered by your membership in the directory?

(Objected to as incompetent and immaterial.)

A. I think the particular work was securing frontage and securing the passage of the ordinance through the city council.

153. State whether or not those matters were under discussion by the board from time to time during that period?

A. No, I think not.

154. Do you remember how long a period of time was occupied in obtaining frontage?

Ans. No sir;

155. Did you at that time know the men who were engaged in that part of the work?

A. As I remember it Theo. J. Miller was the most active man in directing the work for securing the frontage.

156. Did the company have its own office at that time?

A. I don't think it did.

157. Do you know who paid those men for the services they rendered?

(Objected to as immaterial and irrelevant.)

A. No sir; I don't remember it.

158. When was the first assessment upon the stock made?

1070 Objected to same grounds.

A. I don't remember.

159. When was it with reference to the time the frontage was secured and the ordinance passed?

(Objected to same grounds.)

A. My recollection is it was afterwards but I am not certain about it.

160. What was the amount of the first assessment made upon the capital stock?

(Objected to as immaterial and irrelevant.)

A. I don't remember that.

161. How many assessments have been made?

Objected to same grounds.

A. I don't remember.

162. State whether or not you have paid all assessments that have been made upon your stock?

(Objected to same grounds.)

A. Yes sir;

163. As the assessments were levied?

Ans. Yes sir;

164. State whether or not you took all the stock for which you subscribed?

(Objected to as immaterial.)

Ans. Yes sir;

165. Have you vouchers or checks from which you can determine the number of assessments that have been made upon this stock and their magnitude?

(Objected to as immaterial.)

Ans. Yes sir;

166. Will you examine those vouchers and report subsequently, if called upon for that purpose?

(Objected to as immaterial.)

A. Yes sir;

167. State whether or not while you were a member of the board of directors the subject of rates to be charged when your company was ready for operation came up for discussion?

Objected to as incompetent and immaterial.

A. I am not certain about that; there was a discussion one day about rates, but I don't remember whether it was before or after I was on the board.

168. State whether or not during the period covered by
1071 your membership any definite action was taken with reference to the rates to be established when you were ready for operation?

Objected to as immaterial, incompetent and irrelevant.

A. No, I think not; not while I was a member of the board.

169. At the time your stock subscription was solicited, or subsequently, what, if any, statements or representations were made to you as to the extent to which you would be called upon by assessments upon it?

(Objected to as incompetent and immaterial.)

A. I don't remember that there were any.

170. State if it is not true that you were given to understand that only a portion of your subscription would ever be called for?

Objected to same grounds.

A. I don't remember about that; I don't think there was anything said to me on that subject; I am not certain about it however.

171. State whether or not the first assessment was levied during the time you were a member of the board of directors?

Objected to same grounds.

A. I don't remember that.

172. Have you at this time any recollection of participating in levying an assessment upon that stock?

A. No sir; I have no recollection of it.

172. What, if any, knowledge have you as to the assessments paid by other stockholders as compared with those you yourself have paid?

Objected to same grounds.

A. I have no knowledge as to what others have paid.

173. State whether or not within your knowledge at the time of your preliminary negotiations respecting the organization of your company John R. Walsh was interested in the Peoria Gas Light & Coke Co.?

(Objected to as incompetent and immaterial.)

A. Not that I know of.

174. Have you ever known it since?

(Objected to same grounds.)

A. I understand that he is; I have no personal knowledge of i-

1072 175. What knowledge have you as to the magnitude of his interest in the old company?

(Objected to same grounds.)

A. I have no knowledge on that.

176. During the time you were a member of the board of directors, what, if anything, was done by the board in the way of auditing accounts?

(Objected to as immaterial and irrelevant.)

A. I don't remember that anything was done.

177. State whether or not during that period the duty of auditing were committed to a committee of the board?

Objected to same grounds.

A. I don't remember about that.

178. Do you remember whether or not the subject of expenditures came before the board during the time you were a member?

A. I don't remember that that subject came up.

179. Did you or did you not know that the company was during that time under expense?

A. Yes, I knew they must be under some expense.

180. Did you or did you not know from what source those expenses were being provided for?

(Objected to as incompetent, immaterial.)

A. No, I didn't know.

181. State whether or not those questions were ever discussed in the board, or by the stockholders outside in your presence?

Objected to as immaterial and irrelevant.

A. No sir; I think not.

182. Up to the time of the levying of the assessment upon the stock, to which you have referred, what, if any, contribution did you make to the expense account of complainant company?

Objected to same grounds.

A. I don't remember of having made any.

183. Who, of the other subscribers, within your knowledge, had made such contributions?

(Objected to same grounds.)

A. None I knew of—I had no knowledge of it.

1073 184. Do you know whether or not your company had a bookkeeper during the time you were a member of the directory?

A. I don't remember; I presume they must have had somebody to keep track of the accounts.

185. Do you know to whom was intrusted the duty of distributing the funds?

(Objected to as immaterial and incompetent.)

A. No sir;

186. Do you know whether or not any vouchers for such disbursements for such expenditures were taken?

(Objected to same grounds.)

A. I don't know, I could not say on that at all.

187. State whether or not a record of the financial standing of the company was kept, if so, where?

(Objected to same grounds.)

A. I have no knowledge on that subject.

188. What is the regular time for the holding of directors' meetings or stockholders' meetings of complainant company?

Objected to as immaterial and irrelevant.

A. I don't know.

189. How many stockholders' meetings have you ever attended?

A. I never attended but one—I believe the first one when they organized.

190. Do you know whether or not any others have been held?

Objected to same grounds.

A. Yes, others have been held.

191. Have you or not received notice of such meetings?

Ans. Yes.

192. State whether or not the notices which you have received were for regular or special meetings?

Objected to as incompetent and immaterial.

A. I don't know whether they were regular or special.

193. How many changes in the directory have been made since the organization of the company?

(Objected to as immaterial, irrelevant.)

A. I don't know whether there have been any changes made or not since I resigned from the board.

1074 195. Do you know whether or not, except at the first meeting of which you have testified, any directors have ever been elected by a vote of the stockholders?

(Objected to same grounds.)

A. No sir; I don't know for the reason I have never attended a stockholders' meeting except the first one, that I remember of.

196. Do you know who constitutes the present board of directors?

Objected to same grounds.

A. No sir; I don't know.

197. Do you know whether or not John R. Walsh is a member?

A. No sir; I don't know.

198. Do you know whether Francis W. Little is a member?

A. I think he is but I am not certain about it.

199. From time to time since the organization of the complainant company through what channel has knowledge come to you concerning its financial condition?

(Objected to same grounds as before.)

A. As a matter of fact I don't know much about the financial condition of the company.

200. Have you at the present time, or have you had in the past, any knowledge of the receipts and disbursements of the company?

Objected to as immaterial and irrelevant.

A. No sir; none whatever.

201. Do you know whether or not any financial statements showing the condition of the company have been furnished to stockholders or to the board of directors?

(Objected to same grounds.)

A. I don't think I have ever received any or seen any.

202. Within your knowledge have any of the other stockholders received such statements?

(Objected to same grounds.)

A. Not to my knowledge.

203. To whom, since the organization of the company, has its financial affairs been intrusted?

(Objected to same grounds.)

A. I think largely to Sumner R. Clarke and John R. Walsh.

1075 204. State whether or not those gentlemen in the management of the financial affairs of the company are in any way subject to the jurisdiction of the board of directors?

Objected to as immaterial, irrelevant, and asking for a conclusion of law; not the best evidence.

The MASTER: I don't think it competent to show it in that way but the witness may answer subject to the objection.

A. I don't know just how they might be subject to the order of the board of directors, or whether the board of directors have any particular power in the matter.

205. To what extent does the board of directors supervise, direct or control the financial affairs of the corporation in this particular case?

Objected to as immaterial, irrelevant, and does not call for the knowledge of the witness while he was a director.

The MASTER: I don't think it competent to prove that fact in that manner, but the witness may answer subject to the objection.

A. I don't know.

206. Within your knowledge, acquired as a member of the board, does it at all?

(Objected to same grounds as before.)

A. Judging from my own knowledge of its affairs I should say not.

207. Did you know, that is, at the time, about the time your company began to furnish gas?

A. Yes, I knew about the time they began to furnish gas, but I don't remember what time it was now.

208. Do you know at what price it was then being furnished by the old company, and also at what price your company furnished it?

Objected to as immaterial and irrelevant.

A. I think the old company charged at that time $1.00 for illuminating gas and 75c. for fuel gas, as I remember it.

209. What is your recollection as to the prices charged by

1076 your company when it began business?

(Objected to same grounds.)

A. Prices went down I believe directly after that.

210. Do you remember how many different reductions were made in price?

(Objected to same grounds.)

Ans. No sir;

211. Do you remember what those different reductions were?

Objected to same grounds.

A. No, I only have a recollection of about how low they got.

212. What was the lowest point reached?

(Objected to same ground.)

A. I think gas reached 30c. a thousand feet, but I don't remember whether both companies made the same price or not.

213. What, if anything, did you have to do with the making of those prices so far as concerned your company?

Objected to as immaterial and irrelevant.

A. Nothing whatever.

214. State whether or not within your knowledge the stockholders of your company were in any way consulted in fixing those prices?

(Objected to same grounds.)

A. I think not, however, I am not sure about that.

215. Are you able to state how long the price continued at 30c.?

Objected to same grounds.

A. I don't remember but it was for some time.

216. State whether or not you at the time knew of contracts made by your company extending over considerable periods, for a price of 30c. per thousand or less?

(Objected to same grounds)

A. I understood both companies were making contracts around town in that neighborhood—contracts for a period of time.

217. To what extent, if you know, did your company make such contracts? and do you know of any particular institution or places they were made?

(Objected to as incompetent and immaterial.)

A. I don't know to what extent; the only institution I know of with which they made any contract—and I don't know what that price was—was with the board of supervisors; they made a
1077 contract with them of some kind for the lighting of the court house and jail.

218. Was that contract with your company or the old company?

Objected to as incompetent and immaterial.

A. I think it was with our company, but I don't know it officially, however.

219. Do you remember what change was made from the 30c. rate to which you have referred and about when it was done?

Objected to same grounds.

A. I don't remember just when that change was made; I remember well the fact it was made, but not the date.

220. Are you able to state at this time what that change was?

Objected to same grounds.

A. Well, it was a very radical change. That is to say, it was a change from a low price up to somewhat higher, I think, than the price had been before the new company got into operation.

221. Did you know in advance of that increase in price that such action was to be taken?

(Objected to same grounds.)

A. I knew the price was going to be increased, but I didn't know to just what point.

222. In what way did that information come to you?

Objected to same grounds.

A. Down at the office of the company.

223. Who was in charge of the office at that time?

A. Mr. Little, I believe.

224. What, if any, information did he give you at that time with respect to any change in prices to take effect at about the same time on the part of the old company?

Objected to as incompetent, immaterial and irrelevant.

A. Well, as I remember it they had gotten together in some way.

225. And had fixed upon a price which should subsequently be charged for gas?

(Objected to same grounds.)

A. I don't remember whether he said that or not.

1078 226. State whether or not you remember the fact that the advance was made by the two companies at the same time and to the same point?

(Objected to same grounds.)

A. I understood there was a general advance at about the same time, but whether to exactly the same point I don't remember.

227. I will ask you to refresh your recollection if the two companies did not publish simultaneously the same notice on the same day in the Peoria Press stating that the price on and after a certain date would be as stated in the notice and those prices were exactly the same?

(Objected to same grounds.)

A. I think I noticed that fact afterwards; I was in Chicago, I think, the day I heard of the advance, but think I noticed that afterwards.

228. Do you know at whose instigation those notices or either of them were published?

(Objected to same grounds.)

Ans. No sir;

229. Look at page 8 of defendant's answer in this case, now shown you, and state whether or not those are copies of the notices to which you have just referred?

A. Yes, these seem to be about as I remember it.

230. State whether or not the subject of the publication of those notices concurrently was discussed by the stockholders of your company, or by others interested in it subsequently?

Objected to same grounds.

A. I don't remember whether the subject of the publication of these notices was discussed or not; there was a little discussion about the price of gas, but I don't remember a discussion about the notices.

231. What, if any, discussion did you have, or did you hear among people interested in your company, with respect to the prices prior to the publication of those notices?

(Objected to same grounds.)

A. Well, at one meeting—I don't know whether all the stockholders were present, but a number of them were—there was
1079 some about the prices to be charged for gas and it was somewhat higher than several of us hoped it would be.

232. At this time are you able to give those figures?

Objected to same grounds.

A. I think Mr. Little said it looked to him that the price would be above a dollar for illuminating gas and above 75c. for fuel gas as I remember it.

233. Are you able to locate the time when that question arose?

A. No, but it was some little time—I don't remember whether it was very long before this or not.

234. What were the figures urged by yourself and others to whom you have referred at the same time?

(Objected to same grounds.)

A. When the price of gas was mentioned I think Mr. Bailey and myself—there was not very much discussion of the subject—inquired about the price of gas and in answer to Mr. Little, I think we said we had hoped, under all the circumstances, that the price of illuminating gas would be a little under a dollar and the price of fuel gas a little under 75 cents.

235. Was that during the time you and Mr. Bailey were both members of the directory?

Ans. No, I think that was after we were out.

236. State whether or not, in the same connection, there was any discussion as to the circumstances and representations under which the city council had granted your company its ordinance?

Objected to as incompetent and immaterial.

A. I don't remember whether anything was said about the conditions and circumstances connected with the securing of the ordinance or not.

237. State whether it is not a fact that a prominent feature of the application of your company for a license was a proposed reduction in the prices?

(Objected to same grounds.)

A. I think so; it seems to me I signed a paper to that effect.

238. Was it or was it not the intention of those associating
1080 themselves together in securing this license to furnish gas at a lower price than then charged by the old company?

Objected to same grounds, also as calling for a conclusion.

A. As I remember it we were supposed to sell gas a little bit cheaper than it then was and to furnish a good quality of gas.

239. What was the discussion and conclusion among those associating themselves together with reference to operating an independent gas plant in the city of Peoria?

Objected to as incompetent and immaterial.

A. I don't think there was any discussion in our first meeting there about operating an independent company; I don't remember that there was any discussion on that subject.

240. What was the understanding as to whether or not the new company, if organized, should be sold to the old company, or combined with it, for the purposes of maintaining prices, if there was any understanding in that respect?

(Objected to same grounds.)

A. There was no understanding that I knew of.

241. Were the people interested in the proposed new enterprise old or new residents of Peoria?

A. Most of them or all of them were old residents of Peoria; Chauncey D. Clarke did not live here at the time, but he was raised here; the others were all old residents.

242. To what extent, if at all, did you participate in the preparation of the ordinance as it was submitted to the city council?

A. None whatever.

243. Were you consulted with reference to what it should contain?

Ans. No sir; the only thing I was consulted about was some of the papers that were addressed to the city council by the stockholders or directors—I have forgotten which—and signed by them.

244. Did you know that the ordinance was being prepared and did you also know in a general way its scope?

A. I didn't know anything about the ordinance except
1081 what I saw in the papers; I didn't see it; I presumed, of course, they were preparing an ordinance.

245. But you personally had nothing to do with it?
Ans. No sir;
246. While the ordinance was pending before the city council, did you know the fact?
Ans. Yes sir; I knew it was pending.
247. To what extent if at all, did you personally participate in procuring its passage?
A. I don't know that I did anything in particular except sign the papers we addressed to the city council with the exception that Mr. Thode was a member of the city council and was also a member of the board of trade, and he wanted to know about the ordinance, about the company etc., and I told him what I knew about it and what I thought; I don't remember that I said anything to any other alderman; I was not up to the city council or city hall about it.
248. And you have no recollection of appearing before any committee having the ordinance in charge?
Ans. No sir;
249. You were not present at the time of its passage?
Ans. No.
250. Look at the paper now shown you marked Exhibit "19" and state whether or not you signed it?
Ans. Yes, that is my signature.
251. Who presented it to you for your signature?
A. I am inclined to think it was Theo. J. Miller; it might have been Mr. Clarke, but I think it was Mr. Miller.
252. Did you know at the time you signed that paper whether or not your proposed ordinance was pending before the council?
A. Well, I don't remember; I signed these papers with the understanding they were all right etc.
253. What, if any, representations were made to you at the time this paper was presented to you for your signature, touching the question of good faith in furnishing it to the council?

Objected to as incompetent and immaterial.

A. I understood all the time we were to act in good faith with the people.

1082 254. State whether or not when you signed this paper you believed its statements and representations were true?

Objected to same grounds.

A. Yes sir;
255. State whether or not you then believed its statements and representations would be carried out in good faith provided an ordinance were granted as you were then seeking?
Ans. Yes sir;
256. State whether or not at that time you believed the representations and statements of Exhibit "19" could be carried out in good faith and an investment necessary for installing the plant pay a good return in profits?

Objected to as incompetent, immaterial, irrelevant, being a statement entirely outside of the paper itself.

A. These papers I signed, I signed in good faith excepting them to be carried out in good faith; while I did not expect a large return possibly right away, I thought in the long run it would be a good, fair paying investment.

257. State whether or not that was the opinion of the others associated with you, so far as expression was given, at or about that time?

(Objected to as incompetent, immaterial and irrelevant.)

A. So far as I know it was.

258. State whether or not at the time you signed that paper you knew that John R. Walsh of Chicago, or any person outside of Peoria, had any interest in the complainant company, or was to have any interest therein?

(Objected to same grounds as before.)

A. No sir; I didn't know that he had any interest in it, or that any person other than Peoria people were interested in it or to be interested in it.

259. State whether the fact, as you then supposed it to be, that it was strictly a Peoria enterprise, had nothing to do with your becoming interested in it and a subscriber to the stock?

Objected to same grounds as before and also as calling for
1083 a conclusion.

A. I don't know whether there was any question at that time about any outside capital being interested; I don't remember that that occurred to me at all; I thought it was to be a Peoria enterprise and a number of Peoria men were in it and I went into it, of course, with the view of ultimately reaping some profit, but as a citizen of the city too; I thought it would benefit the city.

And further the witness saith not.

Adjourned by agreement until Wednesday, March 12, 1902 at 9:30 a. m.

United States court room, Government building.

PEORIA, ILL.,
WEDNESDAY, *March* 12, 1902—9:30 o'clock a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner, Mr. E. C. Ritcher and Mr. W. T. Abbott, appearing for complainant Mr. F. H. Tichenor and Mr. Henry Mansfield, appearing for defendant.

LEWIS A. MCFADDEN, called on behalf of the defendant, being first duly sworn according to law, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name, occupation and place of residence?

A. Lewis A. McFadden; physician and surgeon; Peoria, Illinois.

2. How long have you been a resident of Peoria?

A. Since July 1887.

3. And during that time have you been engaged in the practice of your profession in Peoria?

Ans. I have.

4. State whether or not you have ever been a member of the city council of the city of Peoria, if so, when?

A. Yes sir; I served two terms; I think it was from May
1084 1896 to May 1900.

5. The ordinance or license granting to complainant company the right to use the streets of Peoria was granted during the time you were in the council, was it not?

Ans. It was.

6. State whether or not you remember the fact of the pendency and passage of that ordinance?

Ans. I remember it very well.

7. During what portion of the time the ordinance was pending were you in the city of Peoria?

A. I don't remember, but I must have been here all the time; the only time I am away is in the month of August each year when I take my vacation.

8. State whether or not during the time this ordinance was pending you attended all the meetings of the city council?

A. According to my recollection I did.

9. How soon after the draft of the ordinance had been presented to you, were you aware of the fact it was before the council for consideration?

A. I don't just remember that; I think it was right away.

10. Do you remember in a general way at this time about how long the ordinance was pending?

A. Oh, perhaps two months; I mean from the time the petition came before the council until the ordinance was passed—2 or 3 months.

11. State whether or not during that time you knew the people purporting to be interested in the proposed enterprise?

A. Some of them I knew personally and I believe all of them by reputation.

12. For what period of time had you known them personally or by reputation?

Ans. Almost ever since I came to Peoria.

13. What was the standing and reputation of all those men in Peoria, both for integrity and financially?

A. They all stood well in both respects; their reputation was *gilledged*.

1085 14. State what questions, if any, were discussed by you and other members of the council bearing upon the ordinance in question during its pendency, either for or against it?

Objected to as immaterial and incompetent.

A. Perhaps about the first question that came up was the tearing up of the streets.

15. What was the discussion with reference to that feature of the case?

(Objected to same grounds.)

The MASTER: I do not see the materiality of that, but the witness may answer subject to the objection.

A. Well, there had been quite a number of streets recently paved, viz: Jefferson, Madison, Monroe and other streets, and some of the aldermen did not like the idea of having those streets torn up so soon after the pavement was laid and spoil and damage the streets and alleys. That seemed to be one objection to granting the franchise by some of the aldermen, and we thought it worthy of consideration.

16. What, if any, reasons were urged why an ordinance of that character should be passed granting a license or franchise to a new company in this territory?

Objected to as incompetent, immaterial and irrelevant.

A. One was that we would have competition and as a result of competition we were to have cheap gas; another was, that it was a legitimate scheme backed by several of the most prominent, worthy and influential gentlemen in Peoria.

17. So far as you knew at that time who, if anyone, outside of Peoria people had any interest in the proposed plant, or was to have any interest in it?

(Objected to as immaterial and irrelevant.)

A. It was represented to me that no one would have anything to do with this except Peoria men—that it was a Peoria enterprise.

18. State whether or not that fact had any weight with you in

reaching a conclusion as to the course you would take as a
1086 member of the city council?

Objected to as incompetent, immaterial and irrelevant.

A. That was what influenced me more than anything else to cast my vote for the ordinance.

19. To what extent during the pendency of that ordinance, was the subject discussed and considered?

(Objected to same grounds.)

A. Well, that question was talked about by the members of the council in groupes in the council chamber, or when they met on the streets, and it was also discussed freely upon the floor of the council chamber.

20. So far as your knowledge extended at that time, state whether or not any of the other gentlemen who were members of the city council had any knowledge that there would be any outside interest in this enterprise?

(Objected to as incompetent, immaterial.)

A. Not to my knowledge.

21. Look at the paper now shown you marked Exhibit "19" and state whether you ever saw it before?

A. I don't know that I saw this paper, but I remember of the contents of this paper being read in the city council; I don't recollect of any copy of this paper being furnished me, but remember of the petition being presented to the council.

22. Do you also remember the substance of it?

Ans. Yes sir;

23. And that it was before the council during the pendency of the ordinance?

Ans. I do.

24. State whether or not you remember any discussion in the council, or among the members, of the matters embodied in Exhibit "19" during the time this ordinance was pending?

Objected to as incompetent and immaterial.

A. Yes, I remember about the matter being discussed in the council.

25. State whether or not you supported the ordinance in question and ultimately voted for it when it was put upon its passage?

1087 Objected to as incompetent, immaterial and not the best evidence.

The MASTER: It is not the best evidence, but the witness may answer subject to the objection.

A. I did.

Mr. TICHENOR: I can have the witness stand aside and call the city clerk to prove that.

The MASTER: You can do that subsequently, whenever you want to.

Mr. RITCHER: Counsel for complainant agrees that the proper evidence as to how the witness voted may be introduced at a later period and have the same effect as though introduced now.

26. State to what extent, if at all, the statements and representations contained in Exhibit "19" influenced you in supporting and ultimately voting in favor of the ordinance granting a franchise or license to the complainant company to use the streets and alleys of the city of Peoria for the purpose of the construction of its plant?

(Objected to as incompetent and immaterial.)

A. In regard to the streets it was represented at least to me, and my recollection is to the council as well, that the gas mains would be laid in the alleys so far as practicable, and I think between the pavement and curb line where it could be done and that the streets would not be disturbed any more than was really necessary in constructing the new gas plant.

27. I don't think you exactly understood my question. (Int. 26 read to witness.)

A. Another thing was we were to have competition and that competition was to reduce the price of gas.

28. My question was aimed at the influence, or effect, that the statements embodied in the paper which you have examined, had in fixing that judgment?

A. Well, the statements made in that petition was the means of my voting for it.

29. State whether or not at the time you voted for that or-
1088 dinance when it was put upon its passage you believed the statements and representations contained in Exhibit "19" were true, and if the company were granted a license or franchise that those representations would be carried out in good faith?

Objected to as incompetent and immaterial.

A. Yes sir; that was my belief at the time that the company would do just as they said they would in that petition.

30. What knowledge or information had you during the pendency of that ordinance with respect to the intention of complainant company to enter the Peoria territory for the purpose of competing in the production and distribution of gas?

Objected to as incompetent and immaterial.

A. The intention was to reduce the price of gas and neither buy the other company out or sell out to it.

31. In other words it was to be a competitive industry?

Objected to as incompetent, immaterial and is merely the statement and conclusion of counsel.

A. Yes sir,

32. State whether or not that fact entered to a considerable ex-

tent into the course which you pursued with reference to the ordinance?

(Objected to as incompetent and immaterial.)

A. Yes sir; that was perhaps the main reason I voted for it because of its being a competitive company.

33. State whether or not at this time you remember of having been personally interviewed by any of the gentlemen, whose names appear on Exhibit "19"—I am speaking with reference to the time the ordinance in question was pending?

Ans. Yes sir; I do.

34. Who were they, if you remember?

A. Theo. J. Miller talked to me on one occasion in the city council.

35. Do you remember the conversation that passed between you at that time, if so, state it?

(Objected to as incompetent, immaterial.)

1089 A. In substance I do; he said this was a Peoria company, made up of Peoria men and Peoria capital; that the old gas company had been imposing upon the citizens of Peoria, charging exhorbitant prices and they were going to put in an up to date plant; that the effect of this petition before the council had already reduced the price of gas and it would still be perhaps lower, something to that effect, and in the future we would have cheaper gas if this ordinance passed the council, and he would like me to support it if I conscientiously could; that is about all the conversation I ever had with him.

36. State whether or not you then believed those statements and representations?

(Objected to same grounds.)

Ans. I did.

37. You have no recollection of conferring with the other people interested?

Ans. I am positive I never did.

Cross-interrogatories by Mr. ABBOTT:

1. With reference to this discussion about tearing up the streets and the objections that were made by some of the aldermen to that. Is it not a fact that the company proposed to lay the pipes very largely in the alleys in the more populous parts of the city?

Ans. Yes, sir; that is true.

2. Then when you spoke on direct examination of this discussion with regard to tearing up the streets, that was something outside of this petition which has been shown you marked Exhibit "19"?

A. Yes sir.

3. So far as you know is it not a fact that the company carried

out its representations and plans as to laying the pipes largely in the alleys in the populous parts of the city?

A. I think it did.

4. Who participated in this discussion with reference to the objections to tearing up the streets for pipes?

A. I don't know as I could name any one alderman outside of Mr. Powell; I remember of hearing him talk about it, but the
1090 question was discussed, as I remember it, on the floor of the council chamber and members talked the matter over among themselves.

5. At that time were any objections being urged by the citizens, so far as you knew, to the necessary disturbing of the pavement for the purpose of laying pipe?

A. There was not a single objection to my knowledge.

6. You gave as one of the reasons for your supporting the ordinance that there would be competition with the old company—if I understand you correctly that was the talk among the aldermen in the meetings of the council and their talk among themselves?

A. Yes sir; and the petition, I think, set forth that, and Mr. Miller stated that to me.

7. And those facts were the basis on which you expected the complainant company would act in competition with the old company?

A. Yes sir;

8. There were no further statements or conversations with reference to that so far as you now recollect?

Ans. No sir;

9. Did you have more than one talk with Mr. Miller?

A. Not to my knowledge.

10. Are you able to locate approximately the time when that talk took place?

Ans. No sir; I am not.

11. Where was it?

Ans. It was not in the council chamber proper; I think it was in the city clerk's office.

12. Was anything said at that time by Mr. Miller as to a definite price which his company expected to charge for gas?

Ans. No.

13. The conversation was simply a general one, was it not, and substantially as set forth in the petition, that the threat of competition had already reduced the price of gas and actual competition would probably give a further reduction—it was general talk of that character?

A. Those were about Mr. Miller's statements to me.

14. Examine Exhibit "19" and state whether all of the persons whose names appear signed to it were residents of Peoria?

1091 A. These are all Peoria men so far as I know.

15. Is it not a fact that the preliminary matter which was urged as a reason for granting the new company a franchise or license was that the application was made in good faith and that

they would go ahead and actually construct the plant. In other words that they were not obtaining an ordinance merely to sell out to another party—was not that a very large part of the discussion?

A. Well, I hardly think that is correct; that subject was discussed but it did not seem to be the main topic of discussion.

16. Was it not discussed to a very considerable extent?

A. It was discussed, yes sir.

17. Was not that one of the statements set forth in Exhibit "19" on which you relied in supporting the ordinance?

A. Yes sir.

18. The company did carry out that representation in that statement, did it not, and did construct a modern, up-to-daye plant so far as you know with a piping system extending through a large part of the city?

Ans. I did.

19. The time when you had the talk with Mr. Miller with reference to the fact it was Peoria people and Peoria property engaged in the project, was in this one conversation to which you have referred?

A. Yes sir, there was no other conversation with him about it to my recollection.

20. Was it not a subject of discussion at that time that the discourteous treatment and general indifference to customers shown by the old company might also be remedied by having competition in the field?

Ans. Yes sir.

21. That was discussed to a considerable extent, was it not?

1092 A. That was talked of by members and people who were interested and discussed by the press, I believe, and influenced the members in voting to some extent.

22. And did it not have considerable influence in determining the position of the council?

A. Yes sir, it had its influence.

Re-direct interrogatories by Mr. TICHENOR:

1. As you understood the situation at that time, what territory did the new company propose to occupy as compared with that already occupied by the old company?

Objected to as incompetent and immaterial, not the best evidence.

A. Well, I think about three fourths of the entire city; I don't know the exact territory.

2. Was it in the same territory or different territory than that occupied by the old company?

Objected to same grounds.

A. It was in the same territory.

DAVID E. POWELL, called on behalf of defendant, being first duly sworn, according to law, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and residence?
A. David E. Powell; Peoria, Ill.
2. How long have you resided in Peoria?
A. Over 50 years.
3. What is your business at the present time and what has it been in past years?
A. I am in no business at present; my profession is the
1093 law but I have not been in active practice for some years.
4. State whether or not you were a member of the city council at the time of the pendency and passage of the ordinance to complainant company?
A. I was.
5. For how long a time were you a member of the council?
A. For 2 years, from May, 1898, to May, 1900.
6. When with respect to the termination of your office was this ordinance passed?
A. I could not tell exactly but think it was one or two sessions before my term expired.
7. State whether or not as a member of the council you were familiar with the fact that the ordinance had been presented?
A. I was.
8. For how long a period of time, if at all, had you known the gentlemen who were then interested in the proposed new enterprise?
Ans. From 15 to 40 years.
9. Look at "Exhibit 19" now shown you and state whether or not you know all the gentlemen whose names are signed thereto and did at that time?
A. Yes, I knew each and every one of them and had for a great many years.
10. What did you know of their standing both financially and as to integrity in the city of Peoria?
A. I knew from my personal acquaintance with them and from what people generally said of them that they were men of financial standing and of integrity.
11. From the time of the presentation of the ordinance, did you know the gentlemen who were interested in it?
Ans. Yes.
12. What was your understanding, and so far as you know what was the understanding of the other members of the council,
1094 with respect to this being purely a Peoria enterprise?

Objected to as incompetent and immaterial.

A. That was the understanding so far as I talked with others; I don't remember of talking with every alderman but with those I

conversed and in conversations I had with others it was understo to be strictly a Peoria enterprise.

13. Did you know at that time that any gentlemen outside Peoria was interested, or was to become interested at any time, the future?

Objected to same grounds.

A. I didn't know at the time of the presentation of the ordinanc nor did I hear for sometime that anyone outside of Peoria was i terested or was to become interested in it.

14 What was the purpose of this company in obtaining a fra chise for the installation of a gas plant in Peoria so far as y understood it at that time?

(Objected to same grounds.)

A. As I understood it, it was to be of benefit to the public in t way of a material reduction in the price then being paid for gas.

15. What, if any discussions were had in your presence amor the members of the council upon that particular question?

Objected to same grounds.

A. We discussed the franchise on that point as there was no pr vision in the ordinance fixing the maximum price of gas.

18. State whether or not during the time the ordinance was pendin you were interviewed by any of the gentlemen interested in it, if s by whom?

A. I was; I was interviewed by Wm. T. Irwin, whom I was i formed was attorney for the parties, and by Theodore J. Miller, th promoter.

17. On how many different occasions did you convers
1095 with Mr. Miller on the question?

A. I could not state the number but it was more than hal a dozen times.

18. Do you know why he saw you a number of times with refer ence to the subject?

A. He saw me three times with reference to the ordinance another time I met him and the question came up incidentally.

19. What was your attitude with reference to this ordinanc when it was first presented to the council?

Objected to as incompetent and immaterial.

The MASTER: I don't think it material but the witness may answer subject to the objection.

A. I had formed no opinion about it when it was first presented I had to examine into it and read it over.

20. What statements or representations did Mr. Miller make to you with reference to what his company proposed to do if granted a franchise?

(Objected to same grounds.)

A. He said it would make competition in gas and a new company being here the price of gas would be cheapened to the public.

21. What if anything did he say with reference to his company being operated on an entirely independent basis without combinations of any character with the company then in operation in the Peoria territory?

(Objected to same grounds.)

A. I cannot recall the particular language that was used, but it was said generally it was a Peoria enterprise with Peoria men engaged in it and their character was such they would not do anything to render the company obnoxious to the public. That was the substance of it, I cannot recall the exact words.

22. State whether or not Mr. Miller urged you to support the ordinance?

(Objected to same grounds.)

A. Well, I could not say he urged me, but he asked me
1096 twice about it and I expressed my opinion to him about the ordinance; he urged me no further about it.

23. State whether or not at the time Mr. Miller made those representations to you you believed they were made in good faith and if a franchise or license were granted they would be carried ouy?

(Objected to as immaterial.)

A. I could not say I had any belief at the time of the first or second conversation he had with me; I was thinking the subject over.

24. What was your ultimate conclusion upon the question?

Objected to as immaterial.

A. My ultimate conclusion was that I would place faith in the representations made.

25. What, if anything, had the character and standing of the gentlemen interested to do in affecting your judgment?

Objected to as incompetent and immaterial.

A. It had all to do with it—the character of the individuals concerned.

26. Look at "Exhibit 19" in evidence now shown you and state whether or not that, or the subjects there in contained, were before you, and the other members of the council, during the time this ordinance was pending?

A. Yes sir, the matters were before us; I recollect the petition well.

27. State what, if any, influence the statement and representation embodied in that exhibit had with you in arriving at the course you would pursue and did pursue with reference to the ordinance in question?

(Objected to as incompetent and immaterial.)

A. They had a very great influence with me.

28. Did you or did you not believe that the statements and representations contained in "Exhibit 19" were true and if a
1097 license were granted, as asked, that those representations would be carried out in good faith?

(Objected to same grounds.)

A. I certainly believed they were true.

29. State whether or not the matters embodied in Exhibit "19" were substantially the same as the representations made to you by Mr. Miller in the conversations to which you have referred?

A. Substantially the same.

30. As you understood the situation at that time, who were to be benefitted by the granting of the ordinance in question and in what way?

(Objected to same grounds.)

A. The public in the way of a material reduction in the price they were paying for gas.

31. Did you know at that time what prices were then charged by the old company for gas?

Ans. I did.

32. And had you during your residence in Peoria or for a great many years?

Ans. Yes sir.

33. What territory, as you understood it, was the new company to occupy and operate in as compared with the territory then covered by the Peoria Gas Light & Coke Co.?

Objected to as incompetent, immaterial, not the best evidence.

A. My recollection is they were to occupy about the same territory; they had the frontage present on a number of the streets amounting to some 50 odd miles.

34. What part of Peoria and adjacent territory, where there was a demand for gas was then occupied by the old company?

Objected to same grounds as before.

A. The greater part of the city of Peoria, that is, where it was profitable to sell gas and extend their mains; I don't know how many miles of mains they had though.

36. What had the old company done, within your recollection, with reference to the extension of its mains and the expansion
1098 of its facilities for the production and distribution of gas?

Objected to same grounds.

A. So far as my observation extended, wherever there was a demand for gas they were extending their mains.

37. How long had the old gas company been in existence and

operating in this territory at the time the proposed ordinance came before the council?

(Objected to as immaterial.)

A. I think the old company was chartered in 1853 or 1854; they were operating here in Peoria in 1855 or 1856.

38. And had it been operating continuously ever since that time?

Ans. I had.

39. State whether or not for the past 25 years you have known, either personally or by general reputation, the gentlemen prominently identified with the management of the old gas company?

Objected to as immaterial and irrelevant.

A. I have.

40. What was their standing financially and otherwise in this community?

(Objected to same grounds.)

A. Their standing was good, both financially and as to integrity, so far as I know; I cannot recollect all of them.

41. Did you know Wm. A. Herron, Mathew Henebery, Leslie Robison and Mathew Griswold?

Ans. Yes sir.

42. How long have you known those gentlemen?

A. I have known Mr. Herron for over half a century; I knew Mathew Griswold before his death probably about the same length of time, have known Leslie Robison for about 40 years.

42. You knew Peter Coffey also in his lifetime?

Ans. Yes sir.

43. These gentlemen were all prominently identified with the old company at the time of the presentation of this ordinance and had been for many years, had they not?

1099 A. I cannot remember as to Peter Coffey, whether he was alive at that time or not, but all those gentlemen were prominently identified with the company.

Cross interrogatories by Mr. ABBOTT:

1. Referring to Exhibit "19" I think you said all of the persons who signed that paper are Peoria people?

Ans. Yes sir.

2. Are there any of the persons whose names are signed to "Exhibit 19" who are not still interested in complainant company?

A. I could not answer that, for I don't know whether they are interested in it now or not.

3. But so far as you know all of those persons whose names are signed to that paper are still interested in it?

A. They are, so far as I know.

4. Where did these three conversations you had with Mr. Miller take place, at which he sought you?

A. I could not say he sought me, but he met me at the city hall twice and once at the Pabst, or in front of the Pabst, and we walked into the Pabst.

5. The conversation- at those times, if I understand you, were substantially the same as the representation set forth in "Exhibit 19"?

A. Substantially the same with regard to objections I raised to the ordinance.

6. Did Mr. Miller at any of those conversations give you any definite promise or pledge as to the price his company would charge for gas if a franchise was given?

A. No sir, he did not.

7. The conversation was of a general character and covered substantially the same grounds as set forth in Exhibit "19"?

A. Well, it was of a general character coming from his
1100 request of me to support the ordinance.

8. And of the same general character as the representations in "Exhibit 19"?

Ans. Yes sir.

9. Was it not the subject of discussion in those conversations, and among the council generally, whether the company's application was made in good faith and they would really erect a gas plant and not merely procure the ordinance for the purpose of selling to another company.

A. That was a subject of conversation.

10. And was it not a fact that the representations that they would actually construct a gas works and not sell out had much influence in procuring the passage of the ordinance?

A. It certainly had; in my judgment; it was one of the inducements for my vote.

Re-direct interrogatories by Mr. TICHENOR:

1. You supported the ordinance and voted for it, did you?

A. I voted for it on its final passage.

2. And you have stated all your reasons why you supported it and voted for it?

A. I have stated my reasons why I supported it; the question was before the people; the people were interested and there seemed to be a demand from the people that the ordinance be passed.

SUMNER R. CLARKE, called on behalf of the defendant, being first duly sworn according to law, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name, occupation and residence?

A. Sumner R. Clarke; my principal business is farming; Peoria, Ill.

1101 2. How long has farming been your business?
A. Very largely for the last 10 or 12 years.
3. How long have you resided in Peoria?
A. Nearly all my life.
4. In what other lines of business have you been engaged during your life?
A. In distilling—banking a little.
6. For how long a period of time were you engaged in the distilling business?
A. From 1870 up to 1888 I think; perhaps I was out of it for a year during that time, and since have went back into the same business within the last 4 or 5 months, since the death of my brother.
7. You became interested in your brother's distillery after his death?
Ans. I bought some stock in it.
8. Are you and officer of that corporation at the present time?
Ans. Yes sir, I am president of the company.
9. Your brother had been president in his life time?
A. Yes.
10. You were one of the persons originally interested in the formation of the complainant company, were you not?
Ans. Yes sir.
11. How long prior to the passage of the ordinance to your company did you take up the subject with the intention of becoming an interested party?
A. I think I had talked of it a year before.
12. Of this same enterprise?
A. Yes, but not with the same parties, I figured alone on it some.
13. When, so far as pertains to the organization which was ultimately effected did you take up the subject?
1102 A. I could not give the date without referring to the date of its charter.
14. Look at Exhibit "18" and state whether or not that refreshes your recollection with reference to the time?
A. This says March 18, 1899; I should say three months before that it was first talked over.
16. What were the circumstances under which the subject with you first arose?
(Objected to as incompetent and immaterial.)
A. I don't know as I remember what first brought it up; I think it was some talk I had with Mr. Miller.
17. Was it a subject which you introduced or was it introduced to you by somebody else?
(Objected to same grounds.)
A. I don't remember.
18. What was the nature of those initial conversations—what was the general character of the conversations at that time?

Objected to as immaterial and irrelevant.

A. It was with reference to getting up a new company; it was talked that we could give better service and make it more pleasant for the public in a good many ways, that we could treat the public better than they were being treated in their intercourse with the officers of the old company.

19. At that time what had been your experience, if any, in the gas industry?

A. None, except that I was in business beside the old gas company's works for 10 or 15 years and I naturally imbibed a little experience of it.

20. During that period how far was your place of business from the gas works?

Ans. Joined them.

21. Did you know at that time how long the Peoria Gas Light & Coke Co. had been operating in this territory?

A. Yes, I can remember as a boy but I would not know
1103 the exact time.

22. Had you ever been a stockholder, or interested party in any gas company prior to the time of the conversation to which you have referred?

Ans. No sir.

23. What if any knowledge had you of the cost of production and distribution of gas?

Ans. None.

24. What knowledge had Mr. Miller at that time that you knew of?

Ans. I don't think he had any in that regard.

25. How long had you known Mr. Miller?

A. I presume 25 years and perhaps longer.

26. Where was Mr. Miller's office at that time with respect to your office?

A. Mr. Hardin, Mr. Miller and myself had an office together.

27. For how long a period of time have you occupied the same office?

Ans. About 9 years at that time.

28. During the early negotiations between yourself and Mr. Miller, what, if anything, was considered by you other than the matters concerning which you have already testified, so far as pertains to the advisability of engaging in the gas business in Peoria?

Objected to as immaterial and irrelevant.

A. I don't remember only in a general way where raw products are bought chiefly you can form some idea whether a business will pay if properly conducted and managed.

29. Were you at that time acquainted with the gentlemen prominently identified with the management of the Peoria Gas Light and Coke Co.?

Ans. Yes sir.

30. How long had you known them?

A. I had known most of them, with the exception of Coffeys and Farrelly, all my life.

31. What was their standing and reputation in the community both financially and otherwise?

1104 A. There has always been some complaint with reference to Tom Coffey's treatment of people who came in contact with him in a business way, but financially they all stood well.

32. Is it not true that they were among the strongest men in Peoria financially and stood well in the community generally?

A. Oh, they stood well financially, but they were not aggressive, they were not progressive at all; within the last 10 years they were not what you would call progressive men.

33. Did you at that time know what territory was covered by the operations of the old company?

Ans. Fairly well.

34. What portion of the available Peoria territory was then being supplied by that company?

Objected to as immaterial and irrelevant.

A. I think there was a good deal of outside territory that was left out that should have had some attention; the inner part of the city was well supplied with pipe.

35. State whether or not you then knew, or understood, the capacity of the old company's plant with reference to the demand in the territory in which it was operating?

Objected to as incompetent and immaterial.

A. No, I didn't know.

36. During the time you were engaged in business in the immediate vicinity of the old company's gas plant, state whether or not there had been any expansions or additions to its operating facilities?

(Objected to as immaterial.)

A. I had seen some building going on at different times.

37. State whether or not during that period that company had erected a very large gas holder?

(Objected to as immaterial.)

A. I don't think that large holder was erected while I was in business next them; I think it was erected afterwards.

38. You knew of it did you?

1105 A. Not personally but had heard it talked of and probably had seen it.

39. What knowledge had you regarding its capacity as compared with the demand for supply in the territory occupied by the old company?

(Objected to as immaterial and irrelevant.)

A. I had none whatever.

40. What, if any, personal knowledge had you as to the nature of the equipment of the old gas company either during the time you were in business on the adjoining premises, as you have stated, or later?

(Objected to same grounds.)

A. I had none.

41. Was Theodore J. Miller the first person to suggest to you the question of entering this territory for the purpose of competing in gas production—I am speaking now with reference to those negotiations which led up to the organization of the complainant company?

(Objected to as immaterial.)

A. I don't know that I can answer that question; I think he was the only one I had talked with.

42. At that time were you familiar with Mr. Miller's financial condition?

Ans. Fairly well.

43. What was his financial condition at that time with respect to conducting an enterprise of the magnitude of the one proposed?

(Objected to as incompetent and immaterial.)

A. I don't think he could handle a deal of that kind without assistance.

44. State whether or not he was at that time in a position financially to lend any material aid to such an enterprise?

Objected to same grounds.

A. He was.

45. On his own account?

(Objected to same grounds.)

A. Of his own ability.

1106 46. I am speaking of his own financial ability?

A. No, I think not, still I do not know positively.

47. Your best judgment is he was not?

Ans. Yes sir.

48. What was the plan as proposed by Mr. Miller for procuring the capital necessary for the establishment and prosecution of an enterprise of that character as outlined to you in the early portion of your negotiations?

Objected to as immaterial and irrelevant.

A. To get up a stock company.

49. Where?

Ans. Here in Peoria; I don't know that that part was talked of, it was to get up a stock company; that is usually an after consideration.

50. When that feature of the case took shape, from what source was it proposed by you and Mr. Miller to obtain subscribers to the necessary capital stock?

Objected to as immaterial and irrelevant.

A. I don't think it was talked over at the time, although it might have been, I don't remember; that is, at the beginning of the enterprise I am speaking of now.

51. My question embodied also the time when that feature of the case began to take shape—the question of procuring stock subscriptions for the purpose of obtaining necessary funds?

A. It was very soon after that.

52. Where was it proposed to get those stock subscriptions?

Objected to as incompetent, immaterial and irrelevant.

A. I don't remember whether that was talked over at that time or not.

53. Either at that time or subsequently, where was it proposed to obtain the necessary capital?

A. It was proposed to interest some Peoria parties and some outside parties.

1107 54. Who, if anyone, besides yourself and Mr. Miller had to any extent participated in these preliminary negotiations at the time the subject of financing the concern came under consideration?

Objected to same grounds as last stated.

A. I don't remember when that was taken up; Mr. Walsh's name was mentioned and I don't remember at what time Mr. Little's name was mentioned.

55. In the beginning of your negotiations with Mr. Miller, what were the discussions and what were the intentions of both of you with reference to making this purely a Peoria enterprise?

Objected to as incompetent and immaterial.

A. I don't remember; in getting up a stock company, you usually consult your moneyed friends and it is pretty hard to get up a stock company in Peoria or interest people at all in anything of that kind and in a large undertaking it is very often necessary to go outside.

56. What was the fact in this particular case and when did that fact develop?

(Objected to same grounds.)

A. I don't remember.

57. State whether or not it was also the intention of yourself and Mr. Miller to procure and interest outside capital in this enterprise?

(Objected to same grounds.)

A. I don't think it was talked over when we first talked it over, although it may have been; I don't remember.

58. Was that the fact when the subject of financing the concern first came up?

(Objected to same grounds.)

A. I don't remember.

59. How frequently did you and Mr. Miller discuss those questions between yourselves?

A. I think having an office together we talked it over quite frequently.

1108 60. To what extent, if at all, did the question of prospective profits enter into your becoming interested in the proposals which he suggested?

(Objected to as immaterial and irrelevant.)

A. I don't remember.

61. Was it to you a matter of any consideration as to whether or not the enterprise would be profitable or otherwise?

A. Yes sir.

62. State whether or not advantages to the city of Peoria and its citizens were a subject of consideration by you and Mr. Miller?

Ans. Yes sir.

63. State whether or not prior to the time the stock subscription list for your company was made up you or anyone else, then interested or proposing to become interested, sought financial assistance outside of Peoria?

Objected to as immaterial and irrelevant.

The MASTER: I don't see the materiality of that but the witness may answer subject to the objection.

A. I talked it over with John R. Walsh of Chicago and Mr. Little.

64. Were you the first person to present the subject to Mr. Walsh?

(Objected to same grounds.)

A. I don't know whether it was myself or Mr. Little; I don't know which of us saw him first.

65. How long had you known John R. Walsh?

A. I don't remember; I had known of him a good while.

66. Were you personally acquainted with him before that time?

A. I think I had met him about 3 or 4 months before this matter came up, but he knew of me and I knew of him quite well in other matters.

67. What were the special circumstances which induced you to approach Mr. Walsh upon financial questions connected with the proposed organization of this company?

1109 Objected — as immaterial and irrelevant.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. He was reported to be a very wealthy man and a man that was willing to take hold of an enterprise of this kind if it were to be properly managed.

68. Did you at that time know whether or not Mr. Walsh was interested in gas inductries elsewhere?

(Objected to same grounds.)

A. Not to my personal knowledge.

69. You had been informed of that had you not?

Objected to same grounds.

A. I had heard it, yes sir.

70. State whether or not, you knew at that time Mr. Walsh was an interested party in the old gas company in Peoria.

Objected to as incompetent and immaterial.

A. I don't know whether I knew it at that time or not; I heard of it some time, but whether I knew it then or not I could not state.

71. How intimate, during the period covered by your acquaintance with Mr. Walsh, had you been with him either socially or in a business way?

A. I don't know; Mr. Walsh seemed to treat me in a very frank way from the start and always has; I don't know for what reason, but he seemed to have a good deal of confidence in anything I suggested to him.

72. In what other lines of business, if any, had you previously been associated with Mr. Walsh?

A. In none. In the first part of my testimony, I neglected to state that I have been very largely interested in the Central railway here and while interested in the Central Railway Company Mr. Walsh's name was brought to my attention; I think that was
1110 the first time I ever heard of him.

73. When was it that you were largely interested in the Central Railway Company, as you have stated?

A. In 1889 until about 1895 or 1896.

74. Was in that in the line known as the Rapid Transit, or Sixth Avenue line in Peoria?

A. No sir, in the whole system.

75. Was Mr. Walsh a stock holder in that company at any time, or in any way interested in it?

Ans. No sir.

76. Up to the time you called on Mr. Walsh, as you have testified, have you ever transacted any business with him either directly or indirectly?

A. No sir. I think indirectly my name was used in connection

with this railway at that time by another party but I had no personal business with him: he knew who I was.

77. Was the suggestion of the advisability of interesting Mr. Walsh made to you by anyone else or was it an idea of your own?

Objected to as immaterial and irrelevant.

A. Of my own.

78. Are you able to state at this time how many people in Peoria had manifested an intention to become interested, or had participated in your negotiations, prior to the time of this interview with Mr. Walsh?

(Objected to same grounds.)

A. No, I think not.

79. No one except yourself and Mr. Miller?

A. Except myself and Mr. Miller.

80. What inducement at that time, if any, did you hold out to Mr. Walsh touching the subject of his becoming an interested party?

(Objected to as incompetent and immaterial.)

The MASTER: I don't think it material but the witness may answer subject to the objection.

1111 A. It was simply talked over as a business proposition that would pay.

81. From your conversation with Mr. Walsh on that occasion, did you understand that he was a man skilled in the gas industry?

(Objected to same grounds.)

A. I don't remember; I know the question was asked whether I knew that he had been interested in gas companies; I knew it either before or after that time but I don't remember which now.

82. Did you know from anything he said at that time whether or not he was then familiar with the gas situation in Peoria?

Objected to same grounds.

A. I don't remember; in talking over matters of that kind, the question of population is usually the main question.

83. Who was with you at that time, if anyone?

Objected to as immaterial.

A. I don't remember.

84. You don't remember at this time whether Mr. Miller was with you or not?

A. I don't think he was with me; Mr. Little may have been with me but that I don't remember.

85. State what particular question, or what particular subjects, were discussed between you and Mr. Walsh at that time and what

those discussions were so far as pertained to the proposed organization?

(Objected to as immaterial and irrelevant.)

A. The question of population and the question as to the amount of gas that was being used here.

86. State whether or not prices were also considered at that time?

(Objected to same grounds.)

A. I don't remember.

87. Did you then know the rates at which the old company was furnishing gas, both for fuel and illumination?

1112 A. I think I did, yes sir.

88. Are you able to state at this time whether you informed Mr. Walsh regarding that?

A. No, I could not say positively; the chances are it was talked over but I don't remember.

89. State whether or not at that time there was any discussion between you and Mr. Walsh with respect to the probability of a new company being able to obtain sufficient business against the old company to make it profitable in this territory?

Objected to as immaterial and irrelevant.

A. I presume it was; I don't remember positively, but it naturally would be.

90. Did you at that time learn what experience Mr. Walsh had had in the gas business?

A. I did not; I don't know whether the question came up and I didn't care; a man of his business experience easily knows pretty well whether a business can be conducted fairly profitable or not if he knows the population of the city and the price of raw product.

Defendant objects to all of the foregoing answer except the first sentence thereof as not responsive and moves the court to exclude it.

91. To what extent at that time did you undertake to interest Mr. Walsh financially in this enterprise?

Objected to as immaterial and irrelevant.

A. I don't remember exactly.

92. Did you at that time have any knowledge or information as to how largely Peoria capital would become interested in the enterprise if it obtained a footing here?

(Objected to same grounds.)

A. No I did not.

93. State whether or not any effort had been made to ascertain that fact?

1113 A. I think not except so far as my own efforts were concerned.

94. At that time had the matter taken such shape you knew substantially the amount of capital that would be required for the undertaking?

A. I don't remember whether it had been talked over or not.

95. From what source did you first obtain information as to the magnitude of the investment necessary for such an undertaking?

Objected to as immaterial.

A. I think it was talked over with Mr. Walsh and perhaps with Mr. Little; I don't remember with which one first.

96. Was Mr. Little present in Chicago at that time?

A. I don't remember.

97. When did you become acquainted with Francis W. Little, the president and manager of complainant company?

A. At Sioux City, Iowa, about June, 1888.

98. How intimately had you been acquainted with him during the period covered by your acquaintance?

A. Not at all in a business way; socially I was quite well acquainted with him and I might say to a certain extent in a business way; he was interested in land and loaning money at that time and I think I had talked over those matters with him.

99. Where was he located?

Ans. In Sioux City, Iowa.

100. Do you know when he left Sioux City?

A. Not exactly.

101. Do you know when his experience in the gas business began?

A. No sir.

102. Was he interested in that at all at the time you first knew him?

Ans. Not to my knowledge.

103. State whether or not at the first interview with Mr. Walsh, to which you have referred, there was an agreement or understanding had between you as to the extent he would become interested
1114 in the event the enterprise proceeded?

Objected to as incompetent and immaterial.

The MASTER: I don't see the materiality of it but the witness may answer subject to the objection.

A. My remembrance is at the first interview he simply asked me if I was willing to put money into it myself and I told him I was.

104. Did you at that time make known to him the extent to which you proposed to invest?

(Objected to same grounds.)

A. I don't think that was talked over at the first meeting.

105. State whether or not there was any discussion between you as to the amount of money that would be required for such an undertaking—I mean at that meeting?

Ans. I don't remember.

106. Did he or not on that occasion tell you he would furnish a portion of the funds necessary for the enterprise in the event it could be inaugurated?

Objected to as incompetent and immaterial.

A. He gave me to understand that he would, as I remember.

107. Are you able to state about how long that was before your company was incorporated?

A. I think I said it was 3 or 4 months; it would be merely guess work, it might be two or more months.

108. How long was it before you again saw him on that subject?

A. I don't remember.

109. How many times did you confer with him upon those questions prior to the making up of the subscription list for your company?

Ans. Three or four times.

110. State whether or not prior to the time the subscription list was made up there was any definite understanding between you and Walsh as to the extent to which he would become interested in the new enterprise?

1115 Objected to as incompetent and immaterial.

The MASTER: I do not now see the materiality of it, but it may become material. The witness may answer subject to the objection.

A. I think I talked over with him what I thought my Peoria friends would take and he said he would take the balance.

111. To what extent was he to become interested with reference to the total amount of the capitalization?

Objected to same grounds.

A. I don't think any exact amount was talked over; I think I gave him to understand I could get at least one third of it taken here in Peoria.

112. And was it then your understanding from what he said that he would furnish the remainder of the capital?

Objected to same grounds.

A. He said he would take what the Peoria people did not take.

113. What was the arrangement, if any, prior to the making up of the subscription list with reference to the stock he was to get? I don't mean in amount but what stock he was to get?

Objected to as incompetent, immaterial and already answered.

A. I don't think I can answer it more fully than I have.

114. Was it then understood that he was to sign the subscription list for the stock which he later would get?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of it but he may answer subject to the objection.

A. It was not mentioned.

115. What arrangement or understanding with Mr. Walsh was there in making up the subscription list with reference to what stock should go to him?

(Objected to same grounds.)

The MASTER: I do not see the materiality of it but he
1116 may answer subject to the objection.

A. I think it was understood at that time that the Peoria parties would take about one third and he would take the balance.

116. Was it also understood he should sign the subscription list for the stock he proposed to take?

Objected to same grounds.

A. That was not talked over at all.

117. What was the reason why he did not become an original subscriber to the capital stock, if you know?

Objected to same grounds.

A. I have forgotten the exact reason, but for some reason the papers were wanted that day at one o'clock; either Mr. Irwin or his partner wanted to go to Springfield and take the papers with him; the papers were given to me, I think, about nine o'clock in the morning and I wanted to get every subscription between that and one o'clock.

118. How many weeks or months had that matter been pending at the time to which you refer?

(Objected to as immaterial.)

A. I don't remember.

119. Had it been for some months?

A. This question of subscription?

120. Yes and the preliminary arrangements necessary for the incorporation?

A. The papers had not been gotten up—it seems to me they were finished the night before and I got them the next morning.

121. How long had the preliminary arrangements then been in progress. I mean with reference to the preparation of your papers and making the necessary arrangement for procuring your final certificate of incorporation?

Ans. I don't remember.

122. You knew from the first that the stock subscription list must be completed before you could get your certificate, did you not

1117 A. That was what I understood; if I remember right the incorporation papers are first gotten out, then the subscrip-

tion afterwards; the incorporators and subscribers are not necessarily the same parties.

123. No, the people applying for the license to incorporate are not necessarily stockholders. Was it your intention from the first to subscribe for the amount of stock which you did actually subscribe for?

(Objected to as immaterial.)

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. With the view of carrying that large an amount?

124. Yes.

Ans. No, that is, I did not sign with the intention of carrying that large an amount of the stock.

125. What were the circumstances under which you subscribed for so large a proportion of the stock?

Objected to as incompetent and immaterial, and already answered.

The MASTER: I think it has been substantially answered but the witness may answer more fully if he can.

A. As I said before, we were anxious to get the papers off so as to have them go on the train to Springfield at one o'clock; Mr. Walsh was not here so I subscribed for the balance that was not taken by the other Peoria parties. I don't remember the amount.

126. State whether or not there was previously an agreement between you and Mr. Walsh to the effect you should subscribe for all the remainder of that stock and he would take a portion of it when the stock was actually issued?

Objected to as incompetent and immaterial.

The MASTER: I don't see the materiality of it but the witness may answer subject to the objection.

A. There was.

127. Was that agreement definite with reference to the
1118 amount of stock he was to receive?

(Objected to same grounds.)

A. I think it was understood by that time that the Peoria parties would take about one third and he would take the balance.

128. State whether or not that arrangement was carried out when the stock was issued?

(Objected to same grounds.)

A. Virtually, I think about that way.

129. How much of the stock, which you subscribed, was actually issued to Mr. Walsh, or to anyone for him?

Objected to same grounds.

The MASTER: I do not see the materiality of it but the witne may answer subject to the objection.

A. I don't know.

130. What official connection, if any, with the company have yo had since its organization?

Ans. President of the company.

131. State whether or not you attended the meeting of the sul scribers to the capital stock to prepare for obtaining your final ce tificate?

Ans. It is my remembrance that I did.

132. Who of the subscribers were present at that time?

A. I think they were all present except my brother Charles, an he may have been there; I think he was come to think of it, but am not positive about that, and if he were not my brother Chaun cey had power to sign as attorney.

133. Was any business transacted at that meeting other than thos formal matters pertaining to the papers to be filed with the secre tary?

Ans. None that I remember.

134. Preceding the day on which that meeting was held, what, i any, arrangement was made with reference to the persons wh would compose the directory?

(Objected to as immaterial.)

A. I will have to change my answer to the previous question be fore answering this one. It seems to me it was talked over at the previous meeting as to who should compose the directors; I was asked to take the presidency of it but did not want it and
1119 they insisted on my taking it. In answer to the last question I will say I don't remember of any talk.

135. Who named the members of the board?

Objected to as incompetent and immaterial.

A. That I don't remember.

136. Did you know prior to the meeting at which they were voted for who they were to be?

(Objected to same grounds.)

A. I cannot remember what was done; those matters are usually talked over and an understanding in some way is arrived at and I think it was so in that case, but I don't remember definitely any thing about it.

137. What, if anything had Mr. Walsh to do with the naming of the directory?

Objected to as incompetent and immaterial.

A. I don't remember that he took any part in it.

138. Was Mr. Walsh present as that meeting?

Ans. No sir.

139. Did he have a personal representative at that meeting?

Objected to as incompetent and immaterial.

A. Mr. Little and myself were in pretty close touch with Mr. Walsh and it may have been Mr. Little or myself; I don't remember which; there was no controversy about it.

140. State whether or not at that time you understood that Mr. Little or yourself, or both of you, were authorized to speak for Mr. Walsh so far as pertained to any matters coming before that meeting?

(Objected to same grounds.)

A. Why I did in a way.

141. State whether or not prior to that meeting you had submitted to Mr. Walsh the names of those you proposed to offer as members of the directory?

(Objected to same grounds.)

A. I don't remember of submitting any names.

142. How recently, at the time of that meeting, had you seen Mr. Walsh personally?

(Objected to same grounds.)

1120 A. Oh, I don't know, it might have been two or three weeks, it might have been less; I should say within two weeks perhaps.

143. How frequently were you in communication with him at that time?

(Objected to same grounds.)

A. I think I answered that I was in Chicago three or four times; I do not think I ever wrote him anything with reference to it.

144. Were the gentlemen selected at that meeting all residents of Peoria?

A. I could not tell you without refreshing my memory.

145. Look at "Exhibit 18" now shown you and state whether from that you can answer the question?

A. Yes sir, they were all residents of Peoria.

146. Those gentlemen were all present at that meeting, were they?

Ans. That is my remembrance, yes sir

148. How long did the directory remain as created at that time?

Objected to as immaterial.

A. I don't remember.

148. Do you remember whether all of those gentlemen served their full term or not?

Ans. I think not.

149. Who were the first to retire, if you remember?

A. Mr. Miles and Mr. Bailey.

150. Did they retire at the same time?
A. That is my remembrance.
151. Do you know the circumstances under which their retirement was brought about?

(Objected to as incompetent and immaterial.)

A. I cannot answer that without going to the records; I do not remember definitely enough to state.
152. Do you know the circumstances which led up to their severing their connection with the directory?

Objected to same grounds.

1121 A. I would have to refresh my memory from the records.
153. State if you know how long prior to the time they retired the subject first came up for consideration, either by you or by anyone else connected with the company?

Objected to same grounds.

A. I cannot answer it, I don't remember.
154. Were you present at the time of their retirement?

Objected to same grounds.

A. I think I was.
155. State whether their resignations were voluntary or involuntary?

(Objected to same grounds.)
The MASTER: Are you asking for the knowledge of the witness?
Mr. TICHENOR: Of course, so far as he knows.
The MASTER: He may answer.

A. They were requested to resign.
155. Who requested them?

(Objected to same grounds.)

A. I don't remember.
156. With whom did that request originate?

Objected to same grounds.

A. I don't remember.
157. State whether or not there had been any difficulty or antagonism among the member of the board of directors up to that time?
Ans. None at all.
158. Do you know why Mr. Miles and Mr. Bailey were requested to resign?

(Objected to as immaterial and incompetent.)

A. I cannot answer that without looking over the records; there was a reason; there was no controversy about it at all.
159. Do you know whether or not the records of your company show the reason for requesting those resignations?

Objected to as immaterial and irrelevant.

A. They would not show the reason.

1122 160. Would the records show the source from which the request came?

(Objected to same grounds.)

A. No.

161. Do I understand you to testify at this time that you have no knowledge as to the source of either of those requests?

Objected to same grounds.

A. I think, if I read the minutes, it would refresh my memory; there was a reason for it but I don't recall it.

162. Were either of the two gentlemen named in any way obnoxious to other members of the directory or were there personal reasons of another character against them within your knowledge?

Objected to same grounds.

A. None whatever.

163. Do you know whether or not the subject of their resignation was broached prior to the meeting at which they were requested to resign?

Objected to as immaterial, incompetent and already answered.

A. I don't know whether it was talked over with them before or not.

164. When, with reference to the time of that meeting did you first know that such resignations would be made?

Objected to as incompetent and immaterial.

A. I presume I knew it at the time of the calling of the meeting.

165. Was that a special or regular meeting at which they resigned?

Ans. My remembrance is it was a special meeting.

166. And was it called for that particular purpose?

Objected to as immaterial and irrelevant.

A. I don't remember.

167. Do you at this time remember any other business transacted at that meeting?

Ans. No sir.

1123 168. Do you remember who actually requested the gentlemen to present their resignations?

Objected to as incompetent, immaterial and already answered.

A. My remembrance is Mr. Little talked with the gentlemen.

169. Was Mr. Little at that time a member of the board?

A. That I don't know.

170. If he was, whom had he succeeded?

A. I could not tell you without referring to the records.

171. Is it not your recollection that Mr. Bailey and Mr. Miles were the first to retire from the directory?

Objected to as immaterial and irrelevant.

A. Yes sir.

172. If that were so, do you know the circumstances under which Mr. Little was present at that board meeting, or what called him there?

(Objected to same grounds.)

A. I don't remember.

173. Had you called him there?

(Objected to same grounds.)

A. I could not say.

174. Was it customary for him to attend the meetings of the board prior to the time he became a director, if he did subsequently?

Objected to same grounds.

A. I don't know; I don't remember; our offices were very close together and we were together a good deal but I don't recall whether he was in the habit of attending meetings of the directors or not. Mr. Little is a man who never forces himself where he don't belong.

175. To the best of your recollection, had the Peoria office of your company been established at the time those gentlemen resigned from the board?

Ans. Yes sir.

175. How far was it, as originally located, from your office?

A. It joined my office; I am not sure but what some of
1124 the meetings were held in my office before their office was ready—that they made their office there.

177. When, with reference to the time of your organization, did Mr. Little take up his residence in Peoria?

A. It would be guess work for me to answer that question; do you mean to bring his family here?

178. Well when he himself came here to remain—spent his time here?

Ans. He came here before this organization or about that time; he had been here before but had not settled down here.

179. Did you at that time know in whose interests he was here?

A. Yes sir.

180. Whose?

(Objected to as incompetent and immaterial.)

A. He represented Mr. Walsh.

181. When were the vacancies caused by the two resignations mentioned filled?

Ans. I think they were filled that day.

182. How were they filled—by appointment or election?

Objected to as immaterial and irrelevant.

A. My recollection is it was by election of the board.

183. Who were their successors?

A. I think Mr. Little and my impression is Mr. Walton, but I would have to look at the records to be sure as to that.

184. Who is this Mr. Walton to whom you refer?

A. He lives in Chicago.

185. Do you know him as being identified with any of Mr. Walsh's interests, if so what?

A. Yes sir, he is vice president and manager of the Equitable Trust Company, of which Mr. Walsh is president.

186. Do you know why Mr. Little was elected a member of the board in the place of either of the gentlemen who resigned?

Objected to as incompetent and immaterial.

A. I have no personal knowledge.

1125 187. Do you know why Mr. Walton was elected in the place of either of those gentlemen?

(Objected to same grounds.)

A. No sir.

188. Who named them as members?

Ans. I don't remember.

189. Were you present at that meeting?

Ans. Yes sir.

190. And participated in the election, did you not?

A. Yes sir.

191. How long in advance of that meeting did you know those gentlemen were to succeed Messrs. Miles and Bailey, if at all?

Objected to as incompetent, immaterial and already answered.

A. I don't remember how long.

192. State if it is not a fact that you knew that before Messrs. Bailey and Miles were originally elected members of the board?

(Objected to as incompetent and immaterial.)

A. Yes sir, I knew it was talked of.

193. Who was the next of the original members of the board to retire, if there were any further retirements?

A. I think Mr. Corning.

194. How long after the time of the resignation of the other two gentlemen did he retire?

A. I should say two years; along about 9 or 10 months ago.

195. Who was elected to fill the vacancy caused by Mr. Corning's resignation?

Objected to as incompetent, immaterial and relating to matters that took place after the commencement of this suit.

A. I don't remember whether it has been filled or not.

196. State whether Mr. Walsh has ever been a director of that company?

Ans. I think not.

197. How many meetings of the board has Mr. Walton attended since his election?

Ans. I don't know.

198. Have Mr. Walton and Mr. Little both been members continuously from the time of your election as stated to the present time?

1126 A. I could not answer that without reference to the records; I have been away a good deal and have been absent from a good many of the meetings.

199. Will you refresh your recollection or otherwise as to the various matters concerning which you have been examined and be prepared to testify in regard to them at a later date?

Ans. Yes sir.

200. When did Mr. Little become a stockholder in your company, if at all?

Ans. That I could not answer without referring to the records.

201. Is he a stockholder?

A. I think he is quite a large stockholder.

202. Do you know whether or not Mr. Little has paid the assessments levied against the stock he holds so far as they have been made?

(Objected to as incompetent and immaterial.)

A. I don't know.

203. When, with reference to the organization of your company, did he become a stockholder?

(Objected to same grounds.)

A. I don't know.

204. Whose stock did he get?

(Objected to same grounds.)

A. I don't know.

205. When did Mr. Walton become a stockholder?

A. That I cannot answer.

206. Do you know whether he is a large or small stockholder?

Objected to as incompetent and immaterial.

A. I don't know.

207. Do you know where he purchased his stock?

Objected to same grounds.

A. No sir.

208. State how many of the gentlemen, whose names appear on the subscription list, received the stock for which they subscribed to the extent of their several subscriptions?

1127 Objected to same grounds.

A. I don't know, except so far as the records show and my own stock.

209. Did you, as president of the corporation, affix your official signature to all certificates issued?

A. Not necessarily so; I could not say without looking on the stock book.

210. Have you any recollection now as to whether or not you did as president sign the stock?

Ans. No sir, I have not.

211. At or about that time were you president of any other corporation in Peoria?

Ans. I think not.

212. Who has been your vice president from the organization to the present time, if you have had one?

A. I would like to have the question put to me later when I have refreshed my memory from the records.

213. You have a vice president, have you?

Ans. Yes sir.

214. State whether or not stock certificates in your company have been issued to Mr. Walsh in conformity with the agreement, testified to by you earlier in your examination, to the extent to which he was to become interested in your company?

Objected to as incompetent and immaterial.

A. That I could not tell without refreshing my memory.

215. What, if anything, did you have to do with procuring the necessary frontage?

A. Nothing except to sign for the frontage I had control of.

216. Who had charge of that work?

Ans. Theodore Miller.

217. Did you know what persons were employed in that work?

A. I did at the time.

218. When was that work done with reference to the time you received your final certificate of incorporation?

A. I think three or four weeks; it extended over that period.

1128 219. How many men were employed in that work?

A. From 10 to 12; I don't think more than 12.

220. How many other men were employed in any work preliminary to procuring your license from the city?

A. I don't remember of any.

221. Did your company have an office at that time?

A. Mr. Miller made his office in the back part of the building occupied as an office.

222. Who employed the men?

A. Mr. Miller hired them and I paid them.

223. At whose request or suggestion did you pay for those services?

(Objected to as incompetent and immaterial.)

A. I don't think it was anybody's suggestion; I paid it on my own account.

224. And from your own fund?

Ans. Yes sir.

225. Who among the persons interested, or to become interested, if anyone, agreed to re-imburse you in whole or in part for any such outlay?

(Objected to as incompetent and immaterial.)

A. As I remember it, this money that was spent for frontage Mr. Walsh and myself agreed to advance, and there was no promise to pay it back or any understanding it was to be paid back at that time.

226. About what was the magnitude of those disbursements up to the time of the organization of your company?

Objected to same grounds.

A. It might have been $700. or $800.—somewhere in that neighborhood.

227. To whom was intrusted the duty of securing a site for the location of the gas house and other buildings—the manufacturing plant?

(Objected to as immaterial.)

A. It was in the hands of Mr. Little and myself very largely.

228. Under whose directions, if under anyone's, were you
1120 operating with respect to that?

Objected to as incompetent and immaterial.

A. I don't remember whether it had ever been talked over at a meeting or not, it was generally understood between Mr. Walsh, Mr. Little and myself who were the active workers at the time.

229. That you and Mr. Little were to have charge of that matter?

A. Yes sir.

230. When was that with reference to March 21, 1899, the date of your incorporation?

(Objected to as immaterial.)

A. Nothing has been done, as I remember, only to talk over the location at that time.

231. Then the selection and work you did in connection with it was done after that date?

A. There had been some work done before with no authority, that is, we had looked around ourselves for a location and after our organization—Interrupted.

232. State whether or not any limitation was placed upon the amount of the investment that was to be made in the real estate upon which the plant was to be constructed?

Objected to as incompetent and immaterial.

The MASTER: It may be material in one view of the case, and the witness may answer subject to the objection.

A. I don't remember.

233. Have you anything in your possession, or are there any records of the company, that would throw any light upon that question?

Ans. Not that I remember of.

234. Who dictated the price that should be paid for the ground?

Objected to as incompetent and immaterial.

A. I don't think any one person dictated it, but Mr. Little and myself probably had more to do with it than anyone else; I think it was talked over among the directors.

1130 235. Would any action of that character be made a matter of record by your secretary?

Ans. I hardly think so; there might be something of record with reference to the purchase when it was made confirming it but I don't remember whether there was or not.

236. When with reference to the purchase of the ground, were estimates furnished for the manufacturing plant, if any such were furnished?

(Objected to as incompetent and immaterial.)

A. I don't remember.

237. State whether or not you ever saw any estimates for the various buildings?

(Objected to same grounds.)

A. I don't remember.

238. Did you or did you not see plans and specifications for the various buildings?

A. Yes sir, I saw plans and specifications.

239. Who prepared them?

(Objected to as immaterial.)

A. I cannot give the name.

240. Was it a Peoria architect?

(Objected to as immaterial.)

A. I don't remember.

241. Would your records show?

A. I hardly think so; the company had an engineer in its ploy who did some of the work; it was done in pieces by differ men.

242. What is your present recollection as to whether or not plans and specifications were prepared in Peoria or in Chicago?

Objected to as immaterial.

A. I think most of them were prepared here; I don't know t any of them were prepared in Chicago.

243. Who, if any one, connected with your company had cha of their preparation so far as that work was done in Peoria?

A. Mr. Little.

244. To whose supervision was entrusted the matter of fixi the size of the different buildings that were to enter into t

1131 construction of the operating plant?

Ans. Mr. Little.

245. What if anything had you to do with it?

A. Nothing whatever.

246. State whether or not those matters were brought before t board of directors at its various meetings?

A. I think not; they may have been talked over some but I do remember of their being brought before them in detail.

247. State whether or not any building committee of the boa was appointed?

Ans. No sir.

248. Did you at that time know what experience Mr. Little ha had in the construction of gas plants?

Ans. I knew something.

249. Did you know whether or not he had ever previously supe intended such work?

Ans. From hearsay.

250. Where had he been immediately prior to locating in Peori in connection with the work in question?

A. Akron, Ohio.

251. Did you at that time know how long it had been since Mr Little first took up the subject of gas as a business?

A. No sir.

252. State whether or not Mr. Little presented to you personally or to your board an estimate of the expense of the installation of complete plant of the character which your company proposed t build in Peoria?

Ans. I don't remember that he did.

253. State whether or not he at any time prior to the construction outlined to you the various buildings that would be necessary fo such a plant, giving their sizes, capacity, etc., or whether he pre sented that subject to the board in any form?

A. It was talked over but whether he presented a detailed plan or not I don't remember.

254. Did you at that time know the magnitude of the plant that was to be constructed with respect to the total demand for gas in Peoria?

(Objected to as incompetent and immaterial.)

1132 A. No sir.

255. When did you for the first time obtain information as to the capacity of the plant either proposed or as constructed, as the case may have been?

A. I obtained some information from Mr. Little in general talk with him at times.

256. When with respect to the time the work was being done?

A. I don't remember; I presume it was talked over both before and after.

257. State whether or not you or your board up to the time the work of construction began knew what size plant was to be installed as compared with the demand for gas in the Peoria territory?

(Objected to as incompetent and immaterial.)

A. I did not pay much attention to it; that was left almost entirely to Mr. Little as the practical man.

258. Did you during the period you were preparing to incorporate and to build, know the length of time that Mr. Little had been associated with Mr. Walsh in the gas business?

Objected to as immaterial.

A. Not exactly.

259. Did you know in a general way?

Ans. Yes sir.

260. How long as you then understood it?

Objected to as incompetent and immaterial.

A. Three or four years.

261. During the period of construction, what were Mr. Little's duties and what did he actually do?

A. He had absolute control of all the construction.

262. Did that include street work, as well as work connected with the plant proper?

A. Through his lieutenants, you know, but he was in charge absolutely.

1133 263. To whom, if to anyone, during the progress of construction, did Mr. Little report both as to the progress of the work and disbursements?

A. I would have to look that up in the record; I think he reported to Mr. Walton.

264. State whether or not within your knowledge, while the work

was in progress, there were weekly or monthly detailed stat showing expenditures in the work of construction?

A. Not to my personal knowledge, but it was reported to n the records were very correctly kept.

265. You had no personal knowledge of that then?

Ans. No sir.

266. You did not see those statements yourself?

Ans. No sir. Well, I occasionally saw a statement with re to certain work like laying pipe, that is, what the estimate what it would cost after it was finished.

267. Do you know whether those statements were furnishd or monthly?

Ans. I could not say whether it was weekly or monthly.

268. How far did Mr. Little's authority extend in the ma expenditure?

A. There was no limit; we all had confidence in him and I not say there was any limit.

269. Do you know the manner in which the funds used i struction were handled?

A. Not absolutely, I have a general idea.

270. Do you know where the funds used for that purpose kept during the time?

Ans. Kept here.

271. In what bank?

Ans. They were paid through the Merchants national.

273. Were those funds kept on deposit at the Merchants na bank?

Ans. We kept an account there to meet our expendi

1134 274. State whether or not all of the expendit-res of struction were handled through the account kept a Merchants national bank?

Ans. That I could not answer; I don't know.

275. From what source did those funds come, if you know?

Objected to as incompetent and immaterial.

A. Borrowed money.

276. Who put those funds in the Merchants national bank?

Objected to as incompetent, immaterial, irrelevant, alr answered.

A. I presume the treasurer of the company.

277. Who was your treasurer at that time?

A. I think Mr. Walton.

278. Do you know where Mr. Walton got the funds?

Objected to same grounds as before.

A. I do not.

279. Had you any knowledge whatever during that period o person who was furnishing the money for the construction?

Objected to as incompetent and immaterial.

A. I knew it was borrowed money but didn't know where it came from.

280. What was the financial standing and ability of Mr. Walsh and all the other stock holders of the complainant company at the time of the construction of its plant in Peoria?

Objected to same grounds.

A. I don't know as I have a right to question the financial standing of different people in court; most of them were men of a good deal of means, some of them quite wealthy.

281. I have understood you to testify that your reason for interesting Mr. Walsh in the enterprise was because of his very large wealth—is my understanding correct?

Ans. Yes sir.

282. When was the first assessment made upon the capital
1135 stock of the complainant company?

Ans. I don't remember.

283. What was it?

Ans. A 20 per cent. assessment I think.

284. How many assessments up to the present time have been made upon the capital stock?

(Objected to as incompetent and immaterial.)

A. That is the only assessment that has been made.

285. State whether or not within your knowledge the various stock holders paid the assessment of 20 per cent. to which you have referred?

A. I think they all paid it, in fact I know they did.

286. Was that a regular call made by the board of directors?

A. That is my remembrance.

287. Who was the treasurer of your company at that time?

A. I think Mr. Walton.

288. Do you know what disposition was made of the funds obtained from that assessment?

Ans. No sir.

289. When with reference to the time you purchased the ground, upon which the manufacturing plant of complainant was constructed, was that assessment made?

A. It was made some time afterwards.

290. From whom was that purchase made?

A. From Clarke Bros. Distilling Co., or Clarke Bros., I don't know which, but it was one or the other of those firms.

291. And was that the place where you was in business for a number of years?

Ans. Yes sir.

292. What, if anything, during the period of construction, did you have to do with auditing the accounts of complainant company?

A. Nothing whatever.

293. Were they within your knowledge audited in Peoria?

A. I don't know.

294. Did you from month to month know what the disbursements were?

Ans. I didn't know but I could have found out; I think perhaps there were one or two months I asked the question.

1136 295. It was not brought to your knowledge officially?

A. No sir.

296. During the time your company were making preparations for furnishing gas to what extent, if at all, was the subject of rates under consideration by the board of directors?

Objected to as incompetent and immaterial.

A. I think it was talked over once whether it was at an informal meeting or formal meeting I don't remember.

297. Are you able to recall at this time anything definite with reference to when that discussion occurred?

Ans. No sir.

298. You don't remember whether it was when you were approaching the time when you would be ready to operate or not?

A. I could not give the date.

299. When you were preparing for incorporation and application for a license from the city, were you familiar with the gas situation in Peoria?

A. To a certain extent, as much as I could find out from a close corporation.

300. Did you know of any changes in prices during that time while you were getting ready to furnish gas or during your preliminary arrangements?

A. It seems to me there was a change during that time.

301. There was only one gas company in the field here at that time, was there not?

Ans. That was all.

302. Do you remember when, with reference to the time the ordinance was passed, that change in price was made?

A. I think it was made about the time we got our incorporation papers—shortly after. No, I guess I am mistaken: I think it was after we got our ordinance.

303. Do you remember whether that change was an advance or decrease in rates?

Ans. I think it was an advance.

1137 304. And was that the only change that was made during the early history of your company?

A. You are speaking of the rates of the old company, are you?

305. Yes sir.

A. They discovered then they had made an advance instead of a decrease and then made another change.

306. When were those changes with reference to the time you made your application for a license from the city?

A. I don't remember.

307. I will ask you if the old company had not made a very heavy reduction in rates shortly before your license from the city was granted?

Ans. I think I answered that; they tried to make a reduction and did not in their first effort and then they did make a reduction.

308. But they did make a reduction before your license was granted?

A. I will not say whether it was before or afterwards, it was somewhere along there.

309. I will ask you if it is not true you made use of that fact before the council in securing your ordinance by way of showing the council what threats of competition had already done and what actual competition would do in the future?

A. I don't remember the wording of that paper exactly.

310. Were you consulted in the matter of the preparation of the ordinance?

A. Yes, I think I was or talked it over, it amounted to the same thing.

311. Who was present at any time when the subject of what the ordinance should contain was under discussion?

A. I don't remember; Mr. Little was always present, I think, and Mr. Miller was with us a good many times.

312. Did you know substantially what the provisions of
1138 the ordinance would be prior to the time it was prepared?

A. I think it was talked over with me.

313. Did Mr. Walsh also know what kind of an ordinance would be presented to the council?

Objected to as incompetent and immaterial.

A. I don't know.

314. What conversation, if any, did you have with him upon that question?

A. I don't remember of any, I may have had some.

315. Do you know whether or not a copy of the ordinance was submitted to him before it was presented to the city council?

Objected to same grounds as before.

A. I don't remember.

316. To what extent did Mr. Little participate in the work of preparing the ordinance in question?

A. I don't know whether it was prepared by him or by our attorneys.

317. Don't you know as a matter of fact that he was largely consulted with reference to the subject?

A. Not positively but he ought to have been as manager.

318. Mr. Little was then a resident of Peoria, was he not?

A. I think so; he was here at least intending to come here and make it his home.

319. Did you know when the ordinance was to be presented to the council?

Ans. Yes sir.

320. Who presented it, if you know?

A. I did know at the time but don't remember now.

321. What, if anything, had you to do personally with securing the passage of the ordinance through the council?

A. One member of the council asked me if the ordinance was granted if we intended to build a works, or was to sell out; I told him we would build the works.

1139 322. Do you know who that was?

A. Yes sir, it was Mr. Thode on the board of trade; he came to me himself—I didn't go to him—and asked if the works were to be built.

323. Were you present at any meetings of the city council during the time the ordinance was pending?

A. No, except I was at the meeting at which the ordinance was passed.

324. How many of the stockholders were there on that occasion?

A. I don't remember; there were three or four directors or stockholders.

325. Did you know it was to be passed at that meeting?

A. I knew it was coming up.

326. When was that meeting held, with reference to a change in the council resulting from a recent election?

A. It was early in the evening of a regular meeting and election night; it was the day of election.

327. State whether or not you were advised at or about the time you made an application for a license from the city of Peoria that the old company declared if a new company installed a plant in Peoria the price of gas would be put to 50 cents per thousand cubic feet?

Ans. I don't remember.

328. Do you remember hearing any discussion of that question at all?

A. I don't remember whether I heard it at that time or later.

329. Do you know of any change in your plans consequent upon any such threat upon the part of the old company?

Ans. No sir.

330. State whether or not, either through you or Mr. Little during all the time you were preparing to furnish gas, Mr. Walsh and Mr. Walton were kept advised of the situation in Peoria so far as pertained to gas questions?

Objected to as incompetent and immaterial.

1140 The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. Not through me; I presume Mr. Walsh was but not to my personal knowledge.

331. When, with reference to the time your company was ready to furnish gas, did the subject of rates come up for consideration?

A. I don't think we had taken it up.

332. At what price did you begin to furnish gas as compared with the price then charged by the old company?

Objected to as incompetent, immaterial and irrelevant.

A. I think it was 40 cents with a discount of 10 cents if the bill were paid within 10 days of the first of the month.

333. Is it your recollection that was the price at which your rates started?

Ans. That is my recollection.

334. For how long a period of time did those rates continue?

A. I should say from 4 to 6 months.

335. Who fixed those rates?

Ans. Mr. Little.

336. Do you know whether or not anybody else participated in the fixing of them?

A. I do not. I don't know whether I was home at the time; if I was it may have been talked over with me, but I don't remember.

337. State whether or not any other changes in rates were made prior to about August 31, 1900?

Ans. I could not state.

338. Do you remember the lowest rate fixed at any time during the year 1900 by your company and also by the old company?

A. No sir, I could not answer.

339. State whether you remember a change in the rate made about August 1, 1900?

Ans. I don't think I was home at that time; that is the time of year I am usually away.

340. Have you anything from which you can determine upon examination as to whether or not you were in Peoria at that time?

A. I think perhaps I could tell by reference to books.

1141 341. State whether or not you knew there was to be a change in the rate at or about that time?

A. If I was away, I did not.

342. Have you at this time any recollection of having been consulted with reference to the fixing of those rates about that time?

Ans. No sir.

343. What if anything had the board of directors of your company to do with the determination of the rates to be charged at that time or previously?

A. I think it was left largely with Mr. Little. I don't think it was taken up before the directory.

344. Look at page 8 of defendant's answer in this case now shown you and state whether or not you saw published in the Peoria press notices, pertaining to gas rates of your company and of the old company, of which that purports to be a copy?

A. I don't remember of seeing it in the paper.

345. Have you any knowledge whatever as to the circumstances under which any such publication was made?

Ans. No sir.

346. Have you any knowledge whatever as to the circumstances under which those rates were fixed?

Ans. No sir.

347. When did you for the first time learn that the rates had been fixed, as stated, and what were the circumstances under which that information came to you?

Objected to as incompetent and immaterial.

A. I don't remember.

348. State whether or not any official report of that action was made to you after your return to Peoria, if you were absent at the time?

A. There was no official report made to me.

349. State whether or not there is any record of it in the minutes of the meeting held by your directory so far as your knowledge extends?

(Objected to as incompetent and immaterial.)

1142 A. None I know of personally.

350. State whether or not at meetings of your board the minutes of the previous meeting are read and presented to the members for action?

Ans. They are.

351. Have you at this time any knowledge whatever of the circumstances under which the rate, to which your attention has been directed, as shown by the answer, was fixed?

Objected to as immaterial, irrelevant and already answered.

A. I don't remember.

352. Do you remember whether or not the subject has ever been called to your attention by any of the people with whom you are associated in this company?

A. I remember the rate being talked over.

353. State whether or not you have had any conversation with Mr. Walsh with reference to the rate mentioned?

Objected to as incompetent and immaterial.

A. I may have talked it over with him some.

354. What knowledge, if any, have you regarding any arrangement between your company and the old company which constituted the basis for fixing the rates to which your attention has just been directed?

Objected to as incompetent, immaterial and irrelevant.

A. I have no personal knowledge.

355. State whether or not within your knowledge any arrange-

ment was made with the old company by which the rates were to be advanced in conformity with the notices which were published in the Peoria press, copies of which purport to be incorporated in defendant's answer?

(Objected to as incompetent and immaterial.)

A. Not to my personal knowledge.

356. What knowledge or information have you upon that subject and from what source did you obtain it?

Objected to as incompetent and immaterial and in view of the former answer of the witness it plainly calls for hearsay.

1143 A. I don't remember; I presume from Mr. Little: I was away at the time.

357. State whether or not an arrangement was made shortly before the publication of those notices between your company and the old company to the effect there should be an advance made at the same time and on the same basis?

Objected to as incompetent and immaterial.

A. Not to my personal knowledge.

358. What knowledge or information have you upon that question and from whom did you obtain such knowledge?

Objected to on same grounds and also as calling for hearsay.

A. I was away in July, August and part of September and I presume, if I heard anything about it, I received the news from Mr. Little on my return home.

359. Do you know as a matter of fact that such an arrangement was made between the two companies?

Objected to as incompetent, immaterial and already answered.

The Master: I think that question has been substantially answered, still he may answer it again subject to the objection.

A. I do not.

360. Do you know how it happened that the same notices for the same advance were published in the same papers, on the same dates, and to take effect at the same time?

Objected to as incompetent, immaterial and a mere statement and conclusion of counsel.

The Master: Let the witness answer if he knows about it.

A. No sir, I do not.

361. What, if any, changes have been made in the prices charged by your company for gas since about September 1, 1900?

Objected to so far as it relates to any time since the commencement of this suit.

A. I cannot answer the question.

1144 362. To what extent, if at all, have you been consulted regarding rates since the establishment of the one referred to that went into effect about September 1, 1900?

A. I am away a great deal of the time, over half the time, and when I accepted the presidency of the company I did it under protest, as I would not be here enough to give it proper attention, and finally in accepting the office I did so without salary with the understanding I was not to give it my personal attention, that is to the details. That is as nearly as I can answer the question.

363. Do you know of any member of the board, other than Mr. Little, who has participated to any extent in the fixing of rates?

A. No sir.

364. Do you know what the rates charged by your company, since it began to furnish gas, have been as compared with the rates charged by the old company during the same period?

Objected to as incompetent and immaterial.

A. I cannot answer the question without reference to the records.

365. At the time you began to furnish gas, what portion of the territory you were occupying was also occupied by the old company?

Objected to same grounds.

A. I think about the same territory.

366. What is the fact at the present time, and what has it been since the time when you began to supply gas?

Objected to as incompetent, immaterial, and calling for matters occurring since the commencement of this suit.

A. We do not occupy as much territory as the old company did, but really in the same territory so far as our mains extend.

367. During the time you have been president of the complainant company, what knowledge have you had of the volume of gas furnished from day to day?

Ans. I have not kept myself posted.

368. During that time have you had any knowledge of
1145 the entire output in the city of Peoria?

Ans. No sir.

369. State whether or not that subject has come before the board of directors from time to time in its meetings?

Objected to as incompetent and immaterial so far as it relates to matters occurring since the commencement of this suit.

A. I have no remembrance of it coming before the board of directors.

370. During the period covered by the operation of your company in supplying gas, what knowledge have you had of its receipts and disbursements?

(Objected to same grounds.)

A. I have had no knowledge.

371. What knowledge has your board of directors had so far as you know?

Ans. None that I know of.

372. Do you know whether or not the volume of the output of your company increased from month to month up to September 1, 1901?

Objected to as incompetent and immaterial.

A. No, I do not.

372. Do you know to what extent, if at all, the output of your company has increased since September 1, 1901?

Objected to same grounds.

A. No, I do not.

373. Do you know what proportion of the gas supply of Peoria and vicinity was being furnished by your company about September 1, 1901?

(Objected to as incompetent and immaterial.)

A. No sir.

374. Do you know what proportion of the supply has been furnished by your company since that time?

Objected to as incompetent and immaterial and calling for matters that have occurred since the commencement of the suit.

A. I do not.

375. Have you any knowledge whatever at the present time as to the daily output of your company at Peoria?

1146 Objected to same grounds as last stated and further in connection with that question, and in view of the objections made, complainant's counsel advises the witness that under the law he is not compelled to answer such questions unless he sees fit.

The MASTER: I do not think that is an exception you have a right to claim for this witness, Mr. Ritcher; he is not your witness.

Mr. RITCHER: We will go before the court on it if the witness does not desire to answer.

The MASTER: You can do that unquestionably but I don't think you have any right to advise the witness called on behalf of the other side that he need not answer a question; that is a privilege the witness may claim for himself but it is not a right counsel on the other side can claim for him. I will say, however, I do not see any possible materiality in the question but, if counsel for defendant desires it to be answered, the witness may answer subject to the objection made.

Mr. ABBOTT: If he chooses so to do.

The MASTER: No sir, I do not add that; it would not be proper for me to.

The WITNESS: Shall I answer the question?

Mr. Abbott: Answer it if you choose to.

The Master: No I will not permit you to advise a witness cal on the other side not to answer questions.

The Witness: I think a question of that kind is a compa secret.

The Master: Do you decline to answer on that ground?

The Witness: I decline to answer.

(Mr. Tichenor:)

376. Is there any o r reason why you decline to answer?

Ans. No.

377. Have you any knowledge as to what your daily o
1147 put was on the first of September, 1901?

A. I have not.

378. Do I understand your answer with reference to the quest as to the present daily output to be that you refuse to make a statement whatever on that subject, or as to your knowledge up that subject?

A. Well, I should consider it a question I should not answer ev if I knew it.

379. Do you know the facts?

Ans. I do not.

380. If you do not know the present daily output what w your reason for refusing to answer the question?

A. Simply for the reason I do not think it is a question an offic has a right to answer; it might lead up to another question.

381. Do you know whether the Peoria Gas Light & Coke Co. the present time is manufacturing any gas at all?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know.

382. State if it is not a fact within your knowledge that at th present time the complainant company is furnishing all the gas tha is being consumed in Peoria and has been for several months la past?

Mr. Abbott: Complainant objects to the question as incompeten immaterial, irrelevant and calling for testimony on matters occu ring since the commencement of this suit, calling for evidence o matters which are not in issue here and cannot be properly made a issue and we advise the witness that he may answer the question o not, as he sees fit.

The Master: He may answer subject to the objection.

A. I don't know of my personal knowledge.

383. Do you know from anything that has been told yo
1148 that such is the fact?

Mr. Abbott: Complainant objects to the question on the sam grounds as before stated and also in view of the last answer o

the witness it calls for hearsay evidence and we give the same advice to the witness with reference to his answer.

The MASTER: He may answer subject to the objection.

A. I cannot answer it.

384. What do you mean by that answer?

A. I don't know except I have seen it in the Peoria papers.

385. How recently have you been to the plant of the old company?

A. I have not been in there for four or five years.

386. How recently have you been to the plant of your company?

A. I have been in the office but not to go through the works for four months.

387. How many station meters has your company in operation at the present time and how many has it had since it began its service?

Mr. ABBOTT: Complainant objects to the question as incompetent, immaterial, irrelevant, calling for evidence and occurrences since the beginning of this suit and not in issue here and we advise the witness that he may answer or—Interrupted.

The MASTER: No, I don't want you to do that.

Mr. RITCHER: We have a right to state anything we want in the records.

The MASTER: I don't want you to advise this witness that he need not answer, because I do not think it proper practice: I do not think counsel has any right to advise a witness, called on the opposite side that he need not answer a question. I know of no such rule of law.

Mr. ABBOTT: We are merely advising the witness that he can claim that privilege.

The MASTER: The witness has been advised before that he 1149 can claim that privilege if he sees fit.

A. I don't know.

388. Who, if anyone, since your company began furnishing gas and up to the present time, has audited the accounts?

Objected to as incompetent and immaterial.

A. No one to my knowledge.

389. If anything of that character had been done in Peoria would you from your official connection with the company know it?

A. Oh if I was taking an active part in the work, I should know it.

390. I mean as the facts exist?

Ans. Not necessarily so.

391. Within your knowledge, from the time your company first began work, in Peoria to the present time, have any accounts been audited in Peoria?

Objected to as immaterial and incompetent.

A. Not to my knowledge.

392. Where are all the office vouchers kept, if you know?
A. I only know from hearsay.

Mr. RITCHER: Counsel on the other side knows better than witness.

The MASTER: State if you know, Mr. Clarke.

A. In Chicago.

393. Where are the books of accounts kept, if you know?

A. At the Equitable Trust Co. in Chicago—well the daily boo of accounts are kept here.

394. The regular books of account of the company are kept whe

A. In Chicago.

395. Where is the company's financial account kept?

A. Their daily financial account is kept in Peoria; the gene financial account is kept in Chicago.

396. From what points are the company's bills paid at the pres time and what has been the fact since it first began in Peori

1150 A. The working accounts and expenditures here are pa by checks at present on the Commercial National Bank Peoria—no I think on the Merchants' national bank?

397. How long has that been the fact?

A. It may be the Merchants and it may be the Commercial, I a not positive.

398. How many different bank accounts does your company kee in Peoria?

Ans. I think there are two kept.

399. At what bank besides the Merchants?

A. The Commercial.

400. Is the account of the Commercial kept in the same name a the account at the Merchants?

Ans. I don't know.

401. Under how many different names is your company operatin in Peoria, if more than one?

Ans. I think only one.

402. Has it ever been operated under two names so far as you knowledge extends?

Ans. No sir.

403. State for how long a period of time your company has kep an account at the Commercial national bank?

A. I could not answer positively but I should say from four t six months.

404. Do you know the circumstances under which the account was divided?

(Objected to as incompetent and immaterial.)

The MASTER: I don't think it material but the witness may answer subject to the objection, if counsel desires to press it.

Mr. TICHENOR: I would like to have the question answered.

A. I don't know.

405. What had you to do with the opening of another account at the Commercial?

A. Nothing whatever; I think the question was asked if I had any objection to it.

406. How were you advised of the fact that another account had been opened there?

Ans. I think I was told.

1151 407. By some of your people?

Ans. Yes sir.

408. Who has authority to select the banks with which your company shall carry accounts in Peoria?

A. I think it rests in Mr. Little's judgment.

409. State whether or not your company carries large or small accounts in Peoria?

Objected to as incompetent and immaterial.

The MASTER: I don't think it material but he may answer it if you desire to press it.

Mr. TICHENOR: I would like to have it answered.

A. I don't know.

410. Have you ever had, or exercised, authority to sign checks on funds belonging to your company?

A. Yes, sir.

411. When and for what purpose?

Objected to as immaterial and irrelevant.

A. In the absence of Mr. Little, I have signed up checks for the pay roll two or three times and other checks that have been presented to me by the book-keeper.

412. On what bank or banks were those checks drawn?

A. Most of them were on the Merchants' bank, some of them might have been on the Commercial bank. I don't think I have signed a check for a year.

413. Do you know what determines the funds that shall be banked in the Merchants' bank and what shall be banked in the Commercial bank?

Ans. No, sir.

414. At the time your company was being organized, and during the pendency of the ordinance, before the council, what was the intention with respect to entering the Peoria territory for the purpose of competing with the old company for the patronage here?

Objected to as incompetent and immaterial.

1152 A. We were after business and expected to get it by giving better treatment and better gas and we were delivering our gas right into the houses of the people.

415. What was the intention of your company with respect to competing with the company already in the field?

Objected to same grounds.

A. That is a question that would arise as your business proceeded; you never can tell until you get started.

416. Was it your intention to compete with the old company for business in this territory?

(Objected to same grounds.)

A. It was.

417. What was the intention of your company, at the time already mentioned, with respect to the prices to be charged as compared with the prices then charged by the old company?

Objected to same grounds.

A. I don't remember of that question ever having come up.

418. Is it not true that at the time to which reference has been made substantially all of the citizens in the territory proposed to be occupied by your company were already being supplied by the old company?

Ans. Yes sir.

419. Look at Exhibit "19" now shown you and state whether or not it bears your signature?

Ans. Yes sir, that is my signature.

420. Who originated the idea of preparing a paper of that character for presentation to the city council?

Objected to as immaterial.

A. I don't remember.

421. In whose possession was it when you first saw it?

Objected to as immaterial.

A. I don't remember.

422. Do you know who presented it to you for your signature?

A. I don't remember; when I signed it; I did sign it, for my name is here in my writing, but I don't remember the time it
1153 was signed.

423. To the best of your recollection, had all the signatures in advance of yours been affixed at the time your signed it?

A. I have no remembrance of it at all.

424. State whether or not at the time you signed Exhibit "19" you believed the statement and representation which it contained were true?

Ans. Yes sir.

425. Did you at that time believe that if a license or a franchise were granted to your company by the city that the statements and representations embodied in that document would be carried out in good faith?

Ans. I felt so.

426. State whether or not at the time of signing it you knew that

the company would be able to carry out those representations in good faith and still get a good profit on the necessary investment?

Objected to as incompetent, immaterial, irrelevant and involving an assumption not in the statement itself.

A. I thought so.

427. For what purpose was that document prepared, signed and presented to the city council?

Objected to as incompetent and immaterial.

A. I think it was to show we meant what we said in it and its being signed personally made it stronger.

428. Was it or not for the purpose of assisting in procuring your franchise or license from the city of Peoria?

Objected to as incompetent and immaterial.

A. We thought it would help us, yes sir.

429. State whether or not at or about the time that paper was prepared and presented you had any conversation or discussion with any of your associates in this enterprise concerning it?

A. None that I remember of.

430. Do you remember whether or not that subject came
1153½ up for discussion subsequently?

A. Not in the directory; I talked it over with Mr. Little what we would do.

431. Did Mr. Little know that this paper had been prepared and presented to your knowledge?

Objected to as immaterial and incompetent.

A. I don't remember when I signed this paper, or whether Mr. Little knew anything about it or not of my personal knowledge.

432. State whether or not Mr. Little ever talked with you with reference to it?

Ans. I don't remember.

433. Was Mr. Little in Peoria at that time?

A. That I cannot answer.

434. To what extent, if at all, did Mr. Little participate in securing the passage of the ordinance to your company?

A. I don't know of any.

435. Was he also present on the occasion of its passage?

A. I think he was but I cannot answer positively.

436. What, if any, representations did Mr. Little ever make to you with respect to the prices at which gas could be sold in Peoria and yet make a reasonable profit on the investment.

Objected to as incompetent and immaterial.

The MASTER: I don't see the materiality of it but if you want the question answered it may be answered subject to the objection.

Mr. TICHENOR: I would like to have it answerd.

A. I don't remember to what extent we talked those matters over; we talked a good deal with reference to what delivering gas to the working people meant by delivering it into the houses; it meant a great deal to a laboring man if he has to pay for his service pipe from the street main into his house; we also talked over selling people fixtures at a very low price. In other words, we were to get the goods to our customers free of any cost to the burner. Mr.
1154 Little looked at things in a very liberal way.

437. Is it not true that during your preliminary arrangements with reference to getting into the Peoria territory, Mr. Little advised you as to the cost of gas to consumers in Peoria?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. I cannot answer the question.

438. Do you remember the fact that at one time the price of gas in Peoria charged by your company and by the old company was 30 cents per thousand feet?

Ans. Yes sir.

439. State if it is not true that during that time Mr. Little said to you that the profits of the old company at that price was a small one in as much as their cost of production was much greater than yours?

Objected to as incompetent and immaterial.

A. I have no remembrance of such a conversation.

440. Did you testify as to the time when the assessment of 20 per cent. on the stock was made?

A. I don't think I stated the exact time; I think I said 5 or 6 months after the papers were made out, but I think it was longer than that.

441. Will you ascertain that fact and report it to me later?

A. Yes sir.

Adjourned by agreement until Thursday, March 13, 1902, at 9:30 o'clock a. m.

1155 United States court room, Government building.

PEORIA, ILL., THURSDAY, *March* 13, 1902—9:30 a. m.

Present: Judge I. C. Pinkney special commissioner. Mr. E. C. Ritcher and Mr. W. T. Abbott appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendants.

Cross examination of Mr. SUMNER R. CLARKE by Mr. Abbott:

1. In connection with the petition of the stock holders of complainant company to the city of Peoria, which was referred to in

your direct examination as "Exhibit 19," you stated that you believed the statements and representations contained in it to be true. I will ask you to state what facts or reasons induced such a belief?

A. There was a progressive man placed at the head of the new company who understood the improvements that could be made, and service pipes put in from the main to the houses free, which to a poor man means a great deal, it enables poor people to get their gas into the house without any expense.

2. What had been the practice of the old company, if you know, in that regard, that is, with reference to charging consumers for service pipe from the street mains into the premises?

Objected to as immaterial, irrelevant and not cross examination.

A. They had always charged them with what seemed to be rather an excessive price.

3. State what if you know was the intention and purpose of your company with reference to charging for such service pipe?

A. We were to make no charge.

4. What has been the practice of your company in that regard since its organization up to the time of the commencement of this suit?

Ans. I think there has been no charge.

1156 5. To what extent was your belief in the statements and representations contained in "Exhibit 19" affected by your knowledge of Mr. Little's business capacity and good business ability?

A. Good business ability and gentlemenly treatment of customers is always appreciated.

6. State whether from your knowledge of Mr. Little's ability and experience you had reason to believe, and did believe, that there would be a radical change in the treatment of customers and method of doing business in the office of the company then proposed to be formed as compared with those prevailing in the old company?

Objected to as incompetent, immaterial and calling for a conclusion.

A. I believe so and it has proved I was right.

7. As whose representative, or in what official capacity, did Mr. Little act after the organization of the company in the construction of the plant and in other duties that you have testified to Mr. Little performed?

A. Mr. Little acted as general manager for the company.

8. I asked you that question for the reason I thought you possibly apprehended the purport of a question asked you by counsel for defendant when you replied that he was Mr. Walsh's representative?

A. That was an error; I should have said he was recommended by Mr. Walsh as a practical gas man, but represented the company.

9. State whether there was necessity for a practical gas man in

view of the other businesses in which the stock holders, or those proposing to become stock holders were interested?

A. There was.

10. State whether so far as you know in negotiations had by you or your associates in the preliminary organization of the
1157 company there were at any time any representations made that the stock was all to be owned and held by Peoria people?

A. No sir, there was not.

11. Was the purpose of the large subscription of stock in your name for the reason that there was any desire to withhold Mr. Walsh's name from the subscription list, or was it solely the reasons as testified by you in your direct examination?

Objected to as immaterial and incompetent.

A. There was no desire to conceal his name; the reason for the stock being taken in my name was, as I have testified on direct examination.

12. Were you interested in the firm of Clarke Bros. at the time of the purchase of the real estate from them on which the company's manufacturing plant was located?

A. I said yesterday the land was either in the name of Clarke Bros. or Clarke Bros. & Co., I didn't know which, but I was interested in neither at the time and never had been.

And further the witness saith not.

JOHN THODE, called on behalf of defendant, being first duly sworn according to law, deposes and says:

Direct examination by Mr. TICHENOR:

1. State your name, occupation and place of residence.

A. John Thode; am in the grain business on the board of trade and reside at 601 Third avenue, Peoria, Ill.

2. How long have you been a resident of Peoria?

A. 27 years.

3. How long have you been a grain merchant on the board of trade?

Ans. All the time since I have been here.

4. State whether or not you were a member of the city
1158 council at the time of the passage of the ordinance granting a franchise or license to the complainant company in this case?

A. I was.

5. Do you remember the occasion of the passage of that ordinance?

Ans. I do.

6. Do you also remember of its pendency in the city council for some time prior to its passage?

Ans. Yes sir.

7. State whether or not you knew personally the gentlemen who were interested in that company during the time it was pending before the council?

Ans. Yes sir.

8. How long had you known them?

A. Ever since I had been in Peoria.

9. State whether or not you had done business with any of them?

Ans. I had.

10. What was their standing and reputation generally in Peoria, both financially and for integrity at that time?

A. Very good so far as I knew in both respects.

11. State to what extent you inquired regarding the purposes of the gentlemen in making an application for a license and from what source you made those inquiries?

Objected to as incompetent and immaterial.

A. I inquired from the members of the board of trade and they all recommended it, they thought it was a straight upright transaction and from the papers that were furnished me at the time, while I was alderman and previous to the time I voted, I believed it was a good thing for the citizens and the gas consumers.

12. Look at the paper now shown you marked "Exhibit 19" and state whether you recognize the names appearing thereon as those of gentlemen who you understood were interested in securing the passage of the ordinance and who were the interested parties in the new company?

Ans. I know them all.

1159 18. State whether or not those were the gentlemen whom you supposed were financially interested in the new company?

A. They were to the best of my judgment.

14. What if any representations were made to you by any of the interested parties with respect to any interests in the company outside of Peoria. In other words, was it to be a Peoria enterprise, or was it to be made up partly of Peoria men and partly of outsiders?

(Objected to as incompetent and immaterial.)

A. I was told by these gentlemen, a number of them on this petition, that it was a purely Peoria enterprise, Peoria capital.

15. What if any influence did that fact have upon you in the course that you pursued with reference to supporting the ordinance in question?

(Objected to same grounds.)

A. In my judgment I thought it was my duty to support the ordinance because I thought it was for the benefit of the people of Peoria.

16. Who were the gentlemen, whose names you see upon Exhibit "19" that conversed with you beforehand with reference to what it was proposed to do?

A. Ex-Mayor Philo B. Miles; Mr. Ben Warren, Jr., and Mr. Sumner R. Clarke.

17. How long had you know- those gentlemen?

A. Ever since I became a member of the board of trade in 1878.

18. What statements or representations did they make to you with reference to the genuineness of the undertaking and of the benefits or advantages to accrue to the citizens by the organization and operation of a competing gas company in Peoria?

Objected to as incompetent and immaterial.

A. Ex-Mayor Philo B. Miles told me on the board of trade that he believed it was a straight undertaking, that the people of Peoria would be benefited by it, that it would give a great deal of
1160 employment to idel labor in this city and that he believed all the aldermen ought to vote for it.

19. What, if any, statement did he make to you with respect to the prices which the new company, if given a license, would make to gas consumers in Peoria?

A. I do not believe that he made any.

20. Did you converse with him on more than one occasion?

A. Only one occasion.

21. How frequently during those days did you come in contact with Mr. Miles?

A. Nearly every day; we were both members of the board of trade transacting business there.

22. What conversation, if any, did you have with Ben Warren, Jr., upon the same subject?

A. Ben Warren, Jr., told me that I could not afford to vote against that ordinance; that it was Peoria enterprise; that it was Peoria capital and he told me that the rate per thousand would never exceed 75.

23. State whether or not you in good faith believed the representations and statements which those two gentlemen made to you with reference to that subject?

Ans. I did sir.

24. State whether or not those statements had any influence with you as to the course you should take upon the supposed ordinance.

Objected to as incompetent and immaterial.

A. They has sir.

25. What if any conversation did you have with Sumner R. Clarke pertaining to the same question?

A. I had only one conversation with Sumner R. Clarke on the board of trade; he told me one day that the gentlemen interested in this enterprise were to put in an up-to-date plant, that the people would be benefited by it and that he never understood any-
1161 thing in the way of an enterprise but what it would be carried out in good faith.

26. Do you remember whether those conversations you had were before or after the petition Exhibit "19" was filed?

A. They were after the petition was filed.

27. Then all of those conversations were had with them while the ordinance was pending before the council?

Ans. Yes sir;

28. State whether or not you believed the representations made to you by Mr. Clarke on the occasion to which you have referred?

A. I believed just what he told me.

29. Did his statements have weight or influence with you in determining the course you should take with reference to that ordinance?

(Objected to as incompetent and immaterial.)

A. They did.

30. State whether or not during the pendency of the ordinance there were any conversations between yourself and other members of the council with respect to that subject?

(Objected to same grounds.)

A. In regard to that there was a good deal of talk among the members before council meetings and they were all favorable, so far as I can remember, for the ordinance.

31. Did they express themselves as to why they were in favor of its passage?

(Objected to same grounds.)

A. They did in a general way; the general purport of it was that we were to get competition, that we were to get a lower rate for the consumers of gas.

32. State whether or not you understood at that time, that this application for a license was made for the purpose of giving this company an opportunity to enter the Peoria field for competitive purpose in the gas business?

(Objected to same grounds.)

A. Yes sir, that is my understanding.

33. State whether or not that feature of the case was dis-
1162 cussed or talked about among the members of the council at that time.

Objected to same grounds.

A. It was.

34. What was their understanding so far as disclosed by those conversations with respect to that subject?

Objected to same grounds; also calling for a conclusion and hearsay.

A. It was generally understood that it would be for the benefit of

the citizens and that there would be no sell out, no combination, that it would be two separate companies.

35. State whether or not those facts had weight with you in determining the course you should take with reference to that ordinance?

(Objected to as incompetent and immaterial.)

A. They did.

36. You are familiar, are you, and were at the time the ordinance was pending, with the matters contained in "Exhibit 19"?

A. Yes sir.

37. State whether or not you believed at the time the ordinance was pending, and at the time you voted for it, that the statement and representations made in Exhibit "19" were true?

A. I did believe it thoroughly.

38. State whether or not at those times you also believed in good faith that if the new company were granted a franchise or license, as it was then asking, that all those statements and representations would be carried out with the city and citizens of Peoria in good faith?

Ans. I did believe it thoroughly.

39. State whether or not those facts influenced you in arriving at your conclusion to vote for the ordinance in question?

Objected to as incompetent, immaterial, calling for a conclusion and already asked several times.

A. It did have an influence with me, yes sir.

1163 40. You voted in favor of the ordinance when it was put upon its passage, did you?

Ans. Yes sir.

41. State whether or not during the pendency of the ordinance, and up to the time of its passage, anything came to your knowledge, either through members of the council or through the gentlemen purporting to be interested in the proposed ordinance, tending to show, or raise suspicions as to the entire good faith of the whole proceedings?

Objected to as incompetent, immaterial, calling for a conclusion.

A. None whatever.

42. State whether or not the conversations which you had with the gentlemen you have named on the board of trade, your discussion with the members of the council and the matters contained in "Exhibit 19," were the basis for the foundation of your judgment and your action with reference to the ordinance in question?

Objected to as incompetent, immaterial and already answered several times.

A. They were.

43. Outside of the conversation you had with Mr. Warren, with

reference to prices to be charged by the new company, did you have any talk with any of the people interested in the proposed new organization upon that question?

Ans. No sir.

Cross-interrogatories by Mr. ABBOTT:

1. You met Mr. Miles frequently on the board of trade and Mr. Warren also when this matter of the new gas company was under discussion?

Ans. Yes sir.

2. And occasionally you met Mr. Clarke?

A. Only once or twice that I remember of; he did not come on change often.

1164 3. Is it not a fact that about the time of the organization of this company, and prior to the passage of the ordinance, there was considerable talk among the board of trade men generally with reference to the new company?

Ans. Yes sir.

4. Was not it apparent to you that there was a considerable demand among board of trade men and other business men generally for the organization of such a gas company?

Ans. Yes sir.

5. Who of the persons, whose names appear in "Exhibit 19," told you at any time that the company was to be wholly a Peoria enterprise?

A. I think the three gentlemen I have named.

6. That was all the representation made to you in that regard?

A. I think that was all.

7. All those names that appear there as interested parties are Peoria people, are they not?

Ans. Yes sir, I know them all.

8. At the time the ordinance was pending, you understood that all of those people were interested to some extent in the complainant company, did you?

Ans. Yes sir.

9. So far as you know did not that interest on their part continue up to the time of the commencement of this suit in September, 1900?

Ans. I could not say as to that.

10. So far as you know, it did?

A. Yes, so far as I know, but I would not be positive.

11. Do you remember about when this conversation with Mr. Miles was had on the board of trade?

A. I could not swear to the exact date but I think it was something like two or three weeks before the passage of the ordinance; at that time we had only two meetings of the council a month.

12. Were the conversations with the other two gentlemen about the same time?

A. About the same time, within a week or so.

1165 13. Then the conversations, to which you have referred, with all three of these gentlemen, took place from two to three weeks prior to the passage of the ordinance?

Ans. Yes sir.

14. You also state that ex-Mayor Miles assured you it was a genuine proposition and would give employment to idle men and in that way would be a benefit to the city?

Ans. Yes sir.

15. Did it not, as a matter of fact, give employment to a good many men after the passage of the ordinance?

Ans. I believe it did.

16. And to that extent was a benefit, was it not, as was represented?

Ans. Yes sir.

17. Did you ever have more than one talk with Mr. Warren?

A. Only one that I remember.

18. And that was the one you have stated was two or three weeks prior to the passage of the ordinance?

Ans. Yes sir.

19. The company at that time had not a erected a plant had it?

A. No sir.

20. And was not engaged in the manufacture or distribution of gas?

Ans. No sir.

21. The substance of your conversation with Mr. Clarke, as I understand it, related to the genuineness of the enterprise?

A. Yes sir.

22. And Mr. Clarke assured you that a works would be erected?

A. Yes sir.

23. When did you first learn that there was any outside capital interested in the complainant company?

A. I never knew anything about it.

24. So far as you know, it is a Peoria enterprise today, is it not?

A. I don't know anything about it; it is a matter I have no business in.

1166 25. When the matter was under discussion generally among the board of trade men and other business men, was it a subject of conversation at those times with regard to the old company, that its patrons were treated unfairly or discourteously, or were charged for service pipes and charged excessive prices for them?

A. I don't remember that part.

26. The talk then, as you remember it, was in the line of a general demand for such a new company as was proposed to be formed?

A. Yes sir.

Re-direct interrogatories by Mr. TICHENOR:

1. State whether or not the gentlemen expressing themselves on 'change to the effect that there ought to be a competing company

gave any reasons to you why the matter ought to be aided and why you ought to support it?

Objected to as incompetent, immaterial and not proper re-direct.

The MASTER: I don't think it competent unless confined to the gentlemen who were then interested in the company; I don't think it makes any difference what outsiders might say ob the subject, but I cannot exclude the testimony and if an answer to the question is insisted upon the witness may answer subject to the objection.

Mr. TICHENOR: I would like to have the witness answer it.

A. The gentlemen stated that we ought to have two companies, that the charges of the old company were too high and that they believed the new company ought to be encouraged by every alderman in the city council.

And further the witness saith not.

1167 W. H. CARROLL, called on behalf of defendants, being first duly sworn according to law, desposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. State your name and residence.

A. W. H. Carroll; No. 115 Saratoga street, Peoria, Ill.

2. How long have you lived in Peoria?

A. A little over 34 years.

3. What business are you engaged in?

Ans. Shoe business.

4. Were you a member of the city council of the city of Peoria during March and April, 1899?

Ans. Yes sir.

5. Do you remember of the pendency before the council at that time of an ordinance granting to the Peoples Gas & Electric Company the right to use the streets of the city of Peoria?

A. Yes sir.

6. Look at "Exhibit 19" now shown you and state whether or not you knew, at the time of the pendency of this ordinance before the council, the gentlemen whose names appear there?

A. Yes sir, I know some of them.

7. Were you acquainted with the financial reputation of those gentlemen in the city of Peoria?

Ans. Only by reputation.

8. Who among that list of names did you know?

A. I was personally acquainted with Sumner R. Clarke, Ben Warren, Jr., C. C. Clarke, Robert D. Clarke and Theodore J. Miller.

9. Did you know the financial reputation of Henry Sandmeyer, Sr.?

Ans. Only by reputation.

10. What was the reputation of those gentlemen as to being men of great or small wealth?

A. They were supposed to represent great wealth.

11. What was their reputation for business integrity in t of Peoria at the time this ordinance was pending?

A. Very good.

1168 12. Did you at the time of the pendency of this ord before the council have any conversation with any o gentlemen relative to the passage of that ordinance?

A. With two of them, Robert D. Clarke and Theodore J. that is all I remember of.

13. What, if anything, did Robert D. Clarke state to yo reason why you should vote as you did upon the considera that ordinance?

(Objected to as incompetent and immaterial.)

A. Mr. Clarke claimed at the time that if the ordinan passed the company would invest from $500,000 to pr $1,000,000 in the city and during the hard times we were at that time would give a great amount of employment, esp to the people in my part of the city who were seeking empl at that time; he also said it would be a Peoria enterprise, senting Peoria capital and would certainly give the people of the advantage of their personal acquaintance.

14. Was anything said in the course of that conversation r to the new company entering into the field as a competitor Peoria Gas Light & Coke Co.?

A. I don't remember of that with Mr. Clarke.

15. Was anything said in that conversation with reference rates that would be charged by the new company as compa the rates that were charged at that time by the old company

Objected to as incompetent and immaterial.

A. Nothing further than he said competition would gi people the benefit.

16. State whether or not the gentlemen, whose names upon Exhibit "19," were all residents of Peoria at the tim ordinance was pending before the council?

A. I could not say as to whether they all were or not; s them, I can say, were residents. The Clarkes were res

1169 also Ben Warren, Theodore Miller, Philo B. Miles and Luthy. The others I know of but could not say as t residence.

17. How long had you known the individuals you have t you did know whose names appear upon that list?

A. I presume I have known Sumner R. Clarke 25 years known Mr. Warren personally probably 5 years and by repu about 10 years; have known Henry Sandmeyer, Sr. by repu probably 15 years. Knew C. C. Clarke in his lifetime abo years. Have known Philo B. Miles about 10 years.

18. Did you know George Littlewood?

A. Only by reputation.
19. How long have you known him by reputation?
A. Probably 10 years.
20. How long have you known Ferd Luthy?
A. By reputation about 10 years.
21. How long have you known Theodore J. Miller?
A. By reputation about 20 years, have been personally acquainted with him about 10 years.
22. Did you have any conversation with Mr. Miller relative to the passage of this ordinance?
Ans. Yes sir.
23. What, if anything, did Mr. Miller represent as a reason why you should vote as you did upon the passage of this ordinance?

Objected to as incompetent and immaterial.

A. Mr. Miller claimed the old company had a perpetual right in the city and the city had no control over it as it existed at that time and the only relief the people could get from the old company would be through competition, stating that competition would regulate prices and give the people better service, would take the independence away from the old company and divide the business which would create a better feeling among the people; he
1170 also said it being Peoria capital, Peoria labor would receive the benefit of the capital.
24. What, if anything, did Mr. Miller say to you during the pendency of this ordinance as to what competition had done or would do on account of the passage or the building and operating of a competing plant by this company?

Objected to as incompetent and immaterial.

A. He claimed competition was the life of trade and a new company would make the old company sell gas for what it could be sold for.
25. Were there any representations made by either of the gentlemen with whom you had these conversations with reference to who was going to represent the capital that was to be invested in this new company?

(Objected to as incompetent and immaterial.)

A. The citizens of Peoria.
26. Who made that statement to you?
A. I believe both Mr. Clarke and Mr. Miller.
27. What effect if any had the representations made by Mr. Clarke and Mr. Miller in your arriving at the judgment you did in regard to the passage of that ordinance?

Objected to as incompetent and immaterial.

A. It had considerable effect; I certainly always favor home capital.

28. Did you believe at the time those representations were made to you by Mr. Clarke and Mr. Miller that they were made in good faith and would be carried into execution by the new company?

A. Yes sir, I did.

29. What effect, if any, did the financial standing and business integrity of the gentlemen who were stockholders of that company have upon you in influencing you in the course you took with reference to the passage of this ordinance?

1171 Objected to as incompetent and immaterial.

A. Why, I never questioned their financial standing which certainly had influence enough on me to lead me to believe they would do just as they said.

30. Look at "Exhibit 19" now shown you and state whether or not during the time this ordinance was pending before the council "Exhibit 19" was presented to the members of the city council for their consideration?

(Objected to same grounds.)

A. To the best of my recollection the ordinance was passed the day of the filing of this petition.

31. Did you see that petition previous to casting your vote upon the passage of this ordinance?

Objected to as immaterial.

A. I don't remember of seeing it before the day of the passage of the ordinance.

32. State whether or not you belived at the time the representations contained in Exhibit 19 were made to the city council that they were true?

(Objected to as incompetent and immaterial.)

A. To the best of my knowledge, I did.

33. Did you believe that the people, whose names are signed to that petition, were capable of carrying out the representations therein contained?

Ans. I did.

34. State what, if any, effect those representations contained in "Exhibit 19" had upon your action in regard to the passage of this ordinance?

(Objected to same grounds.)

A. I certainly believed what the petition contained were facts and would be carried out to the letter.

35. Was there any discussion among the aldermen relative to the passage of this ordinance during the time of its pendency before the city council?

Objected to as incompetent and immaterial.

1172 A. Yes sir, there was considerable discussion.

(The MASTER:)

36. Did you hear it and take part in it?
A. Yes sir, I was present on several occasions.

(Mr. MANSFIELD:)

37. What, if you remember, was the general character of the discussions had at that time between the aldermen of the city council?

(Objected to same grounds.)

A. It was the opinion of a great majority of the aldermen that the ordinance should be passed by all means and as soon as possible so work could be commenced and completed as far as possible during that season.

38. Was anything said in those discussions between the aldermen relative to the prices of gas charged by the old company and the effect the passage of this ordinance would have upon those prices?

(Objected to as incompetent and immaterial.)

The MASTER: Of course, it is not competent now but it may become competent; the witness may answer subject to the objection.

A. The opinions of some of the alderman were that there should be a stipulated price placed in the ordinance but the opinion of the majority was that the ordinance should be left open for competition to regulate the price.

39. What reason did they give, if you know, why no maximum price should be provided for in the ordinance?

A. I don't remember of the alderman giving any specific reasons.

40. What reasons were given by various aldermen as to why this ordinance should be passed?

Objected to as incompetent, immaterial and already answered.

A. To create competition, have a competitive company and give the people better service.

41. Was anything said in those discussions as to what effect a competing company would have upon the price of gas in the city of Peoria?

(Objected to same grounds.)

1173 A. The opinion was unanimous we would get cheaper gas

Cross interrogatories by Mr. ABBOTT:

1. You have referred several times on direct examination to conversations with Mr. Clarke, I presume you refer each time to Robert D. Clarke?

Ans. Yes sir.

2. You never had any talk with Sumner R. Clarke about it?

A. Not that I know of.

3. Do you remember where your conversation with Robert Clarke took place?

A. I could not say the exact location; it may have been in the council chamber and it may have been elsewhere.

4. When did it take place?

A. It was during the pendency of the ordinance, probably two or three weeks before its passage—maybe a week.

5. Your best recollection is it took place in the council chamber or in the city hall?

A. I should say close to the city hall, somewhere around there.

6. Mr. Clarke spoke to you at that time of the fact that the company proposed to make a large investment and give employment to the then idle labor in Peoria, did he?

Ans. Yes sir.

7. What was your occupation at that time and for some time previous?

A. At that time I was in the saloon business; prior to that time I had been in the boiler business.

8. You are then to some extent familiar with the cost of iron structures generally, such as gas pipes and the iron work that goes into a manufacturing plant?

A. I have a general idea of them.

9. Did you observe from time to time after the ordinance was passed the work as it progressed either at the manufacturing plant or as pipes were being laid in the streets?

1174 Objected to as immaterial and not cross examination.

The MASTER: I don't think it proper cross examination.

Mr. ABBOTT: I propose to show that the representation made as to the investment of large capital was true and simply asked this preliminary question to show that the witness had reasonable knowledge of those things. It ought to be competent for us to show that representation was well grounded.

The MASTER: If it is asked with that ultimate object in view, it is competent and the witness may answer subject to the objection.

A. Yes sir.

10. Is it not a fact from your observation and from your knowledge that a large investment was put into that manufacturing plant and distributing system?

(Objected to same grounds.)

A. Yes sir.

11. And is it not a fact that employment was given to quite a large number of laborers for a considerable time during the progress of the work?

(Objected — same grounds.)

A. Yes sir.

12. So those representations were carried out and your belief in them well founded as subsequent events proved?

A. So far as the expenditures were concerned, yes sir.

13. Do you remember where you had your conversations with Mr. Miller?

Ans. Mostly at the city hall.

14. And they covered about what time with reference to the passage of the ordinance?

A. Probably 60 days prior to the passage of the ordinance.

15. Do you remember the last talk you had with him before the passage of the ordinance and when it was?

A. I think it was after supper on the day the ordinance was passed but am not positive.

16. Do you remember what was said in that particular conversation as distinct from the others?

1175 A. Not exactly; I think he asked me if I favored the passage of the ordinance that night at the meeting.

17. Then it was in some of the previous conversations you had with him that the talk was had with reference to competition, etc.?

Ans. Yes sir.

18. As I understand your testimony, it is that the statements of Mr. Miller at that time were that having a new company here would give the people the benefits of competition, or words to that effect?

Ans. Yes sir.

19. You testified with reference to the general discussion among the aldermen prior to the passage of the ordinance and the benefits that would accrue to the people from it and you referred to the improved service. Did you mean by that that the talk was there would be improved service in the way of treatment of customers handling of complaints, etc., as compared with the practice of the old company?

Objected to as not cross-examination and incompetent.

A. Yes sir.

20. Was there not considerable talk among the aldermen as to the character of the service then being rendered by the old company?

(Objected to same grounds.)

A. Yes sir.

21. And it was the opinion of the aldermen that the granting of an ordinance to a new company would result in giving the people better service in those respects?

Ans. Yes sir.

22. Do you know of your own knowledge what the practice of the old company was as to charging consumers for the service pipe from the street main into the premises of the consumer?

Objected to as immaterial and not cross-examination.

A. Not of my own knowledge, I don't know anything about it.

23. Was that matter under discussion at the same time as the other matters?

Ans. Yes sir.

1176 24. Did you in the course of that discussion learn what that practice was?

A. Not as to what the expense would be but it was conceded the old company always charged for the service pipe.

25. Do you know what the proposal of the new company was at that time and what its practice was up to the time of the commencement of this suit with regard to charging customers for such service pipe?

Objected to as immaterial, incompetent and not cross examination.

A. As I understood it the services were to be put in free.

26. Was not that one of the benefits it was claimed would accrue to the consumers of gas by the granting of this ordinance?

A. It was a benefit to be received from the passage of the ordinance, yes sir.

27. You understood that the persons whose names are signed to Exhibit "19" were interested in the new company at that time, did you?

Ans. Yes sir.

28. So far as you know, has that interest continued up to the month of September 1900, at the time this suit was commenced?

A. So far as I know, yes sir.

29. When did you first learn that there was any outside capital invested or involved in this enterprise in any way whatever?

A. I don't know anything about it.

Re-direct interrogatories by Mr. TICHENOR:

1. Do you at the present time know the holdings of stock in the complainant company of the people whose names are appended to "Exhibit 19"?

Ans. No sir.

2. So far as you know, have any of them any interest in it whatever?

Ans. I don't know whether they have or not.

(Mr. ABBOTT:)

3. Di- you know at the time what their respective holdings
1177 were?

Ans. Not the amounts.

(Mr. TICHENOR:)

4. But you did know they were the people interested?

A. They were the people represented to be interested, yes, sir.

And further the witness saith not.

STEPHEN WOLSCHLAG, called on behalf of defendant, being first duly sworn according to law, testifies as follows:

Direct interrogatories by Mr. TICHENOR:

1. State your name, occupation and residence?

A. Stephen Wolschlag; coal business; 517 Hecox St., Peoria, Ill.

2. How long have you been a resident of Peoria?

A. I have lived around Peoria and in the city all my life—44 years.

3. How long have you been engaged in the coal business?

A. About 22 years.

4. All the time in Peoria?

Ans. Yes sir.

5. Is your business a wholesale or retail business?

A. Wholesale at present; I have been in the retail and wholesale both, but was only in the retail business about one year.

6. Are you also a mine operator?

Ans. Yes sir.

7. And have been for many years?

Ans. Yes sir.

8. Are your mines situated in the vicinity of Peoria?

A. Yes in Peoria county.

9. State whether or not you were a member of the city council at the time of the passage of the ordinance granting to complainant company a license or franchise to use the streets and alleys of the city for the purpose of constructing a gas system?

A. I was.

10. Do you remember the fact of the presentation and the 1178 passage of the ordinance in question?

A. I remember the fact that it was passed, certainly.

11. Do you remember in a general way about how long the ordinance was pending?

Ans. I don't remember that.

12. Were you in the city of Peoria during all the time it was pending?

Ans. Yes sir.

13. Did you attend all the meetings of the city council during that period?

Ans. I did.

15. State whether or not you were a member of any committee having in charge the consideration of that ordinance?

A. I was chairman of the street and alley committee to which the ordinance was referred.

16. How many meetings did you- committee have for the purpose of considering the ordinance before your final report upon it?

A. I think only two.

17. Do you remember when those meetings were held with reference to the time the ordinance was put upon its passage?

A. I could not give the dates but they were generally held the night before each council meeting or sometimes in the afternoon. The rule was this way, any time we would call a meeting, say a member could attend tomorrow afternoon but did not want to attend tomorrow night, we would agree to meet whenever the committee desired, but it was always within a day of the meeting of the council.

18. Were those two meetings you speak of one or more weeks apart?

Ans. They were probably two weeks apart; at that time sometimes the council meetings were three weeks apart instead of two the council met twice a month and I don't remember whether it was just two weeks apart or three weeks.

19. Were you present at the time the ordinance was referred to your committee?

Ans. Yes sir.

20. What if any investigation or inquiry did you make
1179 with reference to the subject proposed by the ordinance prior to the holding of your first committee meeting?

A. Not any excepting in the way of meeting people on the street—business men that I would come in contact with would ask what we were going to do with that petition.

21. I don't care to ask what those expressions of opinion were. At the time of the presentation of the ordinance did you know the gentlemen who purported to be interested in it?

A. Yes sir I had heard of them all and knew some personally.

22. How long in a general way had you known some of the gentlemen who were interested in that enterprise?

A. I have personally known Sumner R. Clarke for 15 years; have personally known Theodore J. Miller about 14 or 15 years; have known Philo B. Miles 10 or 12 years; I know Henry Sandmeyer; I didn't know Mr. Littlewood personally but knew of him; I also knew Charles C. Clarke, Robert D. Clarke and Chauncey Clarke.

23. Did you know Mr. Luthy?

Ans. I knew of him.

24. What was the standing of those gentlemen in Peoria at that time both with reference to financial responsibility and business integrity?

Ans. Good.

25. State whether or not prior to the first meeting of your committee you had any interviews with any of the gentlemen interested in the new organization with respect to the ordinance?

A. Not any excepting with Mr. Miller; Mr. Miller wanted to know when we were going to get ready to report on it, that was all.

26. Who were your associates on that committee?

A. Messrs. Gorman and Dechman.

27. Who, if anyone, was present at your first meeting outside of the members of the committee?

A. Sumner R. Clarke and Theodore J. Miller.

28. Do you know under what circumstances they came to
1180 be present at that time?

A. Well, they wanted to know when we would have a meeting and one day I met Mr. Miller on the street and told him we were going to have a meeting at such a time at two o'clock; he said he would like to come before the committee and I told him we would like to have him, so when we had the meeting they were there.

29. To what extent did those gentlemen, or either of them, participate in the proceedings before your committee at that time?

A. There were different questions asked pro and con, of course; Mr. Miller was the spokesman and Mr. Clarke sanctioned what Mr. Miller said—said it would be carried out.

30. What if any statements or representations did Mr. Miller then make to your committee with respect to the proposed enterprise?

Objected to as incompetent and immaterial.

A. Mr. Miller simply gave an outline of what the old gas company had been doing, overcharging people and one thing and another, and we asked him what they proposed to do, and he said they would certainly cheapen gas for the city and citizens of Peoria, that competition itself would bring that if nothing else would, and the chances might be that the price of gas might be cut in two.

31. Did you know at that time what prices were being charged by the old company?

A. I did not only from hearsay, I never used any gas myself.

32. What if anything did Mr. Miller then state with reference to the intention of his company to become a competitor in the Peoria field in the furnishing of gas?

Objected to as incompetent and immaterial.

A. They simply said if they got this franchise they would build a plant of their own, lay their mains where they could get the frontage and do it at once as fast as material could be got.

1181 33. Did he or did he not also state to you they proposed to compete with the old company in supplying gas to Peoria and its citizens?

(Objected to same grounds.)

A. Yes sir that was one of the questions which came up in the committee, whether they would build a plant or not if we granted them a franchise and he said they certainly would build a plant and enter into competition for the business.

34. What if any representations were then made with respect to entering into a combination with the old company or selling out or buying out?

(Objected to same grounds.)

A. Well that was talked of, but I could not remember the words

spoken; there was a good deal of that pro and con in the committee, about the old company buying them out and they gave us assurances that they would not sell out to them but the words and language used I could not remember.

35. What part, if any, did Mr. Clarke take in the conversation?

A. Not any so far as he personally was concerned except when a question was asked Mr. Miller Mr. Clarke would sanction what Mr. Miller said was so.

Complainant objects to the foregoing answer as stating merely the conclusion of the witness and moves the court to exclude it.

36. State whether or not during any of that time Mr. Clarke antagonized anything Mr. Miller said with reference to the intentions of the company?

Objected to as incompetent and immaterial.

A. No sir.

37. Did all the members of your committee, to a greater or less extent, participate in the conversation and proceedings?

A. I think Mr. Gorman was absent at one of the meetings. Mr. Gorman generally attended the committee meetings when we
1182 had any but he did not seem to be very favorable towards a new gas company I didn't think, although I never asked him.

38. Did you know at that time what Mr. Gorman's business was?

A. Not any more than I knew he worked for the Peoria Gas Light & Coke Co. and had for a number of years.

39. At that time how long had you been a member of the city council?

Ans. I was going on my second year.

40. Did you know how long Mr. Gorman had been a member?

A. Mr. Gorman had served two terms in the council before I went in, I think.

41. Who, of the gentlemen interested in the new company, were present at the time of your second meeting, if anyone?

A. Nobody was before the meetings, at either of them, except Mr. Miller and Mr. Clarke.

42. Were they also present at the second meeting?

A. Yes sir.

43. What transpired on that occasion with reference to this particular subject?

Ans. About the same as the first talk pro and con about what they would do.

44. State whether or not you believed the representations and statements made by those gentlemen to your committee on those two occasions to be true and that if the ordinance or franchise were granted to their company those representations would be carried out in good faith?

Ans. I had every reason to believe so.

45. State whether or not the statements and representations made

to your committee by those two gentlemen constituted the foundation of the report which your committee made to the city council upon that question?

(Objected to as incompetent and immaterial.)

A. Yes sir.

46. You did make a report to the city council from your committee?

Ans. Yes sir.

1183 47. What representations or statements if any were made to your committee other than those to which you have referred which influenced your judgment in making up, or in assisting in making up, the report of your committee to the city council upon that ordinance?

(Objected to as incompetent and immaterial.)

The MASTER: I don't think it competent unless it is confined to the gentlemen who were interested in the company.

Mr. TICHENOR: I mean the people who were interested in the company.

The MASTER: The witness may answer.

A. I don't think there was a man that ever mentioned anything to me about it except those two gentlemen who were interested in the company.

48. What if any representations did they make to you with respect to the source from which the capital for the enterprise was to come?

Objected to as incompetent, immaterial and irrelevant.

A. Well, they made several statements as to that, but I don't remember now what they were, and I don't think I could repeat them as they were said anyway; it is too long ago for me to remember those statements.

49. What was your understanding, from your conversation with them, with reference to the proposed enterprise being purely a Peoria matter?

Objected to as incompetent, immaterial, already answered.

A. Well they simply showed us the people that were going into the business and claimed they could make gas a great deal cheaper than what the people were paying for it and that they expected to build the plant; further than that they never told us there was no outside capital going into it or anything of that kind that I recollect of.

1184 50. State whether or not the names of the people who were to be interested, as they explained to you, were the same as those appearing on Exhibit "19"?

A. They were about the same and as many more as wanted to go into it of Peoria people; they told us that.

51. State whether or not Exhibit "19" was before the members of the council prior to the passage of the ordinance in question?
A. Yes sir.
52. Are you able to state from recollection about how long before the ordinance passed you first saw that exhibit, if you saw it at all?
A. I don't remember how long it was; I know it was not a great while though.
53. Are you able to state when you first saw it with reference to the date it bears?
Ans. The first time I saw it was when it was referred to our committee and I took it out of the committee's box.
54. Was that at the same time the ordinance itself was referred to your committee?
Ans. Yes, that was at the same time.
55. State whether or not you, and the other members of your committee, had that document before you during your deliberations?
A. Yes sir; and also the ordinance.
56. State whether or not you, as a member of that committee, in arriving at your judgment believed the statements and representations of that petition to be true?
Ans. I did.
57. State whether or not you believed, that if the ordinance were granted to the complainant company, as then being asked, the representations made in that exhibit would be carried out in good faith?
Ans. I certainly did.
58. What, if any, influence did those statements and representations have upon you in determining the course you should
1185 pursue in arriving at your judgment as to the report your committee should make and the report they did make?
Objected to as incompetent and immaterial.
A. In the first place I understood that the old company had a perpetual franchise and unless we had some relief by getting another company in here, I understood, and really felt so myself, that we certainly would not have anything different from the old company unless we had some competition, and we ought to have it. That is the way I felt about it and that is why I made the report.
59. What influence had the statements and representations contained in Exhibit "19" in determining the report you should make and did make to the council?
Objected to same grounds.
A. Because I believed the statement would be carried out.
16. Did those statements and representations influence your judgment or not?
(Objected to same grounds.)
A. Not a bit except we expected to get a new gas plant.

61. And you believed them to be true and they would carry them out in good faith?

(Objected to same grounds.)

A. Yes sir.

62. Who did those gentlemen, whose names you have mentioned as being present at the time of your committee meetings, state would be benefited by competition of the character which they proposed to introduce into the Peoria territory?

Objected to as incompetent and immaterial.

A. The gas consumers of Peoria in general.

63. You voted in favor of the passage of the ordinance granting the company a franchise, did you?

Ans. Yes sir.

64. Upon what was your vote based?

Objected to as incompetent and immaterial.

A. Why on the same opinion that the report was based on; I thought it would be a good thing for the city of Peoria.

1186 Cross interrogatories by Mr. ABBOTT:

1. There was considerable talk on the streets and among business men with reference to this ordinance while it was pending before the council, was there not?

Ans. Yes sir.

2. And did it not appear from that talk in a general way that there was a considerable public demand for the passage of this or some similar ordinance?

Ans. Yes sir.

3. Did you have any talk with any of the stockholders, or those interested in the company, outside of those two committee meetings about which you have testified, which Sumner R. Clarke and Theodore Miller attended?

Ans. No sir.

4. Do you remember when that first meeting was held?

A. No, I don't remember the date.

5. About when was it with reference to the passage of the ordinance?

A. It would not be over two or three weeks before it, that the first meeting was held, and the last meeting of the committee was held on the day the ordinance was passed or the day before.

6. You don't remember exactly whether it was on the same day or the day before?

Ans. No I do not.

7. Was the ordinance passed at the same meeting at which your report was presented?

A. I am not certain about that but think it was; I am not cer-

tain whether it went over under objections or not; if it did it w
not passed until the next regular meeting.

8. To refresh your recollection, I will ask you if it did not, i
fact, go over on the objections of Mr. Gorman and Mr. Powell?

A. Come to think about it, I believe it did go over one meetin

9. But the two meetings at which Mr. Clarke and Mr. Miller wer
present was before the ordinance was presented?

1187 A. Yes sir.

10. Have you any independent recollection of the date a
which the ordinance was passed?

Ans. I have not.

11. Are you sure the paper marked "Exhibit 19" was not filed
or presented to the council on the same day on the evening of which
the ordinance was passed?

Ans. I think not.

12. Both these committee meetings were held in your committee
room in the city hall?

Ans. Yes sir.

13. I think you stated as a part of the talk there that there was a
good deal said with reference to the old company overcharging peo-
ple or the practice of the old company of charging the consumer for
service pipe from the main into his premises as well as the rates
charged for the gas itself was talked about?

A. Well, it was talked of, as I stated before, but I could not recol-
lect the language used.

14. But that was the subject of discussion at that time?

A. Yes sir.

15. Was not a considerable portion of that discussion devoted to
questions with reference to whether if an ordinance were granted
the company would actually go ahead, build a plant and operate it?

Ans. Yes sir.

16. They did build a plant, did they not?

A. Yes sir, they did or somebody else did, the plant was built,
anyway.

17. Was that a meeting at which this matter of competition as to
rates was discussed?

A. It was practically the same thing at all the meetings we had
about it; we talked about the same things over and over.

18. And the statement with reference to that, as I understood
you, were that the competition would naturally reduce the price to
some extent?

Ans. Yes sir.

1188 19. At that time the company had not commenced the
manufacture or distribution of gas?

Ans. No sir.

20. And they had no plant installed or in operation?

A. No sir.

31. Did either Mr. Miller or Mr. Clarke, in either of those meet-
ings, make any promise as to the price which their company would

charge for gas outside of their representations, opinion or belief that competition would naturally reduce the price of it?

A. Well, not any more than they told us there certainly would be cheaper gas, that is, Mr. Miller did, and the chances were gas could be procured for half the price it was at that time but he did not say they would do it; it was talked about in a general way.

22. Then the further talk was the insistence of the committee, as I understand it, that this was a *bona fide* application, that they would build a plant and not sell out to the old company?

A. Yes, that was the idea.

23. As I recollect your testimony, the matter as to whether it was to be Peoria capital exclusively or a general stock company was not discussed?

A. No, except they came in and said these are all Peoria people and business men going into it.

24. Referring to the list of people they had?

Ans. Yes sir.

And further the witness saith not.

ROBERT KELLERSTRASS, called on behalf of defendant, being first duly sworn according to law, deposes and says:

Direct examination by Mr. MANSFIELD:

1. State your name and residence?

A. Robert Kellerstrass, Peoria, Ill.

1189 2. How long have you resided in Peoria?

A. Over 41 years—all mi life.

3. What business are you engaged in at the present time?

A. I am in no business at present except city oil inspector.

4. Were you a member of the city council during March and April, 1899?

Ans. Yes sir.

5. Do you remember anything about the pendency of the ordinance before the city council granting to the People's Gas & Electric Co. the right to lay its mains in the streets of the city of Peoria?

Ans. Yes sir.

6. Look at the paper now shown you marked "Exhibit 19" and state whether or not you knew at the time of the pendency of that ordinance the gentlemen whose names appear upon that document?

A. Some of them.

7. Who did you know personally on that list?

A. Theodore Miller and Henry Sandmeyer; those are all I was personally acquainted with, the other gentlemen on the list I knew by reputation.

8. What was the financial reputation of Henry Sandmeyer in the

city of Peoria at the time this ordinance was pending before the council?

A. So far as I know, he was one of the best financial men in the city.

9. What was the reputation of Sumner R. Clarke in the city of Peoria as to his financial ability?

A. Good so far as I know; he was considered to be a man of wealth.

10. What was the financial reputation of Ben Warren, Jr., in the city of Peoria?

A. In my estimation it seemed to be equal to any of the others.

1190 11. Did you know the financial reputation of Geo. H. Littlewood?

Ans. Not any more than he was interested in a bank.

12. Did you know anything about the financial reputation of Ferd Luthy?

Ans. About the same as the balance of them; they all seemed to be up in financial standing.

13. What do you mean by the balance of them, those you have testified about?

Ans. Yes sir.

14. What was the financial reputation of C. C. Clarke in the city of Peoria at that time?

Ans. It seemed to be good.

15. What was the financial reputation of Robert D. Clarke in the city of Peoria at that time?

Ans. Good.

16. What was the reputation of the gentlemen, whose names appear upon Exhibit "19," with reference to their business integrity in the city of Peoria at the time of the pendency of this ordinance before the council?

A. So far as I know, first class; they were the best of our citizens financially.

17. At the time of the pendency of this ordinance before the city council did you have any conversation with any of the gentlemen whose names appear upon Exhibit "19," with reference to the passage of this ordinance, if so with whom?

A. Yes sir, with Theodore J. Miller.

18. What, if any, representations did Mr. Miller make to you at that time in regard to the passage of this ordinance?

Objected to as incompetent and immaterial.

A. He said it would be a great thing for the city, would give employment to people down in my locality and that we would have cheaper gas.

19. Did he or not in the course of the conversation you had with him make any representations as to what the price of gas would be

if a franchise or license was granted to this company as
1191 compared with the prices then charged by the old company?

Objected to as incompetent and immaterial.

A. I could not state whether he mentioned any prices or not; there was a good deal of conversation between the members of the council and talk about 75 cent gas, but as to whether Mr. Miller made any statements of that kind or not I could now state.

20. What, if any, representations did he make to you that would result from a competitive company entering into the manufacture of gas in Peoria?

(Objected to same grounds.)

A. As I stated before he said we would have cheaper gas.

21. Were you familiar at that time with the prices charged for gas in the city of Peoria by the old company?

A. No, not to my recollection.

22. Did you have any conversation with any other gentlemen whose name appears upon that list, relative to the passage of that ordinance?

A. I had an introduction to Sumner R. Clarke by the committee at that time; I remember being introduced to Mr. Clarke because it was the first introduction I ever had to him.

23. What, if anything, did he say to you relative to the ordinance that was then pending before the city council?

Objected to as immaterial and incompetent.

A. I cannot state at the present time.

24. Were you present at any conversations that were had between the aldermen at or about the time of the passage of this ordinance relative to its passage?

A. Yes sir, we generally met the night before the council meeting and talked the matter over.

25. Was Theodore J. Miller present at the meetings when these conversations were had between the various aldermen?

A. I will not be positive; I know he was up to the city
1192 hall at different times and he must have been at the committee meeting the night of the council meeting; he introduced Mr. Clarke to me at one of those times.

26. What was the nature of the conversation had there between the aldermen relative to the passage of this ordinance?

Objected to as incompetent and immaterial.

The MASTER: I don't think it competent unless it is made to appear that a representative of this company was present.

Mr. MANSFIELD: I would like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. It was in regard to this ordinance about getting cheaper gas

and the improvements they would make here, Peoria capital being used, etc.

27. In the course of the conversation you had with Mr. Miller relative to the passage of this ordinance, state whether or not anything was said relative to the capital that would be invested in that company?

(Objected to as incompetent and immaterial.)

A. He said they were all Peoria people who were interested in it and it was Peoria capital that was going to build it.

28. In the course of the conversation had between the various aldermen at that time, what, if anything, was said as to the effect of the passage of this ordinance on the rates that were then being charged by the old company for gas furnished in the city of Peoria?

Objected to as incompetent and immaterial.

The MASTER: I don't think it competent unless it appears that representatives of the company were there and acquiesced in it by silence or otherwise, still, if you want the question answered, the witness may answer subject to the objection.

A. The sentiment seemed to be we would have cheaper gas.

29. Do you know whether or not Mr. Miller was present on the night that this ordinance was passed by the city council?

1193 A. I do not; he had been up there so often with other ordinances that I don't recollect.

30. What, if any, effect did the representations made by Mr. Miller have in the formation of your judgment with regard to the vote cast by you upon the passage of that ordinance?

Objected to as incompetent and immaterial.

A. I voted for it in order to get cheaper gas, because of the statements they made that competition would reduce the price of gas.

31. Did or did not the representations of Mr. Miller have any effect on your arriving at a decision to vote in favor of the ordinance?

(Objected to same grounds.)

A. Why, it had the effect—I took it we were going to get cheaper gas and give employment to Peoria labor, which you know it did, and I voted for it.

32. At the time Mr. Miller made these representations to you did you believe those statements so made by him to be true?

A. Yes sir.

33. Look at Exhibit "19" now shown you and state whether or not you were familiar with the contents of that exhibit at the time of the passage of the ordinance by the city council?

A. I was.

34. Was that exhibit before the council at the time or previous to the passage of the ordinance?

Objected to as incompetent and immaterial.

A. I think it was.

35. Did you at that time believe the statements and representations contained in Exhibit 19 to be true?

Ans. I did.

36. Did you at that time believe that the people, whose names appear upon that exhibit, were capable of carrying those representations into effect?

Ans. Yes sir.

1194 37. In the course of the conversations that were had by the various aldermen was anything said relative to the capital which would be invested in this company?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection if counsel desires to press it.

Mr. MANSFIELD: I would like to have it answered.

A. It was said it was Peoria capital and these parties who signed the petition would invest and I believed they were the only ones that were interested in it.

38. How long had you known by reputation the gentlemen whose names appear upon Exhibit "19"?

A. I have known Mr. Sandmeyer over 30 years; when I started in my trade 26 years ago I used to deal with him, and the others I have known of all the way from 10 to 15 years.

39. State whether or not the representations and statements contained in Exhibit "19" influenced you in determining upon the manner in which you would vote upon the ordinance that was then pending before the city council?

Objected to as incompetent and immaterial.

A. Yes sir.

40. Did you believe when this ordinance was introduced, if the council were to pass it, that the complainant company would become a competitive company in the city of Peoria?

Ans. Yes sir.

Cross interrogatories by Mr. ABBOTT:

1. Did you have more than one talk with Mr. Miller?

A. Yes, I had frequent talks.

2. Do you remember when the first one was?

A. No I do not except it was during the time this ordinance was pending before the council.

3. About how long was it before the ordinance was finally
1195 passed?

Ans. Probably two or three weeks.

4. And then there were conversations at various intervals during the time the ordinance was pending?

A. Yes sir, I met him up in the city hall several times and met him on the street.

5. The talk was always of the same general character, was it. As I understand it, you say that in none of those talks did Mr. Miller make any promise, or definite statement, as to the price which his company would expect to charge for gas?

A. Not a definite price only cheaper gas.

6. There was similar talk in a general way that the formation of a new company would have the effect of cheapening the price of gas?

A. Yes sir, 75 cent gas had been spoken of but I could not say whether Mr. Miller made that remark or not; that was talked of around in the city hall among the aldermen.

7. I believe you stated with reference to these various discussions among the aldermen that you are not positive whether Mr. Miller, Mr. Clarke or any other representative of the company were present?

A. No sir. Well, Mr. Miller was present up there during the time of some of the meetings but not all of them. I met him in the city hall during that time.

8. But you are not positive at which meetings he was present?

A. No sir.

9. Was not there considerable talk between Mr. Miller and yourself to the effect that the granting of this ordinance, if the company should go ahead and erect its plant, would furnish employment to a large number of men?

Ans. Yes sir.

10. Is it not a fact that your attitude on the ordinance was considerably influenced by *y*hat fact?

Ans. Yes sir.

1196 11. Was it not of more consequence to your mind that Peoria labor should be given employment and the money paid to them, than the particular source from which that money came, whether it was Peoria capital or outside capital?

Objected to as incompetent and immaterial.

The MASTER: I don't think that competent.

12. It was a matter of discussion and of important consideration, was it not, that the company, if the ordinance was granted, should actually go ahead and build a plant?

Ans. Yes sir.

13. And not merely obtain an ordinance for the purpose of sale

A. I should not have voted for it if I had thought they were going to sell out.

14. And your attitude and your vote, if I understand you correctly, were influenced largely by your belief that if an ordinance were passed the company would go ahead, erect a plant and distribute the money to Peoria labor?

Objected to as assuming something the witness has not stated.

A. Yes sir.

Re-direct interrogatories by Mr. TICHENOR:

1. Do you mean to say you would consider it of more importance that Peoria labor should be employed than that the price of gas should be reduced?

Objected to as incompetent, immaterial, not proper re-direct; a statement of something the witness has not said and no questions asked of that kind.

A. No sir.

2. What were the principal reasons that induced you to support the ordinance in question?

Objected to as incompetent, immaterial and not proper re-direct

The MASTER: I think — was gone over in chief.

Mr. TICHENOR: There is some doubt at least in my mind as to what he stated on cross examination.

1197 The MASTER: He may answer subject to the objection then.

A. Cheaper gas and employment of Peoria labor.

And further the witness saith not.

JAMES D. PECK, called on behalf of defendant, being first duly sworn according to law, deposes and says.

Direct examination by Mr. TICHENOR:

1. State your name and residence?

A. James D. Peck, Peoria, Ill.

2. How long have you been a resident of Peoria?

A. Since 1865.

3. In what line of business are you now engaged and have been for some years past?

A. I carry on a painting business and have an art store on Main street.

4. How long have you been engaged in substantially the same line of business here?

Ans. 20 or 25 years.

5. State whether or not you at one time were a member of the city council of the city of Peoria?

Ans. Yes sir.

6. Were you at the time of the passage of the ordinance granting to the complainant company a franchise or license to use the streets for the purpose of constructing a gas plant?

A. Yes sir.

7. State whether or not you remember the fact that the ordinance was submitted to the council and was pending for sometime before its passage?

Ans. Yes sir.

9. Where were you during the time it was pending?

A. In Peoria, I think.

10. State whether or not you attended all the meetings of the city council that were held during the pendency of that ordinance?

A. I think I did.

1198 11. State whether or not about the time the ordinance was introduced you knew the gentlemen who were supposed to be interested parties in the new enterprise?

Ans. Yes sir.

12. Do you at the present time remember substantially who they were?

Ans. I know Sumner R. Clarke, Robert Clarke, Mr. Bailey and Mr. Miles.

13. Look at Exhibit "19" now shown you and state whether or not the gentlemen, whose names appear upon that paper, are the ones then purporting to be interested in the new company?

A. Yes sir, I think I know all those gentlemen.

14. For how long a period of time had you known them in a general way?

A. Had known most of them for 25 years, if not all of them.

15. Did you at the time this ordinance was pending know of their reputation and standing both financially and as to business integrity in the city of Peoria?

Ans. I think so.

16. What was that reputation?

A. They were considered well off and good business men.

17. With how many of the gentlemen, whose names appear on Exhibit "19," did you convers- relative to this ordinance during its pendency if any?

A. I think I spoke to Mr. Clarke and Mr. Bailey and possibly to Mr. Miles.

18. In your interview with Mr. Clarke, who first opened the subject and under what circumstances?

A. I don't know that I could tell; I often met Mr. Clarke and sometimes went over to his office and sometimes he came to my office, and I know we talked about the gas ordinance to be passed.

19. Where is your office with reference to his?

A. Right across the street and was at that time.

20. Do you remember at this time what passed between 1199 you and Mr. Clarke relative to that subject.

Objected to as incompetent and immaterial.

A. No, I don't think that I do.

21. Do you recall what particular features of the gas ordinance were mentioned by either of you?

Objected to same grounds.

A. We talked about it in a general way; I don't know anything in particular that was brought up.

21. Under what circumstances did you meet Mr. Bailey with reference to this question?

A. I was in his office and spoke to him about it, and we talked about it a few minutes.

22. What was the nature of the conversation that passed between you?

(Objected to as incompetent and irrelevant.)

A. I talked with him about his going into the gas business I think; he said he thought he would go into the business, that there was a good opening here; I could not state just what the conversation was, but it was nothing in particular.

23. What, if any statement, did Mr. Bailey make to you with reference to possible benefits to be derived by the citizens from the institution of a new company in the field?

Objected to as incompetent and immaterial.

A. I don't think he made any.

24. You knew at that time, did you, that he was one of the interested parties?

Ans. Yes sir.

25. Are those the only conversations within your recollection you had with any of the gentlemen interested pertaining to this subject?

A. Yes sir, unless I spoke to Mr. Miles about it, and that I don't recollect now; I would often meet him on the cars going home and I think we talked about it, but I could not state anything we said in particular.

1200 26. What did you understand during the pendency of the ordinance with respect to the object of the new company coming into the Peoria field?

(Objected to as incompetent and immaterial.)

The MASTER: I suppose your question calls for his understanding he gained from these men?

Mr. TICHENOR: Yes sir.

A. Their purpose in coming here was to manufacture gas.

27. Was it for the purpose of competing with the old company in the Peoria territory?

(Objected to same grounds.)

A. Yes sir.

28. At the time this ordinance was under consideration by the city council, how long had you known of the old company then in operation here?

A. I had known of it a good many years, probably 20 years.

29. State whether or not you knew the gentlemen who were prominently identified with it and who had been for years past?

A. Yes sir.

30. What was their standing financially in this community?

Objected to as incompetent and immaterial.

A. They had a good reputation financially and morally, too, I guess, most of them.

31. At that time what territory did you understand the new company proposed to occupy as compared with that then covered by the old company?

(Objected to as immaterial.)

The MASTER: I think you ought to limit the inquiry to the understanding the witness gained from persons interested in the new company or discussions on the subject in the council chamber.

Mr. TICHENOR: There would not be much discussion in the council chamber, there might be in the committee room.

The MASTER: Or in the committee room of the council.

1201 A. I supposed they were going to lay down gas pipes all over the city and compete with the old gas company; that was my understanding.

32. State whether or not from the sources of information indicated you understood that the new company was coming in here for the purpose of entering into competition with the old company in the production and furnishing of gas?

Objected to as incompetent and immaterial, especially in view of the testimony of the witness in the early part of his examination.

The MASTER: The witness may answer limiting his answer to such information as he gained by conversations with the interested parties or in the action of the council.

A. My idea was they were going to compete with the other company in the manufacture of gas.

33. What if any representations were made to you by any of the interested parties, or by members of the council, with respect to the benefits to be derived by the citizens of Peoria from the organization and operation of a competing company?

Objected to as incompetent and immaterial.

The MASTER: I think the question is part competent and in part incompetent.

Mr. ABBOTT: I do not see how the company could be bound by representations made by members of the city council to each other.

The MASTER: The master has already indicated his opinion on that subject; in the absence of any representative of the company, it would not be bound by any declaration made by aldermen or anybody else.

Mr. TICHENOR: I would like to have the question answered.

The MASTER: He may answer subject to the objection.

A. Why, they would have cheaper gas, gas would be
1202 manufactured cheaper; we would not have to pay so much for it.

34. Look at Exhibit "19" now shown you and state whether or not you examined that document during the time the ordinance in question was pending before the city council?

A. I think I did.

35. State whether or not at the time you saw and examined that document you believed the statements and representations contained therein to be true?

Ans. Yes sir.

36. State whether or not you believed at that time if the complainant company were granted an ordinance or license by the city, as then asked, the representations embodied in that document would be carried out in good faith?

Ans. Yes sir.

37. State whether or not you at that time believed that the gentlemen who purported to be interested in it were financially able to carry out the representations made in that document?

A. I think they were; I know they were as a body and I thought so at that time.

38. What did you know of them with regard to their wealth?

A. I thought they were all considered well off; I don't know so much about Mr. Sandmeyer as I do about some of the others, viz: the Clarkes, Bailey and Littlewood.

39. State whether or not the document marked Exhibit "19" had any influence with you in arriving at a conclusion as to the course you should take with reference to the ordinance when it was put upon its passage?

Objected to as incompetent and immaterial.

A. I think it did.

40. How did you vote upon that ordinance?

Objected to same grounds.

A. I voted for the passage of it.

41. Do you remember whether or not Theodore Miller was
1203 present in the council during the discussion concerning the ordinance in question?

A. I saw him there but I don't know whether he was there that night; I have seen him in there.

42. Do you remember on how many occasions the ordinance came up for discussion before the council?

A. I think it was three times anyway, if I recollect right.

Cross interrogatories by Mr. ABBOTT:

Mr. ABBOTT: We waive cross examination of this witness and sire to enter a motion at this time to exclude all of his testimo except the first part of his examination, which relates to conver tions had with Mr. Clarke, Mr. Bailey and Mr. Miles, on the grou that the questions put were incompetent, immaterial and irrelev and that the answers to the same were not responsive and that view of the testimony of the witness in the first part of his exa nation his testimony is entirely his own opinion and ideas, based general rumor or at least not on positive statements of the part interested, and in general is not pertinent to the issues in the cas

The MASTER: As I have already indicated to counsel, I can give any further time to the hearing of testimony in this case some weeks on account of my personal business. Counsel a familiar with the facts that our circuit court comes in on the 31st March with a jury, and I have several cases for trial in which I a counsel, besides other business which I have to attend to. H would it suit counsel to adjourn this hearing until the 14th of Apr 1902?

Mr. RITCHER: Cannot we put in a couple of days during the we previous to the 31st of March?

1204 Mr. TICHENOR: We cannot get through with our eviden here in couple of days.

Mr. MANSFIELD: I have pending in the county court of th county quite a number of improvement cases and it is absolute necessary that those cases be disposed of as soon as possible in ord that the improvements can be made during the summer months an between now and the opening of the circuit court is about the on time I have to take up those cases and dispose of them, and it is a solutely necessary that they be attended to.

The MASTER: I will then adjourn the further hearing of this ca until the 14th of April, 1902, at 10 o'clock a. m., to meet at th United States court room, Government building, in the city of Peori unless I advise counsel otherwise.

1204*a* EXHIBIT "18." I. C. Pinkney, Master.

STATE OF ILLINOIS, DEPARTMENT OF STATE.

James A. Rose, secretary of state, to all to whom these presen shall come, Greeting:

Whereas, a statement, duly signed and acknowledged, has bee filed in the office of the secretary of state on the 20th day of March A. D. 1899, for the organization of the Pleoples Gas and Electri Company under and in accordance with the provisions of "An ac concerning corporations," approved April 18, 1872, and in force Jul 1, 1872 and all acts amendatory thereof, a copy of which statemen is hereto attached,

And whereas, a license having been issued to O. J. Bailey, Philo B. Miles, Sumner R. Clark, Henry Sandmeyer Sr. B. Warren Jr. Theodore J. Miller, and John Wilson, as commissioners to open books for subscription to the capital stock of the said company.

And whereas, the said commissioners have on the twenty-first day of March A. D. 1899, filed in the office of the secretary of state a report of their proceedings under said license, a copy of which report is hereto attached.

Now therefore, I, James A. Rose, secretary of state, of the State of Illinois, by virtue of the powers vested in me by law, do hereby certify, that the said Peoples Gas and Electric Company is a legally organized corporation under the laws of this State.

1204*b* In testimony whereof, I, hereto set my hand and cause to be affixed the great seal of State. Done at the city of Springfield, this 21st day of March, in the year of our Lord, one thousand eight hundred and 99, and of the Independence of the United States, the one hundred and 23rd.

[Seal of the State of Illinois, Aug. 26th, 1818.]

JAMES A. ROSE,
Secretary of State.

STATE OF ILLINOIS, } ss:
Peoria County, }

To James A. Rose, secretary of state:

We, the undersigned, O. J. Bailey, Philo B. Miles, Sumner R Clarke, Henry Sandmeyer, Sr. B. Warren, Jr., Theodore J. Miller, and John Wilson, propose to form a corporation under an act of the General Assembly of the State of Illinois, entitled "An act concerning corporations" approved April 18, 1872, and all acts amendatory thereof, and for the purpose of such organization, we hereby state as follows to-wit:

1. The name of such corporation is Peoples Gas and Electric Company.

2. The object for which it is formed is to manufacture, buy sell, distribute and deliver gas for light, heat and power; to manufacture,—generate, buy, sell, distribute and deliver electricity for light heat and power: to manufacture sell and deal in appliances for the use of gas and electricity in the production of light, heat and power or any of them: to possess gas and electric works, buildings,

1204*c* apparatus, pipes, mains, wires and all the property, privileges, powers, licenses and ordinances which may be required or used in said business; also to manufacture, buy, sell, and deal in goods, wares, and merchandise and the by-products arising from the manufacture and generation of gas and electricity; also to manufacture, generate, buy, sell, distribute and deliver steam and hot water for heat and power purposes.

3. The capital stock shall be five hundred thousand dollars ($500,000)

4. The amount of each share is one hundred dollars ($100.00)

5. The number of shares five thousand (5000).

6. The location of the principal office is in the city of Peoria, in the county of Peoria, State of Illinois.

7. The duration of the corporation shall be ninety nine years.

O. J. BAILEY.
PHILO B. MILES.
SUMNER R. CLARKE.
HENRY SANDMEYER, SR.
B. WARREN, JR.
THEODORE J. MILLER.
JOHN WILSON.

STATE OF ILLINOIS, }
County of Peoria, } ss:

I, W. I. Slemmons, a notary public in and for the said county and State aforesaid, do hereby certify, that on the 18 day of
1204*d* March, A. D. 1899, personally appeared before me O. J. Bailey, Philo B. Miles, Sumner R. Clarke, Henry Sandmeyer Sr., B. Warren, Jr., Theodore J. Miller, and John Wilson to me personally known to be the same persons who executed the foregoing statement and severally acknowledged that they executed the same for the purposes therein set forth.

In witness whereof, I have hereunto set my hand and seal, the day and year above written.

[SEAL.]

W. I. SLEMMONS,
Notary Public.

To James A. Rose, secretary of state of the State of Illinois:

The commissioners duly authorized to open books of subscription to the capital stock of the Peoples Gas and Electric Company, pursuant to license heretofore issued, bearing date the 20th day of March A. D. 1899 do hereby report that they opened books of subscription to the capital stock of said company, and that the said stock was fully subscribed, that the following is a true copy of such subscription, viz:

We, the undersigned, hereby severally subscribe for the number of shares set opposite our respective names to the capitol stock of the Peoples Gas and Electric Company, and we severally agree to pay the said company for each share, the sum of one hundred dollars at such time or times and in such installments as
1204*e* shall be required by the board of directors of said company.

Names.	Shares.	Amount.
F. T. Corning	100	10,000.00
Chas. C. Clarke	50	5,000.00
Chauncey D. Clarke	50	5,000.00
George H. Littlewood	50	5,000.00
Ferd Luthy	50	5,000.00

O. J. BAILEY,
Commissioners.

STATE OF ILLINOIS, } ss:
County of Peoria, }

On this 20th day of March, A. D. 1899 personally appeared before me, a notary public in and for said county, in said State, O. J. Bailey, Philo B. Miles, Sumner R. Clarke, Henry Sandmeyer Sr., B. Warren, Jr., Theodore J. Miller, and John Wilson, and made oath that the foregoing report by them subscribed is true in substance and in fact.

[SEAL.]

W. I. SLEMMONS,
Notary Public.

1204*g* STATE OF ILLINOIS, } ss:
Peoria County, }

I, John Johnston, recorder of deeds, within and for the said county and State aforesaid, and keeper of the records of said recorder's office, do hereby certify that I have compared the foregoing copy of incorporation: Peoples Gas and Electric Company dated March 21, 1899, filed March 21, 1899, at 2-40 p. m. Recorded in vol. 4 of Corp. page 598 with accompanying certificate, with the original record in my office, and found the same to be a true and correct transcript of the whole of such record.

Witness my hand and official seal at Peoria, this 15th day of February A. D. 1902.

[SEAL.]

JOHN JOHNSTON,
Recorder of Deeds.

1206 On Monday, April 14th, 1902, the further hearing of the case was adjourned by agreement between counsel until Monday, April 21, 1902, at 10 o'clock a. m.

On Monday, April 21, 1902, on account of the fact that Mr. Henry Mansfield, city attorney, was engaged in the trial of an important case in the circuit court of Peoria county, the case was adjourned from day to day until Thursday, April 24, 1902, when it was adjourned by the special commissioner until Monday, April 28, 1902, at 10 o'clock a. m.

United States circuit court room, Government building.

PEORIA, ILLINOIS,
MONDAY, *April* 28, 1902—10 o'clock a. m.

Parties met pursuant to the call of the special commissioner.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

CHARLES V. ODEN, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Charles V. Oden, Peoria, Ill.

2. How long have you been a resident of Peoria?

A. 16 years.

3. In what business have you been engaged during that time?

A. I have been selling goods, principally typewriters for the major part of the time I have resided in Peoria.

4. What firm have you represented in Peoria in that capacity?

A. Wyckoff, Seamans & Benedict—the Remington Com-
1207 pany, and the Wagner Typewriter Company with the Underwood typewriter.

5. The first named company handles the entire product of the Remington Company?

Ans. Yes sir.

6. State whether or not you have ever been a member of the city council of the city of Peoria?

Ans. I have.

7. State whether or not you were a member of the city council of this city at the time of the passage of the ordinance granting a franchise or license to the complainant company to install a gas plant and use the streets and alleys of the city of Peoria for furnishing gas to the city and its citizens?

A. I was in the council when a gas franchise was passed; I don't know whether it was for complainant company or not.

8. What was the name of the company at that time, if you know?

A. Really, I could not say but I think it was the People's Gas & Electric Co.

9. Do you know whether or not it was the same company now engaged in this litigation?

A. It was understood to be by me.

10. How many gas companies have you ever known in the city of Peoria that have been actually engaged in the business?

A. Two.

11. What were they?

A. What I have always known as the old gas company, the Peoria Gas Light & Coke Co., and the People's Gas Company.

12. Do you know the present corporate name of the other company now operating in Peoria territory?

Ans. I do not.

13. Is it not the Peoria Gas & Electric Co.?

A. I could not say.

14. Was there more than one franchise for such purpose
1208 given by the city council of the city of Peoria during your incumbency of the office to which you have referred?

A. I think there was one given to J. Frank Aldrich.

15. Was there any work done under that within your knowledge?

A. No sir.

16. Was the plant constructed under the other ordinance to which you have referred?

Ans. Yes sir.

17. That is the same company which is now operating in Peoria territory, is it?

Ans. I think so.

18. How long had you been a member of the city council at the time that subject came up?

Ans. Nearly four years.

19. Do you remember the fact of the passage of the ordinance to which you have referred?

Ans. I do.

20. Do you also remember the fact of its pendency for some time?

Ans. Yes sir.

21. Have you any recollection at this time about how long it was pending before the council?

A. No, but some weeks, though.

22. What portion of the meetings of the council did you attend during the pendency of that ordinance?

A. I never missed a meeting during the four years I was a member of the council.

23. Do you remember how many times the subject came before the council meeting?

A. A number of times but I do not remember the exact number.

24. At the time the ordinance in question was presented, did you know personally any of the gentlemen purporting to be interested in it?

A. I knew most of them, if not all of them.

25. What was their standing and reputation both financially and for integrity at that time so far as your knowledge of them extended?

1209

Ans. I considered it the very best.

26. With which of those gentlemen then interested in the proposed new company or in the new company, if it had then been organized, were you acquainted, and for the purpose of refreshing your recollection you may look at Exhibit "19" in evidence in this case?

A. I know Sumner R. Clarke; Ben Warren, Jr.; H. Sandmeyer; George Littlewood; I knew C. C. Clarke; I know Chauncey Clarke; O. J. Bailey, Ferd Luthy; Philo B. Miles; Robert D. Clarke; F. T. Corning and Theo. J. Miller—all of them.

27. What was your understanding when that ordinance was presented, or during its pendency, as to the people who were to be interested in the construction and operation of the proposed new gas company and from what source did your information come?

Objected to as incompetent and immaterial.

A. I understood it was to be entirely a Peoria concern, composed entirely of Peoria men, and my source of information came from the parties purporting to be stock holders themselves as shown on this list, Exhibit "19."

28. Had you prior to the introduction of that ordinance done business with some of those gentlemen to whom you have referred?

A. Yes sir, most of them.

29. In the line to which you have referred in your testimony was it?

Ans. Yes sir.

30. State whether or not during the pendency of this ordinance you had any conversation with any of those gentlemen as to what was proposed to be accomplished?

Objected to as incompetent, immaterial and for the reason the complainant is a corporation and no one individual can say what the intent of the company might be after it was organized and its directors elected.

1210

A. Why, a number of those gentlemen came to me and talked over the situation and the claim was based largely on their personal interests and the welfare of Peoria and the fact that by granting the franchise the price of gas would be very much less.

31. State whether or not any of those gentlemen, in referring to the reduction in price that would follow the installation and operation of the new company in Peoria, any rates were mentioned at which such new company would furnish gas?

Objected to as incompetent and immaterial.

A. Yes sir, they did.

32. Are you able to say from your personal recollection who of those gentlemen did make any such statement?

A. Philo B. Miles, Theodore J. Miller and C. C. Clarke who is now dead.

33. What was said by those gentlemen in respect to that subject?

(Objected to same grounds.)

A. Their talk was that we would get gas at a very much less rate, and the rate suggested at that time as being sufficiently high was 75 cents.

Complainant objects to the foregoing answer as not responsive, incompetent and immaterial and moves the court to exclude it.

34. State whether or not their statements to you with reference to those rates pertained to fuel gas or gas for illuminating purposes, or to all gas to be furnished in the city of Peoria?

Objected to as incompetent and immaterial.

A. I don't think they specified; they just simply spoke of gas in a general way as being too high, as I remember it.

35. Do you know what the prices then were.

A. I think the price for illuminating gas was $1.35 per
1211 thousand and I think it was 75 cents or $1.00 for fuel gas; they were changing just about that time; I know while the ordinance was pending the price was changed.

36. State if the price changed during the pendency of that ordinance or just prior to its introduction did not pertain to illuminating gas and not to fuel gas? and if that change was not from $1.35 to $1.00?

Objected to as incompetent and immaterial.

A. I think it was and while I don't know I think Exhibit "19" is the paper that referred to it when presented to the council.

37. During any portion of the time covered by your residence in Peoria, have you been a consumer of gas?

A. Yes, during the major portion of the time.

38. Did you, either from your membership in the council or otherwise, know at that time substantially the territory covered by the Peoria Gas Light & Coke Co. in its service to consumers?

Objected to same grounds.

A. Why, yes, I think I did; it had the whole territory of Peoria.

39. How was it with reference to the suburbs available for gas consumption?

Ans. I don't know.

10. Do you know what the capacity of the old company was at that time with respect to the demand for gas in the Peoria territory?

(Objected to same grounds.)

A. No sir.

41. Did you know the people prominently identified with the Peoria Gas Light & Coke Co. at the time the ordinance, to which you have referred, was pending before the council?

Objected to as immaterial.

A. I knew two or three of them; I knew Mr. Coffey, Mr.
1212 Farrelly and there may have been others connected with it that I am not aware of.

42. Did you know Leslie Robison and Mathew Henebery?

A. Yes sir.

43. Did you know Wm. A. Herron?

Ans. Not personally.

44. Did you know the general reputation and standing of those gentlemen financially and otherwise in Peoria at that time?

Objected to as incompetent and immaterial.

A. Why, it was good in both respects.

45. How many times, if at all, did any of the gentlemen, whose names are affixed to Exhibit "19," confer with you concerning the ordinance in question during its pendency in the city of Peoria?

(Objected to same grounds.)

A. Well, a great many times.

46. What steps relative to the ordinance and the introduction into the field of a competing gas company were discussed between you and any of those gentlemen at the different times mentioned so far as you now recollect?

(Objected to same grounds.)

A. The argument was based largely on the fact that we were now in the hands of a company having a monopoly, as it was called, having its charter from the State, and that the city had no control over it at all; that there was no way to reduce the price of gas except to furnish competition and that that was the object of the men whose names were attached to Exhibit "19" to bring about.

47. State whether or not those gentlemen declared at any of those times that they were going into the field for the purpose of installing a competing company and it would be so operated?

Objected to same grounds.

The MASTER: State what was said on that subject, if anything.

A. Yes sir, they did.

48. State whether or not in the deliberations and discus-
1213 sions in the council and with these gentlemen, whose names are affixed to Exhibit "19" or any of them, you participated to a considerable extent or otherwise?

(Objected to as immaterial.)

A. I think I took an active part in it.

49. During what period of time covered by the pendency of that ordinance did you actually participate in questions relative to the passage of the ordinance and the proposed installation of the new company. In other words, was it for a limited time, or a considerable portion, or all the time?

Objected to as incompetent and immaterial.

A. I was not as active at any time as I was the last night, the night the ordinance was passed; at that time I was understood to be the spokesman for the company.

50. Who, if anyone, placed that subject in your hands and what were the circumstances under which it was done?

Objected to as incompetent and immaterial.

A. I don't know just how it was; it was generally understood I was favorable to the passage of the ordinance and the subject was discussed by various ones, principally the attorney, Mr. Irwin.

51. Through what channel had knowledge of your attitude in that respect come to the people interested in the new gas company?

Objected to same grounds.

A. The fact that I had expressed myself on numerous occasions and had shown a willingness to support it from the time it was presented.

52. State whether or not you had made such expressions to the gentlemen then interested in the new gas company?

Objected to same grounds.

A. I had.

53. State whether or not on the day or evening immedi-
1214 ately preceding the passage of this ordinance or within a short time before you had any conversation with any of the gentlemen, whose names are affixed to Exhibit "19," with respect to the passage of the ordinance in question?

(Objected to same grounds.)

A. Well, I don't know as to the limit of time; the subject was being discussed continually by everybody and I heard it right along up to the time of going to the meeting.

54. State whether at any time during the pendency of that ordinance any gentleman, whose name is affixed to Exhibit "19," requested you to urge its passage when it came up before the council?

Objected to as incompetent and immaterial to the issues in this case.

A. Yes, that was the subject of discussion; they urged my support of it.

55. State whether or not any reasons were given by them, other

than those which you have already stated, for urging you to support the ordinance and assist in its passage?

Objected to same grounds.

The MASTER: The witness may state what they said in that respect.

A. They said we were paying too much for gas, that we had no control over the old company, that the new company was composed entirely of local business men, men whose reputation was unquestioned—which was the case in my mind.

(The MASTER:)

56. Which one of the signers of "Exhibit 19" made those statements to you?

A. I have given the names before; as they come on the list here, C. C. Clarke was the first one; Mr. Bailey at one time spoke to me but only spoke to me once; Philo B. Miles two or three times; 1215 Robert D. Clarke a number of times and Theodore J. Miller every day.

(Mr. TICHENOR):

57. State whether you saw the paper "Exhibit 19" shortly after it was filed with the city clerk of Peoria?

Objected to as immaterial.

A. I saw it before it was filed, I think, and afterwards, that is, I heard it read in the council and I want to say it embodies the whole position I took in the matter; it contains the substance of all their comments with reference to it.

58. That is, their statements to you were substantially the same as are embodied in that exhibit?

A. Yes sir, and to at least one or two of them, I have forgotten which now, I suggested just such a statement; I do not mean to say that suggestion was the means of bringing about this petition but it was in harmony with my idea.

59. State whether or not you knew at that time, during the pendency of that ordinance, that any person outside of Peoria was interested, or was to become interested, in the new gas company for which the franchise and license was asked?

Objected to as incompetent and immaterial.

The MASTER: I don't think it materi-l but the witness may answer.

A. I was told it was entirely a Peoria concern and believed it; I had voted against another one on account of its being foreign capital.

60. State what if any influence the statements made by those gentlemen, as testified by you, in Exhibit "19," had in your reach-

ing a conclusion as to the course you should take and did take in the council with respect to supporting the ordinance?

Objected to as incompetent and immaterial.

A. It had everything to do with it.

61. State whether or not at the time of the passage of the
1216 ordinance in question and after Exhibit "19" had been prepared and presented to the council, you believed the statements and representations contained in Exhibit "19" were true?

Objected to same grounds.

A. I believed they were true; I had every confidence in the men whose names were attached and who were interested and the facts set forth in Exhibit "19" showing that the price of gas had already been reduced demonstrated it, and I felt it was absolutely the thing to do from the experience I had had with the men and the action already of the old company.

62. State whether or not during the time that ordinance was pending and after the presentation of Exhibit "19" to the council you believed in good faith that if the complainant company were granted a franchise and license to use the streets and alleys of the city of Peoria for the purpose of installing a gas plant that the representations embodied in that exhibit would be carried out in good faith?

(Objected to same grounds.)

A. I believed it absolutely.

Cross interrogatories by Mr. IRWIN:

1. I understood you to state in your direct examination that the price of illuminating gas prior to the presentation of the application of complainant company for an ordinance—franchise—as fixed by the old company was $1.35 per thousand cubic feet to consumers?

Ans. I said I thought so.

2. You do not remember what the price of fuel gas was at that time, do you?

Ans. No, I do not.

3. Is it not a fact that soon after the introduction of the ordinance in question in the city council the price of gas for illuminating purposes was reduced to $1.00 by the old company?

A. I think it was and that cut a very material figure in
1217 my position in the matter.

4. Is it not a fact that the old company about that time stated that if an ordinance was granted to the new company it would meet any competition or it would sell gas below the price that any other company could sell it?

A. Well, I don't know whether they made public statements to that effect or not but it was generally believed to be true. In fact, it was believed by me to be true or they would have to go entirely out of business.

5. Is it not a fact that prior to the introduction of this ordinance into the city council the old company charged consumers for laying service pipe into their premises from the gas main what was considered an exorbitant price?

(Objected to as immaterial.)

A. Yes sir.

6. Is it not a fact that prior to the introduction of this ordinance into the city council the old company charged consumers what was considered by consumers an exorbitant price for setting meters?

(Objected to as immaterial.)

A. I think that is true.

7. Is it not a fact that prior to the introduction of this ordinance into the city council the old company charged consumers a monthly meter rent of about 25 cents whether any gas was used or not?

(Objected to as immaterial.)

A. I think that is true also.

8. Is it not a fact that prior to the introduction of this ordinance and its consideration by the city council there was a great deal of public dissatisfaction with reference to the treatment of the old company towards its consumers?

Objected to as immaterial and incompetent.

A. Yes sir.

9. Is it not a fact that prior to the introduction of this
1218 ordinance into the city council and its consideration by the council the treatment of the public by the old company was considered arbitrary and unreasonable by many of its consumers and the public generally?

(Objected to same grounds.)

A. Yes, sir, those were the arguments advanced to me also.

10. I will ask you if prior to the introduction of this ordinance into the city council and its consideration by the council it is not a fact that the city council had considerable trouble with the old company in getting it to extend, lay or remove its pipes in the streets so as to accommodate public improvements and other underground pipes in the street?

(Objected to same grounds.)

The MASTER: I don't think that material.

Mr. IRWIN: I would like to have it answered.

The MASTER: He may answer subject to the objection.

A. We had considerable trouble, yes sir.

11. State if that trouble had not extended and continued during nearly all your time in the council at various times.

Objected to same grounds.

The MASTER: Same ruling.

A. Yes, but we had no more trouble in that direction than with the laying of pipes on all of them; it retarded public improvements right along with all companies that furnished underground service.

12. State if the city council did not have considerable trouble with the old gas company during the time you were a member of the council in getting it to extend its mains through territory reasonably well built up so as to accommodate and furnish gas to consumers?

Objected to as incompetent and immaterial and not the best evidence.

The MASTER: I do not see its materiality under the issues
1219 in this case but the witness may answer subject to the objection.

A. As a member of the city council, I had lots of trouble as each individual alderman did but the council as a body had nothing to do with it.

13. I will ask you if it was not considered by the several members of the city council that the action and arbitrary methods of the old gas company were unreasonable and had been for sometime?

Objected to same grounds and also as not cross examination.

The MASTER: I do not see the materiality of it, nor do I think it cross examination, but the witness may answer subject to the objection.

A. I don't think an expression of the council was ever brought out as members but as citizens of Peoria everybody thought that they were.

14. I will ask you if after the ordinance franchise in question was granted by the city council if the citizens of Peoria did not get their service pipes laid from the gas main into their premises without charge?

(Objected to as incompetent and immaterial.)

A. I think they did.

15. I will ask you if meters were not set without charge to the consumers?

(Objected to same grounds.)

The MASTER: He may state his personal knowledge on the subject.

A. There was one set in my place without charge.

16. Do you know of anyone being charged for the setting of a gas meter after that time?

(Objected to same grounds.)

A. Not in a direct bill but I think they get their pay for it in the price of gas now.

17. Is the price of gas now any higher than it was prior to the consideration of this ordinance by the city council?

A. It is much higher than they told me it should be.

18. Answer my question will you?

1220 A. What is it?

19. (Interrogatory 17 repeated to witness.)

A. I think not.

20. I understand you to say that Exhibit "19" represents substantially all the arguments or representations that were made to you by anyone that influenced you and secured your support for the ordinance in question as a member of the council?

A. Yes sir.

21. All the conversation- that you had, which you have related and referred to, with individuals were had prior to the date upon which the ordinance passed, were they not?

A. I think so but right up to the time of the passage of the ordinance.

Re-direct interrogatories by Mr. TICHENOR:

1. I think you stated on direct examination that at the time of the passage of the ordinance the price charged by the old company for illuminating gas was $1.00 and for fuel gas 75 cents?

A. No, I said, if I remember—at least this is what I want to say that a change came just at that time.

2. The change to which you refer was in the illuminating gas?

Ans. I think it was.

3. Were you a consumer of fuel gas at that time?

Ans. Yes.

4. Do you remember how long the price of fuel gas had been 75 cents?

Objected to as immaterial and not proper re-direct.

The MASTER: No, but he may answer subject to the objection.

A. I think it had been running for some time—several years.

5. What was the price to consumers of fuel gas and illuminating gas on the 18th day of September, 1900, and what has it been ever since?

Ans. I don't know.

1221 6. Do you know what it is at the present time?

A. No, I do not.

7. Are you a gas consumer?

Ans. I am; I think it is $1.00 per thousand for both illuminating and fuel gas.

8. And it has been $1.00 per thousand for all gas for sometime has it not?

Ans. Yes, I think so.

9. I understood you to state on direct examination that the statements made to you by the different gentlemen then interested in

the new company to the effect that it was entirely a Peoria enterprise, that Peoria men only were interested in it, influenced your judgment in arriving at your conclusion with respect to the course you should take with reference to the ordinance?

A. It did.

10. Then when you stated that all of the arguments that were brought to bear upon you were embodied in Exhibit "19" you had overlooked that item, had you?

Objected to as incompetent, immaterial and not re-direct.

A. I think I stated in answer to a previous question that the facts presented in Exhibit "19" was what influenced me because the names of those individuals attached thereto are part of the exhibit.

11. And the other matter was also considered by you and was one of weight?

Ans. It certainly was.

FERD LUTHY, called in behalf of defendant, being duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Ferd Luthy; Peoria, Ill.

2. What is your business?

1222 A. I am a banker and am also engaged in the wholesale farm machinery business.

3. How long have you been engaged in that line of business and where?

Ans. I think about 18 or 20 years; part of the time on S. Washington street and part of the time on Commercial street—within one block of the same place.

4. Those places are both in the city of Peoria?

Ans. Yes sir;

5. You have been a resident of Peoria for a great many years have you not?

Ans. Yes sir;

6. State whether or not the business to which you have referred during the years you have been engaged in it, has been of considerable magnitude or only small.

A. It has been of considerable magnitude.

7. Do you operate over a number of States?

A. Yes and have for some years.

8. As a banker, with what bank have you been identified and for how long a period of time?

A. With the Merchants National Bank of Peoria for some 15 years or more.

9. That is the bank of which Mr. Littlewood is cashier and h been for some years past?

Ans. Yes sir.

10. Were you one of the persons originally interested in the form tion of the complainant company?

A. I was offered the privilege of taking some stock in the com pany—a rather small amount—and I consented to do so. I took n active part in the formation of the company.

11. How long at that time had you been a consumer of gas i Peoria?

A. Upwards of 15 years; I don't know the exact number of years

12. State whether or not during that time you had known th people prominently identified with the Peoria Gas Light & Coke Co.

1223 A. I knew some of them; I don't think I knew all the stockholders.

13. Did you know its officers and manager—the people in charge? Ans. Yes sir.

13. Did you know their standing in Peoria financially and as to integrity at that time and had you known it for some years past?

A. I think I did.

14. What was such standing?

Objected to as incompetent and immaterial.

A. Financially they were considered very strong, and I think they would all carry out their contracts.

15. Who of the gentlemen, prominently interested in the old company, did you know personally?

A. I knew Mr. Coffey, Mr. Farrelly, Mr. Henebery—I believe all of those were officers of the company. I know Mr. Herron who, I think, was a stockholder and I think Phillip Zell's estate was a stockholder. I don't recall any others just at present.

16. Do you know Leslie Robison?

A. Yes, but I think he had sold his stock prior to the organization of the new company; he was formerly a stockholder and I know him very well.

17. You have known them all for a number of years?

A. Yes sir and the most of the gentlemen stand very high in Peoria and the integrity of most of them is unquestioned.

18. State whether or not prior to the time you were solicited to be a subscriber to the capital stock of complainant company you had been interested directly or -directly with any other gas company either in Peoria or else where?

Objected to as immaterial.

A. No sir.

19. Had you previous to that time had any connection 1224 with the gas industry at all?

(Objected to same ground.)

A. Only as a consumer.

20. What if any knowledge had you respecting the installing, operation and profits of gas companies at the time you proposed to become a subscriber?

(Objected to as immaterial.)

A. I had heard a number of times that the gas business was a profitable business; I was satisfied beyond question that the gas company here had made a good deal of money in the past and I thought the manufacturing of gas was a profitable business and in a growing city it would continue to be so.

21. Had you come in contact with that question elsewhere than in Peoria?

(Objected to as immaterial.)

A. I had heard of the gas problem in a number of cities; my information in that matter is hearsay and not from being directly interested, but I thought the statements were sufficiently reliable so that I believed the business was profitable.

22. By whom was the question of your becoming a subscriber to the complainant company presented to you?

Objected to as immaterial.

A. It was first presented to me by Mr. Littlewood who stated that Mr. Clarke had called at the bank to see himself and myself in relation to taking some stock in the proposed gas company; I was absent at the time and he presented the matter to me when he next met me.

23. That is the Mr. Littlewood who has testified in this case?

A. Yes.

24. You came in contact with Mr. Littlewood through your relations in the bank daily practically?

Ans. Nearly so, yes sir.

24. What, if any representations did he make to you at that time with respect to the questions under consideration?

Objected to as incompetent and immaterial.

1225 A. There was but very little objection made to me; he said they were talking of forming a new gas company and that Sumner R. Clarke was the party who had presented it to him and was one of the principals in the matter.

25. Did you at that time know what other gentleman proposed to become interested if the company should be organized?

A. I don't know that I did at that particular time but shortly after I became aware of a number of them.

26. For how long a period of time had you known the several gentlemen that signed the stock subscription list to complainant company?

A. I had known those gentlemen for quite a number of years.

27. Have you also had more or less to do with them in a business way?

A. More or less with some of them—others not so much.

28. Did you before becoming a subscriber have any conversation with Sumner R. Clarke with reference to the proposed enterprise?

Ans. I think I did.

29. State as accurately as you remember what that conversation was and if you had different conversations state them all?

Objected to as incompetent and immaterial.

The MASTER: I don't think it material but if you desire the question answered, the witness may answer subject to the objection.

Mr. TICHENOR: I do desire it answered.

A. I think I said to Mr. Clarke at the time we signed the subscription list that if this company were formed for the purpose of selling out its franchise I did not want to have anything to do with it, but if it was formed for the purpose of going into the gas business I would be glad to take the amount of stock that I had the privilege of taking and Mr. Clarke—I think this conversation was with Mr. Clarke—gave me to understand it was for the purpose of
1226 going into the business and not for the purpose of selling out.

30. Did you know at that time whether or not it was to be entirely a Peoria enterprise financed by Peorians?

Objected to as immaterial.

A. I think at that time I had been informed there was a Chicago party connected with the company who would be interested in it—Mr. Walsh of Chicago.

31. When was your information in that regard obtained with respect to the time you signed the subscription list?

Objected to as immaterial.

A. I think I understood that before I signed the subscription list.

32. From whom did that information come?

Objected to as immaterial.

A. I am not certain whether it was from Mr. Littlewood, Mr. Miller or who, but that was my understanding; I don't recall the particular person who gave me that information; it may have been Mr. Littlewood, Mr. Miller or Mr. Clarke, I am not certain which.

33. State whether or not the part taken by Sumner R. Clarke in the formation of the company was a prominent one?

A. Yes sir, it was a prominent one.

34. What other people, if any, were also active in the preliminary arrangement for the incorporation?

A. I think Theodore J. Miller along with Mr. Clarke.

35. Did you at that time know the financial standing of Theodore J. Miller?

Ans. Yes, I think so.

36. Did you also know Sumner R. Clark's financial ability?

A. Yes sir.

37. What connection, if any, had Mr. Clarke had with the Merchants national bank during any portion of the time you have been identified with it?

1227 A. He had been a director of the bank for quite awhile antidating this company.

38. You have been president of the Merchants national bank for some time?

Ans. Yes sir.

39. Do you remember about how many years?

A. I am not certain but would think 10 years at any rate.

40. You are still president of that bank?

Ans. Yes.

41. State whether or not your decision to become a subscriber to the capital stock of complainant company was based wholly upon your own judgment from your knowledge in a general way of the gas industry in Peoria for some years past, or whether you made further inquiries from any of the gentlemen then proposing to become interested in the new company?

Objected to as incompetent and immaterial.

The MASTER: I don't think it material.

Mr. TICHENOR: I would like to have it answered.

The MASTER: He may answer subject to the objection.

A. I think it was my own decision entirely.

42. State whether or not Sumner R. Clarke made to you any representations as to the price at which gas could profitably be sold in Peoria. I am speaking with reference to the time the preliminary arrangements for the organization were in progress.

Objected to as incompetent and immaterial.

A. I don't remember of any such conversation now. In fact, I had but very little conversation with any of the gentlemen; I only took a very small interest in the company and I had but little knowledge of the particulars in its formation.

43. What, if any, information did any of those gentlemen give you with reference to the price at which they proposed to furnish gas as compared with the price then charged by the old company?

Objected to as incompetent and immaterial.

1228 A. I don't think any such conversation was had.

44. What if any statements did any of them make to you with reference to the new company's entering the Peoria field for competitive purposes and so remain?

(Objected to same grounds.)

The MASTER: I don't think this line of inquiry material at all

How could this affect the action of the city council in any way, shape or form. This witness was not a member of the council. It does not occur to me it is material under the issues in this case in any sense.

Mr. TICHENOR: I would like to have it answered.

The MASTER: He may answer the question subject to the objection.

A. I think the only statement made in the matter was at the time just previous to my signing the subscription list when I stated to some of them if this company was being formed for the purpose of selling out its franchise I did not want to be a subscriber but if it was formed for the purpose of legitimate business I would be glad to become a subscriber. I was given to understand it was for that purpose and that was about all the conversation I had in relation to the matter.

45. Were you present at the first meeting of the subscribers to the capital stock convened for the purpose of completing the necessary preliminaries for application for a charter?

A. I think I was.

46. Have you ever been a director in complainant company?

A. No sir.

47. What if anything did you have to do with making up the list of directors elected at that time?

Ans. None.

48. When did you for the first time know who the directors were to be—was it before the meeting or at the time of the meeting?

A. It was at the meeting when they were named and voted
1229 on; that was the first knowledge I had of it.

49. Those gentlemen then named and elected as directors were all Peoria people, were they not?

Objected to as incompetent and immaterial.

A. Yes sir.

50. State whether or not you took the stock for which you originally subscribed?

Ans. Yes sir.

51. State how many assessments were made upon that stock and how many you paid?

(Objected to same grounds.)

A. My recollection is there was one assessment made of 20% which I paid.

52. Do you remember when, with reference to the granting of the franchise, that assessment was made and paid?

Objected to same grounds.

A. Some time thereafter.

53. Do you know what, if any, expenses had been incurred by

the company in the way of carrying out its franchise in the city of Peoria prior to the time of the levying of that assessment?

A. I do not; I was not a director and was not familiar with its management.

54. Did you or not see any statement of receipts and disbursements on account of any expenditures prior to the time of that levy?

Ans. I did not.

55. Did you know from time to time what work was being done pursuant to the carrying out of the license granted by the city of Peoria?

A. Not definitely, only casually; I took no active part in the matter whatever.

56. Who was in charge during that early period?

A. I think Mr. Little.

57. What, if anything, had Theodore J. Miller to do with
1230 it, within your knowledge?

A. I think Mr. Little was the active manager but Theodore J. Miller took quite a part in it also.

58. Do you know what, if anything, Sumner R. Clarke had to do with it?

A. I think he also took some interest in the matter but how much the various gentlemen took I do not know definitely.

59. What if any representations were made to you by any of the parties interested at the time you made your subscription, or before, with respect to the amount which you would be required to pay upon the stock for which you subscribed?

Objected to as incompetent and immaterial.

A. None.

60. Do you know who furnished the funds for the work prior to the time that 20 % assessment was collected?

Objected to as incompetent and immaterial.

A. Positively I do not, indirectly I was informed it was furnished through Mr. Walsh or the bank he was interested in in Chicago.

Complainant objects to the answer as hearsay and not responsive and moves the court to exclude it.

The MASTER: I don't think the answer responsive. The question calls for your personal knowledge, Mr. Luthy.

The WITNESS: I stated in the beginning that it was only from hearsay I got this.

(Mr. TICHENOR:)

61. Did that information come to you through others associated with you in the new enterprise?

Objected to as immaterial.

A. My recollection now is I got this information through our bank.

62. What if anything did you have to do with auditing
1231 accounts pertaining to the construction of the complainant company's plant in Peoria?

(Objected to as immaterial.)

A. I had nothing to do with it.

63. Did you ever see any such statement?

Ans. No.

64. Had you any knowledge from time to time as the work progressed as to what was being done or what prices were being paid for material and labor?

Ans. No.

65. During the time the company was in process of organization, or before, what, if any, knowledge had you as to the extent of the outlay necessary for the installing of a plant of the character which it was proposed to build in Peoria?

Objected to as immaterial.

A. I thought the outlay would require quite a large amount of money.

66. Did you have any figures upon the subject?

Objected to as immaterial.

A. No sir, but I had knowledge of the value of the stock in the other gas company and had some idea of its assets and the requirements of such a plant, but nothing definitely or minutely.

67. Had that knowledge been acquired through anyone interested in the old company, or was it from your own personal observation and conclusion?

A. I would say largely from my own personal observations and conclusions and at one or more times I was considering the purchase of some stock in the old company and possibly got some idea in that way; that might have been a year or two previous to this time, but being connected with a bank I naturally would have more or less knowledge of the various industries in the city.

68. Had the old company ever carried an account at your bank?

A. No sir.

69. Did you not at the time inquire as to the various build-
1232 ings and the various apparatus necessary to constitute a complete gas plant?

A. I think I will have to answer that I did not; I had a general idea of the old gas plant from its appearance as you would get it from the railroad and river passing it, which I have done very many times, but definitely I did not.

70. Did you know about the quantity of gas consumed in Peoria at that time?

Ans. No sir.

71. Had you any knowledge whatever upon that question?

A. Nothing definite.

72. Had you previously made any inquiry or investigation bearing upon the cost of construction, including material and labor, the expense of operation, the life of the various mechanical devices and appliances used in the gas industry ?

A. No sir, my general knowledge of the condition of values was that iron was quite low at the time, lower than it had been for years past, and that it was rather a favorable time for constructing a plant on account of material being low in value.

73. What was the price of labor at that time as compared with what it had been in recent years, if you know ?

A. I think it was about as low.

74. And those were all matters which entered into your final judgment ?

Ans. In a general way only ; I took no special interest in that.

75. State when, if at all, you first knew of the expenditures for construction in installing the Peoria plant of complainant company ?

(Objected to as immaterial.)

The MASTER : I don't see the materiality of it but he may answer subject to the objection.

A. I did not at first know that and don't know until this time ; I am not informed on that.

1233 76. You have never seen what purported to be a statement or summary of those expenditures ?

Ans. No sir.

77. What, if anything, have you had to do, by way of advice or otherwise, with the management and operation of the business of your company ?

(Objected to as immaterial.)

The MASTER : I do not see the materiality of it.

A. None whatever.

78. How many stockholder meetings of complainant company have you attended since its organization ?

A. I think I attended one other than the first one.

79. Are you able to state about when that was ?

A. I think it was about 1½ or 2 years ago.

80. What business at that time came before the stockholders for consideration and what was considered by them ?

Objected to as incompetent and immaterial.

The MASTER : I do not see the materiality of it.

Mr. TICHENOR : I would like to have it answered.

The MASTER : The witness may answer subject to the objection.

A. The particular business, as I remember it, was the consideration of increasing the capital stock.

81. State whether or not any reason was then given for such action on the part of the stock holders and by whom ?

Objected to as incompetent and immaterial.

The MASTER: How does the reason become material. Suppose they did not do it?

Mr. TICHENOR: I would prefer not to state my reasons at the present time for this line of examination.

The MASTER: All right, he may answer subject to the objection.

A. I think Mr. Little said that it was deemed best to increase the capital stock of the company; it was not gone into specifically.

1234 82. Did you from his explanation at that time, or from the statements made by others in that meeting, know why the capital stock was to be increased?

Objected to as incompetent, immaterial and assuming it was increased.

A. I think not.

83. State whether or not the question was voted on at that meeting?

(Objected to as incompetent and immaterial.)

A. The question was voted on, as I remember it; I am not certain whether the question was voted on to increase it or whether the question was voted on to give the directors the right to increase it, but my recollection is one or the other was voted on.

84. Who of the stockholders were present at that meeting, if you remember?

Objected to as incompetent and immaterial.

The MASTER: I don't think it a competent way to prove that fact. You are trying to prove what the record shows now.

Mr. TICHENOR: If council for complainant will produce the record, I will waive the question.

The MASTER: I presume you can get the record if you want it if it is material.

A. I took but very little interest in the matter; I was only there a very short time and was only a small stockholder. My recollection is now Mr. Little was there and I think Mr. Clarke and Mr. Miller and there may have been some others there; I am not certain. I took but very little interest in the matter, as I was not prominently connected with the company.

85. The capital of complainant company was originally $500,000. was it not?

Ans. Yes, I believe so.

86. And it was increased to two millions, was it not?

Objected to as immaterial.

1235 A. I don't remember now whether it was one million or two million.

87. You are unable at this time to state the reasons given, if any, of the necessity for increasing the stock, are you?

A. I had nothing to do with the increase of it; it was decided at the meeting to increase it, but I was not in control and could not give the reasons.

88. Were any reasons given to you?

A. I don't think there were at that meeting.

89. Did you ever know any reasons for doing so?

Objected to as incompetent and immaterial as to any of the issues in this case.

The MASTER: The master cannot see the materiality of it now.

A. The increase is a matter of record and whatever those records show are the facts.

90. Did you know at the time what was to be done with the stock represented by that increase?

Objected to as immaterial.

A. No sir.

91. Did you know afterwards?

(Objected to as immaterial.)

A. I don't know personally what became of the stock.

92. Do you know personally what became of any of it?

Objected to as immaterial.

A. I got some of the increased stock.

93. What did you pay for it?

(Objected to same grounds.)

A. I don't think it cost me anything.

94. How much did you get of the additional stock?

Objected to as immaterial and incompetent.

A. I got a trifle more than my original subscription, if I remember right.

95. Do you personally know what became of any of the
1236 rest of the increased stock?

A. No, personally I don't know, but I presume the others shared as I did.

96. When did you know that stock was to be given to you?

Objected to as incompetent and immaterial.

A. I don't think I knew until I got it.

97. Who gave it to you?

(Objected to same grounds.)

A. One of the representatives of the company; I am not certain whether it was Mr. Little or not.

98. What explanation was given in connection with the delivery of the stock to you, if any?

(Objected to same grounds.)

The MASTER: The question assumes some explanation was given. I think you should ask for what was said in connection with it without assuming something was said?

99. What, if anything, was said to you with reference to the stock at the time it was delivered?

Objected to as incompetent, immaterial and irrelevant.

A. I don't remember now what was said about it.

100. State whether or not in any of the proceedings representing the increase of capital stock, or up to the time this additional stock was delivered to you, you had received any information or advice from any of the people interested in your company to the effect that such increase, or any part of it, was to be distributed among the different stockholders?

(Objected to same grounds.)

A. I don't think I had any such information.

101. And you have no recollection that any explanation or statements were made to you at the time of its delivery?

Objected to same grounds.

A. I don't remember now what explanation was made; I got the stock and naturally it was quite acceptable.

102. What, if any, inquiries did you make with reference
1237 to why it was delivered to you?

Objected to as incompetent and immaterial.

A. I don't remember of making any inquiries.

103. What assessment has ever been made on that increase, if any?

Objected to same grounds.

A. I don't know, I presume none, I never paid any.

104. Have you ever known from anything said by any of the officers or stockholders of your company why that additional stock was delivered to you?

(Objected to same grounds.)

A. I think not.

105. And you don't know at this time why it was given to you, do you?

(Objected to same grounds.)

A. I may have my own ideas but whether they are correct or not I could not say.

106. Are those ideas based upon any statements that have been made by any of the parties interested?

A. No, nor I have never seen a statement of the assets or liabilities of the company.

107. Have you ever had any conversation with any of the officers or stock holders bearing upon that additional issue and why it was done?

(Objected to same grounds.)

A. I don't remember of any now.

108. What if any document pertaining to the management of the company, or to its stock, have you signed, or authorized to be signed for you, since its incorporation exclusive or the original subscription?

(Objected to as immaterial.)

The MASTER: I don't see the materiality of it.

Mr. TICHENOR: I think the master will before we get through.

The MASTER: The witness may answer subject to the objection.

A. I think I have given a proxy or a voting agreement for
1238 my stock. I don't recall of anything else.

109. Do you remember signing any document whatever with reference to the stock of this corporation, or any part of it, during the time you have been a stockholder, either before or after the increase?

(Objected to as incompetent and immaterial.)

A. A proxy or voting agreement; that is all I remember now.

110. Do you know for what purpose that proxy was wanted at that time?

(Objected to as immaterial and incompetent.)

A. I think I know; I think it was to keep the majority of the stock within the company as originally formed so it could not be scattered and possibly got hold of by outsiders. It was one way, I presume, of keeping the company from being bought up possibly. My small amount of stock, of course, would not cut much of a figure, but there might have been others in the same fix. I didn't know exactly the amount of stock held by each.

111. Is it not true that a portion of the scheme contemplated at that time when your proxy was called for was the formation of a combination or trust in which the whole of that stock or a part of it was to participate?

Objected to as incompetent, immaterial and irrelevent.

The MASTER: I do not see the materiality of that but the witness may answer subject to the objection.

A. I think not, that was not the understanding I had.

112. You understood its full import, did you before you gave your proxy?

Objected to as incompetent, immaterial and an attempt to inquire

into the private affairs of the witness and of a company that has nothing to do with the investigation.

A. The purport, as I understood it was, as I have already explained, to keep the majority of the stock in the hands of the company so it could not be bought up; it was to keep the company intact.

1239 113. Who was to hold or control that stock so provided to be kept together?

Objected to as incompetent and immaterial, irrelevant, and an inquiry into the private affairs of the witness and the witness has a perfect right to refuse to answer if he desires.

The MASTER: The witness may answer subject to the objection.

A. Summer R. Clarke and I will not be positive who the other gentleman was; Summer R. Clarke was the one I relied on very strongly.

114. They were named as trustees?

A. My recollection is there were two of them—Interrupted.

Mr. IRWIN: Complainant objects to this evidence as incompetent because counsel for defendant has no right to draw out from this witness the contents of an agreement if there is one as the agreemtn- would be the best evidence.

The MASTER: The question was simply whether or not they were to act as trustees; the agreement, of course, would be the best evidence of what their powers were.

115. Have you the original of that agreement in your custody or control?

(Objected to as incompetent and immaterial.)

A. I have not got it with me; I don't know whether I have it among my papers at my place of business or elsewhere or not. I may have such a paper but I don't know where it is now.

116. Will you make an examination and if you find it, produce it in court upon further request?

Ans. I will do so.

117. State whether or not that agreement still remains in full force and effect?

Objected to as incompetent, immaterial, irrelevant and not the best evidence.

A. I think it is in effect yet.

1240 118. About what time was it executed, if you remember?

Objected to same grounds.

A. I don't remember the exact time now.

119. Are you able to state approximately when it was signed?

The MASTER: I don't think that evidence competent now. I think you had better wait and see whether you can get the original. I

think that would be the best way to do and put your proof in so there can be no question as to its competency.

The WITNESS: I wish to state here that I have never given this matter but very little thought and have not paid much attention to it; my holding is not large enough.

120. What dividends have been paid to you on the stock issued to you on your original subscription and what dividends on your holdings of the increase, if any?

Objected to as incompetent and immaterial.

A. I have had no dividends on the increase; I don't know that I have ever had a dividend on the original stock; I don't believe it would be called a dividend.

121. How much money has been paid back to you, if any, by the company or any other person of the original amount which you paid on your first stock subscription?

Mr. IRWIN: Complainant objects to the question as incompetent, immaterial, irrelevant and an attempt to inquire into the private affairs of the witness, and I believe he has a right to refuse to answer the question if he sees fit so to do.

The MASTER: The witness may answer subject to the objection.

The WITNESS: I think that is a personal matter and unless the court insists I will not answer.

Mr. IRWIN: I think the witness is entitled to advise with his counsel as to whether he is compelled to answer that question or any question of the same import.

1241 The MASTER: I think that is a very material inquiry in this case, it cannot be otherwise.

Mr. IRWIN: It could not affect the issues in this case one way or the other if he got it all back or ten times as much back. It has nothing to do with the price of gas or with the cost of the plant and is simply an attempt to inquire into the private affairs of the witness, and it is unfair to the witness to attempt to do it. If I were counsel for the witness I would tell him very quick what to do and take my chances with the court.

The MASTER: Suppose it should turn out in this case that the money paid back to these stock subscribers was equal to a dividend of 25 or 30 per cent. on their stock, would you say then it was not a material inquiry?

Mr. IRWIN: Yes sir, I should say it was not unless the purpose for which it might have been paid was shown. The only point at issue here is what is the cost or what can gas be produced for and what is the amount of capital invested.

The MASTER: The master takes this view of it, that the dividends paid to stockholders is one criterion upon which to judge of the reasonableness of this ordinance. If it appears the stockholders have received money back that was not paid to them by reason of the

earnings of the company, that is a matter for you to show on cross examination. I think this is a material inquiry and the witness may answer the question.

A. The amount of my payment was 20 per cent. and interest on the same.

122. For what time was the interest paid?

Objected to as incompetent and immaterial.

A. I think it was for the bulk of the time that the money had been paid. If I remember correctly, I figured the rate of interest at the time and found it was not quite equal to the time, but it
1242 nearly covered the time the money had been out but I forget now whether the interest is a 5 per cent. or 6 per cent. per annum rate.

123. How long before that money was paid to you did you know that it was to be paid?

(Objected to as immaterial.)

A. I didn't know before that it was to be done.

124. Who paid it to you?

(Objected to as immaterial.)

A. It was a representative of the company, I don't remember whether it was Mr. Little or not but rather think it was.

125. Do you remember at this time in what form it was paid?

Objected to as incompetent and immaterial.

A. I think it was in the form of a check.

126. Whose check was it?

(Objected to same grounds.)

A. I could not say, I don't remember now.

127. On what bank was it drawn?

(Objected to same grounds.)

A. I don't remember now; the check was paid though; I never heard from it afterwards.

128. Was this money to which you have referred the only money paid to you on your stock or otherwise by the company?

Objected to as incompetent and immaterial.

A. Yes sir.

129. What verbal statements, if any, were made to you by the person that paid you that money at the time it was done?

Objected to as incompetent, immaterial and already answered.

A. I don't remember definitely now, there might have been a statement like this: "Here's a check reimbursing you for the amount paid"——

Mr. IRWIN: I object to the witness stating something that might have been said; if he don't remember what was said, he should say so.

The WITNESS: I don't remember definitely what verbal
1243 statements were made.

130. Were any statements of account, or matter in writing, presented to you at that time in connection with the check?

Objected to as incompetent and immaterial.

A. I don't remember now but it seems to me there was a plain receipt for the amount of money, but I am not certain as to that; it might have been that the check was to my order, or I might have signed a plain receipt for so much money; I am not certain.

131. What, if any, inquiries did you then make with reference to it?

(Objected to same grounds.)

The MASTER: I don't think it material.

A. I don't remember of any now.

132. I think you testified that you had no knowledge or notice that such money was to be paid to you until it was actually done?

Ans. That is my recollection now.

133. Have you since that time ever known why it was done from anyone connected with the management of complainant company?

Objected to as incompetent and immaterial.

A. No sir; I don't think I have had any information from any one connected with the company; I have my own ideas about it.

134. If you have no knowledge upon the question I don't care to have you speculate?

A. I don't remember of any such knowledge; I have my own ideas about it, as I understand matters of that kind are not infrequent in organizations.

135. I stated a minute ago I did not care for your speculations but wanted your knowledge?

A. I don't remember of any personal conversation with any of the officers of the company in relation to it since that time.

136. Do you know of your own personal knowledge whether the other stockholders received funds from the company substan-
1244 tially in the same way as you did and as you have described?

Objected to same grounds as before.

A. No sir; I don't of my own personal knowledge.

137. If you are able to find the document to which you have referred I wish you would produce it in court at 10 o'clock to-morrow morning and if you are unable to find it notify me by telephone?

A. All right.

138. What, if anything, have you had to do by way of advice or otherwise, with fixing the price of gas which your company has charged since it began its service?

Ans. Nothing whatever.

139. Do you know who has fixed the prices?

A. Personally I don't know; I presume the management has.

140. Do you know of any changes that have been made in the directory since the incorporation of the company?

Objected to as immaterial.

A. I don't know what changes have been made.

141. Do you know who the directors are now?

Ans. No sir;

142. Do you remember in what manner the directors of your company are elected, or how vacancies are filled, if they occur during a term?

(Objected to as incompetent and immaterial.)

A. I don't remember now; I presume it is done according to the by-laws; personally I could not state.

143. Have you ever been present at any stockholders' meeting when directors were elected?

(Objected to same grounds.)

A. I have stated already I was at the first meeting.

144. I mean besides the first meeting?

Ans. I don't remember of any now.

145. Are you able to state from recollection whether or not you have ever received any notice of a stockholders' meeting except as to the one at the time you perfected your preliminary arrangements for incorporation?

(Objected to as immaterial.)

A. I think I have received such notices and think I have
1245 attended one meeting; that is all I remember of at present.

146. Do you know whether O. J. Bailey is still a director of complainant company?

Ans. I don't know.

147. Do you know whether Philo B. Miles is?

Ans. I do not, no.

148. At this meeting of stockholders which you attended were any directors elected?

(Objected to as immaterial, not best evidence.)

A. This first meeting?

149. No, I mean the subsequent meeting?

A. I think not at that one; it was a special meeting as I remember it.

150. Do you know Lyman A. Walton of Chicago?

A. I once upon a time met a gentleman in Chicago by that name but I could not say positively now—I think I met the gentleman in Chicago.

151. Do you know whether or not he has any interest in complainant company at the present time?

Ans. I don't know, sir.

152. You don't know whether he is a stockholder, director or officer?

Ans. No I do not.

153. Do you know whether John R. Walsh has any interest in your company?

A. From my own personal knowledge I do not; indirectly I was led to understand he was quite an interested party.

154. When did your acquaintance with Mr. Little begin?

A. I think about the time this company was formed.

155. Did you know at that time, from your connection with the complainant company, what position he was to occupy in said company?

A. I would not know so through any knowledge I had gathered from the meetings, but at other times, from parties connected with it, I was given to understand he would take charge of affairs here as he was an experienced man in the manufacture of gas.

1246 Complainant objects to the foregoing answer as hearsay and not responsive and move- the court to exclude it.

156. Your meeting with him was subsequent to the making up of the subscription list was it?

Objected to as incompetent and immaterial.

A. I don't remember whether he was present at the time of the signing of the stock list or not but I rather think he was; I am not positive now, he might and might not have been.

157. Did you know prior to the time you subscribed how extensively it was proposed to build with reference to the demand for gas in the Peoria district?

(Objected to as immaterial.)

A. I don't know that I knew definitely; I understood they were to build quite extensively; how I gathered that information I could not state just now, but it was a business transaction and they were to prosecute the business; the company was formed for the purpose of doing business and doing it extensively.

158. Did you know at that time whether or not it was the intention of the company to install a plant of sufficient capacity to supply the entire demand in the Peoria district?

Objected to as immaterial.

A. From my own personal knowledge I did not, but going into

this business I understood they would install a plant and furnish gas—do a legitimate business.

159. But you don't know how large a plant they proposed to build?

A. I was not consulted on that; my interest was so small I naturally would not be.

160. Do you know where the funds of the complainant company has been kept since its organization?

Objected to as immaterial.

A. They keep an account in the Merchants national bank
1247 and I think also have one in Chicago.

161. Where are the bills of the company paid and where have they been since its organization?

Objected to as incompetent and immaterial.

A. I don't know.

162. Do you know whether or not the company checks against its account in your bank for those purposes?

Objected to same grounds.

A. Really I don't know; my supposition would be that some of the bills are paid in that way but I do not pay the checks personally or attend to that part of the business.

163. Do you know the magnitude of the account carried in your bank during the time the company was engaged in the construction of its plant?

(Objected to same grounds.)

A. I do not.

164. Do you know of any other account carried by complainant company except the two to which you have referred?

Objected to as incompetent and immaterial.

A. I do not; those are the only two I know about but the company may have others; I have nothing to do with the management.

165. Is it not true that you are reasonably familiar with the baking business in Peoria?

(Objected to as immaterial.)

A. Reasonbly so, yes sir.

166. I will ask you if it is not true that some five or six months ago the complainant company opened an account in the Commercial national bank of this city?

Objected to as incompetent and immaterial.

A. If they have such an account I don't know it; I don't know whether they have or not.

167. Do you know where the funds realized from the assessment of twenty per cent., to which you have referred, was deposited?

1248 Objected to as incompetent and immaterial.

A. I do not.

168. In what manner did you pay your assessment, by check or in currency?

Ans. By check or draft, I am not certain which.

169. Do you remember who made the collection?

Objected to as immaterial.

MASTER: I do not see the materiality of this testimony but the witness may answer subject to the objection.

A. I think the notice was sent out to pay the treasurer and if I remember correctly I remitted to him in Chicago.

170. Do you remember who the treasurer was?

A. I don't remember his name now, but his address was given as Chicago; I might possibly find a copy of the remittance which would give it.

171. You might look for that paper also when looking for the other papers and telephone me with regard to that. What if anything did you have to do with procuring a license or a franchise from the city to occupy the streets and alleys for the purpose of constructing complainant's plant?

A. I had nothing to do with it.

172. During the time elapsing since the organization of complainant's company what, if any, knowledge have you had from time to time of the quantity of gas it has been furnishing?

A. I am not informed on that subject.

173. Do you know what proportion of the entire gas consumption in the Peoria district complainant company is furnishing at this time?

Ans. I do not.

174. Do you know what territory complainant company occupied at the time it began to furnish gas as compared with the territory occupied at that time by the Peoria Gas Light and Coke Co.?

A. I do not.

1249 175. Are you familiar with the territory which it occupies and to which it is now furhishing gas?

Ans. I am not.

176. Have you had any knowledge of either of those subjects since complainant company began to furnish gas here?

Ans. No.

177. Have you at any time had any conversation with Mr. Little with regard to the prices or rates charged, or to be charged, in Peoria for gas?

A. I have a number of times ridden up on the street cars with Mr. Little and when we got off at North street and walked up a block together the subject might have been mentioned, but there was nothing said of any definite character, or nothing that would affect the action of the company or its prices. I was never a director

in the company and never took but little interest in it for I had not the time to spare.

178. Did you ever know to whom that subject was entrusted?

A. No sir, but presume of course it was in the hands of the management of the company.

179. Look at Exhibit "19" in evidence in this case and state whether you ever saw it before?

A. I think I saw this or a duplicate of it.

180. State whether or not that paper bears your genuine signature?

A. No sir; but my name is here; I asked Mr. Littlewood to sign my name for me and it was signed with my authority.

181. Had you seen and examined the paper before you authorized him to sign it in your behalf?

A. I saw as I remember either this or a duplicate of it; I read it over hurriedly and I would not be apt to remember it very long, not being in that business.

182. Did you know at that time that an ordinance pertaining to the obtaining of a franchise or license by complainant company in Peoria was then pending before the city council or that it was about to be presented?

1250

A. I knew of the time it was to be presented.

183. Had it been presented at the time you authorized the signing of that paper?

A. I don't remember exactly; this matter took its regular course; I don't remember any irregularity about it.

184. State whether or not at the time you authorized Mr. Littlewood to sign that paper in your behalf you believed the statements and representations contained in Exhibit "19" to be true and if the complainant company were granted a franchise or license to occupy the streets and alleys of the city of Peoria for the purpose of constructing a gas plant in Peoria, as it was then seeking by ordinance or as it was about to ask, would be carried out in good faith?

A. I had no reason to doubt but what they were acting in good faith.

185. Did you believe at that time that the persons who were subscribers to the corporation were able financially to carry out the statements and representations embodied in Exhibit "19" in case a license should be granted and that it would be done?

Objected to as incompetent and immaterial.

A. I had no reason to doubt but what the company would be on a good financial basis and that they would prosecute the business of furnishing gas vigorously and this would come within their province and they were going into the field to furnish gas.

186. That hardly answers my question.

A. On the other hand, these people do not state that they personally and individually, jointly and severally, guarantee that the

entire amount of the stock required will be furnished by
1251 themselves. This is the usual business procedure in such matters, is it not?

187. (Int. 185 repeated to witness.)

A. I might state that about this time I knew the amount of stock that I was allowed to subscribe for and I expected to furnish sufficient—Interrupted.

The MASTER: I don't think you understand the question.

(Int. 185 repeated to witness.)

Ans. Yes sir.

Cross interrogatories by Mr. IRWIN:

1. You have testified about receiving some money back from the company—that money you received from the company was not considered as a dividend upon your stock was it?

Objected to as calling for a conclusion and incompetent, especially as the witness has already testified he has no knowledge whatever as to why it was paid to him.

The MASTER: I don't think the question proper in form. Let the witness state what he knows about it if he wants to and on what account it was received.

Mr. IRWIN: I am getting at it in my own way on cross examination. I don't think, considering the leading questions that have been permitted to be asked on direct examination, that I ought to be barred on cross examination from asking leading questions.

The MASTER: Not at all, but the question is objectionable in other respects; it assumes to answer in itself the question put. I don't think you ought to put a question and put the answer at the same time in the mouth of the witness.

Mr. IRWIN: I am not doing that; it is for him to answer whether it was considered a dividend or not.

The MASTER: I don't think the question proper but he may answer it subject to the objection.

A. I did not consider it a dividend and I think in my previous testimony I so stated.

252 2. Do you know whether it was paid out of the earnings of the company or not?

(Objected to as immaterial and incompetent.)

A. I don't know. (I presume it was paid out of the sale of bonds.)

Defendant moves the court to exclude that portion of the foregoing answer enclosed in brackets as not responsive and incompetent.

The WITNESS: I am sorry I don't know more about this matter but really I know little about it; in a business way you get ideas

and they are most likely correct but you cannot state definitely where you get the information and it would not be at any meeting.

3. Have you ever received any stock dividends whatever upon your stock from the earnings of the company to your knowledge?

Objected to as calling for a conclusion.

A. No dividends from the earnings of the company that I know of.

4. Do you know of any stockholder ever having received a dividend from the earnings of the company upon his stock?

Objected to same grounds.

A. I do not.

Re-direct interrogatories by Mr. TICHENOR:

1. What knowledge have you of the earnings of the company from the time it began to operate?

A. I don't know what the earnings of the company have been.

2. Have you ever seen any statement pertaining to its earnings?

Ans. No.

3. Have you at this time any knowledge whatever as to what it has earned?

Ans. I have not.

1253 JACOB HECHT, called on behalf of defendant, being first duly sworn deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Jacob Hecht; No. 2109 South Adams street, Peoria, Ill.

2. You have been a resident of Peoria for a great many years?

A. Yes.

3. What is your business?

Ans. Meat business.

4. State whether or not you have at any time been a member of the city council of the city of Peoria?

Ans. Yes.

5. Were you a member at the time of the passage of the ordinance granting to the company now know- as the Peoria Gas & Electric Co., a license or franchise to use the streets and alleys of the city of Peoria for laying pipe, etc., in connection with its gas plant?

Ans. Yes sir.

6. Do you remember the fact that such an ordinance was presented to the council and passed?

Ans. Yes.

7. Do you remember how long the ordinance was pending?
A. I don't know; it must have been three or four weeks; I remember it was passed the night of election.
8. How many of the council meetings did you attend during the time that ordinance was pending?
A. I attended every meeting.
9. Were you present at the time it was first presented to the council?
Ans. Yes.
10. During the time this ordinance was pending state whether or not you had any conversation with any of the gentlemen interested in the new company, whose names appear on Exhibit "19" now shown you, with respect to that ordinance?

Objected to as incompetent and immaterial.

A. I talked with Theodore J. Miller; he was the only one
1254 so far as I can remember I talked with upon that subject except Bob Clark I remember talking with on the council meeting night when it was passed.
11. Do you remember having seen this paper marked Exhibit "19" during the time that ordinance was pending?
A. Yes, I saw this paper or one like it.
12. Are you able to state at this time how long it was before the passage of that ordinance that you talked with Mr. Miller about it?
A. Yes, maybe a week or two before he said there would be a petition before the council and an ordinance.
13. Was that before the ordinance had been presented to the council in the first instance?
A. Yes and when it was before the council also.
14. So you had more than one talk with him with regard to it?
A. Yes.
15. What was the conversation you had with him on the first occasion to which you have referred?

Objected to as incompetent and immaterial.

A. Well, he said that there was a new company organized of home capital and home people and the result would be cheaper gas and that I could work for it, that it would give work for a good many people and naturally would reduce the price of gas.
16. What was your second conversation with him upon the same subject?

(Objected to same grounds.)

A. He wanted the ordinance passed so they could go ahead and do the work before cold weather commenced; it was on election night and he came in the council and wanted it passed that night so they could go ahead and commence work.
17. Was that the night it was actually passed?

A. Yes and that was the night when Mr. Lynch was elected
1255 mayor.

18. What, if anything, was said that night with reference to the reduction in the price of gas in case there was competition?

Objected to same grounds.

A. Well, he said if there was competition it would naturally lower the price of gas which it had already done at that time. I knew at that time the old company had reduced the price of gas and the result would be that the people would get cheaper gas.

19. State what, if any, influence the representations made to you with regard to it being Peoria people and Peoria capital interested in the new enterprise, and also that there would be a reduction in price from competition, had with you in making up your judgment as to what course you would take with reference to the ordinance?

(Objected to same grounds.)

A. It had a great deal to do with it. I made up my mind I would vote for it on account it would give cheaper gas to the people.

20. Did you know at that time that anybody outside of Peoria had any interest in the new company that was then seeking to get a franchise from the city?

A. Not that I know of; they were all home people, home capital so far as I knew.

21. You voted in favor of the ordinance upon its passage, did you?

Ans. Yes sir.

22. Did you believe at that time that the statements and representations made in this paper "Exhibit 19" were true?

Objected to as incompetent and immaterial.

A. I thought they were; I believed the statement.

Cross interrogatories by Mr. ABBOTT:

1. In your conversation with Mr. Miller was not the fact brought out that the erection of this new industry would give em-
1256 ployment to a number of idle people in the city in the construction of the plant and laying of the mains and services?

A. Yes sir.

2. Is it not a fact that that was one of the considerations in your mind which induced you to vote for the ordinance?

A. No sir.

3. Didn't it have any effect in influencing you in making up your mind, that a large amount of money would be distributed to the laboring men of the city?

A. That did not alone influence me.

4. I did not ask you if it was that alone, but did not that have some effect in helping you to make up your mind about it?

A. Well, it might have had something to do with it.

5. Did it not as a matter of fact have something to do with it?

A. Am I allowed to express myself in my own way?

6. Yes.

Ans. If I had known at that time what I know now I never would have voted for it.

Answer objected to by complainant as not responsive and excluded by the master.

7. (Int. 4 repeated to witness.)

A. It might have had some.

8. In the talk between you and Mr. Miller he stated substantially did he not, that competition would probably reduce the price of gas?

A. That it naturally would, that it had already reduced the price at that time and they would furnish cheap gas to the city of Peoria. I voted for a franchise once before and they never came here from Chicago.

9. That cheapening of gas by the old company had been made after the application for this ordinance before the city council?

A. Yes.

1257 10. These conversations, as I understand you, all took place before the passage of the ordinance by the city council?

A. Yes.

11. Was it not also a subject brought out in those conversations that the new company, if formed, would not sell out its franchise to the old company?

A. Yes, that they would not sell out to the old company.

12. Is it not a fact that it was insisted that they should not sell out to the old company but should go ahead in good faith and erect a plant of their own?

Ans. Yes sir.

13. Did not the expectation that they would erect a plant of their own and not merely procure the franchise and sell it out have some influence with you in making up your mind about your vote?

A. That they would not consolidate together.

14. They did go ahead, erect a plant and lay mains and service pipes?

Ans. After the passage of the ordinance, yes.

15. The conversations you had with Mr. Miller then, as I understand you, were substantially the same as the representations in the paper marked "Exhibit 19"?

Ans. About the same.

Adjourned by agreement until Tuesday, April 29, 1902, at 10 a. m.

United States circuit court room, Government building.

PEORIA, ILLINOIS,
TUESDAY, *April* 29, 1902—10 o'clock a. m

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. Irwin and Mr. E. C. Ritcher appearing for complainant. Mr. Hen Mansfield and Mr. F. H. Tichenor appearing for defendant.

1258 THOMAS N. GORMAN, called on behalf of defendants, bei first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Thomas N. Gorman; 1020 S. Adams street, Peoria, Ill.

2. You have been a resident of Peoria for a number of yea have you not?

Ans. About 35 years.

3. What is your business?

A. I am an employé of the Peoria Gas Light & Coke Co.

4. How long have you been employed by that company?

A. About 11 years.

5. In what line of business were you engaged prior to that time

A. I worked for a number of years in a grocery store with m father; prior to my being employed by the gas company, I wa chief of police of this city for two years and also worked in the r corder's office for one year.

6. In what different capacities have you been employed by th Peoria Gas Light & Coke Co.?

A. My position at all times has been a clerical one until probabl the last 2 years.

7. In the performance of the duties devolving upon you, did yo have anything to do with the accounts of the company?

Ans. No.

8. Did you have to do with the collection of gas bills and wor of that character?

A. Yes sir, my work principally at all times was that which migh be termed cashier, waiting on the people at the window—entirely in the office.

9. What has been your position during the past two years?

A. Well, it has been on the line of what might be termed resident manager for the company.

1259 10. During the time you have been connected with the Peoria Gas Light & Coke Co., have you become familiar with its plant and the territory in which it has been operated?

A. No sir; I have a knowledge of the territory in which we oper ate but so far as any knowledge is concerned with reference to its plant I know nothing of it.

11. You are not skilled then in the manufacture and distribution of gas?

Ans. No, I don't know a thing about it.

12. As resident manager for this company, what has been your duties and what have you done?

A. As resident manager, my duty consists of giving orders in and about the office to the foreman in charge of the shop relative to the work to be done, such as setting meters, taking out meters, putting in service pipes; matters of that kind is all I have any authority in.

13. Can you state more definitely than you have already done the date when your service as such resident manager began?

A. I could only date it from the time the change in ownership of the company took place and that I cannot call to memory now.

14. Have you anything in your office which will refresh your recollection upon that question and from which you can testify with certainty?

Ans. Yes sir.

15. I wish you would inform yourself and be prepared to answer that question definitely at a later time.

A. All right sir.

16. Since the time you have been resident manager, what if anything have you had to do with the plant itself—I mean the manufacturing plant and distributing plant as a whole?

A. Nothing at all; there is another gentleman in charge of that.

17. As such resident manager from time to time, has the
1260 work, its character, etc., either directly or indirectly passed under your observation?

A. Only that particular part of the work I have had connection with which I referred to a few minutes ago.

18. Who during that time has had charge of the plant itself?—I am speaking now of the manufacturing plant and the pipe system as well, taken as a whole?

A. During that time there was a man named Frank Lane who had charge of the manufacturing plant and later there was a man named Eustis in charge of the manufacturing plant, and during all the time, so far as the laying of mains, services and the distribution of gas, the man in charge of that particular department has been Dan Gorman.

19. And he still occupies that place, does he not?

A. Well that and other duties; he is still employed by the company.

20. And that is one of his duties at the present time?

A. That is one of his duties.

21. For how long a period of time did Mr. Lane occupy the position to which you have referred?

Objected to as immaterial.

A. I could not say; I have an idea it was probably 6 months or more of the two years I have referred to.

22. Will the records or any other material in your office show when he severed his connection with the company or discontinued that service?

A. The records will probably show that, but I have not charge of them or anything to do with them.

23. Who has charge of those records?

Ans. Mr. Bickwell.

24. What position does Mr. Bickwell occupy with your company?

1261 A. He is the book-keeper—the gentleman that looks after the finances of the company.

24. What is his official title, if he has any?

A. I do not know of any title other than that of book-keeper.

25. How long has he been occupying that position?

A. I think the greater part of the two years I have referred to, or to be more definite, he came here shortly after the change and has occupied that position ever since as book-keeper. When I speak of the change, I mean the change of ownership.

26. Has he any other duties in connection with your company except as book-keeper?

A. I said he was book-keeper and also looked after the finances of the company?

27. He handles the money for the concern, does he?

Ans. Yes.

28. His duties are entirely confined to the office?

Ans. Yes.

29. Who did you say took Mr. Lane's place as superintendent of the plant and distributing system?

A. Mr. Eustis succeeded Mr. Lane in charge of the plant and I said Dan Gorman was the man who had supervision of the mains and service pipe that were laid.

30. How long has Dan Gorman been connected with your company?

A. Oh, he was with the company, I believe, before I was born: he was also with the water company for awhile, also with the city and then back with the gas company again. His last connection with the gas company, I think, dates back possibly 12 or 15 years.

31. Will you define as accurately as you can what Dan Gorman's duties with the gas company has been during the time you have been associated with the company?

(Objected to as incompetent, immaterial.)

A. His duties have consisted of what I have referred to, laying mains and also supervision of the laying of service pipe.

32. And he was a superintendent in that department, was he?

1262 A. He had charge of that department; of course his orders in regard to the work he done emanated from others in authority, other than himself; he had his orders from others and simply carried them out.

33. Who is this Mr. Eustis that succeeded Mr. Lane?

A. I don't know that I can tell you who he is; he is a man employed by the gas company and is in charge of the plant; I don't know as I can give any more information; he was a stranger to me when he came here.

34. Do you know about when he came here?

A. I could not tell exactly; the only way I can locate the time would be I think of the two years' time referred to that Mr. Lane remained with the company about six months and the balance of the time Mr. Eustis has been with the company.

35. Do you know whether or not Mr. Eustis is a man skilled in the gas industry?

Ans. I don't know a thing of it.

36. State whether or not in that capacity Mr. Eustis is subject to your authority and direction?

Ans. No sir.

37. To whom does he report, if to anyone?

Objected to as immaterial.

The MASTER: I do not see the materiality of it now, gentlemen, but it may become material. The witness may answer subject to the objection.

A. He reports to Mr. Bickwell.

38. What is Mr. Eustis' full name?

A. I must confess I am so well acquainted with him that I cannot tell you.

39. During the time he has been acting in the capacity mentioned for your company, has he had any other business in the city of Peoria?

Ans. I don't know.

40. How frequently have you seen him during the time he
1263 has been employed by your company?

A. Probably two or three times a week.

41. For what purpose?

(Objected to as immaterial and incompetent.)

A. I can see him going to the gas works when I am coming up from that end of town to my own work.

42. You have not actually transacted any business with him during that period of time?

Ans. No sir.

43. Does he ever come to your office for any purpose?

Objected to as immaterial.

The MASTER: It may become material; I do not see the materiality of it now but I presume it will be made material. The witness may answer subject to the objection.

A. I have seen him in the office.

44. Do you know what he was there for?

Objected to as immaterial.

A. No, I do not.

45. What portion of his time is spent with your company?

A. I don't know.

(The MASTER:)

46. Is Mr. Eustis in Peoria at the present time?

The WITNESS: I presume he is.

The MASTER: Mr. Tichenor, why do you not subpoenae Mr. Eustis and learn about him from himself. What is the use of wasting time with this witness about matters of which he knows so little?

Mr. TICHENOR: I supposed Mr. Gorman knew more than he appears to know about it.

(Mr. TICHENOR:)

47. State whether or not your plant at the present time is manufacturing and delivering gas?

Objected to as incompetent, immaterial, irrelevant, and has nothing to do with the issues in this case.

A. I could not tell you from my personal knowledge.

1264 48. Have you at any time, since you have been in the service of the Peoria Gas Light & Coke Co., known whether or not it was manufacturing and distributing gas?

Objected to same grounds as before.

A. Yes sir.

49. When and up to what time did you have such knowledge?

Objected to as incompetent, immaterial, and irrelevant.

The MASTER: This is only for the purpose of testing the knowledge of the witness on this matter and he may answer subject to the objection.

A. I have not known for some time. I have not visited the plant in possibly four years and I would like to add that formerly during my time employed by the company I made it my business and it was part of my duty to go to the plant on pay days to pay the men, but it has been possibly four years since I ceased doing that work.

50. As I understand, then, you have not seen the plant since that time?

A. I have seen it, for I can see it from my yard, but I have not been on the premises for that length of time.

51. Are you able to tell from your premises whether or not the plant is in operation?

Objected to as incompetent and immaterial.

A. I can tell.

52. Is it or is it not in operation at the present time?

Objected to same grounds.

A. Outside appearances would indicate it was not.

53. How long has that been the situation?

Objected to same grounds.

A. I don't know.

53. Has it been for several months or only a few weeks?

1265 Objected to same grounds.

A. I don't know.

54. State whether or not you knew that the plant was to be shut down at or about the time it was actually shut down?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I do not see the materiality of it but he may answer subject to the objection.

A. I didn't know anything about it.

55. So far as your duties are concerned and so far as pertains to the work done in your office, what change did take place in the shutting down of your manufacturing plant?

Objected to as incompetent, immaterial, irrelevant, having nothing to do with the issues in this case and assuming something the witness has said twice he didn't know about.

The MASTER: As I said before, I do not see the materiality of this evidence, but I must assume it will be made material or it will have no weight one way or the other. The witness may answer subject to the objection.

A. None that changed any duties of mine.

56. What if any changes were made with reference to the collection of bills for gas consumption in your office?

Objected to as incompetent, irrelevant and immaterial.

The MASTER: Same ruling.

A. No change.

57. State whether or not since the first of September, 1901, your duties, and the work actually performed in your office, have been just the same as they were prior to that time?

Objected to as incompetent, immaterial and irrelavent.

A. My duties are the same—consists of the same work.

58. How about the remainder of the work performed in the office?

(Objected to same grounds.)

1266 A. There is no change in that so far as I know.

59. What help is employed there besides Mr. Bickwell and yourself as resident manager?

Mr. IRWIN: Complainant objects to the question as incompetent, immaterial, irrelevant, and as this is an inquiry into the private affairs of a different corporation, one not a party to this suit, I do not think the witness has any right to tell or give away any of the affairs of that company or its business in this proceeding, and I think it his duty to refuse to do it.

The MASTER: One of the allegations of the bill in this case and one of the lines of complainant's proof was that the business of the complainant company was economically administered. Now, why has not the defendant the right to go into the question of the business affairs of another gas company doing business in the same locality to determine the question as to whether or not complainant's claim in that respect is true?

Mr. IRWIN: I don't think they have.

The MASTER: I think it may be material and the witness may answer subject to the objection.

A. There are three others employed in the office, other than Mr. Bickwell and myself.

60. Who are they and what are their duties?

Objected to as incompetent, immaterial and irrelevant.

A. George Alfs, Frank Kelley and Sam Benson are employed there.

61. What does Mr. Kelly do?

Objected to same grounds.

The MASTER: I don't think it will do much harm to show what their duties are one way or the other. The witness may answer subject to the objection.

1267

A. He waits on the window, makes out gas bills.

62. What does Mr. Benson do?

(Objected to same grounds.)

A. Mr. Benson sells gas stoves and assists in the clerical work around the office.

63. Does he also work on the books and assist in making collections at the window?

(Objected to same grounds.)

A. Well, at times he assists in making out gas bills.

64. What work does Mr. Alfs do?

(Objected to same grounds.)

A. He assists in the selling of gas stoves, assists in the making out of gas bills and assists in waiting on people at the window.

65. How long has your office force been substantially the same as it is at the present time?

Objected to as incompetent, immaterial and irrelavant.

A. Oh, I would say two and possibly three years, that is, in number.

66. Since the time of the change in ownership, to which you have referred, what has been your monthly office expenses including help, rent and any other items you may see fit to mention?

Objected to same grounds.

A. I don't know.

67. Who employs and discharges the office help?

Objected to same grounds.

The MASTER: I don't see the materiality of it; I do not see how that tends to throw any light on this inquiry one way or the other.

Mr. TICHENOR: I want to find out whether the resident manager has anything to do or not. I desire to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. It is a hard question to answer; there has been nobody
1268 hired or discharged.

68. How long has Mr. Alfs been employed there?

A. Three or four years; he was there before the change took place.

69. Who pays their salaries?

(Objected to same grounds.)

The MASTER: I do not see the materiality of it.

Mr. TICHENOR: I would like to have it answered.

The MASTER: He may answer subject to the objection.

A. Mr. Bickwell pays me; I don't know anything about who pays the others.

69. Do you know what amount of office rent is paid?

Objected to same grounds.

A. I don't know.

70. What other employés, in or about the office or office building, has your company at the present time and has it had during the past few months?

Objected to as incompetent, immaterial, irrelevant and already asked and answered.

The MASTER: He may answer it if there is anything more to be said on the subject.

A. I have given you the names of all the employés in the office.

71. How many men are employed in your workshop, in connection with your office, if you have one?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know.

72. Have you still a work shop in connection with your plant?

Objected to same grounds.

A. We are still doing work.

73. Yes, but do you still maintain a work shop?

A. We do not maintain a work shop where the shop was
1269 formerly maintained in the rear of the office.

74. When was that work shop discontinued?

Objected to same grounds.

A. I could not say just when—some few months ago.

75. How many men, outside of those whose names you have given, are now, and have been for some months past, in the employ of your company?

(Objected to same grounds.)

A. I don't know.

76. What are Dan Gorman's duties at the present time and what have been his duties during the time elapsing since the changes to which you have referred?

Objected to same grounds and also because already asked and answered.

The MASTER: I think so; I think the witness stated his duties that he had charge of the distributing system.

77. Is that your answer at the present time?

A. I don't know what Dan Gorman's duties are at the present time.

78. Do you know whether or not he is paid from your office?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know.

79. Do you know whether or not he is in the employmentt of your company?

(Objected to same grounds.)

A. I don't know.

80. Do you know whether or not Mr. Eustis, to whom you have referred, is employed by your company?

Objected to same grounds.

A. I don't know.

80. Have you ever known?

(Objected to same grounds.)

A. Yes sir.

81. Up to what time did you know he was in the employ-
1270 ment of your company?

(Objected to same grounds.)

A. The time I don't know.

82. State if it is not a fact that Mr. Eustis, to whom you refer, has,

ever since he came to Peoria, been identified with the complainant company as its superintendent in charge of its works, or in some other similar capacity?

(Objected to same grounds.)

A. When he first came to the city, I know he was employed by the Peoria Gas & Electric Co.

83. For how long a period of time did you know he was so employed?

(Objected to same grounds.)

A. I could not name the time.

84. Have you ever known of his severing his connection with that company?

(Objected to same grounds.)

A. I don't know.

85. Do you know, as a matter of fact, whether your company has ever paid Mr. Eustis' salary or any part of it?

Objected to same grounds.

A. I don't know.

86. In what capacity was Mr. Eustis employed by the Peoria Gas & Electric Co. during the time you knew of his connection with it?

(Objected to same grounds.)

A. He had charge of the manufacturing plant.

87. State whether or not your company is still putting in gas mains and service pipe as it has done in years past?

Objected to same grounds.

The MASTER: How does that become material?

Mr. TICHENOR: I think it will; if I didn't think so, I certainly would not ask it.

The MASTER: The witness may answer subject to the objection.

A. We are still putting in service pipe; there has not been any gas mains laid for quite awhile that I know of.

1271 88. That is your company has not laid any gas mains?

Objected to same grounds.

A. That is the company I refer to, the Peoria Gas Light & Coke Co.

89. How many service pipe has your company put in since September 1, 1901?

Mr. IRWIN: Complainant objects to this question on the same grounds, and I will further state that is inquiring into the private affairs of another company, not a party to this proceeding and I do not think the witness as an employé of that company has a right to divulge the business of that company.

The MASTER: The witness may answer subject to the objecti

A. I could not tell you.

90. Have you a record of it in your office?

Objected to same grounds.

A. I have no record of it.

91. Is there a record of it in your office?

A. I don't know.

92. If there is such a record, in whose charge would it be?

Objected to same grounds.

A. I presume it would be in the keeping of Mr. Bickwell.

93. Do you know what has been the expense of placing such s
ice pipe?

(Objected to same grounds.)

A. No sir.

94. Is there within your knowledge in your office any acco
which will show such expenditure?

(Objected to same grounds.)

A. I don't know.

95. Under whose direction were those service pipes put in?

Objected to same grounds.

A. Under the direction of Dan Gorman, I think.

96. And has anyone else in connection with your compa
1272 any authority to order gas service pipe placed and has th
been anyone having such authority since September 1, 190
If so, who?

Objected to same grounds.

A. Yes sir, I issue the orders for putting in services.

97. These items of ordering and placing service pipe are all
matter of record in your office, are they not?

Objected to as incompetent, immaterial and irrelevant.

A. The issuing of the order for the work to be done is a matter
record, aside from that I have no further knowledge of the matt

98. Who has paid for putting in such service pipe during t
time in question?

(Objected to same grounds.)

A. Do you mean whether the applicant has paid for putting the
in or the company has paid for the labor of putting them in?

99. Who has paid the expense of putting them in, for labor an
material?

Ans. I don't know.

100. How many if any meters has your company set since September 1, 1901?

(Objected to same grounds.)

A. I could not tell you that.

101. Is that a matter of record in your office?

Objected to same grounds.

A. Yes sir.

102. Under whose orders have those meters been set?

Objected to same grounds.

A. They were set under an order issued by me.

103. So far as pertains to those questions, state whether or not your authority is absolute or whether you derive your power from some other source?

(Objected to same grounds.)

The MASTER: I don't see how it makes any difference where he derives his authority so it is done.

Mr. TICHENOR: Yes, I think it does.

1273 The MASTER: He may answer subject to the objection.

A. We have been following the same course for years with regard to setting and removing meters; if a person makes a request for gas and we have gas in the premises an order would then be issued by me for the setting of a meter and if a person removes from one house to another it has been the custom to take out the meter when the person moves; it is the same system that has been in vogue ever since I have been with the gas company.

104. Has there been any change in that regard since the discontinuance of the manufacture of gas in your plant?

Objected to same grounds.

A. There has been no change in our office; it has been the same as has been the custom in the past.

105. The same in all details?

Ans. Yes sir.

106. When you say in the past, how far back do you refer to?

Objected to same grounds.

A. I refer to my knowledge as an employé for the number of years I have been employed by the company.

107. Is your company still furnishing gas to consumers in Peoria?

(Objected to same grounds.)

A. Yes sir.

108. From what source does it come?

Objected to same grounds.

A. From the pipes.

109. Who supplies the gas that goes into those pipe?

Objected to same grounds.

A. The gas works, around in the neighborhood of Persimmon street.

110. Whose gas works are they?

(Objected to same grounds.)

A. I don't know whose they are.

111. How many gas companies are in operation in Peoria
1274 at the present time?

(Objected to same grounds.)

A. I am in the employ of the Peoria Gas Light & Coke Co. and there is a company here called the Peoria Gas & Electric Co.

112. You have heard of that company, have you?

A. They are neighbors of ours.

113. Rather close neighbors, are they not?

Objected to same grounds.

The MASTER: Now, gentlemen don't indulge in this character of examination.

114. Have there been any other gas companies in Peoria during the time you have been in the business?

Objected to same grounds.

A. Not that I know of.

115. Do I still understand you to mean you don't know from what source your gas supply is coming at the present time?

Objected to same grounds.

A. I understand it is coming—Interrupted.

Mr. RITCHER: We object to the understanding of the witness. If he knows, let him say so.

A. I don't know.

116. Have you ever known since the time your plant shut down?

Objected to same grounds.

A. No.

117. Who if anyone in connection with your company keeps the account of the help and their time?

(Objected to same grounds.)

A. Mr. Bickwell the book-keeper would be the person that would have that information.

118. Where is the office of the Peoria Gas & Electric Co. with reference to the office of the Peoria Gas Light & Coke Co.?

Objected to same grounds.

A. The office of the Peoria Gas Light & Coke Co. is at
1275 No. 127 North Jefferson street and the office of the Peoria Gas and Electric Co. is No. 125 North Jefferson street.

119. How long have the offices of those companies been located at those places?

(Objected to same grounds.)

A. Our company has had its office in its present location for 5 or 6 years, I think, the other company has been in its present location probably a year and a half or there abouts—I could not tell exactly.

120. Where is the plant of the Peoria Gas & Electric Co., as compared with the location of the manufacturing plant of your company?

(Objected to same grounds.)

A. They are close to one another; I should judge from 150 to 200 feet apart.

121. How much ground is there between the two manufacturing plants owned by others?

(Objected to same grounds.)

A. I guess the ground adjoins.

122. State whether or not the present location of the Peoria Gas Light & Coke Company's plant is the same as it has been during the time you have been connected with it?

Objected to same grounds.

A. Yes, the location is the same.

123. Has there been any change in the location of the manufacturing plant of the Peoria Gas & Electric Co., since it was first constructed?

(Objected to same grounds.)

A. No, it occupies the same location.

124. Do you know of your own knowledge what if any part of the manufacturing and distributing plant of the Peoria Gas Light & Coke Co. is now being utilized?

Objected to same grounds and also because the question has been asked and answered so far as the witness knows.

A. I don't know.

1276 125. Do you know what company is at present taking care of the repair and improvement account of the Peoria Gas Light & Coke Co. if there is any such account?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: How does that become material, Mr. Tichenor?

Mr. IRWIN: Suppose you were doing it, Mr. Tichenor, whose business would it be?

Mr. TICHENOR: I would like to have the question answered.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. I don't know anything about any account.

126. Do you know anything about any such repairs or imp ments and have you known anything about them for the time ing since September 1, 1901?

(Objected to same grounds.)

A. I know we are taking care of all complaints coming t company in the way of the gas not burning, etc., and in ord the removal of meters the same course is pursued as it alway been in the way of issuing an order for the work to be done a know the work is done, but so far as any account in conne with the doing of that is concerned I have no knowledge of it.

127. Who does the buying of supplies and material for company?

(Objected to same grounds.)

A. For any office supplies we need, whenever we need the make known our wants, Mr. Bickwell attends to the buyi them.

128. Who attends to the buying of material, pipes and mete

Objected to same grounds.

A. I don't know.

129. Do you know whether or not any such are being boug the present time or have been during the past few months?

Objected to same grounds.

A. I don't know.

1277 130. What portion of the Peoria district did the Peoria Light & Coke Co. cover in the month of April, 1899?

Objected to same grounds.

A. It covered the city in my opinion pretty thoroughly wit pipes.

131. Did your pipes extend into some of the more densely p lated suburbs also?

(Objected to same grounds.)

A. Yes we went out into Richwoods, I believe.

132. Did you reach North Peoria, Averyville?

Objected to same grounds.

A. No sir.

133. What portion of the territory then covered by you in tribution are you furnishing with gas at the present time?

Objected to same grounds.

A. We are still doing business in the same territory, but are supplying all our old customers as we lost customers at the time second company commenced operations here.

134. Did you lose many or few customers?

Objected to same grounds.

A. We lost quite a number.

135. What percentage of customers have you now as compared with the number you had in April, 1899?

Objected to same grounds.

A. Oh, I would say we have in the neighborhood of 60 per cent.

136. Are there any of your customers who are also supplied by the Peoria Gas & Electric Co.?

(Objected to same grounds.)

A. We have customers who take gas from us and also from the other company.

137. In the same building?

Ans. Yes sir.

138. At the time the Peoria Gas & Electric Co began fur-
1278 nishing gas, what territory did it cover as compared with the territory which your company was then supplying?

(Objected to same grounds.)

A. Well, they paralleled a great deal of our territory.

140. Do you know whether or not that company occupied territory where you were not distributing at all?

Objected to same grounds.

A. I think they did, but I am not sure about that.

141. Are you able to state from recollection any particular locality where such was the case?

A. No, I cannot refer to any particular locality.

Cross interrogatories by Mr. IRWIN:

1. You have referred to a change in ownership of the Peoria Gas Light & Coke Co., of which you are an employé, about two years ago. What do you mean by a change of ownership?

A. I mean when the Peoria stock holders of the old Peoria Gas Light & Coke Co. sold out to a new company.

2. Who did they sell out to?

A. I don't know; but I know some of the officers of the new company.

3. When you speak of the new company, you mean the reorganization of the officers of the old company, do you not?

A. Yes sir, it is still the old company; it was simply a sale of the stock of the old company to different parties.

Re-direct interrogatories by Mr. TICHENOR:

1. Who are the officers of that company?

A. William McKinley is president and George Macomber is secretary and treasurer.

2. Has there been any change in the officers since the sale to which you have referred?

Ans. None that I know of.

1279 THOMAS BUCKLEY, called on behalf of defendant, being first duly sworn, testifies as follows:

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Thomas Buckley; No. 1007 South Washington street, Peoria, Ill.

2. State whether or not you have ever been engaged in connection with any gas company in Peoria or otherwise?

A. I have been with the Peoria Gas Light and Coke Co. from 1878 until 1900.

3. What had been your business prior to the time you entered the employ of that gas company?

A. I was a mechanic in the wrought iron department, building gas works supplies in the wrought iron line, bridges, and the like of that.

4. What work did you do during the early part of your connection with that gas company?

Objected to as incompetent and immaterial.

Mr. TICHENOR: The testimony goes to show his knowledge of metals, their life and construction.

The MASTER: If you want to qualify him as an expert, he may answer.

A. The first thing I did there was to repair the retort house roof.

5. I do not care about that but what you did during the early years of your connection with the company—not the individual pieces of work?

A. I did anything in a mechanical line that was required to be done; it devolved upon me to do blacksmithing and wrought iron work in general.

6. State whether or not that extended to the different parts
1280 of the mechanical portion of the gas works and there appliances in use?

A. Yes, it went to all the departments about the work, including work in the streets.

7. What other line of work did you do at any time while employed by that company?

Objected to as incompetent and immaterial.

A. Well the repairing of meters and making connections at the office shop—I would have to do that from time to time and I would have other work—straightening up at the works I had to do that and sometimes had to go on the streets to fill in time; I being the only man I found a job in all departments.

8. State whether or not from your work in metals, as you have described, and your experience in connection with the operation of the Peoria Gas Light & Coke Co.'s plant you are familiar with the life of the different kinds of metal that enters into the construction of a gas plant?

A. Yes to a certain extent by observation—I get my information that way.

9. Are you familiar with all the different appliances and apparatus necessary to constitute a complete gas plant?

A. Yes, except, of course, there are more modernized methods now than were used in my experience but what is in general use my experience gives me some idea concerning it.

10. What portion of the time during your employment by that company were you at the works themselves?

Objected to as immaterial.

A. I put in practically all of my time there for some 12 or 14 years after they refused to take me away to do anything outside.

11. Was that during the latter portion of your time there?

A. Yes it took all my time and attention there then on account of Peter Coffey's disability—the last five years I would say
1281 and for about two years before he died there was an agreement between us that I was to have charge of the works.

Mr. IRWIN: I object to the agreement the witness had with Mr. Coffey and move to exclude it as incompetent.

The MASTER: Yes, I think so.

The WITNESS: Well, I was there; that is all it implies.

12. State whether or not at any time while you were there you had exclusive charge of the work?

A. I was given exclusive charge of the works by Mr. Coffey for about seven years.

13. Are you familiar with those portions of a plant known as washers, scrubbers, purifyers, exhausters, holders, engines and boilers?

Ans. Yes sir.

14. State whether or not the power required in a gas plant is much or little?

(Objected to as immaterial.)

A. There is not much power required.

15. How large an engine was in operation at your plant during the time you were there?

(Objected to as immaterial.)

A. Well say a 10-horse power engine although it was not required.

16. What is the life of a steam engine in a gas plant considering the service demanded of it?

Objected to as immaterial.

A. We had one there 30 years running 24 hours each day with very few stops.

17. What was its condition at the time its use was discontinued?

(Objected to as immaterial.)

A. It was in good serviceable condition; nothing was ever bought for it but once after it was tore out it was practically renewed.

18. Why was it replaced?

1282 A. We had to put in a larger exhauster and a smaller engine took its place with the exhauster on the same bed plate; we changed it from a 10 inch to a 16 inch plant.

19. What work was there for that engine to perform in your gas plant?

(Objected to as incompetent and immaterial and not applying to the plant in question.)

A. Running the exhauster.

20. What portion of the 24 hours does an exhauster run?

A. It runs continuously, maybe it will not stop for 6 months.

21. What is the life of the boilers and settings used in connection with the steam engine for such purpose?

Objected to as immaterial unless applied to the plant in question.

A. Boilers and settings are certainly good for 15 or 18 years if in good condition to commence with.

22. State whether or not from observation and experience in the gas business you know the life of the various parts of the operating plant?

A. Well, I have an idea and experience that enables me to compute it within any given time, within a time not practically far off.

23. I am speaking of those parts that are in the works themselves—I am not speaking of street work but in the building itself?

A. I understand that.

24. What is the life of the purifyers?

A. I have seen a cover to be destroyed by the action of the sulphuretted hydrogen but the boxes are practically perfect yet. The cover was destroyed but the box itself might last for 50 or 75 years longer.

Complainant objects to the answer as not responsive and moves the court to exclude it.

1283 25. What is the reason for the difference in the life of the parts?

A. The top is wrought iron or steel, it is immaterial which, and the other is cast iron.

26. Do you know why it is that the top was destroyed while the box itself is practically permanent?

A. It has a greater affinity for taking up the sulphur out of the sulphuretted hydrogen and the vapor passing off the lime; in my experience lime has been used in the purifying process.

27. What is the life, if you know, of the scrubbers and washers?

A. They are practically indestructible except the filling that might be inside—whatever is used in the scrubbers—trays are liable to be broken from recleaning and handling.

28. Of what material are they made?

A. They are usually made of wood; I have made some of iron that were in a perfect state for 10 years in a water gas plant but in a coal gas plant the gas passes through scrubbers filled with wooden trays which are cleaned once a year or thereabouts and they are apt to be broken and have to be replaced; I had a duplicate set for that reason so we always had time to clean and repair the other set ready for use the following year.

29. What portion do you refer to as being practically indestructible?

A. The cast iron body—the shell of the scrubber.

30. Does your answer apply to the washers also?

A. Yes scrubbers and washers are the same thing practically.

31. Through what various devices does the gas pass from the time it leaves the retorts until it is delivered into the holders, if you know?

1284 A. It passes through the hydraulic main where it precipitates the largest volume of the tar, then it goes to the condenser where it is cooled, and whatever tar is left is removed, it passes then to the scrubbers or washer to take off the ammonia, then it goes to the purifying boxes where is removed whatever sulphur is left in the gas, from there it passes through the special meter into the holder.

32. What is the life of a condenser?

A. Well, I might put that at about 50 years; there is a deterioration takes place in a condenser; the fresh water contains mineral properties that affect the cast iron on the outer surface where the water comes in contact with the iron there is a rust going on there—there is a deterioration there I could not compute, but I would say its life would be about 50 years. The necessity frequently occurs to remove them before that time, however, on account of the increased consumption, enlarging the plant, etc.

33. Do you know approximately the life of a gas holder?

A. I have seen them 40 years old with the iron in pretty good shape and I have seen them cut one part down that was about 50 or 60 years old but it was destroyed through carelessness; it was the first gas holder in the plant down here and it was removed a few

years ago; I believe it was built along between 1850 and 1860 somewhere.

34. That was one you cut open?

A. Yes, a portion of that was gone; they were making gas of coal and it was not purified and sulphur got in there and poor gas and commenced to eat the iron.

35. That would be just the same then as the destruction of the cover of a purifying box?

A. Yes, it was all right on the outside but it was eaten on the inside from the sulphuretted hydrogen arising off the water in the gas.

1285 36. Suppose the gas is properly purified, what in your judgment would be the life of a gas holder in service?

A. In that case there would be very little deterioration to a holder on the inside, the air never comes in contact with it and pure gas should not affect it at all.

37. How is the outside of a holder protected?

A. Outside it should be painted from time to time and all that is visible to the eye can be detected; the water can be changed in the holder occasionally, especially if the water is of a hard mineral nature that would affect the iron. I have seen water on the holder down there so strong of sulphur that I came pretty near getting caught with it one time; I put a jug down to cool the water and I got some of it in my mouth and the water was so strong it caught my breath.

38. I don't care for that.

A. No, but that shows the effect that water would have on the iron. If impure gas went into the holder the water takes up a good deal of the impurities and it destroys the iron both inside and out in the course of time.

39. Do you know how long this holder you say was cut up had been in service?

A. I cut up some sheet iron from a holder in Cincinnati that was supposed to be 40 years old.

40. (Interrogatory 39 repeated.)

A. That holder was built, I should judge, about 1855 or 1856 and was cut up here about 5 or 6 years ago.

41. What is the life of a tar and ammonia well?

A. There is nothing to interfere with the life of them, it is practically indefinite as to time; they are built of hard brick and cement and are practically tight and if they are away from frost they will stay until doom's day.

42. Do you know what the life of a hydraulic main is?

1286 A. There is no deterioration in a cast iron hydraulic main in the wrought iron there is.

43. Of what are hydraulic mains constructed?

A. Of both wrought and cast iron; a cast iron main would not be destroyed for an indefinite time but wrought iron is affected; acids in the crude gas acts upon that.

Cross interrogatories by Mr. IRWIN:

1. When did you commence to work in a gas plant?
A. In May, 1878.
2. Was that your first experience?
A. That was my first experience there.
3. What had you done prior to that time?
A. Worked for Stacey & Co., gas holder builders; I learned my trade with the firm in Cincinnati erecting plants outside occasionally.
4. How long have you been engaged in that business?
A. Since I was about 10 years old, along about 1856.
5. Did you ever work in a gas plant prior to the time you worked in the Peoria Gas Light & Coke Co.'s plant in Peoria?
A. I worked a little while at the Cincinnati plant but it was only a short time; my brother was in the office there though and that took me there a good deal.
6. What did you do there when you worked there?
A. I was a mere boy putting purifying boxes together at the time.
7. What did you do when you first entered the employ of the Peoria Gas Light & Coke Co. in Peoria?
A. I went to work as a mechanic and blacksmith.
8. What kind of work did you do?
A. The first work I did was taking the corrugated iron off retort house roof and prepared it for slate.
1287 9. How long did you work at that?
A. I guess a couple of weeks until I had it done ready for the slate.
10. Do you know how long that roof had been on there?
A. No, I don't know, it was on before my time.
11. How do you know it was on before your time?
A. Because it was there and the iron was all honeycombed with holes when I came there and the rain pouring through.
12. You don't know how long it had been there when you took it off?
Ans. No sir.
13. Then you don't know whether it had been there for any particular length of time of your own knowledge?
A. No, of my own knowledge I do not.
14. What did you do next after you put on that roof?
A. Worked about the works principally for a few years, at general repairs.
15. What did you repair?
A. The engine and looked after repacking it, etc.
16. How often did that have to be done?
A. The engine was in bad condition and had to be looked after from time to time.
17. When did you first find it in bad condition after you went here?

A. It was in bad condition from the time I went there for six months afterwards; it took a man from Nicol & Burr's two days every week to fix the engine.

18. Is that the engine that lasted so long that you have spoken about?

Ans. Yes sir, that was the same engine.

19. What was necessary to do to the engine?

A. The rock shaft was not adjusted properly and the engine was laboring against itself and a competent man was not sent
1288 there to adjust it.

20. How long did Nicol & Burr's man work at it?

A. In my time there was a man sent there every week sometimes for a day or two for nearly a year.

21. Did they change any of the parts?

A. No, they did not make no changes only gave it an overhauling, a little packing and tightened up some of the bearings; the engine was working against itself and could not work right.

22. How long had the engine been at work before you went there?

A. I don't know, it was built in the old Voris foundry.

23. Was that the same engine that was there during all the time you were at the works?

A. Yes sir.

24. That was the only engine in the works during all that time

A. Until we got the new exhauster there and 16 inch pipe put in, that was about 9 years ago, I guess; the same engine was used all the time up to that time and I never had any trouble with it after I began taking care of it myself.

25. Did you ever have to make any other repairs to the engine than those made by Nicol & Burr's man?

A. No.

26. You never had any repairs during all that time?

A. I put a steady guide there.

27. Answer the question, did you never make any other repairs to the engine during all the time after it was fixed a few months after you came there until it was finally abandoned?

A. Yes, there was little repairs done; it was once repaired when two piston rods had to go to the shop to get them lathed valve stand and valve rod.

1289 28. Were there any other repairs that had to be made?

A. A guide for the valve stem was all.

29. Why did you get a new engine?

A. We had a 10 inch pipe and we put in a 16 inch and we had to have a 16 inch exhauster and an engine was furnished on the bed plate with the exhauster and that did away with the other engine.

30. Was not a 10 horse power engine of sufficient power for the other exhauster?

Ans. Yes, more than sufficient.

31. Then why did you get a new engine?
A. The old engine was not adjusted to the bed plate.
32. Could not that engine be adjusted as well as a new engine to do that work by a machinist?
A. It could be done, probably, but I am not positive about that either: there is a flange there and whether that flange would admit of cutting off at the desired elevation I could not say.
33. Could not you reset the old engine so as to accommodate it to the new exhauster?
Ans. It would change the plans; the plan was not made to do that; it was not intended to be done by the architect who drew the plans.
34. Could not that engine be reset just as a new engine could have been set if it was in good condition?
A. Our architect did not look at it that way, he did not want it.
35. You were the machinist in charge, were you not?
A. No sir, I was not.
36. What became of that engine after it was taken out?
A. It is down at Gipps' brewery now still in operation.
37. How do you know that it is still in operation?
A. We sold it there and they are using it for some purpose down there I believe.
38. How do you know they are?
1290 A. A man down there told me they were using it; I have not gone in to look at it.
39. Did you ever see it down there?
A. Yes, I saw it but it was not in use when I saw it; they do not use it every day.
40. Did you see it in operation down there?
A. No, not in operation. We used it after taking it off the exhauster—we set it up in place of a Westinghouse engine and run the blower for the water gas plant.
41. How long was it there?
A. About four days in an emergency until we got a new engine.
42. Why didn't you continue to use it there?
A. At that time the engine run away and broke down, the governor did not control it.
43. Why didn't you retain that engine there?
A. We got two Westinghouse engines duplicates there and we did not require it.
44. Do you know what that engine sold for, when you sold it?
A. $60.
45. What was a new 10 horse power engine worth at that time?
A. I don't know, I was not in that business.
46. How many exhausters were placed in that plant during the time you were there?
A. There was one there when I came and it remained there until the present exhauster was put in place.
47. How long ago was the present exhauster put in place?

A. I could not give the date but I should judge it was about 10 years ago.

49. How long had the other one been there to your knowledge?

A. It was there when I came and up to the time the new
1291 was one put in would be about 12 or 13 years; how long it was there before I came I don't know.

50. How long had the washers you speak of been there?

A. Well, the washers that were there—everything of the old plant is obliterated today; those old washers were connected with 10 inch pipe but they were all put out of the road when the new building was put up and the 16 inch connections were made.

51. You came there about what time?

Ans. In May, 1878.

52. Do I understand you to say that all of that machinery was replaced while you were there?

A. Everything has been replaced.

53. New machinery of all kinds so it is substantially a new works, is it not?

A. Practically new works; the old retort house is all that is left of the old.

54. What is the condition of the old retort house?

A. The stack and retorts were used up on the 6's; the 3's had not done much service but they would not continue to use them on account of the coke they consumed—direct heat.

55. Why did not they use them?

A. They used them when necessary but when we went into the new building the connections were cut off from them entirely, the intention being to throw them out and get them out of the road so the building could be continued on and made complete; the building was only half completed.

56. Why did they abandon those old retorts?

A. They were abandoned to try to start into the new and get them out of the way.

57. Why did they want to put them out of the road?

A. The plant was not up to date; they had outlived their usefulness; they were expensive to use; it was not a modern plant by a long shot.

1292 58. How long had they been getting out of date?

A. Well benches of 3's and direct draft has been out of date anyhow for 15 years or more.

59. Do you know when these benches were built?

A. The stack on the 3's was built before I came here and we put in 6's—tore down the old stack and built a special stack for a bench of 6's.

60. How long had those benches been in use during the time you were there—the benches of 3's?

A. I don't think they were used more than 1½ years.

61. After you came there?

A. No, I am speaking about the retorts, the settings there.

The benches were used alternately every winter, when one bench was capable of supplying gas for the city we used those on the south side in summer and those on the north side in winter.

62. Answer my question. How long had those benches of 3's that were abandoned been used to make gas while you were there?

A. They were used at least every year but they were laid up occasionally, of course, for repairs.

63. How frequently?

Ans. About on an average of every 5 or 6 years they would be reset.

64. What do you mean by resetting?

A. Putting the retorts in the arches.

65. How much of the time were they used when used at all?

A. 4, 5 and 6 years in use.

66. What portion of the year?

A. Sometimes they would be run right along for that time.

67. How long had the benches in the new part been in use during the time you were there?

A. Well, they had not been long in use; I don't suppose more than 6 or 7 months probably.

1293 68. Do you know the condition they were in after they had been in use 6 or 7 months?

A. They were in pretty bad condition but I had no control over that.

69. Answer the question, what condition were they in?

A. They were over heated and sagged, burnt out, the settings settled.

70. Does that happen frequently in the manufacture of gas?

A. No.

71. How frequently does it happen?

A. It is a thing that will happen in time but it should not happen inside of three years.

72. How frequently did it happen to these benches during the time you were there?

A. When it happened it happened and there was no frequency about it because it is in the same condition today it was when it first occurred; they have not been reset or put in since.

73. Those were the new benches that were put in?

A. It is the same bench yet and in the same condition.

74. How frequently did it happen to the old benches?

A. When they would outlive their usefulness it would be about on an average of 4 years; they had been shook up pretty bad and had to be taken out and reset.

75. How long had the scrubbers that were in the old gas plant where you worked been there during the time you were at the works?

A. I have not got the dates but it might have been somewhere about 1886 or thereabouts; I forget the date but I think maybe it

was back that far when that building was put up and that plant put in and the scrubbers are there ever since.

76. How frequently did you have to repair those scrubbers during that period?

1294 A. There was 5 years there they required no attention practically in the way of cleaning but conditions brought it about where I had to clean them every year.

77. What were your duties down there from time to time in that gas plant?

A. To keep everything in order, see that everything went along all right and smooth and have an eye over the men.

78. Were you the superintendent in charge?

A. No, Mr. Coffey was superintendent, either Peter or his brother after him.

79. And you simply did what he told you to do?

A. That is what I had to do.

80. You were simply a workman there?

Ans. Yes.

81. And your work was looking after the machinery?

A. Anything about the works that required attention I was supposed to know it and look after it.

82. Did you have any assistance in looking after it?

Ans. No.

83. Did you make the repairs yourself?

Ans. Yes.

84. Were you busy all the time?

Ans. Good and busy.

85. Was that all you had or attempted to do—to make repairs about the place?

A. Well, no not exactly: if I had not enough to do down there, I would be put on the streets to put in services, tap mains, or make connections, repair meters, breaks in pipe, and one thing and another.

86. Did you have anyone else working in making connections and fittings and repairs?

A. Only the necessary labor that was required usually on the pipe down there; I laid all the pipe down there and put all the machinery in place, I just had laboring help.

87. Did you have any assistance in cutting and fitting the

1295 pipe you put in?

Ans. Practically no assistance outside of common labor.

87. What did they do?

A. If the load was too heavy, they would have to take hold of one end when I took hold of the other and assist in that way. Peter Coffey was pretty close; he did not want anybody to eat any idle bread but himself; I had no picnic. He made that remark to me one day; they had no surplus men around; they did not want one man looking at another, they wanted every man to work; they were close men.

88. How many purifyers have been in those works since you went there?

Ans. The present set of boxes is the second put in there.

89. When were the last ones put in?

A. About the same time that building was put up, along about 1886 I think it was.

90. You had been there at that time about 6 or 8 years?

A. I had been there a good deal longer than that. I must be mistaken about giving the date there; I am not positive enough to swear to any date or time, for time did not bother me.

91. State about how long you had been there when the new building was put up?

A. That is pretty difficult; it has gone beyond my recollection, I don't recollect about those things.

92. About how long ago was the present purifyers placed in that building?

A. I don't remember how long or precisely what the date was but I should judge they are in there about 9 or 10 years, it might be 12 years.

93. How long will the cover of a purifyer last?

A. Those covers had to be replaced since they were put in there.

1296 94. How frequently?

A. Well, they were changed once on the old boxes and the last boxes we got have been changed once only and it was brought about by conditions over which I had no control; Thomas Coffey——

95. (Interrupting.) Coffey was an expert gas man, was he not?

A. He was the superintendent after his brother's death.

96. He was an expert in the business, was he not?

A. He was president before his brother died and had been president for a long time.

97. He had been in that business a great many years?

A. No, he never was practically in that business or had any practical knowledge of the business until he came to Peoria.

98. How long ago was that?

A. He was here for a good while but he was not identified with the gas company only as a stock holder.

99. Was not he identified with the gas business immediately upon coming to Peoria?

A. Yes, I guess he had his stock before he came to Peoria.

100. And he immediately began to work for the gas company when he came here?

A. He got stock enough so as to be a director.

101. That was about as long as you had been there?

A. No sir, not by a good many years, 8 or 10 years anyhow, or more than that.

102. You had been there longer than he had?

A. The only active interest he took in that plant during his brother's life was when his brother was away for his health in Cali-

fornia or Europe, then he acted as superintendent in his brothe absence until he was appointed president.

103. How long had the purifyers that had been replaced by t one now there been in use?

1297 A. I don't know, for they were put in before my time.

104. How long had they been there during the time yo were there?

A. That is bringing the old question back again to that date; will say 10 years more or less.

105. How many times had they been repaired during that pe riod?

A. They were repaired once; there were patches put in there to cover the leaks where deterioration had taken place.

106. Were there any other repairs except the patches?

A. No sir.

107. What did they use for purifying at that time?

A. Lime.

108. How long did they use lime as a purifier?—up to that date

A. They used lime always in my time there.

109. When did you leave there?

Ans. About May, 1900.

110. Why did you leave?

A. The company changed hands and I left at the request of Mr. McKinley; I never had any acquaintance with him and I don't know anything about why I was put out but I was put in the back- ground.

111. Do you know of any other purifyer used in the manufacture of gas than lime?

Ans. Yes, there is oxide used.

112. As an expert gas man, which is the better, lime or oxide as a purifier?

A. I have had no experience with oxide.

Mr. TICHENOR: We object to the question because the witness has not qualified himself as an expert gas man.

The MASTER: I think so, he has not qualified as a gas manufact- urer.

The WITNESS: They had an expert down there at one time and started to use oxide and it was a failure. I guess most of the

1298 citizens remember the time.

113. What other machinery is used about a gas plant be- sides what you have named viz: the engine, scrubbers, washers and purifyers?

A. The exhauster, of course. Outside of that there is practically no machinery unless you speak of the motor running and blast or the ammonia works.

114. Don't it require some machinery to exhaust the ammonia?

A. No no machinery is required.

115. It is an ammonia concentrator, is it not?

A. No, it is not a concentrator although you may have a concentrator at the new plant and use it now.

116. What is the technical name for an ammonia plant?

A. A plant for the manufacture of sulphate of ammonia.

117. Do you know whether the plant of the Peoria Gas Light & Coke Co. was a modern up-to-date plant?

A. Well, it was getting to be an up to date plant.

118. How do you know?

A. From my experience and knowledge and from reading gas light journals and the like of that they were putting in what was modern and improved.

119. What gas light journals did you read?

A. Coffey used to take them there and I read them once in a while.

120. Which ones did you read?

A. The Western Gas Light Journal and anything that happened to come along on the gas question—pamphlets, circulars and papers that came there.

121. Name them, who were the authors?

A. I didn't pay much attention to the authors, I only had time to snatch a little time and look over the papers and read them.

1299 122. I understand you to say that a scurbber or washer is substantially indestructible?

A. The iron part or shell I should say was in ordinary use.

123. Is a washer or scrubber made of cast-iron?

A. I have seen washers made of wrought iron—so-called washers; I never saw a scrubber made of anything else but cast iron except the material that might be used in the interior.

124. Didn't you testify on direct examination that a scrubber and washer was the same thing?

A. Practically the same thing, they are both used to remove the ammonia from the gas.

125. Do they perform any other office in the manufacture of gas than to remove the ammonia?

A. To clean it, what the water takes out; it removes the ammonia and also some of the lamp black and a little tar is precipitated with it.

126. Anything else?

A. I don't know as I am experienced enough in chemistry to know what other chemical ingredients might be eliminated with the water.

127. What is the difference between the manufacture and structure of a washer and scrubber?

A. I used to make scrubbers when I was a young fellow in the shops—Interrupted.

128. Answer the question.

A. I can hardly tell the difference. I have seen washers for a small plant 18 inches deep, 6 feet in diameter with 3 or 4 perforated plates where the water circulates through the holes and the gas comes up and makes a roar and a noise continually; that was

what we called a washer, and it also might be called a scrubber; that was made of wrought iron in those days when the business was in its infancy.

1300 129. You call that a washer?

Ans. That was called a washer.

130. What is called a scrubber?

A. It was called a scrubber also, it don't change its duties at all by changing its name; some people call them scrubbers and some washers.

131. Do you mean to be understood as saying that a washer and a scrubber are the same thing in a gas plant?

A. Well, yes, I would say so.

132. Are they manufactured alike?

A. No, they are not manufactured alike, there are different patents covering them.

133. What is the structure of the washers and scrubbers in the old gas plant? Are they made of wrought iron or cast iron?

A. You are multiplying the terms there, washer and scrubber; use one term or the other; if you say washer I would take it the same as scrubber, and if you say scrubber I would take it as a scrubber and washer.

134. You are familiar with the washers and scrubbers in the old gas plant, are you not?

A. You are using a double term there again. If you say washer, I say—Interrupted.

135. Is there a washer in the old gas plant?

A. There is a washer there at present.

136. Are you familiar with its construction?

Ans. Yes.

137. Do you know whether it is made of wrought iron or cast iron?

Ans. Cast iron.

138. How high is it?

Ans. 40 feet.

139. What is its diameter?

Ans. About 10 feet.

140. Is it solid cast iron?

A. Yes about from an inch to an inch and one quarter thick.

141. Is its whole length and diameter solid cast iron—any joints?

Ans. 4 sections.

1301 142. Is it jointed horizontally?

A. Yes, every 10 foot there is a flange joint.

143. How long has that washer been there to your knowledge?

A. Well, that is the same old question again—about 10 or 12 years, somewhere thereabouts; I am not sure.

144. Did you ever repair it during the time you were there?

A. I cleaned it out and replaced the trays.

145. How frequently?

Ans. Well, the last 5 years every year we had to change them.

146. How long did it take you to do that?

Ans. From 3 to 4 days.

147. How did they manufacture gas there during the time you were making those repairs?

Ans. The same old process.

148. What do you mean by "the same old process"?

A. With the exception of scrubbing it, it was by-passed and went on into the holder without passing through the scrubber.

149. Did they have any washer in that building?

A. No, we had a condenser there that I utilized with a little ammoni-cal liquor there to wash the gas with while the scrubber was being cleaned—so as to wash the gas a little before it went into the purifying boxes.

150. How large a condenser was there in that building where you worked?

Ans. A pretty large condenser, equivalent to the 16 inch capacity of the pipe.

151. How is a condenser constructed?

A. A tubular condenser, divided into four compartments; the water goes in at one end and works up and down and flows out at the other; the gas leaving meets the cold water coming in and the temperature of the gas is reduced before it enters the scrubber.

152. Does the old gas plant contain a scrubber besides the washer?

Ans. I said before the term applies to one vessel; I will use the word scrubber and leave washer out; I don't know anything
1302 about the washer when I say scrubber.

153. Are any pumps required about a gas plant?

Ans. Yes sir;

154. How many?

Ans. Oh, there is a pump for ammonia, tar pump and water pumps.

155. Do they require any renewing or repairing?

A. Most undoubtedly.

156. How long will one last without it?

A. Oh, that is owing to circumstances; they can run along without repairing but about the length of time they would last I don't know; we never had to throw a pump away.

157. Were the pumps ever changed during the time you were working in the old gas plant?

A. Yes, we had to put in bigger ones when the larger volume required it.

158. What became of the old pumps you had there?

A. They were put to other uses; one of them was connected and set up as a reserve for the ammoni-cal liquor in case the other pump should be stopped—to make a duplicate.

159. What became of the other pumps?

A. They are in their possession—they were left in their possession there.

160. Why did you have two pumps for some things—is it necessary to have two?

A. For some things it is; when they have to run all the time it is a good thing to have duplicates; they need a rest once in a while.

161. What do you mean by their needing a rest?

A. If one had to be overhauled you would have to do without water unless you had a supply in reserve to answer the purpose; we had two river pumps working at different places so we should not run out of water.

162. Did they have to be repaired?

Ans. Yes sir;

1303 163. How frequently?

A. They required general attention; when a repair is required it is required.

164. What repairs did you make to that?

A. It may have to be repacked once a month.

164. Did you repair them?

A. Yes, say once a month more or less.

165. Did all of them have to be repaired in that manner?

A. Yes, wherever you find them defective; they have to be looked after all the time.

166. How frequently would you find them defective?

A. As to the frequency it is difficult to say; it might be a week and it might be three months.

167. How long has the present hydraulic main in that plant been there?

A. That was put in with the plant in the new building.

168. Has that deteriorated any during the time it has been there?

A. I don't know; I never looked into it since it has been there.

169. How long had the hydraulic main been in use that was there previous to the putting in of the present one?

A. One of them was before my time; the other one was put there some eight years or thereabouts afterwards.

170. Why was the new one put in?

A. The old one had but three openings for benches of 3's and we put in benches of 6's and for each section of the hydraulic main we had to have six openings for the stand pipe.

171. What became of the old hydraulic main?

A. It went to the cupola.

172. What do you mean by the cupola?

1304 —. It went to the foundry where it was melted up into other material.

173. Then that hydraulic main you speak of did deteriorate, did it not?

Ans. No.

174. What was it worth when taken out?

A. There was no effort to sell it to continue its use; it was sold for scrap iron.

175. If it was just as good as when it was new why did you sell it for scrap iron?

A. The iron was good but the purpose for which it was originally made—it had outlived its time, it was not up to date.

176. Then it had deteriorated?

Ans. No, not the material.

177. Could it be sold, or was it worth as much as when it was new?

A. As scrap or pig metal it was.

178. Well, for the purpose for which it was used?

A. No, it had outlived its usefulness; it would do as well as when it was new if it were put in again in a small plant with a bench of 3's.

179. Would it sell for as much when taken out as when it was new?

A. Most everybody expects a bargain in a second hand article, it certainly would not sell for as much on the market and in that way its value had deteriorated but not otherwise.

181. What became of the washers taken out of the building during the time you worked there?

A. Them old washers were made up into washers in the water gas plant; they are down there now; they have been changed and remodeled and made washers out of them for the water gas plant.

182. Who did that work?

Ans. I did.

183. Explain in what manner they are now used in the 1305 ammonia plant?

A. They are not used in the ammonia plant but in the water gas plant.

184. In what manner are they used there?

A. Used as washers, or scrubbers, just as you put it; they are still used for the same purpose only they are reconstructed and changed; the shell is still used for the same purpose.

185. Are they wrought iron or cast iron?

A. There is only one cast iron, the rest wrought iron.

185. How many washers were taken out at the time of the rebuilding of the plant?

A. There were two old steam boiler shells about 48 inch shells.

187. What was their thickness?

A. I should judge them to be about 8 gauge; they had seen a good deal of use in the boilers and were reduced to No. 8 gauge.

188. During the time you worked in that plant it was substantially reconstructed and rebuilt, was it not?

Ans. Yes sir.

189. That included the plant proper, did it not—the building?

A. Yes, everything but the retort house—all the pipe and mains around the place.

190. The retort house was abandoned, was it not?—the old one?

A. Yes sir.

191. How long ago was it abandoned?
A. A little over 2½ years ago.
191. Do you know why it was abandoned?
A. It was not necessary to run the new plant and old plant too.
193. Was that the only reason it was abandoned?
A. The intention was to abandon it and put in a new up-to-date plant—a modern plant.
1306 194. Why was it the intention to do that?
A. To be up with the times.
195. Had it deteriorated any?
A. The results were not as satisfactory as was desired.
196. Had it deteriorated any?
A. Do you mean material or in its value?
197. The material and everything that was in it,—the retort house?
Ans. Yes, it was used up in a worn out dilapidated condition when it was shut down by long use.
198. How long had it been in that condition during the time you worked there?
A. You put the question so ambiguous I don't understand.
199. How long had the old retort house been in that deteriorated condition during the time you worked there?
A. A portion of it, the retorts, were new two years previous; the other portion had been used up to the time they were laid down and the retorts was burned out at that time; they had run about three to 3½ years—the 6's.
200. All you know about the gas business is simply from being a general mechanic around the works there for a number of years?
A. That is about right—the opportunities it gave me.
201. And your observations during that time is what you have been testifying about?
Ans. Yes sir.
202. You spoke of a gas holder being good for 40 years. Did you ever see one that had been in existence for 40 years?
A. The old gas holder we cut down there was about 40 years old and it was in pretty bad shape.
203. How do you know it was that old?
A. I knew the man who put it up and about the time he put it up.
204. When did you first see that holder?
A. I did not see the holder until 1878.
1307 205. How long had the holder been there after you came there in 1878?—how long before it was abandoned?
A. It was removed about 7 or 8 years ago and a new relief holder put in the same tank, the old holder taken out.
206. Was not that longer ago than 6 or 7 years?
A. I hardly think so.

207. Had not its use been abandoned long prior to the time it was taken out?

Ans. It had been out of use longer than that, that is right; it was taken out 7 or 8 years ago but had been out of use a couple of years before that.

208. Why was it abandoned?

A. It was useless; it was in a dilapidated leaky condition; it never was a good job.

209. How do you know?

A. I saw how it was constructed and it was my business to build them; it was too weak on the bottom.

210. When did you build a gas holder?

A. I built them before I came here—worked at it right along.

211. How old were you when you came here?

A. Somewhere around 35, I guess.

212. Where did you build a gas holder prior to the time you came here?

A. I worked for Stacey & Co., putting them up in the shop, and built some outside at Maysville, Ky., —— Ky., and Madison, Ind.

213. What did you have to do with the construction of the holder at that time?

A. I practically superintended it, I was foreman for the firm.

214. You did not build them yourself except you were working for the firm that did build them?

1308 A. The holder would not have been built if I was not there, I was employed to do that work and carry that business on.

215. Employed by whom?

Ans. A man -ed Chas. Graham of Cincinnati; I built them three holders.

216. Was he the firm that built the holders?

A. He was the firm that built the holders and I was working for him as foreman; it was a side line in his business while I was in his employ.

217. When did you first see this holder in Peoria?

A. About May 10, 1878.

218. How long had it been there when you saw it?

A. I don't know anything about that at all.

219. Then when you speak of its having been there 50 or 60 years you stated something you didn't know of your own knowledge, didn't you?

A. When Mr. Griswold was an officer he said——

220. Don't state what Mr. Griswold told you but what you know of your own knowledge?

Mr. TICHENOR: We object because the witness has not at any time testified that or any holder had been in use 50 or 60 years.

Mr. IRWIN: I understood him to say so and I think the record will so show.

221. What holder do you know of having been in existence and use 50 or 60 years?

A. I don't know of any holder that has been in use 50 or 60 years, for 50 or 60 years ago holders were so small they would have to be taken out and bigger ones put in their place and it is not possible that a holder could have an opportunity to live that long even if it would.

222. How long is a holder ordinarily used and in use?

A. Well, there is a holder in Cincinnati that I know was
1309 built in 1852.

223. I am asking you ordinarily how long they are in use?

A. I have to tell you what I know.

224. If you don't know how long they ordinarily last, say so?

A. Well, they tell me, of course I don't know, it is only from repute that the holder was 40 years old.

225. I want your own knowledge?

Ans. I know nothing of that myself but the foreman told me that holder was in for 40 years.

226. I object to your stating what anybody told you?

A. Well this 80 foot holder down at those works now I had been here 18 years or there abouts when that holder was made into a telescope; that holder was built some years before I came here and the iron was still good, all that was necessary was to put a heavier sheet on the bottom for the cup sheet and use the other for the upper lift.

227. Then it would require a change in the character of the holder, would it not?

A. It made a telescope out of it.

228. What kind of a holder was it before?

A. A single lift.

229. Don't holders frequently spring leaks?

A. Very seldom they spring aleak; there may be defective workmanship and the holder have a little leak in it that is insignificant.

230. They do spring leaks, however?

Ans. Yes sir.

231. As a matter of fact has not the holder in the old gas plant been leaky?

A. That had been leaking pretty bad but I don't know whether it is leaking now.

232. During the time you knew it, it was leaking?

A. I stopped those leaks in my time there.

233. How frequently?

A. I stopped them once for good.

1310 234. Don't you know they have been leaking for the last ten years more or less?

A. They have leaked for a considerable time but have not been leaking for a good many years.

235. How do you know?

A. I was there up to two years ago and, of course, it was my business to know.

236. Did not that plant have a large leakage of gas from some source?

A. Not at the plant.

237. Had it not as a matter of fact a large leakage of gas?

A. I didn't smell it, it was not around the plant.

238. Suppose it had leaked from the holder would you have smelled it?

A. I would know it and very likely smell it.

239. Did you work up in the holder or on it?

A. You would get to know it after awhile anyhow; on one occasion when blasting rock one of the stones came down on the top of that 90 foot holder there and we knew it next morning.

240. Was that a large leak?

Ans. A pretty good leak.

241. That would be more than an ordinary leak in the tank, would it not?

Ans. Yes, leaks don't occur accidentally of an ordinary kind.

242. How do the ordinary leaks occur?

A. The action of the ammonia upon the paint that is used on the joints to seal it, it cuts the red lead and oil and, of course, when that is cut away from there the joint is gone.

243. Does the ammonia affect the iron?

A. Yes the ammonia will affect the iron but it is not the ammonia you have reference to; there is an oil, we call ammonia ordinarily, about works which we pump out of the drips; it
1311 is in a liquid state; that is frequently inside of the holder maybe floating on the water; as the holder rises and falls it adheres to the iron and gets into the seams and that causes leaking.

244. Does that affect the iron?

A. It don't affect the iron at all; it is not the ammonia of commerce but it is usually called ammonia down there; it affects the paint.

245. Who calls it ammonia?

A. The men around the works always call it ammoniacal liquor; it is pumped out of the drips, kind of a spirits of oil that comes off the water.

246. You have stated that a condenser would last 50 years,—how do you know?

A. There is no deterioration upon the wrought iron, that is if there has none taken place in the 20 or 22 years of my experience you might say it is practically nil in 100 years.

247. Why?

Ans. In 22 years it would show some change; the external part is protected by paint and when you scrape that paint off the iron is just the same as when it left the mold.

248. Do you mean to say that a condenser that was placed in a new plant 7 or 8 years ago would not show deterioration today?

A. Not on the inside.

249. Do you mean to say it would not on the outside?

A. Not where it is attended to and painted.

250. How frequently would you have to paint it?

A. Once every year or sometimes once in two years is enough; it depends on the moisture and conditions around the place.

251. How much of your time did you spend on street work laying street mains and service pipe?

A. That I could not tell, I was taken up town so frequently to do that, sometimes for two or three days at a stretch, but I had
1312 the work to look after all the same.

252. About what portion of your time did you spend in that establishment?

A. Well it would be probably about 1/5 or 1/6 of the time taken altogether.

253. In the laying of street mains and services, what work did you perform?

A. Generally connecting the pipes with the iron, running the lead, even caulking up, setting meters, and everything that might be required, and giving attention to the order book and complaints.

254. Who repaired the meters at your plant?

A. I repaired them for several years, then I learned a young man how to do it and I was relieved of the responsibility and did not have any more to do of that work.

255. How long did you do that work?

A. For four or five years I would go up there every month once a month for two or three or four days or portions of the time.

256. How long since did you quit doing that?

A. I do not think I have done any of it for the last 15 years.

257. How long had you been working for the old gas company before you commenced to repair meters?

A. I hardly know but I must have been there about 2 or 3 years before I commenced to repair meters.

258. You stated that the first work you did when you came to the Peoria Gas Light & Coke Co. was to take off the old roof and put on a new one—was that on the old retort house that was abandoned?

Ans. Yes sir.

259. What character of a new roof did you put on?

A. The new roof was slate but all I done was to take off
1313 the old roof and prepare it to support the slate, I did not put the slate roof on.

260. How long did that slate roof last?

A. I guess it was taken off the other day.

261. What was its condition?

A. I don't know, I was not down there; it was damaged considerably by a hail storm some years ago and never was repaired much. It was punctured full of holes but that did not make much difference for they wanted air in there and a little water did not hurt. Slate is not much good after it comes off a retort house, as it is af-

fected a little by the alternate heats; it has a tendency to melt a portion of it, dissolve the slate, crumble it where it comes in contact with the heats.

262. Did anything else affect the slate but the heat?

A. I guess not.

263. Do any sulphurous fumes arise about a gas plant?

A. That which rises up there goes up wet and I don't think it affects the slate very much but the changes of atmosphere I think is responsible for it, for where it is open and exposed to the elements alone with only oxygen in the air deterioration takes place.

764. Will you answer the question whether any sulphurous fumes rise to the roof of a retort house?

A. There is bound to be some arising from the fuel when the water is turned on the coke when it is drawn.

265. When they are charging the retorts, how is it?

A. There is a crude smoke comes out then but it don't last long.

266. There is sulphur in all those matters, is there not, both from quenching the coke and charging the retorts?

A. There is more from the fuel than there is from the
1314 smoke in the first charge; in the Pittsburg coal there is not much sulphur comes out but, of course, some does.

267. Is there not a large amount of sulphurous fumes arising from the quenching of coke?

A. There is from the quenching of coke; there is not a great deal of sulphur from the Youghehenny coal but there is some.

268. Does the sulphur fumes affect the iron about a gas plant?

A. Yes, it affects the iron wherever it comes in contact with it.

269. More than about an ordinary manufacturing plant?

A. I don't know, there is very little sulphur in some of the ordinary manufacturing plants; I don't know where the sulphur comes in about some of them.

270. There is none about the ordinary manufacturing plant, is there?

Ans. They generally burn coal under the boilers and some generally is carried up in the smoke; as you go along the street you can smell it.

271. On direct examination you stated the sulphuretted hydrogen affected the holder; in what manner does it affect the holder?

A. Iron has an affinity for it and absorbes it and it acts upon it in the form of rust and eats and cuts it—corrodes it. The action upon iron soon eats it up—takes the life out of it.

272. Did you ever work in any other gas plant except in the old Peoria Gas Light & Coke Co.'s plant?

A. I worked a couple of months in the Cincinnati plant assisting in putting up purifying boxes but I was a mere boy at the time.

274. How long was that before you came to the Peoria plant?

A. I would not presume to say; I was also working in a gas plant when I was putting up holders for the firm I spoke of.

275. How long before you came to Peoria was it that you worked this two or three months you speak of in the Cincinnati plant?

1315

A. That was along about 1856, I guess, or previous to that; it was a long while ago.

Re-direct interrogatories by Mr. TICHENOR:

1. What was the real cause of this engine working badly at the time you went there, as you have testified?

A. The valve motion was not properly adjusted and the engine and steam was laboring against itself.

2. That was due to improper mechanical attention?

A. Yes sir, 45 pounds of steam would hardly turn the wheel but after I set the wheel and got it in position again, after they had been monkeying with it several months in that way, the engine run with 10 pounds of steam.

3. Did I understand you to say on cross examination that the exhauster bed was made with reference to the adjustment of a special engine?

Ans. Yes sir.

4. That was the reason why you could not mechanically use any other engine?

A. Yes sir, there was a continuous shaft there coupled with the coupler and the engine was made of a certain pattern and made for that special purpose.

5. And it was made with special reference to the location of the driving shaft in the exhauster?

A. Exactly, built right upon that bed.

6. Do you know why the portions of the gas plant to which you have referred were replaced about 1886 or whenever it was done?

A. It was done through necessity to keep up with the consumption or demand; the works were too small in capacity to supply the demand; we increased from 10 inches to 16 inches in the mains around the works and in the different pipes, the inlet and outlet to the exhauster, and then out of the works into the city on Adams street as far as Main street the pipes were too small and we could not get the pressure or volume of gas to pass through which created a back pressure upon the purifying boxes and we enlarged that pipe too.

1316

7. Is the exhauster a necessary part of an operating gas plant?

A. Yes sir, it is necessary to counteract the pressure from the holder and relieve the retorts from the pressure of the holder.

8. The exhauster works against the holder and away from the retorts?

A. Yes sir, away from the retorts and against the holder.

9. In your cross examination you referred to two Westinghouse engines installed in connection with the water gas plant—were those placed there at the time of the installation of the plant?

A. No, there was one placed there which was a second hand engine palmed off on us; it was old style make and when we had to replace that the Westinghouse Company wanted to take it back and give us a new one in exchange for it but we bought a second one and kept the other as a duplicate in case anything might happen to one, as we could put it on the same bed without trouble; we were in a pinch at the time; water gas had to be made and the old engine was all we had to put in there, gas had to be made to keep the consumption up.

10. Were those the regular style of Westinghouse high separator engines made at the time?

A. The two we got there were the improved style, high separator engines.

11. Vertical?

Ans. The engines were vertical but the crank horizontal.

1317 12. Is it not true that any and all machinery, no matter for what purpose it is used, demands some attention all the time in order to keep it at its maximum efficiency?

Ans. Yes sir.

13. And that is true of engines as well as other machinery, is it not?

A. Yes, to avoid against accidents, etc., it has to receive constant attention.

14. That is true no matter where the machinery is used?

A. Yes sir.

15. Or any mechanical appliance?

A. Yes sir, it is nothing unusual to hear pieces of machinery calling to the engineer for oil—the shafting creaking, etc.

16. What was the reason for changing the holder, to which you have referred, from a single to a double lift?

A. To increase the capacity of the holder without the additional cost of building a tank and at the same time utilizing the old one.

17. State whether or not the old holder was used except in-so-far as it became necessary to modify it to attach the second lift.

A. The old holder was used in its entirety with a sheet added.

18. Why was that sheet added?

A. The lower sheet must be heavier than the ordinary sheet used for a single lift at the bottom and they had to put on that heavy sheet there and then put a cup sheet to that; the holder was made 2 feet deeper than it originally was and the wall was raised two feet around the tank.

19. Does the second lift of a holder carry any weight except its own when in actual operation?

A. It adds to the weight on the first lift; when the holder commences to cut it puts on more pressure; the moment it starts

1318 to lift the other section it puts on more pressure; it makes quite a difference; it is not usually as heavy as the upper section but it makes quite a difference.

20. That first lift is carried by the second lift suspended from the second lift?

Ans. Yes sir, the first lift might be 4½ and the second lift might be 5¾ or nearly 6 inches water pressure; it is required sometimes according to the location of the city to make a holder to get the desired pressure.

21. Is there any way by which the metal work about the buildings of a gas plant can be protected against the affect of sulphuretted hydrogen?

A. It is pretty hard to overcome the effect of sulphuretted hydrogen even when you paint frequently; it colors the paint and soon kills it, whether it could be painted often enough or not I hardly know; you could not protect the interior of the cover of a purifying box by anything and the outside material if the sulphuretted hydrogen escapes it will get in the iron in places and will eat it.

22. That is due to the chemical affinity of the iron for the sulphuretted hydrogen?

Ans. Yes sir.

23. It is an oxidation is it?

Ans. Yes sir.

24. Do you know when Thomas Coffey first came to Peoria of your own knowledge?

A. I could not say exactly what year it was.

25. Was it before you came here or subsequently?

A. It was long after I came here; we were then laying a main on Franklin street, a new main up Franklin street, and I was out laying the pipe at the time, but I forget what year it was.

26. Do you know whether Thomas Coffey had a technical knowledge of the gas industries at the time he came to Peoria?

A. Whatever technical knowledge he got he had it from
1319 the book; he has no practical knowledge; he was never presumed to have any practical knowledge but he had book knowledge.

27. What did he do in the company up to the time Peter Coffey became incapacitated?

A. He was president for a time and he was connected more with the electric light plant.

28. What work, if any, did he do in the Peoria Gas Light & Coke Co.?

A. He never done anything except to fill the position of a director, but during Peter Coffey's spells of sickness when he went away—twice he went away—Thomas acted as superintendent in his absence for a short time.

29. Did he spend a portion of his time at the works?

A. Yes, a portion of his time would be down at the works; when he was acting superintendent while his brother was away in California, he was down there pretty near every day.

30. When his brother was here and on duty, did Thomas Coffey also spend part of his time at the works?

A. He was doing nothing but he would come down there every ay or so; he was finally appointed president.

Re-cross interrogatories by Mr. IRWIN:

1. Explain what you mean by a double lift holder?
A. That is what they call a telescope, having one section outside the other like a telescope; it slides through and when the first ction is full it cups and the second section is lifted and goes on up to the air.
2. Why do they construct what is called a double lift holder?
A. To increase the capacity, I suppose, at the least nominal ex- ense.
3. Are not they frequently constructed for the purpose of cover- ing a leaky holder?
320 A. No. Suppose you could not go any deeper than 20 feet with the tank and build a one lift holder and then they want make a telescope holder, they do not need to build any deeper to the ground, they build up into the air as far as they want; you n make four lifts in a telescope holder.
4. Is not such a holder also made for the purpose that if one leaks e upper one will catch the leak?
Ans. No.
5. Did you know Thomas Coffey before he came to Peoria?
A. Slightly acquainted with him but not personally.
6. How long had you known him?
A. My first acquaintance with him was about 1878.
7. Is it not a fact that Thomas Coffey worked in a gas plant at elleville long before he came to Peoria to reside?
A. Not that I know of; he was in business down there in the laster and sand business, if I must tell what I don't know except om rumor, but he was not in the gas business—he told me himself.
8. I am not asking for what he told you, I asked you if — was ot the fact?
Ans. I never was in Belleville.

321 E. W. EUSTIS, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?
A. E. W. Eustis; #317 California avenue, Peoria, Illinois.
2. What is your business?
A. Superintendent of the manufacturing department of the Peoria as & Electric Company.
3. How long have you been engaged in a similar line of work?
A. Well, I have done it about 25 years off and on between water as and coal gas.

4. Have you a tech-inal knowledge of the manufacture of illuminating gas from coal?

A. Slightly, not very much; mostly practical work, enough so I can handle it though.

5. Have you had training in chemistry?

A. Nothing only what I have studied up myself.

6. How long have you been occupied in the position to which you have referred with the Peoria Gas & Electric Company?

A. I have been with them about 16 months.

7. With what company, or companies, had you been associated in a similar capacity, if any, prior to that time?

A. I was with the Peoples' Gas Light & Coke Co., of Rutland, Vt. then went to work for the Chicago Gas Light & Coke Co., at Chicago; I was with that company about 7 years before I came here.

8. How long were you at Rutland, Vt.?

Ans. About 15 years.

9. Were your duties during all that time substantially the same as they are here?

A. No sir; first I worked around the plant until the last 7 or 8 years; then I was superintendent of the manufacturing.

10. About what was the daily output of the Rutland plant?

A. About 38,000 cubic feet a day.

1322 11. Have you ever had any experience in the construction of gas plants?

Ans. No, I never did any construction work.

12. Have you ever had charge of the chemical department of a gas plant?

Ans. No, I worked as a chemist though for a couple of years in Chicago as an assistant.

13. When you left the Peoples' Gas Light & Coke Co., in Chicago you came directly to Peoria, did you?

Ans. Yes sir;

14. Through whom were your negotiations carried on which terminated in your becoming associated with the Peoria Company?

Objected to as incompetent and immaterial.

A. Why, Mr. Little.

15. That is the same Mr. Little now interested in the company?

A. Yes sir; he came to Chicago to where I was, offered me the position and I accepted it.

16. Had you previously had any acquaintance with him?

A. No, not any.

17. What are your actual duties as superintendent of the manufacturing department of your company, and what have you actually done since you have been here?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I do not see the materiality of that.

Mr. TICHENOR: I would like to have the witness answer.
The MASTER: He may answer subject to the objection.

A. My duties are to look after the plant, keep it running, make any improvements which I can see it will pay to make, look after the men, see they get fair results and one thing and another.

18. You follow the results, do you, from day to day?

Ans. Yes.

19. In those classes of the work are you accountable to any other person connected with the company, or is your power and authority absolute at the works?

Ans. Yes sir; it is.

20. You do as you please in those matters?

Ans. Yes sir;

21. Are you familiar with the territory covered by your 1323 system in Peoria?

A. No, I have never gone over it very thoroughly for the reason I do not have anything to do with the distribution.

22. Who is in charge of that department?

Ans. Mr. Robb.

23. How long has he occupied that position?

A. About 18 months I guess.

24. Mr. Little has been connected with the company during the entire time covered by your service there has he not?

Ans. Yes sir.

25. State whether or not he spends a portion of his time at the manufacturing plant?

Objected to as immaterial.

The MASTER: I do not see the materiality of it but the witness may answer subject to the objection.

A. He comes down may be once a week, sometimes twice possibly; sometimes it will be two weeks he is not there.

26. Are there any special duties, or any particular lines of work which are in charge of Mr. Little at the manufacturing plant?

Objected to as immaterial.

A. Well, anything in the line of construction work, or anything in regard to new apparatus, or anything like that I would consult him with regard to that.

27. But in your regular operations, is there any particular thing of which he has charge, and which he takes care of?

A. Of course, he is supposed to have charge over me.

28. That is, over the entire system?

A. Yes, street and everything.

29. Have you known, during the time you have been employed in the capacity mentioned, the daily output of your company?

Objected to as immaterial unless it is confined to the 1st, day of September 1901.

The MASTER: The witness may answer subject to the objection.

Mr. IRWIN: I want to instruct the witness as attorney for
1324 the complainant, that he has no right to state what the output of complainant's plant is, or the business that has been done by that plant since the 1st, day of September 1901. I will state now to counsel for defendant, that is as far as we propose to open up our books at the present time. We have given you four months prior to the passage of this ordinance and one year after we commenced the operation of the plant, we have thrown open everything to you and we will now leave it to the court whether we are to be compelled to go any further before we will submit to it.

The MASTER: It is in evidence in this case upon the part of the complainant that as the consumption increases the gas can be correspondingly sold at a less rate with a profit to the producer. I think the inquiry is competent and the witness may answer the question.

Mr. IRWIN: We will adhere to the position I have announced. Of course, we will have to instruct the witness, in behalf of the complainant company, that he has no right to give the details of the business of that company after the 1st, of September 1901, the date at which we made the proof.

The MASTER: What is the date of the passage of this ordinance?

Mr. MANSFIELD: September 4, 1900.

The MASTER: I think the witness may answer the question.

The WITNESS: The daily output—Interrupted—

Mr. IRWIN: Wait a minute. In behalf of the complainant company I instruct you, you have no right to give any details of the output, or business of the company, subsequent to the 1st, of September 1901, and as to that you will have to take your chances if you answer on it. I will say to counsel for defendant right now, that we are willing to submit that matter to the court at any time they desire.

The MASTER: It may be sufficient for the purpose of the inquiry for the witness to answer up to the time you make no
1325 objection Mr. Irwin?

Mr. IRWIN: Yes sir. Our business has been and is an open book up to that date, but we propose to call a halt there; that is as far as we went and we do not propose to permit counsel for defendant to go any further if we can help it because there will be no end to it if this investigation keeps on.

The MASTER: The inquiry really is, whether this is a reasonable ordinance and that question will be determined, not on any date, but whether it is now as disclosed by the evidence in the record.

Mr. IRWIN: It will have to date back to the time this injunction was asked. I do not agree with the master, an ordinance might be valid to-day that was not valid at that time.

The MASTER: Let me suggest to you, if it is an exercise of police power and if was valid at the time its operation is sought to be pro-

hibited, is it a material inquiry whether it was valid at the time it was adopted.

Mr. IRWIN: Certainly it is, because that was the time we asked for this injunction and we have given a bond and if it is valid at that time we have got to refund and we cannot try the case on facts two or three years following in order to sustain an injunction that happened two or three years ago. Facts and circumstances may be entirely different. Any fact that pertains to the business of this company for the four months prior to the passage of the ordinance and for one year following the passage of the ordinance, the business of the complainant is an open book for investigation and has been since the commencement of the taking of the proof in this case, but we feel it is unfair to the company and unfair to those interested in it, to continuously make the business of this company an open book for the investigation of the defendant to sustain an injunction granted about the time of the passage of the ordinance in September, 1900.

Mr. TICHENOR: Why don't you stop at October 1, 1901?

1326 Mr. IRWIN: Because we give you the whole business of the company prior to the time of the passage of the ordinance and for one year following that time so it takes in all the conditions of the plant and the condition of the business during all seasons.

The MASTER: I am inclined to take a different view of the matter. Let the witness go on and answer up to the 1st, of September, 1901, and I will make a subsequent ruling as to any further inquiry.

A. Yes sir; I know the sendout by our station meter, but I could not tell you the actual gas sold by the meters; I could not tell that because there is a leakage from that, but we send out about 130.000 to 160.000 cubic feet a day; of course there probably would be somewhere in the neighborhood of 8, 10 or 12½ % leakage.

30. What was the daily ourput, as nearly as you can remember it, when you first became associated with the complainant company 16 months ago?

Ans. It was about the same thing.

31. What was it up to the 1st, of September 1901?

A. It run a little low just about that time—probably about 130.000 or 140.000 cubic feet.

32. What was your daily output if you remember substantially in the month of January 1901?

A. Probably 160.000 to 170.000 cubic feet per day—no, it did not run that much—about 130.000 on the average.

33. You are operating a coal gas plant alone—you have no water gas plant?

Ans. We have no water gas plant.

34. Do those figures which you have given represent your entire manufacture from day to day?

Ans. Yes sir;

35. What was your daily output during the month of September 1901?

(Objected to as incompetent and immaterial.)

The MASTER: That relates to the time covered by your previous objection, Mr. Irwin?

Mr. IRWIN: Yes sir; and I desire to instruct the witness he has no right to give any of the details of the business of the com-
1327 plainant company after September 1, 1901.

I now instruct you, Mr. Eustis, that unless you propose to answer these questions with reference to the details and business of the complainant company subsequent to September 1, 1901, over my objections and protest, your answer should be, "On the advice of counsel for complainant I refuse to answer the question."

Adjourned by agreement until Thursday, May 1, 1902, at 2 o'clock p. m.

United States circuit court room, Government building.

PEORIA, ILLINOIS,
THURSDAY, *May* 1, 1902—2 o'clock p. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for the defendant.

The witness, Mr. E. W. Eustis, who was on the witness stand at the adjournment on Tuesday, again took the stand and the stenographer read over his testimony that had been given.

Mr. RITCHER: As indicated by the minutes of the stenographer we are evidently up against a question which we deem of considerable importance and in our view of it it becomes our duty not to let the testimony go in unless the court so instructs. It seems to me instead of wasting time and sparring here over something which, so far as the facts are concerned we probably all have our own opinion about and know about, that this being a question of law it would be proper to make up an issue and go to the court on it. We do not desire to delay the hearing by interposing objections to fifty questions. We think the whole matter ought to be taken up to the court.

The MASTER: I agree with counsel in that respect, the
1328 record, however, at the present time is not in exactly the right shape to present to the court because there has been no ruling by the master on this question. Do you renew your question, Mr. Tichenor, as to the output in the month of September 1901?

Mr. TICHENOR: Yes sir; and I desire to say, if the master please, as we have intimated before—perhaps stated positively—we have a right after the proofs are all in to file an amended answer and, if the situation is such as to make it proper, to file a supplemental answer. That course we propose to pursue provided the situation

is such as to require it and probably it will be, so far as pertains to matters occurring after the filing of our previous answer.

Mr. RITCHER: While the statement of counsel is of course proper, the filing of an amended answer or supplemental answer must be based upon something growing out of the case pertaining to the issues as they then stood.

The MASTER: I desire to say that since our last adjournment I have made what effort I could to determine the right course to take in this matter and have come to this conclusion: That if the answer is amended this evidence would be clearly competent. I also find the rule to be, and it is said to be fundamental, that the evidence must be confined to the issues made by the pleadings. This is a rule applicable to equity proceedings as well as proceedings at law. Now, the issue in this case is, as to the reasonableness of this ordinance fixing the maximum rate to be charged for gas. In my opinion, when this record is submitted to the chancellor for final determination as to whether or not this temporary restraining order shall be made perpetual or not, the inquiry will be directed as to what the conditions then are as to the reasonableness of the maximum rate fixed by the ordinance as disclosed by the record, not as to what they may have been at the time the bill was filed. That being true, I am of the opinion, especially in view of the stipulation of counsel, for the defendant, that it is competent evidence
1329 for the defendant to go into as to the output since September 1, 1901, and the master directs the witness to answer the question.

(Mr. TICHENOR:)

35. I would like to have your answer, Mr. Eustis?

A. I consider that a confidential matter between me and the company and I wish not to answer that question under advice of counsel.

36. Then you refuse to answer do you?

A. Yes sir; under advice of counsel.

37. Is the advice of counsel your only reason for refusing to answer?

A. Well, I don't know why I should answer. I understand the case was to September 1, 1901—Interrupted——

(The MASTER:)

38. The question is as to whether or not the reason you refuse to answer is because counsel for complainant has advised you not to do so?

A. Well, I consider it confidential between me and the company

(Mr. TICHENOR:)

39. That is not a matter for you to decide as I understand the ruling of the master?

The MASTER: No, it is not a matter for you to decide.

Mr. RITCHER: He says he will refuse to answer unless advised to do so by counsel and counsel will not advise him to answer.

(Mr. TICHENOR:)

40. Why do you refuse to answer the question that has been propounded to you?

The MASTER: I do not think I would press that question any further, Mr. Tichenor. I think the record is clearly sufficient to get a ruling on the point in controversy as the record now stands. The record of Mr. Ritcher's last direction to the witness is clearly sufficient. I would not waste any more time on it.

Do you desire to continue with the witness on some other line of inquiry?

Mr. TICHENOR: No sir; our examination of this witness pertains almost entirely to that line of examination.

1330 The MASTER: Well, call another witness then?

Mr. TICHENOR: This is the only witness we have ready; we expected to occupy the whole afternoon with him.

The MASTER: I think you ought to have other witnesses present. You certainly ought to have known the master could not compel this witness to answer this question.

Mr. TICHENOR: Well, that is the situation we are in.

After some discussion the hearing was adjourned by the master for the purpose of giving counsel an opportunity to submit the question of the competency of the evidence called for to the court, the hearing to be resumed at the call of the master.

1331 United States circuit court room, Government building.

PEORIA, ILLINOIS,
MONDAY, *May 5th*, 1892—10 o'clock a. m.

Parties met pursuant to the call of the special commissioner.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

Direct examination of E. W. EUSTACE resumed by Mr. Tichenor:

41. What books are kept at the works which pertain to the manufacturing plant of complainant company—I am referring now to those with respect to keeping records of material, labor, production, output of gas and other matters of that character?

A. We keep a manufacturing book that shows the station meters, the amount of coal used every day, coal in stock, gas made per ton

of coal, made per retort, tar made, ammoniacal liquor made, coke, candle power, etc. We have a time book for the labor that runs for two weeks which we turn into the office.

42. How is that labor time kept?

A. It shows how many men are in the retort house at so much per day.

43. That is kept from day to day?

A. Yes, charged up every day.

44. Have you a regular time keeper?

A. Well, we have a store keeper that looks after the time.

45. Who is the store keeper?

Ans. Geo. W. Barker.

46. How long has he held that position with your company?

A. He has been doing that work about a year, but has been with the company about two years, since we started or longer.

47. State whether or not during the time covered by your connection with the company there has been any change in the
1332 method of keeping any of the accounts to which you have referred.

A. No, nothing at all, unless a little difference in the manufacturing book, that is, we might add something to it, that is all.

48. When, with respect to the time of coal consumption, purchases, or use of material, etc., are those items entered in your manufacturing books?

Ans. They show when we receive coal.

49. You charge that in the book at the time of the receipt?

A. Yes sir, but there is no cost price or anything on the coal shown; that is all taken care of at the office.

50. From what source are those quantities so charged or entered obtained—as you receive the coal is it entered on this book?

A. That shows we receive so many thousand pounds, for instance, today.

51. From what source do you get those weights?

A. From our scales.

52. You do your own weighing, do you?

Ans. Yes sir.

53. And are those entries made as soon as the weights are obtained?

Ans. Yes sir.

54. And that is part of Mr. Barker's duty, is it?

Ans. Yes.

55. Do you also keep an account of the consumption of the different kinds of coal used from day to day?

Ans. Yes sir.

56. How many different kinds of coal do you use in the manufacturing plant?

A. We are using only one kind now for gas, that is Youghiogheny; we use mine run sometimes screened for fuel purposes.

57. Coal from the Peoria mines—local mines?

A. Yes sir, about six weeks ago, we run out of coal and could not get any and we used half local coal and half Youghiogheny both for boiler purposes and gas purposes; we could *get* not get the other coal and were down to about 50,000 pounds of Youghiogheny
1333 and we used the local coal to help us out until we could receive some coal.

58. Have you at any time since your connection with the company used any of the Illinois coal for gas purposes other than you have stated?

A. We used some, I think it was a year ago last winter, we tried it and it was a failure; we tried it with our benches but we could not get the heat from it on account of so much sulphur in the coal and we gave it up.

59. When is your gas coal consumption from day to day entered in this manufacturing book to which you have referred?

A. It is entered twice every day.

60. And has that been your practice during the period covered by your connection with the company?

A. Yes sir, always, but we find that it is not absolutely correct for the reason at the end of two years' run down there we found a shrinkage in our coal of about 4 per cent.; it is not correct because sometimes it overweighs a little and sometimes underweighs; it varies a little.

61. When you say a shrinkage of 4 %, do you mean on the basis of the weights made by yourself at the time of the receipt of the coal and again your weights at the time of consumption?

A. Yes, when it is all consumed; of course, it may be possible—you know each man weighs his own coal—and he might not be particular with it and give us more weight than we ought to have.

62. Who does the weighing as the coal is received and what has been the rule during your connection with the company?

A. Mr. Barker does that.

63. Who does the weighing at the time of consumption?

A. Each man does his own weighing in the retort house.

64. How many men are ordinarily employed in the retort house?

1334 A. We vary with the amount of gas made.

65. How many are employed at the present time?

A. There are 18 men including both shifts.

66. You employ about 9 on each shift, do you?

Ans. Yes sir.

67. With reference to the work they perform in the retort house, how is it divided among those nine men?

A. Each man has a bench to operate on the floor; he does his own drawing and charging, that is, they work in pairs and we have three coke men and the men working the coal that is included in the 12 hours' shift.

68. Do those men charge the retorts and draw the coke out entirely?

A. They look after the fire, draw their coke and charge and look after their bench.

69. Who supplies those men with coal?

A. They go out and draw their own coal buggy in but it is loaded for them, they just run it in on the scales and weigh it.

70. Each retort man weighs his own coal in?

A. Yes and there is where a mistake is liable to come in the weighing one way or the other.

71. Does he also keep a record of that?

A. He merely puts on a sheet the amount of coal he puts into a charge, whether 900 pounds in three retorts or sometimes 1,000.

72. What does he do with that?

A. It is turned in to us at the office.

73. Those slips go to Mr. Barker, do they?

Ans. Yes sir.

74. How frequently?

A. Every morning he gets them for the last 24 hours' work.

75. How are your shifts divided with respect to the 24 hours?

A. In 12 hour shifts but they work about 10 hours, that
1335 is, they are on duty 10 hours; they probably work about 15 or 20 minutes to the hour.

76. How is the division made as to time—when do you change shifts in the 24 hours?

A. They go on at 6 o'clock and they get through about half past 4 or 5; they work about 15 minutes in an hour, and it is hard to get men even to do that.

77. That is due to the extreme heat in the retort house?

A. Yes sir, and we are short now this hot weather; we cannot get men to do the work in this hot weather; I figure we should keep 6 or 7 men extra for we cannot keep men in there.

78. That is the same in every retort house, I suppose?

A. It is unless they have drawing and charging machines, that does away with that.

79. What if any account is kept at the works of the daily gas production?

A. We keep an account of it showing the gas made every 24 hours and sent out.

80. Do you take that every 12 hours?

A. Yes sir, at 6 o'clock in the morning and 6 o'clock in the evening.

81. Are those items entered in this manufacturing book to which you have referred?

Ans. Yes sir.

82. Who takes the register and who makes the record?

A. The engineer takes the station meter and the holder, Mr. Barker makes out the record.

83. Who do you mean by the engineer?

A. The man that has charge of the boilers and the engines.

84. You do not employ a gas engineer?

Ans. No sir.

85. Do you know when the engineer makes a report with respect to the time he actually takes the statement?

1336 A. We have a book from 6 a. m. to 6 p. m. and he is supposed to take it.

86. That book goes to Mr. Barker, does it?

Ans. Yes sir.

87. How many station meters has your company?

A. The Peoria Gas & Electric Co. has one.

88. Is that all it has ever had?

Ans. Yes sir.

89. Does all the gas that your company manufactures pass through that meter?

A. All it manufactures for itself, yes sir.

90. Is there any gas which your company manufactures that does not go through that station meter?

A. Yes sir, they are delivering gas to the Peoria Gas Light & Coke Co.

91. How is that charged?

Ans. At the station meter.

92. Whose?

Ans. Their own.

93. Which one do you mean?

A. The Peoria Gas Light & Coke Co.'s meter.

94. Who has charge of that station meter?

A. We take that station meter the same as our own.

95. Is that station meter of the same make as your own?

A. Yes sir.

96. At what time do you take that station meter?

A. At 6 o'clock in the morning and 6 in the evening.

97. What regulates the quantity of gas which you deliver through the station meter belonging to the Peoria Gas Light & Coke Co.—what forms the basis for the quantity you deliver through that meter?

A. Well, the same as we manufacture it—enough to keep their holders high.

98. You depend do you upon the quantity in their holders?

A. Yes sir, that is the consumption.

1337 99. How long have you been delivering gas to the Peoria Gas Light and Coke Co. in the manner you have described?

A. I think we commenced along about the first of November 1901—it might be two or three or four days earlier than that.

100. Will your books show exactly when you commenced that delivery?

Ans. Yes sir.

101. What account is kept of that gas, if you know?

A. Well, all we do, I turn the account of that in to Mr. Little; we also send a statement to the old company every day.

102. Is that entered on your books at the works at all?

A. We just keep an account of the gas delivered.

103. Is that entered on this book you call the manufacturing book?

A. No, sir, we keep a separate book for that.

104. Is it a similar book?

Ans. Yes sir.

105. Have you more than one book at the works in which you keep the accounts of the various items concerning which you have testified, that is, your coal, labor, gas, etc.?

A. No sir, we have only one book, the book I speak about, which merely shows the gas delivered in the send out and the stock on hand of the old company.

106. That is a separate book?

Ans. Yes.

107. The gas which goes into your own holder is in the same book with your material, etc.?

Ans. Yes sir.

108. Is that book the only book you keep at the works for those purposes?

Ans. Yes sir; all we have, as I say, is a book showing the station meter from 6 a. m. to 6 p. m. and also the height of the holders.

109. Are you speaking now of your own company?

Ans. Yes sir.

110. That is separate from the stock account?

A. Yes, it is merely an account of the station meter.

1338 111. Who takes the station meter of the Peoria Gas Light & Coke Co.?

A. Our engineer and boiler man.

112. The same man?

Ans. Yes sir.

113. Does Mr. Barker make a record of that?

Ans. Yes sir.

114. Has there been any change in the method of keeping the quantity of gas furnished to the Peoria Gas Light & Coke Co. during the time that has elapsed si-ce you began that service?

A. No sir.

115. Who is your engineer that has had charge of this service during the time to which you have referred?

A. Well, we have had three different men, one man named Mike Hart, another Charles Victor, and a man named Whalen, I cannot think of his first name; they are around the yard reading the station meter and when one leaves and we put another in we just instruct them how to read it.

116. What, if anything, have you to do with those gas accounts after they are entered and transmitted to the up town office, as you have stated?

Ans. I do not have anything to do with them; the most I am looking after is to see about how we run.

117. State whether or not you keep a separate account of the results of each retort man?

A. No, we do not; we could not do that for the reason we would have to read each man's work separate.

118. Then the only knowledge you have is the result for 12 hours and result for 24 hours?

A. Well by going through the house, I can know the result by the different benches and the heats and the coke as it is coming out of the retorts; I can tell pretty quick which one has not got his bench in good shape.

119. In what building of the Peoria Gas Light & Coke Co. is its station meter located?

Ans. At the office at the works.

1339 120. In whose custody is that building?

A. Well we have a key to it and go back and forth to take the station meter.

121. Do you know whether anyone else has any key to it or not?

A. No, not that I know of.

122. Do you know who has charge of the remainder of the manufacturing plant of the Peoria Gas Light & Coke Co.?

A. Mr. McKinley told me he would like to have me act as custodian of the property.

123. That was a verbal statement, was it, not in writing?

A. Not in writing, no.

124. How long ago was that?

A. About the time they shut down.

125. And you have had charge of it since that time?

A. I have kind of looked after the property to see that nothing was destroyed.

124. What duties do you perform in and about the manufacturing plant of the Peoria Gas Light & Coke Co.?

A. We have no duties outside of looking out for the amount of gas delivered.

127. Who looks after the gas holders and the water supply in cisterns?

A. There is nothing to look after only a pump running there; every 24 hours our engineer oils it or once in 12 hours.

128. What does that run for?

A. It is run for one of their holders; there is a leak in it and we have to supply water to keep it from leaking out.

129. Where is that pump located?

A. In the engine room in the basement.

130. Of the works of the complainant company?

A. Yes sir.

1340 131. How far is that holder, which you continually supply with water, from the pump?

Ans. Probably 40 or 50 feet.

132. This holder, to which you are now referring, is the largest holder on the old company's ground, is it not?

A. No, it is next to the largest; it is the holder that sets in the middle there.

133. Is it not also necessary to supply water to the tank of the large holder?

A. No, we have not put any water in it.

134. Have you any connections with the water supply for the other holder?

A. There is a connection there but we have never used it.

135. Is that connection also with this same pump to which you have referred?

Ans. No sir, it is not; there is a pump in the water gas plant they could run from the river but they have never used it.

136. Where is this water gas plant located?

A. In the yard there on the old company's ground.

137. Is there also a city water connection to either of those large holders on the old company's ground?

A. Not that I know of.

138. Is it not true that at certain seasons of the year, and particularly in times of snow storms, it is necessary to give the holders some special attention?

A. The only time it would be necessary would be in a heavy storm so the top of the holder would get a heavy load of snow on it, it would be liable to make it leak.

139. Is it not also liable to jam in the guides?

A. A heavy sleet storm might do that.

140. And at such times it is necessary to guard them carefully?

A. Yes, but we have never had any trouble in that line
1341 with sleet or anything except a heavy snow storm.

141. Does your authority at the works of the Peoria Gas Light & Coke Co. extend over the holders as well as the parts to which you have particularly referred?

A. Yes sir, we have to take care of the amount of gas delivered.

142. Do you not also have to see that the holders are operating properly. In other words, use the same care with respect to them that you do with respect to your own holder?

A. Yes, we would have to do the same.

143. Where is the connection between your manufacturing plant and the delivery to the Peoria Gas Light & Coke Co.?

A. It runs right along back of the holder between the coal sheds.

144. About how great a distance?

A. I could not tell you exactly, it might be 400 or 500 feet.

145. From what point in your works does that main—if that is the proper term for it—originate?

A. It comes from the purifying house just at the end of the boxes.

146. Is there any connection between that main and the one that runs to your own holder?

Ans. No.

147. Do you draw from the same source of supply to fill your holder and theirs also?

A. Thier gas comes off from the outlet of the boxes and we also take ours but they are both metered separately.

148. Have you a separate purifying box—Interrupted.

Mr. RITCHER: Complainant admits it all comes out of the same purifying boxes.

149. When was this main to the station meter of the Peoria Gas Light & Coke Co. put in?

1342 A. In October, 1901, on or about the 20th, I think.

150. What, if anything, did you have to do with placing it there?

Ans. Why, I didn't have anything to do with it.

151. The work was not under your supervision?

Ans. No.

152. Who put it in?

Ans. Mr. Robb.

153. By what company was he employed at the time it was put in?

A. By the Peoria Gas & Electric Co.

154. He acted as superintendent did he in its construction?

A. Yes sir.

155. Who furnished the material and labor that went into it?

A. I don't know about that, I could not tell.

156. Were there any other men known to be in your employment that worked upon that construction at that time?

A. No there was not.

157. Would your accounts at the works show whether you furnished the material and labor or not?

A. I don't think they would; Mr. Robb would have that.

158. What is Mr. Robb's full name?

Ans. John W. Robb.

159. What is his official connection with your company?

A. He is superintendent of distribution.

160. You know the condition at the present time, do you not, of the manufacturing plant of the Peoria Gas Light & Coke Co.?

A. Yes sir.

161. What is its condition now with respect to being ready for operation or otherwise?

Ans. It would have to be rebuilt.

162. What if any changes have been made in those works since the time you began to furnish gas to the Peoria Gas Light & Coke Co.

A. There has not been any aside of laying that main.

163. What is the condition at the present time of the old retort house?

A. It has depreciated so we could not use it; it would have

1343 to be rebuilt.

163. Where is that located with respect to the railroad ack along in front of the two plants?

A. It is located right along side of our office.

165. Do you know how long it is since that retort house was in use?

A. It was in use up to November—do you mean the old one?

166. Yes?

Ans. Oh, I don't know how long.

167. How many retort houses are there on the grounds of the old company?

Ans. Two.

168. What is the condition of the old retort house at the present time?

Ans. It would have to be rebuilt in order to make any gas there.

170. What has become of the old retorts that were in there?

A. I believe they were sold to Finkelstein.

171. What, if anything, did you have to do with their removal and disposition?

A. Mr. McKinley told me he wanted to get rid of them and for me to tear them down and sell them the best I could.

172. He left that entirely to you?

Ans. Yes sir.

173. Was that instruction entirely verbal?

Ans. Yes.

174. Have you in your possession or control any correspondence whatever from him pertaining to that particular subject matter?

A. No sir.

175. When did you get that instruction?

A. Oh, about a month ago. (I understood they were going to rebuild that house.)

Defendant objects to that part of the foregoing answer enclosed in brackets as not responsive and moves the court to exclude it.

176. What is the present condition of that structure?

A. It is unsafe; it would have to be rebuilt; the roof is
1344 nearly off and the walls are ready to fall over and I am afraid they will fall if not taken down.

177. Do you know at the present time what make of retorts are in the other retort house on the ground of the Peoria Gas Light & Coke Co.?

A. Mr. Bredel put those retorts in.

178. Are those the same make as the ones in your plant?

A. No sir, we have the Parker-Russell.

179. Are they substantially identical in their construction and operation?

A. Largely so except we have what is called the pipe organ flue in the Bredel and we have the box flue which is about the same thing.

180. Do you know when the present stack, the one to which you have just referred, was put into the Peoria Gas Light & Coke Co.'s plant?

A. I could not say, I was not here.

181. Was that retort house in operation when you first became associated with the complainant company?

Ans. Yes sir.

182. What kind of furnaces are used there?

A. Regenerative, the same as ours.

183. Those are the most modern type of regenerative furnaces, are they not?

Ans. Yes sir.

184. How many benches, how many retorts in each bench in the old plant?

A. 6 benches and 9 retorts to a bench.

185. Has any change been made in that stack since you have been employed by the complainant company within your knowledge?

A. No sir.

186. For how long a period of time have benches and furnaces of the kind to which you have just referred in the old company's
1345 plant, been in use?

A. I could not tell you exactly but 10 or 12 years, I guess.

187. Before you came to Peoria, had you had experience with the same kind of furnaces?

A. Not with regenerative furnaces.

188. What advantages has the regenerative furnace over the old type?

A. It has a slight saving of fuel.

189. Do you know whether or not it tends to economy in the manufacture of gas taken as a whole?

A. Not otherwise only in room and in fuel.

190. Then in your judgment the old method is substantially as economical as the new?

Ans. Yes.

191. What experience have you had with the two classes of furnaces in question?

A. We used *two* run benches of 3's.

192. For how many years did you use those?

A. From 2 to 2½, sometimes 18 months.

193. I do not mean that but how much experience in years did you have with furnaces of that kind?

A. Well, I have been around them for about 8 or 10 years. Then we went to making water gas.

194. How long have you had experience with the regenerative type of furnace?

Ans. About two years.

195. Has that experience been entirely in this Peoria plant?

A. Yes.

196. Is the Peoria Gas & Electric Co. now manufacturing and supplying all the gas used by the Peoria Gas Light & Coke Co.?

A. I don't know.

197. How long is it since the manufacturing plant of the Peoria Gas Light & Coke Co. was shut down?

1346 Objected to as already asked and answered.

The MASTER: I think so but the witness may answer this direct question.

A. It was some time along about November 25th, 26th or 27th, 1901, somewhere in there, I don't remember exactly.

198. And up to that time had the old company's plant been manufacturing its own gas supply entirely, so far as you know?

A. Yes sir.

199. How many plants has the Peoria Gas Light & Coke Co. in Peoria?

Ans. Only one that I know of.

200. How many plants has the Peoria Gas & Electric Co.?

A. One gas plant is all I know of.

201. In the department, to which you have referred, do you have the entire control or have you an assistant?

A. I have no assistant.

202. Has that been the fact during all the time you have been connected with complainant company?

A. No, I had an assistant along in 1901, in August, I believe it was—Peley was my assistant.

203. But for some months past, you have had no assistant at all?

A. No sir.

204. You are on duty during the day as a rule, are you?

A. Yes sir; we have a retort house foreman night and day.

205. Do you know what the condition of the remainder of the plant of the Peoria Gas Light & Coke Co. is at the present time outside of the old retort house?

A. Well, their purifying boxes would have to be recovered and the plant would have to be repaired and renewed generally all around.

206. What particular repairs or replacements other than those already specified would be necessary?

1347 A. They would need new pumps all through the plant with the exception of one or two; new piping for steam boilers, all would have to be rebuilt?

207. Are there any boilers in the old company's plant at the present time?

A. There are four boilers.

207. Is there any engine in the old company's plant?

A. Yes, it has three engines.

208. Do you know anything about their condition?

A. I don't know their exact condition.

209. Do you know about the conditions of the water gas plant, of the old company's plant?

A. Well, in my judgment it would need repairing and renewal of the brick work and the like of that.

210. Have you any duties to perform, other than those indicated, with the works of the two companies to which you have referred?

Ans. No sir.

211. Who, if anyone is employed about the manufacturing plant of the Peoria Gas Light & Coke Co. except yourself?

A. I don't know as any one.

212. How frequently during the past 6 or 7 months have you been upon those premises?

A. I might be there some days two or three times and sometimes oftener than that.

213. What compensation, if any, do you get from the Peoria Gas Light & Coke Co. for your services to that company?

Objected to as incompetent and immaterial and calling for the confidential relations between this witness and a company not a party to this suit.

The MASTER: I think it would be competent to show whether or not he gets a compensation but I do not think it would be
1348 competent to show what it is.

214. State whether or not you get any compensation for your services?

(Objected to as incompetent and immaterial.)

A. No, I do not.

215. You understood, did you, that my question refers to your services as described by you for the Peoria Gas Light & Coke Co.?

A. Yes sir; I have not received any salary from the Peoria Gas Light & Coke Co. for those services.

216. Have you any agreement for any salary whatever from that company?

Objected to as incompetent and immaterial and asking the witness to disclose confidential relations between himself and a company not a party to this suit.

A. I have none.

217. Previous to the time you were employed by the Peoria Gas Light & Coke Co., in the capacity to which you have referred, did you have any conversation with Mr. McKinley, or any of the other officers of that company, with respect to that employment?

A. No.

218. Have you had any conversation pertaining to that subject, with any of the officers of your company or any of the people interested in it?

A. In looking after that property?

219. Yes?

Ans. I went to see Mr. Little about it and he said it would be all right so far as he was concerned.

220. Was that before or after Mr. McKinley conversed with you?

A. Afterwards.

221. Was that Mr. Little to whom you refer the Francis W. Little who has testified in this case?

Ans. Yes sir, manager of our company.

222. Is that the only conversation you ever had with him
1349 on that subject?

Ans. Yes sir, that is all.

223. Have you any business, or have you had, during the time covered by your connection with the complainant company, other than in the capacity described for the past two years?

A. I worked for the Peoria Gas Light & Coke Co. for about six months during that time; I left the new company April 5, 1901, and worked for the old company up to November 1, 1901.

224. In what capacity were you employed by the old company during that time?

A. In the same capacity I am with the Peoria Gas & Electric Company.

225. Do you know who took your place in the new company during that period?

Ans. Yes, Mr. Robb.

226. What, if anything have you to do with the street mains?

A. I have not anything to do with it.

227. State whether or not there is any cut-off in the main, to which you have referred, running from your works to the station meter of the Peoria Gas Light & Coke Co.?

A. Yes sir, there is a valve in our meter room.

228. Is that the only cut-off?

A. Well, if they want to cut it off in the old works office they could cut off the inlet to the valve there.

229. That is the regular meter cut-off?

Ans. Yes sir.

230. Is there any cut-off or by-path between the purifying boxes and your own holder?

A. The chief thing is the valve from the meter; we can shut that valve and by-pass it to make repairs to the meter or anything.

230. Is there any cut-off between the purifying boxes and the meter?

A. There is a valve to shut off the box or outlet.

232. So you can entirely cut off the purifying boxes from
1350 the station meter or from the holder?

A. We could not cut off the purifying boxes and make gas but there is a by-path from the meter; there is on every station meter.

233. How many holders of the Peoria Gas Light & Coke Co. are in service at the present time?

A. There is one; you never can run but one at a time.

233. Is that the largest one to which you have referred?

A. Yes sir.

234. Is that the same as yours?

Ans. Just about.

235. What is its capacity?

Ans. 300,000 cubic feet.

236. Is that the only holder on those grounds that has been in service during the time you have been furnishing gas to the old company?

A. If they did not have gas enough in the large holder, they might shut it off and put on the other holder.

237. Do you know, as a matter of fact, whether that has been done?

Ans. That has been done.

238. When and how frequently?

A. Well, it might not be done in a month, then it might be done two or three times a week, depending on the consumption; I don't believe it has been done for the last two or three weeks.

239. During what part of the time since you began to furnish gas to the old company was that done?

A. It might have been done a month ago, it might be two weeks ago, I don't remember exactly.

240. Was it done frequently during the winter months?

A. No, not very frequently; if a dark day came on and we were not manufacturing quite enough, in order to keep that large holder for the evening, we might put on the next holder.

241. Who did that or who had charge of it?

1351 A. The engineer would do that, the same man that reads the station meter.

242. Whose duty was it to see that question was properly taken care of?

Ans. My duty.

243. And you instructed the engineer, did you?

Ans. Yes.

244. Did you receive any instructions in that regard from anybody else?

A. I had instructions from Mr. Little to deliver them gas.

245. But from day to day, as occasion required, you received no instructions to turn gas into the other holder?

A. No, I just used my own judgment.

246. How are the connections between the station meter and those two holders on the old company's ground with respect to shutting off from one and turning on to the other?

A. All you have to do is to open a valve on the holder you want put on to the city, then go and shut the valve you want to take off from the city; there are two valves.

247. When you were delivering gas into the second holder, or the smaller one, as I understand you, would the larger one be entirely shut off from your works?

A. No we would merely open up the outlet to the city, that would back the lighter holder up, fill it up; the street governor would control the pressure back.

248. There is a direct connection between the two holders, is there?

A. Yes, there is a header coming along that connects them together.

249. What is the capacity of this smaller holder to which you refer?

A. I am not certain but think about 250,000 cubic feet or 280,000.

1352 250. When you refer to the capacity of a holder, you mean the quantity it will hold at one time?

Ans. Yes sir.

251. And not the quantity it is capable of distributing in the 24 hours?

Ans. No sir, just the amount of gas it will hold.

252. Where a gas holder has a capacity of 300,000 cubic feet, as I understand complainant company's have, can you supply during 24 hours by distribution a greater quantity than that?

A. Yes sir, we can.

252. How much can you increase your distribution above the actual capacity of your holder?

A. That depends on the hours the gas is burning; if it is all burned in three or four hours we could not increase it very much, probably 25,000 an hour for four hours, but if it was burned steady for the 24 hours we could probably increase it the capacity of the plant, but it is not burned, of course, that way.

253. What effect upon that question has the introduction of gas for fuel purposes had?

A. It has increased the day consumption some; I don't know just how much.

254. During the process of manufacture, is gas being delivered into the holder continually?

Ans. Yes sir.

255. So that the distribution and the delivery into the holder are practically continuous and going on at the same time?

Ans. Yes.

256. Is there any connection between the main, delivering the gas to the holder and the outlet for distribution?

A. Well, we could by-pass the holder and run directly to the city.

257. But, as they are ordinarily constructed, is there any connection?

Ans. No, there is not.

258. The city supply is drawn entirely from the holder as a reservoir?

Ans. Yes sir.

1353 259. During the time that you have had charge of the old company's works, wh-t, if anything, has been done there except under your authority and direction since they shut down?

Objected to as incompetent and immaterial.

A. There has not been anything done outside of starting to tear down that old retort house.

260. Have those old retorts all been removed?

Ans. No.

261. The remainder of the buildings and the plant remain as they were when the plant was shut down?

Ans. Yes sir.

263. What other foreman, if any, has the complainant company other than those to whom you have referred in the manufacturing department?

Ans. Not any.

264. What other foreman, if any, has it in any of the other departments, so far as you know?

A. John Welsh has charge of the street department and Mr. Robb is the superintendent of distribution.

265. Has Mr. Robb also charge of the street work proper?

A. Yes sir.

266. Has he a foreman under him who looks after different gangs?

A. He has several foremen, I believe, but I don't know.

267. Since the time the complainant company began to furnish gas to the Peoria Gas Light & Coke Co., has the service been continuous up to the present time?

Ans. Yes, it has been continuous.

268. Did you have anything to do with the arrangement resulting in the complainant company furnishing gas to the Peoria Gas Light & Coke Co.?

A. Do you mean in the laying out of the work?

269. No, in the preliminary arrangements or business part of it.

A. No.

270. You took no part in the formation of any agreement pertaining to that question?

Ans. No.

1354 271. And you don't know what it is?

Ans. No, I do not.

Cross interrogatories by Mr. ABBOTT:

1. These books which you refer to as being kept by you at the plant are they official records or are the- mere personal memorandums kept by you as a check on the manufacture from day to day?

Objected to as calling for a conclusion and not for facts.

The MASTER: I think so, let the witness state what the books are.

2. For what purpose, if you know, are these books to which you have referred kept at your office?

Objected to same grounds.

A. It is simply as a check so I can see how I am getting out my work, that is all; they are kept for my personal benefit.

3. That is to ascertain, if I understand you, where there are leakages or where the cost of manufacture could be reduced?

A. Yes sir, or anything like that.

4. With reference to compensation for your services as custodian of the manufacturing plant of the Peoria Gas Light & Coke Co. you testified you received no compensation from that company—I presume you mean by that that you receive no personal compensation?

A. Yes since the plant shut down.

5. You don't know whether the Peoria Gas & Electric Co. receives compensation for your services from the Peoria Gas Light & Coke Co. or not?

(Objected to as immaterial and incompetent.)

A. I do not.

GEORGE W. BARKER, called on behalf of defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and residence.

1355 A. Geerge W. Barker, Peoria, Ill.

2. What is your business?

A. I am a clerk for the Peoria Gas & Electric Co.

3. How long have you occupied that position?

A. It will be three years the 6th of May, 1902.

4. Have you been a resident of Peoria during all that time?

A. No sir.

5. Where was your former residence?

A. I lived in Akron, Ohio, two years immediately prior to coming to Peoria.

6. What was your business there?

A. Clerk for the Akron Gas Co.

7. What were your duties there?

Ans. Stock clerk.

8. What are your duties in connection with the Peoria Gas & Electric Co. at the present time and what have they been since you became associated with it about three years ago?

A. I was storekeeper when I first came out here, that is, a clerk keeping track of the material.

9. Did your duty necessitate the taking care of all of the stock handled by the company for all purposes?

Ans. No sir.

10. What class of stock did it cover?

Ans. Building material.

11. That was when you first came here?
Ans. Yes.
12. And prior to the time the company started to manufacture gas—that was before the plant was constructed?
Ans. Yes sir.
13. What have you done since the construction of the plant was completed?
A. Kept track of material, all that was received and went out, and up to the last year or year and a half I kept the manufacturing record.
14. In what manner did you keep an account of the stock
1356 received and sent out?
A. I kept track of the material, that is, through the store room book in a book-keeping way—kept track of what we used.
15. When did you first enter upon any books belonging to the company material received?
A. I came here on the 6th of May and we did not get our books for about 10 days after that but we had material before I came here.
16. Has it been your custom to enter upon those books from day to day the material as it was delivered at the company's place of business?
A. We kept track of that with a blotter and then checked our bills from that.
17. Then the first book into which you make entries of that kind is a blotter?
Ans. Yes sir.
18. Who makes those entries?
Ans. I do.
19. What do you do with them then?
A. They are held until we receive the bills and the bills are checked with the material received.
20. Do you subsequently carry those accounts into another book?
Ans. Yes sir a store room and stock ledger.
21. Has that portion of the business been handled in that manner during the time you have kept that stock account?
Ans. Yes.
22. What do you do with stock sent out?
A. It is according to what it is used for; when material goes out for distribution it is charged up to distribution account and the material for manufacturing is charged to manufacturing account.
23. When are those charges made with reference to the time the material is sent out?
Ans. The very moment.
24. Of what does your manufacturing account consist?
A. It includes the amount of gas made and coal stock.
1357 25. Then you carry in that account all that enters into the manufacture of gas?
A. You mean in the store room stock?
26. No, in the manufacturing account.

A. We do not keep that in an account at all; we keep that in the store room; it is not charged up to the account until it is used.

27. You do then charge it up, don't you?

Ans. Yes sir.

28. Do you charge that in your manufacturing account?

A. Yes sir.

29. And is that true of everything that goes into the manufacture of the gas?

Ans. Yes sir.

30. Who makes all the entries pertaining to these accounts to which you have referred: In other words, is there anybody makes any entries except yourself?

Ans. Yes sir, Mr. Eustace.

31. What entries does he make?

A. He just O. K's.

32. I mean who makes the entries in the book?

Ans. I do.

33. And there is no one else?

Ans. No sir.

34. When material for the manufacturing department is taken to the works, is it charged at the time?

A. No sir; a memorandum is made of it in the blotter and it is charged up to the store room, then when it is used it is charged up to the account it is used for.

35. Then you do make an entry of it at the time it is taken?

A. Yes sir.

36. How many different classes of items do you carry on your books in the way you have mentioned pertaining to the manufacturing department?

Ans. I could not say.

37. How many books do you keep in the prosecution of 1358 your duties and what are they?

A. I keep a store room ledger; manufacturing ledger; a sales book, that is, sales we have at the works, and an invoice book.

38. What classes of items do you carry in each of the different books to which you have referred?

A. The store room ledger takes in everything, every piece of material and machinery we buy that could be inventoried; the invoice book is just a copy of the invoices as they are received; the munufacturing record just shows the amount of gas made, sent out, etc., coal stock in pounds.

39. In what book do you enter coal consumption from day to day?

A. In the manufacturing record.

40. Is that the same book in which you enter your gas production from day to day?

Ans. Yes sir.

41. What is the sales book?

A. That shows the number of pounds of coke delivered, etc.

(The MASTER:)

42. The sales book shows your residuals and the sale of them?
Ans. Yes sir.

(Mr. TICHENOR:)

43. Do you also, in making the books to which you have referred, include prices of any description or simply stock?
Ans. Some of them do; some of them don't have anything to do with the prices.

44. Does that in which the price applies pertain to a particular portion of the work or a particular portion of the material?
A. No sir.

45. In what cases do you handle the prices as well as the material itself?
A. The store room ledger gives the cost prices.

46. Do you handle in that store room ledger freight accounts as well as stock?
Ans. Yes sir, that is added to the cost.

47. Have these books been kept in the way you have de-
1359 scribed since the commencement of the manufacturing of gas at the complainant company's works?
A. They have always been kept just the same.

48. How often do you enter gas production?
A. Every 24 hours.

49. From what source do you get your information from which those entries are made in your account?
A. Statements of holders and meters.

50. Do you know the process by which those quantities are arrived at?
Ans. I could not say that I do.

51. Who furnishes yeu the items from day to day which you enter—I am speaking of gas only?
Ans. The engineer of the company.

52. You have nothing whatever to do with obtaining those items from the holders or meters?
Ans. No sir.

53. Do you carry one or two accounts showing gas production each day?
Ans. Two accounts.

54. What two accounts are those?
A. The amount of gas put into our holder and the amount of gas put into the holders belonging to the Peoria Gas Light & Coke Co.

55. How long have you been carrying those two accounts?
A. Since October 24, 1901.

56. Do those items, which you enter from day to day pertaining to gas, show production for those several days, or do they show output from meters?
Ans. From production.

57. And without any reference whatever to actual consumption?
A. It has nothing to do with consumption.
58. Have you in your possession the book in which that gas account is kept?
A. Yes sir (witness hands counsel book).
59. State whether or not the book now before you showing on the front fly leaf the words, "Works record of manufacture,
1360 March 13 1902, to ——" is the book to which you have referred as containing the gas account?
Ans. Yes sir.
60. In whose hand writing are they entered in this book?
A. Several different people.
61. I understood you to say you had kept those accounts continuously all the time?
A. I was speaking of the store room ledger.
62. Have you also kept the gas account?
A. Not all the time, I kept it on and off about a year, commencing about the first of March, 1901.
63. Have you kept that book all the time from about March 1, 1901, up to the present time?
Ans. No sir.
64. Who else has participated in it?
Ans. John Robb.
65. How was the work with reference to keeping these accounts divided between yourself and Mr. Robb?
A. It was according to who had the most time to do the work.
66. What portion of the time has and does Mr. Robb attend to the work?
A. Sometimes he comes down there once a day, sometimes twice and sometimes not at all.
67. What portion of the time do you spend at the works?
A. Ten hours every day.
68. What other duties do you perform besides keeping the book to which you have referred?
A. I keep the time book, look after the store room stock, the store room record, that is, the manufacturing record.
69. Is your time book kept from day to day?
Ans. Yes.
70. And have you had entire charge of the time book?
A. No sir.

Mr. RITCHER: I will say that so far as putting that book in evidence or any portion of it is concerned the complainant will
1361 not make any objections because the witness has not made all of the entries therein. If counsel wants the other party he can be produced but we will not object on that ground.

71. What book other than the one you have just identified have you, or anyone else at the works, used for keeping the daily record

of gas production during any portion of the time concerning which you have testified?

A. This book (witness producing book).

72. What difference is there between the book which you first identified and the one which you now refer to, the first being marked "Exhibit 20" and the second "21"?

A. This last book I produce shows the amount of gas delivered to the Peoria Gas Light and Coke Co.

73. The first book then pertains to the consumption by your own company?

Ans. Yes sir.

74. Do these books, Exhibits "20" and "21" show the quantity of gas passing through each of the two meters per day?

A. They show the amount of gas registered.

75. The register is of the amount of gas which actually passes through the meters?

Ans. Uncorrected.

76. For what purpose are corrections made?

A. Temperature and barometer.

77. You correct them with reference to a certain fixed temperature and barometer?

Ans. Yes sir.

78. And sometimes that would be an increase and sometimes diminish?

Ans. Yes sir.

79. What was the output of gas of complainant company on September 1, 1901, that is, the amount of gas sent out?

A. 115,700 cubic feet.

80. What was the amount of gas sent out on October 1, 1901?

A. 161,400 cubic feet.

1362 81. Does this book "Exhibit 20" show the dates all the way through?

Ans. It shows a part of them.

82. That is the way you keep the record, by keeping each day separately?

A. This book was first commenced to be kept in October, 1900.

83. And since that time, the days of the month and the months are all given?

Ans. Yes sir.

84. Please explain the different columns which you carry in this book as it has been kept?

A. The first column is the day and date; the next is stock of gas on hand at 6 a. m.; the third column gas on hand at 6 p. m.; the fourth station meter index at 6 a. m.; the 5th at 6 p. m. Now this is divided up into three columns, the first space is the uncorrected make, the day, the night and the total.

85. Those words appear at the head of the columns?

A. Yes sir.

86. What do those different columns mean?

A. The amount of gas made from 6 a. m. to 6 p. m., the amount of gas made from 6 a. m. to 6 p. m. and the total. The next one is the corrections.

87. You have under Tuesday, October 1*st*, in the column concerning which you have just testified, first the figures "88." What does that mean?

A. It means 88,000 cuic feet of gas made uncorrected.

88. And the figures 76 and 164 mean the same things do they?

A. Yes, it means 76,000 cubic feet and 164,000 cubic feet.

89. That is for the 24 hours?

Ans. Yes sir.

90. Proceed with the subsequent columns?

A. Corrections; the average temperature at the meter outlet; the average barometer of the day taken four times a day; then there is the tabulator number which is a given factor for temperature

1363 and *and* barometer.

91. From what source is that obtained?

A. We have a key at the works.

92. It is a regular table for that purpose?

A. Yes sir, given in books.

93. What use do you make of it in making your corrections?

A. We use it as a factor in getting the correct amount of gas made if the temperature was at 60 and the barometer was at 30 inches. The next column is corrected make, the day, the night and the total. The next column is the send-out, the day, the night and the total. The next column is the candle power, the hour taken.

94. Have you any special hour at which that is taken?

A. No sir.

95. Who takes that?

A. Mr. Eustace the superintendent. The next column is the total stock, total amount of coal in pounds on hand 6 a. m.

96. That means your entire coal stock does it?

A. Yes sir, for this particular month it does.

97. How is that item obtained?

A. Well, we take that amount of coal received each day from being weighed on railroad scales and received.

98. Do you also take into account the coal consumption from day to day?

A. Here is the coal received—it shows right along here; amount of coal received; amount of coal carbonized day and night; total day and night yield; retorts in use; make per retort; retorts on carbon; number of charges; pounds per charge; number of men in the manufacture of gas and make per man.

99. Are all those various columns, concerning which you have testified, marked at the head to correspond with your testimony?

A. They are not all marked in full, no sir; some of them

1364 are not.

100. Has the account all the time since the 1st, of October

1901, been carried in columns the same as you have now indicated—you have made no change in your system?

A. One or two places have been a little changed, but it does not amount to anything only putting in another column; we have the same heading every month; we had a meter down there that has been taken out and is not in use, that column does not appear over here because that meter is not in use.

101. That column appears only where you had such meter in use?

A. Yes sir.

102. Do you know for what purpose that air meter was used?

A. No sir.

103. Who furnished you the figures appearing in the column?

A. Just carried it from previous months not being in use.

104. How long is it since that was in use?

A. February, 1901, I believe; I believe it was used a little bit in October but I don't know what for.

105. I understood you to state that on the first day of October, 1901, the output of complainant company was 161,400 cubic feet, state whether or not that item appears in any column in the book Exhibit "20" and if not how it is arrived at from that book?

A. I don't believe it shows 161,400 in any other column, no sir.

106. Is there a column which shows those figures?

A. Yes, send out October 1, 1901.

107. And those figures are given after correction, as I understand you, for temperature and barometer?

A. Not with correction, no sir; we do not make any correction for the amount sent out but for the amount made only.

108. Then the correction, as I understand it, has nothing whatever to do with the output?

Ans. No sir.

(The MASTER:)

109. The output from the holder, you mean?

1365 A. Yes sir.

(Mr. TICHENOR:)

110. Beginning with October 1, 1901, your daily output, and the other items pertaining to the manufacture are entered consecutively are they not from page to page in Exhibit "20"?

A. Yes sir,

111. What is the last date upon which those items are entered?

A. May 5, 1902.

112. I see on your book under date of October, 1901, some entries in red ink. What are those entries and why are they entered in red ink?

A. It is the amount of gas delivered to the Peoria Gas Light & Coke Co.

113. Was that done before you began to keep a separate book for that company?

A. At the same time, it was entered the same day.

114. Do those items also appear in book marked "Exhibit 21" which you say covers the gas delivered to that company?

A. Yes sir, the figures are taken from this record and put into this book.

115. Then the book Exhibit "21" is the book in which you first enter the gas the complainant company has delivered to the Peoria Gas Light & Coke Co.?

Ans. Yes sir.

116. Have you since October, 1, 1901, still carried in book "Exhibit 20" the product you have delivered to the Peoria Gas Light & Coke Co.?

Ans. Yes sir.

117. How does that appear in the month subsequent to October, 1901, in the same way and shape?

A. Yes sir, it is all in red ink.

118. In the same column I see entries in red ink and black ink together, will you specify what those severally mean?

A. The amount of gas delivered in red ink is the gas de-
1366 livered to the Peoria Gas Light & Coke Co. and that in black ink is what we put in the Peoria Gas & Electric Co.'s holder.

119. And those are the several days opposite which the entries appear?

Ans. Yes sir.

120. And that method is continued all the way through up to the present time?

Ans. Yes sir.

121. So far as pertains to the gas furnished by the complainant company to the Peoria Gas Light & Coke Co., from the time it began to furnish until now, is the book which is marked "Exhibit 20" complete. That is to say, does it show all of those quantities?

A. Yes sir.

122. Then independent of Exhibit "21" you have in your own book all the gas you furnished during that time?

Ans. Yes sir.

123. Is it true that during all the time continuously since October 24th, 1901, you have been furnishing gas to the old company every day?

Ans. Yes some every day.

124. And whatever quantity you have furnished to that company correctly appears in the books you have identified as Exhibits "20" and "21"?

Ans. They are correct, so far as I know.

125. Look at Exhibit "21" and explain the meaning of the different columns used there?

A. The first column is day and date.

126. And those correspond to the day and date in your other book?

A. Yes sir. The next column holder No. 1, 6 a. m. and 6 p. m.; holder No. 2, 6 a. m. and 6 p. m.

127. What do you mean by holders No. 1 and No. 2?

A. They are the Peoria Gas Light & Coke Co.'s holders.

128. Which holder do you designate as No. 1 and No. 2?

A. The largest holder is No. 1 and the next holder is No. 2; there are three holders there; holder No. 3, 6 a. m. and 6 p. m.

1367 129. Those holders are all in use, are they?

A. *Tow* of them are; one of them is a sort of a relief holder.

130. What do you mean by a relief holder?

A. To be filled up when we have no other place to put the gas, I guess. The next is total stock 6 a. m.; next meter statement of the Peoria Gas Light & Coke Co., 6 a. m. and 6 p. m.; gross gas delivered day, night and total; corrections, the average temperature at their meter outlet, barometer, and tabular number; next column gas delivery, day night and total; next, send-out, day, night and total. The first month of November we did not figure up the day, night send-out.

131. You mean you did not separate them?

A. We did not separate them, we just struck a total

132. You have simply then the amount for the 24 hours?

A. Yes, for November.

133. That appears in the last column?

A. Yes, that appears for November.

134. Then from December on, those items correspond exactly so far as method is concerned with your books for the Peoria Gas & Electric Co.?

A. This book has nothing to do with that one only the amount of gas delivered.

135. It is carried out in the same way, you have the day and night statement just the same?

A. Yes, but the send-out, day, night and total up to the 25th of December is uncorrected; it is figured from the uncorrected amount of gas delivered to them.

136. Do you correct that at all?

A. We make corrections for the amount of net gas delivered, the same as though we put it into our holder according to their temperature.

1368 137. Does the question of correction as to temperature, etc enter at all into the daily output?

A. It has nothing to do with the output so far as I know.

138. In all the various columns of the books, Exhibits "20" and "21," pertaining to quantities of gas, what is meant by the figures which you have used for same. In Exhibit "21" under November 1, 1901, you have under the column, "Net gas delivered" "95.4"?

A. It means 95,400 cubic feet; the figures "95" is thousands and the figure "4" is hundreds.

139. Is that true of all the various figures which are entered in substantially the same way?

A. Those pertaining to the gas are.

140. Is that true in both of the books?

Ans. Yes sir.

141. Up to what time is the book "Exhibit 21" complete now?

A. To May 5, 1902, at 6 a. m.

Defendant's counsel offers in evidence the book identified by the witness marked "Exhibit 20," commencing with the first of September, 1901, and extending up to the present time, May 5, 1902, at 6 a. m., and also offers in evidence from the book identified by the witness marked "Exhibit 21" the items commencing with October 24, 1901, and extending up to 6 a. m. in the morning of May 5, 1902; a copy of which said books *are* hereto attached marked "Exhibits 20" and "21."

1369 142. What, if anything further have you to do with the accounts concerning which you have testified after they are entered in the different books mentioned?

A. I do not know that I have anything more to do with them.

143. State whether or not you furnish to the general office of the complainant company any duplicate statements of what those books contain so far as pertains to the testimony you have given concerning them?

A. You mean the up-town office?

144. Yes sir?

Ans. We just give them a copy of what the books show.

145. How often do you furnish such copy?

Ans. Every day.

146. Is that copy complete as to all of the columns appearing on those two books Exhibits "20" and "21"?

A. No sir, not quite; we do not show the meter statement; we do not show the average temperature or barometer or tabular numbers; we show in parenthesis the uncorrected make, we do not show the amount of pounds received of coal; we do not show the amount of coal carbonized day and night; we just show the total; we show the average yield per 24 hours; we show the benches in action, the retorts in use and the make per retort; we show the total number of men employed at the works and the stock of coal.

JOHN M. ROBB, called on behalf of defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?
A. John M. Robb; Peoria, Ill.
2. What is your business?
A. Superintendent of distribution in the gas department of the Peoria Gas & Electric Co.

1370 3. How long have you occupied that position?
A. Since August, 1899.
4. How long have you been engaged in a similar line of work?
A. This is my first experience in that capacity.
5. Where have you resided during that time?
A. Since May, in Peoria; previous to that time at Akron, Ohio.
6. Were you engaged in the gas business there or some part of it?

Ans. Yes, for some two years previous to that with the Akron Gas Company.

7. Is there more than one company there?
A. At the present time there is also a natural gas company.
8. Was there at that time?
A. Yes sir, two companies, a natural gas company and one artificial gas company.
9. What are your duties and what do you do as superintendent of distribution of complainant company?
A. I take charge of the gas from the time it leaves the work and of the apparatus necessary to distribute it and see that the gas is delivered to the consumers.
10. What, if anything has that to do with the care or supervision over the holders, station meters and the like of that upon the company's ground?
Ans. Nothing at all.
11. Do you also have charge of street work in connection with the duties to which you have referred?
A. Yes sir, I plan the work that has to be laid and see it is put in.
12. Does that refer to mains and services as well?
A. Yes sir.
13. Have your duties covered those items during the time to which you have testified?
Ans. Yes sir.

1371 14. Are you familiar at the present time as to location, size, etc., with all of the mains of the Peoria Gas & Electric Co.?
A. Yes sir.
15. Do you remember about the time the complainant company began to serve gas to consumers?
Ans. Yes sir.
16. Are you able to state from recollection about what date it was?

A. Not exactly but it was the latter part of March, 1900.

17. Do you remember approximately how many miles of mains it had at that time?

Ans. 26 miles and a fraction.

18. What extensions have been made to the mains since that time by your company?

A. There has been practically no main extension except an extension of 4 inch main for 400 or 500 feet in the alley between California and Missouri avenue- and that was part of our original plan of work.

19. Does your authority extend over the placing of services, meters, etc.?

Ans. Yes sir.

20. At the time your company began to serve customers with gas, did you know the territory covered by the Peoria Gas Light & Coke Co.?

Ans. Yes approximately.

21. What portion of the territory reached by the complainant company was then being served by the Peoria Gas Light & Coke Co.?

Objected to as immaterial and irrelevant.

A. All of it or nearly all; I believe all of it was.

22. Do you know how many service pipes you had in when you first commenced to serve gas?

Ans. I think the number was pretty close to 2,000.

23. How many of those service pipes were put into buildings that were already supplied by the Peoria Gas Light & Coke Company for gas service?

(Objected to as immaterial and irrelevant.)

1372 A. I cannot answer as to that: we took the applications wherever we could get them without regard to what was already in the building.

24. Did you personally superintend the placing of those various service pipes?

Ans. Yes sir.

25. What part of the city did your system of distribution cover at the time you began to serve gas?

A. We took in all of the business district and nearly all of the residence district.

26. Have you any record showing how many of the places where you put in services were already supplied by the Peoria Gas Light & Coke Co.?

(Objected to as immaterial and irrelevant.)

A. No, I think we have no record that will show that.

27. What proportion of your services were put in to active use at the time your company began to serve gas?

A. I believe nearly all of them were, all where we could induce the people to use gas.

28. You also had charge of setting the meters?

Ans. Yes.

29. While the meters were being set for those various services did you give the subject your personal attention, that is, visit the premises where the meters were actually located?

A. No, I did not.

30. Who had charge of that part of the work?

A. Do you mean who visited the premises?

31. Yes sir, who actually superintended the work or did it?

A. So far as the superintendency of the work was concerned, I had charge of that but only the inspectors and the men who set the meters visited the premises.

32. Have you records showing who all of those consumers were at that time, I mean at the time you began to serve gas?

A. Yes, our records will show that.

1373 *A. Yes our records will show that.*

33. How many service pipe has the Peoria Gas & Electric Co. at the present time, if you know?

A. About 2570.

34. How many of those are in actual use, if you know?

A. I cannot say as to that.

35. Have you records which will show that fact?

A. Not directly but by going over the records of our meters and services the matter can be got at.

36. Do those figures to which you have referred represent new services actually placed since the time your company began operations?

Ans. Yes sir.

37. In what territory have those services been laid as compared with the territory occupied by the Peoria Gas Light & Coke Co.

Objected to as immaterial and irrelevant.

A. In about the same territory they supply.

38. Who has charge of the street repairs for the Peoria Gas & Electric Co.?

Ans. I do.

39. Have you a street foreman?

Ans. Yes sir.

40. Who is it?

Ans. At present time Dan Gorman.

41. How long has he been street foreman for the complainant company?

Ans. Since October or November, 1901.

42. Over what portion of the city at present supplied with gas does your supervision of the street work extend?

A. Over all the city that is supplied with gas.

43. State whether or not there is any other person employed by

the complainant company who acts as assistant to you regularly or at intervals or whether that work is entrusted to you exclusively.

A. I have full charge of that.

44. And has that been true during all the time since you became engaged with complainant company?

Ans. Yes.

1374 45. What are the duties of your street foreman in connection with repair or new work?

A. To install such work as I lay out for him.

46. Does he depend upon you exclusively for directions?

A. Yes sir.

47. Is he the only man in the employ of complainant company acting in the capacity of street foreman, as you call him?

A. Yes sir.

48. Do you know where Dan Gorman had been employed prior to the time he engaged with the complainant company as you have stated?

A. Yes sir.

49. Where?

(Objected to as immaterial.)

A. He was employed by the Peoria Gas Light & Coke Co.

50. In what capacity?

Ans. As street foreman.

51. How long is it since the complainant company laid the new mains to which you referred a short time ago?

Ans. Nearly 2 years.

52. In the performance of your duties where do you spend the greater portion of your time?

A. At the company's up town office.

54. Under whose immediate jurisdiction or supervision are you and have you been as an employé of the complainant company?

A. Under Mr. Little's, our general manager.

55. With reference to the work of the character described by you, do you depend upon him for instructions or is authority therefore vested in you in the first instance?

A. No, my instructions for work come from Mr. Little.

56. During the performance of any work, pertaining to putting in services or repairs, are you personally upon the ground where the work is in progress?

A. In some instances, yes, but not in all cases.

57. Who has charge of ordering material from the works 1375 or elsewhere in the making of these repairs, or in placing new work?

A. I have.

58. Does the complainant company carry in Peoria a stock of material for repairs and extensions?

Ans. Yes sir.

59. Where is that stock carried?

Ans. At the works.

60. And that is where you get your material for such purposes?

A. Yes sir.

61. Have you anything then to do with ordering or purchasing any of the material used in your department?

A. I purchase all of it subject to Mr. Little's approval.

62. Has that been the case during all the time you have been engaged with the complainant company?

A. Yes, practically all except the first material that was ordered for the main work.

63. Are you referring now to materi ordered for the original construction?

Ans. Yes sir.

64. How many men has your company at the present time engaged in street work?

Ans. Between 25 and 30.

65. Are those divided into different gangs or are they all in one?

Ans. Two gangs.

66. And are they all under Mr. Gorman's supervision?

A. No, but one gang is under Gorman's supervision.

67. And all of them are generally under your supervision?

A. Yes sir.

68. And you are directing all the work are you?

Ans. Yes sir.

69. Is that about the regular number of men you keep for work of that kind?

A. No, it all depends on what new work and what repair work we are doing.

70. On the average during the past two years, how many men have you kept at different times for that class of work?

A. That is a difficult question to answer; there has been
1376 about 3 men constantly on the pay roll and the number varies according to the need of the work.

71. How does it happen at the present time the number is so large, if it is a large number?

A. It is not unusually large but at this time of the year we have a great many orders for services and in order to take care of those services it is necessary to keep that number of men.

72. And those men are largely engaged in putting in service pipe?

Ans. Yes sir.

73. That is they are almost all on new work and not on repair work?

Ans. Yes sir.

74. Have you at the present time any repair work in progress?

Ans. No sir, I have not.

75. Do you remember how long it has been since you have had any repair work in street mains?

A. No, I don't recall that either.

76. How much, if any, time do you on the average spend at the works?

A. At the present time, I put in about a half an hour a day there regularly for the purpose of going over the work of the fitting shop.

77. That is preparatory to putting in services and work of that character, of which you have charge, on the streets?

A. Yes sir.

78. Is that about the same as it has been for sometime past?

A. Yes sir.

79. You have never had any work to perform at the works except in connection with the preparation of your material for street work, have you?

A. Yes sir, I have; last year I was superintendent of the works for five or six months—from May until October, 1901.

1377 80. Was that up to the time the Peoria Gas Light & Coke Co. discontinued operations?

Ans. Yes sir.

81. And that was when Mr. Eustace returned to your company, was it?

Ans. Yes sir.

82. During that time, your place in the complainant company's works was substantially the same as that held by Mr. Eustace?

A. Yes sir, except in addition I managed the street work too.

83. While you were the superintendent at the works, did you spend the major part of your time there?

Ans. Yes sir.

84. Had you had any previous experience as a superintendent?

A. No sir.

85. Has your company at the present time, and has it had for some months last past, facilities for doing all of its metal fitting for street and service work?

Ans. Yes sir, it always has had.

86. State whether or not you know of a connection or main from the purifyers of the complainant company to the station meter of the Peoria Gas Light & Coke Co.?

A. Yes sir I know of such connection.

87. When was that put in?

Ans. In September, 1901.

88. Who had charge of the work?

Ans. I did.

89. Who gave you the order for placing it?

A. Mr. Little did.

90. What is its length, if you remember?

A. I have forgotten but it is a matter of some 800 or 900 feet though.

91. What is its size?

Ans. 16 inch.

92. For what purpose was it placed there?

A. For delivering gas manufactured at our works to the Peoria Gas Light & Coke Co.

93. Did you superintend that work until the connections were all completed?

Ans. Yes sir.

1378 94. What apparatus, if any, does that connection contain in the way of cut-offs?

A. It contains only one cut-off located in our works.

95. That was put in as part of its original construction, was it?

Ans. Yes sir.

96. Do you know whether or not there is on North Adams street a connection between the pipes of the complainant company and the pipes of the Peoria Gas Light & Coke Co.?

A. There is none that I know of.

97. Do you know whether or not there is any such connection on East Glen Oak avenue in the city of Peoria?

A. No sir.

98. Do you know whether or not there is another connection than the one at the works mentioned by you between the pipes of the two companies?

Ans. There is none that I know of.

99. Since your connection with the complainant company, have you performed any duties other than those to which you have referred?

A. No, at first I was their draughtsman and the superintendent.

100. During any portion of the time you have been employed by that company, have you had any other employment or any other business?

Ans. No sir.

101. During any part of that time, have you performed any work for the Peoria Gas Light & Coke Co.?

Ans. I have.

102. What has been its nature?

A. That is not in the character of an employé for them, I have not performed any such work but I have looked after their meters and services.

103. Throughout the entire territory served by that company?

A. Yes sir.

1379 104. During what time?

Ans. Since October, 1901.

105. Since the Peoria Gas Light & Coke Co. discontinued the manufacture of gas?

Ans. Yes sir.

106. State whether your supervision of that work for the Peoria Gas Light & Coke Co. has been of the same character it has been in connection with the Peoria Gas & Electric Co.?

A. Yes sir, it has been work of the same character.

107. And done in the same way?

Ans. Yes.

108. Upon whom, if anyone, are you dependent for instructions with regard to such work as you do and have done of that character for the Peoria Gas Light & Coke Co.?

A. I depend on their office for instructions.

109. And who in their office gives you those instructions?

A. The clerk who is delegated to receive orders and send them to the fitting shop.

110. Who is it does that?

Ans. Thomas N. Gorman.

111. Where do they get the material which goes into such services as you install for that company?

A. It is taken from the storeroom of the Peoria Gas & Electric Co.

112. Where is the fitting done, that is, preparing such material?

Ans. In the fitting shop of the Peoria Gas & Electric Co.

113. Then the material comes from the same source and is prepared by the same people as similar material used for the gas & electric Co.?

Ans. Yes sir.

114. And that has been the case ever since October 24, 1901?

A. Yes sir, it is handled similarly, except it is charged to the Peoria Gas Light & Coke Co. instead of being charged to the Peoria Gas & Electric Co.'s account.

115. Do you do that charging yourself?

A. It is done under my supervision in our office.

1380 116. Is a regular account kept in the complainant company's office with the Peoria Gas Light & Coke Co.?

Ans. Yes sir.

117. What, if anything, has Mr. Little, general manager of complainant company, to do with those repairs in the way of instruction or otherwise, if you know?

A. Nothing, so far as I know, except he is my superior and he is consulted in any work I handle.

118. Including that which you do for the Peoria Gas Light & Coke Co.?

Ans. Yes sir.

119. State whether or not the Peoria Gas Light & Coke Co. pays you a salary for that work?

Objected to as immaterial and incompetent.

A. No, it does not.

120. State what, if any, increase was made in your salary on or about the 24th of October, 1901?

Objected to as immaterial and irrelevant; also because it is asking for private matters of the witness, confidential relations between him and the company and has no bearing in the case.

A. I received no increase.

121. Has anyone else in the office of the Peoria Gas Light & Coke

Co. given you any instructions with reference to that work except Mr. Gorman?

Ans. Mr. Bickwell has.

122. Have those instructions given by Mr. Bickwell been of substantially the same character as those given by Mr. Gorman?

A. Yes sir.

123. Since you have been doing that work for the Peoria Gas Light & Coke Co., how has knowledge of the necessity for it come to you?

A. Such matters as came to my notice I take care of immediately and other matters are reported to me by Mr. Gorman.

1381 124. What character of work for the Peoria Gas Light & Coke Co. have you taken care of without such orders or any others in *his* company's office?

A. Well, any such work as I believe is necessary I go ahead and perform.

125. Are you speaking now with reference to putting in services and repairs, also?

A. In repairs—of course the orders for new work have to be left at the office and through the office come to me.

126. You are speaking now of the office of the Peoria Gas Light & Coke Co.?

Ans. Yes sir.

127. Those orders for services have to be signed by the proposed consumer, do they not?

A. Orders for services must be signed by the property owner.

128. And applications for meters are signed by the consumer?

A. Yes sir.

129. Do you also receive from the Peoria Gas Light & Coke Co. orders for setting meters precisely the same as you do for putting in service pipe?

Ans. Yes sir.

130. State what portion of the work of the Peoria Gas Light & Coke Co., of the character to which you have referred, has been done under your supervision since October 24, 1901.

A. It has all been done under my supervision.

131. State whether or not the Peoria Gas Light & Coke Co. has in its employment any men at work on the streets engaged in repairing or putting in new work.

Ans. No sir.

132. Has it had since October 24, 1901?

Ans. No.

133. Is there any other business or work which you have transacted, or over which you have had supervision, for the Peoria Gas Light & Coke Co. since October 24, 1901, than that which you have already explained?

1382 A. No sir I have just — look after their distribution work.

134. State in what manner you handle their distribution of

gas as compared with the manner in which you handle the distribution of gas for the complainant company?

A. It is handled in just the same way except everything we do for the Peoria Gas Light & Coke Co. is charged to a sales account and billed to them and everything done for the Peoria Gas & Electric Co. is charged to its respective accounts on the company's books.

135. Who fixes the prices at which those charges for material and work are made to the Peoria Gas Light & Coke Co.?

A. They are fixed by the invoice at which that material is billed to us.

136. What are they with reference to those invoices?

A. At cost, the same as the work costs us.

137. What prices are charged for the labor which you furnish to the Peoria Gas Light & Coke Co.?

A. That is charged at cost.

138. State whether or not in putting in the large main from the complainant company's works to the station meter of the Peoria Gas Light & Coke Co., the expense of that was borne by the complainant company or by the other company?

A. My recollection is it was borne by the Peoria Gas & Electric Co.

139. From what source did you, as superintendent of that work, obtain the material which went into that construction?

A. I obtained it from the Peoria Gas & Electric Co.'s store room.

140. Whose laborers were employed upon that work?

A. Peoria Gas & Electric Co.'s laborers.

141. Have you since October 24, 1901, had anything what-
1383 ever to do with the manufacturing plant of the Peoria Gas Light & Coke Co.?

A. No sir, I have not.

142. Had you prior to that time?

Ans. No sir.

143. Who furnishes the meters you set up for the Peoria Gas Light & Coke Co.?

A. We use their meters so far as they have stock of the requisite size and for such meters as have to be purchased we purchase them and charge them to them the same as other material.

144. Do you mean you take such extra meters out of the stock of the Peoria Gas & Electric Co. the same as you do those you set for your company?

A. No sir, the stock of meters are kept separate and distinct.

145. You purchase them entirely separate do you?

Ans. Yes sir.

146. At what price do you charge them to the Peoria Gas Light & Coke Co.?

Ans. At cost price plus the freight.

Cross interrogatories by Mr. RITCHER:

1. Do you bill the expense of labor and material for repairs to the Peoria Gas Light & Coke Co.?
A. Yes for all such work as we do for them.
2. Directly to the old company?
Ans. Yes sir.
3. You said it was entered on a sales account?
Ans. Yes sir.
4. Is that in the old company's office?
A. No, it is in our office.
5. You make the entry first in the books in your office?
A. Yes.
Q. Then you attend to the billing to the old company?
A. Yes sir.
7. Is that true of work you discover yourself and do for the old company as well as work which is directly ordered by it?
1384 A. Yes sir, that covers every thing which is done by the Peoria Gas & Electric Co. for the Peoria Gas Light & Coke Co.

Adjourned until Tuesday, May 6, 1902, at 9:30 o'clock a. m.

United States circuit court room, Government building.

PEORIA, ILLINOIS,
TUESDAY, *May* 6, 1902—9:30 o'clock a. m.

Parties met pursuant to adjournment.
Present: Judge I. C. Pinkney, special commissioner; Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott, appearing for complainant; Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

THEODORE J. MILLER, recalled on behalf of defendant, testifies as follows:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Theodore J. Miller who has once before testified in this case?
Ans. Yes sir.
2. Have you with you now the secretary's book referred to by you in your former testimony?
Ans. I have not.
3. Have you been served with a subpœna to produce it?
A. Yes, this morning, a few minutes ago.
4. Where is the book at the present time?
A. I suppose it is in the office; I went down there and as Mr. Little had not arrived yet I could not get at the vault.

5. Is Mr. Little the only one having access to the particular portion of the vault where the secretary's books and records are kept?
Ans. I don't know.
6. Do you know where Mr. Little is to-day?
A. I do not but I was led to believe he was at home from the statement made me at the office; they said they expected him down soon.
1385 7. Do you keep in the vault, to which you have referred, all the books, papers and documents in your possession or custody as secretary of complainant company?
A. Yes sir, they are all kept in the vault.
8. Has that been the rule during the time you have been secretary of complainant company?
Ans. Yes sir.
9. Have you a key to that vault?
Ans. No sir.
10. Have you ever had?
Ans. No sir.

Mr. IRWIN: Counsel for complainant will have produced before the master here any books, papers or documents desired by counsel for defendant that may in any way be competent in this case, or that counsel for defendant may have the right to inspect or inquire about, on the coming-in of court tomorrow, or any other day on any reasonable notice, if counsel will give us a list of the papers, documents or books they desire to have produced.

The MASTER: Is that stipulation satisfactory, Mr. Tichenor?

Mr. TICHENOR: We are not familiar with their method of keeping their records nor have we any knowledge or means of knowledge as to all the papers or documents in their possession, or supposed to be in their possession, which may be material in this inquiry and proper and competent for us to have produced. For that reason it is impossible for us to specify definitely in some cases the exact material which we desire produced.

The MASTER: Can you specify the books you desire this witness to produce?

Mr. TICHENOR: We desire the production of the secretary's book, or books, as the case may be, from the beginning of the record of complainant company to the present time; also, any and all other agreements, contracts, documents, powers of attorney, or other papers in his custody as such secretary, so far as they pertain to any of the operations of complainant company covering the period
1386 from the beginning of its existence to the present time.

Mr. IRWIN: So far as it pertains to the gas business.

Mr. TICHENOR: Certainly.

The MASTER: Mr. Miller can you produce the books and documents indicated at the coming-in of court this afternoon?

Mr. IRWIN: All those books and papers that can be produced will be produced tomorrow by Mr. Little who, I understand, is to be a

witness, in connection with his testimony. We will instruct him to produce them and if counsel for defendant desires to recall Mr. Miller for further examination on them we will stipulate that Mr. Miller will be present at any time he is wanted on giving us one or two hours' notice. My judgment is the books are locked up in the private part of the vault and I do not believe anybody carries a key to that except Mr. Little, and he is out of town today.

Witness excused with directions to report on Wednesday morning next at 10 a. m.

SUMNER R. CLARKE, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Sumner R. Clarke that has testified before in this case?

Ans. Yes sir.

2. You have recently been served with a subpœna to produce certain books and documents—have you them with you?

A. No.

3. What is your reason for not having them at this time?

A. They are not in my possession and I have not had time to investigate whether I could produce them or not this morning.

4. Do you know in whose possession or custody they are at the present time?

1387 A. Mr. Little's; general manager of the company.

5. He has in his possession all the documents called for by your subpœna, has he?

Ans. I believe so.

6. And those documents are kept and always have been kept in the city of Peoria have they?

A. I have no positive information about that but I suppose they are here.

7. State whether or not the capital stock of the complainant company has been increased since its original organization?

Objected to as not the best evidence.

The MASTER: I think that is a matter that can be shown by the record but the witness may answer subject to the objection.

A. I cannot answer without referring to the books.

8. Look at the document now shown you marked Exhibit "22," purporting to be a certified copy of a document on file in the office of the recorder of deeds of Peoria county, Illinois, and certified under the hand of the recorder on Feb. 15, 1902, with the seal of his office attached, and state whether or not that refreshes your recollection so as to enable you to answer interrogatory 7?

Objected to as incompetent and not the best evidence.

The MASTER: I will not permit the witness to testify to anything the paper contains but that is not the question; he is simply shown the paper to refresh his recollection and he may answer subject to the objection.

A. It does.

9. What is your answer then to interrogatory 7?

Objected to same ground.

A. It has been increased.

10. Are you the same gentleman whose name purports to be affixed to the original of which Exhibit "22" is a certified copy?

1388 A. Yes sir.

11. Did you affix your name to the original of that document in your capacity as president of the complainant company?

Objected to same ground.

A. If that is a copy I presume my name is attached to the original.

12. Who first advanced the idea of increasing the capital stock of complainant company?

Objected to as incompetent and immaterial unless it is confined to the gas business.

Mr. TICHENOR: If the master please, so far as the gas and electric department are concerned they are so intertwined as to make the electric portion of it material in this inquiry. We have the same right to go into it as we have into the gas business. If there has been an intermingling of the two lines of business it is a matter which is chargeable to the plaintiff wholly.

The MASTER: The question in the mind of the master is, whether you are not attempting to show by parol a matter that is of record in the minutes of the proceedings of the directors. If that is true, of course it would not be competent to show it in this way.

Mr. IRWIN: Not only that, but this company was authorized to do half a dozen kinds of business and it has a right to capitalize to take care of any one or more of them and unless it pertains to the gas department, which the proof so far shows is run as a separate and distinct part of the business, it would be entirely incompetent.

The MASTER: I do not agree with counsel for complainant wholly in that respect. I think if they have intermingled their transactions so as to make an inquiry into one necessary to ascertain the truth as to the other they may go into it that far for that pur-

1389 pose only. The witness may answer subject to the objection.

A. I don't remember.

13. I think you have already testified that from the organization of the company to the present time you have been its president?

Ans. Yes, sir.

14. You have during all that time, or substantially all that tim performed the duties of president, have you not?

A. I have been away a great deal—probably half my time I a away.

15. When did you first have knowledge of the proposed increa of capital stock?

A. I don't remember and I don't know that I could refer to an records that would give me the information.

16. Who principally, if anyone, had to do with the matters pe taining to the increase of the capital stock?

Objected to as immaterial.

A. That is a question that might have been talked over betwee the directors or other stockholders, but I do not know of anyone i particular.

17. At the time steps were originally taken, and during the com pletion of the proceedings necessary for an increase, did you kno the reasons for such increase?

Objected to as immaterial.

A. In a general way.

18. What was that reason?

(Objected to same ground.)

A. Why in order to enable us to take up any matters that our charter gave us permission to take up.

19. In what lines of business was your company engaged in the month of Januray 1901?

(Objected to as immaterial.)

A. The gas and electric business so far as I know.

20. In what lines of business is your company engaged at
1390 the present time in the city of Peoria, or has it been engaged in at any time between January 1901 and the present time?

Objected to unless it is confined to the gas business.

A. Gas and electric so far as I know.

21. In the month of January 1901, or prior thereto, under your charter what other line of business did your company then contem plate undertaking or operating?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of that; the question is, what did they do or are doing?

Mr. TICHENOR: The witness has stated the increase was for the purpose of carrying out the provisions of their chartered rights and I want to ascertain what they had in contemplation.

The MASTER: The witness may answer subject to the objection.

Mr. IRWIN: I will instruct the witness that unless it pertains to the gas business in the city of Peoria he does not need to answer.

I will further state before we will submit to an investigation as to all this company has had, or now has, in contemplation in different lines of business outside of the gas business in the city of Peoria, we will insist upon submitting the matter to the court whether or not we are compelled to divulge our plans either past or future in other lines of business.

The MASTER: The master has already indicated he thinks the inquiry ought to be confined to what they are doing.

Mr. IRWIN: We have no objection to any inquiry so far as the company has exercised any rights under its license or franchise to manufacture and sell gas and will produce all the documents, papers and other evidence as to what has been done or is contemplated in that line, but as to other lines of business contemplated or undertaken in the past or contemplated for the future we insist and will insist they have no right to inquire into in this proceeding.

1391 The MASTER: I do not see any occasion for a ruling of the master in that matter. I do not think it competent but as the master has said a number of times in this case, he has no power to exclude questions or answers.

Mr. TICHENOR: For the purpose of informing the master, I will make this statement. The question is propounded for the purpose of showing that at that time there was no occasion whatever for increasing the capital stock, but it was part and parcel of a scheme which was subsequently completed and which we think we will show before we finish this case.

Mr. IRWIN: Has it anything to do with the gas business of this company?

Mr. TICHENOR: Yes sir.

Mr. IRWIN: If counsel stipulates it has I will withdraw my objection.

Mr. TICHENOR: I do not consider it necessary to make any stipulation of that character.

The MASTER: I presume, Mr. Irwin, that the statement of counsel for city carries with it the proposition they will connect it directly with the gas business.

Mr. IRWIN: If he will stipulate that I will withdraw my objection but I want to know for what purpose the inquiry is made. If it is for the purpose of going into the other plans, future or past, of this company with reference to something that has nothing to do with its gas franchise or charter rights in the city of Peoria, then I object to it, for they have no more right to go into that in this proceeding than they have a right to go into your private affairs.

The MASTER: I do not think the competency of the evidence is apparent at the present time.

Mr. TICHENOR: I would like to have the question answered.

1392 The MASTER: The witness may answer subject to the objection then.

Mr. IRWIN: Now outside of the gas business of the complainant, or any contemplated business connected therewith under the license

and franchise from the city of Peoria as set out in the pleadings
this case, I inform the witness he has a right to refuse to divul
Anything pertaining to the gas business of the complainant co
pany in the city of Peoria, whether it is within the line of t
license—franchise—from the city of Peoria, or outside of it,
should answer, but anything outside of the gas business, or perta
ing thereto, or having nothing to do with the license or franch
from the city of Peoria he has a right to refuse to divulge in th
hearing.

The MASTER: I think, Mr. Irwin, you are in error in assumi
you have a right to instruct the witness not to answer; he is n
your witness and the witness in refusing to answer subjects hims
to contempt if the master's ruling is sustained by the court. As
whether he answers or not I think is a matter that should depe
upon his own volition.

Mr. IRWIN: I have not instructed the witness but simply i
formed him he has a right to refuse to answer. I give him th
advice as counsel for the complainant company and am willing
take the responsibility upon myself.

The MASTER: You don't have to take the responsibility ul
mately. The master has already indicated his opinion as to th
competency of this evidence. It seems to me unnecessary to repe
that I have no power to exclude it when the question is pressed a
I rule that the witness may answer subject to the objection.

A. I don't think I can answer the question without refreshin- m
memory from the records.

22. Will you refresh your recollection and be prepared t
1393 answer when subsequently called upon to do so?

Ans. Yes sir.

23. State whether or not the increase of capitalization made b
your company at that time was issued and, if so, to whom?

Objected to as incompetent and immaterial.

A. That I don't know without referring to the records.

24. State whether or not you of your own knowledge know tha
any of it was issued?

(Objected to same grounds.)

A. I think it was.

25. To whom was any such stock issued?

Objected to same ground as before unless it is confined to the gas
department of the business of the complainant company and also as
not the best evidence.

A. I can tell by referring to the books.

26. Cannot you tell without reference to the books?

A. Not in whole, I might in part.

27. How much of it was issued to you personally?

Objected to as incompetent and immaterial unless it is confined to the gas department of the complainant company.

A. I cannot state exactly but can give it to you exactly by referring to the record.

28. Have you in your possession, custody or control records showing how much of that stock was issued and to whom?

Objected to same ground as before.

A. I think the records of the company would show.

29. Are those records in your possession?

A. They are in the possession of Mr. Little, the general manager.

30. Are they in Peoria at the present time so far as you know?

A. So far as my knowledge goes.

31. Can you state from your own knowledge and recollection — to whether or not all of the increased capitalization, or cer-
1394 tificates representing all of the increased capitalization, were issued?

(Objected to same grounds.)

A. My remembrance is that it was.

32. State whether or not within your knowledge those certificates representing the increase were all issued to the then stockholders of the complainant company?

Objected to as incompetent and immaterial.

The MASTER: The witness may answer subject to the objection.

Mr. IRWIN: Does the master rule it is competent or does he adhere to his previous ruling. I would like to have a ruling or expression from the master as to the competency or incompetency of the question.

The MASTER: The master can see how this evidence might possibly become competent and material but I cannot say it will ever be so connected. I must, however, assume that counsel for defendant will be fair with the master and connect it so as to make it competent. I think the inquiry is competent, assuming as I do, that course will be followed by the city.

Mr. TICHENOR: We most certainly would not undertake to follow any course or plan calculated in the slightest degree to deceive the master or anybody else connected with the case.

Mr. IRWIN: I am surprised you would be so frank.

A. The records of the office will show that I think.

33. What is your recollection upon that question?

A. That they were.

34. Issued to the then stockholders at that time?

A. Yes sir.

35. What was paid by the persons to whom those certificates were issued for such additional stock?

Objected to as incompetent and immaterial.

The MASTER: I think it competent; he may answe
1395 ject to the objection.

A. I don't remember.

36. How much did you pay for such certificates as were issu you?

Objected to as incompetent and immaterial and asking private matter between the company and the witness.

The MASTER: Same ruling.

A. For the present I refuse to answer.

37. Do you refuse to answer the question propounded becau involves matters which might tend to criminate you?

A. No sir.

38. Do you know where the stock certificates representing capitalization of the complainant company are at the present t

Objected to as immaterial.

A. No, I do not.

39. Do you know where your own stock certificates for such tions of the capital stock as you yourself hold are?

Objected to as incompetent, immaterial and an attempt to inq into the private affairs of the witness.

The MASTER: I do not think that inquiry as to where they is material. Suppose they had been deposited by the witnes collateral to secure a loan, would it be competent to go into t I think the inquiry should be whether the stock certificates issued for value and whether they were issued *bona fide* to the sons named therein—whether they were paid for at par and whether the parties to whom they were issued are the present h ers and owners of them.

Mr. TICHENOR: That is what I am trying to find out.

The MASTER: Your question does not call for that informat The question is if he knows where his own stock is as to the creased capitalization. How is that material, Mr. Tichen
1396 Mr. TICHENOR: I think it is.

The MASTER: I think not, as to where they are but if desire to press the inquiry the witness may answer subject to objection.

Mr. TICHENOR: I would like to have the question answered.

The MASTER: The witness may answer subject to the objectio

A. I do.

40. Where are they?

Objected to as incompetent and immaterial and an attempt to quire into the private affairs of the witness.

The MASTER: I think so.

Mr. TICHENOR: I will withdraw the question temporarily.

41. State whether or not the certificates of stock, to which your attention has been directed, have been in any manner pledged or hypothecated to secure an indebtedness?

Objected to same grounds as before.

The MASTER: I think so; I do not think it competent.

Mr. TICHENOR: My question is propounded for the purpose of showing that is not a fact.

The MASTER: I do not think it material whether it is a fact or not; I do not think that line of inquiry competent. If you desire to press it the master will rule further.

Mr. TICHENOR: There is a very material element in the case which we cannot prove unless we can show where those stock certificates are and if we are permitted we can show there is not a single one held by a single one of the stock holders.

The MASTER: That is not the pending question at all. If you want to ask this witness whether he is the owner or holder of the stock certificates issued to him, ask him that question?

42. Are you the holder at the present time of the stock certificates representing the stock which you own in the complainant
1397 company.

Objected to as incompetent, immaterial, irrelevant and an attempt to inquire into the private affairs of the witness.

The MASTER: I think the inquiry should be whether or not he is the holder and owner of the stock certificates issued to him on the increased capitalization?

43. Are you the holder and owner of the stock certificates issued to you on the increased capitalization?

Objected to same grounds as before.

A. I am.

44. Do you hold those stock certificates in your individual or representative capacity?

(Objected to same grounds as before.)

The MASTER: I think it has already been answered in a previous answer.

45. Are you the holder and owner of your certificates issued on the original capitalization of complainant company?

Objected to same grounds as before.

A. No, I am not.

46. Who does hold those stock certificates?

Objected to same grounds, and also having nothing to do with the issues in this case.

A. I don't know.

47. Are you still the owner of those certificates?

(Objected to same grounds.)

A. I don't remember of them being issued, if they were I am not the holder.

48. Do you know where they are?

Objected to same grounds.

A. The records of the company would show.

The MASTER: The question is, do you know?
The WITNESS: I do not.

1398 49. The company's records will show, as I understand you, just where they are?

Ans. I think so.

50. Where will they be shown—in the secretary's book?

Objected to as incompetent and immaterial.

A. It will be shown in the records; so far as I know there is only one record of it.

51. You refer to the secretary's record, do you?

A. Yes sir.

(Witness excused for the present.)

MATHEW HENEBERY, called on behalf of defendant, being first duly sworn, deposes and says

Direct interrogatories by Mr. TICHENOR:

1. State your name and residence?

A. Mathew Heneberry, Peoria, Ill.

2. For how many years have you been a resident of Peoria?

A. About 53 years.

3. You were formerly interested in the Peoria Gas Light & Coke Co., were you not?

Ans. I was.

4. For — long a period of time were you interested in it and in what way?

A. Well, I must have been in the company 25 or 26 years; I was a director from the first year I went in and I afterwards got the name of treasurer.

5. How long were you treasurer of that company?

A. It must have been five years, I think.

6. State whether or not from your connection with that gas company for that period of time you became and were familiar with the business in a general way? I am not asking for the details of manufacture but simply with reference to the business part of it.

1399 A. Yes sir.

7. What was the condition of that company financially at the time you became interested in it?

Objected to as incompetent and immaterial.

The MASTER: That goes back to 1850.

Mr. TICHENOR: We are not going to spend very much time on it.

A. It was financially poor; the company was in debt when I ent into it.

8. Do you remember in a general way about how much the in-btedness amounted to?

Ans. $60,000.

9. Are you able to state from recollection what other Peorians came interested in the old company about the same time you ?

A. Mr. Robison was one; Mr. Herron was in when I went in and Jack was in; Peter Coffey was in and one of the Griswolds, thew or John Griswold, I think it was.

10. State whether or not your company, after you became asso-ted with it, discharged the indebtedness to which you have erred?

Objected to as incompetent, immaterial and inquiring into the vate affairs of the Peoria Gas Light & Coke Co. that is not terial to this inquiry.

The MASTER: I can see how it may be material. The witness y answer subject to the objection.

A. Yes sir, it did.

1. In what way was it discharged?

Objected to as incompetent and immaterial.

A. By paying the debt.

2. From what source did the funds come?

Objected to same grounds.

A. from the receipts of the gas company.

13. During the time you were connected with the company, state whether or not the buildings and plant were improved econstructed?

bjected to same grounds.

. There was really a new gas plant made; we built holders and run a 16 inch pipe from the gas works up town and took out 8 pipe which had about rotted out.

. From what source did the funds come used in the reconstruc-?

Objected to same grounds.)

. From the receipts of the gas work.

. State whether or not at any time during your connection with company it purchased any additional ground?

bjected to same grounds.

A. We purchased on two occasions.

16. What prices did you pay?

Mr. ABBOTT: Complainant objects to the question as incompetent, immaterial and inquiring into the private affairs of a company not a party to this suit and for the further reason that the Peoria Gas Light & Coke Co. has a suit pending in this court involving the validity and reasonableness of this ordinance as to it, and it certainly is unfair to it as a defendant in that suit to compel it now to disclose any facts however pertinent they might be in that suit.

The MASTER: The witness may answer subject to the objection.

A. The first purchase we made was of Mr. Robison; immediately after I went into the company we bought a lot next to the ground we had and several years after we bought from the Whiskey Trust folks the old Woolner property for which we paid thirty one thousand and some odd dollars, and for the property we bought of Robison we paid, I think, $6000, or $7000.

1401 17. State whether or not those items were paid in cash?

Objected to as incompetent and immaterial.

A. Yes sir.

18. Where did the fund come from?

Objected to same grounds.

A. From the earnings of the company.

19. State whether or not during the time you were connected with the company a water gas plant was installed there?

Objected to same grounds.

A. There was.

20. Do you remember about when it was and what it cost?

A. I remember about what it cost but I could not state the exact time.

21. What did it cost?

(Objected to same grounds.)

A. It cost, if I recollect rightly, thirty odd thousand dollars and the putting up of it cost forty odd thousand more; we bought the patent for $30,000, or thereabouts, and the building of it cost some $10,000; the water gas plant must have cost in the neighborhood of $70,000 or $75,000.

22. State whether or not that was paid for in cash?

Objected to same grounds.

A. That was paid for in cash.

23. From what source did those funds come?

Objected to same grounds.

A. From the gas company's receipts.

24. During all of that time was your gas company operating any other gas plant except the one in Peoria, Ill.?

A. No sir.

25. Had the company any other business during that time except the manufacture and sale of gas?

A. Not at that time, it did not.

26. State whether or not within the past four or five years the Peoria Gas Light & Coke Co. built a new retort house and installed a new system of retorts?

Ans. It did.

27. What was the expense of that item, if you know?

Objected to as incompetent and immaterial.

A. That was the last item of work done; my recollection is poor as to what it cost, but I think it cost up to $60,000; I am off on that, though it was the last thing we done.

28. Do you remember what year it was done?

A. It must have been done along in 1898 that we started it or 1899.

29. From what source did the funds for that improvement come?

Objected to same grounds.

A. They came from the earnings of the gas company.

30. State whether or not that gas company furnished any funds for the purpose of purchasing electric light stock at any time during your connection with it?

Mr. ABBOTT: We object to the question as incompetent, immaterial and inquiring into the private and confidential business of a company not a party to this suit.

The MASTER: I don't think that material.

Mr. TICHENOR: I would like to have it answered.

Mr. ABBOTT: I advise the witness as counsel for the witness and counsel for the Peoria Gas Light & Coke Co. that inasmuch as the question is not material to the inquiry in this case he may or may not answer it, as he sees fit.

Mr. TICHENOR: I think it very material and I believe if the witness is permitted to answer he will testify that a very large item of funds was furnished by the Peoria Gas Light & Coke Co. in the purchase of stock of the Electric Co., this purchase having been made a great many years ago.

The MASTER: You mean the funds accumulated from the earnings of the company while engaged in the gas business exclusively?

Mr. TICHENOR: Yes sir.

Mr. IRWIN: What can that have to do with the price of gas at the present time? In order to show it to be competent in any way, they would have to show the price of material at that time, the cost of labor, the cost of the company's plant at that time and the cost of

production, and the court will certainly not allow them to go back 15 to 20 years.

The WITNESS: This electric light plant we purchased I think about 12 or 14 years ago.

The MASTER: I think that evidence may become material under the issues in this case and the witness may answer subject to the objection.

Mr. ABBOTT: I desire to renew my advice to the witness as his counsel and as counsel of the Peoria Gas Light & Coke Co. that he may or may not answer the question as he chooses.

The MASTER: I don't think the question broad enough, Mr. Tichenor.

31. State whether at any time during your connection with the gas company, as you have stated, from and out of the earnings of that company it purchased any electric company's stock?

Mr. ABBOTT: I renew my objection on the same grounds as before and also my advice previously given to the witness.

The MASTER: The witness may answer subject to the objection.

A. Yes sir, the gas company bought $55,000. worth of electric stock; it was $100,000. and we bought a majority of it.

32. Out of what fund was that paid?

Objected to as incompetent and immaterial.

A. It was paid out of the gas company's office with the exception of a small amount we borrowed temporarily from Mr. Her-
1404 ron for maybe 30 days; that was paid for by the gas company out of its earnings and eight stockholders in the gas company got stock in the electric light company prorated as his interest was in the gas company.

33. State whether the gas company subsequently paid off this small loan you say it made?

(Objected to same grounds.)

A. Yes sir.

34. Was that paid out of its earnings?

Ans. Yes sir.

35. State whether or not during your connection with the Peoria Gas Light & Coke Co. the company at different times carried any loans for the purpose of using its surplus capital?

Objected to as incompetent, immaterial and inquiring into the private affairs of that company which has no relation or materiality in this case.

A. Yes sir, we carried considerable loans at one time.

36. Do you remember at this time substantially what the amount was?

(Objected to same grounds.)

A. No, I do not, but I know we had as much as $50,000 at one time on loans.

37. From what source did the funds come which you invested in those loans?

(Objected to as incompetent and immaterial.)

A. From the earnings of the gas company.

38. That was the only gas company you were ever associated with, was it?

A. Yes, and I am sorry it didn't last longer.

39. You may state what if any dividends were paid by your company during the time you were connected with it?

Mr. ABBOTT: We object to the question as incompetent, immaterial and an inquiry into the confidential affairs of the Peoria Gas Light & Coke Co. and its stockholders and is not in any way pertinent to the issues in this case.

1405 The MASTER: I do not think, Mr. Tichenor, I will permit you to go into that inquiry for an unlimited period; I think you should confine the inquiry to say within 5 years of the time of the filing of the bill in this case or prior to the time the old company shut down its works.

40. State whether or not in the year 1897 the Peoria Gas Light & Coke Co. paid any dividends to its stockholders?

Mr. ABBOTT: Complainant objects to the question as incompetent, immaterial and inquiring into the private affairs of a company not a party to this suit and I advise the witness as his counsel and counsel of the Peoria Gas Light & Coke Co. that he need not answer the question if he sees fit not to do so.

The MASTER: Answer subject to the objection.

A. Yes sir, it did.

41. What amount?

(Objected to same grounds.)

A. I don't know; they paid 10 per cent while I was connected with it every year but one year but whether that was 1897 or not, I could not say. I may have a memorandum that will refresh my memory. (Witness referring to papers.) I find on July 1, 1897, I drew $8,595, as my share of the gas dividend, which would be $15. per share.

41. State whether or not during that year the company declared any dividends?

(Objected to as incompetent and immaterial.)

A. They did, I think; the regular quarterly dividend was paid right along with the exception of this July 1, 1897.

42. What was that regular quarterly dividend?

Objected to same grounds.

A. 10 per cent. per annum payable quarterly, but on the oc
of paying this $15. per share they didn't pay anything more
quarter.

1406 43. What was the par value or face value of the sha
stock in that company?

(Objected to same grounds.)

A. They were $50. a share.

44. State whether or not the company continued to pay a 1
cent. dividend as long as you were connected with it?

Objected to same grounds.

A. It did.

45. When did you dispose of your interest in that company
all?

(Objected to same grounds.)

A. Well, when the majority of the company sold out; that
have been in 1898 or 1899. I have a memorandum of it
(Witness referring to memorandum.) My memorandum is wo
out on April 28, 1900.

46. How many shares did you own at that time?

Mr. ABBOTT: Complainant objects to the question as incompe
immaterial and calling for confidential relations between this
ness and the Peoria Gas Light & Coke Co. and asking for the pri
affairs of that company and as to his holdings of stock and
price he gave for it is a matter entirely immaterial in this case,
as counsel for the witness and as counsel for the Peoria Gas L
& Coke Co. I advise him he need not answer such questions u
he sees fit.

The MASTER: The witness may answer subject to the objectio

A. My answer to that is 645 shares.

47. At what price did you sell those shares?

Objected to same grounds.

A. My shares came to $218.34 per share.

48. State whether or not at any time prior to the time you
actually sell your company could have sold out for more mo
than was actually received at that time?

Objected to as incompetent, immaterial and calling for a c
clusion and speculation.

1407 The MASTER: I think so, I don't think it competent.

Mr. TICHENOR: I would like to have the witness answ

The MASTER: He may answer subject to the objection.

A. The majority of the stock, yes sir, could have been sold a
good deal more money.

49. How much more money, if you remember?

Objected to same grounds.

A. Well, about $50,000.

50. That was for the majority of the stock?

A. Yes sir; the financial part was very badly managed to wind up on.

51. Do you know what salary the president of your company received during the last 5 years of your connection with it?

Objected to as incompetent and immaterial.

The MASTER: I think it material and competent, he may answer.

A. $5,000 per annum is my understanding.

52. State if you know what the secretary of the company received during that time?

(Objected to same grounds.)

A. He drew $3,000 per annum.

53. State what salary was paid any other officer of the company, if you know?

(Objected to same grounds.)

The MASTER: You had better find out first whether any salaries were paid.

54. Was any other officer of the company paid a salary during any part of that time?

(Objected to same grounds.)

A. Yes sir.

55. Who?

Ans. Your humble servant drew $1,000 per annum.

56. Do you remember for how many years?

Objected to same grounds.

A. About 5 years, I think.

57. That is, 5 years prior to the time the majority of the 1408 stock was sold?

Ans. Yes sir.

58. Had that been the case with the other salaries to which you have referred?

(Objected to same grounds.)

A. Yes sir, it was from the time of Peter Coffey's death. These salaries were changed and I drew a thousand.

59. The other salaries were all the same after his death?

Objected to same grounds.

A. They were all raised, I believe after Peter Coffey's death.

60. Did the remainder of the stock that was disposed of at the same time you sold yours realize the same or a different price?

(Objected to as incompetent and immaterial.)

A. I don't know anything about it.

61. Can you state from recollection about when Peter Coffey died?

A. No, I cannot very well but he must be dead now about 6 or 7 years; it would be in 1896, maybe.

62. At the time you disposed of your stock, what portion of the territory in Peoria and tributary thereto was supplied with gas by your company so far as pertained to furnishing it at a profit?

Objected to as incompetent and immaterial.

A. I could not answer that.

63. During the time that you were connected with the Peoria Gas Light & Coke Co., state whether or not it ever had any indebtedness except when you first went in and when you made the small loan to which you have referred at the time of the purchase of the electric light stock?

(Objected to same grounds.)

A. It never had any indebtedness but the one when I first went in the other loan was a mere temporary affair for 30 days, maybe, and was only for a small amount.

64. State whether or not the company had any surplus at the time you disposed of your stock? If so, how much?

1409 Objected to same grounds.

A. Yes, sir, it had some $80,000. we agreed to turn over.

65. From what source had that $80,000. been made?

Objected to same grounds.

A. From the gas company.

66. State whether or not the dividend declared July 1, 1897, of $15. per share still left a large or only a small surplus?

Objected to same grounds and also as not the best evidence.

A. Oh, it left considerable on hand.

67. Do you remember in the neighborhood of how much?

Objected to same grounds.

A. I could not say now, may be $50,000. it was hard to run the company out of money those days, they were making it so rapidly.

68. State whether or not about the time, or shortly before you made the sale to which you have referred, your company purchased a considerable quantity of material to be used in connection with the gas company?

(Objected to as incompetent and immaterial.)

A. Yes sir, they bought a large amount of iron pipe.

69. Do you remember substantially the cost of it?

Objected to same grounds.

have an idea but I could not exactly tell; it was a large
t, though.
State whether or not your company paid for that before this
r to which you have referred?
Yes sir.
And after that was paid, it left the surplus which you have
ned, did it?
cted to same grounds.)
Yes sir, the parties purchasing got the $80,000.
And they received that, did they?
cted to same grounds?
Yes sir.
73. State whether or not the purchasers also received this
large quantity of material to which you have referred?
cted to same grounds.
Yes sir, they received everything belonging to the company.
What was the character of this retort house and its equip-
which you state was built in 1898 or 1899 with reference to
modern or otherwise?
Well, I know nothing about the modern part of it but that was
culation; Mr. Coffey went on down into Ohio and went around
ral places and got plans and came back with the intention of
up the latest he could find.
plainant objects to the answer with reference to what Mr.
aid or what his intention was as incompetent and immaterial
ves the court to exclude it.
Do you know what the price of fuel gas furnished by your
ny had been during five or six years preceding your sale, as
ve testified?
cted to as incompetent and immaterial.
5 cents a thousand.
Do you know the circumstances under which that reduction
ade as to whether it was voluntary or involuntary?
cted to same grounds.
All voluntary on the part of the old company.
Was that the case with reference to all the reductions in price
re made by your company during the time you were con-
with it?
cted to as incompetent and immaterial and calling for a con-
.
MASTER: Counsel is asking for a fact not for conclusions.
Yes sir, it was all done voluntarily by the company, from

$3.50 per 1000 for illuminating gas when I went in to $1.5
1411 per thousand when I quit.

78. Do you know in a general way what proportion of all the gas you were furnishing at the time of the sale, or shortly before, was fuel gas and what was illuminating gas?

A. I do not.

79. During the time you were connected with the Peoria Gas Light & Coke Co., where did it keep its bank account?

Objected to as incompetent and immaterial.

A. It kept its account at Herron's savings bank the first part of the time and after that the account was moved to the First National Bank of Peoria: Mr. Herron used to be treasurer and when I got to be treasurer I took the account to the First national bank; when he was treasurer he kept it at his bank.

Cross examination by Mr. ABBOTT:

1. Do you remember the year in which you became a stock holder in the Peoria Gas Light & Coke Co.?

A. I do not positively but think it was about 1874 or 1875.

2. And did you enter at once into an active participation in its affairs?

A. After I was elected a director I became one of its principals.

3. About when were you elected a director?

A. I think it was about 1874 or 1875, shortly after I became a stock holder, and I became a stock holder the very day the majority changed to Mr. Robison's and Mr. Coffey's hands, or rather the following day I bought some stock but I did not get in until the next meeting.

4. At that time, you entered upon an active participation in its affairs, did you?

Ans. I did.

5. Did that continue during all the time you were a stock
1412 holder?

Ans. All the time.

6. Do you remember at what price the Peoria Gas Light & Coke Co. was selling gas when you first became a director and stockholder in the company?

A. To the best of my recollection it was $3.50.

7. Do you remember how long that rate continued?

A. I don't remember how long but it was only a short time.

8. When it was reduced, to what price was it reduced?

A. I think it was to $2.50.

9. Do you remember how long the rate of $2.50 continued?

A. I could not tell you.

10. When it was next reduced, to what price was it reduced?

A. I think $2.00 then for a while.

you remember how long the $2.00 rate continued?
o not.
hen it was then reduced, to what price was it reduced?
25.
u don't remember just when that was?
do not.
at rate of $1.25 continued as long as you were connected
company, did it not?
It did.
hat was the character of the management at the time you
a stockholder and became interested in the company and
had the indebtedness, of which you have spoken, as to being
cal and business like or otherwise?
ell, a new management altogether took hold of it then and
a very satisfactory one; Peter Coffey took hold.
mean at the time you first became interested?
s, when we were owing $60,000.
hat had been the character of its management prior to that

I don't know anything about that.
18. At the time you became interested in the company,
hat was being done, if anything, with regard to saving the
ar as a by-product?
e used to save some of it but the most of it was run into
r.
hat change was made, if any, in the saving and selling of
by-product after you became interested?
ell, they sold some tar right along but very little; then they
an ammonia works to use the balance of them.
hat was done, if anything, during the remainder of the
f your connection with the company with regard to saving
and ammonia and selling them as by-products?
y recollection is the experience was a very profitable one,
d a man making ammonia there all the time and it was sold
y good advantage.
ou mean after your connection with the company they began
the tar and ammonia and sell it at a good price?
es, that is right.
id they also during the period of your connection with the
y sell the coke as a by-product?
es sir, they did.
o a considerable portion of the income of the property dur
time you were connected with it arose from the saving and
of the by-products of coke, tar and ammonia?
hat is right.
low long did the rate of $3.50 per thousand continue?
ot very long, it might have been a year after I went in I
give you the date.

25. Do you know how long it had been at that rate before you became interested in the company?

A. I do not but I believe my understanding was that was the rate established when they first built the works.

1414 26. That had continued then at that rate from the time the works were established until about a year after you become connected with the company?

A. I could not say as to that for I was not posted on what they charged before.

27. When did you first become a consumer of gas?

A. It must be thirty years ago or more.

28. It was some years before you became a stock holder in the company?

Ans. Yes sir.

29. And during the time you were a consumer of gas, but was not interested in the company, was that the rate you paid?

A. I could not say now what I was paying.

30. Did you ever pay less than $3.50 up to that time?

A. I could not say what I paid, whether it was more or less.

31. Was that regarded as a reasonable rate at the time you became interested in the company under the conditions then existing?

Ans. I don't know anything about that.

32. When the change was made to $2.50, was that regarded as a reasonable rate under the conditions then existing?

A. I think we were following up the Chicago prices then.

33. Was it regarded as a reasonable rate by the directors and stock holders of your company?

Objected to as immaterial, incompetent and not cross-examination.

The MASTER: I don't think it is material or proper cross-examination.

Mr. ABBOTT: We wish an answer to the question.

The MASTER: The witness may answer subject to the objection.

A. I presume it was at the time.

34. Under the conditions then existing was $2.50 a reasonable rate for illuminating gas at that time?

1415 Objected to same grounds.

The MASTER: Same ruling.

A. I should think so.

35. What was the rate of interest on investments of capital generally at that time that was regarded as proper and usual in and about the city of Peoria?

A. Well, I supposed that varied from 8 to 10 per cent.

36. That was for general loans on farm and city property at that time?

A. Yes sir at that time on city property and farms 8 or 10 %.

After your company began to save the tar and sell it as a by-
t, do you remember what price was obtained for it?
No, I could not tell now.
Do you know how it compared with the price at present?
do not.
Do you remember what price you received for ammonia at
me?
No, not exactly, I remember one thing what we used to get
load of it; we used to ship in bulk.
How much was that?
We used to get $1,000 to $1,200, according to the size.
Do you know how much was in a car load?
No sir.
Is it not a fact that the price of both tar and ammonia were
erably higher then than they are today?
don't know that.
Do you know what amount had actually been i ted in the
y at the time you became a stock holder?
cted to as incompetent, immaterial and not cross examination.
The MASTER: I think it proper cross examination in view
of the fact its earning power and the indebtedness that ex-
isted was shown on direct examination.
No, but the amount invested and the stock are two different
the amount of stock was so much and all new work they
was charged too.
The question has no reference to the amount of stock.
should think maybe $300,000.
Do you know what the property was actually worth at the
ou became a stock holder?
was worth very little.
What was it worth at the time you surrendered your hold-
stock?
should think it was worth a million dollars in my estimation.
What was the amount of stock at that time?
150,000.
Do you know what the amount of the investment was at
me?
think it run up as high as $600,000.
thought from your answer you did not understand my
n. I did not refer to the price realized from the sale of the
ut what the actual amount of cash invested in the plant
to that time, irrespective of the amount of stock?
hat is what I have reference to; I think it would run up to
0 or $500,000; we built new works, made new improve-
wherever we took out pipe put in there and repaired it that
charged to anything but when we put a new holder in that
rged up; I think it footed up over $500,000.

50. You put in a considerable amount of new improvements shortly after you became a stock holder, did you not?

A. During my term we did.

1417 51. Was not there a substantial renovation of the entire plant while you were a stockholder?

A. It commenced shortly after I came in and was done while I was connected with the company.

52. It was shortly after you became connected with the company that a considerable amount of improvements were made?

A. Yes sir, very shortly afterwards they started at the gas works and run a 16 inch main.

53. During your connection with the company, the plant was entirely rebuilt, was it not?

Ans. Yes sir.

54. And another retort house was built in 1898 or 1899?

A. Yes sir, that was the last thing done, I guess.

55. Do you know how many times the benches of retorts were rebuilt in the 18 or 20 years you were connected with the company?

A. I think they were repaired, got new benches, I think, about three times in 20 years—two or three times.

56. I think you said at the time you surrendered your holdings there was about $150,000. worth of stock outstanding?

A. $175,500. was the capital stock; I was mistaken before in saying it was $150,000.

Re-direct interrogatories by Mr. TICHENOR:

1. Do you mean to say that at the time you became a stock holder there had already been invested in the plant by your predecessors in the neighborhood of $300,000.?

A. I rather think that is high, come to think of it.

2. You had no personal knowledge of what had been invested had you?

Ans. None whatever.

3. I understood you to say on cross examination that at the time you sold out in your opinion the property was worth a million dollars—upon what did you base that estimate?

1418 A. On its earnings; I did not say it was worth a million dollars on our books; I think we carried from $500,000. to $600,000. for new improvements.

4. But your answer was based on its earning capacity?

A. My answer was based on what it was making.

5. When you say it was carried at something like $500,000. do you mean that all the various items of improvement which had been made during the 25 years or so you and your associates had been interested in it had been charged up to the plant and that is how you made up that item?

A. That is how that item was made up.

6. Did that include also the valuation of the plant at the time you first took possession?

Ans. Oh, no.

The MASTER: He means by that, did that include the purchase price of the plant?

The WITNESS: There were very little improvements when we got hold of it; to make it plainer to you, the stock sold for $40. a share at the time Coffey and Robison got in; that was what the principal part of the stock that changed hands at that time sold for; at that time I said it was maybe worth $300,000.; there was little there because they had but one lot and after we got in the first thing we done was to buy another lot from Robison and we kept buying and improving after that, and all the new improvements were charged up to construction account or something else and any repairs we made went in without any charge.

7. But all new work in construction went into this item of $500,000.?

Ans. Yes sir.

8. And that had been done during the 25 years or more you were connected with it?

A. Yes, that is right; I think that item was between $500,000 and $600,000.

1419 9. Is it not true that when this tar as a by-product first began to be saved it had very little value because of the fact that its commercial uses were very limited and people didn't know how to use it or what it was valuable for?

A. I could not say as to that.

Re-cross interrogatories by Mr. ABBOTT:

1. If I understand your answer correctly on re-direct examination, at the time you became a stockholder the plant was in a very bad state of reairs?

Ans. Yes sir.

2. There was practically nothing there to work with?

A. That is right.

3. And almost immediately and within a few years the entire plant was removed?

Ans. Yes sir.

4. And is it not a fact that since that time it has been again substantially renewed throughout during your connection with the company?

A. We were continually making improvements.

5. And have not those improvements been of such a character and to such an extent as to practically renew the entire plant again during your connection with the company?

Ans. Yes sir.

6. Do you remember how much stock had been issued at the time you became a stock holder?

A. I said $150,000. before but I was certainly mistaken about that.

7. Is it not a fact that at the time you became a stockholder only $150,000. of the stock had been issued and the other $25,000. of stock was issued during your connection with the company?

A. Not to my knowledge, no; whatever they issued must have been issued at that time.

1420 8. Are you sure of that?

Ans. I am not.

9. It may be that it was only $150,000. at that time and that the $25,000. was issued subsequently?

A. It may be; I did not have much to do with that until lately.

10. You were not interested particularly in that part of the business?

A. No, I became more interested in the last few years of my connection with the company than before.

11. To refresh your recollection, I will ask you if it is not a fact that at the time you became a stock holder the stock then issued amounted to about $150,000. and that $25,000. additional was issued afterwards at about the time you rebuilt the plant?

A. Not to my knowledge. I don't recollect about that.

12. You would not say that is not so, would you?

A. Yes, I would, because I would surely have had an opportunity to have bought some of it if there was anything of that kind going on, and I never had that opportunity or never heard of it, but it might have been done by the powers that be who were running it; Robison can perhaps explain that better than I can; my impression is all that was issued was issued when I bought in, but I was certainly mistaken as to the amount before.

Re-re-direct interrogatories by Mr. TICHENOR:

1. Were not many of the improvements to which you have referred necessary because of the increase in the size of the city and the additional demand for gas?

Ans. Yes sir.

2. That was true in regard to replacing the mains you have mentioned?

A. That is true, we had applications at every meeting.

3. That also made necessary the increasing of your holder capacity, bench capacity, etc.?

Ans. That is right.

1421 (Mr. ABBOTT:)

Q. Is it not also a fact that many of these repairs and replacements were made because the old property was worn out and unfit for use?

Ans. Yes, that is also a fact.

LESLIE ROBISON, called on behalf of defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State your name and residence?
A. Leslie Robison, Peoria, Ill.
2. How long have you resided in Peoria?
A. About 43 or 44 years.
3. Were you at one time interested in the Peoria Gas Light & Coke Co.?
Ans. Yes sir.
4. When did you acquire an interest in the company?
A. It was either in May, 1874, or 1875, I cannot be positive, but it was just a little before Mr. Henebery, the preceding witness, became interested in the company.
5. For how long did you continue to be interested in the company?
A. I sold the last of my stock about a couple of years ago.
6. During that period, what if any official position did you hold in that company?
A. I was a director from the time I became a stockholder until I think 1888 and was president of the company some half dozen years; I was president of the company in 1888, 1889 and 1890, along in there somewhere; when we bought the electric light company I was president.
7. State whether or not during your connection with the company you acquired a knowledge and familiarity with its affairs in a general way, at least, so far as pertained to the business part of
1422 it, its profits, etc.?
A. From looking into it and managing it and from the reports at monthly meetings I became somewhat acquainted with it.
8. State whether or not you regularly attended the directors' meetings during the time covered by your previous answers.
A. Nearly always.
9. State whether or not within your recollection the company had an indebtedness at the time you became interested in it?
Objected to as incompetent and immaterial.
A. It was in debt about $60,000. as I remember; it was $50,000. or $60,000, I don't remember exactly.
10. State whether or not that indebtedness was subsequently paid by that company?
(Objected to same grounds.)
A. Yes, it was subsequently paid off out of the earnings of the company.
11. Do you remember at this time about what the population of Peoria was when you became interested in the company so far as pertained to the territory available for furnishing gas profitably?

Objected to as incompetent, immaterial and calling for a conclusion.

A. I never made an estimate on that; not much over half of the population of the city had the blessing of gas at that time in 1874 or 1875.

12. Who else became interested in that company about the same time you did?

(Objected to as incompetent and immaterial.)

A. They were interested at that time but they became directors at that time—new men; they were interested before, all of them except myself.

13. Do I understand you to say that Mr. Henebery was interested then?

A. No, he was not then but the very next day I under-
1423 stand he bought his stock.

14. Who was superintendent of the company during the time covered by your connection with it?

A. Peter Coffey except semi-occasionally when he was absent then it was Thomas Coffey.

15. Those were short temporary absences?

A. Yes sir, rather short.

16. Owing to ill health?

A. Peter Coffey went to Europe once—traveled a little.

17. State what in a general way the company first did in the way of reconstruction and what was the reason for its necessity if any such existed?

(Objected to as incompetent and immaterial.)

A. The very first thing was to stop the leaks in the mains—there was a very large leakage; then we repaired the benches.

18. What was done for the purpose of stopping the leakages?

Objected to same grounds.

A. We put down some new pipes and we probed the ground all over the whole city nearly with crowbars to discover the leaks and then dug down and stopped them; the leakage when we went in was something like 22 per cent. from the output at the meter at the works—it was enormous.

19. What other improvements were made during the time of your connection with the company?

(Objected to same grounds.)

A. We constructed a cistern to hold the tar; we could not sell the tar just as it was made so we constructed a large cistern to hold tar and we took an old holder and converted that into a tar holder where we held thousands of barrels, then sold it when we got a market for it; we overhauled the benches pretty thoroughly; we built a new purifying room—a new building that is there yet.

20. It was still in service was it when you went out?

1424 A. It is in service now, I guess, at least it was when we went out. We built an ammonia plant; we built a large gas holder that cost fully $50,000.; repaired another one, put another lift on it, and bought some ground.

21. Do you recollect at this time what your ammonia plant cost you?

(Objected to as incompetent and immaterial.)

A. I think it cost about $7,000. The next largest improvement was we bought this oil gas plant at a cost of $31,000. some hundred dollars and then spent nearly $50,000. in putting the machinery in for it.

22. What was the first outlay of $31,000. for?

A. The right to use the patent.

23. Did you participate in the negotiations which resulted in a purchase of the right to use that patent?

A. Yes sir, Mr. Henebery, Mr. Coffey and myself went to Bloomington to see it work. It had recently been put in there.

24. I understand you to say that the total outlay for placing the water gas plant or oil plant, to which you have referred, was about $80,000.?

A. I think it was about $80,000.

25. State whether or not during the time you were connected with the company any additional ground was purchased?

Objected to as incompetent and immaterial.

A. Shortly after I became a director they purchased through me—it was Col. Balance's lot—I sold it to them for $6,000. or $7,000.—I don't remember the exact price, and after that we bought the old Union Distillery lot for something like $31,500.; that was a number of years afterwards.

26. State whether or not during that same period, being the one covered by your connection with the company, it purchased an interest in the electric light plant in Peoria?

1425 Objected to as incompetent, immaterial and irrelevant.

A. The gas company purchased the controlling interest in the Peoria Jenney Electric Light Company afterwards the name being changed to Jenney Electric Company.

27. Do you know how much cash it paid for that interest?

Objected to same grounds.

A. My recollection is it was $55,000.

28. Do you remember about when that was purchased?

Objected to same grounds.

A. Yes sir, it was done about 1887—maybe 1886.

29. From what source did the funds for all these various items you have named come?

Objected to as incompetent and immaterial.

A. From the earnings of the Peoria Gas Light & Coke Co.

30. State whether or not during your connection with the company it ever had any debts other than the one to which you have referred when you first became connected with it?

Objected to as incompetent and immaterial.

A. We may have temporarily borrowed a few thousand dollars at the time we bought the stock in this electric light company—we may at that time have borrowed temporarily out of bank a few thousand dollars but it was very soon paid off.

31. State whether or not at the various times those improvements and purchases were made they were paid for in cash from and out of the funds of the Peoria Gas Light & Coke Co.

Objected to same grounds.

A. Certainly they were paid in cash out of the earnings of the company.

32. State whether or not during the time you were connected with the company, in addition to the various items to which you have referred, the company also paid dividends?

1426 Objected to same grounds.

A. My recollection is we always paid quarterly 2½%, that is 10 per cent. a year except one year when we paid 37½ per cent. dividends.

33. Do you remember in what year you paid the large dividend to which you refer?

A. I think it was 1896 or 1897.

34. Do you remember whether or not you were president of the company at the time that large dividend was paid?

A. I don't think I was.

35. At the time you severed your connection with the Peoria Gas Light & Coke Co., by the sale of your stock, state whether or not the various improvements, concerning which you have testified, were still there and in use, or in condition for use?

Objected to as incompetent and immaterial.

A. I understood they were all in good order in use.

36. State whether or not during a portion of that time the water gas plant, so called, to which you have referred, was in operation?

(Objected to same grounds.)

A. We sometimes shut that down for repairs or something of that kind but it was operated all the time substantially. In fact, we lit the city here for months from that plant alone without any coal.

37. What was the object in putting that plant in, if you know?

Objected to as incompetent, immaterial and calling for a conclusion.

A. It was to make gas cheaper and better: the water gas was used to enrich the coal gas and make it cheaper and better.

38. State whether or not during any portion of the time you were connected with the company it was carrying any loans?

Objected to as incompetent and immaterial.

A. It was.

1427 39. From what source did the funds come for the purchase of those loans?

(Objected to same grounds.)

A. From the earnings of the company.

40. Are you able to state whether loans were carried for any considerable length of time, or at different times, or was it only limited to a few occasions?

(Objected to same grounds.)

A. We put our money out at different times so it might be earning something.

41. Have you any recollection at this time how large an amount of loans that company was carrying?

Objected to same grounds.

A. I think about $50,000. was the largest.

42. Do you know what salary the different officers of the company were receiving during say five years preceding October 24, 1901?

(Objected to as incompetent and immaterial.)

A. Yes, I know.

43. What were some of those salaries?

Objected to same grounds.

A. During the last years we were paying the president $5,000. per year; the secretary got $3,000. per year I think at one time, and the treasurer got $2,000. per year. I think those are the largest salaries I had anything to do with.

(The MASTER:)

44. For how many years prior to October 24, 1901, had those salaries been paid?

A. Not very many; I think for 5, 6 or 7 years, though.

(Mr. TICHENOR:)

45. Prior to the time you severed your connection with the company?

Ans. Yes sir.

46. Judging from the knowledge acquired by you during your connection with the company, as you have testified, have you an opinion as to the value of the property of the Peoria Gas Light & Coke Co. at the time you severed your connection with it,
1428 based upon its earning capacity?

A. I think I could make an estimate of about what it was worth.

47. What in your judgment was it worth at that time?

Objected to as incompetent, immaterial and because no proper foundation has been laid.

A. I think it was worth a million dollars; I agree with Mr. Henebery on that.

48. You had disposed of your interest, had you not, before the majority of the stock was sold as testified to by Mr. Henebery?

(Objected to same grounds.)

A. Not all but all except a few shares; I had a few shares after the new management went in.

49. Do you know what the surplus on hand was at the time the new management went in?

(Objected to as incompetent and immaterial.)

A. Of course, I have heard but I do not know of my own knowledge; I was not a director at that time.

Cross interrogatories by Mr. ABBOTT:

1. When did you sell the first of your stock?

A. Probably 6 or 7 years ago.

2. When did you next sell any part of it?

A. The last few shares I had left were sold after the new management came in.

3. There was but one sale in connection with the sale of the stock to the new management?

Ans. That is all.

4. When was that?

Ans. I don't remember the date.

5. Was it after the People's Gas & Electric Co., now the Peoria Gas & Electric Co., had organized and commenced doing business in the city of Peoria?

A. They were either building the works or making gas at that time, I don't remember which.

1429 6. At that time there was competition or active threats of competition in the gas business?

A. Yes, I think so, or going to be.

7. What effect did that have on your willingness to sell your stock?

A. It would depreciate the value of the stock, that is, a fight on prices would affect the dividends.

8. You anticipated at that time a fight on prices, did you?

A. I did not care so much about that as I only had 3, 4 or 5 shares.

9. (Interrogatory 8 repeated to witness.)

A. I did.

10. Did you continue to be an officer up to the time you made the final sale of your stock?

Ans. No sir.

11. When did you cease to be president?

A. Early in the '90's—1891, '92 or '93 sometime.

12. Were the salaries you have stated paid to the officers while you were president?

Ans. No sir.

13. What salaries were being paid at that time?

A. I don't remember certainly, I think the president only got a thousand dollars, the secretary $2,500. and the treasurer a very little, if anything.

14. Was that the scale during the entire time you were president?

Ans. I think so.

15. Do you know what scale of salaries were in effect at the time of the sale of your last stock?

A. The old administration was out when I sold my last stock and the new one was in; I don't know what they paid the officers.

16. What salaries continued to be paid, if you know while Henebery, the Coffey's and Farrelly continued in the active management of the property?

1430 A. I think I was out one year before—my understanding is it was paid until they sold out.

17. Those were the salaries that were being paid at the time you retired from active participation in the company?

A. Yes, according to my understanding.

18. What was the property worth in your judgment at the time you first became a stockholder?

A. Well, the stock, as Mr. Henebery told you, was sold for $40. for a $50. share, and the capital stock was $175,500.

19. You have had considerable to do with real estate in the city of Peoria, have you not?

Ans. Yes sir.

20. And are reasonably familiar with the values of property generally in the city and have been for the last 40 years?

A. In some parts of the city.

21. In the business part of the city?

A. Yes and in that territory down there where the old company's plant is I was particularly familiar with it.

22. What, in your judgment was the value of its physical property, its manufacturing plant, mains, services, meters and its entire equipment at the time you became a stockholder?

A. I think the property was worth par at that time, that is $175,500., although the stock sold for a little less.

23. What was the physical condition of the property at that time?

An. It was in a very poor condition.

24. The plant was substantially renewed and replaced in the course of a very few years, was it not?

Ans. Yes sir.

25. From the fact it had become unfit for use?

A. Not quite unfit but it was in a bad condition; the mains were leaking badly—Interrupted.

26. Do you know what the percent. of leakage was when you took hold of it?

Ans. I think it was about 22 %.

1431 27. Do you recollect what per cent. of leakage there was after it was rebuilt and renewed?

A. I know before I went out it was down to about 10 %.

28. Was that about what it continued while the plant was in active operation?

A. From 10 to 12 %, that is condensation and leakage, you understand.

29. What other changes and improvements in the plant were made during the time you were interested in the company in addition to those made the first year or two?

A. We were from year to year putting in larger and new mains at a great expense—that was perhaps the largest expense we were at.

30. What changes were made in the manufacturing plant proper?

A. I have told you we put in an oil plant that enabled us to make gas cheaper and better, we also purchased second pool Youghiogheny coal which produced a coke and tar and an ammonia that was not produced by the Illinois coal they had used before I went in, that is not in large quantities, that is, a little coke but not much and a very poor quality.

31. Was not the entire plant substantially rebuilt and renewed after the rebuilding that took place when you first became interested?

Ans. Yes sir.

33. How frequently were the benches of retorts renewed during the time?

A. A bench wears only about two or three years and we were constantly renewing benches; sometimes we would overhaul the whole system of benches, but we were constantly renewing some of the benches every year; I think I used to say they were like horses, they would wear just so long and burn out.

34. That is renewals had to be made from year to year to

1432 keep the plant in efficient operation?

Ans. Yes sir.

35. Is it not a fact that at the time you speak of loans being made

from the surplus that the company chose to make those loans instead of paying out the money as dividends in order to have a fund to make these renewals from year to year?

A. We always had money enough to make those repairs without lay- funds away *fro* it, but I will tell you what we did do, we did not effect any insurance; the insurance rate was very high and we always wanted to keep $50,000. on hand in case we had an explosion or something of that kind.

36. Did you not keep money on hand at all times for the necessary renewals and repairs and to cover the risks of explosion and other risks incident to the business?

Ans. We did.

37. Why was it then that this money was put out as a loan instead of being paid out as dividends?

A. We wanted to keep enough to provide against accidents.

38. And the amount you kept on hand all the time you regarded as a proper and legitimate amount to keep on hand for that purpose?

A. Mostly so.

39. What was the value of the property at the time you sold your final holdings?

A. That was only a couple of years ago; at that time I estimated the value of it at one million dollars.

40. On what basis did you consider that property worth a million dollars?

A. Its earning capacity.

41. Its earning capacity on the basis of having a monopoly of gas service or a basis in view of the future considering the fact there was likely to be competition?

A. I should say it was on the basis of having a solitary plant; I think that competition would depreciate it.

1433 42. To what extent, in your judgment, would its value have depreciated if another plant of substantially the same size and capacity were erected in the city?

Objected to as immaterial and not cross examination.

A. I could not give an estimate of how long the fight would continue.

43. The fact that there was competition, however, would have a material effect on the value of the plant as it then stood, would it not?

Ans. I think so.

44. You were influenced by that consideration in disposing of your stock, were you not?

A. I disposed of all my stock except three or four shares or something like that before there was any competition.

45. Did you dispose of that on the basis of a million dollars valuation of the plant?

A. I don't remember what I got for those few shares but I did not get so much as I did on the first sale.

46. Do you know approximately what you got?

A. I do not, I had only three or four shares.

47. Was not the property worth as much at that time as it was two months before?

A. Its intrinsic value was exactly.

48. Was it not of equal value from the standpoint of its earning capacity?

Ans. No, I think not.

49. Why not?

Ans. Because there was sharp competition, selling gas at what I considered ruinous prices.

49. And that you would consider depreciated the value of your stock?

Ans. Yes sir.

50. That was one of the reasons you were willing to sell your remaining holdings?

A. That was not the moving cause; the main cause was
1434 the shares were too trifling for me to have anything to do with.

51. Suppose you had had $50,000. in shares at that time, would it have been a consideration for you to sell that stock?

Objected to as incompetent.

A. I think it would have depreciated the price.

52. It would have had an influence on your mind in determining the price you would be willing to take for the stock, would it not?

Ans. I think so.

53. You were a consumer of gas in the city of Peoria before you became interested in the Peoria Gas Light & Coke Co., were you not?

Ans. I suppose I was in my office and in my house.—oh I was always a consumer of gas, I think.

54. Do you know the price that was being charged by the Peoria Gas Light & Coke Co. when you became a stockholder and for some years previous?

A. The old management was charging $3.50 per 1,000 and 25 cents per month meter rent, whether gas was used or not.

56. How long did that charge for meter rent continue?

A. Not very long.

57. How long did the $3.50 rate continue?

A. Not very long; it was reduced in the first year after I became a director I think.

58. To what price was it reduced?

A. I cannot remember when we reduced it nor how much each time but we reduced it from time to time.

59. Do you remember to what figure the first reduction was?

A. I do not.

60. Was it to about $2.50 per thousand?

A. I don't remember that but I know we reduced it from time to time without being compelled to do so until when I was there last we were selling gas for illuminating purposes at $1.00 per 1000 and fuel gas at 75 cents.

1435 61. There was not any power to compel you to reduce the price was there?

Ans. I think there was but they did not see fit to exercise it.

62. The old company existed under a charter from the State, did it not?

Ans. Yes sir.

63. As I understand you, you do not recollect what those reductions were or when they were made?

A. I do not. I remember one time we were charging $2.25 and Mr. Comstock was going to build a plant and failed and the city came to us and asked us what was the best we could do and I remember of telling the city committee that if Mr. Comstock was out of the business we would reduce the price 25 cents and make it $2.00 per 1000.

63. When was that?

A. That was when John B. Smith was in the council—say in 1876 or '77.

65. There had been no gas sold below $2.00 up until about 1876 or '77?

A. We had reduced it from $3.50 down to $2.00.

66. You were formerly a lawyer in active practice, were you not?

Ans. Yes sir.

67. How long did you continue practicing law?

A. I practiced law here about 22 years, up to about 1882—from 1860 to 1882, I think.

68. For some seven or eight years after you became connected with this gas company?

Ans. Yes sir.

69. During that time, was it not your opinion as a lawyer and did you not maintain that the city had no power to control the rates to be charged by that company in view of the fact it had a charter from the State?

Objected to as incompetent and immaterial.

1436 The MASTER; I do not think it competent or material either.

Mr. ABBOTT: I desire the question answered.

The MASTER: He may answer subject to the objection.

A. I don't remember of ever being called upon to pass on that question although I might have told somebody that they could not make us do it.

70. Was not that your opinion?

A. I don't know. It has been my opinion for a good many years

that they had the authority to make us sell gas at a less price if we could produce it for a less price and we voluntarily reduced it.

71. Did you know anything of the management of the company at the time you became a stockholder and for a few years prior thereto?

A. I only knew from the results and the statements made at the meeting at which I was first elected a director.

72. What opinion and judgment did you form from the results and statements at that meeting?

(Objected to as incompetent.)

The MASTER: I don't think it material but he may answer subject to the objection.

A. I judged by the results that the management was not very good.

73. What had they been doing, if anything, in the way of saving their tar as a by-product?

A. I did not know but I heard things.

74. What evidences were there about the plant at the time you became a stockholder as to what efforts they were making in that regard?

A. At that time tar was not worth a great deal; tar was used afterwards for paving streets and roofing houses; it came into use after our time, before that it was not used extensively in pav-
1437 ing streets and as tar paper.

75. How soon did it come into extensive use?

A. Right off after I became a director and some before but not generally as it was afterwards.

76. Is not that substantially the only use made of it now, for paving streets and roofing purposes?

A. They had not commenced to put on gravel roofs and pave streets before that.

76. They did commence shortly after that?

Ans. Yes.

77. At that time you commenced to save tar and sell it as a by-product?

Ans. Yes sir.

78. You got a good price for it, didn't you?

Objected to as indefinite.

The MASTER: Yes, I think so; let him state what price he got, if he can.

A. Well, for the time we got a pretty fair price, we thought, but the tariff was taken off from Europe and that reduced the price of tar very materially.

79. What did you get when you first began to sell it in considerable quantities?

A. I cannot remember that now but I should say about $1.00 a barrel.

80. Do you know how that compared with the present price?
A. I don't know what it sells for now.
81. What efforts were made at the time you became a stockholder to save the ammonia and sell it as a by-product?
A. There was no effort at all being made to save it at the time I became a director but sometime after I became a director we built an ammonia plant—a few years afterwards.
82. What price did you get for the ammonia then?
A. I am like Mr. Henebery about that, I don't remember;
1438 we got from $900 to $1100. per car; I don't remember the pounds.
83. It was shipped in a crude form was it not?
A. It was shipped in the solids of ammonia.
84. Do you know how that price compares with its present price?
Ans. I do not.
85. How soon after you became a stock holder did you commence to sell your coke in considerable quantity?
A. Immediately.
86. The receipts from the sales of your by-product of coke, tar and ammonia went into the general funds of the company, did they?
Ans. Yes sir.
87. And these dividends that were paid and these improvements made were supplied from the fund to which these sums had contributed?
Ans. Yes sir.
88. When was the water gas plant put in?
A. That taxes my memory; it seems to me it was about 1884.
89. What was the purpose of that plant?
A. That we might, as I have stated, make the gas better and cheaper.
90. Don't you mean by that to make the gas of a higher candle power than poor coal gas would have done?
A. Yes sir, before that we used block coal and we could not make it rich enough with coal alone.
91. Is it not a fact you could not make over 18 candle power gas with coal alone?

(Objected to as incompetent and not cross examination.)

A. I am not very familiar with that.
92. Is it not a fact that it takes about from 22 to 24 candle power of water gas to equal an illuminating power 18 candle power coal gas?
A. I don't know that it would take that much but it takes
1439 a higher power to make the illuminating light out of water gas.
93. There is a difference, is there not?
A. Yes sir; the mechanical part of it I am not so familiar with as a man that works at the retorts.

94. Did the Peoria Gas Light & Coke Co. continue to make a charge for meters?

A. Not very many months.

95. Is it not a fact that they continued to make a charge for meters during the entire period of your connection with the company where the amount of gas used per month amounted to less than 25 cents?

Objected to as immaterial, incompetent and not cross examination.

A. That is a fact where they got meters and did not use gas we charged them meter rent, I believe during the entire time.

96. Is it not also a fact that during the entire time you were connected with the company they charged the consumer for the cost of service pipes and connections from the street main into the premises of the consumer?

(Objected to same grounds.)

The MASTER: I don't think it cross examination but he may answer subject to the objection.

A. As I remember it we charged for the pipe from the main to the meter but we never charged for the meter; we did charge at times, I believe, for the setting of the meter but nothing for the meter unless we sold the meter to somebody.

97. Is it not a fact there was a rate charged of $3.50 and a minimum rate for setting the meter during all the time you were connected with the company?

A. No. A meter has some pipes and valves to it in the meter itself and connections to it, and we charged for those, as I remember, part of the time if not all, we charged for the pipe from the main to the meter and for the setting of the meter but not for the meter.

1440 98. The meter was retained as the property of the company?

A. Yes sir.

99. Do you remember what was charged for the setting of each meter?

A. I don't know, but it was somewhere like $3.00 or $3.50 probably.

100. Was it not from $3.50 up?

Ans. Possibly, it might be.

101. And these charges were made notwithstanding the fact that you were paying dividends every year of 10% and one year you paid a dividend of 37½% on your stock?

Objected to as incompetent and immaterial.

A. I think we always charged for the pipes from the main to the meter and for the setting of the meter or nearly always, I am not sure but what the charge for setting the meter was taken off in the last year.

102. Was not there always a minimum meter rate charged whether there was any gas used or not during the time of your connection with the company?

A. As I remember it and understood it, we always charged for the meter where they did not consume gas.

103. And those were during the years the company was paying the dividends with reference to which you have testified?

A. Yes, but there were not very many meters of that kind.

104. Do you remember how long the rate of $3.50 per thousand feet continued after you became interested in the company?

Objected to as already answered.

A. My recollection is, just as I told you before, it was a very short time.

105. To what price was it then reduced?

Objected to as already answered.

A. I don't remember.

1441 106. When did the Peoria Gas Light & Coke Co. first begin furnishing gas for fuel purposes?

A. That is a hard question—say 15 years ago.

107. Do you know what price was being charged for illuminating gas at that time?

Ans. I do not.

108. And what price was charged for fuel gas?

A. I think we first put it in at $1.00 a thousand.

109. And it continued at that price until very recently did it not?

Ans. No, it was a number of years ago, say 7 or 8 years ago, that we reduced it to 75 cents.

110. At what price was illuminating gas being sold for then?

A. My recollection is it was $1.25.

111. When did that price begin?

A. The price was not universal; we made a schedule of consumers over a given number of feet who got it at one price and then another schedule at another price and the smaller consumers paid a higher price. My recollection is at that time when we reduced it to $1.25 with 10 cents off it was furnished at that price to any consumer at that time.

112. What was it just before that reduction?

A. I don't remember. I think we reduced illuminating gas to $1.00 and fuel gas to 75 cents the last I know anything about the prices.

113. Is it not a fact it continued to be $1.35 for illuminating gas until after the Peoria Gas & Electric Co. was organized?

A. I don't think that is a fact; I think we reduced it to $1.00 for illuminating gas before a charter was granted to the new company.

114. Is it not a fact that that was done after an application had been made by the new company to the city council for a license?

A. I don't know. How long was it after you made the
1442 application before you commenced to build?

115. We began to build in the summer and the application was made in March.

A. It was about that time, whether it was just before or just after, I am not positive.

116. Was it not after the application was made to the city by the complainant company for a license to do business in the city?

A. I don't remember.

117. Is it not a fact that it was that application and that pending ordinance that made the Peoria Gas Light & Coke Co. reduce its price to $1.00?

Ans. Possibly it was, I don't remember.

118. Didn't you at the time raise the price of fuel gas to $1.00?

Ans. We attempted to bring the two together—you see the fuel gas had a meter and the lighting gas a meter and we issued an order to bring them together, but there was such a complaint made we never did it.

119. Didn't you bring them together at $1.00?

A. No sir, I am pretty near positive we did not; we issued an order and was going to collect it that way—we reduced the lighting gas from $1.25 to $1.00 and raised the fuel gas from 75 cents to $1.00 and attempted to make it that way, for this reason, that we had two meters and meters cost a great deal of money, they rust out and it required two takings, two bills and two collections, and it was too expensive; our secretary reported to us we were throwing away between $4,000. and $5,000. a year by having two meters, and we attempted to bring them together, but the attempt raised such a terrible storm that we never did collect a bill in that way. We just abandoned it and went on as we had done.

120. How long does a meter last, as a rule, in working condition?

Objected to as not cross examination and because proper
1443 foundation has not been laid.

A. I cannot tell the number of years but we were constantly buying meters at a great expense.

121. Did not they require constant repairs and renewals?

A. Constant repair and constant renewal.

122. Do you remember what the price charged by the company was before it was reduced to $1.35?

Ans. I do not.

123. Do you know what period of years was covered by that price whatever it was?

A. Not very long; I think it was $1.50; we got it down to $2.00 at the time I told you about and then my recollection is we made it $1.75, then $1.50 and then $1.35, we kept cutting it down.

124. When you were making more money than you knew what to do with, you would reduce it a little?

A. Well, we managed to handle all the money we made.

125. You were at one time a member of the city council, were you not?

Ans. I guess so.

126. You were mayor, too, were you not?

Ans. Yes.

127. During what years were you mayor?

Ans. 1876 and 1877.

128. Did you during the years you were in the city council or during the time you were mayor investigate the question at all of the right of the city to interfere with the prices your company were charging for gas?

Objected to as incompetent, immaterial and not cross examination.

The MASTER: I don't think it competent or material either.

A. I don't remember that I investigated that question.

129. Did you consider it from the standpoint of your official connection with the city as distinct from your connection with the gas company?

(Objected to same grounds.)

A. I don't think the question was brought up for my con-
1444 sideration. You must remember I was mayor two years after I became connected with the gas company—two or three years after—and we were constantly reducing the price of gas until the people were satisfied.

130. Were the people satisfied in 1898 and 1899?

A. I think they were if they had not disturbing elements.

131. Were not there constant complaints at the office of the Peoria Gas Light & Coke Co. with reference to the charge being made by that company for service pipe from the main into their premises?

Objected to as immaterial and incompetent.

A. The secretary got those complaints; I did not get them.

132. They reached you ultimately, did they not?

Objected to same grounds.

A. I don't remember; I don't think they ever were brought up in the directory.

133. You knew such complaints were being made, did you not?

A. I guess there were complaints. The fact is I think there would be complaints if we only charged 10 cents a thousand.

134. There were also complaints with regard to the charge for the setting of meters?

Ans. Yes, I guess there was.

135. Were not there complaints also of the general arbitrary and unreasonable character of their treatment in the company's office.

Objected to same grounds.

A. I was not in the office much and I didn't hear anything of that kind. I heard a few complaints of that kind but I think people would complain about the price of gas and their treatment if they got it at any price.

137. There were complaints at that time that the price was too high?

Ans. I think so and there always will be.

138. They had a right to complain if you were paying 37½ per cent. dividends, I should think?

Objected to as incompetent and immaterial.

1445 The MASTER: I think so, gentlemen. I don't want you to continue this line of examination any longer.

The WITNESS: We were reducing the price pretty fast.

Re-direct interrogatories by Mr. TICHENOR:

1. Is it not true that you heard a great many more complaints now of the treatment of consumers of gas than you ever did under the old management?

Objected to as incompetent, immaterial and not proper re-direct.

The MASTER: I don't think it competent. I didn't think the questions on cross examination in that respect were competent but, if counsel desires to press it, he may answer subject to the objection.

A. I don't know anything about complaints.

2. And you did not then?

Ans. No, not much.

3. What is the material of which those meter connections, to which you have referred, are made?

A. I think part of it is lead, what they call a stop cock and valve.

4. How long will those connections last?

A. They will last pretty nearly forever lead and brass; it is the meter I refer to as needing repairs, etc., a connection will last practically forever.

5. So when that is once put in the expense on that account is at an end?

A. Yes sir, at least I never heard of them being renewed.

6. Is it not also true that during the time you were connected with the company there were almost no service pipe renewed except perhaps some old and poor ones that were in when you first took possession?

(Objected to as incompetent and immaterial.)

A. I will answer that by saying to you that after we commenced to use the water gas the service pipes were too small and

1446 whether they were rusted out or not they would block up with nap-tha and it became necessary to make those pipes

larger and, of course, the pipes were more or less rusty and we put in new pipes and sometimes the company put them in without charge and sometimes they charged for them.

7. When you state that in your judgment the value of the property at the time you acquired an interest was the amount of the capitalization, viz: $175,500., what do you take into account?

(Objected to as immaterial, incompetent, not proper redirect.)

A. I take into account the prospect of the gas works, the business; the intrinsic value of that property was not near that—the lots and the buildings, the benches and the pipes in the streets was not worth near that much in my judgment because we had to overhaul it and build it all new.

8. From your judgment and experience in the gas business, in Peoria, as you have detailed in your testimony, taking into account the manufacturing plant and distributing system of the Peoria Gas Light & Coke Co. as it stood at the time you severed your connection with it as a director about the year 1898, you may state whether or not gas could now be furnished for general consumption in the city of Peoria at 75 cents per thousand cubic feet and enable the company to make a good profit?

Objected to as incompetent, immaterial and also because no proper foundation has been made, the witness having expressly stated that he is not familiar with the mechanical parts of the property.

The MASTER: I think the question incompetent in its present shape. The conditions ought to be stated in order to give the witness an opportunity to determine.

9. Supposing the conditions which would affect the situation to be as they were at the time you severed your connection with
1447 the company?

(Objected to same grounds as before.)

A. I think in 1898 the Peoria Gas Light & Coke Co. could have made both fuel and illuminating gas at 75 cents per thousand and made a fair dividend; I don't know what they could make today because I don't know the price of coal, lime or what they get for tar or for coke, so I could not answer as to today, but I can as to 1898, I think, safely.

10. State whether or not, as all conditions affecting the cost of gas production existed in 1898, 75 cents per thousand cubic feet would in your opinion have been a fair and reasonable price for gas furnished to consumers?

Objected to as incompetent, immaterial, no proper foundation laid and no qualification of this witness shown to answer such a question, and also because the question as stated does not contain all the necessary elements entering into such a question.

The MASTER: You can go into that question on cross exam tion. I think the witness may answer subject to the objection.

A. I think gas could have been produced at a profit in 1898 a fair dividend paid at 75 cents, but I say to you I do not know thing about it now.

11. Do you know what portion of the gas furnished by the Pe Gas Light & Coke Co. in 1898 was for illuminating purposes what portion was for fuel purposes?

A. I don't know exactly, I remember of noticing in a repor the gas made at one of the monthly meetings of the directors the fuel gas was very nearly as much as the lighting gas and it was increasing in output much more rapidly than the light gas. I think it was pretty nearly even in 1898. The books are things you ought to get for that.

1448 Re-cross examination by Mr. ABBOTT:

1. You say 75 cents under the conditions existing in 1898 wa fair price for illuminating gas and would have allowed a reasona profit—why didn't your company charge that price for it then?

(Objected to as immaterial and incompetent.)
The MASTER: I don't think it competent.

A. We were constantly reducing the price of gas from time time as we were making money for 24 years and we would have duced it again undoubtedly if we had been let alone, we had alwa done so before.

2. (Interrogatory No. 1 repeated to witness.)

Objected to same grounds.

A. For the reason we had just shortly before that time made reduction from $1.25 to $1.00.

3. It was not reduced to $1.00 until after an application was ma for a franchise by the new company?

A. I don't know, but I know it was reduced to $1.00 while I w there.

4. If 75 cents under the conditions existing in 1898 was a fa price for illuminating gas and allowed a reasonable profit why w your company charging more for it at that time?

Objected to same grounds.
The MASTER: I don't think it competent.

A. I can only say we had not got to that reduction yet.

5. What was the cost of gas coal per ton in 1898?

Objected to as immaterial and not cross examination.
The MASTER: I think it is.

A. My recollection is we paid for second pool Youghiogheny gas coal from $2.25 to $2.37 per ton delivered in Peoria.

6. Was it on that cost for Youghiogheny coal you base your estimate of what might have been its selling price in 1898?

1449 A. That was part of the cost of the gas.

7. How many thousand feet of gas can be produced from a ton of coal?

Ans. I don't remember.

8. Then you cannot state what in cents would be the cost of a thousand feet of gas so far as the coal that went into it was concerned could you?

A. I was not familiar with how much the lime cost, the coal cost or the labor cost for the production of gas, I only estimate the reason it could be produced for 75 cents from what we had done and the money we made; that is all I know.

9. Do you know the cost of oxide of iron for purifying?

A. No, I do not know it.

10. Do you know the cost of stokers per month?

A. No, I don't know that exactly; of course, I heard those things and the salaries we were paying every month, but I don't remember.

11. Do you know the cost of any single item either of labor or material that entered into the cost of producing gas in the year 1898?

A. I don't know accurately the cost of those things except perhaps the coal somewhat and the iron pipe we bought.

12. How much of that do you allow for the cost of manufacturing gas and how much for the cost of its distribution?

A. I never made an estimate of just what it cost to produce gas, that is, estimate the coal, the lime, labor and materials; I base my opinion on what we did do and only on that.

13. Do you know what proportion of the cost of gas delivered to consumers is covered by the cost of distribution?

Ans. I do not.

14. Do you know what changes have been made in the last 3 or 4 years in the necessary expenses in the distribution department of a gas works?

Ans. I do not.

1450 15. On what annual output did you base your estimate of the cost of gas that would enable it to be furnished at 75 cents per thousand feet?

A. I did not base it on our output but on the basis of our business transactions.

16. Do you know what the output was in 1898?

A. I did know but I don't remember.

17. Do you know how much gas they made that year?

A. I don't now remember; of course, I knew every month what we put out at the time.

18. In making that estimate of the cost of gas, how much did you take into consideration for repairs and renewals of the plant?

A. I did not take into consideration anything about what was for repairs or what anything cost; I did not take into account what any of these things cost; I took into account what we had done.

19. Did you allow in that anything for depreciation of the plant or mains?

A. I think it would be fair to allow for it and I would allow it in an estimate.

20. How much did you allow for that in your estimate?

A. I did not allow any particular sum; in my figures that we could produce gas for 75 cents a thousand at that time my estimate was based on what we had done, and making a due allowance for all depreciation in pipe and mains.

21. What amount did you allow for depreciation?

A. I did not allow any more than what we had usually had.

22. What was that?

A. I never allowed any specific sum for depreciation.

23. What amount was customary to set aside for depreciation?

A. We never set aside any money for depreciation.

24. What per cent. of profit considered as a per cent. on
1451 the value of the plant, did you include in that cost, if any?

A. Well, I would say when I say we could produce gas at 75 cents per thousand at that time it would give us a 6 per cent. profit on the value of the plant.

25. On what value of the plant?

A. On a million dollars.

26. That would give then——

Ans. $60,000. a year.

27. On what output?

A. Understand, that these are rough estimates; I have never made estimates on those things as an expert and I only know from the general results in the transactions we had.

28. (Interrogatory 27 repeated.)

A. When I said gas could be produced at 75 cents I meant I could build a plant here at that time and produce gas for 75 cents a thousand.

29. (Interrogatory 27 repeated to witness.)

A. I was figuring on the annual output we put out.

30. How much was that?

A. I don't remember now; I knew, of course, at the time every month.

31. As I understand you this estimate does not take into consideration any of the different elements or items of cost which enter into either the manufacturing or distribution of gas or any definite output per annum in million feet.

A. I only make an estimate from what we did do and the prices we paid for material and labor.

32. Did you ever make any recommendation to your board of directors that they should reduce the price to 75 cents?

Objected to as incompetent and immaterial.

The MASTER: I don't think it competent.

A. No sir. (I think a recommendation was made by Peter
1452 Coffey who knew better than I did.)

Complainant objects to that part of the foregoing answer enclosed in brackets as not responsive and moves the court to exclude it.

The WITNESS: We will take it out then, it was done by him anyway. I never made the recommendation myself, that is my answer.

MATHEW HENEBERY recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. State whether or not, as all conditions affecting the cost of gas production existed at the time you severed your connection with the company, as you have detailed, gas could have been furnished to consumers in Peoria profitably to the company at 75 cents per thousand cubic feet. I desire to have you base your answer upon your experience and knowledge gained in the gas business during the time you were associated with the Peoria Gas Light & Coke Co. as you have already testified.

Objected to as incompetent, immaterial, no proper foundation laid, no qualification shown of the witness.

A. I would say yes, at the time I sold out.

Cross interrogatories by Mr. ABBOTT:

1. On what basis as to the cost of coal is that?
A. On whatever the cost was about the time I sold out.
2. Do you know what that was?
Ans. No.
3. On what basis as to the cost of purifying material is that?
A. I don't know.
4. On what basis as to the cost of labor?
1453 A. I don't know.
5. On what basis of the cost of stokers?
Ans. I don't know.
6. On what basis as to the cost for officeers' salaries?
A. I don't know.
7. On what basis for the cost of the clerks and other employés in the distribution department?
Ans. I don't know.
9. On the basis of what output per year?
A. I have an idea of the output but I am not basing my calculation on the output.
10. Is your estimate based on the assumption that your company would continue its practice of charging the consumer for service pipe from the main into their premises and for the setting of meters?

A. That may be but my estimate is based on the income we received from the business.

11. It is a fact, is it not, that for a number of years prior to the time you sold your stock your company was charging the consumer for the service pipe from the mains into the premises both repairs and renewals and new pipe?

Ans. I have nothing to do with that.

12. Is it not a fact that was being done?

A. That might have been done.

13. Was it or was it not?

A. I don't know, In base my estimate altogether on the income received by the company.

14. Were not they also charging for the setting of meters during those years?

Ans. I think on some occasions they did.

15. Did they not on all occasions?

A. Well, I don't know.

16. Do you know of any single instance where they were
1454 set free for the consumer?

A. I think there were instances.

17. Name them if you can.

Ans. I cannot.

18. Your estimate for that price for gas is based then on the conduct of the gas business as it was at the time being conducted by your company. That is true, is it?

Ans. Yes sir.

19. When did you come to that conclusion?

A. I came long ago to it.

20. Before you sold your stock?

Ans. Yes.

21. Did you ever bring it to the attention of your directors?

A. I did. I think I ought to have been in the crazy-house for selling at all at the price we did.

22. Why did you sell at that price?

A. Circumstances—circumstances alter cases.

23. What were the circumstances?

A. Well, my partners came to that conclusion and I did not want to hold the bag alone.

24. Who were your partners?

A. Farrelly, Coffey and myself had a majority of the stock and it was the understanding—Interrupted.

25. What do you mean by saying you did not want to hold the bag alone?

A. I wanted to go with the other men that were in with me but at the time I sold I did not think I was getting a sufficient price.

26. Why did you sell if you thought you were not getting a sufficient price?

A. Things were getting pretty hot.

27. Competition was coming in pretty active was it not?

A. Pretty lively, yes sir; it came on all sides, not only by the parties who bought but by the citizens who thought they had
1455 a big thing.

Re-direct interrogatories by Mr. TICHENOR:

1. As I understand your answer with reference to the price at which gas could be produced at the time in question you base your estimate upon what your company had actually accomplished in the way of earnings?

Objected to as incompefent, immaterial, not proper re-direct.

A. Yes, I based it on the amount of money received by the company.

2. State if it is not true that all of those services and meter connections were put in at actual cost to the company when any charge at all was made and not at a profit?

A. That was the supposition but I don't know personally.

Complainant objects to the answer as incompetent and not responsive and moves the court to exclude it.

LESLIE ROBISON recalled for further cross examination.

Questions by Mr. ABBOTT:

1. Was the estimate you made as to the selling price of gas in 1898 based on the assumption that the company furnishing it would continue to follow out the then practice of your company in charging the consumer for service pipes from the main into their premises and also charge them for the meter settings and meter rents?

A. I suppose so, but that did not enter into the profits of the company; we aimed to get—Interrupted.

2. The question is answered.

A. It requires an explanation.

3. Would it not have made a difference in the profits of the
1456 company if those things had been furnished to the consumer at the company's cost?

Ans. Yes sir, it would have made a difference.

(Mr. TICHENOR:)

Q. Is it not a fact that the number of new services put in and the number of new meter connections made combined made a comparatively trifling item during a whole year?

Objected to as incompetent and immaterial and calling for a conclusion.

The MASTER: Let him state his knowledge on that point.

A. It took considerable money per annum to put in service pipe

FERD LUTHY recalled on behalf of defendant deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. You are the same gentleman that testified once before in this case, are you?

Ans. Yes sir.

2. State whether or not you were served with a subpœna to produce certain papers pertaining to the case in question?

A. Yes sir.

3. Have you them with you?

A. No sir, I have looked for them but could not find them. You asked me to produce the stock certificate. I told you I think in my previous testimony I did not have it. I also looked for Mr. Walsh's receipt for money but I could not find it; I looked through my files at the office this morning for 15 or 20 minutes but could not find the documents.

4. Have you not receipts or certificates which were issued to you at the time you surrendered your stock certificates in the complainant company?

A. I think I got a receipt of some kind but I have not been able to find it this morning.

1457 5. You are satisfied, are you, that such a paper is in your possession somewhere among your papers?

A. I think beyond doubt I received such a receipt but I have not been able this morning to find it; I have misplaced it some place.

6. To whom did you surrender your stock certificates?

Objected to as incompetent, immaterial, irrelevant and a private matter of the witness.

A. As I remember it now, my stock certificate was delivered either to Sumner R. Clarke or Mr. Little.

7. Was that the same time you received this receipt in exchange for it?

A. I think I received a receipt at that time.

8. How many stock certificates did you have?

A. I had one and a memorandum for another, I think.

9. That had not been actually issued to you?

A. I don't remember whether it was issued to me or would be issued to me. I am not certain which of the two; in effect it would be the same. I have looked quite faithfully among my papers this morning for the receipt but the purport of it I think would be as I have already testified in my previous testimony.

10. I prefer to have the paper itself if you will make a further search for it.

A. Well, if I can find it I will.

(Witness excused for the present.)

Direct examination of SUMNER R. CLARKE resumed by Mr. Tichenor:

52. What were the circumstances under which those certificates went out of your possession?

Objected to as assuming that they did go out of his possession.

1458 A. I answered, I did not remember whether they were issued or not; I would have to refer to the record.

53. Does your company, or any of its officers, keep a stock certificate book?

A. I don't know of my personal knowledge but I suppose so.

54. Do you know whether you as president of the company have signed such certificates as have been issued either of the original stock or of the increase?

A. Not without reference to the certificates.

55. Are you able to state from recollection at this time whether or not you have ever signed any stock certificates either for the original capitalization or for the increase of complainant company?

(Objected to as immaterial.)

A. I would have to refer to the certificates; the records would show that, I think.

56. State whether or not you have at any time, either in your official capacity as president of the company or otherwise, signed any agreement, contract or other document pertaining to the holding of any or all of the present capitalization of your company?

Objected to as incompetent and immaterial.

A. I could not state without the minutes of the meetings or the books.

57. You have records which will disclose those facts?

A. They should show them.

58. State whether or not you alone, or in connection with any other person, have ever issued any receipts, or any papers in the nature of receipts, for stock certificates held by any of the stockholders of complainant company?

Objected to as incompetent, immaterial and irrelevant to the issues in this case.

A. I think so.

1459 59. Have those receipts been issued by you alone, or did some one else sign them with you?

(Objected to same ground.)

A. With another party.

60. Who was the other party?

(Objected to same grounds.)

A. John R. Walsh.

61. In what capacity did you and Mr. Walsh issue the receipts for stock certificates to which you have referred?

Objected to as incompetent, immaterial and irrelevant.

A. I have forgotten how they were signed.

62. In what capacity were you acting in executing those receipts?

(Objected to same grounds.)

A. Trustees, I think.

63. State whether or not you have given such receipts for the entire capitalization of complainant company as it is at the present time?

(Objected to same grounds.)

A. Without being positive I should say, no I think not.

64. For what portion of it have you given such receipts?

Objected to same grounds.

The MASTER: The trouble is, the witness don't know whether it has all been issued or not and of course he could not answer that question without he had a knowledge of how much of the stock has been issued.

Mr. TICHENOR: I only want the knowledge of the witness so far as it extends.

A. Any of these questions you are asking I could probably give positive answers to by going to the records.

65. Will you examine the records and be able to state positively when called upon further to do so?

Ans. Yes sir.

66. From what source, if any, did you and Mr. Walsh derive authority for issuing the receipts to which you have referred?

1460 Objected to as incompetent, immaterial, irrelevant and assuming there was authority.

A. From the certificate holders.

67. In what form, written or verbal?

Objected to as incompetent, immaterial and irrelevant.

A. In writing.

68. Do you know where that authority is at the present time?

Objected to same grounds.

A. Only so far as my own certificates are concerned.

69. What is your answer then so far as your own certificates are concerned?

Ans. I do.

70. Where is it?

Ans. On file with my papers.

71. Will you produce that document at the coming in of court at ten o'clock tomorrow morning?

Ans. No.

72. You say you will not?

A. I think it is a private matter unless the court rules I must produce it.

73. State whether or not the authority for issuing those receipts, to which you have referred, is a document signed by all the stockholders, or is there a separate document signed by each one of the stockholders?

Objected to as incompetent, immaterial and irrelevant.

A. My remembrance is they were separate.

74. That is as to each stockholder?

Ans. Yes.

75. Are each and all those documents so executed by the several stockholders now in your possession?

Objected to as incompetent, immaterial, irrelevant and a private matter between the stockholders.

A. I don't remember the form of the document; we gave them a receipt; what we held I don't remember.

76. Are you still certain that the authorization in question was by separate documents executed by the different stockholders?

1461 A. To the best of my memory.

77. State whether or not at the time you issued those several receipts you received from the several stockholders their stock certificates.

(Objected to as incompetent, immaterial and irrelevant.)

A. That is my remembrance although that contradicts an answer I gave this morning about my certificate being in my possession.

The MASTER: You have a right to correct your evidence if you recollect now your former answer was not correct.

The WITNESS: This virtually corrects it; I am speaking from memory.

78. Are those several stock certificates still in your possession? I am speaking now of the ones you took up at the time you issued the receipts to which you have referred?

Objected to as incompetent, immaterial and irrelevant.

A. Whatever we gave our receipts for are in our possession, whether you have properly designated it or not in your question I don't know.

79. I intend in my question to cover all the stock certificates you gave up to the time of the issuing of those receipts.

A. Yes sir, they are in our possession.

80. That is, in the possession of yourself and Mr. Walsh?

A. Yes.

81. As trustees, are they?

A. Yes, I think they are signed that way.

82. Where are those actually kept, in Peoria or in Chicago?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know whether they are here or in Chicago without referring to the records—I don't know as to the records but referring to my own account.

1462 83. State whether or not there is in existence at the present time an agreement entered into by the stockholders of the complainant company covering the subject matter of placing all of that stock in the hands of yourself and Mr. Walsh as trustees?

Objected to same grounds.

A. No sir.

84. Has there ever been any agreement of that kind to your knowledge?

(Objected to same grounds.)

85. State whether or not there is now, or ever has been, in existence an agreement which covers the subject matter of the placing of all of those stock certificates, or any portion of them, in the hands of yourself and Mr. Walsh as trustees for any purpose?

Objected to as already asked and answered and as incompetent, immaterial and irrelevant.

The MASTER: He may answer if he has not already answered it.

A. Yes sir.

86. When was that agreement executed and who executed it?

Objected to as incompetent, immaterial and irrelevant.

A. I don't know when it was executed but that is the same receipt I referred to given by us as trustees.

87. Do I understand you to say that there was no agreement preceding the issuing of those receipts which cover the subject matter of placing the stock certificates of complainant company in the hands of yourself and Mr. Walsh as trustees?

Objected to same grounds.

A. Do you mean a company agreement or personal agreement?

(The MASTER:)

88. He means this. Whether or not the subscribers of this stock entered into an agreement to put these stock certificates into the hands of yourself and Mr. Walsh as trustees to hold them?

1463 Mr. TICHENOR: That is what I mean.

A. Not as a whole, individually they did. I do not mean to say that all the holders of the certificates put them in our hands.

89. Have you in your possession a receipt issued by the trustees named for the stock certificates, if any, issued to you for any portion of the capital stock of complainant company?

Objected to same grounds as before.

A. I think we have in our possession the stub of the receipt that was given for these certificates.

90. I think you fail to understand my question. (Int. 89 repeated to witness.)

A. They have the receipts you know, and we have the certificates.

91. Have the trustees as such issued to you as an individual any receipts of the character mentioned for your stock?

Objected to as incompetent, immaterial and irrelevant.

A. I hold their receipt.

92. Will you produce that receipt upon the coming in of court at ten o'clock tomorrow morning?

Objected to as incompetent, immaterial and a private matter of the witness counsel has no right to inquire into in this proceeding.

Mr. TICHENOR: No objection is proper to a question of that character.

The MASTER: I think not. The question is simply whether or not the witness will produce this receipt at the coming in of court tomorrow morning and he can answer the question one way or the other.

A. It is a private matter and it don't seem to me I am obliged to produce it.

93. Then you refuse to produce it, do you?

The MASTER: I think before you ask the witness to answer
1464 that question it is incumbent upon you to show that this receipt held by Mr. Clarke is similar in character and terms as the receipts issued generally for this stock.

Mr. TICHENOR: You may answer the question as stated by the master.

Objected to as incompetent, immaterial and irrelevant.

A. It is my remembrance it is.

94. Will you produce that receipt at the convening of court tomorrow morning at ten o'clock or at such other proper time as counsel for defendant may ask for it?

Objected to as incompetent, immaterial, irrelevant, being a private matter of the witness which counsel has no right to call for in this examination.

A. My answer will be "no."

95. You may state to whom of the stockholders of the complain-

ant company you and Mr. Walsh have issued receipts like the one which you say you hold for stock certificates.

Objected to as incompetent and immaterial.

A. I cannot do it without referring to the records to give it to you correctly.

96. Can you state from recollection any Peoria stockholder to whom you have not issued such a receipt?

Objected to as incompetent, immaterial and irrelevant.

A. No sir.

97. Are those receipts, to which you have referred, all alike except as to number of shares and the person to whom they are issued?

Ans. That is my remembrance.

98. Do you remember whether they were typewritten or whether they were a printed form?

Objected to same grounds last mentioned.

A. I do not.

1465 Adjourned by agreement until Wednesday, May 7, 1902, at 10 o'clock a. m.

United States court room, Government building.

PEORIA, ILLINOIS, WEDNESDAY, *May* 7, 1902—10 a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. E. C. Ritcher appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

Direct examination of SUMNER R. CLARKE resumed by Mr. Tichenor:

99. You were asked yesterday as to whether or not all the increased capitalization of the complainant company had been issued and you replied in substance that you could not make a positive answer without reference to the records, have you now informed yourself upon that question?

Objected to as incompetent, immaterial and irrelevant.

A. Yes sir, it was issued to the people entitled to it.

100. What book of record contains the material pertaining to the issue of this increased capitalization?

Objected to same grounds.

A. The stock book.

101. In whose custody or control is that stock book at the present time and to whom does its custody under your management belong?

(Objected to same grounds.)

A. I think it is in charge of the Equitable Trust Co. of Chicago.

102. Have you examined that book since you were on the witness stand yesterday?

Ans. No I could not.

103. For what purpose, if you know, is it in the possession of the Equitable Trust Co. of Chicago?

(Objected to same grounds.)

A. It is for the purpose of transferring sales of stock or any changes.

1466 104. In what capacity, if you know, does the Equitable Trust Co. act with reference to such transfers?

Objected to same grounds.

A. The Equitable Trust Co. is registrar of receipts and a transfer agency.

105. By what authority is it made so?

Objected to same grounds.

A. I think the authority of the directors.

106. Are you able to state from recollection when that authority was given?

(Objected to same grounds.)

A. No sir.

107. Is there any record of the company, or of its directory, which will show when it was given and its purport?

Objected to same grounds.

A. I don't know of my positive knowledge but I presume the books would show it.

108. Is there anything controlling that subject matter except as embodied in the records of your company?

Objected to same grounds.

A. The by-laws might but I think it would be in the records.

109. Is there any agreement, contract or anything of that character which constitutes the foundation for such authority on the part of the Equitable Trust Co.?

(Objected to same grounds.)

A. Not that I know of without reference to the records.

110. Has your connection with the company and have your official duties been of such a character as to advise you if any such agreement is now, or ever has been, in existence.

Objected to same grounds as before and also because the relations of the witness to the company in that regard were fully and exhaustively gone into in his previous testimony.

The MASTER: That is my impression, but he may answer
1467 the question.

A. I am away a good deal of the time.

111. So there might be an agreement of that kind and you not know anything about it?

Ans. Yes sir.

112. What book or record kept by the compan*t*, or by any of its officers, or by the directory, contains the material to which you have referred as forming the foundation for this authority to which you have testified on the part of the Equitable Trust Co.?

Objected to as immaterial, irrelevant and incompetent and assuming the witness has knowledge of such matter.

The MASTER: He may state if there is any such record.

A. I have no remembrance.

113. Do you know in what form any such authority has been deposited with the Equitable Trust Co.?

Objected to as immaterial, irrelevant and incompetent and already asked and answered.

The MASTER: He may answer if he can.

A. I could not answer; I don't know.

114. Can you state when that authority was granted?

Objected to same grounds.

A. No sir.

115. Are these stock certificates, to which you have referred as representing the capitalization of complainant company, or any part of them, in the custody or control of the Equitable Trust Co. under any duties devolving upon it by virtue of the authority to which you have referred?

Objected to as incompetent, irrelevant and immaterial.

A. I think they are in the charge of the Equitable Trust Co. But I don't remember by what authority.

116. Are they all there do you mean?

Objected to same grounds.

1468 A. I don't remember.

117. Who placed them there if you know?

Objected to same grounds.

A. I don't remember.

118. State whether or not all those certificates of stock so far as pertains to Peoria stockholders passed through your hands personally at the time they were taken up and trustees' receipts given therefor in the manner you have already testified?

Objected to same grounds.

A. I don't remember whether they passed through my hands or not.

119. Have you at this time any recollection as to the details of the actual delivery of those certificates of stock from the holders and owners themselves to the Equitable Trust Co.?

Objected to same grounds.

A. Only so far as my own are concerned.

120. What were the details of the delivery of your own stock certificates to the Equitable Trust Co. and through what channels did they pass in making such delivery?

Objected to same grounds.

A. To the best of my memory they were sent to Lyman A. Walton in his capacity as an officer of the Equitable Trust Co., or as treasurer of the Peoria Gas & Electric Company, but I don't remember which one of those two.

121. Did you yourself send them or was it done from your office?

A. I sent them myself from my office; that is my memory.

122. Did you at the same time send any other stock certificates of the same character?

(Objected to same grounds.)

A. Not that I remember.

123. Do you remember at any other time of sending any
1469 other of those stock certificates to the same person and for the same purpose?

A. No sir.

124. State whether or not at the time you so forwarded those stock certificates you had received your trustees' receipts for them?

Objected to same grounds as before.

A. I should say not.

125. But you did receive such a receipt, did you?

The MASTER: He stated that last night.

126. Whose signatures if you know were appended to this receipt to which you have just referred?

Objected to same grounds as before.

The MASTER: He has already answered that question, you asked him yesterday and he said his and John R. Walsh.

127. When, if you know, was the plan for placing the stock in the hands of trustees in the manner testified to by you adopted?

Objected to same grounds.

A. I don't remember.

128. Who, of the people interested in the Peoria Gas & Electric

Company, participated in the details which culminated in the perfection of that plan?

(Objected to same grounds.)

A. I don't remember.

129. Did any other person or corporation have anything to do with those arrangements?

(Objected to same grounds.)

A. I don't know.

130. State if that plan was not in substance all worked out by yourself and some others interested in the Peoria Gas & Electric Company prior to the time you received your charter in 1899?

Objected to same grounds.

A. No sir.

131. Are you still unable to state with any degree of accuracy when it was done?

1470 Objected to same grounds and because already asked and answered.

The MASTER: He may state more definitely if he can when it was consummated.

A. I don't know whether I have any record that would give me the date or not.

The MASTER: Give your personal knowledge as you now recollect it.

The WITNESS: I should say sometime between the first of June and the last of August 1901.

132. I will ask you if it is not true that all of that stock had been placed with the Equitable Trust Co. prior to the first of January 1901. I mean of the stock of complainant company.

Objected to same ground and also on the ground the witness has not stated all the stock was put up there but has expressly stated he don't know whether it was all put there or not.

The MASTER: He may answer if he knows.

A. I don't know.

133. Under what authority is the stock certificate book of complainant company in the possession of the Equitable Trust Co.?

A. I have answered that I thought on the order of the board of directors but I don't remember exactly.

134. Who was the custodian of it prior to the time it went into the possession of the Equitable Trust Co.?

Objected to as immaterial, irrelevant and incompetent.

A. I don't remember.

135. Was it ever in your possession?

Objected to same grounds.

A. Not that I remember.

136. Do you know how long it has been in the possession of the Equitable Trust Co.?

(Objected to same grounds.)

1471 A. I do not.

137. Since it was first delivered to that company has it been there continuously so far as your knowledge extends?

Objected to same grounds.

A. Yes sir.

138. Since the placing of this stock with the Equitable Trust Co., in the manner you have described, what if any meetings of stockholders of complainant company have been held in Peoria?

Objected to as immaterial.

A. I don't remember.

139. Do you know whether or not any have been held?

Objected to as immaterial.

A. No, I do not.

140. State whether or not under the arrangement by which that stock was placed with the Equitable Trust Co. the individual stockholders of complainant company are deprived of all rights of voting the same or control over it?

Objected to as incompetent, irrelevant, immaterial and also because it does not appear whether the instrument in question is in writing or not.

The MASTER: It does appear, Mr. Ritcher, that it is in writing as testified to by the witness yesterday.

Mr. RITCHER: Then we object to it as not the best evidence.

The MASTER: I don't think it the best evidence, Mr. Tichenor.

Mr. TICHENOR: If they will produce the document it will be at an end.

Mr. RITCHER: We object to this evidence as incompetent, immaterial and irrelevant and we think it all nonsense to go into it, but we do not desire to drop the introduction of any evidence these gentlemen desire and I am willing to produce the form of receipt

1472 issued under this agreement they are talking about so far as it does not show the number of shares held by the different parties, as that is a private personal matter with the different stockholders. I am willing to produce the form of the receipt and form of agreement.

The MASTER: You mean you are willing to produce a form of the contract under which the stock was surrendered to the trustees?

Mr. RITCHER: Yes sir, but I would have to get it from Chicago.

Mr. TICHENOR: We want the originals of all those documents.

The MASTER: You are entitled to have them or make oral proof of their contents.

Mr. RITCHER: So far as the holdings of different individuals are concerned I will say now, speaking as attorney for the Equitable Trust Co. who have the custody of this instrument, they will not divulge that until the court orders them to but I am willing to produce the form the trust Co. has of the document.

The MASTER: It appears from the testimony of this witness in whose custody those documents are but it does not appear from anything of record now that he is not willing to produce them and bring them into court if called upon. The mere fact this witness has not done it is no evidence to the mind of the master they cannot be procured by counsel for defendant.

Mr. RITCHER: So far as this witness is concerned we object to the last question as not the best evidence.

The MASTER: The master has sustained the objection on that ground. I do not think it proper to make oral proof of the contents of a written instrument.

141. Was that agreement to which reference has been made in duplicate, triplicate or otherwise?

A. I don't remember of but one.

142. Where is that one?

Ans. I don't know.

143. But there was such an agreement, you know that do you?

1473 A. That was my remembrance.

144. Is this agreement to which you refer the fundamental and primary one under which this stock was surrendered to the Equitable Trust Co.?

Objected to as calling for a conclusion of law.

The MASTER: I think, Mr. Tichenor, it is sufficient for your purpose to ascertain whether or not the stock was delivered under the terms of this agreement to which the witness has referred—asking him whether it is fundamental or primary is asking him to pass on the character of the instrument.

Mr. TICHENOR: Answer the question, Mr. Clarke, as modified by the master.

A. My remembrance is that it was.

145. State whether or not you in your official capacity, as president of the company or otherwise, have a duplicate of that agreement?

(Objected to same grounds.)

A. I do not remember.

146. Will you search for it and produce it if found at the coming in of court at two o'clock or at some other reasonable time?

Mr. RITCHER: We object on the same grounds and also if it has his individual signature attached thereto it is a confidential matter and he has no right to produce it any further than his signature is concerned and the signature of the trustees.

The MASTER: The question as to its admissibility can be determined after the instrument is produced.

A. I will make a search for it.

147. And produce it if found, will you?

Mr. RITCHER: Produce it here in court to have the master rule on it.

A. I will do so.

(Witness excused for the present.)

1474 GEORGE H. LITTLEWOOD recalled on behalf of defendants deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. Were you served with a subpœna this morning to produce certain papers in this case?

Ans. Yes sir.

2. Have you those papers in your possession and will you produce them?

A. Yes sir, I have two papers here. (Witness produces and hands papers to counsel which papers are marked for identification Exhibits "23" and "24.")

3. Look at the papers which you have just produced marked Exhibits "23 and 24" and state when they came into your possession with respect to the dates which they severally bear?

Objected to as immaterial, incompetent and irrelevant.

A. I don't know as I could tell you when I got them but I presume though about the dates on which they were issued.

4. Who delivered them to you?

(Objected to same grounds.)

A. I think they came to me by mail.

5. State whether or not those two documents, Exhibits "23 and 24" are now in exactly the same condition as they were when originally delivered to you except the exhibit marks put on by the master?

A. Yes sir, they have not been out of my box to my knowledge since I got them.

6. Were these papers received by you at the same time or at different times.

A. I think at different times; that is my impression.

Defendants' counsel offer in evidence the two documents identified by witness marked Exhibits "23" and "24."

Objected to as incompetent, immaterial and irrelevant and also because being private papers of the witness they cannot be
1475 left as evidence in this case.

The MASTER: I would suggest to counsel that he substitute certified copies for the originals so the originals can be returned to the witness.

Mr. RITCHER: We object to the substitution of copies if the witness has no objection to the originals going in evidence we insist they go into the evidence.

The MASTER: Have you any objection, Mr. Littlewood, to these originals being left in the custody of the master?

Mr. LITTLEWOOD: Yes sir, I want to keep them myself.

The MASTER: Now, gentlemen, have you any objection to copies being substituted for the originals as that does not waive your objection to the competency of the evidence at all.

Mr. RITCHER: I have no objection to the form goin- in but I object to any individual holdings going into evidence against the consent of the individual holder.

The MASTER: Your objection as to the competency of the evidence will be preserved and verified copies of the documents will be admitted subject to the objection.

Whereupon said documents were read to the master in the words and figures following, to-wit:

1476 EXHIBIT "23." I. C. Pinkney, Master.

Peoria Gas and Electric Company.

Incorporated under the laws of Illinois.

No. 4. 50 shares.

Stock Trust Certificate.

This is to certify that the undersigned have received from George H. Littlewood a certificate or certificates for fifty shares, of one hundred dollars each, of the capital stock of the Peoria Gas and Electric Company, to be held as provided in the agreement dated December 19, 1900, between holders of stock of said company and the undersigned, as managers, and the Equitable Trust Company, which said agreement is deposited with the said The Equitable Trust Company, and pursuant to which agreement this certificate is issued, and to all the terms and conditions of which agreement the holder hereof has assented by receiving this certificate. This certificate is not valid unless registered by the Equitable Trust Company, of Chicago, Illinois, as registrar, and is transferable only on the books of the man-

gers on surrender hereof, properly endorsed by the registered
older.

Dated this fourteenth day of January A. D. 1901.

SUMNER R. CLARKE,
JOHN R. WALSH,
Managers.

Signed, sealed and delivered in presence of
—— ——.

1481 Direct examination of SUMNER R. CLARKE resumed by Mr. Tichenor:

148. Look at the papers now shown you marked Exhibits "23" and "24" just read in evidence in this case and state whether or not they bear your genuine signature.

Ans. Yes sir.

148. Do you know whether or not they also bear the genuine signature of John R. Walsh?

A. I should say so; I will call it his signature at least.

150. Do you know whether or not they bear the genuine signature of L. A. Walton?

A. It looks like his signature.

151. State whether or not the agreement referred to in those exhibits purporting to bear date December 19, 1900, is the one to which you have testified as being in the custody of the Equitable Trust Co.?

A. These exhibits refresh my memory with reference to the question you asked me as to when this form of receipt was gotten up. I think I said it was between June and the latter part of August 1901. I will have to correct that answer and say it was near the date of December 19, 1900.

152. State whether or not the agreement referred to in those exhibits is the only one pertaining to the deposit of the stock certificates of complainant company with the Equitable Trust Co. so far as your knowledge extends?

Objected to as incompetent, immaterial and irrelevant.

A. So far as I remember.

153. State whether or not after refreshing your recollection from those two exhibits, you did affix your signature in any capacity to the agreement purporting to bear date December 19, 1900?

Objected to same grounds.

A. I don't remember.

154. Are you able to state from recollection whether or not
1482 you participated in the formation of that agreement of December 19, 1900?

(Objected to same grounds.)

A. I don't remember.

155. Under what authority was it prepared and executed if you know?

(Objected to same grounds.)

A. I don't remember.

156. Have you ever known?

(Objected to same grounds.)

A. I don't remember.

157. State whether or not that agreement as originally executed has ever since been and still is in full force and effect so far as you know.

(Objected to same grounds.)

A. So far as I know, it is.

158. State whether or not since that time there has been executed any agreement as an amendment to it, or as supplemental to it, pertaining to the same subject matter?

Objected to same grounds.

A. Not that I remember of.

159. If upon search in your own office for a duplicate of the agreement purporting to bear date December 19, 1900, you fail to find it will you also prosecute a careful search for the same purpose in the office of the Peoria Gas & Electric Company and if found there produce it?

Mr. RITCHER: I will say right here, if you can find a duplicate we will find it at the office of the company.

The MASTER: I understood Mr. Ritcher to say he would produce the agreement in court.

Mr. RITCHER: Produce the form of the agreement without the signatures and number of shares. I will probably have to send to Chicago for it as I asked Mr. Little this morning if he had a copy of it and he said he had not.

Mr. TICHENOR: I desire to say that we consider it a very
1483 material question, at least we so regard it, that we have the original of that document.

The MASTER: I understand that but you have not taken any steps so far as the master knows to obtain it.

Mr. TICHENOR: I understood the master to say that the copy would be sufficient or asked if it would not be sufficient and my answer to that is, it is not.

The MASTER: If the original is what you desire, there is no use wasting further time asking about a duplicate of it unless you get a duplicate of the original.

Mr. TICHENOR: Certainly that is what I mean. I want Mr. Clarke to produce a duplicate of the original if he can find it.

Mr. RITCHER: He will bring it into court if he can find it, and if there is a duplicate of the agreement in the company's office I will agree to bring it into court if Mr. Little can find it, but I do not desire in that way to admit that either Mr. Clarke or the company is the custodian of any original.

160. How many shares of stock of the Peoria Gas & Electric Co. of the original capitalization did you take and from which you received original stock certificates?

Objected to as incompetent, immaterial, irrelevant and imperti-

nt and an attempt to inquire into the private affairs of the wit-
ss who is not a party to this proceeding.

The MASTER: I do not think it the best evidence. It is apparent
the master there must have been a stock certificate book. It is
evidence that there were certificates of stock issued and the best
idence as to the shares of stock taken by this witness would be
e stock certificate book.

Mr. TICHENOR: Will you produce the stock certificate book, Mr.
itcher?

Mr. RITCHER: I cannot produce it at present. I will have
84 to investigate to find out whether it is held in a fiduciary ca-
pacity; if it is I would not permit the trust company to pro-
ce it. I will be able to tell you by tomorrow morning.

161. Does the stock certificate book correctly show by way of stubs
otherwise the stock certificates of complainant company that have
en issued to you?

Objected to as incompetent, immaterial, irrelevant and an attempt
inquire into the private affairs of the witness not a party to this
it.

A. I never saw the stubs of the stock book.

162. Do you know of any record of the company which does cor-
ctly show the stock which has been issued to you of either the
iginal or the increased capitalization?

Objected to same grounds.

A. Only by supposition. Those things are usually kept.

163. During your connection with the company, have you had
ything to do with a record in any form showing the issue of stock
the different stock holders?

(Objected to same grounds.)

A. I think not.

164. I will ask you again what amount of stock of the original
pitalization of the complainant company was issued to you?

Objected to same grounds as before.

A. I believe that is a personal matter which I should not be
bliged to answer.

165. Then you refuse to answer, do you?

A. At present, yes sir.

166. State whether or not all of the stock of the original capitaliza-
on of complainant company for which you subscribed was issued
you?

Objected to same grounds.

A. I think not.

185 167. To whom other than to yourself was any portion of
the stock represented by that subscription issued?

Objected to same grounds.

A. To John R. Walsh; I don't remember to what other parties.

168. Is it your best recollection that some of the stock in question was issued to others than yourself and to Walsh?

Objected to same grounds.

A. I think it was.

169. Can you state from recollection whether such other parties were residents of Peoria or of Chicago?

Objected to same grounds.

A. I think of both places.

170. To whom in Peoria was any of that stock issued?

Objected to same grounds.

A. I don't remember.

171. How much?

(Objected to same grounds.)

A. I don't remember.

172. How much of it was issued to John R. Walsh?

Objected to same grounds.

A. That I don't remember.

173. How much of it was issued to any other party resident in Chicago?

(Objected to same grounds.)

A. That I cannot remember.

174. How many assessments were made by the company upon the stock which was issued to you?

Objected to on the same grounds as before and on the further ground it has been all gone over by this witness in his former testimony.

The MASTER: I think the witness has already been interrogated on that question but if there is any doubt about it he may answer again.

1486 A. I remember of only one.

175. What was the amount of that, what per cent.?

Objected to same grounds as last question.

A. 20%.

176. Was that on the original capitalization, or was it on the original and increased capitalization?

Objected to as incompetent, immaterial, irrelevant and an attempt to inquire into the private affairs of the witness who is not a party to this proceeding.

177. Are you able to state from recollection the amount of that sessment in dollars?

(Objected to same grounds.)

A. $10,000.

178. What, if any portion of that has been repaid to you?

Objected to same grounds.

A. I do not think that assessment has been repaid.

179. Has any part of it been repaid to you in any form, either a dividend or otherwise?

(Objected to same grounds.)

A. I don't know that I can answer that question just now, I will swer it later on.

180. Can you answer it by reference to books of accounts or other emoranda in your possession?

(Objected to same grounds.)

A. It is from not quite understanding the question; I want to ink it over a little while and I will give you an answer to it.

181. How much of the increased capitalization of the complain-t company was issued to you?

(Objected to same grounds.)

A. That I do not care to answer, it being a private matter.

182. And you refuse to answer, do you?

A. For the present, yes sir.

183. How did the number of shares of the increase issued to you correspond with the number of shares issued to you of the 87 original capitalization?

(Objected to same grounds.)

A. That I do not wish to answer for the present.

184. What did you pay for the stock issued to you from the in-eased capitalization?

(Objected to same grounds.)

A. That I do not care to answer.

85. State whether or not you ever paid anything on such in-eased capitalization shares issued to you?

Objected to same grounds.

A. That I do not wish to answer.

186. Have certificates of any shares of stock of a portion of the creased capitalization been issued to you? In other words, have u received any portion of the increased capitalization in the shape stock certificates?

Objected to same grounds.

A. I will make the same answer as to the other questions.

187. State whether or not all receipts issued by yourself and Mr. Walsh for stock certificates to stockholders in the Peoria Gas & Electric Co. concerning which you have testified, are the same in form as Exhibits "23" and "24" in evidence in this case?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: What difference does it make whether they are in the same form or not—how is that material?

Mr. TICHENOR: I think it material.

The MASTER: He may answer subject to the objection.

A. They were supposed to be the same.

188. Does that apply to the certificates representing the increased capitalization as well as to the original issue?

Objected to same grounds.

A. I think so.

189. State whether or not there is any other contract, or are other contracts, besides the one referred to in Exhibits "23" and "24" purporting to bear date December 19, 1900, pertaining to any matters involved in the deposit of the stock certificates representing the capitalization of the Peoria Gas & Electric Co.?

1488

Objected to as incompetent, immaterial, irrelevant and as already been asked and answered fully by the witness.

A. None that I know of.

190. Is there any persons or corporation other than yourself and Mr. Walsh, in the capacity concerning which you have testified, and the Equitable Trust Co. of Chicago, that have any control whatever or authority concerning those stock certificates?

Objected to as incompetent, immaterial, irrelevant.

A. No one that I know of.

The MASTER: I suppose by that question you mean under the agreement bearing date December 19, 1900?

Mr. TICHENOR: Yes sir.

191. State whether or not within your knowledge any contract of any character has ever been entered into between your company and the Peoria Gas Light & Coke Co. with reference to the gas business in Peoria, or with reference to the certificates of stock representing all or any portion of the capitalization of the two companies severally?

(Objected to same grounds.)

A. Not that I know of.

192. Do you know anything concerning the conditions under which the Peoria Gas & Electric Co. is at present furnishing gas to the Peoria Gas Light & Coke Co.?

(Objected to same grounds.)

A. Not to my personal knowledge.

193. Have you had any knowledge of those facts pertaining to service of that character in the past?

Objected to same grounds.

A. No sir.

194. State whether or not you had anything to do with the
1489 arrangements under which the complainant company began to furnish gas for the Peoria Gas Light & Coke Co.?

Objected to same grounds.

A. No sir.

195. Did you know at about the time it was consummated that it had been done?

(Objected to same grounds.)

A. Not to my personal knowledge.

196. Did you know that as an officer of the company or in any capacity whatever?

(Objected to same grounds.)

A. I think the records in the office would show; I have never seen them and don't know.

197. Is there a record of the Peoria Gas & Electric Co. that will show what you had to do with reference to the arrangement under which that company is now furnishing gas to the Peoria Gas Light & Coke Co.?

Objected to on the same grounds as before and also because the witness has said he didn't have anything to do with it and that the records would show what, if anything, he had to do with it.

THE MASTER: It is possible that there is a record that will show what the board of directors did and the witness may state if he knows whether there is a record in the possession of the company showing what, if anything, he had to do with that arrangement.

A. I think the company has a record of the transaction but that is all I know about it.

198. Do you know in what book that record is?

A. Only by supposition; I suppose it is in the regular record book.

199. The secretary's book you have referred to?

Ans. Yes sir.

200. How long prior to October 24, 1901, was the subject of such an arrangement first taken up between your company and
1490 the Peoria Gas Light & Coke Co. so far as your knowledge extends?

Objected to as incompetent, immaterial, irrelevant.

A. I don't know.

201. How long prior to the date mentioned did you know of it?

Objected to same grounds.

A. That I don't remember.

202. Where were you during the month of October, last year, and the preceding month?

(Objected to same grounds.)

A. I was away part of both months, but I could not tell what part and don't know that I could tell by reference to any memorada at my office. I was at Harbor point part of September and was south part of October.

203. State whether or not any written agreement was entered into between your company and the Peoria Gas Light & Coke Co. covering the subject of such proposed furnishing of gas by your company to the other?

(Objected to same grounds.)

A. Not that I know of.

204. Do you know for how long a period of time such an arrangement has been made? That is to say, how long it is to continue?

A. No sir.

205. Do you know anything about the terms under which your company is furnishing gas to the other company?

Objected to as incompetent, immaterial, irrelevant.

A. I do not.

206. Have you ever known?

(Objected to same grounds.)

A. I never inquired.

207. Have you ever heard the question discussed in any way among the parties interested in your company either directors or officers?

Objected to on same grounds and also because the witness has said he believes it to be a matter of record and the record
1491 would be the best evidence.

The MASTER: I think if he heard a discussion between the manager of the company or directors it would all be merged in what was finally done, no matter what the discussion was, but he may answer the question subject to the objection.

A. I may have heard it talked over but I am not positive.

208. Is there any person connected with your company who had special jurisdiction over a matter of that character?

Objected to as incompetent and immaterial.

A. Yes sir, the general manager, Mr. Little.

209. State whether or not Mr. Little as such general manager also

had authority to fix all terms connected with the furnishing of gas by your company to the Peoria Gas Light & Coke Co., as has been testified to?

Objected to as incompetent, immaterial and irrelevant.

A. Yes sir.

210. Have you at any time since your company began to supply the gas to the Peoria Gas Light & Coke Co. known the quantity that was being furnished?

(Objected to as incompetent and immaterial.)

A. No.

211. Have you at any time known at what rate it was being furnished?

(Objected to as incompetent, immaterial, not the best evidence.)

A. I think not.

212. Are you now or have you at any time since October 24, 1901, been familiar with the methods of handling the accounts pertaining to that gas?

(Objected to as incompetent and immaterial.)

A. No sir.

213. Have you at any time since your service began seen any statements between your company and the Peoria Gas Light & Coke Co. pertaining to that gas or pertaining to any other account?

1492 Objected to same grounds.

A. No sir.

214. Have you at any time during that period had any knowledge of the status of any such account?

(Objected to same grounds.)

A. No sir.

215. Who first, if you know, suggested an arrangement with respect to your company's furnishing gas to the Peoria Gas Light & Coke Co.?

(Objected to same grounds.)

A. I don't know.

215. When did you for the first time, if at all, learn that the Peoria Gas Light & Coke Co. propose to discontinue the manufacture of gas?

(Objected to same grounds.)

A. I don't remember.

216. Are you acquainted with the management of the Peoria Gas Light & Coke Co. as it has existed since the latter part of April, 1900?

Ans. No sir.

217. Do you know who the stockholders are?

Objected to as immaterial.
The MASTER: I do not see the materiality of it.
Mr. TICHENOR: I would like to have the question answered.
The MASTER: He may answer subject to the objection.

A. No sir.

218. Are you able to state from recollection how frequently since the month of December, 1900, the board of directors of the Peoria Gas & Electric Co. have held meetings?

Objected to as incompetent and immaterial.

A. Only by reference to the records.

219. Are you able to state how many of such meetings you have personally attended?

(Objected to same grounds.)

A. No sir.

220. You were asked this morning respecting a duplicate
1493 of the agreement you testified was deposited with the Equitable Trust Co. of Chicago? Did you succeed in finding that document?

A. I did not and I made up my mind that there was none made. I talked the matter over with Mr. Little and he said there was no duplicate made and after talking it over I remembered there was none I do remember the original but it is not in my possession and Mr. Little says there was no duplicate made.

221. In the former part of your examination you were asked how much of the increased capitalization was issued to you and how much to others and you stated you could not tell without reference to the records but could tell from such record? Are you now prepared to answer that question?

A. I have refused heretofore to state the number of shares I had, it being a personal matter, and I do not want to do it now unless obliged to.

222. I understand you still refuse to answer as to your own stock?

Ans. Yes sir.

223. Have you the information at this time from which you could testify as to that item?

Ans. Yes sir.

224. Are you also prepared to answer how much of the increased capitalization was issued to others than yourself?

A. I could not answer that for I have not the information.

225. There are records that will show those facts, are there not?

Ans. Yes sir.

226. Where are they?

A. I think they are with the transfer agent in Chicago—the Equitable Trust Co. I answered you yesterday I thought they were

in the possession of Mr. Little but I find on investigation that I was mistaken about that.

227. In the former part of your examination you stated that the records of the company would show where the stock certifi-
1494 cates issued to you from the original capitalization now are—can you now answer that question?

Objected to as incompetent and immaterial.

A. With the Equitable Trust Co. in Chicago. You previously asked me, "Does your company or any of its officers keep a certificate book." I find on investigation it does. You previously asked me whether, "You as president of the company have ever seen such certificates as have been issued either of the original stock or the increase." I answer that now, yes.

228. Did you sign all of them—are you able to answer now?

A. No, I am not able to answer that. You asked me the question yesterday, "State whether or not you have ever at any time either in your official capacity as president of the company or otherwise seen any agreement, contract or other document pertaining to the holdings of any or all of the present capitalization of your company." My answer to that is, not as an officer but as an individual. You asked me also, "In what capacity did you and Mr. Walsh issue the receipts for stock certificates to which you have referred," and I said I had forgotten how they were signed. I now answer, as trustees. You also asked me, "State whether or not you have given such receipts for the entire capitalization of complainant company as it is at the present time." I answer, the Equitable Trust Co. is registrar of receipts and transfer agent; the book of receipts is signed in blank and the trust company issues them on a deposit of the stock; the trust agreement authorizes any stock holder to deposit his stock and get a receipt if he wants it.

(The MASTER:)

229. Then you don't know whether or not yours and Mr. Walsh's receipts as trustees have been issued for all this stock—you don't know whether it has all been deposited or not?

A. No sir, I do not; anybody can get one of those receipts
1495 on depositing their stock.

(Mr. TICHENOR:)

230. In your examination you have declined to answer for the present a number of questions that have been propounded to you. Do you desire to consider further for the purpose of determining whether or not you will answer those questions and report your decision at a later sitting of the court?

A. Yes sir.

231. Will you report your decision tomorrow morning?

A. I would prefer to have my last testimony written out so that I may look it over and then answer.

232. That is, you mean to report as to whether or not you will answer any or all of the questions now under consideration?
A. Yes sir, I will come in at any time.

THEODORE J. MILLER, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Theodore J. Miller that formerly testified in this case?
Ans. Yes sir.
2. Have you with you the secretary's book of the complainant company?
Ans. It is here.
3. Will you produce it?

Mr. RITCHER: I have it here.
Mr. TICHENOR: Will you let me look at it?
Mr. RITCHER: No sir.
Mr. TICHENOR: I want to examine it and examine this witness with reference to it.
Mr. RITCHER: I will say here to expidite this hearing that while we insist it is not competent, relevant or pertinent, we are ready to produce this secretary's book and have an officer of the
1496 company—preferably Mr. Little because he knows more about the business than anyone else—indicate what portions thereof refer to the gas business of the company and give counsel for defendant free access to those portions. We do not propose to turn over the record to enable counsel to pry into other business of this company which has nothing to with the issue in this case. We are perfectly willing, after Mr. Little indicates what portions pertain to matters material to the issues here, to submit the entire book to the master to determine whether anything has been omitted that is pertinent to matters material to the issues; but I think we should not be called upon to throw open a record of a company that is incorporated to do other business, and is doing other business, and permit counsel for defendant to go into other business of the company to determine whether it will be of any advantage to them in some other matter or not.
The MASTER: Is the stipulation of counsel satisfactory?
Mr. TICHENOR: I think not.
The MASTER: The rule is, as I understand it, to entitle you to the production of books, an affidavit must be filed setting out what the books contain which you desire to inspect as applicable to the matters in controversy. I do not think the master should permit you to go into the books for the purpose of a general investigation of their contents irrespective of its relevancy to the issues in the case.
Mr. TICHENOR: It seems to me as though it would be impossible for counsel for complainant from their standpoint to select the mate-

rial which in our judgment is proper and necessary for the defendant to have in this case.

The MASTER: The stipulation is broader than that. They propose to submit the whole record to the master for investigation to determine whether or not the matters indicated by the
1497 officer of the company are broad enough to cover the inquiry made by the issues in this case. Now, the master has an equal right with counsel to call for any books and testimony he may deem pertinent to such issues.

Mr. RITCHER: The master will certainly respect the rights of privacy as to questions not in issue here.

The MASTER: Yes sir, the master will undertake to protect that right so far as it is afforded within the limitations of the law. I do not think any court has ever laid down the rule that the books of a corporation or firm *is* open to inspection for any and all purposes.

Mr. TICHENOR: We do not maintain that, but from the very nature of the case it is impossible for us to indicate definitely in advance precisely the portions of the book we desire to use.

The MASTER: I am inclined to think my recollection of the rule is substantially correct. I do not think I have any right under the rules of evidence to admit anything more than I have indicated and unless counsel can show me I am wrong I will adhere to my ruling already announced. I think counsel should indicate, by taking a little time, those matters in controversy they desire to make proof of from the record of the minutes of the proceedings of this company and if that is done, as has already been indicated by counsel for complainant, that portion of the record will be submitted to counsel for defendant for their examination and use in this case. I will not unless it is insisted on by counsel for complainant require the filing of an affidavit in this case, as I understand the rule requires, because counsel for complainant is not insisting on that, but I do not think, Mr. Tichenor, the master has any authority under the law to go any further in that matter than has been already indicated.

If upon an examination of the record the master finds that
1498 matters not indicated by counsel for defendant has not been called to Mr. Little's attention and the records have not been opened to your inspection on matters material to the issues, the master will direct an inquiry on such matters as he finds are material. That privilege is accorded by counsel for complainant in the stipulation.

Do you desire to ask Mr. Miller any further questions?

Mr. TICHENOR: I think not.

Adjourned by agreement until Thursday, May 8, 1902, 10 a. m.

United States circuit — room, Government building,

PEORIA, ILLINOIS,
THURSDAY, *May* 8, 1902—10 o'clock a. m.

Parties met pursuant to adjournment,

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

PHILO B. MILES, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Philo B. Miles who has testified once before in this case?

Ans. Yes sir.

2. Were you subpœnaed yesterday or today to produce in court this morning certain documents?

A. I was subpœnaed this morning.

3. Have you those documents with you?

A. Yes sir, here are the certificates of stock you want or receipts rather. (Witness handing papers to counsel.) I think these are all the receipts I have so far as I know.

4. Preliminary to an examination upon these documents you have produced, I desire to ask you a few questions. My recollection is you testified in your former examination that within
1499 your knowledge but one stock assessment was ever made upon the stock of the Peoria Gas & Electric Co. and that was a 20 per cent. assessment?

A. That was the total assessment but I don't remember whether it was made in one assessment or not.

5. That was the only assessment ever made, so far as you know?

Ans. Yes sir.

6. And I think you testified you paid that 20 % assessment?

A. Yes sir.

7. State whether or not any portion of that has been paid back to you up to the present time?

Objected to as incompetent, immaterial, being a private matter of the witness with the company and not a subject of inquiry in this case, also assuming it was a part of this particular money that was paid back.

The MASTER: The witness may answer subject to the objection.

A. Yes sir, it was all paid back.

8. Are you able to state when that money was paid back to you?

Objected to as incompetent and immaterial and being a private

atter between the company and the witness is not a subject of in-
iry in this case.

A. I don't renember, it seems to me it was some time last fall.

9. Have you any record or memorandum or account that will
ow exactly when it was paid back?

Objected to as incompetent and immaterial.

A. I think so.

10. I wish you would make an examination and ascertain what
at date was and report it.

A. I will do that.

500 11. State whether or not you received in the way you have testified the exact sum which you paid on that 20 per cent. ssessment or more.

(Objected to same grounds.)

A. My impression is I received a little more than the original nount but I have forgotten how much; it seems to me there was me interest or something figured in.

12. Have you a record of some character which will disclose that ct also?

(Objected to as immaterial.)

A. The only record I have, I think, is a record showing the nount of money I received and the date.

13. I wish in making your examination you would also take into count the exact amount you received. State in what form that is repaid to you, whether by check, in currency or a draft?

Objected to as incompetent and immaterial.

A. My impression is it was paid by check or draft, I am quite rtain it was.

14. Who gave you the draft or check, if it was paid in that form?

(Objected to as immaterial.)

A. I think it was Mr. Little, the general manager of the com-
ny.

15. Did Mr. Little make any statement or explanation at that
ne?

Ans. I think not; none that I remember of.

16. When did you for the first time know that money was to be
id to you?

(Objected to as incompetent, and immaterial.)

A. When he gave me the check or draft, whichever it was.

17. Do you know, or have you ever known, why that money was
id to you?

(Objected to same grounds.)

A. No sir.

18. What if any inquiry did you make of Mr. Little at the time this check was given to you as to its purpose?

A. Made no inquiry.

1501 19. What, if any, arrangement was ever made with you in reference to the amount which you should be called upon to pay on your subscription to the original capitalization?

Objected to as incompetent, immaterial and assuming there was an arrangement made.

The MASTER: The question does not assume anything; he may answer subject to the objection.

A. There was no arrangement at all made with me.

20. State whether or not you remember the fact of the increase of the capital stock of complainant company?

Objected to as immaterial.

A. I remember that the capital stock was increased but I don't remember the particulars about it for the reason I was away, I think, at the time or something and was not present at the meeting; I happened to be away from home when there were two or three meetings called.

21. State whether or not you received any portion of that increased stock?

(Objected to as immaterial.)

A. Yes sir.

22. How many shares?

(Objected to as immaterial.)

A. 28.

23. Of what par or face value?

Objected to as immaterial.

A. $100. each.

24. What did you pay for those additional shares?

Objected to as immaterial, incompetent, irrelevant and an attempt to inquire into the private affairs of the witness who is not a party to this proceeding.

Mr. TICHENOR: In this case the witness is my own client and not yours; most of the others have been yours.

The MASTER: I think that objection is futile anyway; that 1502 is a privilege the witness can claim and not counsel. If the witness desires to avail himself of that privilege he can do so, otherwise he may answer subject to the objection.

A. I have never paid out any money yet.

25. State whether or not you have ever given any paper or other obligations for those additional shares?

Objected to as incompetent and immaterial.

A. No.

26. Prior to the time those additional shares were issued to you, state whether or not you signed any subscription list or expressed your desire to have them, either to the company or its management?

(Objected to same grounds.)

A. I don't think I did; I signed some papers for Mr. Clarke and Mr. Little but I don't remember how many; I don't think, though, I signed any for any additional stock.

27. When did you for the first time know that you were to get additional stock?

Objected to as incompetent, immaterial, irrelevant.

A. I did not know I was to get this last certificate until I got it.

28. Look at the papers now shown you which you have produced this morning, marked by the master "Exhibits 25" and "26," and state the circumstances under which they came into your possession?

Objected to same grounds.

A. It seems to me, although I am not certain, that I received the certificate for 25 shares in the place of another certificate I had for 25 shares of stock in the Peoria Gas & Electric Co.

29. To which exhibit are you now referring?

A. Exhibit "25."

30. From whom did you receive it?

1503 Objected to as immaterial.

A. I don't know whether I received it from the manager here or from Chicago.

31. State whether or not it is now in the same condition as it was at the time it came into your possession originally?

Objected to as immaterial.

A. Yes sir.

32. What was the amount of your original stock subscription?

Objected to as immaterial and not the best evidence.

The MASTER: I think that is true.

Mr. TICHENOR: I would like to have the witness answer.

The MASTER: He may answer subject to the objection.

A. 25 shares—$2,500.

33. And those shares were issued to you, were they?

Objected to same grounds.

A. Yes sir.

34. What, if anything, did you do with your original certificate

for the 25 shares of stock in complainant company at or about the time you received the paper marked "Exhibit 25"?

Objected to as incompetent and immaterial.

A. If I remember it, I delivered it to the manager of the company and received this in return.

35. Do you refer to Mr. Little?

A. I am not certain just who I delivered that to, I paid so little attention to it at that time.

36. Has your original stock certificate been in your possession at any time since you surrendered it?

Objected to as immaterial.

A. No sir, nor have I seen it since I received this.

37. Within your own knowledge, where is it?

Objected to as incompetent and immaterial.

1504 A. I don't know where it is.

38. When with reference to the date it bears, did you receive Exhibit "26"?

(Objected to as immaterial.)

A. I must have received that certificate somewhere about the 28th of August, 1901, the day of its date, although I am not certain I received it just at that time.

39. State whether or not the certificate issued to you for 28 shares of the increased capitalization, as you have testified, had been delivered to you prior to the time you received Exhibit "26"?

(Objected to as immaterial.)

A. No sir.

40. When was the original stock certificate for the 28 shares delivered to you?

(Objected to as immaterial.)

A. I don't know how that is, I paid so little attention; I got these papers and had our boys put them in the safe and I paid so little attention I could not tell whether that was given to me for 28 shares I had had before or not; I am inclined to think not.

41. Would your record, or any memorandum in your office, show whether or not that certificate had actually been issued to you?

(Objected to as incompetent and immaterial.)

A. No sir, I think not for the reason this was a personal matter and our books and papers generally contain only a record of our firm business.

42. And you do not keep personal books that will show matters of that kind?

Ans. No sir.

43. Do you know where the certificate of stock for which that receipt Exhibit "26" was given is?

(Objected to as immaterial.)

A. No sir.

44. Have you ever seen it since that receipt was given to you?

Objected to as immaterial.

A. No sir.

1505 45. State whether or not you signed the agreement referred to in each of the exhibits you have identified as bearing date December 19, 1900?

Objected to as incompetent, immaterial, not the best evidence.

A. Yes sir I did.

46. Who presented it to you for your signature?

Objected to as immaterial.

A. Mr. Little and Mr. Sumner R. Clarke, as I remember it.

47. What, if any, conversation did you have with them at that time with reference to it?

Objected to as immaterial, incompetent, irrelevant and calling for conversations occurring before the execution of the instrument.

A. I think I told them in the first place I did not know whether I would sign it or not; they wanted to know what was the reason.

48. Do you remember which one it is that made that inquiry?

A. No, I don't remember whether it was Mr. Clarke or Mr. Little.

49. What reason if any did you give?

Objected to as incompetent and immaterial.

The MASTER: I don't think that material.

Mr. TICHENOR: I would like to have him answer it.

The MASTER: He may answer subject to the objection.

A. Well, I was a little dissatisfied with the way matters had gone.

50. What did you tell them at that time?—what was your reply to them?

(Objected to same grounds.)

The MASTER: I don't think that competent, for I don't think any reason he gave at the time could bind the company in any way, but, as you desire to press the question, the witness may answer

1506 subject to the objection.

A. I told them that the management of the company, or somebody, had raised the price of gas instead of lowering it and I didn't think we had treated the people exactly fair or according to our representations and under those circumstances I did not know whether I would sign the paper or not.

Mr. RITCHER: Complainant objects to the answer on the same grounds that the question was objected to and moves the court to exclude it.

51. State whether or not you had at that time seen the agreement to which referrence has been made and concerning which you have been testifying?

(Objected to as incompetent and immaterial.)

The MASTER: He has already said he signed it; how does it become material whether he signed it at that time or not?

Mr. TICHENOR: I don't know whether it is material or not; I will see later. I would like to have the question answered.

The MASTER: He may answer.

A. I did not sign it at that time. (Mr. Clarke said he would come in again with the paper sometime when I was not very busy.)

Complainant objects to that part of the foregoing answer enclosed in brackets as not responsive, and moves the court to exclude it.

52. What if anything further did Mr. Clarke or Mr. Little say to you concerning the subject?

Objected to as incompetent and immaterial, irrelevant and hearsay.

A. Mr. Clarke said, "This matter will come out all right and satisfactory to you, I think, in the long run but," he said, "you are busy and I will come in again."

53. Did Mr. Clarke or Mr. Little, or both of them, return to you for the same purpose?

1507 Objected to as incompetent and immaterial.

A. Mr. Clarke came in later.

54. And it was on the occasion of the second visit you signed it, did you?

Ans. Yes sir.

55. On that second visit did you have any conversation with Mr. Clarke further pertaining to that subject?

Objected to as incompetent, immaterial and irrelevant.

A. Mr. Clarke repeated what he had said before; he said, "I am satisfied this gas question will come out all right in the end and satisfactory to you." And I am inclined to think he said, "Things cannot always go exactly as you want them to," or something of that sort.

56. Have you since that time had any conversation with either of them with reference to the same subject?

Objected to same grounds.

The MASTER: I don't think that competent.

Mr. TICHENOR: I would like to have him answer it.

The MASTER: He may answer it subject to the objection.

A. No sir, I don't think anything has been said to me on that subject since by either Mr. Clarke or Mr. Little.

57. State whether or not you have had any conversations with any person whose name is affixed to "Exhibit 19" with reference to the increased price of gas except as you have now stated?

Objected to as incompetent, immaterial and irrelevant and because the witness has already been interrogated fully on his previous examination with reference to all that took place between himself and the other parties whose names are affixed to "Exhibit 19."

The MASTER: I don't think it competent unless it is confined to officers who were charged with the management of the affairs of complainant company.

1508 Mr. TICHENOR: I would like to have it answered.

The MASTER: He may answer subject to the objection.

A. Yes sir, I had a conversation with Ben Warren, Jr.

58. What was that conversation?

Objected to same grounds as last interrogatory was objected to.

The MASTER: Whether that be true or not, I am inclined to think, as already suggested, unless the conversation was had with officers charged under the law with the management of the company's affairs, it is not competent, especially a conversation had subsequent to the adoption of this ordinance in question.

Mr. TICHENOR: I would like to have the question answered.

The MASTER: He may answer subject to the objection.

A. The conversation was with regard to the price of gas that had been established by the company. Mr. Warren and I were taking breakfast together in Chicago and he said he had just ascertained that the company had made a price for gas—I don't remember just what that price was but it seems to me it was $1.25 gross and $1.15 net. Both of us thought—Interrupted.

The MASTER: State the conversation and not your conclusions.

The WITNESS: I said to him that was considerably higher than we had thought the company would establish the price and he agreed with me—

(Objected to.)

The MASTER: State what was said.

The WITNESS: I am trying to get at what was said as nearly as I can but I don't think it would read very well if I told all I said and all he said.

The MASTER: That is not for you to determine; the conversation has been asked for and admitted over the ruling of the master, now state the conversation as nearly as you can.

The WITNESS: I do not want to do that.

Mr. TICHENOR: I will not press the question under the statements of the witness.

1509 Defendant's counsel offers in evidence the two documents identified by the witness marked by the master "Exhibits 25" and "26."

Objected to as incompetent, immaterial and tending to prove no fact in issue in this case and not tending to connect the complainant or defendant in this case in any way with the transaction therein alleged and also because it is a private matter between individuals not parties to this proceeding and private documents of the witness.

The MASTER: I suppose counsel for complainant has no objection to these documents going in the record the same way Exhibits "23" and "24" were put in.

Mr. IRWIN: We object to their substituting copies.

Mr. TICHENOR: I will read them into the record, then.

The MASTER: I think not. You may ask leave to substitute verified copies of them and the master will grant that leave.

Mr. TICHENOR: I desire to do so.

The MASTER: You may substitute verified copies of the originals for the record.

Whereupon said documents were read to the master in the words and figures following: to-wit:

1510 EXHIBIT "25." I. C. Pinkney, Master.

Peoria Gas and Electric Company.

Incorporated under the laws of Illinois.

No. 8. 25 shares.

Stock Trust Certificate.

This is to certify that the undersigned have received from Philo B. Miles a certificate or certificates for twenty-five shares of one hundred dollars each, of the capital stock of the Peoria Gas and Electric Company, to be held as provided in the agreement dated December 19, 1900, between holders of stock of said company and the undersigned, as managers, and the Equitable Trust Company, which said agreement is deposited with the said The Equitable Trust Company, and pursuant to which agreement this certificate is issued, and to all the terms and conditions of which agreement the holder hereof has assented by receiving this certificate. This certificate is not valid unless registered by the Equitable Trust Company, of Chicago, Illinois, as registrar, and is transferable only on the books of the managers on surrender hereof, properly endorsed by the registered holder.

Dated this fourteenth day of January A. D. 1901.

SUMNER R. CLARKE,
JOHN R. WALSH,
Managers.

Signed, sealed and delivered in presence of

—— ——.

1515 Cross interrogatories by Mr. IRWIN:

1. I understood you to say you paid an assessment of 20 % on the stock subscribed by you?

Ans. Yes sir.

2. That was paid on call from the board of directors of the company, as you understood?

Ans. Yes sir.

3. You testified about receiving some money back—do you know who paid you that money?

A. Mr. Little, I believe handed me that check or draft.

4. Do you know where that money came from that was paid to you?

Ans. I don't remember who signed the check or draft.

5. As a matter of fact, you don't know whether that money came from the complainant company or not do you?

Ans. No sir.

6. And when you say that money was returned to you, you don't know whether it was that particular money or was intended to be a return of that particular money or not, do you?

A. I understood it was a return of the money I had paid.

7. Don't state what you understood. As a matter of fact, you don't know whether it was intended to be a return of that particular money or whether it came from the company or not do you?

A. No, I do not.

8. I understood you to say that this receipt you hold marked "Exhibit 26" was a part of your share of the increased capitalization stock?

Ans. That is what I understood.

9. Of your own knowledge, do you know whether that is so or not?

Ans. I don't remember that I said it was my share of the increased stock; I remember of saying it was stock I received—increase stock.

11. You didn't pay anything for that stock?

Ans. No sir.

12. You still retain it, however, and still claim it?

A. Yes sir.

13. As a matter of fact, you don't know whether this "Exhibit 26" represents a part of the increased stock or original stock of the company, do you?

1516

A. No, I do not personally; as a matter of fact, I don't know what it represents.

Re-direct interrogatories by Mr. TICHENOR:

1. Have you any knowledge as to why 28 additional shares were issued to you instead of 25?

Objected to as not proper re-direct, incompetent and immaterial.

The MASTER: I don't think it proper re-direct, still I think it competent and the witness may give his own knowledge on the subject.

A. No sir.

2. At the time you signed this agreement referred to in the two exhibits you have produced was it one copy or was it in duplicate or triplicate?

(Objected to as incompetent and immaterial.)

A. I don't remember.

OLIVER J. BAILEY, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Oliver J. Bailey that has testified once before in this case?

Ans. I am.

2. Were you subpœnaed last night or this morning to produce certain papers in connection with this inquiry?

A. I was so subpœnaed this morning and I have the papers with me.

3. As I remember your former testimony, you testified you paid a 20 % assessment upon your stock subscription to the original capitalization?

1517 A. As I recollect it, I was not asked that question.

4. Did you pay any assessment upon your original subscription?

Ans. I paid a 20% assessment upon my original stock subscription.

5. State whether or not that was the only assessment made within your knowledge?

A. That was the only assessment I had knowledge of; the only assessment paid by me.

6. State whether or not any portion of that assessment paid by you has been refunded in any form?

Objected to as incompetent, immaterial, irrelevant and inquiring into the personal affairs of the witness who is not a party to this suit.

A. I received a return of the amount advanced by me as an assessment supposed to be a return of such assessment.

7. Was the amount received exactly the same as the amount paid by you on that assessment or was it greater, if you remember?

A. It was the same so far as the cash return was concerned.

8. In what form was that paid, if you remember?

Objected to as immaterial.

A. It was either by draft or check; I think it was a check.

9. Can you state from recollection whose check it was?

Objected to as immaterial.

A. My recollection is not absolute but I think the check was signed by Mr. Little, the general manager of complainant company.

10. Who presented it to you or did it reach you through the mail?

(Objected to as immaterial.)

A. It was presented to me at my office; I think it was presented to me by a clerk from the complainant company's office who
1518 brought with the check a form of receipt for me to sign and I signed such receipt.

11. State whether or not any explanation was made to you at that time with reference to the check or refund?

A. I don't think there was at the time.

12. State whether or not you had ever receive- any explanation for the payment of that money to you?

Objected to same grounds and also calling for something the witness might have heard on the street corner and not from anyone in authority.

Mr. TICHENOR: I am speaking with reference to people connected with the complainant company only in an official capacity.

A. So far as I recollect not subsequent to its return to me.

13. State whether or not prior to the time the payment was made to you you knew it was to be done?

Objected to as incompetent and immaterial.

A. I don't know that I knew it was to be done. (But I was not greatly surprised when I received it.)

Complainant objects to that part of the answer enclosed in brackets as not responsive and moves the court to exclude it.

14. At the time you signed the subscription list for the original capitalization, state what if any arrangement you had with the company or with the others signing the same list with reference to the amount which you should be required to pay upon your subscription?

Objected to as incompetent, immaterial and irrelevant and also on the ground that when he signed the subscription as appears by the evidence there was no company to contract with, as it was not fully organized; also, because no one was authorized to contract with the company at that time.

A. I never had any understanding with anyone that I would not be called upon to pay the full amount of my stock subscrip-
1519 tion in assessments.

15. Will you now produce the papers—Interrupted.

Mr. RITCHER: In order to shorten the matter, the complainant will admit that Mr. Bailey holds certificates in the same form as Mr. Miles, the preceding witness, holds them in every respect, except the name and amount. I don't think the witness ought to be asked to disclose the amount of his holding in the company unless the witness is willing to state.

Mr. TICHENOR: If the witness will not disclose that, he has a right to refuse. I desire to ask some questions in regard to it.

16. Will you produce the papers you were required by the subpœna to produce?

A. I believe these are the papers the subpœna calls for. (Papers produced by the witness marked "Exhibits 27" and "28" for identification.)

17. Look at "Exhibits 27" and "28" now shown you and state when you received Exhibit "27" with reference to the date it bears?

Objected to as immaterial.

The MASTER: I don't see in view of the stipulation why it is necessary to go into that inquiry.

Mr. TICHENOR: If they will make a stipulation that covers all the inquiry we will accept it.

Mr. RITCHER: If the stipulation is not to be accepted, we would like to withdraw it.

The MASTER: It may stand.

A. I think near its date January 14, 1901.

18. State whether or not at or about that time you surrendered on that receipt your original stock certificate given complainant company?

(Objected to as incompetent and immaterial.)

A. I had surrendered my stock certificate prior to that time, and taken a temporary receipt which was to be held and to be
1520 surrendered on presentation of this receipt.

19. To whom did you surrender your original stock certificate?

Objected to as immaterial.

A. I think I surrendered it to the clerk of the complainant company on the request of Mr. Little, the manager, that I do so.

20. Can you state in a general way about how long before this permanent receipt was given to you you surrendered your certificate as you have stated?

A. I could not say certainly but I think some 10 days prior to that time.

21. Do you know of your own knowledge where your original stock certificate is or has been since the time you surrendered it, as you have testified?

A. Not beyond what is shown on the face of this receipt.

22. Have you seen it since that time?

Ans. I have not.

23. State whether or not you received any other stock certificate or any part of the capital stock of complainant company?

A. I received the certificate marked "Exhibit 28."

24. I mean the original stock certificate for shares—not the receipt?

Objected to as incompetent, immaterial and irrelevant.

A. No sir, I never received any other stock certificate than the one I have already referred to.

25. When with reference to its date did you receive the stock certificate receipt you have identified marked "Exhibit 28"?

Objected to same grounds.

A. I think near its date, I don't remember exactly.

26. When did you for the first time know you were to receive that receipt?

(Objected to as immaterial.)

A. Only a short time prior, I knew or had reason to believe I would receive a receipt for some amount but I did not know what amount.

1521 27. State whether or not such advice came to you through complainant company or any of its officers?

Objected to as incompetent and immaterial.

A. Yes sir, that advice came to me through Mr. Little, the manager of the company.

28. State whether or not at that time, or at any other time, he made any explanation to you why you were to receive that additional stock?

(Objected to same grounds.)

A. Well, his explanation in general terms was that the capital stock had been increased and by virtue of my original certificate I was entitled to the benefit of the increase.

29. What if anything had you to do with increasing the capital stoke of complainant company?

(Objected to as immaterial.)

A. So far as I remember I had nothing to do with it and knew nothing about it.

30. So you know why the capital stock was increased?

Objected to as incompetent, immaterial; not the best evidence.

A. I have no specific knowledge along that line.

31. What did you pay for the shares of stock represented by certificate receipt Exhibit "28"?

Objected to as incompetent, immaterial, and being a private matter of the witness—Interrupted.

The MASTER: The witness is one of the oldest members of the Peoria bar and he can claim the exemption if he desires to; he understands the rule of law as well as anybody connected with this case.

A. I paid nothing for such certificate receipt except as I paid for it through the earning power of the original certificate issued to me.

32. You never paid any money for it?
Ans. No.

1522 33. Have you ever seen the stock certificate for which the receipt Exhibit "28" was given?

Ans. I never have.

34. Do you know where it is?

A. I do not except as is stated on the face of the receipt.

35. State whether or not you signed the agreement referred to in that receipt purporting to bear date December 19, 1900?

Objected to as immaterial.

A. I did.

36. Who presented it to you?

(Objected to as immaterial.)

A. My recollection is that agreement was presented to me by Sumner R. Clarke.

37. Are you able to state from recollection whether it was in duplicate or in triplicate?

Objected to as incompetent and immaterial.

A. I am quite sure it was in duplicate and possibly in triplicate.

38. State whether or not you had any conversation with Mr. Clarke at the time of its presentation to you with reference to the subject matter then under consideration?

Objected to as incompetent and immaterial.

A. If I did it was only general in its nature and I have no specific recollection of it at this time.

39. Have you seen that agreement since about the time you signed it?

(Objected to same grounds.)

A. No sir.

40. Do you know where it is?

(Objected to same grounds.)

A. I do not.

41. What, if any, stockholders' meeting of the company have you attended since December 19, 1900?

Objected to as already gone over in the former testimony of the witness.

1523 A. I am unable from recollection now to fix any definite dates of the stockholders' meetings I have attended; I can only say the last stockholders' meeting I attended was the one shortly prior to the fixing of the gas rate that was to prevail in Peoria.

42. Does your answer refer to the rate fixed on or about July 31, 1900, and for the purpose of refreshing your recollection I will call

your attention to that portion of defendant's answer pertaining to that subject.

Objected to as incompetent and immaterial.

A. I could not say with certainty but I think it was at a later date than that.

Defendant's counsel offers in evidence the original documents identified by the witness marked "Exhibits 27" and "28" and asks leave to substitute verified copies for the record in place of the originals.

Objected to as incompetent, immaterial and improper.

The MASTER: Verified copies may be substituted for the originals and the documents admitted subject to the objection.

Whereupon said documents were read to the master in the words and figures following, to-wit:

1524 EXHIBIT "27." I. C. Pinkney, Master.

Peoria Gas and Electric Company.

Incorporated under the laws of Illinois.

No. 2. 25 shares.

Stock Trust Certificate.

This is to certify that the undersigned have received from O. J. Bailey a certificate or certificates for twenty-five shares of one hundred dollars each, of the capital stock of the Peoria Gas and Electric Company, to be held as provided in the agreement dated December 19, 1900, between holders of stock of said company and the undersigned, as managers, and the Equitable Trust Company, which said agreement is deposited with the said The Equitable Trust Company, and pursuant to which agreement this certificate is issued, and to all the terms and conditions of which agreement the holder hereof has assented by receiving this certificate. This certificate is not valid unless registered by the Equitable Trust Company, of Chicago, Illinois, as registrar, and is transferable only on the books of the managers on surrender hereof, properly endorsed by the registered holder.

Dated this fourteenth day of January A. D. 1901.

SUMNER R. CLARKE,
JOHN R. WALSH,
Managers.

1525 (Indorsed on lefthand side.)

Registered this seventeenth day of January 1901.

THE EQUITABLE TRUST COMPANY, *Registrar*,
By L. A. WALTON, *Vice-President.*

Entered:
C. HUNTOON,
Transfer Clerk.

(Indorsed on back.)

Know all men by these presents, that —— —— the undersigned, for value received, have bargained, sold, assigned, transferred, and by these presents do bargain, sell, assign and transfer unto —— —— all the property, right, title and interest represented by the within certificate, subject, however, to all the terms and conditions of the agreement referred to therein, and do hereby constitute and appoint —— —— true and lawful attorney, irrevocably, for — and in — name and stead, but to — use, to sell, assign, transfer and set over all said property, right, title and interest, and for that purpose to make and execute all necessary acts of assignment and transfer, and one or more persons to substitute with like full power, hereby ratifying and confirming all that — said attorney or — substitute or substitutes shall lawfully do by virtue hereof.

Signed, sealed and delivered in presence of
—— ——.

1529 ROBERT D. CLARKE recalled on behalf of defendants, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Robert D. Clarke who formerly testified in this case?

Ans. I am.

2. Have you been served with a subpœna to produce certain papers in connection with this inquiry?

Ans. I have.

3. Have you those papers with you?

A. I have not; I looked for them but I could not locate them this morning; I thought I had some but I don't believe I have got them unless my father has them.

4. Will you make further search for them and produce them if you can find them?

Ans. Yes sir, if I can find them.

5. My recollection is you testified on your former examination you had paid a 20 per cent. assessment on the amount of the original capitalization of the complainant company subscribed for by you?

A. I don't think I testified to it but I think I paid that or the assessment was paid for me.

6. State whether any portion of that assessment has been paid back to you in the form of dividends or otherwise?

Objected to as incompetent and immaterial.

A. I have received no dividend.

7. State whether or not any money has been paid to you since that time by the complainant company or anyone connected with it?

Objected to same grounds.

A. It has been paid to me direct, as I recall.

8. State whether or not you have ever sold any part or portion of the shares of stock covered by your original subscription in the complainant company?

Objected to as incompetent, immaterial and a private mat-
1530 ter of the witness he is not required to divulge unless he sees fit.

A. I think, if my recollection serves me right, I endorsed my original stock over for a loan.

9. Did you ever sell the shares?

A. No, not to dispose of it or receive anything for it.

10. State whether or not any part or portion of the amount you paid on your 20% assessment on the stock has ever been paid back to you?

A. It might have been paid to me and I would not have known it; I recall something of that kind but I don't know whether it was paid to me and endorsed over on some papers or whether I received it myself.

11. Who paid it to you?

Ans. I don't recall.

12. Was it paid to you by F. W. Little, general manager of the complainant company?

Objected to same grounds.

A. I think not.

13. State whether or not it came through that office?

A. I think not.

14. State whether or not it came through the Equitable Trust Co. in Chicago or John R. Walsh?

Objected to as incompetent and immaterial.

A. My memory is pretty vague on that matter, I don't recall much about it.

15. Do you remember of paying the 20% assessment on your stock?

(Objected to same grounds.)

A. I remember of making arrangements to pay it; I did not pay it myself.

16. What amount of money was paid back to you, as you have testified?

Objected to because witness has not testified to any money
1531 having been paid back to him.

A. I don't recall.

17. Have you any memorandum of any character that will refresh your recollection upon that question.

Objected to as incompetent and immaterial.

A. I have an entry of the stock on my books carried as $1.00.

18. Why is it carried in that form?

A. I carry a great many matters and a great many things in that form; if I receive any stock I carry it as a dollar so I will not fool myself on book entries.

19. How many payments have you ever received back on account of the assessment which you state you paid on your stock subscription?

Objected to as assuming he did receive any back; the witness has stated he never received any dividend back so far as he knows.

The MASTER: I think that is true but he may answer.

A. I do not recall much about this matter at all for I have not paid much attention to it.

20. Look at "Exhibit 28" now shown you and state whether or not you have ever seen a paper like that in form and substance?

A. I think I have but I could not state as to the wording on it.

21. Are the papers in your possession, or supposed to be in your possession, to which you have testified this morning, which you searched for under the subpœna—like Exhibit "28"?

A. I think they are; I have looked for them but could not locate them and there is one or two places I could not get into.

22. To the best of your knowledge are the papers you hold duplicates of Exhibit "28."?

(Objected to as immaterial.)

A. That would be a hard thing for me to say.

1532 23. How many documents similar in purport to Exhibit "28" have you ever received pertaining to the capital stock of complainant company?

(Objected to as incompetent and immaterial.)

A. I handle a good many stock certificates and I could not recall.
24. I am speaking of those.
A. I have had several of them at different times.
25. About how many?

(Objected to same grounds as before.)

A. I don't recall the number.
26. Was it half a dozen or a dozen or more?

Objected to same grounds.

A. It was not that many or I would remember; I should say 2 or 3 maybe.
27. As a matter of fact, didn't you receive just two?

Objected to same grounds.

A. I think I received more than two.
28. Is the stock certificate which you received for your original subscription still in your possession?

Objected to same grounds.

A. I could not say as to that, I don't know.
29. When did you last see it?
A. I don't know as I ever saw it.
30. Do you know whether you ever received one or not?

Objected to same grounds.

A. My impression is I did.
31. Do you know what you did with it?

Objected to same grounds.

A. No sir.
32. Have you no idea?
A. I have an idea and that is why I say I could not find it. I said I looked for it.

1533 33. Before testifying further do you desire more time in which to make a search for the papers called for by the subpœna for the purpose of producing them in court if found?
A. I don't know unless you want them; if I can find them I will bring them into court, I have no objections to that.

(The MASTER:)

34. You will make further search for them, as I understand you, and if you can find them will bring them into court this afternoon?
A. Yes sir but I don't know whether I can get into a safe I want to get into this afternoon; I would have to look in there; I have three or four places where I keep different things.
Mr. TICHENOR: Are those different places all under your control?
Ans. No sir.
35. State whether or not you ever received any stock certificate

for stock in complainant company other than the one on your original subscription, if you received that?

Mr. RITCHER: I think the witness ought to be excused from further search for the document or this inquiry ought not to be pursued further.

The MASTER: I think so, but the witness may answer the pending question?

A. I could not tell unless I found my certificate; I have a recollection of some certificates but what they are or what they are for, I don't know.

36. Will it give you ample time to make your search between now and two o'clock this afternoon?

A. No sir, it would not be possible for me to do so between now and two o'clock; I did not hear of this thing until last night and I want to see my father at his office.

Mr. TICHENOR: I will excuse the witness until 3 o'clock this afternoon in order to give him an opportunity to make a further search for the papers in question.

1534 The MASTER: All right, we will take a recess until 2 o'clock.

Afternoon session, 2 o'clock p. m.

Direct examination of ROBERT D. CLARKE resumed by Mr. Tichenor:

37. Have you now with you the receipt or trust certificate delivered to you in the place of your original stock certificate in complainant company?—I refer now to the certificate issued for your subscription in the original capitalization?

A. No sir.

38. Do you know where it is?

(Objected to as immaterial.)

A. I think I have it in Anthony's but I cannot get into my vault there today.

39. Did you testify this morning that you had received any portion of the increased capitalization of complainant company or a certificate representing any such protion of the increase?

A. I am under the impression that is what this document I have is.

40. Have you with you then the trust certificate or receipt delivered to you in exchange for your original stock certificate covering certain shares of the increase in the additional capitalization of complainant company?

A. I am not familiar enough with that to state.

41. How many different stock certificates in complainant company have you received?

A. I am not positive as to that but since this morning I have found out it was two.

42. And you have one of those certificates or receipts with you?
Ans. Yes sir.

43. Which one was it? For the original or second issue?
A. This is not the first one.

44. Will you produce the receipt to which you refer?
1535 A. I will read it to you or compare it with any of the others; I think the amount and number of shares is private business.

45. So you refuse to disclose that, do you, and refuse to produce the receipt in question for examination?
A. Yes sir.

45. Is it for a greater or less number of shares than were issued to you of the original capitalization as represented by your first stock certificate?

(Objected to as immaterial.)

A. This is greater than my first stock certificate.

46. On what date was the trust certificate concerning which you are testifying delivered to you?

Objected to as immaterial and assuming it is a trust certificate.

A. I could not say as to that.

47. Whose signatures are affixed to the receipt or certificate concerning which you have testified?
A. John R. Walsh and Sumner R. Clarke.

48. Are they their genuine signatures, do you know?
A. I know Sumner R. Clarke's is his genuine signature; I don't know the other signature.

49. For what purpose was that receipt or certificate delivered to you and under what circumstances?

Objected to as incompetent, immaterial, irrelevant and not the best evidence.

A. I don't know.

50. What did you pay for it?

(Objected to same grounds.)

A. I don't think I paid anything for this one.

51. What did you pay for the stock certificate which that receipt purports to represent?

(Objected to same grounds.)

A. I think that would come under the head of the 20% assessment on the original subscription.

52. Do I understand you to say that this certificate or re-
1536 ceipt, concerning which you are now testifying, was given to you in exchange for the 20% assessment you testified you paid?

Objected to as incompetent and immaterial.

A. I don't quite understand the conditions under which this did come.

53. Has anyone, connected with the complainant company, ever given you any explanation of the reason for the issuing of those certificates or receipts like the one you hold in your hand?

Objected to same grounds.

The MASTER: I think it ought to be confined to such information as he may have obtained from the officers of the complainant company.

A. No sir.

54. To whom was that receipt or certificate issued?

Objected to as immaterial.

A. It was issued to R. D. Clarke, myself.

55. State whether or not at the time that was delivered to you you surrendered any certificate of stock in complainant company?

Objected to as immaterial.

A. I could not say as to that.

56. What is your best recollection as to the number of certificates of stock you have ever held in complainant company?

A. I was under the impression I had had 3 or 4, but since then I think I have had only two; on account of not being able to find the other I inquired some.

57. What, if anything, did you have to do with increasing the capital stock of complainant company?

(Objected to same grounds.)

A. Nothing whatever.

58. When, with reference to the time of such increase, did you know it was contemplated or had been done?

Objected to same grounds as before.

A. I don't know it has been done yet.

37 59. Where have you lived and spent your time during the last two years?

(Objected to same grounds.)

A. Here in Peoria most of the time; I have been away part of the time.

60. State whether or not in the body of the receipt, or certificate which you hold, any reference is made to the agreement bearing date December 19, 1900?

Ans. I do not see any, no sir.

61. Read it through and then answer the question please?

A. There is nothing here about Dec. 19, 1900—oh, yes, there is; I didn't see it before.

62. State whether or not you signed that agreement purporting to

bear date December 19, 1900, referred to in that receipt or certificate.

(Objected to as incompetent and immaterial.)

A. I might have signed it but don't remember it now.

63. Do you know that such an agreement was actually executed by anybody?

Ans. I don't know that positively, no sir.

64. Have you any recollection at this time of ever seeing such an agreement.

Ans. I don't recall it; I might have.

65. Does the material contained in that certificate or receipt in any way refresh your recollection about that question?

A. In reading this it looks as though I might have signed it and I ought to have seen it probably, but I don't recall it.

66. Why do you refuse to produce for inspection and examination the receipt or certificate of which you have testified?

A. On account of its being private business.

67. Is that refusal based on legal advice you have received touching the subject matter?

(Objected to as immaterial.)

The MASTER: I think it may become material; the witness may answer.

A. It depends on what I would take as legal advice on it.

68. If you have any further answer to make, make it.

A. I inquired whether it was necessary for me to produce this document.

1538 69. State whether or not those inquiries were made of counsel for complainant in this case?

Mr. RITCHER: I will relieve the witness of any embarrassment. I think I told him, or Mr. Irwin told him if I did not, or we both took the responsibility of saying to him he did not have to show up the number of shares in that certificate, but could show anything else. If he took any other legal advice I don't know it and don't care.

70. When were the statements of counsel for complainant, just incorporated in the record, made to you?

(Objected to as immaterial.)

A. Before I produced this certificate.

71. How long before?

Ans. About 2½ or 3 hours.

72. That was this forenoon then?

Ans. Yes sir;

73. And it was after you were on the witness stand this morning was it not?

Ans. Yes sir;

74. What, if any, dividends have you received from any of the stock in complainant's company issued to you, or any moneys, other than those referred to earlier in your examination?

A. I have never received any dividends whatever.

75. Are you able to testify now any more definitely as to the amount of money you have received on any of those stock certificates than you were during the morning session when you were examined?

Objected to as it does not appear from the testimony of the witness that he received any money on stock certificates.

A. I am not, any more than I think I would recognize a certificate like the other one if I saw it.

76. I am referring to any money which may have been paid you on account of any of those certificates, or on account of any money you may have advanced on them?

(Objected to same ground.)

A. I have not inquired about that.

77. Do you at this time know where either of your stock certificates are?

Ans. Yes, I have one of them here.

539 78. I am speaking of the original stock certificates?

A. No, I don't know anything about those.

79. To whom did you deliver them at the time they went out of your possession?

(Objected to as incompetent, immaterial, irrelevant)

A. I think I gave them to my uncle, C. C. Clarke—I am not positive as to that though.

80. You are referring to both of them now, are you?

A. I don't know about both of them. I don't know enough about to be familiar with one certificate or the other.

81. Do you testify that you have sold or disposed of none of the original issued to you?

A. Not to my knowledge; I might have signed it away without knowing it.

82. You have not sold any of it?

A. Not to my knowledge, still maybe that is why I could not find the other certificate.

Cross interrogatories by Mr. RITCHER:

1. Are you willing to cover up the number of shares mentioned in that certificate and submit it for inspection?

Ans. Yes sir.

FERD LUTHY, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

The WITNESS: I would like to make a correction or modification of my former testimony. I think I testified here before that I held some stock in this company, or certificates of stock, but that I had given a voting agreement for the same. Upon further thought I am of the impression that the certificate of stock in my name was cancelled and issued in another party's name for voting purposes which in effect amounts to the same I testified to but there may be a slight difference in the other, that is, the certificate may
1540 not be in my name now but in fact I own the stock but the other fixes the voting privileges more definitely.

1. Does that refer to the stock issued to you of the original capitalization?

A. That refers, as I understand it, to all the stock I have in the company; that is my impression; I am not absolutely certain that was the case but I think it is. In effect it is the same as I testified before.

2. Since you were last upon the witness stand, state whether or not you have succeeded in finding your receipts or certificates for your original stock issued or any part of it?

A. I found my certificate for the first issu- of stock but I did not find the second.

3. Then the explanation you have just made you think bears upon the second issue?

A. I think all my stock is alike in the same situation.

4. What is your recollection as to whether or not you have another receipt than the one you have succeeded in finding?

A. I think I got a second receipt but I have not been able to find it, although I have made quite a diligent search for it; I have papers in various places and I have not been able to get to all the papers. The certificates are, however, practically alike except as to amount and date.

5. And they were both issued, you think, in your name?

A. I think the wording of both, signatures, etc., are alike, and the amount is very nearly the same in both of them.

6. Will you produce the receipt or certificate to which you have referred?

A. I will produce it with the understanding it is handed back to me before I leave the witness stand, as it is my personal property and I do not desire it filed in the case. (Witness pro-
1541 duces receipt.)

7. We will see that the certificate is returned to you. The certificate you have now produced and concerning which you have testified is marked "Exhibit 29" is it?

Ans. Yes sir.

8. Are you able to state the circumstances under which this stock

trust certificate, as it is headed, marked "Exhibit 29" was delivered to you?

Objected to as incompetent, irrelevant, immaterial and not the best evidence.

A. My best recollection at this time is I was asked if I had any objection to giving the voting power of my stock to Sumner R. Clarke and Mr. Walsh as trustees, and I told them I had none, and later on this agreement was executed in accordance with that statement.

9. Do you refer to the agreement referred to in the body of the stock trust certificate, Exhibit "29" purporting to bear date December 19, 1900?

A. It is the memorandum or agreement whereby I consented to let my stock be voted by these parties.

The MASTER: I do not think it competent for you, Mr. Luthy, to state the contents of the agreement. The question is Was the agreement the one referred to in the certificate purporting to be dated December 19, 1900?

A. That is part of the agreement.

10. What do you mean when you say this is only a part of it?

A. This particular paper marked "Exhibit 29" refers to a certain agreement and that agreement—Interrupted.

11. Don't state what it contains but is there anything concerning the arrangement between you and the other stock holders except as expressed in "Exhibit 29" and in the agreement referred to in the body of it purporting to bear date December 19, 1900?

1542 A. None that I know of.

12. State whether or not you signed the agreement referred to in the body of Exhibit "29" purporting to bear date December 19, 1900.

(Objected to as immaterial and irrelevant.)

A. My recollection is that I did.

13. So far as your knowledge extends is that agreement still in full force and effect?

(Objected to same grounds.)

A. I think it is.

14. State whether or not you have actually sold any of the stock subscribed by you originally or any of the second issue?

Objected to as immaterial.

The MASTER: I do not see the materiality of that.

A. I have not.

15. Do you know of your own knowledge where your original stock certificates are—not this trust certificate but your original stock certificates?

(Objected to as immaterial.)

A. It seems to me this agreement clearly states where they are.

16. Do you know of your own personal knowledge?

A. How could I? I don't own the Equitable Trust Co. or their vaults and have not access to them. I have no knowledge as to where they are in particular other than what this agreements states.

17. Have you seen either of those original certificates sincee you surrendered them?

(Objected to as immaterial.)

A. No sir.

18. Do you know who delivered to you Exhibit "29"?

Objected to as immaterial.

A. I think in my previous testim-ny I said I though it waas Mr. Little and Mr. Clarke but I am not positive.

19. And you surrendered your stock certificates at that timee, did you?

(Objected to as immaterial.)

1543 A. My recollection is that I did.

You asked me Mr. Tichenor about the date when the payment was made to me; I have looked up the record and as nearly as I can tell it was about August 30, 1901.

20. That is, when the payment was made back to you, as youu testified?

Ans. Refunded, yes sir.

Defendant's counsel offers in evidence the stock trust certificate identified by the witness marked "Exhibit 29" and asks leave to substitute therefor a duly verified copy of the original foor the record.

Objected to on the same grounds similar documents weree objected to.

The MASTER: It may be admitted subject to the objection.

Whereupon, said certificate was read to the master in words and figures following, to-wit:

1544 EXHIBIT "29." I. C. Pinkney, Master.

Peoria Gas and Electric Company.

Incorporated under the laws of Illinois.

No. 5. 50 shares.

Stock Trust Certificate.

This is to certify that the undersigned have received from Ferd Luthy a certificate or certificates for fifty shares, of one hundred dollars each, of the capital stock of the Peoria Gas and Electric Com-

ay, to be held as provided in the agreement dated December 19, 00, between holders of stock of said company and the undersigned, as managers, and the Equitable Trust Company, which said 45 agreement is deposited with the said The Equitable Trust Company, and pursuant to which agreement this certificate issued, and to all the terms and conditions of which agreement e holder hereof has assented by receiving this certificate. This tificate is not valid unless registered by the Equitable Trust mpany, of Chicago, Illinois, as registrar, and is transferable only the books of the managers on surrender hereof, properly en- rsed by the registered holder.

Dated this fourteenth day of January A. D. 1901.

SUMNER R. CLARKE,
JOHN R. WALSH,
Managers.

igned, sealed and delivered in presence of

—— ——.

1547 BEN. WARREN, JR., recalled on behalf of defendant, deposes and says:

Direct interrogatories by MR. TICHENOR:

1. You are the same gentleman that testified once before in this case, are you not?

Ans. Yes sir.

2. You were served with a subpœna to produce certain papers connected with the inquiry, were you not?

A. I was not served with a subpœna but you asked me if I would come here and bring them and I told you I would.

3. Have you those papers in your possession at the present time and will you produce them?

Ans. Yes sir.

4. Are the papers now shown you marked by the master "Exhibits 30" and "31" the documents to which you have just referred and produced?

Ans. Yes sir.

5. State whether or not you have sold any of the stock subscribed for by you of the original capitalization of complainant company?

(Objected to as incompetent and immaterial.)

THE MASTER: How does that inquiry become material?

MR. TICHENOR: It may become material.

THE MASTER: He may answer subject to the objection.

A. No sir.

6. State whether or not you participated in the proceedings in which the increase in the capital stock of complainant company was authorized?

(Objected to as immaterial and not the best evidence.)

A. I think I did, yes sir.

7. Do you know for what purpose the capital stock was increased?

Objected to as immaterial, incompetent and irrelevant.

A. I should say it was increased for the purpose of buying the electric light plant.

1548 Complainant objects to the answer as immaterial, having nothing to do with the litigation in question, and moves the court to exclude it.

8. Are you able to state from recollection when your company purchased the electric light plant, as you have stated?

Objected to as incompetent, immaterial and irrelevant.

A. No sir.

9. In what manner, if you know, was that purchase agree-

plished? I do not refer to the negotiations but was it by purchasing the stock or was it by a purchase of the tangible property?

Objected to same grounds.

The MASTER: I don't think it material.

Mr. TICHENOR: I think it might become very material if it was a purchase of the tangible property the record will show the transfer.

The MASTER: Assuming that is all true and assuming you follow it up by proof of the fact and the record shows the purchase of the tangible property and the payment of a certain sum how would it become material in this case under the issues?

Mr. TICHENOR: I think it may become material and desire to have the witness answer it, if he can.

The MASTER: He may answer subject to the objection.

A. I don't believe I am competent to answer it.

9. State whether or not at the time Exhibit "30" was issued to you you surrendered your stock representing your original subscription in complainant company?

Ans. I did.

10. To whom did you surrender it?

Objected to as immaterial.

A. I suppose to those trustees named.

11. Is it your recollection those trustees delivered to you 1549 the paper marked "Exhibit 30"?

(Objected to as immaterial.)

A. It was delivered to me in the office of the company here either by the secretary or the manager.

12. On or about the day it bears date, January 14, 1901?

A. I could not answer that question.

13. Is it in the same condition now it was when it was delivered to you?

(Objected to as immaterial.)

A. Yes sir, so far as I know except the exhibit mark.

14. State whether or not any certificate of stock was issued to you representing a portion of the increased capitalization of complainant company?

A. That second certificate calls for that marked "Exhibit 31."

15. State what, if anything, you paid for that second certificate that was issued to you?

Objected to as being a private matter of the witness who is not a party to this proceeding and as immaterial.

A. I don't remember that there was anything paid for it.

16. State whether or not any part or portion of the 20 per cent. assessment which you have testified before you paid on your orig-

inal subscription was ever repaid to you either in the shape of a dividend or otherwise?

(Objected to as incompetent and immaterial.)

A. It was paid to me but not as a dividend I don't think; I never heard of a dividend being declared.

17. Do you remember in what form it was paid to you?

Objected to as immaterial.

A. No I don't think I could answer.

18. Was it in cash or its equivalent?

A. I should say so.

19. Look at "Exhibits 30" and "31" and state whether or not you signed the agreement referred to in the body of them
1550 purporting to bear date December 19, 1900?

(Objected to as immaterial.)

A. I think I did; I don't know of any reason I should not; I cannot remember definitely but, of course, I signed it, at least that is my recollection.

20. State whether or not you signed any other papers in connection with the surrender of your certificate of stock and taking in place of them these trust certificates concerning which you have testified?

(Objected to as incompetent and immaterial.)

A. I could not answer; I might have signed something else and might not; I probably signed everything I was asked to.

21. Have you any recollection at this time as to who presented to you the agreement purporting to bear date December 19, 1900, at the time you signed it, if you did?

Objected to as immaterial.

A. I should say it must have been the secretary of the company or the manager.

22. When, with reference to your receipt of the stock certificate representing a portion of the increased capitalization of complainant company, did you know you were to get such a certificate?

Objected to as immaterial and irrelevant.

A. I suppose I had some suspicion of it about the time the capital stock was increased but I could not give any definite time.

23. State whether or not you ever sold any portion of your stock issued to you of the increased capitalization?

Objected to as immaterial and already asked and answered.

The MASTER: I do not see anything to change my mind as to the materiality of evidence of that character, whether it relates to the original or increased capitalization. I do not think it material.

Mr. TICHENOR: I would like to have the witness answer it.
The MASTER: He may answer subject to the objection.

Those papers represent all the interest I have ever had in the
any in any shape or form and I have not sold anything.

fendant's counsel offers in evidence the documents produced
dentified by the witness marked "Exhibits 30" and "31" and
leave to substitute for the originals duly verified copies for the
d.

jected to on same grounds similar documents have been ob-
l to.

e MASTER: The documents may be admitted subject to the
tion.

hereupon said documents were read to the master in the words

1557 FRANCIS W. LITTLE, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Francis W. Little who has heretofore testified in this case as a witness on behalf of the complainant?

A. Yes sir.

2. When did you take up a permanent residence in Peoria?

A. I leased my house about the first of June, 1899, and I spent most of my time in Peoria during the month of May, 1899. In fact, if I remember correctly, I gave up my house in Akron, Ohio, May 1, 1899.

3. Had you spent any considerable time in Peoria prior to May 1, 1899?

A. I had made two or three visits here lasting, I should say, from two days to a week.

4. How long prior to May 1, 1899, were those visits, as nearly as you can remember.

A. I should say from my present recollection that the first one was in February and the others during the latter part of February, March and April, 1899.

5. Did you come to Peoria on those occasions with reference to the proposed organization of the complainant company or with reference to its purposes?

Ans. Yes sir.

6. With what company had you been associated for some years prior to the time you came to Peoria?

A. I was actively engaged with the Akron Gas Company of Akron, Ohio, from the early winter of 1895—I think about November or December, 1895.

7. In what capacity were you associated with that company?

A. As vice president and manager.

8. Were you an active officer of the company and spent
1558 your time with it?

Ans. Yes sir, the greater portion of my time.

9. Were your duties with that company substantially of the same character they have been with the complainant company since you came to Peoria?

Ans. Yes sir.

10. What practical experience had you had prior to your connection with the Akron Gas Company with the gas industries?

A. Well, I had had no practical experience in the sense of operating a plant prior to taking hold of the Akron Gas Company, but was familiar through study and observation with gas and electric plants for a considerable period of years, probably 10 or 12 years, prior to that time.

11. State whether or not, prior to the time you went to Akron, you had had a technical education in the manufacture and distribution of gas?

A. My acquaintance with the gas business was the result of my own study and investigation; I had not attended any technical schools and in that sense was not technically educated.

12. Do you remember how far proceedings relative to the incorporation of the complainant company, or the procuring of a license from the city of Peoria, had progressed when you took up the subject pertaining to the complainant company's affairs in the first instance.

A. My recollection is that the matter had been talked over by Mr. Miller, and possibly Mr. Clarke, before I came here. I think my first visit here was prior to the incorporation of the company and prior to the procuring of frontage consents, but I am not quite clear about that.

13. Who first called your attention to the proposed organization of a new company in Peoria for the purpose of engaging in the gas business?

A. I could not say positively; I think it was either Mr. *Mr.* Miller or Mr. Clarke.

1559 14. Are you able to state from recollection as to whether or not you first met those gentlemen, or either of them, with reference to the business in question, in Peoria or in Chicago?

A. My recollection now is the meeting was in Chicago.

15. Who were present at that meeting, if you remember?

A. As I recall it, I met Mr. Clarke and Mr. Miller at the Grand Pacific hotel and we talked over the matter and then went around to the office of John R. Walsh in the Chicago National Bank building.

16. At that time and during your connection with the Akron Gas Company, Mr. Walsh had owned a controlling interest in the Akron Gas Co., had he not?

A. I don't know of his owning a controlling interest from the fact I never saw the stock book, but I had been under the impression that he did, he and his friends, own a controlling interest.

17. Was there at that time more than one artificial gas plant in Akron?

A. No, not engaged in the general distribution of gas.

18. Do you remember who called you to Chicago at that time?

A. No, I do not. I don't remember whether I was called to Chicago, or whether I came there; I was in the habit of going to Chicago quite frequently and I don't remember now whether I was called, or whether it was a meeting that occurred simply because I happened to be there.

19. For how long a period of time, then, had you been acquainted with Mr. Walsh in a business way or otherwise?

A. I think I first met Mr. Walsh about 1893 or 1894.

20. What was the nature of the discussion between you and the other gentlemen, whose names you have mentioned, at the time you

1560 say you met Mr. Miller and Mr. Clarke in Chicago, so far as the discussion pertained to the organization of a company for the purpose of engaging in the gas business in Peoria?

Objected to as immaterial.

A. As I remember, the discussion was almost wholly on the question as to whether a franchise or license could be secured for a gas and electric plant in Peoria.

21. Did you at that time know the situation with reference to the gas business in Peoria?

Objected to as immaterial and irrelevant.

A. Only in a general way, to the extent that I was familiar with the fact there was a company doing business here and had such facts, relating to the output of the company, as were common public property; I had no special knowledge of it.

22. Had you prior to that time ever been in Peoria for the purpose of looking over the territory with a view of engaging in the gas business or for the purpose of ascertaining its desirability?

(Objected to same grounds.)

A. No sir.

23. Had you ever been in Peoria prior to the time you say you were here perhaps in February, 1899?

Objected to same grounds.

A. Yes sir, I had been here a number of times; I was in Peoria 20 years ago and at various times since then. I think the last previous time I was in Peoria was about 1895.

24. But that trip here had nothing to do with this question at all?

A. Not with regard to the organization of any new company or looking into the field covered by the existing company.

25. Did you on the occasion of this first visit in Chicago know the rates than charged for gas in Peoria?

Objected to as immaterial.

1561 A. I knew what was stated in Brown's Directory as to the rates and it is possible, although I have no recollection, that the matter was discussed at that time.

26. What is this Brown's Directory to which you refer?

A. It is a directory of gas companies giving the most important of the statistics concerning the business of the companies in the various towns of the United States, Canada and Mexico.

27. It is regarded by gas men as authoritative on those subjects?

Ans. In a general way, yes sir.

28. Were any of the gentlemen present at that time in any degree skilled in the gas industries other than yourself?

Objected to as immaterial.

A. I think not; at the first meeting except Mr. Walsh; he has considerable acquaintance with the gas business.

29. Had he at that time *time* ever been actively engaged in the superintendency or management of any gas plant within your knowledge?

Ans. Not that I know of.

30. Were there any other methods, than those which you have already stated, by which you became familiar with gas properties and gas industries prior to the year 1895?

A. I think I stated in my former examination that prior to 1895, for a number of years I had been making more or less of a study of the gas business. As far back as 1885 or 1886, as I remember now, I was engaged in dealing in gas securities, bonds and stocks, and continued in that business for perhaps—certainly until 1891; from 1891 to 1894 or 1895—the winter of 1894–5, I was engaged in the street railroad business which brought me in contact with the electric lighting business and through that with the gas business; so I followed the production, manufacture and general progress of the gas business as well as the street railway business and during
1562 all the time I have mentioned I took advantage of every opportunity I had to visit gas plants, talk with gas people and become familiar with the gas industries.

31. As a part of your business in handling gas securities, did you examine gas plants for the purpose of determining the value of such securities?

A. Yes I did in a number of instances, in all instances where the question of the desirability of the security came up for my personal consideration.

32. In what territory were you operating during that time?

A. Northwestern Iowa, southwestern Minnesota, southeastern Dakota and eastern Nebraska.

33. Was this occasion at Chicago, to which you have referred, the first time at which you and Mr. Clarke had discussed the gas business in Peoria?

A. I think it was the first I have any recollection of. I have known Mr. Clarke for a good many years and it is possible I talked with him about it years ago but I have no recollection *fo* ever having taken it up with him before that.

34. When did you next see any of those gentlemen with reference to this particular subject matter?

A. My recollection is I came to Peoria that same night, or the following night, with Mr. Clarke and Mr. Miller although my trip to Peoria might have been at a subsequent meeting; I do not recall now with reference to that; it was either the first or second time I met them I came down.

35. What was your purpose in coming to Peoria on that occasion?

(Objected to as immaterial.)

The MASTER: If it was connected with the procurement of the franchise from the city, you ought to show that, for if it was not it is not material.

36. Was that business in Peoria with reference to the sub-
1563 ject matter under consideration here?

A. Well, it was more particularly with reference to an examination of the town and to get a general idea of the lay of things here more particularly as to the prosperity of the place, whether it was growing or not; also perhaps to talk a little more fully with Mr. Miller on the question of his ability to get the necessary frontage.

37. Did you make the necessary examination of the town to satisfy yourself as to its advantages with reference to the installing of another gas plant here?

Ans. Yes sir.

38. What was your conclusion in that regard so far as you expressed it to Mr. Miller and Mr. Clarke if you did express it?

Objected to as immaterial.

The MASTER: I don't think that material.

Mr. TICHENOR: I would like to have the witness answer the question.

The MASTER: He may answer:

A. I don't remember that I expressed any conclusion at all, but I was satisfied with the apparent growth and prosperity of the place.

39. What are the particular items necessarily taken into account in determining the desirability of establishing a gas plant in any given city or town?

A. First, the physical condition of the town, its shape and the kind and character of the soil; the location of the town with reference to the surrounding country; the sources upon which its prosperity is based, the general character of the population and the apparent difficulty, or lack of difficulty, in laying mains, and in a general way, if there is a gas company already doing business in the town, its relations to the public and its popularity or non-popularity. Those are the principal things I would consider.

1564 40. What did you find at that time with reference to the available territory in this district already occupied by the gas company then operating here?

(Objected to as immaterial.)

A. I did not make any effort at that time to ascertain where the mains of the other company were located or what territory it would reach; I was interested more in the physical condition and topography of the town, character of the soil, etc., and the general relations of the existing company to its patrons and the manner in which a gas plant could be laid out. I had sufficient information

taken, as I say, from Brown's Directory to satisfy me on the other questions.

41. In what way is the topography of a given locality essential in reaching a conclusion upon the question concerning which you are testifying?

A. Topography often is very important. It is frequently the case that, on account of topography, it is necessary to lay a very large amount of mains to reach a given number of consumers. In other words, if, for illustration, the town is hilly and the centers of the residence population are separated by gulches or ravines, it frequently happens that the number of consumers per mile of main is necessarily small.

42. To what extent were the various elements, which you have testified as entering into a conclusion upon that question favorable in Peoria?

A. I considered the situation favorable here.

43. And did you so report it to the gentlemen then proposing to become interested?

Ans. Yes sir.

44. How long were you here on that occasion investigating the conditions here?

A. My recollection now is my first visit here was for two days.

1565 45. Did you at that time obtain any information as to the character of the plant of the gas company then operating in this territory?

Ans. No sir, I don't think I went near the plant at that time.

46. Did you obtain any information as to the men prominently identified with the old company, or the company then operating here, so far as pertained to their financial responsibility?

A. No, I did not make any investigation of that at all.

47. Did you regard that as an item of any significance with reference to the question under consideration by you?

A. Only relatively; it had some significance, of course, but not very much. I knew all those gentlemen pretty well by reputation and knew what their standing was in the gas business and among gas men.

48. To whom do you now refer?

A. To the people who were in the management of the old gas company.

49. How long prior to the time of this visit to Peoria, when you made some investigation, as you have testified, did you begin to look up statistics with reference to the gas industry here?

A. Well, for more than 6 or 7 years prior to that time.—say from about 1891, I followed very closely the growth and development of the gas industry in all of the leading towns of this middle western country, Peoria among others. I think I became pretty well informed about 1891 or 1892 concerning both the gas and electric business of the central West.

50. What, if anything, did you have to do with laying the plans for the procurement of an ordinance from the city of Peoria granting the complainant company a license to operate in this territory?

A. I don't think I could be said to have had much of any-
1566 thing to do with that; the principal question was whether or not the necessary frontage could be secured and I think that was a question which Mr. Miller determined almost entirely.

51. What, if anything, had you to do with the organization of the company?

A. Nothing more than to possibly suggest something in connection—I will not say that either. I do not think I had anything to do with it, as I remember now.

52. Did you know the amount at which it was to be capitalized prior to the time the organization was perfected?

A. I don't think I did; my recol-ection is that was not determined at the time of any of my visits and I didn't know about that until after the charter had been obtained, but I knew in a general way about how much it would be.

53. State whether or not prior to the time the organization of the company was completed, any steps had been taken by you, in connection with the others proposing to become interested, for the purpose of ascertaining the outlay necessary to install a plant in Peoria of the character which you proposed to install here, or which you were considering?

A. I recollect*ion* I made some figures on that question and stated my own judgment was it would take from $350,000. to $500,000. to put a plant of that kind here.

54. That was a rough estimate, was it?

Ans. Yes sir.

55. When, in the progress of affairs pertaining to your gaining a footing here, was there any determination with reference to the size of the plant which should be installed?

A. Not until some months after the passage of the franchise-ordinance. In fact, the plans were changed from time to time in the progress of the work and there was some changes made while work was progressing.

1567 56. Do you remember from recollection about when the ordinance was passed?

A. My recollection is the ordinance was passed about the first or second week of April, 1899.

57. What, if anything, did you have to do with the preparation of the ordinance as it was submitted to the city council of Peoria?

A. I don't recollect that I had anything to do with it except possibly to read it over and look in a general way at its terms; I don't think I drew it or had any special connection with it, that is, I don't think I assisted in drawing it; I know I did not draw it. I don't recall the exact circumstances now but I think I saw it.

58. At the time the ordinance was presented, had it been deter-

mined that you would be an interested party in the new enterprise in case the franchise was obtained?

A. Yes, I think so; I think I had made a definite plan; that is to say, I think I had settled on coming here in the event the ordinance was passed.

59. With whom, if anyone, did you co-operate or negotiate in reaching a determination to remove to Peoria and become interested with the complainant company in the event an ordinance was procured from the city council?

A. I talked it over with Mr. Clarke, Mr. Miller, Mr. Walsh and Mr. Walton, and I think the agreement was reached with them that in case the ordinance was granted on satisfactory terms and conditions that I would come here and take charge of the installation of the new plant and the operation of it.

60. Those four gentlemen are the same persons whose names have frequently been referred to in the testimony in this case, are they not?

Ans. Yes sir.

1568 61. What if any experience had you had at that time in installing gas plants?

A. I had just shortly before that completed the remodeling and practically the building of a new gas plant in Akron, Ohio; that was done entirely under my supervision.

62. In magnitude how did that plant compare with the one it was proposed to build in Peoria?

A. We had a larger mileage of main in Akron, the purifying capacity was about the same, the generating capacity was a little greater in Akron, the holder capacity was a little greater in Akron.

63. When you speak of a greater mileage of mains in Akron do you refer to what was contemplated in Peoria or to what was actually done?

A. We had more mileage in Akron than we contemplated here.

64. Do you remember at this time about how much frontage was obtained at the time the ordinance was presented to the city council?

A. My recollection is there was a frontage obtained on over 50 miles of streets.

65. Did that cover substantially the territory in which you proposed to operate or was it greater or less?

A. It covered more territory than we proposed to lay mains in during the first year.

66. At the time of the presentation of the ordinance in question had you informed yourself as to the portion of the available territory in Peoria then covered by the Peoria Gas Light & Coke Co.?

A. Only in a very general way; I had not with any particularity.

67. What was the fact in that regard?

1569 A. I think they had mains on most of the principal business streets and residence streets.

68. Had you at that time informed yourself as to the ability of

the company then operating here to furnish a sufficient quantity of gas to meet the demands?

A. No I did not; I did not know what their capacity was.

69. Did you at that time know substantially the gas consumption of Peoria?

A. All I knew about that was that Brown's Directory gave its output at about one hundred million cubic feet per year.

70. For what year was that?

A. That was the directory for 1898.

71. Were you in Peoria during the time the ordinance for that franchise was pending before the city council?

A. I think I arrived here the day it was passed; I do not now recall being here during any of the period from the date of its introduction until the day of its passage.

72. State what if any information you had given the gentlemen proposing to become interested with you in the new enterprise with respect to the profitable character of an investment of that kind here, taking into account all of the conditions?

Objected to as incompetent and immaterial.

A. I did not give any detailed statement as to what might be expected, but said, in a general way, I thought there was room for another company and it would ultimately secure a profitable business.

73. State whether or not it was at that time the intention of yourself and your associates to enter the Peoria territory for the purpose of operating a competing gas plant?

Objected to as immaterial.

A. Yes sir, it was to compete where competition was necessary and to occupy any other territory that was not occupied by the
1570 existing company.

74. What if any assurance had you that your company would be able to control much new territory as might become desirable for distribution of gas?

A. We had no assurance we would control the territory; we would have to take our chances on that.

75. At that time was there, in your judgment, any territory in the Peoria district not occupied by the Peoria Gas Light & Coke Co., in which mains might be extended and gas furnished profitably?

A. Yes sir.

76. Where were those locations, if you remember at this time?

A. At the time the matter was under consideration, as I have stated, I had no knowledge of the particular streets and districts occupied by the mains of the Peoria Gas Light & Coke Co., but understood in a general way the number of miles of mains they had and I felt that a considerably increased mileage could be put in with good profit to a company, and I have since had my views in that respect confirmed by more intimate knowledge of the city.

77. Are you able to refer to any of those localities that were not occupied at that time by the old company?

A. The eighth ward was one, Averyville was another and there are quite a large number of streets in various portions of the city where mains should be laid in my judgment.

78. And since that time have those districts which you have particularly designated been covered by the piping system of your company, or the old company?

A. Not by our company and I think not by the old.

79. At the time you commenced operations in furnishing gas state whether or not your piping system extended into any territory not covered by the Peoria Gas Light & Coke Co.

A. In a general way, our piping system competes with that
1571 of the Peoria Gas Light & Coke Co. but there were streets here and there which were reached by us only.

80. Was that item of any considerable magnitude or only small?

A. Relatively small.

81. How many miles of mains had your company at the time it began to serve gas?

A. In round figures, 25 miles; I think I have given the exact figures in my former testimony.

82. Are you able to state about how many service pipes you had put in prior to the time you commenced to serve gas?

A. I could not give you that from memory; I testified on that, I think, in my former testimony and I can refer to our records and give you the information.

83. State whether or not you know what portion of the consumers served by your company at the time you began, were also connected with the piping system of the Peoria Gas Light & Coke Co.?

A. I can only give you a very rough estimate of that; I don't think we have any records which would show that; I would say that probably 40 to 50% of our customers when we commenced were not gas takers previously.

84. Were those in the business districts and residence districts also?

Ans. Yes sir.

85. Was there any man of your company at that time who had exclusive charge of the setting of meters?

A. The meter setting was done under the general charge of John Robb, superintendent of distribution; he employed different men in setting meters and I think you could say that was in his charge.

86. Was no record kept by him or others of the meters with reference to whether or not the customers who had meters put in were previously taking from the old company?

A. I don't think.

1572 A. I don't think there is, we have an inspector's report which shows whether or not the house was piped, what they were using gas for, if at all, if they were not using gas what they were using for both light and fuel, but whether it shows that at the

time of this inspection they were taking gas from the other company I am inclined to think not.

87. When was that inspection made with reference to the time you began to furnish gas?

A. That inspection was made upon the turning into the office of the application for the service; before the service was laid an inspector was sent there to examine the premises.

88. Then the material concerning which you have been testifying as coming from the inspectors was gathered from time to time prior to your commencing to furnish gas as the applications for service were made.

A. Prior and subsequent, both: it was one of the routine performances of the office.

89. And have those records been preserved?

Ans. I think so.

90. If this inspection record was kept in the manner in which you think it was, it would show, would it not, the situation in respect to service by the old company?

A. I think it would show, as I say, whether the house was piped, whether they were using gas for any purpose, and whether they had used gas at any previous time. We found quite a good many houses where the people had at some previous time been using gas and had discontinued it; this was kept in the form of a card index record and those cards, I think, contained that information.

91. In those instances, where the service pipes of the Peoria Gas Light & Coke Co. were all in, would the addition of the service pipe from your company increase the efficiency of the service of gas, or give the consumer any conveniences or accommodations not
1573 supplied by the old company, assuming the price to be the same.

A. In a great many cases it would for the reason that many of the service pipes which had been put in by the old company were too small to permit of using a gas stove or instantaneous water heater, being intended only to supply gas for light where the quantity burned per hour is small.

92. Do you know how long those small pipes had been there?

A. No.

93. At that time, how long had gas been used more or less generally for fuel purposes?

A. It came in gradually; I think perhaps for 1888 to 1892 was when people began to use gas for fuel purposes in what you might call a general manner; I say that generally, I do not know that this applies to the city of Peoria; I don't know when they attempted to promote the fuel gas business in Peoria.

95. Did you have any personal knowledge of any services belonging to the Peoria Gas Light & Coke Co. that were too small for furnishing gas for fuel purposes?

A. Not to the extent that I had made any measurement of the

services or examined them; my knowledge came through the reports which came into the office.

96. And were those the same reports to which you have already referred?

A. Not necessarily; the solicitors and superintendent frequently made verbal reports on those subjects and a number of people came into the office and stated they had received notice from the old company to put in new services and wanted to see us about it because their present services were too small; that was the source of my personal information.

97. It was all a matter of hearsay and not based on any certain knowledge you yourself had?

1574 A. I had not examined the services at all.

98. Did you personally know how long the Peoria Gas Light & Coke Co. had been furnishing gas for fuel purposes and what efforts it had made in the way of its introduction generally in Peoria?

A. No, I had no personal knowledge about it.

99. Did the statistics, to which you have referred, divide the gas used for illuminating purposes from that used for fuel purposes or was it in a gross item?

A. No, it stated only there was so many thousand cubic feet and such a per cent. of gas was used for fuel purposes.

100. When you first began to operate in Peoria territory, is it not true there were a very large number of gas stoves, ranges and heaters in use here?

A. Well, that depends on what you call a large number; there was not quite as many as, in my judgment, were necessary or could have been gotten into use through the efforts of a properly managed gas company.

101. Didn't you ascertain about that time, or have you not ascertained since, that approximately one half of the entire gas consumption in Peoria was for fuel purposes?

A. No, I don't think at that time it was anywhere near one half.

102. You have no certain knowledge of that?

A. No, but judging from our own business and from what I have seen of the business here, I should say there was not over one third of the gas used for fuel purposes.

103. It is a fact, is it not, and one which you knew at that time that gas was used to a considerable extent in Peoria for fuel purposes?

Ans. Yes sir.

104. And is it not true that is one thing which you took
1575 into account in considering the advisability of Peoria as a location for a competing gas company?

A. I took into account the fact that there was not as much gas sold here for either fuel or light as I thought could be sold or ought to be sold.

105. But the fact that gas had been introduced here for fuel purposes was one consideration which you took into account?

A. Yes sir, it had gained a foothold, although I would rather have had a virgin field.

106. Is it not a fact that the growth of the gas business for fuel purposes had been comparatively slow. I am speaking now of the time when it was first introduced.

A. Well, it has in a sense that gas has been used as a heating agent for 75 years but since it began to be introduced for fuel purposes its gro-th has been very rapid.

107. Did you at that time know the price that the old company was charging for gas used for fuel purposes?

A. Yes, approximately.

108. And did you also know the price being charged for gas for illuminating purposes?

A. Yes, I knew the net price. In fact, I knew the net and gross prices.

109. And was there a net and gross price on each of the different kinds of gas furnished by the old company?

A. That is my recollection although I am not entirely clear about it.

110. What was the price then charged for fuel gas?

A. My recollection is it was 85 cents gross and 75 cents net per thousand feet measured through a separate meter used in a full sized range. In other words, I don't think they made those prices for hot plates or little small burners.

1576 111. Did you understand at that time there were different prices on gas served for fuel consumption?

A. Yes sir.

112. From what source did you derive that information?

A. I could not tell you now; I remember it was in the directory and I made have talked to Mr. Clarke or Mr. Miller; I have forgotten how I got the definite information.

113. Did you know at that time how long the Peoria Gas Light & Coke Co. had been serving fuel gas on the basis of 75 cents per thousand cubic feet?

A. No, I did not know how long, but I knew they had been doing it for a number of years.

114. Do you remember at this time at what price illuminating gas was sold when you first came to Peoria for the purpose of investigating the advisability of the location of a competing plant here?

A. I think the gross price was $1.35 and the net price $1.25 per thousand cubic feet.

-15. Did you know of any change made in either of those prices prior to the time the city council granted to your company a license *ot* use the streets and alleys of the city for the purpose of constructing your piping system and to install the plant generally?

A. Yes, I think while the ordinance was pending I was sent a

newspaper clipping showing that illuminating gas was lowered to $1.00. In other words, a price of $1.00 net was in force during the time the ordinance was being considered.

-16. Do you know whether or not the old gas company ever did enforce a dollare rate for fuel gas based upon that advance to which you have referred?

A. Whether they collected a dollar rate?

117. Yes.

1577 Ans. I don't know anything about that; all I know is the newspaper clipping I spoke of.

118. Did you become a gas consumer immediately after you came to Peoria?

A. I think I did in June.

119. Was that for both lighting and fuel purposes?

Ans. Yes.

120. What did you pay?

A. I could not tell you now without reference to the bills; I think I paid $1.00 for light and 75 cents for fuel.

121. State whether or not during the pendency of your ordinance or prior thereto, the old gas company did not state that if a competing gas company came into the territory it would put the price of gas for all purposes at 50 cents a thousand and keep it there for at least 5 years?

A. I don't know of any public statements of that sort but my recollection is Mr. Miller told me Mr. Coffey had stated that to him.

122. Do you remember how far your plans had advanced at the time you received that information?

A. I think that statement was made before I was connected with the company officially. In fact, before the ordinance was passed.

123. What if any effect had that upon the plans with reference to building a competing plant in Peoria?

A. We thought that was guff—it did not have any effect.

124. At what price was the old company furnishing gas when you began to furnish it?

A. $1.00 for light, I think, and 75 cents for fuel was the price.

125. How long did those prices continue on the part of the old company with reference to the time you began to furnish gas?

A. I think only a few days; I don't remember exactly how long.

126. What change in the prices was then made?

1578 A. I think they reduced the price to 50 cents.

127. What price did your company charge during the same time for gas?

A. The first consumer we took on, or when we commenced to sell gas, we sold it at 90 cents for light and 65 cents for fuel, which rate was cut almost immediately to 40 cents for all purposes and 10 cents off for prompt payment, making it a 30 cent rate.

128. Who fixed the original rate for your company, as you have testified?

Ans. I did.

129. State whether or not during all the time you have been connected with the complainant company, you have had the authority to make rates?

A. Yes, I have made all the rates that have been made.

130. Has there at any time since you became associated with the company been any other person interested in it having a knowledge of the cost of manufacture and of the details of the gas business?

A. The treasurer has known more about the cost of manufacture even than I did and the officers of the company.

131. I am speaking of the cost of the manufacture of gas generally—not of the cost here?

A. I think Mr. Walton and Mr. Walsh know that fairly well; they have had investments of that sort and been connected with the financial side; I don't think they have ever had anything to do with the operating side of a gas plant.

132. State whether or not people handling the business part of gas industries, as you say Mr. Walton and Mr. Walsh were, could acquire a reasonable definite and accurate knowledge pertaining to the cost of gas production and distribution and the profits connected with it?

Objected to as incompetent, irrelevant and an attempt to
1579 qualify somebody else besides the witness.

The MASTER: The principal objection to that question is, it calls for the rankest kind of a conclusion; the witness might state that they know and it might be they could acquire no knowledge whatever; I think the question highly objectionable.

Mr. TICHENOR: I would like to have the witness answer it.

The MASTER: He may answer subject to the objection.

A. If they gave the matter study and attention enough I do not see why they could not.

132. At the time you arranged for the capacity of your operating plant what plans were adopted with reference to supplying the whole or only a portion of the available Peoria district?

A. That was not considered in that way; the plant was based upon the possible output of a certain amount of gas, but just where that gas was to be sold was not determined; we did not take any particular locality and say we were going to sell gas there; we were going to sell it where we could.

133. State whether or not you built with reference to a capacity sufficient to supply the whole of the Peoria territory?

A. No, we did not.

134. Were there certain portions of your plant which were sufficiently large for those purposes?

A. No, I don't think there was any portion of it built large enough to supply the entire business; it was all proportioned about alike.

135. On what basis with reference to the proportion of gas consumption in Peoria did you construct if as a matter of fact you did

make your establishment upon any certain percentage of the gas output in Peoria?

A. Well, I will tell you the facts and then you can see how closely it answers your question. The plant is designed to supply
1580 about one hundred to one hundred and twenty-five million feet of gas per year; it is also arranged so it can be increased, doubled up in fact if we get business enough to require a larger plant.

136. What portions of your plant must necessarily be increased in order to enable you to double the quantity of output for which it was originally designed?

A. We would have to put in additional retorts or a water gas set, as the case might be, that would depend upon which was the better thing to do at the time. We would have to increase the condensing, washing and scrubbing capacity and increase the purifying capacity and put in another storage holder.

137. And as I understand you your plant as originally constructed was arranged with reference to those additions if they should be required?

Ans. Yes sir.

Adjourned until Friday, May 9, 1902, at 10 a. m.

United States court room, Government building.

PEORIA, ILL., FRIDAY, *May* 9, 1902, 10 o'clock a. m.

Present: Judge I. C. Pinkney, special commissioner Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

Direct examination of F. W. LITTLE resumed by Mr. Tichenor:

138. What, if any, additions of the character to which you have referred have been made up to the present time?

A. I think nothing has been added.

139. There was one question I omitted to ask you yesterday regarding the distribution system at Akron, Ohio. What was the annual output at Akron, Ohio, when you were there as compared with the annual output in Peoria at the present time?

1581 Objected to as immaterial.

The MASTER: When you speak of output do you refer to the station meter output?

Mr. TICHENOR: I use the term in the same sense the witness has used it when on the stand before. I do it in order there may be no confusion of terms.

The MASTER: The station meter registers the output necessarily does it, Mr. Little?

The WITNESS: Not necessarily; the station meter registers the amount of gas made, and the amount of gas in the holders is figured up each day, generally twice a day, and the amount registered by the station meter is added to or deducted according to the increase or decrease of the amount in the holders.

140. I want to ascertain whether or not the station meter indicates all the gas that is made that passes into the holders?
A. Yes sir.

(Mr. TICHENOR:)

141. (Int. 139 repeated to witness.)
A. The output in Akron was increasing rapidly when I was there; my recollection is, the last year I was there it was something in excess of the amount of gas sent out by the Peoria Gas & Electric Company in any year since I have been here.
142. You don't know then how the output for the last year you were in Akron compares with the entire output in the Peoria district for any year since you have been here?

Objected to as immaterial.

A. I don't know the exact output for any year in the Peoria district, but I should say that the Akron output for the last year I was in Akron was somewhere between forty per cent. and one-third of the total amount of gas sent out in Peoria.
143. What was the population in the Akron district reached by your company during the last year you were manager there?

1582 Objected to as immaterial and irrelevant.

A. I should say somewhere about 33,000 to 35,000, that is to say, that population was probably not reached by the mains of the company but was approximately the population of the district in any portion of which the mains were laid. In other words, the municipal limits of Akron, included a considerable territory, which was not reached by the company's mains on account of the scattered nature of the population and the mains, in one or two instances, go outside of the city limits, so I should say a fair estimate of the population of the district into which the mains penetrate was about 33,000 to 35,000.
144. From an answer given by you yesterday I understood that different towns of substantially the same size consume different quantities of gas. Have you any knowledge from which you can answer as to the percentage of variation between the maximum and minimum of gas consumed?
A. I have in mind one town where I examined the gas works where the consumption was only about 600 feet *per capita* of population per annum. I know of other places where the consumption reaches 3,600 feet *per capita* per annum and it is not uncommon in

English towns to find a consumption as high as 5,000 feet *per capita* per annum.

145. In the main, upon what do those variations depend?

A. Upon the prices of other fuel, the nature of the employment of the people, the conditions of climate with reference to a great deal of sunlight, or a great deal of rain, and with reference to a great deal of heat or cold, hot summers or cold summers and the length of time that a gas works has been established and intelligently and carefully managed.

146. Is the gas consumption greater or less in proportion to the length of time the people have been supplied with gas as a rule?

1583 A. Generally in proportion to the length of time the people have been supplied with gas, if the other factors of the problem are present.

147. State whether or not the gas consumption in the Peoria district *per capita* is large or small?

A. In my opinion now it is a little above the average.

148. How long has that condition obtained?

A. During the past two years.

(The MASTER:)

149. Is this *per capita* consumption based upon the population within the territory covered by the mains of the gas company or is it based upon the population of the entire city?

A. It is generally figured on the population of the entire city because such statistics are rarely available to enable an investigator to know just what districts are covered by the mains.

(Mr. TICHENOR:)

150. Are you able to state about what per centage of increase *per capita* there has been in gas consumption in the Peoria district within the time designated by you?

A. Not accurately. A very considerable increase occurred during the time the gas was being sold at a low price. I should say that during that time the gas consumption increased probably 25 or 30 per cent.

151. What has been the result with reference to a permanent increase in the consumption?

A. There has been considerable permanent increase but the exact amount I am not able to state. I could state it as to the Peoria Gas & Electric Company by making some figures from the books of the company.

152. Does the price at which gas is sold as a general rule affect the quantity of consumption?

A. Yes, necessarily so.

153. In what direction?

1584 A. Generally as the price decreases the consumption increases.

154. Among the factors, mentioned by you as affecting the quantity of gas consumption, which enters the most prominently into the question if any?

A. In my opinion the most important factor is the question of the management of the company and the relations of the company to its customers. In other words, it is like any other retail business; the amount of your sales depend very much more upon the comfortable and pleasant relations between the company and its customers and the treatment which they get at the office of the company and the manner in which complaints are looked after and attended to and the wants of the customers looked after.

155. Are those features of more importance than the price at which the gas is sold?

A. Within reasonable limits, I think they are; of course, if the price was absurd or excessive it would be very difficult to maintain those relations; the price must be a decent one in order to maintain a pleasant and comfortable relation between the consumers and the company.

156. In your judgment which one of those factors were most important in the heavy advance in gas consumption during the period covered by the low price to which you have referred?

A. I think the two factors which were important during that period was the excessively low price and the aggressive manner in which the business was sought.

157. Do you know what proportion of the gas consumed in Peoria your company furnished during that period?

A. No. We commenced with nothing and increased quite rapidly during those few months, but what proportion that was I do not know but I should say in my judgment at the end of say four months we were selling about one-third of the gas sold in Peoria.

1585 158. Does that answer have reference also to the proportion sold by your company during the four months ending August 31, 1900?

A. Yes sir, at the end of the four months' period.

159. I am speaking of the four months ending with August 31, 1900, taken as a whole.

Ans. I don't know about that.

160. My recollection is you have already testified that during that period you sold substantially fifteen million cubic feet. Is that correct?

A. The record will show; I am rather under the impression it was about 18 million; I guess 15 million was the amount sold and 18 million was the amount manufactured.

161. Does the nationality of the population in any manner affect the quantity of gas consumption as a rule?

A. It does to the extent that nationality affects the habits of the people.

162. Then indirectly that is an important factor, is it?

A. Yes sir.

163. At the time you and your associates were considering the advisability of establishing a competing gas plant in Peoria, were you informed as to the status of the various elements affecting gas consumption here as you have already testified?

A. In a general way, yes sir.

164. I understood you to testify yesterday that during the period covered by your connection with complainant company you had had authority to fix gas rates. State whether or not during all that time you have personally fixed those rates.

Ans. Yes sir.

165. State whether or not at any time when rates have been changed the same has been done wholly upon your own responsibility, or as a result of conferences with other officers of the company, or with stockholders, or with both?

Objected to as immaterial unless it refers only to officers.

1586 A. The fixing of the rate and the judgment exercised was generally my own; I usually discussed the matter with some of the people identified with the company to the extent of saying that I proposed to do so and so and asked what if any objections there were to it?

166. Does that answer include the Chicago people interested as well as those in Peoria?

A. Yes sir. That is to say, I don't know that I have talked with Mr. Walsh about it; I talked with Mr. Walton usually.

167. Has there been any instance, since your connection with the company, where your judgment in regard to fixing rates has not controlled?

A. I cannot quite answer that; I do not quite see what you refer to.

168. I mean this. Has there been any instance in which the judgment of others associated with you has controlled your judgment as to the fixing of prices?

A. The judgment I may have had when the question first came up with reference to any and every change of price might have been different from that which was finally adopted; those things were talked over but there has never been any case where I felt any final opposition or entered any objection to the final price that was determined upon.

169. Has at any time the matter of fixing rates been a subject under discussion by your board of directors?

A. No, I think not; I do not think there was a case where the question of rates came before the board.

170. State whether or not there was a change in prices charged for gas by your company made on or about the 31st day of July 1900?

Objected to as immaterial.

A. Yes, I think that was the time.

1587 171. What was the rate charged by your company for gas for all purposes prior to July 31st, 1900?

A. Forty cents per thousand feet, with ten cents discount if paid on or befor the tenth of the month was our ruling rate.

172. Was that the same price charged by the Peoria Gas Light & Coke Company at that time?

A. I don't know about that, I have forgotten.

173. Did you know at that time?

A. I knew in a general way; I knew what their public rates were.

174. During the period covered by the time between the last of March 1900 and July 31, 1900, how did the published rates of the Peoria Gas Light & Coke Company compare with your own?

A. My recollection is they offered the fifty cent rate on contract.

175. On a contract for how long a period of time?

A. I don't know; I think, as I remember now, they had contracts of one and two years.

176. Is it not also true they had contracts for a period of five years on the same basis?

A. I have heard they did but I have never seen one of them, and I have been told by our solicitors they have never been able to find one of them.

177. Was there any considerable portion of your consumers during that period who were also taking gas from the other company?

A. There were some but I don't know what proportion.

178. At the time you began to furnish gas is it true that your mains and services extended through the most densely populated portions of Peoria both as to business and residence?

A. Not the most densely populated but we were in what we considered to be the best gas consuming territory.

1588 179. When, with reference to the time you began to furnish gas, did you also commence the introduction of gas stoves and other facilities for gas consumption for fuel purposes?

A. As soon as we were ready to supply gas.

180. At that time as I understand your testimony you were furnishing gas for fuel purposes and for illuminating purposes through different meters?

A. Yes sir, from the very beginning.

181. And that is the same way in which the other company was serving at the same time?

Ans. Yes sir.

182. And that continued up to at least July 31, 1900?

A. No, they did not; that only lasted a few days.

183. Are you speaking now of your own company?

A. I am speaking of our own company and I think of the other company; that is the information I had as coming from our soliciting department.

184. What change did you make, if any, with reference to the method of serving?

A. When the price was put at 40 cents gross and 30 cents net we only set one meter and they substantially met our price; on ordinary consumers who had not signed any contract they made the same rates we did.

185. Did you make any change in such meters as had already been set by your company?

A. Yes sir, we took out the extra meter wherever it had been set so as to use it somewhere else.

186. Do you remember at this time what change was made in rates by your company on or about July 31, 1906?

A. We made a gross rate of $1.25 for light and 85 cents for fuel with 10 cents per thousand off if paid on or before the tenth day of the month following that in which the gas was used.

1589 187. Do you know what change was made by the old company at or about the same time?

A. I think they made the same rates.

188. State whether or not those rates were published by both companies?

Ans. I think so.

189. Who made the publication so far as your company was concerned?

A. I attended to seeing that the typewritten notice was sent to the various newspaper offices.

190. That increase in rates was published in all the Peoria papers, was it not?

A. That is my recollection.

191. What were the circumstances leading up to the change to which you have referred?

A. So far as we were concerned we had made up our minds we were losing money and had lost all we thought was necessary and concluded to put the price where it was profitable again.

192. State whether or not in making that advance in rates you consulted other officers of the complainant company?

Objected to as having already been gone into fully.

The MASTER: Counsel is asking about one year only now; the witness may answer.

A. Yes, I talked the matter over I think with all the officers of the company.

193. Did you also consider the subject with anybody other than the officers of your company?

A. Only with the stockholders of the company.

194. State whether or not prior to the time you advanced your rates you knew that the Peoria Gas Light & Coke Company intended to make exactly the same advance at the same time?

Objected to as incompetent and immaterial.

1590 A. I knew they intended to make some advance.

195. Did you know what that advance was to be?

Objected to same grounds.

A. Not definitely.

196. Through what channel did that advice reach you?

Objected to same grounds.

A. My recollection now is it came to me directly through Mr. Walton; I had talked the matter over with him and, if I remember rightly, with Mr. Clarke and Mr. Miller and the conclusion as to our price was fixed at that time and there was an understanding that the Peoria Gas Light & Coke Company would increase its rates.

197. And to the same point to which you were increasing yours?

Objected to same grounds.

A. I didn't know definitely as to that.

198. What interest had Mr. Walton in the Peoria Gas Light & Coke Company at that time if you know?

Objected to as incompetent and immaterial.

A. So far as I know he had none.

199. Did you see the published notice of the advance in rates made on a card of the old company at or about July 31, 1900?

A. I think so.

200. When did you for the first time see any notice of that character?

A. When it was published in the newspaper was the first time I had any knowledge of it.

201. How did those rate as published compare with your rates as published for the advance?

Objected to as immaterial and not the best evidence.

A. I think they made the same rate.

202. Did you know at that time how it happened that they
1591 hit upon exactly the same rates, both for fuel and illuminating gas, that your company did?

Objected to as immaterial and calling for a conclusion.

A. No, I don't know how they happened to hit upon exactly the same thing; I have no recollection of any knowledge on that score.

203. What, if any, conferences were there between the officers of your company and the officers of the old company, or any representatives of the two companies, with reference to the advance in rates made on or about July 31, 1900?

Objected to as incompetent and immaterial.

A. We had a conference in Chicago. I was in Chicago and had a talk in the office of either the Chicago national bank or Equitable Trust Company—I think it was in the Chicago national bank if I remember correctly. I went over there to talk with Mr. Walsh and Mr. Walton. I think Mr. McKinley was there——

204. (Interrupting.) Who was this Mr. McKinley to whom you refer?

A. He is president of the Peoria Gas Light & Coke Company.

205. Was he at that time?

A. I think so, yes sir. The general question of rates was talked over at the time but there was no conclusion reached at that meeting as to the question of rate.

206. Was there at a subsequent meeting?

Objected to same grounds as before.

A. No sir, not at any meeting at which Mr. McKinley was present. As I remember now that meeting was in the forenoon somewhere between eleven and twelve o'clock and the conclusion of our company was not reached until just before I went home in the evening.

207. Did you see Mr. McKinley again that day?

Ans. No sir.

208. Is that the only conversation you had with Mr. Mc-
1592 Kinley upon the subject of those rates?

Ans. Yes sir.

209. What, if any, representation did he then make to you with reference to the proposed advance in rates upon the part of his company?

(Objected to as incompetent and immaterial.)

A. The statement was made when I came in that the time had about come to stop carrying on an unprofitable business and the question arose as to what wer- fair and equitable rates, what we thought ought to be charged and the discussion was entirely on those lines.

210. What, if any, experience had Mr. McKinley had in the operation of gas plants prior to the time he became interested in the Peoria company if you know?

Objected to as incompetent and immaterial.

A. I know he has been identified with a number of gas plants for several years; I don't know what the sum of his experience is.

211. Who suggested the rate that was adopted by your company—did you or Mr. McKinley?

A. I don't remember about that; the general talk was on the advisability of making two rates and I don't remember who made the suggestion of the rates which were adopted.

212. Look at page 8 of defendant's answers on file in this case at what purports to be copies of the advertisement of those advances in rates on the part of both companies and state whether or not you recognize them as being copies of the published notice of such advance?

A. I think these are copies of the notices as I remember them.

213. Is it not true that the notices of advance in rates concerning

which you have testified and copies of which you have now identified were published in the same papers on exactly the same date?

Ans. I think that is so.

214. Do you know how it occurred that the language em-
1593 ployed in the two advertisements was identical?

Objected to as incompetent and immaterial.

A. No, I do not.

215. Did you see the notices which were published by the Peoria Gas Light & Coke Company pertaining to such advance in rate prior to the time they went into the papers?

Objected to same grounds.

A. No, I did not; I have no recollection of it.

216. Is it not a fact that one messenger was sent from your office with those notices to each and all of the Peoria papers for publication shortly before they were published?

Objected to same grounds.

A. I think not. I have a very clear recollection that I sent no messenger from our office, or any messenger with notices signed by the Peoria Gas Light & Coke Company.

217. State whether or not immediately following the publication of those notices the rates were advanced by both companies in conformity with the statements therein contained?

Objected to as calling for a conclusion and immaterial.

A. I know our rates were maintained at that point; I don't know anything about the other rates, whether they were or not but have no reason to believe they were not.

218. Were you still operating in exactly the same territory covered by the Peoria Gas Light & Coke Company?

A. Not in all their territory.

219. But so far as your territory extended?

A. With the exception I stated yesterday that we reached certain districts where their mains were not laid.

220. But those districts I understand you to say were comparatively small?

A. Comparatively unimportant, yes sir.

1594 221. State whether or not, prior to the publication of those notices pertaining to advancement of rates, there was any understanding between your company and the Peoria Gas Light & Coke Company as to the territory in which each should operate?

Objected to as incompetent and immaterial.

222. What, if any, understanding or agreement was there with reference to the consumers which should be furnished by each?

Objected to same grounds.

A. There was no understanding I know anything of.

223. State whether or not since on or about July 31, 1900, there has ever been any competitive rates between your company and the Peoria Gas Light & Coke Company within your knowledge?

Objected to as incompetent and immaterial and calling for a conclusion.

A. We have maintained our rates steadily.

224. And your rates have always been the same as their rates, have they not?

A. No, I think not, at least, so far as the published rate is concerned; for a considerable period of time until the conclusion of what is known as the Journal suit we maintained a rate of $1.15 for light net and 75 cents net for fuel; about the time of the institution of the Journal suit, or shortly afterward, the Peoria Gas Light & Coke Company made a rate of $1.00 for both fuel and light and our rates varied to that extent for a number of months.

225. Did you make any change in rates subsequent to that Journal suit?

Ans. Yes sir.

226. When was that change made with reference to the change to which you have referred on the part of the old company?

A. Some months after they made their change.

227. For how many months did you continue to serve gas at $1.15 for light and 75 cents for fuel after the old company changed
1595 to a dollar for each?

A. I could not tell you exactly the number of months without referring to the office records but I should say it was four or five months or perhaps nearer a year.

228. State whether or not there was an understanding between your company and the Peoria Gas Light & Coke Company with reference to that particular question.

Objected to as incompetent and immaterial.

A. No, not that I know of.

229. Is it not true that based upon that difference of rates there was an understanding between your company and the Peoria Gas Light & Coke Company as to the territory which each of you should supply and that neither should encroach upon the rights of the other in that respect?

Objected to as incompetent and immaterial.

A. No sir, that is not true; as a matter of fact during the time those rates were in force a good many of their customers came to us and got their gas for fuel purposes and left us and took their gas for lighting purposes from them.

230. And you still continued to maintain the same rates?

A. Yes sir.

231. What were the circumstances under which you changed your price to a dollar for each?

A. When the decision was rendered in the Journal suit we talked it over, consulted our attorneys about it and was advised that the safest thing for us to do was to make a change in the rates and put the rates at $1.00 all around.

232. Since that time it has been the same on the part of both companies, has it?

Ans. I think so.

233. With the exceptions you have noted has there been any difference in the rates between your company and the Peoria
1596 Gas Light & Coke Company since July 31, 1900?

Objected to same grounds.

A. There has been no difference in the published rates; I don't know anything about the rates they have actually made.

234. State whether or not during any portion of the time elapsing since July 31, 1900, you have been furnishing gas to any person or corporation at prices other than those which you have published, or the regular public rate?

Objected to same grounds.

A. We have not so far as I know and I think I know all the cases. I want to make three exceptions, however, to that; we furnished gas to the court house and the post office on contract; we had two contracts with the post office and the court house and we had given a rebate to the cottage hospital.

235. When was the contract made with the county of Peoria with reference to lighting the court house?

A. My recollection is it was made in the summer of 1900, either in June or July, and ran for one year at 25 cents a thousand cubic feet.

236. What have you to say with reference to the other contract?

A. The other contract was with the post office and Government building in which we are now sitting; my recollection is it was for the fiscal year beginning July 1, 1900, at the rate of 25 cents per thousand.

237. Did you carry out both those contracts?

A. No, we did not carry them out.

238. For how long a period of time did you furnish gas at those prices?

A. I could not tell without reference to the books of the company; I think it was only two, three or four months.

239. What was the reason that the whole contract was not
1597 carried out?

A. Because our attorneys advised us we could not discriminate that way.

240. Is it not true that you have, during a portion of the time

elapsing since July 31, 1900, been furnishing gas to private consumers on contract at less than your regular published rate?

A. No sir, we have no contracts with private customers.

241. Do you know whether or not any such contracts are in force in Peoria and are being recognized by your company?

A. No I don't know of any contracts of that sort.

242. Is it not true that during the early history of your company you did make contracts of that character?

A. No, we only made two contracts, the ones to which I have referred.

243. Do you know to what extent the Peoria Gas Light & Coke Company made contracts upon the basis to which you have already testified on terms of one, two or five years?

Objected to as incompetent, immaterial and hearsay.

A. No, I do not.

244. What elements controlled in fixing the prices at $1.25 gross for light and 85 cents gross for fuel at the time you advanced the rates on or about July 31, 1900?

A. We fixed those prices at what we thought we could afford to sell gas at. That is to say, we put the prices—in the first place I want to say in explanation of that, that my own feeling has been from the standpoint of manager of the company that under the conditions prevailing in Peoria it was better for both the public and the gas company to have two prices, one for light, the other for fuel, and the prices which were fixed were fixed with the idea that they were as reasonable as the company could afford to make and were low prices from the standpoint of the public.

1598 245. How did those prices compare with the rates prevailing during the time you were engaged in the construction of your plant and for a year preceding the time you began to furnish gas in Peoria?

A. The net prices during that year as I remember were $1.25 for light and 75 cents for fuel.

246. Is it not a fact that your company made a good deal of capital out of the fact that about the time your ordinance was presented the old company had cut the rates on illuminating gas from $1.35 gross to $1.00 even?

A. I don't think so; I was not here during the time the ordinance was pending, with the exception of the time I stated yesterday, and I had no understanding at that time that that was being used as an argument or that it was an important factor in the mind of anybody.

247. Then if it was so used it was without your knowledge or cooperation, was it?

Ans. Yes sir.

248. Permit me to refresh your recollection and ask you if it is not a fact that for at least a year before you began to serve gas the

regular rate for illuminating purposes had been $1.00 and the regular rate for fuel purposes 75 cents without any rebate on either?

A. I don't think it was a year; my recollection is that at the time the ordinance was pending, which as I remember was along in the latter part of March and first part of April, 1899, the Peoria Gas Light & Coke Company changed its rate from $1.25 for light and 75 cents for fuel to $1.00 all around, and that rate was in force when the ordinance passed and for some little time afterwards, I don't remember how long, but some weeks. I think that rate continued in force up to about the time we commenced to supply gas.

1599 249. What, if any difference, did the existence of those rates, during the period covered by your construction make in your plans?

A. Not any.

250. When if at all since the time referred to by you when you met Mr. McKinley and others in Chicago and the rates were discussed, have you had any conference with the management or representative of the Peoria Gas Light & Coke Company with reference to the same subject matter?

(Objected to as immaterial.)

A. I don't recall any conversation on the question of rates.

251. During the time covered by your residence in Peoria have there been more than two public gas plants, or gas plants, engaged in the manufacture and distribution of gas for public purposes?

A. No.

252. During what portion of that time have both of those plants been in operation, manufacturing and supplying gas to consumers in Peoria?

A. Since we commenced up to about the first of last November.

253. Since that time how many gas companies have been manufacturing?

A. Since about November 1st, 1901, the gas has all been made in the plant of the Peoria Gas & Electric Company.

254. When within your knowledge was it determined that the manufacturing plant of the Peoria Gas Light & Coke Company would be shut down?

(Objected to as incompetent and immaterial.)

A. It was some time last October.

255. What were the circumstances leading up to the determination of that question so far as your knowledge extends?

Objected to same grounds.

A. I received a letter about October 2nd, 1901, from Mr. McKinley, president of the Peoria Gas Light & Coke Company, stating——

256. (Interrupting.) I am not asking for the contents of the

1600 letter but the circumstances which led up to the determination of that question.

A. That was the immediate circumstance; he asked for a proposition from the Peoria Gas & Electric Company for supplying them with gas; I answered that by giving them a proposition and it was followed up by a contract between the two companies.

257. I don't care to have you state the contents of papers. Was that the initiative in the proceedings resulting in the suspension of manufacturing operations on the part of the Peoria Gas Light & Coke Company?

A. So far as I knew; I know in a general way their plant was getting into a bad condition, but that I learned chiefly from Mr. Eustace, who was then their superintendent, and as he had been in our employ I would talk with him from time to time when I met him.

258. You have no personal knowledge of that?

Ans. No sir.

259. Did you know at that time how recently the stack of the Peoria Gas Light & Coke Company had been entirely rebuilt?

A. I knew they had put in new benches somewhere about nine or ten months before that; their benches were started up just before ours.

260. Is it not true that about that time their entire stack was rebuilt and the newest and most modern furnaces installed?

A. Do you speak of a stack in a gas man's nomenclature?

261. Yes that is what I mean.

A. Yes they had a new stack of benches.

262. Had you ever prior to July 31, 1900, made a thorough examination of the manufacturing plant of the Peoria Gas Light & Coke Company for the purpose of determining its efficiency and physical condition?

Ans. No, I had not.

263. Then any opinion you had upon that question was entirely hearsay was it not?

1601 A. Yes sir, that is anything more than what I could see from looking it over from the outside.

264. The operating plant proper, with the exception of the holders, was entirely within the building was it not?

A. Yes sir, I knew nothing about the condition of the plant except by hearsay.

265. Did you know how recently the holders had been built?

A. No.

266. What was their condition so far as they appeared to you?

A. They looked as if they were being used.

267. And apparently they were as good as ever?

A. Of course they would never be as good as ever, for they would be subject to the ordinary depreciation, but they were in a usable condition.

268. Did you know at that time that within a comparatively recent period many of the buildings had been built new?

A. No, I didn't know that.

269. Didn't they have that appearance to you as you saw them from the outside?

A. The old retorts did not look so; the purifying house looked to be all right; the holders looked to be all right so far as I could see.

270. The old retort house was not in use at that time at all?

A. No not after July 31, 1900.

271. Has it been in use since you came to Peoria?

A. Yes it was in use up until the latter part of February, March or April 1900.

272. Was that the time the new stack was completed?

A. Yes sir.

273. State whether or not pending negotiations which resulted in the arrangement by which you undertook to furnish gas to
1602 the Peoria Gas Light & Coke Company, you had any conversation with Mr. McKinley, or any other gentleman representing his company, upon that subject?

(Objected to as incompetent and immaterial.)

A. No, I think not; I think the proposition, as I say, was made by letter and was answered in writing by myself, and not until after the acceptance of that proposition, the general acceptance,—it was modified somewhat before the contract was completed—not until after that did I have any conversation with him or visit the plant or see anybody about it.

274. Was that the first time you had ever visited the old company's plant?

Ans. No.

275. On what former occasions had you been there?

Objected to as immaterial.

A. The only time I now remember was along in 1895 when I was in Peoria and went in the plant.

276. Was the plant then in full operation?

Ans. Yes sir.

277. And it was the only one supplying gas in the Peoria territory?

Ans. Yes sir.

278. Within your knowledge has it been in operation continuously since?

A. I do not know about that of course.

279. Did you know at that time how long the plant had been in operation?

Ans. No sir.

280. Do you know now?

Ans. I do not.

281. Is it not true that a gas plant kept in repair will last indefinitely?

Ans. No it is not.

282. Why not?

Ans. Because it is subjected to the action of the elements; it is subject to antiquation by reason of changes in processes and methods and subject to the depreciation which any manufacturing plant must meet, and a special depreciation due to the particular kind of business for which it is used.

1603 283. Without referring to the question of the mechanical appliances becoming antiquated, is your answer the same?

A. Yes sir.

284. Is it not true that it is necessary to keep up repairs constantly on a gas plant?

A. Yes sir.

285. And is not the same thing true of any manufacturing plant?

A. Yes sir.

286. What portions of a manufacturing gas plant are subject to the greatest depreciation from actual use in the process of manufacture?

A. The retorts themselves would be the first to suffer and would suffer the greatest depreciation; next would come the arches.—I am speaking now with special reference to the manufacturing plant—then probably the boilers, furnaces and the mouth-pieces to the retorts.

287. You mean by that do you the cast iron facings?

A. Yes sir, the retorts themselves are fire clay and the mouth pieces I refer to are the cast iron facings or doors that close the retorts with their frame. Then the tar extractor, washers and condensers.

288. In speaking of those do you refer to the whole devises themselves or only certain parts?

A. In the case of the tar extractor I refer more to the working parts inside of the shell of the tar extractor; cast iron will not depreciate much but the internal parts depreciate rapidly.

289. Are those driven by power for the purpose of agitating the——

A. (Interrupting.) No, a tar extractor is made of two or more sheets of steel set in a vertical position; one of the sheets contains very small round holes, generally about one-eighth of an inch in diameter and that we call the face sheet; the next one setting

1604 behind it has slots and is so arranged that the gas, being forced through the round holes, infringe on the flat surface of the plate and miss the slots, the result being to offer a mechanical obstruction to the gas carrying the tar or heavy carbon or hydrocarbon that runs down on these plates and the action of the sulphur in the gas eats the plates on the edges and quite quickly destroys them; there is a water seal in connection with that and a counterbed and the amount of plates exposed to the action of the gas is determined by the gas pressure; it rises and falls; the washer has an arrangement of toothed plates, every other one of which is submerged in water or ammoni-cal liquor, and the gas forced by pressure down under those and up again gives it a tortuous course, washing out

the ammonia in the gas. The action of the sulphur and ammonia destroys those plates rapidly.

290. Then does this ammonia, or water charged with ammonia, after it reaches a certain degree of richness run to the ammonia well or cistern?

Ans. Yes sir.

291. Is this iron face of the retort front separate in each retort?

Ans. Yes, attached separate to each retort.

292. So if you desire to replace a retort again that could be done without disturbing the others in the bench?

A. No you could not replace another retort unless it should happen to be the top one; they are supported on tiles that are built from an arch over the combustion chamber and each retort is used in a measure as a bearing for the retorts above.

(The MASTER:)

293. Do you mean by that, if the under one should give away that all above that would have to be taken down?

A. Not all, but all immediately bearing on it would; you might take out part; it depends on the tile arches.

(Mr. TICHENOR:)

1605 294. I think you have testified that in a modern regenerative furnace the heat is more intense and the combustion more rapid than in the old style open furnaces. What is the advantage gained, if any, by the introduction of what is called the modern furnace or improved furnace as you have described it?

A. A higher heat results in a greater production of gas per pound of coal carbonized that has to be taken into consideration in the life of apparatus, cost of it, and it usually is figured and considered the proper thing to do.

295. If I understand your former testimony, in that form of furnace there is a sort of secondary combustion in the immediate proximity of the several retorts themselves so the heat is more directly applied than it would be in the old form of furnace?

A. Yes sir.

296. Those retorts were formerly made of cast iron were they not?

A. Ye- sir, in the early days of the gas industry.

297. But they were substantially the same in mechanical operation as the modern retort?

A. Yes, that is to say, the theory was the destructive distillation of coal in an enclosed retort from which the oxygen was excluded.

298. And the gas would be driven in what is termed a stand pipe?

A. Yes, through a standpipe through the hydraulic main.

299. What is the life of a modern bench as compared with the life of an old bench in a general way?

A. I should say as a general proposition, all the benches that

have been built within say the last ten or fifteen years, that the arch itself would last about as long under the modern system as the old arches used to last. That is to say, within the last relatively few years the arches and the dividing wall between the various arches have been made much heavier and with a better class and grade of material than was formerly used and that heavier
1606 and stronger construction is intended to protect against the higher heats, the result being that the type of apparatus in general use now I would say would last just about as long as was customary with most of the old forms of benches; that is a question that is determined almost entirely by each engineer; there is no set of rules I am familiar with for the thickness of the arches or the thickness of the division walls, and I have observed a great deal of difference between them, all of which has its bearing on the life of a bench.

300. How does the present life of a retort itself compare with the old form of retort when iron was used?

A. That depends almost entirely upon the manner in which the retort is constructed and handled; there is a considerable variation in retorts made by different people and a considerable variation in the way in which the retorts are handled, but generally speaking I should say the present retorts would last about as long as the old fashioned retort.

301. What is the comparative cost of the construction of a stack at the present time as compared with its cost when the old form of retorts were used?

A. I think it is very much greater now—probably fifty per cent. greater.

302. To what is the additional expense mainly due?

A. A better class of material, heavier construction and more used.

303. Did you in your former answer intend to cover the life of a stack proper or did you intend to confine your reply to the separate portions to which you specifically referred?

A. We always speak of a retort separate from the bench. That is to say, a bench consists of one or more arches in which are located the furnaces or combustion chamber and retorts
1607 themselves. Now every arch will stand a number of refillings, that is to say, new furnaces, new retorts, new combustion chambers are put into the arch and when we speak of the life of a stack we generally mean the life of the brick work in the arches as distinct from the filling of the arches.

304. Over what period of years ordinarily can that filling be replaced so as to make the arches themselves reasonably effective and serviceable?

A. Most arches will last anywhere from eight to twelve or thirteen years and in exceptional cases where the benches are not worked hard and have had unusual care they will run longer, perhaps fifteen years.

305. Under the present system of driving off the gas is it not in-

tended to keep the heat at practically a uniform point during the process of destructive distillation?

A. Yes sir, within certain limitations. That is to say, if your consumption is increasing on you rapidly it may be desirable to get a larger production of gas out of the coal, especially if it is a temporary increase rather than heat up another bench; in that event you raise your heats, or if your consumption was falling off but not enough to shut down a bench you reduce your heats; but, as a general proposition, you aim to keep your heat as near uniform as possible subject to those variations.

306. What is the effect in the quality of the gas produced in low temperature as compared with high temperature?

A. That depends a good deal on the coal and a good deal on the surrounding conditions. As a general proposition a relatively low temperature, which is not too low, gives a little better grade of gas than a high temperature. In other words, the first gas that comes off from the coal is richer in hydro-carbon; has more candle power and more heat units than the gas that comes off the last end
1608 of the burning off of that charge.

307. You are speaking now of the common volume, the volume being the same.

A. Yes the object of the higher heat is to drive off the greatest amount of gas contained in the coal; of course we never get it all.

308. It is true, is it not, that in a gas plant very little mechanical power is required?

A. Yes, very little relatively, that is, very little motive or rotating power.

309. And engines, pumps and the like of that are subjected to the same load in the same way they would be subjected to in any other form of industry?

A. Not quite the same; the engines used are used to run the exhausters and for converters or some machinery of that sort; in the case of the exhauster, an exhauster engine should last longer than most other engines; a converter engine used intermittently and often and subjected to severe strain while used would perhaps find harder service than most engines are put to.

310. Those converters are for moving coal?

A. No, in our plant we use them only for oxides which require a good deal of power while it is in use, that is, if we are in a hurry we crowd it hard.

311. The load carried by the exhauster is nearly constant, is it not?

A. Yes sir, very nearly a constant load, but the pumps are often driven hard, then again stand idle.

312. Those pumps as I understand it carry nothing but water You have no pumps for moving tar or ammoni-cal liquor?

A. Yes we pump tar and ammoni-cal liquor and oil with them.

313. Those are ordinary steam pumps, are they not?

1609 A. Yes sir.

314. My recollection is in your examination heretofore you have spoken of changes necessitated in a gas industry by reason of improvements. Is it not true that in any form of industry the same subject is an item of importance. Are not all different manufacturing interests affected more or less by development in particular lines and by improvements which necessitate changes in mechanical appliances?

A. Unquestionably so, to a greater or less degree according to the nature of the industry.

315. Is it not also true in making changes of that character dispensing with one method of manufacture and substituting another, it is done for the purpose of increasing the earning capacity of the plant?

A. That is true as a general proposition but it is also subject to exception.

316. But the idea of making a change of that kind is to better the condition of the plant?

Ans. Yes sir.

317. I think you also testified that the expenses of distribution have been materially increased in modern times. Is my recollection correct?

Ans. Yes sir.

318. To what is that fact due?

A. It is due to two or three conditions; partly to the fact that better service from gas companies is attempted, that is to say, they are required to keep their mains in better condition; an amount of leakage that would have been permitted by city authorities years ago would not be permitted now, it would be considered a nuisance, and the traffic being heavier in the streets more care has got to be given to your main system to see it is in proper order. The principal thing, however, is a general change in the method of con-

1610 ducting the business. That is to say, gas companies generally realize today that they are selling a standard product at retail for which they must find a market and they don't simply wait for such business as comes to them but try to get it; they look after complaints better, look after customers' desires and needs better; then there has been an increase in the advertising and what might properly be termed the promotion expenses of the business, advertising, soliciting, getting customers, trying to sell gas, increasing the business.

319. What is the comparative hazard to which the pipes are exposed in unpaved streets as compared with the same in paved streets?

A. That depends a good deal on the manner in which the pipes are laid, the depth of covering and the kind of soil.

320. I was speaking with reference to the traffic.

A. I was going to say if the pipes lay deep enough then the sur-

face traffic does not materially affect them whether they are under paved or unpaved streets.

321. Under the modern form of paving streets is it not true that the pipes may be laid very near the surface and not be subjected to the slightest damage or the slightest hazard.

A. I would not conside- it so; I would consider it desirable to keep the pipes as low as possible; if I had to lay them near the surface I would be watchful of them.

322. Is it not true that before any damage could be done to any piping system the concrete base of the street must necessarily be broken?

A. That would be true as to mechanical injury but if your pipe lay sufficiently near the surface of the street so it felt vibrations the effect of that would be shown in a comparatively short time by the weakening of the joints of the pipe and might very materially increase the expansion and contraction due to changes in
1611 atmosphere.

323. Is not that hazard very largely overcome by the modern joint?

A. No, I think not; the joint is practically the same as made twenty-five or thirty years ago, only it is made heavier and stronger.

324. Is not a joint known as the pocket joint used in gas pipe?

A. That has been used for 25, 30 or 40 years.

325. And it is laid in substantially the same way?

A. Yes sir, except that some companies use cement for we will say three joints out of every four or four joints out of every five, then they put in a lead joint; every third or fifth joint will be lead in order to take care of the contraction and expansion.

326. That cheapens the expense does it not?

A. I don't think it does; my experience has been that the extra care required to make a good cement joint offsets any decrease in the cost of material used; it is just a question of whether you want to take the chance of having the pipe pull apart and make a complete break or whether you will be content to have a number of small leaks.

327. Is it not true that all of this detail you have referred to tending to increase the expense of distribution is all done by gas companies for the purpose of increasing their business and revenue?

A. Some of them are but not all of them.

328. Soliciting, advertising and everything of that kind is done for the purpose of getting business?

Ans. Yes sir.

329. The same as is done in any other line of business?

A. Yes sir.

330. And it is done with the expectation it will increase the net returns?

Ans. Yes sir.

1612 331. How long is it since your company has employed any solicitor?

A. I think the last soliciting we did was to get some business down in the eighth ward where we could not lay mains—we got shut off there and we quit and have not done any more soliciting except we keep one man out most of the time during the summer season selling gas stoves.

332. How long ago was it you were at work in the eighth ward?

A. I think it was in the fall of 1900 or the spring of 1901.

333. Is it not true that since the 31st of July 1900 there has been practically no soliciting done on the part of either gas company in Peoria?

A. No, we have worked as hard as we could to sell gas stoves; we keep one man going the proper season at work at it and a portion of the time two.

334. But there has been no soliciting done in any other direction except in an effort to sell gas stoves?

A. Yes, we solicit light as well as fuel; we solicit for light in the fall and fuel in the summer and spring.

335. Have you done that continuously?

A. Yes sir, up till now and are doing it now.

336. You do that for the purpose of extending your business?

A. Yes sir, trying to extend the business and sell more gas.

337. Is it true that the more gas is sold the greater the profit to the company?

A. Necessarily so if you are selling at a profit.

338. In the main then, if I understand your explanation, all of those questions are managed in precisely the same way as similar questions are handled in any manufacturing industry, the idea being to extend the business more and more?

A. The only difference between our business and any other
1613 business is we make the stuff ourselves and we have a limited field in which to sell; we have not got a general market.

339. I think your former testimony shows that the plat offered in evidence correctly presents the ground and buildings of complainant company as they existed at that time. Is that correct?

A. Yes sir, at the date of the plat; I think that plat is substantially correct as the plant was at that time.

340. Are the figures indicating dimensions and material of that character as shown on that plat also correct?

A. I think so; I did not take the measurements myself except as to part of them but my instructions were to take careful and accurate measurements and mark them exactly on the plat.

341. That is supposed to be a scale drawing in every respect made by an engineer skilled in that line of work?

Ans. Yes sir.

342. How much ground in acreage has your company at that place?

A. I cannot tell without figuring, for I never figured it that way;

as I remember we have two pieces, one piece is substantially about 335 by 320 feet square—it is not a true rectangle; then we have another piece 110 feet by substantially 300 feet—it would be nearly three acres all told.

343. Was all that property purchased at about the same time?

A. Yes sir, the main piece was bought first and the other piece was bought shortly afterwards.

344. What proportion of that area is at the present time occupied by your manufacturing plant?

A. About three-fourths of it.

345. And about one-fourth of it is unoccupied?

A. No, the other one-fourth is occupied for the storage of materials of various sorts.

346. Is it not a fact that at the time that purchase was made it was the intention of your company to use it for the location
1614 of an electric plant as well as the gas plant?

A. No, not at the time the purchase was made; we were undecided at that time whether we could get in an electric light plant on that ground or not and we were also undecided as to the amount of coke storage that would be required or how much ground would be required to store coke; we should have bought such ground as there is there without any electric light plant.

347. Is it not true that in Peoria the coke market takes your product substantially as fast as it is manufactured?

A. No, the local market here absorbs not to exceed $\frac{2}{3}$ and generally not more than one half of the coke produced.

348. How much do you ordinarily carry in stock?

A. It depends on the season of the year; there is no particular sale for coke in the summer time outside of the industry and we have to accumulate anywhere from 2,000 to 3,000 or 4,000 tons during the summer time.

349. How much area would reasonably be required for the storage of that quantity of coke?

A. Well, if you store it as it is usually stored you would want pretty nearly two acres for it.

350. That hardly answers the question. How much ground would reasonably be required to store the coke there?

A. That is what I mean, that much would be a reasonable requirement; of course, if you want to go to the expense of building an expensive building up in the air, you could put more of it on a less space but the amount of ground necessary to take care of it where you merely wheel out of the retort house and dump it—the amount necessary to store in this market—would be about two acres.

351. Is it necessary for coke to be protected from the weather in order to preserve its usefulness?

A. Not for ordinary trades there are certain trades which
1615 demand a dry coke and then it should be shedded.

352. How does your company store it?

A. Out of doors.

353. Have you always done so?

A. Not always, we built the shed in the corner of the ground next the river for the dry storage of coke and have had coke in it several times and expect to use it in that way.

354. Do you know how much ground there is in the plant occupied by the Peoria Gas Light & Coke Co.?

An. No, I do not.

355. Do you know whether it — greater or less than yours?

A. Yes, it is considerably greater than ours.

356. Do you know whether it is all occupied?

A. No, I do not, only in a general way, I know that the bulk of it is used in some manner at some time of the year but just how much in proportion I could not tell.

357. Is that also the case since they have discontinued the manufacture?

A. The buildings are there and they have had coke in there until very recently.

358. The plat offered in evidence and to which you have recently referred covers all the improvements, as I understand you, as they were at the time the plat was made?

A. Yes, I think that covers everything that was on the ground at that date.

359. You had one ammonia well and one tar well, did you?

A. We had one well for ammoniacal liquor, crude liquor, and one well for the concentrated liquor and one tar well.

360. What is the capacity of each of those ammonia wells?

A. The crude ammonia well has a nomical capacity of 22,722 gallons and an actual capacity of somewhere about 17,118 gallons; the concentrated ammonia well has a nominal capacity of
1616 8,350 gallons and an actual capacity of from 7500 to 8,000 gallons.

361. What is the difference in the two classes of stock which you store in those wells?

A. The crude liquor is the liquor just as it comes from the apparatus and it is then redistilled and concentrated in strength for the purpose of sale and after being concentrated it is stored in the other tank.

362. What is the capacity of the tar well?

A. Nominally about 51,000 gallons and actually about 30,000 or 35,000, due to the fact that the off-take pipe necessarily had to be put lower down from the top than was originally intended.

363. At what point do you divide the expenses between manufacturing and distribution—those are the two grand divisions, are they not?

A. Yes sir. We divide the manufacturing expense from the distribution expense at the yard. That is to say, the materials and labor employed inside of the gas works yard, with the exception of our fitting shop and store room, goes to the manufacturing cost. Outside of the yard goes to the distribution cost, except as to such

expenses as go to administration. We do not make merely the two divisions of manufacturing and distribution but we have manufacturing distribution and general expense or administration.

364. As I understand you then, everything pertaining to original construction, improvements or repair in the manufacturing plant proper, including holders, is charged to manufacturing?

A. No, nothing in the way of construction is charged and nothing in repairs is charged. The manufacturing under our system is merely the cost of manufacture, then we have repair account in addition to that which takes care of repairs and a construction account which takes care of construction.

365. Do you mingle those in any way so as to make them
1617 a part of either your manufacturing or distributing accounts, or are those entirely separate and distinct and carried as such?

A. Entirely separate and distinct.

366. In what way, if at all, do those items enter into the account which you keep of the actual cost of gas delivered to consumers?

A. Which item do you refer to?

367. Construction, improvement, repairs.

A. They do not enter into that question at all.

368. Are they not taken into account?

A. All the construction, improvement or extension accounts at the close of the fiscal year are closed into the general plant account or additions to property; the operating accounts, which include the repairs and maintenance, are closed into profit and loss.

369. What items do you charge to distribution?

A. First the wages of the superintendent of distribution; the wages of meter readers, meter setters, the pumping of drips, the routine work incident to repair of the main system, plus any distribution supplies, such as any small articles used to fix up consumers' stoves or apparatus, or anything of that kind that is given gratis and meter boxes and that sort of thing.

370. Do any office expenses go into that account?

Ans. No sir.

371. In other words then, all of those items pertaining to material and labor in the field?

Ans. Yes sir.

372. Were those items taken into account in your former testimony wherein you testified to the cost of gas?

A. Yes sir, those were all included.

373. Does your company maintain more than one office?

A. We have a works office at the works, but only one general office, excepting that the general books of the company are kept in Chicago.

1618 374. Do you also keep a complete account of everything in Peoria?

A. No, not of everything. We don't have anything here in Peoria

with reference to the general accounts, or assembling of the accounts, and the general ledger is kept in the Chicago office.

375. And all the material which ultimately finds its way into your general ledger is in Peoria in the first instance necessarily?

A. Yes sir.

375. Is the office work for the electric part of your business kept and handled in the same office?

Ans. Yes sir.

376. And handled by the same men?

A. Not by the same men necessarily; that is to say, we have an electric cashier, whose work is entirely on the electric accounts; a gas cashier, whose work is entirely on the gas accounts, and we have one clerk who works on electric accounts and another clerk who works on gas accounts in the book-keeping of our office here.

377. And are those charged to the different accounts?

A. Those are charged one set to the electric expenses, the other to gas expenses; then the remaining salaries are prorated monthly to the two businesses according to the amount of work done each month.

378. That depends on the amount of work done in each of the two departments?

A. Yes sir, we keep as close track as we can of the amount of work done by the various clerks and try to see that each department gets its proper proportion of the charge.

379. Is that rule followed also with reference to officers' salaries?

Ans. Yes sir.

380. How is it with reference to rentals?

A. That is divided between the two branches.

1619 381. My recollection is you testified before in this case that the possibility of natural gas is in the nature of a hazard to one engaged in the gas business. Near Peoria has natural gas in paying quantities yet been discovered and put into actual use?

The MASTER: The witness was fully examined with reference to that when he was on the stand before on the part of the complainant and I do not think I will allow you, Mr. Tichenor, to cross examine him now on such matters as were proper subjects of cross examination when he was a witness in chief before.

Mr. TICHENOR: I do not see why we cannot make him our own witness and examine him as broad as we please.

The MASTER: I don't know of any rule that will allow you to make him your own witness and go over the same subject — went over in his examination in chief before on which he was cross examined, or if he was not cross examined about it the opportunity was there for cross examination. I do not think I will permit you, unless the court directs me so to do, to open up the examination in chief of this witness again simply because he is called as your witness.

Mr. TICHENOR: I never heard of that rule before, although it

may be true. Suppose the witness was not cross examined at all when on the stand before?

The MASTER: Then I do not think you could recall him now and cross examine him on the same thing when you waived the cross examination before. That is my impression but, if you desire to press the inquiry, you may go on with the examination.

Mr. TICHENOR: If I am wrong I do not want to press the inquiry.

The MASTER: You have called this witness as your witness; you do not claim, do you, by reason of his being called as your witness you can now direct an examination in chief to him that was available to you upon cross examination when he was called as a witness for complainant?

1620 Mr. TICHENOR: That is what I am maintaining but the master thinks I am wrong.

The MASTER: I do, but of course, I cannot exclude the testimony.

Mr. TICHENOR: I do not propose to go into any field or line of examination to get it into the record simply because I can do so. If I am wrong, I want to know it and for the time being I will accept the master's ruling.

382. Early in your examination you referred to a contract made with the Peoria Gas Light & Coke Co. under which your company is now furnishing that company with gas. When with reference to October 24, 1901, was that contract made—I am speaking of its actual execution.

Objected to as incompetent, immaterial, not the best evidence.

A. I think it was made a few days before that.

383. Who participated in the negotiations which led up to the execution of that contract?

Objected to as incompetent, immaterial because whatever negotiations were had were merged in the written contract.

A. I don't think anybody but myself and Mr. McKinley. That is to say, I submitted the matter to our board of directors and was authorized by them to make a contract and when the contract was drawn it was signed by me and sent to Mr. McKinley for his signature.

384. What is your recollection as to whether or not that authorization was given at a meeting of the board of directors?

A. Yes sir, it was given at a meeting of the board, I am quite clear.

385. State whether or not the subject matter was also presented to Mr. Walsh and Mr. Walton?

Ans. Yes sir.

386. Where, in Chicago or Peoria?

1621 A. I do not recollect; my recollection now is I called Mr. Walton on the telephone and talked with him about it; it was a telephone conversation between Mr. Walton and myself.

386. How long were negotiations pending before the instrument was actually executed?

Objected to as incompetent and immaterial.

A. I should say approximately about two weeks—between two and three weeks.

387. Who, on the part of your company, had to do with fixing the price to be charged the old company for such gas as you were to furnish under that contract?

A. I did; I gave my recommendation of what I thought we could afford to do it for and presented it to the board and talked it over with Mr. Walton as I now remember it.

388. Did you also discuss the subject with Mr. Walsh?

A. I think not; I think I had no personal talk with him about it.

389. In how many parts was that contract executed?

A. In duplicate, one for each company.

390. Have you with you at this time your company's copy of the contract in question?

Ans. Yes sir.

391. Are you willing to produce it?

A. Yes sir (witness producing contract).

392. Has this contract been in your possession all the time since it was executed?

A. It has been in the vaults of the company here.

393. State whether or not the price provided for in that contract has actually been charged by your company to the Peoria Gas Light & Coke Co. and by it paid for such gas as you have furnished it?

A. It has all been charged and all been paid except the
1622 last month.

394. How and when are those payments made?

A. Monthly in cash.

395. Have those settlements been made monthly during the time the contract has been in effect?

Ans. Yes sir; I think one month run over until the next but I think that is all.

396. Who makes the payment to your company?

A. The cashier of the Peoria Gas Light & Coke Co.

397. Is he a resident of Peoria at work here?

Ans. Yes sir.

398. What constitutes the basis upon which those settlements are made?

Ans. The terms of the contract.

299. Yes, but how is the amount arrived at?

A. By taking the amount of gas delivered to them, as shown by the station meter, and the amount of gas sold, as determined by the sum of the consumers' meters. That amount of gas is charged to them at the price of the contract and the leakage or loss of gas is charged at another price, as shown by contract.

400. Who keeps the record of the station meter—takes and keeps it?

Ans. Either Mr. Eustace, the superintendent, or Mr. Barber, the store-keeper.

401. How frequently is that taken?

A. I think twice a day—that is my instructions.

402. Has anyone else access to the meter house?

A. Not that I know of.

403. You are referring to the meter of the Peoria Gas Light & Coke Co., are you not?

Ans. Yes sir.

404. Who takes the meter statement of consumers of the Peoria Gas Light & Coke Co.?

Objected to as not the best evidence, it is virtually asking for the terms of the contract which has been shown to be in writing and has not been offered in evidence.

A. Our employés.

1623 405. To whom are those reported in the first instance?

Objected to same grounds.

A. They are reported in the first instance to our superintendent of distribution.

406. Who pays the wages of the men taking the meters to which you have just referred?

A. The Peoria Gas & Electric Co.; they are its employés.

407. Those meter statements are taken monthly, are they?

A. Yes sir.

408. Has this method, which you have described with reference to determining the quantity of gas furnished by your company to the Peoria Gas & Electric Co., obtained continuously since October 24, 1901?

A. Since the latter part of October, I have forgotten the exact date, but it was along about the 24th of October, 1901.

409. State whether or not you keep a record from month to month of the readings of the meters of consumers of the Peoria Gas Light & Coke Co.?

A. Those entries are made in the route books which belong to the Peoria Gas Light & Coke Co.; each meter reader has a route which he follows in reading his meters and a book is given him which covers merely the consumers upon his route; that book is the property of the Peoria Gas Light & Coke Co.; the reading of the meters is done under the supervision of our superintendent and the book is turned in to him by the meter reader, he looks it over and checks it in any manner he wants to for his own information and turns it over to Mr. Bickwell in the office of the Peoria Gas Light & Coke Co.; a statement is made up from the book and sent back with the book to us for verification; our clerks take it and check the statement with the original books; the two cashiers then O. K. the statement and the book goes back into the custody of the Peoria Gas Light & Coke Co. and remains there until the next month.

1624 410. Prior to the time these books, to which you have referred, go into the hands of your superintendent of distribution, is there a record made in your office of those readings?

A. No sir, we have no record of it.

411. Does your superintendent of distribution make a record of those readings while the book is in his hands?

Ans. No sir.

412. Is there kept in your office a record of those readings?

A. No sir.

413. Have you anything on your books of account or records at this time showing from month to month the quantity of gas you have furnished to the Peoria Gas Light & Coke Co. since you first began furnishing it?

A. Yes sir, we have a record of the total amount but not of the meter readings.

414. When is that total taken?

A. Taken at the close of each month—the last 4 or 5 days of each month.

415. With reference to the time the work of taking the statements is completed is that summary made up in your office before the original books go to your superintendent of distribution?

A. No the meter readers do not make any entry except simply the figures of the state of the meter; they make no subtraction to ascertain how much each customer has used; those subtractions and the sums of the different amounts are made in the office of the Peoria Gas Light & Coke Co.; the book is then sent back to us and the subtractions are then made by our clerks and the sum of the amount of gas consumed, as shown by the books, is entered up and our statement is then compared with theirs.

416. And those summaries are the entries you have in your own books to which you have referred?

Ans. Yes sir.

417. And that constitutes the basis of your statement from
1625 month to month?

Ans. As to gas furnished, yes sir.

418. Is the contract, concerning which you have testified, as having been made between your company and the Peoria Gas Light & Coke Co., which went into effect on or about October 24, 1901, the document now shown you marked "Exhibit 32"?

Ans. Yes sir.

419. Have any additions or modifications been made to that instrument since it was originally executed in writing or otherwise?

Ans. No sir, not that I am aware of.

420. State whether or not the instrument as it now stands is still in full force and effect and being operated under?

A. It is being operated under, although our company has been notified that under the conditions of the contract it would be cancelled on or about August 15th next.

421. But at the present time it is in full force and effect?

A. At the present time it is in force and is being operated under.

422. How frequently are the readings of the station meter of the Peoria Gas Light & Coke Co. sent to your office?

A. The readings are not sent to the office; I get a daily report from the superintendent showing the amount of gas that has been delivered to the Peoria Gas Light & Coke Co. but the reading itself is not sent to the office.

423. It is different in that respect from the taking of the meter statements?

Ans. Yes sir.

424. Do you mean by your former answer the amount that has actually passed through the station meter, or the amount that has passed into their mains?

A. I mean the amount that has passed into their possession through the station meter—the amount delivered to them; I have no means of knowing whether it is in their holder or in their mains.

1626 425. In those figures sent to you showing quantities delivered, is any account whatever taken of temperature or barometer?

A. The amount is stated after the correction has been made.

426. In determining the volume of gas for which the Peoria Gas Light & Coke Co. is to pay, how are the figures coming from the station meter and those coming from consumers' meters used?

A. I don't understand you exactly.

427. In determining the volume of gas for which the Peoria Gas Light & Coke Co. shall settle at the end of the month, do you use the station meter figures or the consumers' meter figures?

Ans. The station meter figures, after being corrected, are used in determining the volume of gas which they pay for.

428. Do you take into account at all at the end of each month the volume of gas consumed as shown by the individual consumers' meter reading?

A. Yes, that is paid for at one price and the difference between that and the station meter reading, which is the loss of gas or unaccounted for gas, is paid for at another price.

429. A little while ago you spoke of having received notice of a proposed cancellation of this contract; when was that notice given?

A. It is dated February 15, 1902, and I received it either February 15th or the day following.

430. Did it come to you through the mail?

A. My recollection is it came to me through the mail.

431. Since the contract in question became operative, has there been any change in the method of arriving at the amount to be paid monthly by the Peoria Gas Light & Coke Co. to your company?

A. I think none that I know of.

432. Are there any corrections for temperature or otherwise made in the volume of gas as reported from the meters other than

627 as you have now testified?

A. No; the correction for temperature you know is made

to bring the temperature of the consumers' meter as near as possible to the average temperature of the gas going out; that is the object of making the correction. Gas increases in volume as the temperature rises; nearly all consumers' meters are set at places where the temperature is lower than the temperature of the station meter or of the holder; the station meter registers the gas going into the holder; now the amount made during the day is accounted for at the station meter but the amount sent out is made by taking the reading of the holder itself—our rule is at 7 o'clock—and either adding or subtracting the gain or loss in the holder as the case may be. Now experience and discussions in the various associations of gas men have shown that experiments made prove that the average temperature throughout the year of a given number of consumers' meters is about 70 degrees. Now, if the outside temperature and the temperature of your station meter is more or less than 70 degrees corrections are made correspondingly so as to get at the true volume going out. In other words, there would be a discrepancy in the summer time, the gas would be registered at a lower temperature and the consumers' meters would show less in proportion than the storage holder and station meter; in the winter time it would be the reverse; so to ascertain what is the true loss or unaccounted for gas between the works and consumers' meters corrections are made for temperature. In this locality it is not a matter of much importance but further north or further south it is important.

433. Then the volume as corrected constitutes the basis for all your subsequent work?

A. Yes sir, it constitutes the basis for all our calculations.

1628 434. State if you to any extent participated in the proceedings resulting in the increasing of the capital stock of complainant company?

Ans. Yes sir.

435. Do you know what the reason was for increasing that stock?

A. Yes sir.

436. What was it?

Objected to as immaterial and irrelevant.

A. It was primarily for the purpose of obtaining the electric lighting plant.

Complainant objects to the answer as immaterial and irrelevant and moves the court to exclude it.

437. When did you- company acquire the electric lighting plant?

Objected to as immaterial, irrelevant, incompetent and not pertaining to any issue in this case.

The MASTER: I think I will let him answer that.

A. My recollection is it was in February, 1901, but I am not quite clear about that; I could not tell definitely without reference to the records of the company.

438. In what manner was the acquiring of the electric lighting plant accomplished?

Objected to as immaterial, incompetent, irrelevant and not the best evidence.

The MASTER: Do you mean by that, was it done by acquiring the stock or physical property?

Mr. TICHENOR: Yes sir.

The MASTER: What difference does it make?

Mr. TICHENOR: Quite a good deal.

The MASTER: He may answer subject to the objection.

A. The Peoria Gas & Electric Co. bought the property and assets of the Peoria General Electric Co.

439. Do you know whether or not at that time and in making that purchase your company also received the capital stock of the electric lighting company? 1629

Objected to as incompetent, irrelevant, immaterial and not pertaining to any issue in this case.

A. No sir, it did not.

440. Under what authority was that purchase made?

Objected to same grounds.

A. I don't quite understand the question. It was made by the company.

441. Yes, but who authorized the purchase to be made?

Objected to as incompetent, irrelevant, immaterial and not the best evidence.

A. The stockholders of the Peoria Gas & Electric Co.

442. Prior to that time, had the Peoria Gas & Electric Co. been engaged in the electric business?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I don't think it material.

Mr. TICHENOR: I would like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. Yes it had a small business of its own.

443. Do you know what was done with the stock representing that increased capitalization of the complainant company?

Objected to as incompetent and immaterial, irrelevant and not the best evidence.

A. I don't quite understand what you mean. The electric lighting plant—Interrupted.

The MASTER: No, the question has no reference to that. I will not allow the witness to go into that.

Mr. RITCHER: I made a proposition here yesterday with regard to this record and I made it under certain conditions, those conditions

being that I would select with Mr. Little's aid those protions
1630 of the minutes as we understood pertained to this case and that the master should then go over it and select such other portions as in his opinion pertained to the case, and then if the gentlemen saw fit to accept it well and good, but otherwise they would have to go at it in the regular way. Now, if the gentlemen are going to trench on the record I want to call attention to that proposition so whatever position I may take later will be understood.

The MASTER: Is it claimed by you that the minutes of the proceedings of the board of directors of complainant company show what was done with the increased capitalization of the company?

Mr. RITCHER: The witness has testified the stockholders authorized the acquisition of that property and the capitalization was increased in order to acquire that property.

The MASTER: It would not be competent to prove anything orally that can be established by the record. Mr. Tichenor, if you intend to offer this record, I think it fair to the master and better for the record that you offer it now before you pursue inquiries that may be fully answered by the record of it. It is difficult for the master to rule on what is competent or incompetent when he does not know what the record shows.

Mr. TICHENOR: All right, I am perfectly willing to accept that suggestion.

The MASTER: If there are matters pertaining to this inquiry not disclosed by the record, I will, after the record is in evidence, be able to pass on the objections made more intelligently.

Mr. RITCHER: Is the record called for now under the proposition I have made?

Mr. TICHENOR: I am calling for the record; I simply said to the master I would accept the suggestion he made. I understand that to be the matter submitted for our consideration at this time.

The MASTER: Yes, I think you ought to introduce the
1631 record under the stipulation made by counsel for complainant. I merely suggest you take that course now in order to enable the master to pass on these objections made to your last two questions which may be answered by the record itself.

Mr. TICHENOR: Do I understand the gentleman proposes to furnish us copies of such portions of the record as they think is competent?

Mr. RITCHER: No, I have fixed this record by fastening together the portions I deem immaterial and I propose to hand this book to the master and have him go over the portions covered up and have him indicate what portions he thinks should go in, if any, that I have covered up, and then cover up such portions as he deems immaterial and then you can offer the book as it is or have the portions you desire read into the record.

Mr. TICHENOR: So far as I am concerned I do not propose to put my hand on that book in any way, shape or form under the present circumstances. It has been argued here that I am endeavoring

to pry into the affairs of the company as to such things as do not in any way pertain to this case, and I propose to hold myself in a position hereafter where that question cannot possibly arise. So, so far as I am concerned, any matters that I am expected to see I will look at them from copies and not from the book itself.

The MASTER: The master will not direct copies to be made unless the matter is offered in evidence. I was in hopes counsel would agree as to such portions of the book as should go in evidence, so the master would not have to go over the book and determine whether there were other matters that should go in, but the master is ready to perform his part under the stipulation, and if I find any portions of the book that are material in my judgment that have not been produced by counsel for complainant, I will call attention to it.

1632 Mr. TICHENOR: Well, we will be ready to take that matter up after the master has performed the service he is to do in that connection and under the ruling of the master I do not think there is anything more to be done now.

Adjourned subject to the call of the special commissioner.

1632a COPY of EXHIBIT "20,"

The underscored figures being same as figures in red ink in the original.

1632v Vol. 6, Schedule "B." Israel C. Pinkney, Special Master.

Filed Jun- 3, 1903. Marshall E. Sampsell, Clerk.

1633 UNITED STATES OF AMERICA, } ss:
State of Illinois, }

In the Circuit Court of the United States for the Northern District of Illinois, Southern Division.

PEORIA GAS & ELECTRIC COMPANY } In Chancery. For Injunction
vs. } and Relief. Volume 6.
CITY OF PEORIA. }

Testimony taken in the above entitled cause for and on behalf of the defendant herein, before Judge I. C. Pinkney, special commissioner, at Peoria, Illinois, June 26, 27, 28, July 21, 22, August 18, 1902; at Chicago, Ill., August 19, 1902, and at Syracuse, N. Y., August 22, 1902, and at Peoria, Illinois, August 30, 1902, as set forth in the following pages.

Mr. W. T. Irwin, Mr. R. C. Ritcher, Mr. W. T. Abbott, appearing for the complainant.

Mr. Henry Mansfield and Mr. F. H. Tichenor, appearing for defendant.

Original of affidavit of Henry Mansfield as appears on page 1709 attached to end of original volume.

PEORIA, ILL.,

1634 THURSDAY, *June 26th*, 1902—10 a. m.

Parties met pursuant to call of special master.

Present: Judge I. C. Pinckney, special commissioner. Messrs W. T. Irwin, E. C. Ritcher and W. T. Abbott, appearing for complainant. Messrs. Henry Mansfield and F. H. Tichenor, appearing for defendant.

FRANCIS W. LITTLE, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. In a former part of your examination, when last upon the witness stand, you made some statements with respect to inspectors' reports pertaining to whether or not premises occupied by your company for gas service, were also occupied by the old company. I will ask you to state whether or not, since that examination, you have informed yourself upon that question to the extent of now being able to state whether or not your records will show what premises were being served by the old company at the time you began furnishing gas in 1900?

Objected to by complainant as immaterial.

By the MASTER: The witness may answer subject to the objection.

A. No, I haven't thought to look at those records at all since I was on the stand before.

2. Will you make that examination as early as reasonably practicable, and be prepared to testify upon that question later?

A. Yes sir.

3. At the time the various witnesses called by complainant company were investigating your records, in connection with
1635 yourself and Mr. Robb—if in fact you did participate with them in such examination—you may state whether or not they were given, in every instance, the exact lengths of services, and mains, and whether or not their testimony was in harmony with the figures which you gave them pertaining to those matters?

Objected to by complainant as incompetent and immaterial.

A. I have no recollection now of having been present when any of the witnesses who testified in the case examined the books and records. I have only a recollection concerning the instructions I gave Mr. Robb in connection with that matter.

4. Did your records at that time show the exact lengths of the piping referred to that had been installed by your company?

A. Yes sir.

5. In instructing Mr. Robb upon those questions, did you direct him to give only the exact mileage of such piping as had actually been installed by your company?

Objected to by complainant as incompetent.

By the MASTER: I think he ought to state what instructions he gave; it's objectionable as to form.

6. What instructions did you give Mr. Robb upon those questions?

A. I told him to show any of those gentlemen, and all of them, our plat books and records showing the number of miles and feet of main pipes which had been laid up to the various dates, and also the number of miles and feet of service pipes, and to give them the original records, which included the original plats of the mains and the original cards on which the location and lengths and sizes of the various service pipes had been entered, together with the dates when the service pipes were laid.

By the MASTER: This examination is directed to the in
1636 formation he gave to these experts who testified as to the value of the plant

By Mr. TICHENOR: Yes sir, as I understood it.

7. Have you made any examination for the purpose of ascertaining whether or not those experts did use the figures which your records contained?

Objected to by complainant, as incompetent, irrelevant and immaterial.

By the MASTER: I think it appears in the record that they did; he may answer.

A. I have not made any personal examination of that fact.

8. Those records, as I understand the testimony, showed all the piping that had been put in—both that in actual use as well as that not in use: Is that the fact?

A. Yes sir.

9. Had you any services in use on the first day of September, 1900, that were not put in by your company?

A. No, not that I have any knowledge of; I think not.

10. Have you ever had any such services in use?

A. I think not.

11. Then the figures which your records contained were only with reference to such as your company had actually put in, and those, and those alone, were the only services that you had in use?

A. Yes.

12. Or ever have had in use?

A. The only ones that I know of. I think I testified, either on cross examination or in the early part of the hearing, that in a case on Adams street, for some distance—I have forgotten the exact distance—some services of the Peoria Gas Light and Coke Company were attached to our mains, and we charged them with the
1637 gas which went through those services; but aside from that, I think there is no such service connected with our mains, excepting those which we laid ourselves.

13. State whether or not any of your mains were laid in streets or alleys paralleling the old company's mains.

A. Yes.

Objected to by complainant, as immaterial, and as having been gone over.

A. We have mains on the same streets as theirs.

14. Can you state from recollection about what mileage of mains you had that were laid in that manner?

Objected to by complainant as immaterial.

A. I cannot state it from recollection, no; in fact, I don't know what streets the Peoria Gas Light and Coke Co. have mains on where we also have mains; I am familiar with only our own system.

15. Have you at any time been furnishing gas to consumers along streets where your pipes were laid in the same streets as the pipes of the old company?

Objected to by complainant as immaterial and irrelevant.
Objection overruled.

A. Yes sir.

16. Can you state how many consumers you have that occupy that position?

Objected to as immaterial and irrelevant. Objection overruled.

A. What do you mean? How many consumers we have on streets where the old company has mains?

17. Yes.

A. No, I can't state that.

18. Have you any records that will show the consumers that you have now, or have had at any time, on any such streets or
1638 alleys, that were formerly served by the old company?

Objected to by complainant as immaterial and irrelevant.

A. I don't think we have any records that will show that with any considerable degree of accuracy, unless it may be that the inspector's reports, which I referred to in my last examination, show where the people have been using gas from some other company.

19. Do you know who owned the service pipes and meter connections used by the Peoria Gas Light and Coke Co. at the time you began to serve gas in Peoria?

Objected to by complainant as incompetent, immaterial, irrelevant and not the best evidence.

By the MASTER: You may answer from your personal knowledge.

A. I have no personal knowledge on the subject.

20. Do you know to whom they belonged?

A. No, I have no knowledge on the subject at all.

21. Do you know whether or not the old company, prior to the time you came into this territory to furnish gas, had required its consumers to furnish their own services and meter connections?

Objected to by complainant as incompetent and immaterial.

A. My understanding at the time we came here, was that the old company charged for services and for meter connections; under what sort of an arrangement that charge was made, I don't know; I don't know who the title and ownership of the services and meter connections rested in.

22. Have you ever known since?

A. No sir, I have not; I have no knowledge whatever as to the ownership of those services and meter connections.

23. I will ask you how many, if any, of those service pipes and meter connections were actually connected with your own
1639 mains and subsequently used for furnishing gas to former customers of the Peoria Gas Light and Coke Co.?

Objected to as immaterial. Objection overruled.

A. I don't know.

24. Do you know that you did *any*?

A. Yes, I think we furnished some.

25. State whether or not that is true with reference to all old com-

pany's consumers on streets where your mains paralleled theirs, so far as you subsequently obtained their customers?

Objected to by complainant as incompetent and immaterial.
Objection overruled.

A. I don't understand your question.

26. That you connected those service pipes with your own mains and used them?

A. You mean whether we connected all of the service pipes where the old company had customers?

27. No, I mean so far as you subsequently obtained their customers, along those lines?

A. Whether the new company used the service pipes of the old company whenever they got the old company's customers?

28. Exactly?

A. I don't think we ever used a service pipe of the old Co., or which had been put in by the old company—I don't know of an instance, and don't think there is an instance, where we connected up a consumer who had previously been served by the old company, without ourselves laying new service and furnishing new meter connections and new meters with the exception of some cases which I have mentioned, on South Adams street.

29. I'll ask you to state if it is not a fact, that at #203 1640 Main street, in this city, you cut off the old company's connection and connected the meter with your own pipes and have since been serving gas to that building?

A. I have no information on that subject; I could tell by looking up the record.

30. Will you examine your records and ascertain?

A. Yes.

31. I'll ask you to state if along those streets and alleys where your pipe was laid parallel to the old company's pipes, you did not regularly cut off their services and connect them with your mains, so far as you subsequently obtained their customers, using not only the consumers' services, but also their meter connections, which they themselves had paid for to the old company?

A. It was not a regular practice, and I do not think it was done in any instance; I have no recollection of any instance of that being done—any knowledge of it.

32. Then I understand you to testify, do I, that along all of those lines that your line has been made, you put in new service connections, and connected them up with your own mains, notwithstanding the consumer already had his own services in? Is that a fact?

Objected to by complainant as incompetent and immaterial.
Objection overruled.

A. That is substantially the fact.

33. Have you ever known of your company's cutting off any of

the consumers' services from the old company's mains, either during the process of construction by your company, or subsequently?

Objected to by complainant as immaterial and incompetent.

A. I have not at this time any recollection of that; I don't
1641 recall any such cases.

34. Who would have charge, or who did have charge, of work of that character?

Objected to by complainant, as immaterial and incompetent.

A. Mr. Robb.

35. To what extent, if at all, did your company use the consumers' meter connections in those places where the old company had formerly been serving gas?

Objected to as incompetent and immaterial. Objection overruled.

A. I have no knowledge of any of them being used.

36. Have you ever made any examination of premises which were formerly served by the old company and later by your company, for the purpose of ascertaining the facts in regard to such connections?

Objected to by complainant as incompetent and immaterial.

A. No, I have not.

37. Permit me to refresh your recollection and ask you if it is not true, that during the time of your construction and while you were securing consumers, special efforts were not made to ascertain upon what streets and in what locations the old company's services and meter connections could be used by your company so far as you succeeded in getting their former customers?

Objected to by complainant as incompetent and immaterial.

A. We may have made investigation of that sort, but my recollection is that we found, after examining the question only to a limited extent, that the majority of the old services were not suitable for our use—were too small, and laid in such a manner as not to be satisfactory to us, and I have no recollection now that we ever used any of their services, or connected any of their services to our mains; if there were any such cases I have forgotten them.

1642 38. What knowledge, if any, have you regarding the efficiency of the service system of the old company?—I am speaking, now, with reference to the services in the consumers' buildings.

A. The only knowledge I have is from the examination of a few services which I saw in the ditches when we opened our trenches and exposed their services. When I happened to be along, in those cases, I always investigated the service—examined its size and general condition.

39. And those pipes to which you refer, were services that were then in actual use?

A. I have no knowledge about that. Whenever I saw a pipe and saw it was a gas service pipe, I looked at it; but I did not go into it to see if it was in use, or make any examination on that score?

40. It is true, is it not, that along the routes where you parallel the old company's pipes, the old company have furnished a large amount of gas?

Objected to by complainant as immaterial.

A. I haven't the least information on that subject.

41. Do you know how much gas the old company was furnishing at the time you began to serve in Peoria?

Objected to by complainant as immaterial.

A. I cannot answer that, any more fully than I did on my last examination. The only information I had was the published information that was open to everybody.

42. And you said that source was reliable, did you not?

A. Yes, generally considered so.

43. In those premises formerly occupied by the old company, and later occupied by your company, did you also put in new meter connections?

A. Yes sir.

1643 44. And those and the new services were all charged as part of your construction account, were they?

A. The services were charged to the service account and the meter connections to the proper account.

45. Of what advantage would it be to a customer to have two full sets of meter connections in his premises?

Objected to as immaterial.

A. When we first began to investigate this question of meter connections, we found that the old gas Co. claimed the ownership in some instances, at least, of their meter connections; we found their meter connections were made differently from ours, and there was no advantage whatever in using their connections, so we furnished our own, concerning which there was no question as to the title or efficiency or sufficiency of them.

46. How did your meter connections compare in cost with theirs?

Objected to by complainant as immaterial and irrelevant. Objection overruled.

By the MASTER: If he knows.

A. I don't know.

47. Could you tell from the looks or appearance?

A. No, not without a personal examination; it's a question of the

abor that is put on it, as well as the material in it, and the market rice of the material.

48. You could tell pretty nearly, from your experience in the gas usiness, what the labor would cost?

A. Yes, I could give you an approximate idea of the relative alue of the two sets. My impression is ours cost a few cents each nore than theirs.

By the MASTER: Are you referring now to the meter connections at the service pipes?

1644 By Mr. TICHENOR: Yes, the meter connections at the service pipes.

A. We mean by that the lead connection from the service pipe p to the meter and from the meter to the riser.

49. Yes, those are the pipes to which I refer. What is the regular ize of those meter connections placed by your company?

Objected to by complainant as immaterial.

A. The most frequent size was an inch and a quarter.

50. What are the other sizes?

A. They range from an inch to two inches.

51. Upon what is that dependent?

A. Upon the size of the meter and the size of the service and the size of the house riser and also the length of the meter connection.

52. You have been using a different meter from those used by the Peoria Gas Light and Coke Co.?

A. I presume ours are manufactured by a different concern but they are substantially the same meter.

53. And they operate in exactly the same manner, do they not, so far as pertains to the measurement of gas?

A. Yes, all dry meters are very much alike; the principle of operation is the same.

54. How does the size of the meter connection compare with the size of the services?

A. They are usually of the same size.

55. What is the reason for varying, if it is done?

A. The meter is set with reference to the purpose for which gas is to be used, and the probable quantity of gas; that determines the size of the meter and the size of the meter determines the

1645 size of the meter connection; we have a standard coupling and fittings which are used, and it may be a relatively small meter will be placed in a house where a large service pipe has been installed for some reason; in that event there would be a reducer from the service pipe to the meter connection.

56. But the reverse would never be practiced?

A. No, it would reduce the pressure of your gas if you did that.

57. Has your company continued to put in services since September first, 1900?

Objected to by complainant as immaterial.

A. Yes.

58. State whether or not you have put in any new services in the territory occupied by the old company and to consumers already furnished by that company?

Objected to by complainant as immaterial. Objection overruled.

A. Yes sir.

59. Have there been a considerable number of such services installed during the period mentioned?

Objected to by complainant as immaterial.

A. Yes sir.

60. Who has paid for those services?

A. They have been furnished by our company.

61. Who has actually paid for the installation of all such services?

A. Our company has; we haven't charged anybody for them except in a few instances, where we have made arrangements by which we charged the consumer with the cost of the services and then given him free gas up to the amount of the service.

1646 62. In how many instances has that been done?

Objected to by complainant as immaterial.

A. I cannot tell you how many.

63. What was the purpose of that?

Objected to by complainant as immaterial.

A. That's a custom we have had for some time in cases where the cost of the service is excessive; in other words, our rule has been to give a free service up to 60 feet, and where the service is a long one, or requires the opening of a paved street, and particularly an asphalt street, we want to be assured that we are going to get an income out of it sufficient to warrant the investment.

By the MASTER: What do you mean by 60 feet?

A. Sixty feet from the curb line, up to the location of the meter.

64. For how long a period of time has that been the practice of your company?

A. It's been the practice here since about the time we commenced business; we have always had some arrangement where there was an excessively long service.

65. And you made charges of that character when the services were originally put in?

A. Not when they were originally put in. When we had a large force of them at work, we could put the services in more cheaply, although in a number of instances we declined to put in services where we thought it was excessive.

66. And you exercised judgment upon that question, didn't you

A. Yes.

67. And your judgment was final?

A. Yes.

68. In those cases to which you refer, have you charged
1647 the entire cost of such installatien to the customer, or only part of it?

A. Only a part of it; each case has been settled on its own merits.

69. And you settled it in your own way, did you?

A. Yes sir.

70. What amount, up to the present time, has your company collected from consumers, for services put in in that way?

Objected to by complainant as immaterial.

A. It's a very small amount, but I cannot state the amount from recollection.

71. Have there been no cases except those to which you have referred, where your company has compelled the consumer in the first instance to stand the expense of the installation of the services?

A. I don't think of any.

72. What is the fact? Are there any or are there not?

Objected to by complainant as immaterial.

A. Well, I don't think of any; I can't tell you that there are, or are not; I have no recollection of any.

73. In what manner are the accounts of the transactions carried?

A. The services of that sort are charged to service sales, the cost of installing them; a bill is made for that, which is carried into accounts receivable, and accounts receivable is credited when the bill is paid.

74. And then credit is given when the whole amount is paid?

A. When the final amount is paid.

By the MASTER: As I understand you, this expense of these connections put in in that way, is paid by the consumer of gas, in the gas bills?

A. No, he pays his bill in the beginning, and his gas bills
1648 are allowed to accumulate until they reach the amount which they have paid, and then they are wiped off and charged to profit and loss.

75. In other words, when the gas bills equal in amount the cost of this service, the gas bills are receipted?

A. Yes, the proportion, whatever it may be.

76. In the meantime, the money so paid in is in possession of the complainant company in every instance?

A. Yes; that is, if it's been collected; it depends on the credit of the individual; we do not always insist on payment in advance; it's paid in in the ordinary course of business.

77. Do your records show how many cases there are of that kind?

A. Yes.

78. Will you make an examination and report at a later date when called upon to do so?

A. Yes sir.

79. I would like to have all the items, and the locations of all of those cases?

A. All right, sir.

80. In how many cases, if any, has your company compelled the consumer in the first instance to stand the whole expense of installation?

Objected to by the complainant.

A. We have never, to my knowledge, charged anybody for immediate connection, and I have no recollection or knowledge of any cases where the consumer has been required to stand the entire cost of the services, under any other than some such an arrangement as I have spoken of.

81. Then there have been cases, have there, where the entire cost of the services in the first instance has been charged to the
1649 consumer?

A. There possibly have been such cases, with an agreement to rebate the entire cost in the use of gas.

82. And those cases are determined by you, are they?

A. Yes sir.

83. And it is under those circumstances that the service will be installed, and under no other?

A. No, not necessarily.

84. Under what circumstances would you still install the service?

A. The rule is, as I have said, to make no charge for the service; but where there is some special reason, because of the great expense of putting the service in, an arrangement of that sort is made, which is generally under my supervision, but in case of my absence, I presume there have been cases where Mr. Robb has exercised his judgment. I have no recollection now of any such case, but I presume there have been such cases.

85. State whether or not there have been cases of the character to which you have referred, where the prospective consumers have refused to stand the expense of placing such services?

A. I don't know of any. Those matters do not come to me originally, and I have no recollection of any such cases.

86. To whom would they go?

A. To the application clerk, in the regular way.

87. And has he authority to decide them on his own account?

A. No, the application is made to the application clerk, and is referred to the superintendent for investigation, and the details are usually arranged with the superintendent, unless there is something out of the ordinary course of business to call it to my attention.

1650 88. And by the superintendent, you refer to Mr. Robb, do you?

A. Yes sir.

89. And each of those cases is determined upon its individual merits?

A. Yes.

90. And if the customer accedes to the demands of the company he gets the service; otherwise he does not?

A. Probably that's so; we aim as far as possible to put those things on a universal basis, so each man under similar conditions is treated in the same way.

91. How many services has your company installed since the first of September 1900?

Objected to by complainant as immaterial?

A. I don't know.

92. Will your records show?

A. Yes sir.

93. Will you ascertain, and be prepared to testify upon that question?

A. Yes.

94. And I wish you would give it by months, if your records show it?

A. All right.

95. And I would like to have lengths and details called for in the former question.

A. As to each service?

96. Yes; that is, you can combine the material called for in this question, with that called for in the former question.

A. They will have to be made up separately. I understand your question to be that you want a description of each service that has been installed since September 1st, 1900, showing the date when it was installed, the size of the pipe and the length of the service?

97. Yes—or the month—and whether or not any charge was made on it, and whether or not that charge has been paid
1651 by the consumer, and by your company by way of refunding; and I want locations also, as to streets.

A. That will be, the services laid in each month, on each street, and the size of pipe and length of that service, or size of pipe and aggregate length of services, and whether or not the service was paid for by the company or by the consumer, and if paid for by the consumer, whether gas to the amount of it was refunded, or any part of it?

98. Yes, that's exactly what I want. And there's one other thing I desire; that is, whether or not it is an original service, or whether the premises were formerly supplied by the old company?

A. I will give you that information if we have it.

99. How long have you known the various expert witnesses that were called by the complainant in this case?

Objected to by the complainant as immaterial.

A. From one to five or six or more years.

100. You have known all of them, have you?

A. I think I have known every one of you, yes sir.

101. Do you remember through what channels those associations or acquaintances originated?

Objected to by complainant as immaterial.

By the MASTER: Answer subject to the objection.

A. I can take up each witness one by one and probably tell you how my acquaintance with them came about.

102. I don't care to have you do that, if you will state in a general way, and briefly, it will be satisfactory?

A. Through my general acquaintance with men engaged in the gas business and generally through meeting them at associations and conventions and in various ways of that sort.

1652 103. How many of those gentlemen are now or have been associated with gas companies in which John R. Walsh, of Chicago, is or has been interested?

A. So far as I know, not one of them is or has been associated with any gas company in which Mr. Walsh is interested, unless possibly Mr. J. H. Eustace.

104. Do you know whether or not any or all of those various gentlemen are members of any syndicate of gas companies, or interested in any such syndicate?

A. I don't think any of those men who testified in this case are interested in any syndicate, at least so far as I know, with the exception of Mr. Doherty, who is the general manager as I understand it, of the MacMillan syndicate.

105. Over what territory does that syndicate operate?

A. Throughout all of the country east of Denver, including Denver.

106. What connection, if any, is there between that syndicate and the Peoria Gas and Electric Co.?

A. Absolutely none.

107. Has there ever been any?

A. No sir.

By the MASTER: Let me understand you: In your prior answer you stated "throughout all the territory east of Denver and including Denver." Do you mean to be understood as saying they control the gas price throughout all that territory?

A. No sir.

108. Or simply operate in that territory?

A. I mean they own some 18 or 20 gas plants which are located in the States east of Colorado, with one exception—that of the Denver gas plant.

1653 109. You don't mean to be understood as saying that they control all the gas plants?

A. No, they have some 18 or 20 gas plants, out of probably 1000 gas plants in that district.

By Mr. TICHENOR:

110. How many gas companies are there in the syndicate or trust of which the Peoria Gas and Electric Co. is one, if any?

Objected to by complainant as improper in form.

By the MASTER: It does not appear in the record. I presume it will be followed up. Answer subject to the objection.

A. Not any. The Peoria Gas and Electric Co. is organized entirely on an independent basis and not a member of any syndicate or owned by any syndicate.

111. What were the circumstances leading up to the formation of the trust agreement of December 19, 1900, pertaining to the capital stock of the Peoria Gas and Electric Co.?

Objected to by complainant as incompetent and immaterial.

By the MASTER: He may answer it subject to the objection.

A. It was understood when the company was formed, or when I became interested in the company, and Mr. Walsh became interested in it, that all of the stock would be held as a unit and the continuity of the management preserved, during a period of years; the voting trust agreement was in pursuance of that original understand- and carrying it out.

112. I will ask you to state whether or not that understanding was had with all of the subscribers of the original stock of the complainant company at the time such subscriptions were made, or before?

Objected to by complainant as incompetent and immaterial.

A. I don't know.

113. When did you first know that such an agreement was
1654 to be made, or did you participate in the plans which led up to the agreement?

Objected to by complainant as incompetent and immaterial.

A. When I first came here and talked the matter over with Mr. Clark and Mr. Miller, I stated that would be our position, and it was assented to by them at that time. In my previous testimony I have stated when I first came here, and it was at that visit that the matter was talked over.

114. What were the reasons which prompted that action on the part of yourself and Mr. Walsh?

Objected to by complainant as incompetent and immaterial.

A. I think that has been answered.

By the MASTER: If there is anything further he may answer more fully.

A. That was the reason—to preserve the continuity of the management of the company.

115. State whether or not it was the original intention of yourself and Mr. Walsh in organizing this company, to take the entire voting power of the stock out of the hands of the several stockholders and place it in the hands of the trustees?

Objected to by complainant as incompetent and immaterial.

By the MASTER: I don't think this inquiry would be competent now. He may answer the question subject to the objection.

Objected to further by complainant, on the ground it was not the best evidence.

A. That *was* not the fact and *is* not the fact. The agreement was open to anybody who wanted to sign it, and it was signed only by those who voluntarily signed it; if they saw fit to delegate their voting powers to other people, that was the end of it.

116. State whether or not all of the stockholders of the
1655 complainant company did sign that agreement?

Objected to by complainant as incompetent, immaterial, and not the best evidence.

By the MASTER: He may answer that question.

A. I don't know.

117. Within your knowledge, is that trust agreement still in full force and effect?

Objected to by complainant as immaterial.

A. So far as I know, it is.

118. And is it true also that the complainant company is being operated at the present time, and has been for some months past, under that trust agreement?

Objected to by complainant as immaterial. Objection overruled.

A. No, the company has never been operated under the trust agreement; it has been operated by the officers and directors.

119. In how many parts was that agreement executed?

Objected to by complainant as immaterial and irrelevant. Objection overruled.

A. There's only one copy of the agreement that I have ever seen or know anything of.

120. Do you know where that copy is at the present time?

A. The last I knew of it, it was in the hands of the Equitable Trust Co. I presume it's held by them in trust; that's the provision of the agreement.

121. To what extent, if at all, did you participate in the formation of that trust agreement?

Objected to by complainant as immaterial.

A. I don't recollect whether I saw it until it was prepared and read it over after preparation, or not. I think not.

122. To what extent, if at all, were you previously con-
1656 sulted with respect to what it should contain?

Objected to by complainant as immaterial. Objection overruled.

A. I don't think I was consulted at all. My recollection is it was rated simply as an ordinary voting trust agreement, and I wouldn't be consulted any more than I would in the matter of a deed.

123. Then your recollection is you had nothing to do with it?

A. I do not recollect of it.

124. Do you know of any person interested in your corporation who did have any participation in it?

Objected to by complainant as immaterial.

A. So far as I know, it was prepared by the attorney for the trust company, and I have no further information about it.

125. Was it placed in your hands for execution by the different stockholders?

Objected to by complainant as immaterial.

A. No, I think not; I have no recollection about it.

126. I'll ask you to state whether or not you did or did not procure the signatures of some of the stockholders to that trust agreement?

Objected to as immaterial by complainant.

A. I may have done so; I do not remember now.

127. State if it is not a fact that while you were endeavoring to secure signatures to that trust agreement, some of them protested very vigorously against it and against any arrangement of that character?

Objected to by complainant as immaterial.

A. I have no recollection of anything of the sort.

128. Do you remember that you did actually obtain signatures to the documents in question?

1657 Objected to by complainant as immaterial.

A. No, I do not.

129. Do you know who did obtain them?

Objected to as immaterial.

A. I don't recall. I don't know who did it.

130. Do you know whether or not it was done through your office in Peoria?

A. I don't remember about it.

131. Did you yourself sign it?

A. Yes, I signed it.

132. I'll ask you to state whether or not the several Peoria stockholders have been paid back in some form, all of the moneys which

they paid on account of the 20% assessment made on the original capitalization of your company?

Objected to as incompetent and immaterial.

A. Yes, I testified concerning that in my examination on the last hearing, that they had received back a sum equal to the amount of their assessments.

133. And did they not also receive interest upon it from the time they paid it, up to the time it was refunded?

Objected to by complainant as immaterial and incompetent.

A. Yes, I think so.

134. Is it not true, also, that all of those payments were made through the Peoria office?

Objected to by complainant as incompetent and immaterial.

A. No sir.

135. Do you know how they were made?

A. I think all of the payments were made by me individually, or by the Equitable Trust Co. I don't think any of them were
1658 made by the Peoria Gas and Electric Co. at all.

136. In what capacity were you acting at the time you made those payments, or for whom were you acting?

A. I was acting as a member of a syndicate.

137. What syndicate is that?

Objected to by complainant as immaterial. Objection overruled.

A. It was a syndicate having no connection with the Peoria Gas and Electric Company's gas business.

138. Was it a syndicate interested in the operation of gas companies?

Objected to as incompetent, irrelevant and immaterial. Objection overruled.

A. No sir, it was not.

139. When were those several sums of money paid in the manner you have testified?

Objected to by complainant as incompetent and immaterial.

A. I don't recollect the date.

140. Can you tell pretty nearly the time?

Same objection.

A. I can't without referring to my check book.

141. Will you please refer to it and give me the data later?

Same objection.

A. Yes sir, I will.

142. I asked you some questions when you were last upon the witness stand, with reference to the manner of your accounting.

Some were omitted. I desire to ask you now, what books of account, or books of entry, with reference to the operation of the gas business in Peoria, are kept in the Peoria office?

A. The consumers' ledgers, receipt book, and manufacturing books, these latter being kept at the works; and the plat book, and card showing the details of applications for gas, laying of mains and services, and setting of meters, and the handling of the meters. None of the general books, outside of these, are kept in the Peoria office.

143. What is the scope of the consumers' ledger?

A. It shows the amount of gas used each month through each meter, the amount of the bill, date when the bill is paid; in other words, it's an account with each consumer, or rather with each meter.

144. And do you still have two meters in service in all premises where both fuel and illuminating gas are used?

A. No.

145. In how many cases have you two meters under such circumstances?

A. I don't know how many. In most of the cases where there were two meters, the second meter has been taken out.

146. In such cases there is no way, then, by which you can determine what gas is used for fuel and what for illuminating?

A. No sir, not where gas for both purposes is used.

147. How long is it since you discontinued the use of separate meters for the two purposes?

Objected to by complainant as immaterial.

A. I think about the first of last November.

148. That was about the time that gas for the two purposes was put on the same basis?

A. Yes sir.

149. Then there is no way by which you can determine now what proportion of your gas is used for fuel purposes and what for illuminating purposes?

A. Not accurately, no. We get at it approximately by keeping a record of the gas sent out in the day time and the gas sent out after dark; that's only approximate, however.

150. Do you keep in the Peoria office a permanent record of the cost of distribution and the cost of manufacturing?

A. No sir.

151. By whom are those accounts kept?

A. They are kept under the supervision of the treasurer, by the Audit Company of Illinois.

152. In Chicago?

A. In Chicago.

153. In what business is the Audit Company of Illinois engaged?

A General auditing and accounting business.

154. In what manner does the material for the accounting reach the Audit Company's office?

A. Through the regular monthly reports. The bills for expenditures are sent to them from day to day. The pay rolls go in twice a month, and the final details once a month, shortly after the close of each month.

155. What specific name, if any, is given to the monthly report?

A. We don't have any monthly report of that sort. We have what are termed monthly abstracts, which show the amount of gas sold and the amount of residual sold, and a monthly report by the storekeeper showing the material which he has issued out to the various accounts during the month, and the amount he has received from the manufacturing department.

156. To whom are these various documents to which you have referred, sent?

A. They are generally sent to the Peoria Gas and Electric Co. at the office of the Audit Company of Illinois.

1661 157. Has your company an office with that company or in the same building, or in connection with it?

A. No, the Audit Co. of Illinois receives mail addressed to the Peoria Gas & Electric Co. and opens it and makes the proper entries on the books, from the statements which are sent in the mail.

158. What becomes of the vouchers for the month, for disbursements?

A. Disbursements are all made by checks from the treasurer's office, and proper vouchers are taken, and are filed away in the treasurer's office.

159. Do those in any manner go before the Audit Co. of Illinois?

A. They all go before them and are entered on the books.

160. That is, the original vouchers?

A. The original vouchers are all entered on the books and then turned over to the treasurer.

161. Do you send those vouchers direct to the Audit Co. or the treasurer?

A. We do not have anything to do with the vouchers. We merely pay the pay-rolls here, and small payments. Larger payments, our custom is to pay on the 20th of each month, and those payments are made directly by the treasurer's check, and vouchers are sent out from his office.

162. But are those not paid through your office?

A. No sir.

163. Are they sent direct to the parties?

A. They are sent direct to the parties, and the vouchers are returned to the treasurer; we don't see them here at this office.

164. But the data for any such vouchers is furnished from your office, is it not?

1662 A. The bills for materials come to us, and are either entered in the store room books, or stamped with the charges direct

and approved by me, and are then sent to the Audit Co. for vouchering.

(Testimony of same witness continued:)

165. Are you familiar with the manner in which the accounts of your company are kept in Chicago?

A. Yes sir.

166. Please explain the system, doing so briefly.

A. We use the voucher system, and all bills for materials and supplies are vouchered and entered in the voucher register, which is the book of original entry. They are then transferred to the expense ledger, in which the various vouchers are classified under the proper account, and the expenditures for each month ascertained in each branch of the business. These are assembled at the close of the month, in the general ledger and journal of the company.

167. Are those vouchers entered in the voucher register prior to the time that they are actually paid?

A. Yes sir.

168. In the several steps which you have described, what, if any, attention is paid by the accountant to whether or not the item has actually been paid, or at what point does it become material?

A. It doesn't become material at all, if I understand your question. We use an "accounts payable" account, to which all vouchers are credited as they are made up. The "accounts payable" account is charged when any voucher is actually paid; that is to say, when a check is drawn for it; and the outstanding accounts payable is shown by the balance in the "accounts payable" account.

169. At the end of each month?

A. At any time.

170. You carry that balance at any time?

1663 A. Carry that balance forward at any time. In other words, the quick liabilities of the company are shown by the "Accounts payable" account.

171. Is there any corresponding account of "Accounts receivable"?

A. Yes sir.

172. How is that entered?

A. We carry a "Gas account" into which the earnings for the month are credited, and a "Gas sales account," which is debited. The credits to "Gas sales account" are made as gas collections are made. The miscellaneous sales, such as residuals, coke, tar, ammonia, sales of gas stoves, etc., are carried into the "Accounts receivable" account. The balance in the "Gas sales" account shows at all times the outstanding amount of uncollected gas bills, and the balance in the "Accounts receivable" account shows all outstanding amounts owing to miscellaneous accounts.

173. Then, except as to the items which go into those two accounts last described, they are alike, are they?

A. Yes sir.

174. How frequently do you report to the Audit Co. collections from any of the items concerning which you have testified?

A. Daily.

175. How is the fund itself, which those reports represent, handled?

A. The collections are made here and deposited in the Merchants' national bank. I pay the pay-rolls, freight bills, and all small amounts; the balance in the bank is shown each day, and when this Peoria bank balance reaches an amount more than I need for my expenditures here, I remit the remainder to the treasurer in Chicago.

176. Then in the first instance all of your receipts go into
1664 the deposit here?

A. Practically all.

177. Where are these vouchers prepared—in Peoria or in Chicago?

A. The vouchers for expenditures made by me are made up here. The other vouchers are made in Chicago.

178. Along what line is the division between expenditures made by you and those not made by you?

A. There is no arbitrary rule. I make such expenditures as I see fit here,—generally, however, paying out only wages, office rent, telephone rent, postage, car fares, express charges, telegrams, and other small items. Our rule is to pay on the 20th of the month for all materials received by us in the preceding month and those payments are made from the Chicago office, treasurer's office.

179. And that covers all classes of material, does it?

A. Yes.

180. What if anything, have you to do with such materials, or with the bills therefor, as pass through the Chicago office in the manner explained?

A. I have nothing to do with them, further than to approve the bill before it goes to Chicago. My approval means that the material has been received and that the price is correct.

181. Are those items for obligations which you personally have incurred in the way of purchases or otherwise?

A. Always on behalf of the company.

182. Yes, but done by you personally?

A. Not necessarily by me personally. The superintendents of the various departments are authorized to purchase what supplies they need not exceeding $10. in any instance except in an emergency.

183. You occupy the position of purchasing agent for the company, though, do you not?

1665 A. As a general proposition, yes sir.

184. What, if any, statements or reports do you make, either monthly or otherwise, of the nature of an operating statement?

A. The superintendent of each department,—that is to say, of manufacturing and distribution, make up monthly reports, which

show—in the case of a manufacturing report, the amount of manufacturing materials on hand at the beginning of the month, the amount received during the month, the amount used during the month, and the amount on hand at the close of the month. It also shows the same facts with respect to the gas produced, showing the amount on hand at the beginning of the month, the amount made during the month, the amount sent out during the month, and the amount on hand at the close of the month. Similar facts are shown with respect to the production of residual coke, and tar, and ammonia.

185. Those all come from the superintendent of the works,—the manufacturing department?

A. Those facts are included in the manufacturing report. The report also shows the average productions of the month,—that is to say, the amount of gas made per pound of coal, the percentage of the coke made which is used under the benches, the production of ammonia per ton of coal carbonized, and the production of tar per ton of coal carbonized. It shows a comparison with similar results obtained in the corresponding month of the previous year.

The report of the superintendent of distribution shows the total amount of gas sent out as reported by the manufacturing superintendent, the amount sold, the amount donated or used at the works, and office of the company, and the amount unaccounted for, or leakage. It shows the leakage per mile of mains; the total number of consumers at the beginning of the month, the number of new consumers added during the month, the number of consumers discontinued during the month, and the total number of consumers at the close of the month.

1666

It shows similar facts as to the services and meters of the Co., the number of meters on hand at the close of the month and not set. It also shows the mileage of mains of the various sizes, at the beginning of the month; the amount, if any, laid during the month; the amount, if any, taken up during the month, and the amount at the close of the month.

It also shows the number of complaints which have been attended to during the month, the nature of those complaints; and the number of gas stoves set, water heaters and other gas appliances, and a comparison with the corresponding month of the previous year with respect to all of these matters.

These reports are sent by me to the treasurer's office in Chicago, to enable them to complete the statistical records.

186. Then as I understand your answer, there is no monthly report or statement which shows the financial affairs of the company for any given period?

A. No sir, we have no practice of that sort.

By the MASTER: In other words, as I understand you, your affairs are reported daily, all your daily transactions?

A. We report the daily collections and disbursements of money from this office, and send a manufacturing and distribution report

monthly, together with the abstracts which I referred to in my previous testimony.

Going a little further into the details of the business, the amount of my collections as reported daily are charged to me as vice president of the company, and I am relieved of those charges by
1667 proper vouchers showing the expenditures which I have made, or remittances made direct to the treasurer's office.

187. How long has the system which you have now described, been followed?

A. Since I took charge of the affairs of the company.

188. State whether or not the company that keeps your accounts furnished to you, or to any of the other officers, from month to month, or otherwise, trial balances?

A. They do not furnish any trial balances to me; whether they do to the treasurer or not I do not know. I don't think they furnish it to anybody here.

189. State whether or not all of these funds concerning which you have now testified, are kept entirely separate and apart from the funds derived from the electric department of the complainant company?

A. No, we do not keep the funds separate; we keep one bank account here, which includes collections from both the gas and electric and against which checks for both gas and electric expenditures are drawn.

190. Does the Peoria Gas and Electric Co. carry any insurance?

A. Yes sir.

191. What kind and in what amount?

A. You mean on its gas business?

192. Yes?

A. It carries employers' liability insurance, and I think we have still in force a public liability insurance policy. We also have a tornado insurance on the retort house, purifying house, holder and coal sheds; and we have fire insurance on the materials in the store room, but not on the main buildings.

1668 193. What is the nature of this public liability insurance which you carry?

A. Insures us against any liability for damages suffered by any member of the public by reason of our negligence or for any cause for which we would be legally liable.

194. Does it cover escaping gas?

A. No, I think it wouldn't—it would depend on the circumstances; if we were legally liable for the escaping gas it would. It would cover escaping gas, or people falling into our trenches, or any accident of that kind happening to anyone not in the employment of the company.

195. It's in fact nearly parallel with the employers' liability except in another field?

A. Yes.

196. Can you state from recollection how much of these several kinds of insurance you are carrying?

A. No, I cannot. I think we carry an employers' liability policy of $5,000 as against any one individual and $15,000 as against any one accident, and a limit of $5,000 to any one individual and $10,000 to any one accident as against the public. The tornado insurance is between $20,000 and $25,000, and the fire insurance is somewhere about $10,000 or $15,000, if I remember rightly.

197. I don't remember whether you have already stated the annual amount of your insurance.

A. You mean the annual premium?

198. The annual premium, I mean?

A. I don't recall now, but I think it's about $300.

199. For all purposes?

A. In connection with the gas department.

200. State the salaries paid the different officers of the
1669 company, and also its superintendents.

Objected to by complainant as incompetent and immaterial.

By the MASTER: It's already been gone over in the examination of this witness in chief.

By the WITNESS: My testimony shows the amount paid out for salaries of all officers for the accounting department and what proportion of those salaries were charged to the gas department.

By the MASTER: No, the testimony in the records shows what was paid out to employés in the gas department. But whether it does or not, I am not disposed to allow you to go into it. The opportunity for cross examination was once tendered you, and I do not think it is competent to go into it now; still if you desire to press the inquiry, the master will permit the witness to answer.

201. Do your books of account in Peoria, or your records, show the charges that you have made against the Peoria Gas Light and Coke Co. from October 24, 1901, and that have been paid?

A. Yes sir.

202. And will your records also show the various items and the locations, of those expenditures?

A. It isn't handled in that way. We do four classes of work for them: We lay services, including the setting of meters, and the furnishing of meter connections; we set gas stoves, including both labor and material; we read their meters, and we attend to their complaints. We have a card system, by which services, meters, complaints, setting of gas stoves, etc., are all itemized,—that is, the record of each transaction is kept on a card. Those cards, as to the majority of them—I think probably as to all of them—are turned over to them at the end of the month accompanying the bill rendered. We also have a working order system, and against
1670 those working orders, the store keeper charges the material issued out of the store room for account of that company. An examination of the working orders and of the time books would

show just what labor each man performed and in what branch of the service; it would not necessarily show exactly what house he worked at, or what particular location he worked at.

The supply tickets, which affect our requisitions on the storekeeper, will show where the material was used that is taken from the store room and charged up by the store-keeper to them. The time books will show the number of hours that each man worked on the work of the Peoria Gas Light and Coke Co., and in a general way what the character of the work was. These bills are made up at the end of the month from the time-books and from the working orders.

203. But so far as those expense items are concerned, they are not available in your office, are they?

A. Yes sir.

204. Are those summarized by months, or in separate items?

A. The summaries are made up each month; in other words a bill is made out charging them so much for each one of the various things we attend to for them, showing both labor and material.

205. That is furnished in the form of a statement, is it?

A. It is furnished in the form of a monthly bill.

206. And do you retain duplicates of those in your own office?

A. Yes, those are all copied before they are sent to the Peoria Gas Light and Coke Co.

207. Have you, further, in your office in Peoria, a record of all other transactions between your company and the Peoria Gas Light and Coke Co.?

A. All that relate to the operation of the companies with 1671 which I have anything to do.

208. And are those also available in the shape of duplicate statements?

A. Yes sir.

209. Has your method of accounting between the two companies been the same from the time that your relations commenced in October, 1901?

A. Yes sir.

210. Will you produce those duplicate statements at the convening of the court tomorrow morning?

A. The charges against the Peoria Gas Light & Coke Company? Yes sir. Do you want them tomorrow morning?

211. If it's convenient, and if not, when it is convenient to you.

(Testimony of same witness continued Friday, June 27, 9.30 a. m.:)

212. What books and records are kept by the company at its office in Peoria, pertaining to the financial part of the gas business of that company at this point?

Objected to by complainant as incompetent and immaterial and as having been gone over several times.

By the MASTER: He may answer it subject to the objection, if there is any doubt about it.

A. The consumers' ledgers, which show the amount of gas used by each consumer, the value of the same, and the date when the gas is paid for; a cash book, showing the daily cash receipts for gas bills and miscellaneous bills. I think those are the only books we keep.

213. Have you in the Peoria office any books and records, or data, that will show disbursements, and the items for which
1672 such disbursements are made?

A. Yes, the cash book shows all disbursements for payments made from this office of the nature concerning which I testified yesterday. We have also letter-press copies of the pay-rolls, and copies of the store-keeper's monthly reports showing the issue of materials each month.

214. Have you also records of the items and amounts, so far as disbursements for this territory have been made through the Chicago office direct, in the manner that you testified yesterday?

A. No sir, the assembling of the charges and of the records of disbursements is all made in the Chicago office. They have items which we know nothing about, and no summary is transmitted to this office.

215. I understood you to testify that all such items as are paid from the Chicago office direct, originally passed through your hands. Is my recollection correct?

A. Not payments; the bills which form the basis of the vouchers pass through my hands and are approved by me, and are there paid. We know nothing about the payments.

216. But no record of those matters is kept in your Peoria office?

A. Only through the store-keeper's record, where the bills are charged to the store-room. Our method is this: When we buy material, it is always on a written order, a copy of which goes to the store-keeper; when the invoice for that material comes in, the invoice is entered on the store-keeper's books, and is stamped with a charge to the store-room, as assuming that the book-keeper in Chicago will charge "Store-room account" with it and will pay the invoice in regular course; but all we know about it is that we have
1673 received the material and that the store-room is charged with it.

217. Is it simply charged with the material, or does it also appear what the price is?

A. It is charged with the invoice, which shows the quantity of material, and the price, and the total amount of the invoice.

218. Are some or all of those bills subject to discount?

A. Some of them are.

219. Have you from time to time knowledge as to whether or not discounts are received on those items, or any of them, and if so, is any record of it preserved in the Peoria office, or at the works?

A. Here in Peoria we take no account of discounts,—that is to say, of cash discounts; at the end of the year a statement is made up showing the total amount of discounts which have been taken by the treasurer settling these bills, and it is reconciled with the store-keeper's account.

220. Then if I understand your testimony correctly, you have not in the Peoria office full records of the gas business of complainant Co. at this point, from which you can make up a statement showing the condition of its affairs for any given period?

A. No sir, we have not. We couldn't make any accurate statement.

In addition, we keep what is known as a working order record, from which we can tell the cost at this office of each different job; that is a record made up from the store-keeper's supply tickets and from the pay-rolls, and gives the cost of each particular job of work done; but no attempt is made to summarize this, or to get the entire cost of any particular branch of the business.

221. Do the accounts in Chicago also show all settlements made between your company and the Peoria Gas Light and Coke
1674 Co. during the time elapsing from October 24 last to the present time?

A. No, the Chicago accounts do not show that. Those charges to the Peoria Gas Light and Coke Co. are made on the consumers' ledgers the same as sales of gas to any other consumer, and for the work which we do for them in the way of setting meters, laying services, setting gas stoves, and looking after theirs, we render bills just as we do to any other individual for work *for work* or material furnished, and those settlements are made from this office and the collections are reported merely in the daily cash report the same as any other business. They cannot distinguish at the Chicago office between the Peoria Gas Light and Coke Co. and any other consumer.

222. Have you in your office records which show your gas settlements with that company?

A. Yes sir.

223. Do those records also show the quantities settled for upon the basis of the two prices?

A. Yes sir.

224. Then as to your dealings with the Peoria Gas Light and Coke Co. your Peoria records are complete, are they?

A. Yes sir.

225. That is to say, they contain all the material?

A. Yes sir.

226. Where, if at all, is kept the record showing the loss of gas in your own system, between your station meter and the consumers' meters?

A. It's kept here in Peoria.

227. It does not appear in the books in Chicago?

A. No sir, excepting as it appears on the monthly report of the

superintendent of distribution, concerning which I testified
1675 yesterday. The books of original entry concerning that are kept here, and the Chicago office has merely the superintendent's report.

228. Do your records in Peoria also show or account for the entire difference between your station meter register and the register of consumers' meters, separating the quantities into items?

Objected to by the complainant as not the best evidence. Objection sustained.

By the MASTER: If you want to press the inquiry he may answer subject to the objection.

By Mr. TICHENOR: No sir, I do not.

229. Is there a difference in your operation between the station meter register and the aggregate of your consumers' meters?

A. Yes sir.

230. To what is that due?

Objected to by complainant as having been gone into.

By the MASTER: Answer subject to the objection.

A. It is due to the loss of gas, which we generally call unaccounted for gas, which may be condensation, or gas lost by leakage in the mains, or to a difference in the date of reading the consumers' and the station meter. The record of the station meter is kept daily, and is summarized at the close of each month. In reading the consumers' meters we take four or five days at the close of the month for such reading; it may be, and in fact often is the fact that the number of days required to read the meters varies, so that the sum of the consumers' meters will perhaps cover 30 days' use of gas, while the record of the station meter will be for 31 days' make of gas; there will be a variation there.

231. But in the course of time those differences are equalized, are they not?

1676 A. Yes, substantially.

232. Is that item of loss, to which you have referred, the only difference between your station register and the quantity of gas sold for any month?

A. No. In the record of the consumers' meters—that is to say, in the consumers' ledgers, is kept a record of gas donated and gas used at the works and the office of the company; this gas if not charged out on the books of the company, and no bills are made for it, and we don't treat it as gas sold.

233. Those different items are measured through separate meters, are they, and the account in volume kept the same as other accounts?

A. Yes sir.

234. Are these settlements to which you have referred, with the Peoria Gas Light and Coke Co., kept in your books of accounts or in any books of account, or are they kept in the form of duplicate statements in your office?

Objected to by complainant as having been covered.

A. I think I testified they were kept as all our similar accounts are kept, in the consumers' ledgers for the gas furnished and in the regular way for material and labor furnished. We use what is known as a "bill and charge" system, by which all bills are made in duplicate, the original going to the debtor, a duplicate copy going to the proper department manager, and the triplicate copy going to the book-keeper. The original of the triplicate copies is kept on file, but is entered in a petty ledger, what we call the miscellaneous ledger; so we have not only a book of entry, but we have the triplicate copy of the original bill on file in the office.

235. We would like to have you prepare to testify as to the settlements with the Peoria Gas Light and Coke Co. from October
1677 24, last, up to the present time, along the lines covered by your previous testimony, and also with reference to the differences between your station register and gas sold from month to month, for the same time.

A. Let me ask just what you mean by that: I understand that you want a statement of the amount of gas sold to the Peoria Gas Light and Coke Co. each month since October 24, last, dividing it into the gas sold at 75c. and the gas sold at 50c. per thousand?

236. Yes.

A. Then, in addition, you want the amount of the unaccounted for gas of the Peoria Gas and Electric Co., including also, and showing separately, the gas donated or used at the works and office of the company for the same period?

237. Yes, and also other items which you have charged to the Peoria Gas Light and Coke Co.—that covers their account.

A. We have other charges to them, for labor and material, other than for gas, and you want them included?

238. Yes.

A. In other words, you want all transactions between the Peoria Gas and Electric Co. and the Peoria Gas Light and Coke Co. since October 24th last?

239. Yes, if you can furnish them in your office here.

By the MASTER: Are you prepared to testify on these matters now?

A. Not completely; I could testify as to some of them, but not as to all of them. Do you want to know when each bill was paid?

240. I don't care for that. They were paid about the beginning of the month, were they not?

A. Yes, during the month.

1678 241. I don't care for that. I can ask you a general question that will cover that.

A. It would necessitate my taking each bill and checking it back against the cash book to see when it was paid.

242. I understood you to say that the books in Chicago do not show your settlements with the Peoria Gas Light and Coke Co. in items. Is my understanding correct or otherwise?

A. Yes, it doesn't show the complete settlements.

243. And I also understood from your testimony that the books in Chicago do not show those differences between your station meter register and the gas sold, concerning which you have just testified. Was my understanding correct upon that question?

A. The books do not show it. The Chicago office has merely a copy of the superintendent's monthly report.

244. Are there any other matters pertaining to the accounting department of your company, so far as pertains to its gas operations in Peoria, that are not shown by the Chicago books and accounts, and that are shown by your accounts in Peoria?

A. The Chicago books of accounts do not show anything more than the summaries of consumers' ledgers and the miscellaneous ledgers. Those records are kept in Peoria.

245. And do those Chicago books show in items all of your disbursements for the different departments, or otherwise?

A. Yes, they do.

246. In what manner is it most convenient for you to show those two matters concerning which I have inquired, by making up a statement or by testifying from your books and documents?

A. Probably the most convenient manner would be to have copies of the original bills against the Peoria Gas Light and
1679 Coke Co. made, which I can present and identify.

247. And so far as pertains to the other question——

A. That can best be made from a written statement.

248. Then both of them would be written statements?

A. Yes.

249. If you prefer you can present it in that form. How much time do you want in which to present it?

A. I can have them ready by tomorrow morning, or this afternoon if the hearing goes on this afternoon. I have a copy of nearly all the bills, probably all of them if I examine them carefully, here and the statements concerning the unaccounted for gas and the gas used in the works and office and donated can be made up very quickly from the monthly reports in the records of the office.

By the MASTER: Couldn't that matter be shown by showing the difference between the gas manufactured and the gas sold?

A. That would aggregate it, but he wants the unaccounted for gas separated from the gas used at the office and donated.

250. Can you tell from your office records the dates on which gas rates were fixed or changed by your company, and what those rates were, from the time you began to operate up to the present?

A. Yes, I think so. I may possibly have no record of one or two changes, but I think I can give it all.

251. You will please look it up and make a memorandum of it?

A. My recollection is that I have testified on that, that I looked it up and gave that in previous testimony, showing the price at which we commenced to sell gas, and all changes, and when the

price was changed to $1.50 for light and 75c. for fuel, and then again when it was changed to $1 straight.

By Mr. TICHENOR: I believe you did, in a general way. I don't remember the other portion of it. If you did we do not want it again.

1680 HENRY W. BICKNELL, called on behalf of the defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. What is your business?

A. I am in the employ of the Peoria Gas Light & Coke Company.

2. In what capacity?

A. As a general clerk.

3. What are your duties?

A. I have charge of the books—that is, the principal books, attend to correspondence, and receive and disburse the funds.

4. How long have you been employed by that company?

A. Two years the first of May of the present year.

5. Had you had previous experience in the gas business?

A. No sir.

6. What line of business had you followed previous to your becoming connected with that company?

A. I was employed by the Portsmouth, Kittery & York Street railway.

7. Where?

A. At Portsmouth, New Hampshire.

8. I'll ask you to state whether or not you have been served with a subpœna to produce all books of account of the Peoria Gas Light & Coke Co., of Peoria, Illinois, from May 1, 1895, to May 1, 1900, including any and all books in which were made any entries pertaining to the business of said company; also all said company's secretary's monthly and other statements and reports to its board of directors, and to the company, and to its stockholders, for the same period; also all its treasurer's statements and reports to its board of directors, to the company, and to its stockholders, for the

1681 same period; also any and other reports, schedules, statements, papers, documents, data, memoranda, books and records of the said Peoria Gas Light & Coke Co. and of any and all of its officers, clerks and employés, for said period, pertaining to the business of said company, and especially with reference to its earnings during said period, and every part thereof?

Objected to by complainant, as incompetent and immaterial, and further that it makes no difference whether he was served with such subpœna or not, as he would have no right to produce any of the documents called for in such instance.

By the MASTER: Answer subject to the objection.

A. I have been asked to do that, but not being an officer of the company——

9. Were you served with that subpœna?

A. Yes.

10. I will ask you to state whether or not you have produced such books and documents called for by that subpœna?

Objected to by complainant, on same grounds as above.

By the MASTER: Answer subject to the objection.

A. I have not produced them.

11. Why have you not?

Same objection by the complainant.

A. I did not produce them because I considered I had no authority to do so without the advice of the counsel.

12. Who, if anyone, advised you not to produce them?

Same objection as above.

A. Not any one.

13. Then you just assumed that power, did you?

A. Yes sir.

1682 (At this point counsel for the defendant asked for an order on this witness to produce the books and documents in question. The counsel for complainant objected, and the master stated that there was nothing before him on which to base such order; that the defendant must first make it appear that such books and documents were connected with and material to the issues in this case.)

Continuation of examination:

14. Do you know who the officers of the Peoria Gas Light & Coke Company are?

Objected to as immaterial and incompetent.

A. Yes sir.

15. Who are they?

A. William B. McKinley president; George E. Macomber is treasurer.

16. Has the company a secretary also?

A. Yes.

17. Who is he?

A. W. T. Abbott.

18. Has it any other officers?

A. Not to my knowledge.

19. Where does Mr. McKinley live?

A. Champaign, Illinois.

20. Where does Mr. Macomber live?

A. Augusta, Maine.

21. Where does Mr. W. T. Abbott live?

A. Peoria, Illinois.

22. He is one of the attorneys for the complainant in this case?

A. I think he is.

23. What portion of his time does Mr. McKinley spend in Peoria?

Objected to by complainant as incompetent and immaterial. Objection was overruled.

A. Recently he has been here but a very small portion of the time; I get my instructions from him by correspondence.

24. How recently has he been here?

A. I think it was some two or three weeks ago that he was here.

25. On an average, how frequently has he been here dur-

1683 ing the time you have been employed by that company?

Same objection by complainant, as above. Same ruling.

A. Sometimes he would come once a month, and sometimes it might be two.

26. Does the treasurer of your company spend any of his time in Peoria?

A. He occasionally visits here.

27. How long has he been here?

A. He has usually made two or three trips per year.

28. And how much time does he usually spend here on the occasions of those different trips?

Objected to by complainant as incompetent and immaterial. Objection overruled.

A. Usually from one to two days.

29. Does either of those gentlemen perform any services in connection with your office work in Peoria?

A. They simply issue orders, and I receive any orders from them.

30. And those orders are issued from their respective places of residence, are they?

A. Yes sir.

31. Do they both issue orders to you?

A. Yes sir.

32. Do those two gentlemen issue orders to you indiscriminately, or do they severally cover different parts of the work?

Objected to by complainant as incompetent and immaterial.

A. Mr. Macomber issues orders in regard to financial affairs or business, and Mr. McKinley issues orders in a general way.

33. But different classes of orders?

A. Yes sir.

34. What office force has your company had since the 24th day of October, 1901?

1684 Objected to by complainant as immaterial and irrelevant.

A. There have been five employed; four beside myself; Mr. Gorman, Mr. Kelly, Mr. Benson and Mr. Alfs.

35. What are their respective duties?

Objected to by complainant as immaterial and irrelevant.

A. Mr. Gorman issues the working orders—that is, the orders to the workmen for doing any mechanical work; Mr. Kelly settles gas bills, and he also has charge of one of the consumers' ledgers, and also does other work. Mr. Benson has also had charge of one of the consumers' ledgers and assisted me in my work, in making the cash entries; and Mr. Alfs has attended to another consumers' ledger, and also has been employed as collector for the company.

36. Then you carry three consumers' ledgers, do you?

A. Yes.

37. What is the reason for that division?

Objected to by complainant as immaterial and irrelevant.
Objection overruled.

A. It's simply for the convenience of carrying the accounts and making the collections. The consumers are divided into three sections; of course, one book wouldn't carry all of it, and it's simply divided in that way for convenience.

38. How many consumers has the Peoria Gas Light & Coke Co. and how many has it had since the 24th of October, 1901?

Objected to by complainant as immaterial and irrelevant.
Objection overruled.

A. I don't know the exact number, but I should say somewhere between 4500 and 5000.

39. How has the number varied during the time you have been in the office?

1685 Objected to by complainant as immaterial, incompetent and irrelevant. Objection overruled.

A. Not very much.

40. During the time covered by your employment with the Peoria Gas Light & Coke Co., have you had entire supervision over the accounts?

A. I have of the principal books of the company.

41. Will you state in what manner those accounts have been kept during that time that you have been employed there—I mean with reference to the different books, and what material you enter in the different books?

Objected to as immaterial and irrelevant.

By the MASTER: You mean to confine it to the gas manufacturing business? It will be admitted subject to the objection.

A. We kept our books by what is known as the voucher system.

42. I don't mean that. I mean what books do you keep?

A. Our system of books consists of five books.

43. Please designate what they are?

A. We have a ledger, a voucher register, an expense register, and an "Accounts payable" ledger and a cash book.

44. Will you explain, briefly, each one of those different books, so far as it enters into the accounting of your co ?

Objected to by complainant as immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. The voucher register is the principal book of entry. All entries of every nature pass through that book, and the expense register simply is a book which subdivides the operating expenses of the company. The ledger, of course, carries all accounts of every nature which are carried by the company; and the "Accounts
1686 payable" ledger simply carries the personal accounts with whom the company deal; and the cash book carries all cash items, of course.

45. When are the entries in the voucher register, as you call it, made?

Objected to by complainant as immaterial and irrelevant.

A. They are usually made once a month.

46. I mean with reference to the handling of the vouchers?

A. They are made up once a month.

47. And during that time the vouchers are allowed to accumulate are they?

A. Yes, the month's vouchers are allowed to accumulate, and entered at the end of the month.

48. That book, if I understand you correctly, contains nothing except the register of vouchers?

Objected to as immaterial and irrelevant.

A. That's all.

49. What part in the transaction of the business of your company, do those vouchers perform?

Objected to by complainant as immaterial and irrelevant.

A. They simply are vouchers which carry all bills that we pay—in the nature of a receipt for all moneys paid out.

50. And that covers everything in the way of disbursements, does it?

A. Yes sir.

51. Does this ledger to which you have referred, contain anything with reference to your consumers?

Objected to by complainant as incompetent, immaterial and irrelevant.

A. Which ledger do you refer to?

1687 52. In your set of five, that you mentioned?

A. There are two ledgers in that set.

53. I didn't understand that.

A. Yes.

54. Will you explain what they are and what they contain?

A. One, which we call the principal ledger, carries the accounts of the company—the property accounts—supply accounts and its operating expenses. The other is simply an auxiliary ledger and carries the accounts of people we purchase supplies of; simply takes the personal accounts out of the main ledger.

55. In fact, your principal ledger, as you call it, contains everything?

A. Yes sir.

56. Is there any transfer at all of consumers' accounts from your consumers' ledger, or is that the final entry of those items?

Objected to as incompetent, immaterial and irrelevant.

A. The only connection is that at the end of the month when the consumers' ledgers are finally made up, the total amounts are entered in the principal book.

57. Is that in the nature of a cash item?

A. No sir.

58. It includes the aggregate for the month?

A. Yes.

59. Whether it has been collected or not?

A. Yes.

60. All of your accounts pertaining to the gas business are kept in the Peoria office, are they?

A. Yes.

61. And have been ever since you have been connected with the office?

A. Yes sir.

62. What, if any, operating statements, monthly or otherwise, do you furnish to the officers of the company, or to anybody else?

Objected to by complainant as incompetent, immaterial and irrelevant.

1688 A. I have rendered a monthly statement, which covers the trial balance, or balance sheet, and monthly operating statement—which carries the income and operating expenses under a cash statement.

63. To whom are those reports made?

Objected to by complainant as incompetent, immaterial and irrelevant.

A. To William B. McKinley, president, and George E. Macomber, treasurer.

64. To both of them?

A. Yes sir.

65. And do you also retain a copy of that in your office?

A. Yes sir.

66. Those, I understand you to say, are rendered each month, for the month?

A. Yes sir.

67. Who has power to audit the accounts which constitute the basis of the vouchers to which you have referred?

Objected to by complainant as incompetent, immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. I have paid out disbursements without auditing, without the approval of anyone, with the exception of occasional bills.

68. What, if any, peculiarity is there in those bills which you yourself do not pay until they have been ordered?

Objected to by complainant as incompetent, immaterial and irrelevant.

A. There have been but very few bills of that nature, and they have been in regard to legal expenses, and principally in connection with this case.

69. Not in connection with the operating account?

A. Not at all, no sir.

1689 70. Where are the funds received by your company kept?

A. At the Commercial national bank.

71. In Peoria?

A. Yes sir.

72. Has that been the case during all the time you have been employed here?

A. No sir.

73. Where otherwise?

A. At the First National Bank of Peoria.

74. In this city?

A. Yes sir.

75. During any part of the time that you have been employed by the Peoria Gas Light & Coke Co. has it kept an account at any other place than the two which you have mentioned?

Objected to by complainant as immaterial and irrelevant?

A. No other place, no sir.

76. Who in your office, if anyone, has charge of the handling of the funds, both in and out?

Objected to by complainant as incompetent, immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. I have had charge of the funds since I have been here, for the past two years.

77. What final disposition do you make of these vouchers to which you have referred?

Objected to by complainant on same grounds as above.

A. They are placed on file in the office.

78. In your office here?

A. Yes sir.

79. And that has been done ever since you have been there has it?

A. Yes sir.

80. You have stated that you furnished a copy of the operating statement, etc., to Mr. McKinley, and another one to Mr. Macomber at the end of each month: I will ask you to state whether or not you furnish a copy of this same document to anybody else?

Objected to by complainant as immaterial and irrelevant.

A. No sir.

81. Those are the only copies that you put out?

A. Yes sir.

82. Do you know what is done with those copies after they leave your possession—that is, after you deliver them to those gentlemen?

Objected to on same grounds as above.

—. No sir.

83. They never come back to you?

A. No sir.

84. Are there any men employed by your company except those five to whom you have referred?

Objected to by complainant as immaterial and incompetent.

A. No sir.

85. Has there been any change in the working force since October 24th, 1901?

Objected to by complainant as immaterial and irrelevant.

A. No, I think not; it's the same.

86. Does your company operate a gas stove department in connection with its other business?

Objected to by complainant as immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. Yes, we have until recently.

87. Who had charge of that while it was a part of your company affairs?

Objected to by complainant as incompetent, immaterial and irrelevant.

A. I purchased the stoves, and Mr. Benson and Mr. Alfs made the sales.

88. At the time you first entered the employ of the company, had it such a department?

Objected to by complainant on same grounds as above.

A. Yes sir.

89. How recently has it been discontinued?

Same objection.

A. It was discontinued the first of this month.

90. What was the reason for discontinuing it?

Objected to by complainant as immaterial and irrelevant.

By the MASTER: State if he knows.

A. Our company made a contract to have other parties handle the stoves.

91. Do you mean this particular make of stoves, or gas stoves generally?

A. Gas stoves generally.

92. With what other parties was it a contract was made?

A. The Gas Producers' Assurance Co.

Objected to by complainants as immaterial and irrelevant.

93. What is the business of that company?

Objected to by complainant as incompetent, immaterial and irrelevant. Objection overruled.

A. As I understand it, it's simply the selling of gas stoves for gas companies throughout a few States, wherever they make satisfactory terms to do so.

94. Does that company receive any compensation from your company for handling those stoves?

1692 Objected to by complainant as incompetent, immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. I haven't been required to make any settlement with them.

By the MASTER: That isn't the question.

95. When will such a settlement be made?

Objected to by complainant as immaterial, irrelevant and speculative. Objection sustained.

96. When is such a settlement to be made, if you know?

Same objection as above.

By the MASTER: Answer if he knows.

A. I do not know.

97. Who made the arrangement with that company, if you know?

Objected to by complainant as immaterial and irrelevant.

A. William B. McKinley, president of the company.

98. Was he here at the time it was made?

Objected to by complainant as immaterial and irrelevant.

A. He was here about that time, yes; the time the contract was made; but he was not here when the contract was executed.

99. Did you participate in the arrangement to which you have referred?

Same objection as above.

A. No sir.

100. What was the reason for entering into an arrangement of that kind, so far as the Peoria Gas Light & Coke Co. was concerned, if that reason is within your knowledge?

Objected by complainant, as immaterial and irrelevant.

By the MASTER: State if he knows.

A. I have no knowledge of the reasons.

101. What connection, if any, exists between this company
1693 to which you have referred and your own?

Objected to by complainant as incompetent, immaterial and irrelevant, and not the best evidence. Objection overruled.

A. No connection, that I know of.

102. Who is in charge of that company at this point?

Same objection by complainant.

A. I do not know.

103. Do you have anything whatever to do with the management of that company or with its business?

A. No sir.

104. How many new service pipes have been put in for your company since October 24, 1901?

Objected to by complainant as immaterial and irrelevant.

A. I do not know.

105. Have any?

Same objection.

A. Yes sir.

106. Do you know in what territory or location those pipes have been placed?

Objected to by complainant as immaterial and irrelevant.

A. No, I do not.

107. Do you know how many new meters have been set for your company during the same period?

Objected to by complainant as immaterial and irrelevant.

A. No sir.

108. Do you know approximately as to either of those questio
A. No sir.
109. Who pays the bills for any such work or material?

Objected to as incompetent, immaterial and irrelevant.
1694 By the MASTER: That is assuming it is done.

A. I pay them.
110. Does not that furnish you information as to the number
location?
A. No sir.
111. Who, if anyone, in your office, has charge of that part of
work?

Objected to by complainant as immaterial and irrelevant.

A. T. N. Gorman.
112. What are Mr. Gorman's duties?

Same objection.

A. He issues orders to the workmen for setting meters and p
ting in services and for other mechanical work.
113. To whom does he issue them?

Objected to by complainant as incompetant, immaterial and irr
evant, and also for the reason Mr. Gorman had already been on t
stand and answered for himself.
The MASTER: Answer subject to the objection.

A. He issues the orders to the foreman of the work-shop.
114. Of your own work-shop?
A. No, of the Peoria Gas & Electric Co.
115. You have no work-shop of your own, have you?
A. No sir.
116. How long is it since those orders have been issued in th
manner?

Objected to by complainant as immaterial and irrelevant.

A. Since November 1st, 1901.
117. That is since your works shut down?
A. Yes.
118. Who, if anyone, in your office, other than yourself, handle
the bills for any work ordered by Mr. Gorman as you hav
1695 testified?

Objected to by complainant as immaterial and irrelevant.

A. Bills for settlement?
119. Yes?
A. No one beside myself.
120. From whom do you receive those bills?

Same objection by complainant.

A. You mean the bills for mechanical work?

121. Yes?

A. I receive them from the Peoria Gas & Electric Company.

122. And to whom do you make payment?

A. To the Peoria Gas & Electric Co.

123. What classes of work are handled in the manner to which you have just referred?

Objected to by complainant as immaterial and irrelevant.

A. Setting meters, putting in service pipes, setting stoves, and taking care of the complaints.

124. You take care of the complaints in your own office, do you?

A. Yes.

125. So far as pertains to your own customers?

A. Yes.

126. From what source do you obtain your information to the effect that work purporting to be covered by these bills has actually been done?

Objected to by complainant as immaterial and irrelevant.

A. The work orders are returned to the office with a notation from the foreman who does the work that the work has been done.

127. Who, if anyone, in your office, makes any personal inspection or examination with reference to any such work?

A. T. N. Gorman.

128. He personally goes to the different places, does he 1696 and inspects?

A. I misunderstood the question; no sir, there is no one.

129. To whom are those work orders returned after the work has actually been done, or after it purports to have been done?

Objected to by complainant as immaterial and irrelevant.

A. Mr. Gorman.

130. Are they sometimes returned to you also?

A. Sometimes they come to me, but I usually turn them over to him for entry and marking on the register.

131. To Mr. Gorman?

A. Yes sir.

132. What proportion of his time does Mr. Gorman spend in your office, and has he, during the time you have been there?

Objected to by complainant as immaterial and irrelevant.

A. It would be difficult to tell the proportion of time, because he has other duties which call him out of the office; but I should say perhaps two thirds of the time.

133. Do you mean other duties in connection with your business, or in connection with other business?

A. In connection with his political affairs and other duties of a private nature.

134. And not connected with the company?

A. Not connected with the company.

135. So far as your company is concerned, his duties are all in th office——?

A. Ever since I have been connected with the office.

136. What, if anything, have you to do with your company' holders and with its distributing system?

A. I have nothing to do with it.

137. Who, if anyone, in your office, has anything to d
1697 with the system and holders?

Objected to as immaterial and irrelevant.

A. No one in the office; they are under the supervision of th president of the company; the president acts as superintendent also

138. But there's no one living in Peoria who has any authority over them, or has anything to do with them?

A. No sir.

139. What, if any, main extensions have been made by your company during the time you have been connected with it?

Objected to by complainant as immaterial and irrelevant.

A. There have been but very few main extensions. Very few I cannot state where they have been, but there have been very few since I have been in the employ of the company.

140. Are you able to state from recollection approximately what number of feet of mains have been placed in the way of repairs or replacements, by your company, during the time covered by your connection with it?

Objected to by the complainant as immaterial and irrelevant.

A. No, I cannot give you any idea, because I have never been present when the mains have been laid.

141. Do you know that any mains have been put in to replace old ones taken out?

Objected to by the complainant as immaterial and irrelevant.

A. No sir, I don't remember that. There might have been a few feet, but not very many.

142. State whether or not any service pipes have been put in to replace others taken out by your company?

Objected to on same grounds as above.

1698 A. No, I don't remember that; there may have been a very few places, but very few.

143. Will your records show the various items concerning which I have been inquiring, as to the replacements of extensions of pipes or services?

A. I haven't had charge of that department of the work, and I wouldn't be able to state.

144. But isn't it carried into your books in such form that it is available there?

A. Not the books that I have charge of.

145. Have you books in which those matters are kept?

A. We have books of record of that kind, yes sir.

146. Do you personally now remember of any instance where there have been any such replacements of services?

Objected to as having been answered. Objection overruled.

A. No, I don't know personally of any instance, because I have never been present when any service has been put in since I have been employed by the company.

147. In the ordinary run of business in your office, would you have knowledge of those matters from the payment of bills for the work, or anything of that character?

A. No, I would not, because I would simply pay for material used in the work, but I wouldn't know where the material went.

148. And wouldn't you know for what purpose the material was used?

A. No, not in all cases; there might be some classes I would and some classes of materials I would not.

149. Then there would be nothing in the work order or in the bill that would show whether it was for replacements or new service?

A. The work order might state, yes.

1699 150. Are you able to state without reference to your books whether or not your customers have increased or diminished in number during the time you have been connected with the company?

Objected to as immaterial and irrelevant. Objection overruled.

A. I think they have not; I think the number of consumers remains about the same; of course, they have been taking on new ones and old ones have been dropping off, but I should judge from my knowledge the number of consumers remains about the same.

151. My recollection is you testified you have been there just about two years?

A. Two years, since the third of May. I arrived in Peoria the third day of May 1900.

152. How frequently do you make settlements with the Peoria Gas & Electric Co. for the business transacted between you?

A. Once a month, or as often as we have funds, to do so.

153. What classes of business does the settlement cover?

Objected to as incompetent, immaterial and irrelevant.

A. Labor and material used in the work.

154. When are settlements made for the gas furnished you by the same company?

Same objection as above. Objection overruled.

A. Made at the same time.

155. Who, so far as your company is concerned, determines the amount to be paid to the Peoria Gas & Electric Co. for gas furnished?

Objected to as incompetent, immaterial and irrelevant, and already in evidence in writing. Objection overruled.

A. I furnish the statement from our consumers' ledgers as to the amount of gas sold during the month; I also receive a statement from the superintendent of the Peoria Gas & Electric Co. as
1700 to the out-put during the month.

156. You don't take your own meter statements, do you, Mr. Bicknell?

Objected to as incompetent, immaterial and irrelevant.

A. No sir.

157. Then the material that goes into your consumers' ledgers is furnished by the Peoria Gas & Electric Company, is it not?

Same objection.

A. Yes; we pay the Peoria Gas & Electric Co. for taking the meter statements.

158. How much do you pay for that service?

Objected to by complainant on the ground it is a matter of record, in writing, and therefore not the best evidence; also objected to as incompetent.

By the MASTER: It does not appear yet that it is in writing.

By Mr. IRWIN: The contract was called for and marked by the reporter for identification.

By Mr. TICHENOR: I am asking for what has actually been done?

By the MASTER: You're asking them how much it pays. Isn't that a fact to be determined by the contract?

By Mr. TICHENOR: The contract may provide for one thing and the fact may be another.

By Mr. RITCHER: I would like to ask counsel what he proposes to show.

By the MASTER: Yes, I think it's proper to have the matter in the record in order to guide the master in his rulings.

By Mr. TICHENOR: As I understand the ruling the master does not require the witness to answer.

By the MASTER: I haven't ruled on it, in view of what has
1701 been said between the parties, but it is not fair to the master, or fair to the court, to offer secondary evidence of contents of a written instrument. I think it perfectly competent, even if this is offered in evidence, for you to contradict it by showing its provisions are not complied with.

By Mr. RITCHER: If counsel states that it is his purpose to show it has not been complied with I withdraw my objection.

By Mr. TICHENOR: My position is I am not seeking to contradict it; I am seeking to show the fact.

By the MASTER: Or to show the contents of a written instrument that covers the matter that is inquired of. The ruling is the same.

Continuation of examination:

159. From what sources have you, in making those settlements, obtained information as to the basis therefor?

Objected to by complainant as immaterial.

A. From the contract.

By the MASTER: That refers to the settlements for charges for taking the meters?

By Mr. TICHENOR: Everything.

160. Did you understand my question to refer to the settlements of all matters between your company and the Peoria Gas & Electric Co.?

A. Yes sir.

161. To what contract are you now referring?

A. To the contract made between the Peoria Gas Light & Coke Co. and the Peoria Gas & Electric Co. for the supply of gas, labor and material for its mechanical work.

162. And that is the contract which went in force about the 24th of October, 1901?

A. Yes.

163. That's the one to which you refer?

A. Yes.

1702 164. Who has authority and who does check against the account of your company in the Commercial National Bank of Peoria?

Objected to as immaterial and irrelevant.

A. You mean draw the checks?

165. Who signs them?

A. They are signed by William B. McKinley, the president, and are made payable to my order and I endorse the checks to whoever I seek to pay them.

166. And do you have a check for each individual item?

A. Yes sir.

167. Then you personally have no authority to check on the funds?

A. No, I have no authority to sign checks; I simply endorse checks to the order of anyone that I wish to pay the bill to. All checks are made payable to my order.

168. When with reference to the time that those payments are made, are the checks placed in your custody?

Objected to by complainant as immaterial and irrelevant.

A. I always have signed checks in my possession, and I pay bills whenver I have funds to do so.

169. Those checks as they come into your hands, are signed in blank, are they,—that is, the amounts are left blank?

Same objection as above.

A. Yes sir.

170. And you fill them in as occasion demands?

A. Yes.

171. Has there been any change in that respect during the two years you have been employed with your company?

A. No sir.

172. Is there any one, other than Mr. McKinley, who has authority to sign checks for any of those purposes?

A. No sir.

1703 173. During the time you have been connected with the company what active duties has your treasurer performed?

Objected to as immaterial and irrelevant.

A. He has directed the general financial plan of the company.

174. In what manner? By instruction to you or someone else connected with the local office?

A. By instruction to me.

175. I will ask you to state whether or not any funds are checked from this account to which you have referred, except by checks that pass through your hands in the manner that you have testified?

Same objection as above.

A. No sir.

176. Did you understand my question to apply to all the funds *are* are deposited in the Commercial national bank?

A. Yes, all the funds in connection with the company.

177. Did I understand you to say that all of your liabilities, as they accumulate, are paid from month to month at the end of each month?

Objected to as incompetent, immaterial and irrelevant?

A. I have disbursed all funds, that is, paid bills whenever I had funds to do so. Sometimes I don't pay a month's vouchers when they are ready to pay. We may not have funds to pay them, but whenever I have an accumulation suitable to meet bills I pay them without orders from anyone; that's been our custom.

178. I will ask you to state whether or not any funds are withdrawn from the account other than to meet the operating expenses of the Peoria Gas Light & Coke Co.?

Objected to as incompetent, immaterial and irrelevant.

179. Or I will say, to take care of the business of the Co.?

1704 Same objection.
By the MASTER: Answer subject to the objection.

A. There have been several times when we have had a little surplus, that I have sent the treasurer checks, which I presume he has invested. I don't know what he did, but of course they have to be returned later on.

180. That fact accounts for your not having funds at times with which to pay your obligations, does it?

A. No sir.

181. How is it accounted for, then?

Objected to as immaterial and irrelevant.

A. Along the latter part of the month, you know, when the collections are not being made there would be a period when we wouldn't have funds to meet the current bills; most of our collections come in in the early part of the month, and the latter part of the month there might be a period when there would be vouchers lying unpaid that we hadn't the funds to meet.

182. But as a rule you pay on the first of the month, do you not?

A. As a rule our accounts are closed and vouchers are all made about the 10th of the month, and then payment of bills goes on right afterward; as quick as the books are closed for the month, our next object is to pay all bills if we have the money to do it with.

183. Those are the bills for the preceding calendar month?

A. Yes. It might be, if it was a large item, that it must lie there for one or two or three months, just as we saw fit. Depend on how the collections happened to come in.

184. But I was speaking of the routine of your business in the office; that would be true to that extent?

A. Yes sir.

1705 185. Do you purchase your own meters that are set from time to time?

Objected to as immaterial and irrelevant. Objection overruled.

A. There haven't been any new meters purchased since I have been with the company.

186. Where did you get such meters as have been set, if any, during that time? Or haven't you increased your number of meters any during that period?

A. We have had a sufficient number in possession of the company at that time and during that time; there have been no new meters purchased; there has always been a stock on hand.

187. Have you bought any piping, either, for mains or services, during the time you have been connected with the company?

Objected to as immaterial and irrelevant. Objection overruled.

A. There has been one car-load of piping purchased, and then other small lots for service pipes, but not for mains.

188. How long ago was that purchase made?

A. It was when I first came here; I think it was in June or July 1900.

189. How long is it since it was exhausted?

A. I can't say. I have no record of how long it lasted, because it was a car-load of piping, both small and large sizes, for stove work and for services.

Cross-examination by Mr. ABBOTT:

1. Prior to your employment by the Peoria Gas Light & Coke Co. had you been engaged in a similar capacity for other corporations?

A. Yes sir.

1706 2. And for about what period of years?

A. About three years I was with the Portsmouth, Kittery & York Street railway.

3. Are you familiar with the duties usually performed by the president and treasurer respectively, of similar corporations?

Objected to by defendant as incompetent and immaterial, and calling for a conclusion of the witness, and not cross examination. Objection overruled.

A. I think so.

4. Since you have been employed by the Peoria Gas Light & Coke Co., what and who has been the source of your authority as to matters of general policy of the company?

A. W. B. McKinley, the president.

5. In addition to the information as to the affairs of the company which Mr. McKinley would gain in his personal visits to Peoria and such directions as to its policy which he would then give, you may state whether or not he is advised from time to time as to the general affairs and management of the company?

Objected to by defendant as incompetent and as calling for a conclusion of the witness. Objection overruled.

A. I understand as to whether Mr. McKinley has advised?

6. As to whether he *is* advised?

A. Yes, he is advised by correspondence.

7. From whom do you receive your directions in regard to either the general policy and management of the company or matters relating to the mechanical part of it?

A. I receive my directions from Mr. McKinley in regard to the superintendence, and as to the general affairs of the company from Mr. McKinley.

1707 8. During the time that you have been connected with the Co. you may state whether or not Mr. McKinley has performed the duties usually assumed by the president of such a corporation?

Objected to by defendant as improper and incompetent and calling for a conclusion of the witness.

By the MASTER: Answer subject to the objection.

A. He has.

9. And I think you stated also, in addition to that, that he had performed with reference to the mechanical part of it the duties usually appertaining to a superintendent?

Objected to on same grounds as above.

A. He has.

10. State whether or not the treasurer, Mr. Macomber, has been from time to time informed by you as to the financial matters connected with the company which come under the province of the treasurer of such a corporation?

Objected to by defendant as incompetent, improper, and calling for a conclusion of the witness, and as not cross-examination.

By the MASTER: Answer subject to the objection.

A. He has been advised in regard to such matters by me.

11. From what source or authority or from whom or by whom are you advised or instructed as to the general financial policy and management of the company?

A. George E. Macomber, the treasurer.

12. Is it true in a manner similar to that in which you receive directions or instructions from Mr. McKinley as to the general policy or mechanical part of the business?

A. Yes sir.

13. In making your monthly settlements with the Peoria
1708 Gas & Coke Co., either for gas furnished or for material and labor, in any given month, you may state whether the bills of that company are handled in the same way as the other general bills of your company which are met from month to month?

A. They have been handled exactly the same.

14. Is there any difference in the manner of receiving the bills, making out the vouchers, and paying the bills which are presented from month to month by the Peoria Gas & Electric Co., from that of any other of the current bills of your company?

A. Not any.

15. Is this W. B. McKinley you speak of the same man who is a candidate for university trustee?

Objected to by defendant as immaterial and incompetent, and not cross examination. Objection sustained.

Re-direct interrogatories by Mr. TICHENOR:

1. The two companies mentioned by you are the only ones by whom you have ever been employed, are they not?

A. No sir, I have been employed by other companies.

2. In substantially the same capacity as that described by you?
A. Not exactly. I was employed as auditor of the Rockland, Thomaston & Camden street railway previous.
3. With how many other corporations have you at different times been associated?
A. No other corporations.

1709 FRIDAY, *June 27th*, 1902.

Defendant's counsel moves the master for an order requiring the production of the books of the Peoria Gas Light & Coke Co. to be used upon the hearing of said cause, and presents the following affidavit in support of said motion:

" UNITED STATES OF AMERICA, }
Northern District of Illinois. }

In the Circuit Court of the United States, Northern District of Illinois, Southern Division.

PEORIA GAS & ELECTRIC COMPANY }
vs. }
CITY OF PEORIA. }

Affidavit of Henry Mansfield.

STATE OF ILLINOIS, }
Peoria County, } *ss:*

" Henry Mansfield, being duly sworn, on oath states that he is city attorney for the City of Peoria, Illinois, and as such is in charge of the defense in the behalf of said city in the above entitled case.

"Affiant further states that the Peoria Gas Light & Coke Company, a corporation, of Peoria, Illinois, received its charter from said State about the year 1855; that for many years prior to about October 24, 1901, it was engaged in manufacturing and selling gas, in the ordinary way, for illuminating and fuel purposes in said city of Peoria, and in the territory adjacent thereto, and until about
1710 May 1, 1900, it was the only company engaged in the business aforesaid within said city and its suburbs; that while the said company so continued the manufacture and sale of gas its business was identical in character with that now and heretofore carried on by complainant company in a part of the same district.

" Affiant further states that he has reason to believe, and does believe and so states that the books of account, statements, reports, etc., kept by said Peoria Gas Light & Coke Company in the usual and regular course of its business for the five years ending May 1, 1900, called for by a certain subpœna entitled in said cause, and duly

and legally served on Henry W. Bicknell, in the service of said company, and who has testified herein, said subpœna having been served on the 25th day of June, 1902, a copy of which is hereto attached, for greater certainty, and made a part hereof, *certain* material, proper, pertinent and necessary to a proper defense on behalf of said city of Peoria in said cause; that from said material so called for affiant will able to prove the cost of gas delivered to consumers in said Peoria district during said five years, together with all other facts of a material character in connection with said business, and that such proof will establish or tend to establish, the fact that the ordinance passed by the city council of said city, fixing a maximum rate of seventy-five cents per thousand cubic feet, to be charged by gas companies operating therein, is not unreasonable in respect to the maximum rate so fixed, but on the contrary that said price in every respect is fair and just to said gas companies, and in no manner operates as a hardship or injustice to them, or to either of them, or to any of the parties interested therein.

"Affiant further states that substantially all the territory
1711 in the Peoria district reached by complainant company is now, and for many years last past has been, supplied with gas service by said Peoria Gas Light & Coke Company; that complainant company began active operations in furnishing gas about May 1, 1900, its customers then and now being almost wholly within the field reached by said Peoria Gas Light & Coke Company.

HENRY MANSFIELD.

"Signed and sworn to before me this 27th day of June, A. D., 1902.

[SEAL.] MARY E. POWELL,
Notary Public.

"UNITED STATES OF AMERICA,
Northern District of Illinois, Southern Division.

The President of the United States of America to the marshal of the northern district of Illinois, Greeting:

"You are hereby commanded to summon Thomas N. Gorman, Henry W. Bicknell and Francis S. Kelley if he shall be found in your bailiwick, to be and appear before me, I. C. Pinckney, special master in chancery for the northern district of Illinois, southern division aforesaid, at the United States court room, in the city of Peoria, on the 26 day of June at 2 o'clock p. m., and to bring with him and produce at the time and place aforesaid, to be used as evidence, all books of account of the Peoria Gas Light & Coke Company, of Peoria, Illinois, from May 1, 1895, to May 1, 1900, including any and all books in which were made any entries pertaining to the business of said company; also, all said company's secretary's monthly and other statements and reports to its board of directors,

and to the company, and to its stockholders, for the same
1712 period; also all its treasurer's statements and reports to its board of directors, and to the company, and to its stockholders for the same period; also any and all other reports, schedules, statements, papers, documents, data, memoranda, books and records of the said Peoria Gas Light & Coke Company, and of any and all of its officers, clerks and employés for said period, pertaining to the business of said company, and especially with reference to its earnings, during said period, and every part thereof, and then and there to testify, and the truth to speak in a case pending before me, wherein The Peoria Gas & Electric Company is complainant, and The City of Peoria is defendant.

"Hereof fail not, under the penalty of the law, and have you then and there this writ, with the endorsement thereon *in* the manner in which you have executed the same.

"Given under my hand this 25 day of June A. D. 1902.

I. C. PINCKNEY,
Special Master, United States Court.

"PEORIA, *June 25th*, 1902.

"Hon. Henry Mansfield, city attorney, Peoria, Illinois.

"MY DEAR SIR: I have the honor to inform you that I have this day served the subpœna on Thomas N. Gorman, Henry W. Bicknell and Francis S. Kelley, in the case of The Peoria Gas & Electric Company *vs.* The City of Peoria. I enclose herewith receipt for marshal's fees in said case.

Very respectfully,

JOHN A. AMES,
U. S. Marshal,
By S. O. TRIPP, *Deputy.*

1713 Objected to by complainant's counsel.

By the MASTER: Do you aver in the affidavit any facts by which it can reasonably be inferred that the cost to the consumers of gas manufactured by the Peoria Gas Light & Coke Co. would be at substantially the same cost of gas manufactured by complainant company? Don't you leave all this as a matter of inference, and in a matter as grave as this, could the master infer anything from the language employed?

I think your affidavit ought to be sufficient to show to the master, and to the court also, that it is a fact, or you have reason to believe it is a fact, that the companies are one and the same thing; or that the cost of manufacture of gas to the company is in this case not in excess of the cost of the manufacture of gas to the complainant company. I doubt very much your right to subject this Peoria Gas Light & Coke Company's books to a search in this case, unless your affidavit is sufficient to show either some identity of interest, or that the

cost of the manufacture and distribution of gas by complainant company could be fairly inferred from the facts shown by the books of the Peoria Gas Light & Coke Co. of the cost to them. I don't think it follows as a conclusion of law that because you might subject the books of the complainant company to search in this case, that you can necessarily go outside and subject the books of a company who is, so far as your record shows, in no way connected with the complainant.

I am inclined to hold, and do hold, that the affidavit is not sufficient to make the order.

To which ruling of the master the defendant, by its counsel, then and there excepted.

1714 (The defendant then asked leave to recall Mr. Bicknell, in connection with the above motion, which leave was granted.)

HENRY W. BICKNELL, recalled by defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same gentleman who testified yesterday in this case, are you?

A. Yes sir.

2. State whether or not the books of account or other material called for by the subpœna served upon you and referred to in your testimony, are in your custody?

A. No, not all of them,——

3. Who has charge of the books?

A. —only the books of the company. The papers and documents and records which the subpœna calls for are not in existence to my knowledge. I have never seen anything of the kind.

4. Is there any other person in connection with your company who has anything whatever to do with the books of account concerning which you testified yesterday?

A. No one that has the custody of them; of course, there are others that work on the books, but they have all been in my custody since I have been here.

5. And that has been true during the time covered by your connection with the Peoria Gas Light & Coke Company?

A. Yes sir.

6. Do you say that you have no knowledge concerning the material called for by the subpœna referred to?

A. Yes. So far as the secretary's and treasurer's reports, I understand that there never have been any treasurer's reports made,

1715 and in fact, if there have been any secretary's reports made they are not on file to my knowledge. I have never seen anything of the kind since I have been here.

7. What, if any, of the material called for by the subpœna, is in your custody?

A. The principal books of the company; they would be the ledger and journals, and possibly some other original books of entry.

8. How about the consumers' ledgers?

A. The consumers' ledgers are there.

9. During the time covered by your connection with the company concerning which you have testified, have you not seen any secretary's monthly reports or statements or other reports or statements, as called for by that subpœna?

Objected to by complainant as incompetent, immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. The only records of that kind that I have seen at all have been a few which the private records of the company contain. There are some copies there that I presume are entries of that kind,—that is, a partial statement, I judge from their appearance, in the private records of the company, which is either previous to or following the annual meeting. That's the only records of that kind that I know of, and I think they are incomplete, as far as following one after another, is concerned.

10. In the manner that you have testified, do they cover the period mentioned in that subpœna?

A. I cannot say from memory.

11. I will ask you to state whether or not since you have been connected with the company in question, any material of that
1716 character has been removed from that office?

A. No sir, not to my knowledge.

Cross interrogatories by Mr. ABBOTT:

1. When you state certain books of account of the company are in your possession, do you not refer, or do you refer to such books as have been opened and kept during the time that you have been employed by our company?

A. Well, all the books of the company, that is, the old records and the new, have been in my possession since I have been there.

2. What books have been opened new and continued since you have been there?

A. The complete set of books which I referred to yesterday in my testimony had not been opened when I first came here. The system of keeping books was entirely changed; we adopted the voucher system at that time, and the records which I have kept have been under that system.

3. Then what, if anything, since you became employed by the company, have you had to do with the old books of the company that were kept prior to the time of your employment?

A. Nothing.

The defendant, by its counsel, then renewed its motion for an order requiring the witness to produce upon the hearing of this

cause before the master, the books of said Peoria Gas Light & Coke Company.

The master overruled said motion; to which ruling of the master the defendant, by its counsel, then and there excepted.

1717 The defendant, by its counsel, moves the master that so much of the record as pertains to the evidence required by its affidavit herein, may be certified to the U. S. circuit court, southern division, northern district of Illinois, for a review of the master's rulings thereon; which motion was allowed.

1718 In the Circuit Court of the United States for the Northern District of Illinois, Southern Division.

PEORIA GAS & ELECTRIC COMPANY
vs.
CITY OF PEORIA. } In Chancery.

This day this cause coming on to be heard by the court, on exceptions to the ruling of the special master herein, denying the defendant's application to compel the production of certain books, records and documents of the Peoria Gas Light & Coke Company sought to be obtained, through a *subpœna duces tecum* served upon one H. W. Bicknell, an employé of said company, dated June 25th, A. D. 1902; and the said special master having denied the application of the defendant to compel the production of said books, records and documents, upon the affidavit of Henry Mansfield, city attorney of the city of Peoria and counsel for the defendant; and on exception being duly taken to the said ruling, and the said cause being referred to the court; and the court having heard the arguments of counsel and being fully advised in the premises, doth order, adjudge and decree that the said ruling of the said special master upon such application by the defendant, The City of Peoria, be and the same is hereby fully sustained and the exceptions to said ruling be and the same are hereby overruled.

1719 GEORGE W. BARKER, called on behalf of defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same witness who was called once before in this case, are you not?

A. Yes sir.

2. State whether or not there is kept at the works of the complainant company, by you, or under your supervision, any account of the coke, tar and ammonia manufactured, sold, stock on hand, etc., substantially in the same way as the gas account is kept concerning

which you formerly testified; or is there such a record of those materials kept at the works?

A. Yes sir.

3. Is that record also kept in "Exhibit 20" which you identified, concerning which you testified before, so far as pertained to the gas production, etc.?

A. The only other record that we keep down there, is just a blotter or day book.

4. But I'm asking whether or not you keep a record of coke, tar, etc., in "Exhibit 20" which is now before you, with your record concerning gas production, etc.?

A. We keep that in our store-room ledger.

5. Isn't this your book?

A. This is the manufacturing record.

6. And that is the same book in which you keep your gas manufactured from day to day?

A. Yes sir.

7. Will you state in what manner the record of the residuals at the works, is kept, from day to day—not what the books
1720 show, but in a general way explain the method of keeping those various items; when or how frequently you make such records?

A. We have another book just like this, and the party's name here, the date the coke went out, and the gross tare net weight.

8. I'm asking you now with reference to your manufacture of coke and the other residuals?

A. We don't have any other book pertaining to the manufacture, at all, except this one.

9. Do you make those entries with reference to the residuals each day?

A. Make them in this book only.

10. In this book, from day to day?

A. Yes sir.

11. And that is the book which you have identified as "Exhibit 20" is it?

A. Yes.

12. Will you explain the different records in "Exhibit 20," that you make, from day to day, so far as pretains to the residuals?

A. We make out all bills, and just keep track of the people's names that get the coke.

13. I mean so far as they go into this book. Will you explain all these various columns?

A. We figure it from our coal sheet; the amount of coal each day to get the amount of coke made, tar made, and ammonia.

14. What does the first column in "Exhibit 20" pertaining to residuals, under the month of April, 1901, show?

A. Stock, 6 a. m.

15. What does that mean?

A. Coke on hand, as close as we could get at it.

16. It means the amount of coke that you have on hand at that time?

A. Yes.

1721 17. What does the second column, unded the head of "Made" show?

A. The total coke made each day.

18. What does the column headed "Received" indicate?

A. Coke that we purchase elsewhere.

19. What does the next column show?

A. Coke used, benches fired not used.

20. What do you mean by that? What is the meaning of it?

A. We have benches in readiness for manufacturing gas that are not used, and we just have it on hand ready to start up.

21. As a general rule do you keep at least one bench fired which is not actually producing gas,—one or more?

A. According to whether we need the gas or not.

22. Do you as a rule carry one bench?

A. No sir.

23. But when you do have such a bench in readiness as a reserve this column indicates the fuel that is used under that bench—this column marked B. f. n. u. at the head—is that it?

A. Yes.

24. What does the next column show?

A. The coke used under active benches.

25. Do those figures represent pounds in each case?

A. Yes.

26. As to all the columns concerning which you have testified?

A. Yes sir.

27. What does the next column indicate?

A. Per cent. used, coke made.

28. That is, that's the per cent. for that particular day?

A. Yes.

29. What are the letters at the head of the column which indicates the quantity of coke used under benches in action?

A. "Act. B."

30. And what are the initials at the head concerning per cent. about which you testified?

1722 A. "Per cent."

31. I understand from your testimony that the figures continuously in the column indicating percentage of coke made, represent the same thing as that concerning which you testified,—that is, the account is kept in this way all the way through, is it?

A. Yes.

32. What is the meaning of the column headed "Used elsewhere"?

A. That's coke that is used under boilers, salamander, anything of the kind, other than manufactured.

33. And that would be anywhere except in connection with the benches, would it?

A. Yes sir.

34. What is the meaning of the column headed "Sold"?

A. Coke sold in pounds.

35. On the different sides, opposite where those items are entered?

A. Yes sir.

36. What is the significance of the next column headed "Breeze"?

A. That's the pounds of breeze that we get from the coke each day and used under the boilers.

37. What is that material?

A. That's the breakage from coke; it's loss in coke.

38. Fine material—broken from handling the coke, is it?

A. Yes sir.

39. Is that a part of the make of each day as shown in the column headed "Made" or is it additional?

A. It's additional.

40. Whether the "breeze" weight is a part of the "coke" weight?

A. No sir, it isn't.

41. What is the meaning of the next column headed "Screenings"?

A. The amount of screenings used under the boilers,—boiler fuel.

42. Is that used in connection with the breeze?

A. Yes.

1723 43. And for the same purpose?

A. Yes sir.

44. What does the first column under the head of "Tar" and marked "stock" indicate?

A. Stock in gallons, 6 a. m.

45. And that means on the different dates opposite which those items appear?

A. Yes.

46. And under the head of "Made" also, under the general head of "Tar"?

A. That's the amount made in gallons.

47. Each day?

A. Yes, as near as we can figure it.

48. How does it happen that on some days there are no items entered under that column?

A. According to the measurement of the well. We never can take an exact measurement of a tar well; we don't figure it that way at all any more.

49. But these measurements are taken from the well itself, are they?

A. Yes, they're not accurate.

50. And the next column, under the heading "Sold" indicates the tar sold from time to time, does it?

A. Yes.

51. And that is also in gallons?

A. Yes sir.

52. Does your testimony in regard to the tar also apply to the

mmonia appearing in the columns following that representing the
ar?
A. Not just exactly the same.
53. What is the meaning of those various columns?
A. The first column is crude ammonia, in gallons, stock; the
ext is concentrated in stock, gallons, and the amount made, con-
entrated.
54. And the column "Made" indicates that made from day to day, or whenever the quantity is taken, does it?
1724 A. From day to day, yes; when the still is in operation.
55. But there are days when the still is not in operation, nd that accounts for the fact that under some days there are no ntries under the column of "Made"?
A. Yes sir.
56. How is the quantity of coke represented under the heading Made," ascertained?
A. It's figured from the amount of coal used.
57. And it's figured on a percentage basis all the time, is it?
A. Yes sir.
58. What is the meaning of the figures appearing below the columns themselves, concerning which you have testified?
A. They are put down there, supposed to be totals. I don't know whether they are or not.
59. When do you take an account of the breeze which appears under its appropriate column here, as you have testified?
A. When do we take an account of it?
60. Yes?
A. In what way?
61. For the purpose of getting the items which you enter in this book?
A. Every morning.
62. Are those quantities obtained by actually weighing the material itself?
A. No sir.
63. How is it ascertained?
A. Guess at it.
64. Have you any measure, or means of ascertaining with reasonable accuracy, what it is in quantity or weight?
A. No sir, not unless we would weigh it, of course.
By the MASTER: What is this breeze you are speaking if? Is it the coke that becomes too fine in handling?
A. Yes, little chips; it's dirt from coke; just like coal dust.
1725 65. That you use for boiler purposes, do you?
A. Yes sir.

By Mr. TICHENOR:

66. State whether or not the accounts of these various residuals concerning which you have testified have been kept in the same form up to the present time, continuously, from October 24, 1901?

A. They have been kept just the same.

67. And those all appear in "Exhibit 20," do they, under the various months?

A. Yes sir, there may be some slight changes.

68. And where does the account of residuals appear in this book for each month as compared with the account of gas concerning which you testified on your former examination?

A. On the next page to the gas manufacture.

69. And that's true in each case, is it?

A. A double page, yes sir.

By Mr. TICHENOR: We offer in evidence, from "Exhibit 20," concerning which the witness has testified, commencing with October 24, 1901, a copy of the columns—first, indicating the connected make of the gas; second, the column showing the candle power; third, the column indicating total amount of coal carbonized; fourth, the total yield of gas per pound of coal; fifth, the number of retorts in use, and sixth, the number of men employed at the retorts—commencing with October 24, 1901, and ending at 6 o'clock a. m., May 5, 1902.

By Mr. ABBOTT: We make no objection on the ground a copy is offered instead of the original, under the stipulation heretofore made, but we object on the ground that the paper offered is immaterial, irrelevant, and entirely too remote to have any bearing on
1726 the issues in this case.

By the MASTER: It will be admitted subject to the objection.

By Mr. RITCHER: We also reserve the right to bring in the original if it is not a true copy.

By Mr. TICHENOR: We also offer in evidence from the same book, pertaining to coke, and for the same period of time, the column marked "Made" showing the amount of coke made per day; second, the column marked "Percentage" showing the percentage of coke used to the make; third, the column marked "Sold" indicating the quantity of coke sold from time to time; fourth, under the heading "Tar" first, the stock, indicating the amount of tar on hand at six o'clock in the morning of each day; next, under the heading "Made" the amount of tar made per day, both being in gallons; and lastly, under the head of "Ammonia" the column headed "Made" indicating in gallons, concentrated ammonia.

We also offer in evidence the total breeze and screenings used for each calendar month, commencing with October 24, 1901, and ending with May 5, 1902, the summaries appearing at the close of the statements covering coke, tar and ammonia, for each separate month.

Defendant, by its counsel, made the same objections as last above; also the further objection that the footings were made by the typewriter who made the copy.

By Mr. RITCHER: We object to anything being put into the evidence as a copy——

By Mr. TICHENOR:

70. Will you look at "Exhibit 20" and state what amount of breeze and screenings were made on the 24th day of October, 1901, in the complainant company's manufacturing plant?

1727 A. On October 24th, there was no breeze on hand; 5,000 lbs. of screenings.

71. Take each day, if you please, in the same manner, and follow it through the month of October?

By the MASTER: I do not think so, Mr. Tichenor. I will overrule the objection so far as it requires any details of this matter from day to day, as a useless encumbrance of the record.

72. How many lbs. of breeze were used at your company's works from the 24th of October, 1901, to the 31st day of the same month?

A. It isn't added up here.

By the MASTER: Is there anything in the record before you to show that?

A. The figures used each day, yes sir.

By Mr. RITCHER: If they bring in evidence as to what our totals in our books are, but they will have to connect it with the evidence and not the copies.

A. 9800 lbs. breeze; 26700 lbs. screenings. 85600 lbs. breeze; 233800 lbs. screenings.

By the MASTER: For what month is that?

A. November.

73. Will you also give the summaries of the same columns for the month of December, 1901?

A. 69470 lbs. breeze; 510600 lbs. screenings.

74. Now for the month of January, 1902?

A. 180100 lbs. breeze; 334400 lbs. screenings.

75. For the month of February 1902?

A. 209000 lbs. breeze; 315200 lbs. screenings.

76. For the month of March, 1902?

A. 144000 lbs. breeze; 209500 lbs. screenings.

1728 77. For the month of April, 1902?

A. There are screenings and mine run and breeze—three different kinds, in April, and used other places—for two different purposes.

78. What, if any difference appears in the accounting of breeze and screenings for the month of April, 1902, as compared with the corresponding account for the preceding months?

Objected to by complainant as immaterial and irrelevant.

By the MASTER: Answer subject to the objection.

A. The breeze is the same, and the mine run is different coal, and used for other purposes, and we are using the screenings for other purposes.

79. Then instead of having two columns that covered those items, as was the case in the preceding months, for April you have three, have you?

A. Yes sir.

80. You say the screenings were used for two different purposes. For what purposes were those screenings used during the preceding months?

A. Boiler fuel.

81. And for what two purposes were they used in the month of April, 1902?

Objected to by complainant.

A. Used for boiler fuel and bench fuel.

82. Is there anything in this book before you, "Exhibit 20," to indicate the difference between that used for bench fuel and for boiler fuel?

A. Yes sir.

83. What is it?

A. Different colored ink.

84. How is it shown by the color?

A. The black is the boiler fuel and the red is the bench fuel.

85. For how many different purposes, in the month of
1729 April, 1902, did you use coal under the heading "Mine run"?

A. The same—the screenings and mine run are the same.

86. They are used for the same purposes, indicated by different colors, in the same way, are they?

A. Yes sir.

87. Is there any difference in the accounting of breeze for the month of April?

A. No sir.

88. What amount of screenings in that month was used for boiler fuel?

A. These figures will give them; I might just as well give them as to add them up.

89. Yes.

A. 80000 lbs. boiler fuel, screenings.

90. What quantity of screenings for bench fuel?

A. 235000.

91. What quantity of mine run used for boiler fuel during the same month?

A. Boiler fuel 72500.

92. And how much for bench fuel during the same month?

A. 204000.

93. And how much breeze was used for boiler fuel during that month?

A. 128000.

94. And that was used for one purpose only, was it?

A. Yes.

95. What are the amounts of those several items in the month of May, up to six o'clock on the morning of the 5th?

A. 32000 lbs. screenings, bench fuel, and 28000 screenings for boiler fuel. 20000 mine run for boiler fuel, and 45000 mine run for bench fuel. 10000 lbs. breeze.

96. That was used for boiler fuel, was it?

A. Yes sir.

By the MASTER: I think the witness having verified the totals as shown on the copy of the exhibit, they may be admitted subject to the objection.

97. Have you in your manufacturing books, or elsewhere, records showing the amount of ammonia manufactured during the period concerning which you have testified, ready for the market?

A. Yes sir.

98. In what book is that shown?

A. Store-room ledger.

1730 99. Then that does not appear either in "Exhibit 20" or "21" concerning which you have testified?

A. It's taken from these exhibits after it is in the ledger.

100. Do the items themselves appear in "Exhibit 20" or "21"?

A. No sir.

101. In what form is the ammonia disposed of, liquid or solid?

A. Liquid.

102. Through what process does it go in preparation for market after it is entered upon "Exhibit 20"?

A. Which exhibit do you mean? There are three columns.

103. I mean the final column, concentrated ammonia?

A. Goes to the storage well.

104. But through what process of manufacture does it go?

A. I don't understand.

105. Do you sell it in the form of a liquid or solid?

A. Liquid.

106. Do you sell it just as it appears in the last column of "Exhibit 20"?

A. Sell it so much per pound.

107. Per pound as a liquid?

A. Yes sir.

108. Do you weigh the liquid, or estimate it from its strength?

A. It's weighed or figured from its strength to get the number of pounds.

109. But you sell it on the basis of so many pounds?

A. Yes.

110. Do I understand your testimony to mean that the last column under the general heading "Ammonia" shows the quantity of liquid manufactured on those several days to be all of one strength?

A. No.

111. In what way, then, do you determine the strength?

A. Acids.

112 That's by test, is it?

A. Yes sir.

113. And from that you figure the number of pounds, do you?

A. Yes sir.

1731 & 1732 114. When you reduce it to pounds, does it mea in the solid or liquid state?

A. I can't tell you; I imagine it would be liquor.

Complainant's counsel objected to what the witness "imagines to mean. Objection sustained.

115. Was the mine run coal, concerning which you have testifi for the months of April and May, 1902, used for fuel the same the breeze and screenings?

A. Part of it was, yes sir.

116. That is, part of it was used under the boilers and part us for bench fuel?

A. Yes.

117. And with the exception of those two months, you used not ing for those purposes except the breeze and the screenings?

A. For boiler fuel.

118. And no mine run at all was used until the month of Apr 1902?

A. We have used it always, off and on. I don't know wheth it was put in there with the screenings or not. On back of Septe ber 1901 it shows coal—that's part mine run and part screenings.

119. But during the months concerning which you have tes fied, your records show nothing except screenings and breeze f boiler fuel?

A. I would say there wasn't mine run used.

120. But I am asking for what your record shows?

A. The records show screenings and breeze, yes sir.

By the MASTER: Do your records show you used mine run for t months of April and May, 1902?

A. Yes sir, but before that—take March, for instance, I just put under the head of "Screenings" all used for the same purpose.

(SATURDAY, *June 28th*, 1902.)

Parties met pursuant to adjournment, but by agreement a journed to meet on Tuesday morning, July 8, at the Chicago N tional Bank building, directors' room, Chicago, Illinois.

1733 United States circuit court room, Government building.

PEORIA, ILL., MONDAY, *July* 21, 1902—2 o'clock p. m.

Parties met pursuant to the call of the special master.

Present: Judge I. C. Pinkney, special master. Messrs. W. L. Irwin, E. C. Ritcher and W. T. Abbott, appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor, appearing for defendant.

FRANCIS W. LITTLE, re-called on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

The WITNESS: There are a number of interrogatories that are not yet answered in my former testimony when I was last on the witness stand. The first one is Int. 2—page 1634. I find on examining the inspector's reports that they do not show whether or not services from the Peoria Gas Light & Coke Company's mains were in the premises when our services were laid; we have no record which shows whether or not the premises were served by the Peoria Gas Light & Coke Company at the date our services were laid.

1. The next interrogatory unanswered is # 30, p. 1640?

A. That interrogatory is, "State if it is not a fact, that at # 203 Main St., in this city, you cut off the old company's connection and connected the meter with your own pipes and have since been serving gas to that building." I find that at # 203 Main St., we did not cut off the old company's connection, but laid a new complete service of our own and supplied also new meter connections; using neither the service or meter connection of the Peoria Gas Light & Coke Company.

2. The next interrogatory is # 78, p. 1648?

—. The substance of that interrogatory is whether or not we have charged for service pipes and in what cases. I find we have
1734 never charged for a service pipe in Peoria; that propositions were made on that basis in a number of instances, but were never accepted. I find that G. R. Colburn at No. 205 North Frink St. had his service run by O'Neill & Sons and paid for it himself; all the other services put in by this company have been furnished free to the consumer.

3. Did your company have anything to do with the service, or the agreement under which it was made, at No. 205 N. Frink St.?

A. No sir.

4. Does your company regularly permit service connections to be made by plumbers or gas fitters other than those furnished by you?

A. No sir, we do not. This was a case where the Peoria Gas & Electric Company had no frontage right on the street and declined to run the service, but permitted the service to be connected, or to

speak more accurately, connected the service to its mains within a district in which it had frontage right, but had nothing further to do with it.

5. The next interrogatory unanswered according to my notes are numbers 91, 92 and 93 on page 1650.

A. The question there is "How many services has your company installed since the 1st of September 1900." Since September 1st, 1900, the Peoria Gas & Electric Company has installed 179 services.

(The MASTER:)

6. You mean by that that you have installed 179 additional new services?

Ans. New services, yes sir.

(The SAME:)

7. Not in lieu of old services?

A. No sir. Now, Mr. Tichenor, you asked me to give that by months—Interrupted.

(Mr. TICHENOR:)

8. I don't believe I care for that but if you have it there you may give the summary in months.

1735 A. In September 1900 we laid 1-2 inch service; 3-1¼ inch services and 1-1 inch service. In October 1900 we laid 1-2 inch service; 11-1¼ inch services. In November 1900 we laid 1-1¼ inch service. In December 1900 we laid 2-1¼ inch services. In January 1901 we laid 1-2 inch service. In February 1901 we laid 1-1¼ inch service. In March 1901 we laid 8-1¼ inch services; 2-2 inch services and 1-1 inch service. In May 1901 we laid 1-2 inch service and 3-1¼ inch service. In June 1901 we laid 1-2 inch service and 8-1¼ inch services. In July 1901 we laid 2-2 inch services and 4-1¼ inch services. In August 1901 we laid 7-1¼ inch services and 1-1 inch service. In September 1901 we laid 2-2 inch services; 6-1¼ inch services and 2-1 inch services. In October 1901 we laid 2-2 inch services and 5-1¼ inch services. In November 1901 we laid 11-1¼ inch services. In December 1901 we laid 1-1¼ inch service. In January 1902 we laid 2-2 inch services and 1-1¼ inch service. In February 1902 we laid 1-1¼ inch service. In March 1902 we laid 3-1¼ inch services. In April 1902 we laid 1-2 inch service; 11-1¼ inch services and 4-10 inch services. In May 1902 we laid 1-2 inch service; 12-1¼ inch services and 1-1 inch service. In June 1902 we laid 1-2 inch service; 8-1¼ inch services and 3-1 inch services and 1-3 inch service.

(The MASTER:)

9. What character of main was this 3 inch service laid to?

A. The 3 inch service is laid into the building at 325 South Washington St.—a business building; it is a very large service as they use a large amount of gas.

(Mr. TICHENOR:)

10. I think the only other information I care for now is as to the change of rates although there is another interrogatory unanswered, viz: No. 141 on page 1658.

1736 A. In answer to interrogatory No. 141, page 1658, I would state that my checks were given for the repayment on August 29, 1901, and were given to all of the Peoria stockholders of the company excepting Sumner R. Clarke, Ben Warren, Jr., and Theodore Miller.

11. Do you know why the money was not refunded to those three gentlemen whose names you mention?

A. I think the money was refunded to them directly by the Equitable Trust Co.

(The MASTER:)

12. You say you think that, do you know it to be the fact?

A. I don't know it personally, no sir.

Now with regard to interrogatory 210, page 1671, the same interrogatory being practically repeated at No. 235, page 1676, the question refers to statements or accounting of the bills between the company-s. I have those statements if you desire them—(witness hands statements to counsel) the June bills have not yet been made up. The statement is up to the first of June. (Said statements, seven in number, are marked Exhibit 33 for identification.)

13. Now, interrogatory No. 251, page 1679.

A. I find on March 11, 1900, the rates fixed by the Peoria Gas & Electric Co. were gross for light $1.00 per thousand cubic feet and for fuel 75 cents per thousand cubic feet, each rate being subject to a discount of ten cents in case the bills were paid at the office of the company on or before the 10th day of the month following that at which the gas was used, making the net rate 90 cents and 65 cents respectively. This rate was changed on March 21, 1900, to 40 cents gross and 30 cents net for both light and fuel. Another rate was announced on July 30, 1900, effective September 1, 1900, the

1737 rates being for light $1.25 and for fuel 85 cents gross with a discount of ten cents if paid on or before the 10th, making the net rates $1.15 and 75 cents respectively. On November 1st, 1901, the rate was again changed to $1.10 gross, $1.00 net for both light and fuel which rate has prevailed since that time.

You asked me, I believe, when on the stand before, to bring with me the contract with the Peoria Gas Light & Coke Co. and I have it here if you care to examine it.

(Witness hands contract to counsel.)

The MASTER: Do you desire to offer in evidence the statements produced by Mr. Little, Mr. Tichenor?

Mr. TICHENOR: I don't know that I do; we have all of it in the record now except the statements showing the amount of repairs, etc.; I don't know whether that has any bearing or not.

The MASTER: Then you offer in evidence that portion of the statements in connection with the testimony of this witness, do you?

Mr. TICHENOR: Yes sir. On behalf of the defendant I now offer in evidence in connection with the testimony of this witness the statements which he has identified marked Exhibit 33, and I also offer in evidence, in connection with the testimony of this witness, the contract or agreement which he has identified between the complainant company and the Peoria Gas Light & Coke Co. dated October 21, 1901, the same being marked Exhibit 32, and ask leave to substitute for the original a copy thereof for the record.

Said seven statements marked Exhibit 33 and said contract marked Exhibit 32 are in the words and figures following, to-wit:

1737*a* EXHIBIT "33." I. C. Pinkney, Master.

1737*h* EXHIBIT "32." I. C. Pinkney, Master.

This agreement, made this twenty-first day of October, A. D. 1901, by and between the Peoria Gas Light & Coke Company, a corporation organized under the laws of the State of Illinois, party of the first part, and the Peoria Gas and Electric Company, a corporation organized under the laws of the State of Illinois, party of the second part, witnesseth: That

Whereas, the said party of the first part is engaged in the business of manufacturing and selling gas in the city of Peoria, Illinois, and has a large and established business, and a large number of consumers dependent upon its service; and

Whereas, a large amount of the machinery and apparatus of the said first party has become in bad condition and repair by reason of

is long continued use in the manufacture of gas, and will require he expenditure of a large amount of money in the renewal and repair of certain parts of its machinery and apparatus, in order to continue the manufacture and sale of gas economically; and

Whereas, the said party of the second part is the owner of a new gas plant located in the city of Peoria, Illinois, of ample capacity to supply not only the consumers of the party of the second part, but also the consumers of said party of the first part, and said party of the second part is willing to enter into a contract to sell gas to said party of the first part upon the terms and conditions herein set forth:

Now, therefore, in consideration of the premises and of the mutual covenants and agreements herein contained, the parties hereto covenant, contract and agree as follows:

1737*i* The said party of the second part agrees that it will manufacture and furnish to the said party of the first part, a sufficient amount of gas to supply the consumers and customers of the said party of the first part, during the period of this contract and that it will commence supplying gas hereunder at the earliest practicable moment, and not later than November 1, 1901.

It is understood and agreed, that the gas so furnished shall be of good quality and of not less than sixteen candle power at the station meter of the party of the first part.

Said party of the first part covenants and agrees that it will pay for all gas so furnished at the rate of seventy-five cents per thousand cubic feet, with the exception that all leakage or loss of gas between the station meter of the gas plant of the party of the first part and the delivery thereof to the consumers of the said party of the first part, shall be accounted and paid for at the rate of fifty cents per thousand cubic feet of gas so furnished. The amount of leakage or loss of gas shall be determined by the difference between the amount registered by the station meter in the plant of the party of the first part and the aggregate amount registered by the several meters which are or may be set for consumers of the said party of the first part.

It is understood and agreed, that said party of the second part shall have free access to the plant and premises of the party of the first part, for the purpose of reading, examining, testing or repairing the station meter of the party of the first part, and shall also have free access to the several meters of the consumers of the said party of the first part, with the right to read, take the measure, examine, test, repair, remove and replace any or all of the said meters for the purpose of determining the amount of gas furnished under this contract, as well as the leakage or loss of gas as herein provided.

1737*j* It is further covenanted and agreed, that the said party of the second part shall have the right to enter upon the premises of the said party of the first part, and lay all necessary pipes

and make all necessary connections with the meters and gas mains of the Peoria Gas Light & Coke Company in its plant in the city of Peoria, and said party of the first part especially covenants and agrees, as one of the moving considerations of this contract, that whenever in the judgment of the party of the second part, it shall be necessary or desireable to test, repair, remove or replace any meter, service pipe or main belonging to the said party of the first part, in order to determine the amount of gas delivered to said party of the first part, or to prevent loss or leakage of the same, the said party of the second part shall have full right, power, license and authority to make such examination, repair, removal and replacement from time to time, and said examinations, repairs, removals or replacements shall be made at the expense of the said first party. Said party of the second part covenants and agrees, however, that all such examinations, repairs, removals or replacements made at the instance and initiative of the said party of the second part, shall be made and billed to said party of the first part at the actual cost thereof.

Said party of the second part further covenants, that the said party of the second part will make any examinations, repairs, removals, replacements and extensions of the service pipes, mains, etc. which may be desired by the said party of the first part at actual cost plus three per cent. for superintendence, and in consideration thereof, said party of the first part covenants that it will give to said party of the second part all of its work of examining, testing, repairing, renewal, replacement, extension of service pipes and mains, including the purchase and furnishing of all supplies, such as
1737*k* materials, service pipes, mains and pipes of every character, and all things pertaining to the construction, maintenance and operation of its plant, excepting only the purchase and sale of gas stoves and ranges.

Said party of the second part agrees to turn over to said party of the first part, monthly, its readings of the meters covered by this contract, in convenient form, for the use of said party of the first part; and said party of the first part agrees that payment shall be made under this contract, for all gas furnished, on or before the 15th day of each and every month for all gas shown by the reading of the meters and turned in to said party of the first part on or before the 5th day of each and every month.

It is understood and agreed that this contract shall be and continue in full force for a term of ten years from this date. Provided, however, that either party hereto shall have the right to terminate this contract at any time prior to the expiration of two years from the date hereof, upon giving six (6) months' notice in writing to the other party of its intention so to do.

This contract is made by authority of the board of directors of the parties hereto.

In witness whereof, the parties hereto have caused these presents

to be executed by their proper officers and their respective corporate seals to be hereto affixed, the day and year first above written.

PEORIA GAS LIGHT & COKE COMPANY,
By W. B. McKINLEY, *Its President.*

Attest:
W. T. ABBOTT, *Secretary.*

PEORIA GAS AND ELECTRIC COMPANY,
By F. W. LITTLE, *Its President.*

T. J. MILLER, *Secretary.*

1738 14. Do you know the regular price charged at boarding stables in Peoria for the keeping and care of a horse and vehicle?

A. As a general proposition it is $15.00 per month for one horse and a buggy or wagon.

FREDERICK EGNER called on behalf of defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence.

A. Frederick Egner, Morristown, New Jersey.

2. What is your business?

Ans. Consulting gas engineer.

3. For how long a period of time have you been engaged in the gas business?

Ans. About thirty years.

4. In what capacities or lines of duty have you been occupied during that period of time?

A. Everything in the gas business except errand boy; I have acted as engineer, superintendent, laborer, pipe fitter, president of a gas company—in fact, everything except errand boy.

5. With what companies, if any, in the United States have you been connected and in what capacities?

A. I was first with the Metropolitan Gas Light Co. of New York city; I entered their service in the pipe shop as a pipe fitter and extra engineer; about three weeks after that I was made assistant foreman of the retort house, and about two weeks after that assistant engineer, or assistant superintendent of the works; I was with them then about a year and a half when I was offered a position as assistant superintendent of the New York Gas Light Co. of New York city; I was with them a little over four years as assistant superintendent in general charge of the works at night and then went to Norfolk, Va.

1739 6. How long were you at Norfolk, Va., and what were you doing there?

A. I went there as engineer and superintendent of a company

and was there the first time about five years, from 1877 to 1883—not quite five years. I was invited to come back in 1892, I think it was, and was with them then until 1894, something like that, or the middle of 1895, in the same capacity. The second time I was with them they had an electric plant connected with their gas plant and I was engineer of the gas and electric plant too.

7. With what company or companies were you associated during the period that elapsed between those two engagements with the Norfolk Company?

A. I went from Norfolk to Chicago as engineer of the Peoples' Gas Light & Coke Co. and was there about four months; from there I went to St. Louis, Mo., as superintendent of the Laclede Gas Light Co. and was with them about nine years, that is, with the old company and the consolidated company after it became consolidated.

8. All the time in that capacity?

A. Yes sir. Then I came on to New York and was chief engineer of the Standard Gas Light Co. of New York city for about five months—rebuilding the works in that time.

9. Any others?

A. No. Then I started in business on my own account and that brings it up to the time I went back to Norfolk the second time.

10. State whether or not you are familiar with the gas industry as it has been carried on in t-e United States for the past thirty years including the various processes and the different devices, apparatus and mechanical appliances used in the business.

A. Yes sir, I am.

11. State whether or not you have ever examined and in-
1740 vestigated any gas plants other than those with which you have been associated, or engaged, as you have already testified—I am speaking now with reference to this country.

A. Quite a number; I have built several and examined quite a good many.

12. Where have you built gas works?

A. Texarkana, Ark.—a small coal gas works; Dover, N. H., small water gas works last summer; outside of the works I have been engaged with and built those are the only ones I have built.

13. What kind of gas did those companies which you have named and with which you have been associated manufacture?

A. Coal gas, water gas and oil gas.

14. Are you, or are you not, familiar with all of those different processes including the various devices and appliances necessary for the production of gas?

A. All of them.

15. What, if any, construction work in a general way did you do for the companies with which you have been associated?

A. At the Norfolk works I put in two different kinds of water gas apparatus—that was in the early days of water gas—the Allen and Harris process and the Lowe process; at Chicago I designed and superintended the erection of a water gas process, the largest

ever built in this world, which was afterwards known as the Springer process. I will have to explain something about that. The Springer process existed before that, but it was a failure, and I reconstructed that process and it is in use today in places on my plans, but it was always called the Springer process; plenty of people know it is my design.

16. Did you do any construction work for the Standard Gas Co. of New York?

A. At the Laclede we have not got through there yet; at
1741 the local works I built a new gas plant, such as is used for supplying cars, etc., built a new plant for that there and built new water gas works and built a coal gas works there on what is called the inclined retort principle, at that time new in this country, and rebuilt some of the coal gas apparatus, besides gas holders and such things of course; then at the Standard works in New York I practically rebuilt the whole plant and made it double capacity—changed the whole plant.

17. What are some of the principal works in this country which you have examined and investigated outside of those companies with which you have been associated as you have testified?

A. All *eht* gas works in New York city excepting one; three gas works in the city of Brooklyn; also in Cincinnati—that is a notable work,—Columbus, Ohio, Allegheny and Pittsburg in Pennsylvania, San Francisco, California—a couple of works, two companies there; Portland, Oregon, Seattle Washington, Vancouver, British Columbia, Boston, Mass., Cambridge and Brookline, Mass., Providenc, R. I., Hartford and New Haven, Conn.—really, I have examined about 140 odd works and I cannot tell you the names of all of them without consulting memorandum; I have seen over 150 all together.

18. State whether or not you have ever made any investigation of gas plants in any other country except the United States?

A. Yes sir, I have made examinations of gas works in Europe, in Ireland, Scotland, England, France, Germany and Austria.

19. On how many different occasions?

A. I was twice in England and Scotland but only once over the works in the other countries.

Q. When was the occasion of your first visit there for that purpose?

A. In March, April and May, five years ago.

1742 21. What portion of that time did you devote to the investigation of gas plants?

A. All of my time—about 6 weeks.

22. When were you there again?

A. About four months ago; in March I went over again and came back in May this year.

23. Over what territory did your investigations extend on the occasion of your first visit there?

A. I went to Salford in England, south of Manchester; Huddlefield—Interrupted.

24. I do not care about the names of all the places if you will tell us in a general way what territory you covered?

A. The most notable works in England; in Scotland, also; one works in Ireland at Belfast; in Rheims, France; a number of them in Germany, the most notable ones and at Vienna in Austria.

25. Did your second visit cover substantially the same territory?

A. No sir, only in England and more of it at that time: I did not leave England and Scotland; I was in Edinburg but that is all the place I went to in Scotland; I was in England at a number of cities and at Edinburg.

26. For what purpose did you make those two trips to Europe?

A. They were simply for the purpose of study, you might say; I tried to see the condition of the gas business in those countries, what progress and advances had been made in the line of my profession with more special reference to inquire into the progress of what is now known as the inclined retort system for making coal gas.

27. To what extent did you investigate and examine the various plants with which you came in contact on each of those trips, that is, with what degree of thoroughness?

1743 A. Most of those plants I examined very thoroughly even to seeing the books of accounts; I have in some cases seen the accounts of companies where the books were locked and kept in a safe, the safe being opened for my special examination.

28. State whether or not you are familiar with the gas associations, or associations of gas engineers, in America?

A. I believe I know pretty nearly all of them.

29. With what, if any, of those have you been officially connected?

A. First of all with the Western Gas Association, then with the American Gas Association; I am a member of both now; I visited the meetings of the Ohio—Interrupted.

30. My question was how you have been connected with them officially if at all?

A. I have served in minor positions, such as director, etc. and president of the Western Association and I was a director, or member of the council, as they call it, of the American Gas Association.

31. How long ago were you president of the Western Gas Association?

Ans. 11 years ago.

32. State whether or not you have ever made any investigation of the gas industry in the city of Peoria?

Ans. Yes sir.

33. When for the first time?

Ans. About 10 years ago.

34. For how long a period of time were you here on that occasion?

Ans. About 3 weeks, as nearly as I can remember.

35. State whether or not on that occasion you familiarized yourself with the state of the gas business in Peoria, including the condition of the development of the plant, its operation, the apparatus

which it was employing, and substantially the territory which it was covering?

Objected to as immaterial and irrelevant.

1744 A. Yes sir.

36. At that time, there was only one gas company in Peoria, was there?

A. So far as I know, I know of no other.

37. State whether or not you know the complainant company, the gas company engaged in this litigation?

A. I know nothing about it except what I have heard since I have come here, and I had a letter, of course, inviting me to come here.

38. State whether or not you know the construction and the various kinds of apparatus, buildings, etc., comprising the manufacturing plant of The Peoria Gas & Electric Company, the complainant in this case.

A. I have read a description of the works in a report, volume 3, I think it was, commencing on page 742, I think, or something like that.

39. You are referring to the record in this case, are you not?

A. Yes sir, the type written record, that is where I saw the description of the works, and I read it very carefully.

40. Do you remember in whose testimony all of those details were set out?

A. The one I read was by Mr. Little, if I am not mistaken.

41. State whether or not you also know the pipe system of complainant company as laid in the streets and alleys of the city of Peoria, both as to aggregate, sizes, etc.?

A. I have read an account of that too in the paper marked "Exhibit 20" and Mr. Mansfield has taken me over the ground and I have also walked over it and I know something about it from the time I was here before.

42. Do you remember the number of retorts in a bench in this plant as shown by the record in this case?

1745 A. Yes sir, 9 retorts to a bench, 7 benches of 9's, full depth regenerative furnaces, made by the Parker-Russell Manufacturing Co.

43. State whether or not you are familiar with that style of furnace, if so, for how long a period of time have you known it?

A. I am quite familiar with it.

44. State whether or not you are also familiar with all the other apparatus appliances, mechanical devices, etc., entering into the plant of complainant company?

A. So far as they are described in the record in this case, yes sir; I might say I am quite familiar with other apparatus, the same as it is there, that is I suppose it is the same.

45. You know the apparatus by name and description?

A. Yes, I know what it is according to that.

46. How long is it since regenerative or recuperative furnaces f gas making came into general use?

A. The generative furnace was first introduced in this country i 1875 or about that time—I will not be sure whether it was one ye earlier or later—at the works of the Metropolitan Gas Light Com pany in New York city—Interrupted.

Complainant objects to the answer as not responsive.

The MASTER: It may stand. Go on with your answer.

The WITNESS: The regenerative part of the generative furna was introduced only a few years later but I could not say as to th date.

47. What is the characteristic feature of each of those devices which you have referred?

A. The two are practicaly one, though one was introduced firs the generative furnace is a furnace in which the fuel is kept qui deep anyhow over two or three feet and as high as 5 and
1746 feet, and air passing through that fuel decomposes it, the oxyge and carbon forming molecules of carbon—carbonic oxide an the air goes along with it; that gas is then burned in the combu tion chamber of the bench by the admission of air from the outside at first, with the generative furnace air would only be admitted righ near the top, but with the recuperative furnace the air is heated b the escaping gas or combustion that passes around the retort, passin through a number of channels built in the setting and betwee those channels air passing in back and forth and the heat passin on the outside through that chamber enters on top and thereby th air being heated there is some saving affected; the channel work i called the recuperative part, the part that holds the fuel is called th generative and they call the two together a recuperative furnace i a gas works.

48. How does this furnace, which you have just described, com pare in economy of operation and result with the furnace which pre ceded it for the same purpose?

A. We used to burn with the old style furnace anywhere from to ½ of the coke reduced and now they will burn from about ⅛ t perhaps less than ¼ of the coke reduced, so you see the saving i quite considerable.

49. What is the comparative life of the two systems of furnaces the old and the modern?

A. That is rather an unfair question, I think for the modern fur nace; the old furnace frequently lasted longer than the modern furnace does.

50. The question I intended to ask you was with reference to the life of the retorts, not the furnace, in the old system as compared with the new?

A. In the new system a retort will during its life produce a great deal more gas than with the old furnace—Interrupted.

Complainant objects to the answer as not responsive.

1747 The MASTER: It is not responsive to the question.

The WITNESS: As a rule, with the new furnace, the retorts do not last as long as in the old.

51. What is their life, based upon the gas produced?

A. The gas produced is nearly double with the new than with the old system.

52. Are you able to state about the life of the new retorts in use at the present day?

A. With good management, a retort will last easily two years—three years, perhaps, and you can ruin it in one night.

53. In what manner may it be so quickly destroyed—under what conditions?

A. The retorts being very hot, for instance, if a careless fireman lets the fuel run down the cold air rushes up through the furnace and the retorts of course being very hot get cooled off quickly and cracked, sometimes fall to pieces; if that happens a few times the retorts are gone.

54. What is the life of the furnace itself in the new system as compared with the life of the old furnace?

Objected to as already asked and answered.

A. I had in my mind before the life of the retorts. Now, the furnace proper will last longer than the old furnace; it will sometimes allow two or three sets of retorts over the same furnace, and you could never do that with the old furnace.

55. In a gas plant of the size of that of complainant company, in your judgment, what number of retorts should be placed in a bench in order to be operated most economically?

A. In my opinion, taking everything into consideration, I would, in a small city like Peoria, use what we call benches of 6's; in a large city, benches of 9's are probably better, but in a small city I would prefer benches of 6's.

1748 56. What is your reason for stating that benches of 6's are preferable to benches of 9's?

A. It is because in the course of business you have to increase the make of the volume of gas and decrease it in the fall of the year and spring of the year and sometimes in the intervening period, and at a coal gas works you must miss charges, as we call it, or let down the fire of a bench and with benches of 6's the unit is not so great, for instance, if we had 4 benches only of 9's and we have to let down one bench, we drop one fourth of our producing capacity right there; we may not want to drop as much as that and if we should drop a bench of 6's instead of a bench of 9's it would not be so bad, perhaps, and so in firing up again; that is the technical reason why I would prefer in a city like this 6's rather than 9's.

57. State whether or not you are familiar with the life of the

various kinds of apparatus used in the works of complainant company?

A. I know as to the life of nearly all of them except the Chollar washer; I know what that is but I don't know how long it will last.

58. State whether or not the Chollar washer represents the best and most advanced ideas based upon economy in the gas business?

A. It is the cheapest as to price but not the most economical as to use.

59. Why not?

A. In extracting ammonia, the gas passes through water and the ammonia is pretty thoroughly extracted but not so strong a liquor is obtained as with some other apparatus, that of course requires more fuel when concentrating or driving off the ammonia; it is a trifle, anyway, in either case; it don't amount to a great
1749 deal.

60. State whether or not there is any other portion of complainant's plant that is not the best or latest based upon the standpoint of economy?

A. In my opinion if they had standard washer scrubbers, so called it would be very much better, that is, No. 1; as to the producing capacity at the generating plant, I would certainly use the inclined retort system; it has been known for years and it is certainly better than the horizontal hand stoker retort.

61. State to what extent the inclined retort system has been used either in this country or Europe or in both?

A. In this country it has been used now for about two years at Louisville, Ky. to make all the coal gas made there; it has also been used by the Kings County Gas & Illuminating Company at Bay Ridge in Brooklyn, for about two years; it is coming into more extended use—that is not answering your question, though; you asked how long it had been used. We had one bench of inclined retorts in St. Louis in use for about 2 years in 1889 and 1890, that is, one bench with 5 retorts.

62. How long is it since the inclined retort system was first introduced into this country?

A. In 1889, I think—1888 or 1899, there was one bench at St. Louis, but the works were not under my charge at that time.

63. Where was the system first used, if you know?

A. The earliest record of it is in England in 1804; it then seemed to drop out of sight until Andrey Coze of France revived it, improved it and made a success of it.

64. How long ago was that?

Ans. About 15 years ago.

65. To what extent is that system in use at the present time in Europe?

A. There are at present 67 gas works using it in size
1750 smaller than the Peoria gas plant; the daily make of gas—that would be a better statement maybe—is over 107 million

cubic feet per day in England; in Germany and France—I have data on that head but I have not it in my mind now—they use it in a great many works in Germany—in Berlin in 5 or 6 works, in Vienna they built entirely new works there about 5 years ago over 1600 retorts, all inclined, no other; in Bremen, Switzerland, and Dresden—I really could not tell you all but a great many; they would not build any others hardly.

66. What advantages has the inclined retort system over the horizontal?

A. Instead of having to lift the coal by hand and shovel it into the retorts, or put it in with scoops, and after the gas is driven off pull it out with rakes, if hand stoking is used, the coal is elevated high enough to be put into the inclined retorts; the retorts, by the way, set at an angle of about 32 degrees and the coal is charged in at the upper end and rolls down to a stop plate and fills the whole retort; then, when the gas is driven off, the lower door is opened, the stop plate removed, and, as a general thing, instead of having to rake the coke out it drops out of the retort; sometimes, when a retort has been in use 3 or 4 years, it will not drop out and they have to shove and rod it—what they technically term tickle it—at any rate, it is not any such work as has to be done at ordinary coal gas works; any man could do the work; any of you gentlemen could go there and discharge a retort of coke with that inclined retort system.

67. Is the same true of charging the retorts?

A. I have seen a device at the Granton works in Edinburg, Scotland, where I think a child of six could put 800 pounds of coal into a retort after the apparatus is set to the retort in about four
1751 seconds; of course, a child could not set a wagon there but so far as putting the charge in a child could put the coal into the retort.

68. What if any effect does that have upon the question of the economical production of gas?

A. It lightens the labor to that extent; almost any ordinary working man can do the work which is not the case now.

69. Does it tend to economy in gas production or otherwise?

A. It tends to economy, of course; it will reduce the price of making gas in the way of labor anywhere from 45 to 65 per cent.

(The MASTER:)

70. In other words, it does away with the stokers and shovelers?

A. Yes sir, that laborious work; you have to have men, of course, but any man can do the work; it is not killing to do the work; any man that is able bodied can do the work.

(Mr. TICHENOR:)

71. Are you able to state what the saving in the cost of manufacture per thousand cubic feet would be by the use of this system in a city of the size of Peoria?

A. I have never done it, I could not say.

72. What in your opinion would be the saving, if any, by the use of this system?

Objected to as incompetent, immaterial because the witness has not qualified himself to answer in view of his answer to the preceding interrogatory and because the question put does not contain all the elements necessary.

The MASTER: The witness may answer subject to the objection.

A. I should judge it would be about 5 to 6 cents per thousand cubic feet.

(The MASTER:)

73. Do you mean by that the total capacity of the plant or total daily manufacture?

A. For each 1000 feet manufactured.

74. Irrespective of its capacity?

1752 A. Yes sir, that is to say, from its minimum capacity up to its maximum capacity.

(Mr. TICHENOR:)

75. What, if you know, is the life of a gas holder regularly in service as they are in this country?

A. I have seen some that have been operated for over 40 years; I really could not say what the life would be; I have never seen any work out yet; I have seen some taken down and larger built but I have seen some in operation 40 years—I know of one now that has been in operation about that long.

76. What is the life of the engines, exhausters and apparatus of that kind used in gas production as shown by the record in this case that are embodied in the complainant's plant?

A. I have never seen one worn out yet and I have seen them run for years; I suppose they do wear out but I have not seen any wear out.

77. How large an engine is necessary to do the work of a plant of the size of the complainant company?

A. Judging from the amount of gas made I should say a 10 horse power engine and an exhauster 8 to 10 horse power.

78. How long do you know of any engines of that description in that service having been operated?

A. I could hardly state that; I have seen quite a number; in my own experience at the Laclede works we have had one engine run through the nine years I was there and it was running long before I came there, and I am pretty certain it is running today and I am out there over 10 years.

79. To what unusual strain or burden are those engines, and the machinery which they carry, subjected as compared with engines in other lines of work?

A. They have no unusual strain or burden; their load is very even compared with any factory engine.

1753 80. What if any changes, either by way of increase or diminution, have there been in the gas industries in this country within the last 30 or 40 years which effect the hazards necessarily incident to the business?

A. The only thing I know of that is a real hazard is electrolysis from street railway operation; I will also say the ignorance of city councils in granting opposition franchises is the chief hazard of all gas companies; you do away with that and you will do away with everything else worth considering almost—in fact everything.

81. What are the hazards connected with the gas industry aside from that as compared with the hazards in other lines of business?

Objected to because the witness is not qualified to answer and also as incompetent, irrelevant and immaterial.

The MASTER: I don't think it competent, but the witness may answer subject to the objection.

A. I think the gas business is one of the safest things on earth.

82. What is your reason for declaring it extraordinarily safe?

A. The absence in my experience of accidents or destruction of works. For instance, take a retort house, there is no fire in a retort house, I never knew of a retort house taking fire except now and then in a country works where it has a wooden roof that ought not to be there; with a purifying house I really don't know where there is any hazard; I have known a gas holder to burn up or blow up; in one case—stop me if I say what I ought not to.

Mr. RITCHER: We only want you to tell the truth.

The WITNESS: You may depend on that; I will say nothing but the truth if I know it. One or two gas holders have been

1754 blown up by the anxiety of the general manager to see what kind of gas he made when he first started; so I have been told, I don't know it of my own knowledge; there was a holder blown up at St. Louis or burned up, through neglect I always said; I don't really know of any other; with reference to the purifying house in all of my experience in all this country, I only know of one blown up, and that was by the ill feeling of a man who ought to have been killed but he was not—his hair was not signed; I don't know of anything that has less risk about it than gas works; if I had any money to invest, I would certainly invest it in a gas works.

83. I don't care about that.

A. I beg your pardon if I have gone too far.

84. State whether or not gas in itself is explosive?

A. No sir.

85. What would be the effect, if you know, of opening a gas holder and igniting the escaping gas?

A. It would burn, the gas holder would go down a-d keep on burning according to where the hole would be.

86. Would there be any explosion?

A. None at all if there was nothing but gas in the holder.

87. In this case, to which you refer in St. Louis, was that an explosion or burning?

A. It was a burning—no explosion about it in my opinion.

88. What was the condition of the improvements in the immediate vicinity of that gas holder after it had burned?

A. There was a wooden fence about 15 feet from it that was not injured, and the windows were not cracked in a house across a narrow street from it, and people were all around it and nobody was hurt.

89. To what unusual conditions are the buildings and those parts of the construction of a gas plant exposed that tend to hasten
1755 its destruction as compared with buildings in other industries?

A. The retort house, the roof of which is usually iron, slate or iron or tile, is of course subject to the action of the steam and sulphurous fumes from the quenched coke and it attacks the iron and gradually wastes it, but I have never seen any worn out yet; eventually it will wear out, of course, but I have seen some over 30 or 40 years in use and it was either taken down or is still there; then in the retort house sometimes the nails, that the slate is fastened with, become oxidized and it has to be relaid; that may happen in 10 or 12 years; that would have to be attended to once in awhile, not all over but in places. In the purifying house I don't know of anything specially more than in any other manufacturing building; the retort house roof is the only thing I can think of that would be subject to any extra wearing out and that only to the extent I have stated.

90. What do you say of the purifying boxes themselves including the covers?

A. The covers, if not attended to carefully, will rust out comparatively very quickly; it depends a great deal on the care; I have taken charge of works in which the covers were said to be rusted out, no good, I was told the last thing by the retiring superintendent that I had to have new covers but I simply had them cleaned off and painted and they were there four years and were there when I left; I don't know whether they have been in use since or not; I have known of a similar case to that in St. Louis.

91. Are you able to state about the life of those parts of the purifying boxes?

A. A set of covers should certainly last ten years, but as for the boxes themselves they are practically indestructible; they are like everything else about a gas works, I have never seen any worn out;
I have taken some down that have been in use for 30 or
1756 more years, however, and sold them for scrap iron in order to get larger ones.

92. What is the ordinary life of service pipe to consumers?

A. Of course, that depends on where they are laid, what kind of soil; if they are laid in filled ground largely made up of ashes and

garbage, as you find sometimes, their life is very short, they may go in three or four years, even if they are well coated, while in ordinary soil, sand and clay, if properly coated, they will last 20 and 25 years; the majority of them will last a long time, but if you happen to strike a bad place where it has bad filling they will not last very long, especially if they are not well protected; service pipes are apt to rust out at the street curb where animals are tied if they are not properly protected, the dropping of urine from animals seeps through and rusts them out; in such places I have known pipes to rust out in 7 or 8 years but in most conditions they will last 15, 20, maybe 25 years.

93. What are the conditions in Peoria concerning the life of service pipe?

A. So far as I examined them 10 years ago and so far as I am able to judge of the ground from the excavations I have seen, I should say it was pretty good, but I could not say exactly how long they would last.

94. Did you see the ground in the streets of Peoria opened more or less during the time you were here before?

Ans. Yes sir.

95. Have you on this occasion also?

A. Yes sir, I have went to a number of openings and looked in from natural curiosity.

96. Where on this visit have you found the streets opened so they were subject to examination for such purpose?

A. On Adams street—I don't remember the names of the streets very well, but there is an opening on Adams street, a large
1757 ditch, for putting in some steam pipe, then the ditch goes through an alley there to the street above, Jefferson street I think it is, and then on that street there is an opening; I think it is also in one or two other places, but I cannot locate them very well where I have looked into ditches.

97. State whether or not wrought iron is at the present time to any extent in use for gas mains?

A. For the high pressure system of gas distribution, which is coming more in use in certain systems, wrought iron is being used, that is, it is coming into more extended use.

98. What do you mean by high pressure system?

A. I must explain there. Gas, almost universally, is sent through the main in the ground under a very low pressure, that is, a pressure equal to about maybe a column of water two or three inches in height, simply a fraction of a pound, several ounces, not over that: of late years the gas is being sent long distances through wrought iron mains under a pressure of 20 to 30 pounds, the object being to reduce the cost of laying mains as under that pressure a greater volume of gas can be sent through a small pipe than generally is now done in the large pipe with less risk of loss by leakage; cast iron mains are universally used now but wrought iron mains are coming into more use right along; I had charge of a plant

with 160 miles of wrought iron main in it varying from 12 inches down and everything below 12 inches was wrought iron in the city of New York. I could answer something about the lasting quality of that pipe.

99. I think that is all for the present. What if any change takes place in gas delivered under this high pressure, to which you have referred?

A. No perceptible change at all; I have never heard of any, but if the pressure is 200 and odd pounds in using an oil gas
1758 system as I have used it, there is a loss of illuminating power and some of volume.

100. To what distance, under this high pressure to which you have referred 20 or 30 pounds, can gas be driven without suffering any perceptible loss in candle power?

A. I have read—Interrupted.

101. Do you know?

A. Oh no I have laid a line of pipe 3 miles long but I only tested that; to speak of my own knowledge for any great distance I only know of that case in the city of New York I just spoke of; in that single case there is no perceptible difference at all, but that was not on a high pressure, that was on comparatively low pressure, about the pressure of 3 inches of water, not high pressure; I have had no experience in a single case of long distance under high pressure; I have only heard of it.

102. Do you know as a gas engineer and skilled in that industry what the effect would be upon gas of sending it long distances under a pressure of 20 or 30 pounds?

A. I have had no experience in it and could not say; I can give my information but I don't know it personally.

103. What is the extent of loss from leakage, evaporation and the like in a new plant as compared with the corresponding items in a plant that has been in use for some time?

A. It would be very little if the new plant is well put down; I have put down new works and the unaccounted for gas was practically nothing; in that system of 160 miles I have spoken of after it had been used for a few years during the time I had charge of it the unaccounted for gas was less than 1½ per cent.

104. What was it to begin with?

Ans. I don't know.

105. Did you commence the operation of that plant when it was first installed?

1759 A. No not there; I have put in new pipes but not entirely a new plant except a small plant at Texarkana; I put in 5½ miles of pipe there and I did not hear of any leakage while I was connected with that company.

106. What is the comparative loss by leakage in a new plant and an old plant?

A. I really have never compared them but it ought to be less in a new plant because when mains are laid they always are, or should

be, tested before they are covered up—that is the general practice. I laid some last summer and tested them anywhere from 10 pounds to the square inch to 30 pounds to the square inch and would not allow them to be covered until we found there was no leakage, and that was a far greater pressure than the mains would ever be subjected to with gas.

107. Was that air pressure?

A. Yes sir. I have put in 3 miles of wrought iron main in St. Louis entirely new main from the works at the foot of Howard street to —— street, 12 inch wrought iron main and got a steam air pump and put that main under heavy pressure, I don't remember how much but over 30 pounds, and I would not cover up any section of it until it was perfectly tight; of course, there could be no leakage in that. I cannot see, if the work is well done, how there could be any extraordinary leak that will happen afterwards.

108. What are some of the causes of street mains leaking?

A. The first one that occurs to me is electrolysis; then, if not laid sufficiently deep, contraction and expansion.

109. That is due to the starting of the joints is it?

A. Yes sir. Electrolysis is the principal and worst cause I know of at present.

110. Suppose from any cause a main is thrown out of align-
1760 ment does that tend to produce leaking?

A. Yes sir, laying sewers and water mains sometimes, in fact, almost always does where there are parallel gas mains; people usually don't care a straw for gas mains; they lay their pipe any way and that is often the cause of leakage to a gas pipe.

111. State whether or not it is practicable in a coal gas plant, like that of complainant company, as shown by the record in this case, to manufacture and deliver gas at consumers' meters of nearly uniform 18 candle power?

A. Yes sir, I see no reason why it is not.

112. What if any depreciation in candle power would there be between the works and the point of consumption within any distance in the city of Peoria?

A. There might be 2/10 of a candle, something like that, if any; I don't know that there would be any if the gas was well made.

113. What conditions if you know would have a tendency to depreciate the illuminating power of gas within the distance referred to?

A. If there was cold weather, deep, penetrating cold weather, that would affect it for the time being—always does; sudden coming on of very cold weather for a few days will affect it and will cause some of the hydrocarbons, or illuminants, in the gas to be precipitated, especially in exposed places.

114. State whether or not you are familiar with the comparative illuminating power of coal and water gas as they are manufactured in this country at the present time?

Ans. Yes sir.

115. What is the difference in illuminating power between 18 candle coal gas and 18 candle water gas at the point of consumption?

A. None at all, it is 18 candle power gas and 18 candle
1761 power gas is 18 candle power gas.

116. Regardless of the material from which it is made?

A. Yes sir, certainly; the term "candle power" defines what it is and candle power is well defined, the same as a pound or ounce; if I say 18 candle power gas, I mean that and nothing else; I mean gas giving illumination equal to 18 candles, therefore, if it is coal or water gas 18 candle power gas is 18 candle power gas.

117. Are you familiar with apparatus used in the gas industry by which the ammonia is reduced to a sulphate?

A. Yes, I have built it.

118. Is there such an apparatus in complainant company's plant in Peoria?

A. Not so described in the record; I did not see any account of it.

119. Was there in the old plant?

Ans. Yes sir.

120. Is there or not any advantage economically in reducing the ammonia to sulphate in a manufacturing plant?

A. Certainly there is if the plant is of sufficient size to warrant a sulphate plant; it is certainly to their advantage to have it.

121. Do you know practically what the gas consumption in the city of Peoria is at the present time?

A. Yes sir, so far as Exhibit "20" shows.

122. Is the gas consumption in the city of Peoria of sufficient magnitude to warrant the reduction of the ammonia to a sulphate form before marketing?

Objected to as incompetent and immaterial and no proper foundation laid for it; on the statement of the witness as to the basis of his knowledge and opinion; it is not based on the proper data as he refers simply to "Exhibit 20."

The MASTER: The witness has answered that if the produc-
1762 tion was sufficient an apparatus for reducing the liquor to a sulphate is desirable; this question calls for whether or not the production in this city warrants the installation of such an apparatus. The witness may answer subject to the objection.

A. I certainly think it was. (It was so 10 years ago and you sell more gas now than you did then.)

Complainant objects to that part of the foregoing answer enclosed in brackets and moves the court to exclude it.

Mr. TICHENOR: I understand the witness to have testified that he was here 10 years ago investigating that question for some three weeks or more or investigating the gas works here.

The MASTER: The answer may stand, although I doubt the competency of the witness' conclusion without any showing as to his knowledge.

123. Do you know from your knowledge and experience as a gas engineer whether or not in a plant of the size of complainant's in Peoria it is economical in manufacturing to reduce the ammonia to the form of a sulphate before marketing?

A. Yes sir.

124. Is it economical or is it not?

A. It is economical in my opinion.

125. To what extent would it affect the cost of gas production per 1000 cubic feet in a place of the size of Peoria and with the amount of gas consumption shown by the record in this case.

Objected to as incompetent, immaterial, irrelevant and because no proper foundation has been laid for the question, it lacking some elements necessary for a hypothetical question.

A. I cannot say exactly because I don't know at what price the sulphate could now be sold in Peoria, but it would affect it favorably, I think—I am certain.

126. Do you know how much is realized per ton of coal
1763 carbonized from the ammonia by-product manufactured in complainant's plant?

A. From the record, yes sir.

127. What is that amount?

A. 2 61/100 pounds per ton of coal according to the statement I read compared with the coal used as reported, at 8 cents per pound—multiply 2 61/100 by 8 cents, and you have got it—20 cents and a fraction per ton of coal.

128. State whether or not you know the amount of gas manufactured by the complainant company during the 6 months commencing November 1st, 1901?

A. I have read the record and I know according to that.

129. How much was it as shown by the record?

A. During those six months it was ninety eight million and some odd thousands, I don't remember the odd thousands, for those 6 months.

130. State whether or not you know the amount of coal and other material used in the production, and also all labor entering into the same during that period?

A. Yes sir, I do according to the record.

131. From what part of the record did you obtain that information?

Ans. "Exhibit 20."

132. State whether or not you have made a computation for the purpose of ascertaining the cost of gas to the complainant company in its holder during the 6 months, to which I have just referred, commencing with November 1, 1901?

Ans. I have.

133. What was that cost?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: Is that based upon information obtained by the witness from "Exhibit 20"?

Mr. TICHENOR: Yes sir.

1764 The MASTER: The witness may answer.

A. If it is allowable, I will look at my memorandum and then will make no mistake. (Witness referring to memorandum.) Deducting residuals, or not counting residuals at all?

134. Deducting residuals—the net cost in the holder.

A. 12 23/100 cents.

135. In arriving at that result, what figures did you use?

A. I used the coal carbonized in the 6 months.

136. I am not asking for the amount but where did you get the figures you used in arriving at that result?

A. I got the figures from "Exhibit 20" in the record of this case.

137. State the details of your computation by which you arrived at the result concerning which you have testified?

A. I got from "Exhibit 20" the following figures. Coal carbonized in 6 months November 1901 to April 1902 inclusive, 19,661,220 pounds, and I divided that by figures and got the net tons 9,830 61/000; price said to be in the yard $2.80 per ton; coke reported made from this coal during the same time 14,373,829 pounds equal to 1462 pounds per ton of coal; gallons of tar reported made during same period from same coal 109,910 gallons equal to 11.18 gallons per ton of coal; ammonia reported made during same period from same coal 25,665 pounds equal to 2.61 pounds per ton of coal; coke stated to have been used by Mr. Little page 230, vol. 1, of the record in this case, 23.3 per cent.; gas made per man employed, that is, the number of men or days are given as 3,983 men or days reported, which makes 24,648 cubic feet of gas made per day's work per man which is very good; cubic feet of gas made per retort in 24 hours, on the average, 10,341 cubic feet, 9,431 retorts in action is reported; that is also very good; no other material is reported used but

1765 Youghiogheny coal only, this costing $2.80 per net ton in the yard; coke reported from the same authority salable—that is in the record somewhere not in Exhibit "20"—at $3.35 per ton; tar sold at 5 cents per gallon; ammonia at 8 cents per pound—somebody testified to that all the way through; as reported the coal yield 4.92 cubic feet of gas averaging over 17 candle power; that shows very good management—very good.

138. What is the variation over 17 candle power, if you have it?

A. I have not got it but it would average about 17½—very good; oxide of iron seems to be the gas purifying material used; the gas accounted for in the 6 months was 98,157,400 cubic feet; I have something here about the annual output but I should not read that now.

139. No.

A. According to my experience—Interrupted.

140. I don't want your experience?

A. I wanted to tell you what the price was to find the following result.

141. What have you done with the question of purification?

A. I see nothing mentioned about that here; the cost of purification I merely put in the figures here from my experience as to what it would cost to purify gas; in a good many places it runs from 1/10 of a cent to ½ cent per thousand cubic feet.

(The MASTER:)

142. What did you put it in at here?

A. At ½ cent per thousand cubic feet; I put it the highest I know of.

(Mr. TICHENOR:)

143. In making up those figures, what was the price per month allowed for stokers?

A. $70. all hands; the record states the price was from $1.50 per man to $70. per month and I took the highest which was about $2.25 per day or $70. per month.

1766 144. State whether or not in those figures you calculated anything for coal other than gas coal?

Ans. I have not.

145. Did you observe on "Exhibit 20" at the close of each month an item noted as "Screenings"?

Ans. I did.

146. How did you take that item into account in arriving at the result concerning which you have testified—what did you consider it or suppose it to be?

A. I supposed such screenings and breeze was some refuse from the coke; I didn't know that it referred to anything else; it said, "Breeze and screenings" and it was under the heading of "Coke" and I thought it was some part of the coke; I did not take account of it at all in my calculation.

147. Have you those figures in your mind so you can tell to what extent it affected the price which you have given, supposing those screenings were not a part of the coke production and that they cost from $1.15 to $1.55 per ton?

A. Yes sir, I have made some figures on that but not on this paper.

148. Can you tell from recollection what difference that would make in the figures you originally gave as to the cost of the gas per 1000 in the holder?

A. No, I don't remember now what it makes but it is inconsiderable, very small indeed; I think I made it out in per cent. of the total cost but not per 1000; I have deducted for breeze and all that. You asked me a question awhile ago and I don't believe I answered it all.

149. State whether or not under ordinary conditions in a plant like that of complainant the breeze and coke screenings are sufficient to furnish boiler fuel in a works?

A. They are in my opinion sufficient—in my experience more than sufficient.

1767 150. Suppose instead of manufacturing ninety eight millions during the time in question the quantity had been two thirds or three fourths or four fifths of that, how would that fact have affected the cost per 1000 cubic feet of the gas in the holder?

A. Not counting interest on capital invested?

151. Just simply the ground you have gone over?

A. Not materially if any.

152. Why do you say it would not have affected the cost per thousand cubic feet—state briefly the reasons for it.

A. The principal labor is, of course, in the retort house; if you start with the minimum there are 7 benches; suppose we had use for only one or two probably I would put two men on it and they would be all that would be required to make that gas and we would increase and put on another bench and put on more help, and if it decreased again we would take the men off again; we would not keep seven men when only two were necessary; we would put on just enough to do the work; the difference is only when sometimes you have to put on men and there is not quite enough for them to do. For instance, if four men would not be quite enough and five men would be too many, you would have to put on the fifth man and it would cost a little more.

153. Might not that same state of affairs exist even if you were manufacturing a very large quantity?

A. Yes sir, but not in so great a proportion, that is, it would not make so much difference in proportion you know.

154. State whether or not, as a man skilled in the gas industry, you are able to state from the output during those six months approximately what the output for the whole year would be?

A. Yes sir.

155. What would it be in this case?

A. 164,776 according to my figures.

1768 156. Under what conditions do you make that estimate, normal or abnormal, in gas consumption?

A. That would be normal, very much so; I would base that calculation where gas is used very little for domestic purposes—the real old way.

157. Are you familiar with the conditions pertaining to the distribution of gas in the city of Peoria so far as shown by the record in this case?

A. The record in this case does not seem to give much information on it; I have not been able to get much information on distribution from the record in this case.

158. You don't understand what I mean. Do you know from the record in this case the number of miles of mains, the number

of meters in the service and approximately the territory over which the gas is distributed?

Ans. Yes sir.

159. State whether or not you are able to tell the cost per thousand cubic feet of distributing gas in the city of Peoria for a full year, assuming the total output for that period to be as you have estimated?

Ans. Yes sir.

160. What would that cost per thousand cubic feet be?

Objected to as incompetent and immaterial, no proper foundation laid for it and because it does not involve the proper basis or data for such hypothetical question.

A. 15.43 cents; that is for distribution alone.

161. State whether or not that includes any items for rentals and stable expenses?

Ans. It does.

162. State the details of your computation by which you arrive at the cost you have given for distribution alone?

A. Taxes I have taken from the record, about $5500; insurance I figured on my estimate of the cost of the building one-half of one per cent. $930; president—it would be easier and also 1769 better to include the officers below—the president being a figure head—$1200.; general manager, engineer and superintendent $3000.; secretary and treasurer who should assist in the general office work on certain occasions $1500. per annum; three assistants, to above, or clerks, averaging $600. per year $1800. The first two of those items, insurance and taxes, amount to $6,430., and the last four items I have given amount to $7,500. One general foreman of shop and street department who should be a practical meter maker and do some work $1000. per year; three assistants, or mechanics, at $2.00 per day, or $60. per month $2,160.; two assistants, or skilled laborers, at $1.50 per day, or $40. per month, $960.; maintenance of one horse and wagon at $20 per month $240. These last items amount to $4,360. One solicitor and canvasser for business $730. per year; one boy $270. a year; two telephones at $3.50 per month $84.00; advertising—assumed—$1,000.; books, bills stationery and postage $3,000. These last sundry items amount to $5,084. Assuming a leakage of 5 per cent. for 8,239,000 cubic feet lost or unaccounted for at 15 cents per thousand into the holder—I assume, of course, it would be 15 cents per thousand—$1,235.85. Total cost chargeable to distribution 14.93 cents per 1000 cubic feet. Now, these figures were made before I had the amount of rent for office and stable—please bear that in mind—I added that on afterwards because I gave the amount as 15.43 cents and these items I have given foot up 14.93 cents. The other amounts to 1½ cents.

163. What amount do you include for office and stable rent and expenses?

A. Office, stable rent and expenses—I have gotten that from the

record, I did not assume that at all—$2480.33 per year, that is, 1½ cents per thousand cubic feet of gas accounted for.

164. Do you remember for what year you obtained those
1770 items for office and stable?

A. I really could not say, I did not look at the date; it was in one of the volumes of the record here but I did — notice the date.

165. Let me refresh your recollection and ask you if those are not the figures shown by the record of Mr. Little's testimony for the year ending September 1, 1901?

A. I took the figures for Mr. Little's testimony and it must have been for that year. (Witness referring to papers) That is the time.

166. What does that make the total cost per 1000 cubic feet delivered to the consumer?

A. I will have to call your attention to the fact that we did not get the total cost of the make; I reported 12 cents and a fraction but we did not go through that whole record; I make the cost of the gas in the holder 15 cents, then with the 15.43 cents, the cost to the consumer, would make it 30.43 cents.

167. Where do you make up the difference between 12.93 cents and 15 cents in cost of manufacture—what are those figures?

A. 12.23 cents are the figures I obtained from the record; I assume then ½ of a cent for purification per 1000 cubic feet and I also add a fraction for repairs.

168. How much for repairs?

A. For repairs per thousand cubic feet 1½ cents; for purification .50 cents; then I have incidentals of which I have no account at all 1.02 cents, making a pretty respectable sum, $1680. that 1.02 of a cent amounts to.

169. Is that exclusive of all the other items you have mentioned?

Ans. Yes sir.

170. Why did you add that?

A. To make it 15 cents because there were some things
1771 not reported which I thought ought to be; there was nothing there for oil to oil the machinery or waste, and I thought probably they had a clerk there too and might have had a foreman in charge. Now that 50 cents for purification includes the purification labor but there was other labor that I didn't see anything about in the record, so I added that sum to cover all those items for coal and labor as per record 12.23 cents; for repairs I assume 1.25 cents per thousand cubic feet; for purification ½ cent or .50 of a cent, then an item of $1680. per year to bring the cost in the holder up to 15 cents, that amounts to 1.02 of a cent; then the total cost to the consumer would be as I have stated.

171. State whether the items that you have covered in the cost of manufacture, outside of those reported, are everything necessary and proper in price for the purpose of putting the gas into the holder?

A. According to my opinion they are.

172. State whether or not the several items which you have

used as entering into the cost of distribution covers everything that is reasonably necessary in the distribution department in complainant's plant in the city of Peoria in connection with the gas industry here.

A. I have omitted nothing.

173. What kind of help have you provided for at the price which you have given with respect to competency and ability to perform the services necessarily devolving upon them?

A. As good as can be had.

174. State whether or not all of those prices and rates which you have given in the distribution department, and in the manufacturing department as well, where estimated, are fair and reasonable and the usual prices paid for services of like character?

A. They are.

1772 175. Suppose the general manager is also the general manager of the electric department of the same company and that the services performed by him in that department are separate from the gas business itself and charged to the electric department, what if any difference would you make in the figures which you have given?

A. Well, I think he ought to get all I have put down; I think he would be a pretty hard worked man if he attended to both; I think if he attended to both efficiently he would have his hands full and would be worth the money.

176. You think $3,000. for the gas department enough?

A. Yes sir, I think if he did both he would not live long, not as long as he ought to; I think he ought to be paid for it.

177. Is it usual and customary in this country, where the same company owns the gas and electric franchise, for the same person to act as general manager of both?

A. It is very often so; I have done it myself several times.

178. State whether or not the item of 1¼ cents per thousand cubic feet which you have allowed is sufficient to take care of the item of repairs in the plant in question?

A. I think so.

179. Is that your judgment from your experience and knowledge of the gas business?

A. From my knowledge of the gas business, yes sir: Please remember that for some years there would not be any expense at all and that amount should be set aside for the time coming when it would be applied.

180. On an average for a long period of years, you fix it at 1¼ cents?

A. Yes sir, just ordinary running repairs.

181. State whether or not you discriminate or distinguish between ordinary repairs and depreciation?

Ans. Yes sir.

1773 182. Do you know from your experience in the gas business and from your knowledge of the subject generally the

average amount of depreciation in gas plants of the size and under the conditions of the one owned by complainant in Peoria?

Ans. Yes sir.

183. What is the fair and customary depreciation in such a plant under the conditions mentioned?

A. There is no standard rate established or customary rate but in my opinion it would be about 4 per cent.

184. State whether or not that is based on your actual experience in the gas business during the period of time concerning which you have testified?

A. Yes sir, and it is a very liberal allowance.

185. What difference do you make between repairs and depreciation?

A. If you have to have new benches sometimes, entirely take the retorts out and put in new settings, that would be depreciation. I mean by depreciation a sum set aside to keep the plant up to its best capacity. Ordinary repairs would mean patching retorts, patching pipes, sometimes putting new brasses on an engine or something like that.

186. Suppose a machine or piece of apparatus has through lapse of time or casualty become so depreciated as to have no further use and have to be replaced—to what would you charge that?

A. To depreciation, that is where it ought to go, but in running work we might charge it to repairs, dependent on how we keep the account; the four per cent. is a sinking fund, some would call it maintenance of plant, which is different from repairs. If an engine becomes entirely worn out and has to be replaced by a new one, that would be charged to maintenance of plant or taken from that sinking fund—I would not call that repairs; but if that engine merely broke a cylinder, piston or crank I would call that re-
1774 pairs.

187. Do you know the cost of complainant plant complete as shown by the record in this case?

A. According to the record, yes sir.

188. What is it?

A. $434,252.35 as taken from Mr. Little's testimony including real estate.

189. To what portion of that total do you apply the 4% depreciation?

Ans. To all excepting the real estate—$391.002.35.

190. What is the total of the cost of the real estate which you have used?

Ans. I have seen two accounts and I have taken the highest; the highest I have seen in the evidence is $43.250.00

191. Did you also see in the record a statement to the effect that the real estate cost about $51.000?

A. I did not or I would have taken that figure.

192. Assuming that the output for a year is 164.000.000 and a fraction, as you have testified, that the price received is 75c. per

thousand cubic feet, deducting from the gross receipts on that basis the entire cost, concerning which you have testified, what sum remains?

Ans. $56.244.13.

193. What percentage is that of the entire cost of complainant's plant, as shown by the record?

Ans. 12.93%, nearly 13%.

194. State whether or not you at this time recall any places in this country where gas for illuminating and fuel purposes like that furnished in Peoria is sold at 75c. per thousand or less?

A. Danville, Va. is one; that is the most notable case.

195. What is the rate there, if you know?

A. It is less than 70 cents; I think it is even less than 60 cents now; it seems almost incredible to a gas man, but it is so. When I was there I think it was 70 cents, but I have heard it stated since it was less than that. At Cleveland, O., I think it is less than 75c. I was there not so very long ago and I think that was the price then. Now, that is, of course, where there is no gas war. There are places where they have little gas wars where the price gets down very low occasionally, but the two places I have mentioned are the only two I can think of just now where gas is sold for 75c. or less.

1775

196. Do you know what the rate is at Hamilton, O.?

A. I do not; I have heard but I do not remember.

197. Do you know what it is at Wheeling, W. V.?

A. No I do not; I know it is low but don't know the figure.

198. Do you know what it is at Akron, O.?

Ans. I do not.

199. Do you know the lowest rate at which it has been sold by any organized company in New York within the last three years?

A. Yes sir, but that was a gas war and that would not count; there is one works, I forgot to mention, but that ought not to count either I think, it is in West Virginia, Parkersburg; I think the people there were operating a plant just to satisfy themselves.

200. I mean where plants are operated in the usual course of business where no unusual condition exists.

A. There are two places I know of certain, viz., Cleveland, O., and Danville, Va.; I have heard of others but I don't know about them personally.

201. Do you recall any place in Wisconsin where the rate is 75c. or lower?

Ans. No sir.

202. Do you remember what the rate is in Cincinnati, O.?

A. No sir, I do not know; I think it was 90c. at one time but I do not know what it is now.

203. Do you know what it is at Terre Haute, Ind.?

A. I do not; it has been as low as 30 or 35 cents during a gas war.

1776 204. I mean when there was nothing of that kind to disturb the rates.

A. It was more than 75 cents then but I don't know what it is now.

205. What is the cost of gas production and distribution in England as compared with the cost in this country, if you know?

Objected to as incompetent, immaterial, irrelevant, not tending to throw any light on issues in this case and because no proper foundation has been laid for it as to conditions of production or distribution.

A. The cost of material is about the same now; the cost for labor, the total cost, is about the same but instead of working 12 hours a day the men only work 8; the cost of gas is in every instance less than in this country; I made a special investigation of that for the Washington Gas Co. five years ago.

206. What are the prevailing rates or prices charged to consumers there?

Objected to same grounds as before.

A. The prevailing rates are about 65 cents per thousand.

207. Do you know of any number of instances where the rates are lower than 65 cents?

A. I know of two only that I can recall with any degree of certainty now; one at Belfast, Ireland, where it is 60 cents, and one at Salford, just south of Manchester, where the lowest rates—I have been told what they were, I can hardly believe it but I don't know why I should doubt it—are about 35 cents per thousand when it was told me; I asked a second time and they said that was all but I could not understand it.

208. Did you visit those works when there on your last visit?

A. No sir, but I saw the foreman and general managers, I visited them five years ago, and at that time the price was 48c.,
1777 something like two shillings; I have since been told it was one shilling nine pence; I know it don't seem possible they can sell gas for that price but I was told that.

209. On the continent did you investigate conditions so as to inform yourself regarding the cost of gas production there as compared with in this country?

A. I did about five years ago, yes sir.

210. How did the cost then compare with the cost in this country including the entire cost of delivery?

Objected to as incompetent, immaterial, irrelevant, too remote, having no bearing on the issues in this case.

A. I really don't remember and I don't want to guess at it.

211. If I understand your former answer you did not investigate that question on the continent on the occasion of your last visit?

A. No sir, I was not on the continent at all on my last visit; I was only in England on my last visit.

Adjourned until Tuesday, July 22, 1902, at 10 o'clock a. m.

United States circuit court room, Government build.

PEORIA, ILL., TUESDAY, *July* 22, 1902—10 a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. E. C. Ritcher and Mr. W. T. Abbott appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor, appearing for defendant.

Direct examination of FREDERICK EGNER resumed by Mr. Tichenor:

212. What would be the expense of raising the gas from the candle power shown by the record during the six months, 1778 concerning which you have testified, to 18 candle power?

A. About ½ cent per thousand cubic feet—hardly that. What is the price of oil here? I would use oil and I cannot answer without knowing that.

213. Supposing the price of oil for enriching is 3¾ cents per gallon what would it cost?

A. I should say it would be about ½ cent per thousand cubic feet or a little less than that.

214. Is that price of 3¾ cents per gallon about the normal price or above or below, if you know?

A. It is about the average price so far as I know; the price of oil changes so often, so arbitrarily one can hardly say; I have known the price of oil to change 2 cents a gallon in six months' time.

215. State at what point in candle power gas shows a tendency to smoke and what are the causes for it when it occurs?

A. Any gas made if subjected to a draft the gas will smoke; that is a cause of course, but when gas smokes it depends entirely on the method in which it is consumed. I want to illustrate that. Ascetyline gas is not only said to be but is the richest gas made; it is of 240 candle power, about that; that means that five cubic feet of it consumed at the rate of five cubic feet per hour would give illumination equal to 240 standard candles; you cannot burn ascetyline gas in a burner and consume five cubic feet; it is too rich, it would smoke, consequently a burner suitable for that gas is used, using a very small thin slit burner, consuming ½ a cubic foot per hour, seldom running to a cubic foot per hour, which gives a brilliant light; if you make that slit larger to use more of the gas, it will smoke, whereas with a proper burner it will not smoke. So it is with natural gas. Natural gas has been used for illuminating purposes in burners which we call a bull's head burner, with big slits;

if you burn natural gas in that it illuminates without
1779 smoking but if you put in some other burner it gives but little illumination; that is the way it is with all gases; very rich gas requires a tip with a narrow slit or small hole; if you have a poor gas, say 15 candle power gas, the slit would be larger and then the gas would give light; if you were to take a tip with a very narrow slit and use it with 15 candle power gas the gas probably would show about 8 candle power, it would strike one to be that way but get a burner suitable for that gas and it will show its full power; that is a well recognized fact among well informed gas men; of course if you are in a community where you are to furnish 18 candle power gas and you know you have to furnish it I would then try—I suppose most any experienced gas man would that is looking after the interests of his company—to get a burner that will give the best results with that 18 candle power gas; then that gas will not smoke but will give as near its full power as could be expected. I think I have covered your question. It is altogether a difference of burner. The burner used for testing light generally, the one most usually accepted, is called the London referee standard Organd burner. In New York city they use a slit burner because the Organd is obselete; it is not suitable for New York gas at all. In England the gas is about 14 to 16 candle power and that will burn all right with an Organd burner but if you put in 26 or 27 candle power gas it would smoke in that burner. I think I have made myself clear.

(The MASTER:)

216. It would smoke because the openings in the burner were too large.

A. Yes sir, the quantity of gas issuing from that burner could not get sufficient oxygen to it to give the carbon the illuminating property; the carbon is brought to a white heat and that is what gives the light; it would not get oxygen enough to cause the
1780 carbon to emit a light. Don't understand me to say the Organd burner would not be suitable; it has a ring burner with a lot of holes in it; it is named after the inventor of it; you might have that burner made with small minute holes in it and then it would work all right, but the London refferee burner with holes in it of the ordinary size would not give a proper light; it would illuminate all right with 14 to 16 candle power gas but for 16 to 18 candle power gas it would not be fit.

(Mr. TICHENOR:)

217. Is it practicable to burn without smoking coal gas of 20, 22 or 24 candle power?

A. Yes sir, you can burn it without smoking with a suitable burner but it is hard to get coal gas to that power?

218. If it were brought to that power it would burn with a suitable burner, would it?

Ans. Yes sir.

219. Do you know the rate which gas securities in this country bear?

Objected to as incompetent, irrelevant, immaterial and not pertinent to the issues.

The MASTER. I do not see the materialty of it.

Mr. TICHENOR: We think it material.

The MASTER: He may answer subject to the objection.

A. Well, I know it only from reading in the different technical papers on the subject.

220. What are the rates?

Objected to as hearsay, not the best evidence.

The MASTER: I think it subject to that objection, as the witness has shown by his answer that he knows nothing about it of his own knowledge.

221. Do you know what those rates are as shown by Brown's Directory?

Ans. Yes sir.

222. What are they?

A. So far as it shows it at all—it don't show it in every
1781 case—they average about five per cent. for the bonds; it don't state about the stock at all; there are very few quotations in Brown's Directory.

223. What, in your judgment, is a fair return to the investor in gas properties?

A. I should say that would depend largely on what is considered a fair investment in any business in the location where you are; I should say six or seven per cent. would be a very good investment; if you get 6 or 7 per cent. you get more than you do from real estate, that I know something about.

224. Do you know the prevailing rate realized on real estate securities in the State of Illinois at the present time?

Objected to unless the witness qualifies as a real estate expert.

A. No, I do not, not in the State of Illinois.

225. Supposing the rate is 4½ per cent. what then would you say is a fair return on an investment in gas property?

A. I should say 6 per cent. would be very good; I would sell my real estate and buy gas property. I would like to qualify that a little to this extent. There is always the danger of city councils passing franchises ignorantly, that is a great risk—opposition franchises I mean.

226. You mean allowing a competing company, opposition company to come in?

Ans. Yes sir, that is exactly what I mean.

227. Is there any method by which that can be prevented?

A. Yes sir, there is in my opinion and I have studied it years and years.

228. What is it?

A. Sell a good article of gas at as low a rate as will warrant a fair return on the investment, then opposition companies would not go in the business; they would be put out of the business right
1782 there; and would make an investment perfectly safe if gas companies were satisfied with a fair return on the investment; I am not the only one that thinks so either; lots of eminent men that are living and some dead have spoken that way; the ablest men in the gas business make the same statement and if it was done you would eliminate opposition companies and if you eliminate opposition companies gas properties, I believe, would be more safe than Government bonds, I would rather have it because there may be revolutions or there may be wars; I have seen the time when I had to pay $2.40 in greenbacks for a gold dollar but gas securities always would be worth something.

229. Did you testify yesterday as to whether or not it is practicable in Peoria to furnish gas of a nearly uniform 18 candle power?

A. I think I did answer that question.

230. It is, is it?

Ans. Yes sir.

231. Suppose that the loss of gas between the station meter and consumers' meters is greater than this figure you have given, to what would that be attributed?

A. To a number of causes; the station meter might be wrong or the gas may have been tested at a higher temperature than we usually calculate on; there might have been rivalry between the day and night shifts sometimes unknown to the superintendent, and sometimes known to him; maybe they run the water meter up and down increasing and decreasing the capacity of the meter; I have known that to be done many times. The consumer's meter may be out; I have seen a consumer's meter that had been left for years that did not register at all; the superintendent did not look after them and the men did not report them; then there may be breaks in the pipe and leakage—naturally would be; all that has to be looked after; if the leakage becomes more than normal the
1783 superintendent should at once look after it; the first thing to do would be to look at the station meter, keep an eye on that, test the consumers' meters and see if they are all right; consumers' meters ought to be tested regularly because they are apt to get out; it is not much of a job, don't cost a great deal.

232. So far as loss in the mains is concerned is it liable to be greater or less as the age of the plant increases?

A. As the age of the plant increases it is liable to get greater.

233. To what is that due?

A. It may be due to a number of things. For instance, the pipes may originally not have been laid deep enough and they are affected by the heat and cold causing contraction and expansion; the joints

pull out; heavy wagons may pass over them and cracks come in mains which may not be noticed for some time; the gas may pass off and go in a sewer somewhere; there may be other work done in the streets, such as is now being done here in the street, laying a steam heating plant, a deep excavation made and the earth may gave way a little bit and a gas main get out of alignment, joints pull out and service pipe pull out; electrolytic action of course will take place after while which at first is not felt but all at once it will be noticed especially near the power station.

Cross interrogatories by Mr. RITCHER:

1. What was your occupation in the year 1894?

A. As nearly as I can remember now I went to Norfolk, Va., as superintendent, engineer of the City Gas Light Co.—the Thompson-Houston Electric Co.; it is one company.

2. How long did you stay there?

A. I think I was there about 3 years and 3 months; I left there in March 1897.

1784 3. What did you do then?

Ans. I went to Europe.

4. On a pleasure trip?

A. No sir, I went there for James Green, president of the Laclede Fire Brick Co. of St. Louis, Mo.

5. As an employé of Mr. Green?

A. Yes sir, to investigate and get plans of the inclined retort system.

6. How long were you in Europe?

A. At that time about six or seven weeks.

7. Then what did you do?

A. I traveled around the country for Mr. Green, more or less trying to get people to buy his goods, fire clay goods, retorts, etc.

8. With special reference to the inclined retort?

A. Not particularly to that, but generally.

9. Your investigations then were not favorable to them?

A. Yes, they were very favorable.

10. How long were you traveling around for Mr. Green?

A. About a year and three months altogether including the European trip.

11. When was the end of that period?

Ans. In August, 1898.

12. How many inclined retort systems did you put in during that period?

A. I did not put in any.

13. What did you do after August, 1898?

A. My home was broken up; my mother died and my wife died and I did not do anything for about a year and three months; I would just as leave have died myself.

14. After that period of a year and three months what did you do?

A. I was re-employed by Mr. Green and put in charge of
1785 several gas works he owned.

15. Were all those employments by Mr. Green personal employments or employments by the Laclede Fire Brick Co.?

A. They were employments by the Laclede Fire Brick Co. of which Mr. Green was practically proprietor.

16. How long did you take charge of these plants you speak of?

Ans. About a year.

17. Where were they?

A. My quarters were at Moberly, Mo., the gas and electric plant there, and another one I looked after was at Greencastle, Ind., a small plant.

18. Was the Greencastle plant a prosperous plant?

A. I don't think it was.

19. What price did you fix on gas in those places?

A. I did not fix the price; the price was fixed.

20. Did you endeavor to persuade Mr. Green to change those prices?

Ans. I did.

21. What price was he selling at?

Objected to as immaterial and incompetent.

The MASTER: I don't think it material.

Mr. RITCHER: I don't think it is either.

22. What did you do after that?

A. Since then I have been doing what I am doing now, acting as a consulting engineer for gas companies.

23. When did you leave the employ of the Laclede Fire Brick Co., if at all?

A. In June, or about the first day of July, a year ago.

24. Did you also leave the employ of Mr. Green at that time?

A. No, I did not leave the employ of Mr. Green at all; I was discharged; they had no longer any use for an eastern representative as they thought and they let me out.

1786 25. Were you then the eastern representative of the firm?

A. No, but that is what somebody in the office called me; I was general traveling representative and it created a good deal of jealousy there.

26. Do you know in what capacity the Laclede Fire Brick Co. employed you?

A. They employed me as a traveling agent and as a gas engineer also.

27. Where are your headquarters now?

Ans. Morristown, N. J.

28. When did you first take up the management of the Norfolk plant?

Ans. In October 1877.

29. How many years at different times were you in charge there?
A. The first time about 5 years and 7 months, from October 1877 to May 1883, having general supervision of the plant.
30. At what price did you sell gas there?

Objected to as immaterial.
The MASTER: I don't think it material.
Mr. RITCHER: He has testified as to what price gas should be sold at and this is a plant where he was in control and I would like to know whether he put his ideas into operation.
The MASTER: I don't think it material whether he did or not but he may answer subject to the objection if you desire.
Mr. RITCHER: I will not press the inquiry.

31. What was the per cent. of coke produced under your management of the Norfolk plant?

Objected to as immaterial.
The MASTER: I don't think it material.
Mr. RITCHER: He testified on direct examination as to that.
The MASTER: I think not; he testified with reference to the percentage of coke produced as shown by the statement marked Exhibit 20.

1787 32. From your experience as a gas expert what per centage of coke is produced in the manufacture of coal gas?

Objected to as immaterial.
The MASTER: I think it material. He may answer.

A. What kind of coal?
33. Name your own coal.
A. Well, we will name Youghiogheny gas coal because that is named in this case.
34. What percentage of coke is usually produced from that coal?
A. It differs a little bit as to the quality, say from 66 to 68 per cent. of the weight of the coal.
35. What per centage of the coke produced is used as fuel ordinarily in well managed plants?
A. That depends on your furnaces. For instance, in an old style furnace you might use 40 and even 50 per cent.—the old style fire bar furnace. In the generative furnace, or regenerative furnace either, you use say from 17 to 25 per cent.
36. How would the per centage of fuel so used differ in benches of 5's and benches of 6's?
A. The difference between benches of 5's and 6's is not very great; I could not say exactly how much now but it is not very much.
37. How is it between benches of 6's and 8's?
Ans. You must——
38. (Interrupting.) Will you answer my question. How will it differ between benches of 5's and benches of 8's?

A. Tell me what furnace you mean and I will answer your question.

39. Regenerative furnace.

A. I have never seen regenerative furnaces with benches of 5's.

1788 40. How would the amount of fuel consumed differ between a bench of 5's, which you have seen, and a regenerative bench of 8's?

A. A bench of 5's I had charge of for many years—Interrupted

41. I am asking now in regard to your general experience, not as to any particular bench, for the master rules that is improper.

A. It is my experience about 35 to 37 per cent., that is, in old style free burning furnaces benches of 5's. Now, in regenerative benches I have never had 8's but I have had 7's and I have had 6's—generative furnaces with 6's that burn about 30 per cent. and in the regenerative furnaces that burn about 18 per cent.; the regenerative furnaces were 7's and the generative were 6's, and the free fire benches with an ordinary old style furnace burn about 35 to 37 per cent.

42. Is the result of 18 per cent. you speak of the usual result in such furnaces?

A. I could not say that because a great many men differ in practice; it depends on who runs the bench.

43. Do you know anything about the amount of fuel consumed in regenerative benches besides those you have run?

A. Yes sir, I have read plenty of statements as to that and I have heard many men claim it took from 17 per cent. up to 18, 19, 20, 21 and up to 25 per cent.

44. As a gas engineer have you never had occasion to investigate and ascertain what is the general result of such benches?

A. I have investigated quite a few benches but not generally.

45. What is the per centage of fuel used in the case of the regenerative benches of 9's?

A. The difference in fuel used is not very great from benches of 6's, the per cent. differs from 17 to 25 per cent.—the whole range runs about that of the coke made in 6's, 8's or 9's; there are

1789 not very many 9's in this country.

46. If there is no difference practically between the consumption in a bench of 6's and a bench of 9's do you still maintain that a bench of 6's is more economical than a bench of 9's?

A. A bench of 6's is preferable to a bench of 9's; I did not say it was more economical under certain conditions.

47. What is the general per centage of leakage in the operation of a gas plant as experience has demonstrated and as recognized by the gas fraternity?

A. It is generally considered about 5 per cent. on the average of leakage.

48. Don't you know as a matter of fact it is considered to be about 10 or 11 per cent. by all gas authorities?

Ans. No sir.

49. And so stated in the United States Census Report of 1900?

A. I don't know for I have not seen that report; it is not so just the same.

50. What is the percentage of ammonia produced in the general operation of a gas plant on proper lines?

A. That differs according to the coal used.

51. What is the amount produced to the ton of coal carbonized of the Youghiogheny second pool coal?

A. I have obtained as much as 5 pounds.

52. I am not asking you what you obtained. I ask you as a gas expert what has been obtained as the general experience of gas men. You might have gone into a chemical laboratory and obtained most anything.

A. Yes, but I am trying to tell you what I obtained in my experience.

53. What is the amount usually obtained by plants the world over?

A. Authorities give it that 28 pounds of sulphur is equal
1796 to 7 or 8 pounds of ammonia but my own experience is less than that.

54. You have never taken occasion to find out, have you?

A. Certainly, I have taken a great deal of pains to find out, but you will not let me state my own experience or I could tell you; of my own knowledge it is 5 to 6 pounds.

55. I tried to ask you about a particular plant and the master said it was improper to ask you about a particular plant and you ought to know that as well as I. In your direct examination I think you stated that some plants required as little as ½ of the coke produced for fuel purposes—can you name any such plant?

A. I don't remember to have said that.

56. If you did say it, do you now wish to correct your testimony?

A. If I said that but I don't remember saying it.

57. What is the average life of a retort as demonstrated by practical experience in plants generally?

A. The average life at the present time is about two years' constant work; you understand that the retorts are sometimes run six months in a year, then let down, maybe run three or four months, and let down and the retorts may be longer in the works of co urse.

58. If the retorts are let down as you testify, is it not a matter of experience and a fact that their life is shorter than if kept heated continuously?

Ans. Undoubtedly so.

59. You stated you received a letter of invitation to come here as a witness—have you that letter with you?

Ans. I have not.

60. Have you it somewhere?

A. I have it I think in my room at Morristown, N. J.

61. Will you produce it?

Objected to because the witness is not compelled to produce th letter; it don't make any difference under what circumstances came here.

1791 Mr. RITCHER: I have a right to show the animus of th witness.

The WITNESS: I have no animus at all I assure you.

62. Will you produce this letter?

A. I have not got it with me.

63. Will you send that letter to the master by due course of mai

Objected to same grounds as before.

A. I think I must be governed by Mr. Tichenor.

64. You refuse then, on the advice of counsel, to produce it?

A. Yes sir. So far as I am personally concerned you could hav it.

65. In your testimony on direct examination you repeatedly r ferred to what the record contained. Have you read the enti record in this case?

A. I have read a number of volumes of it, some 7 or 800 pag I think altogether.

66. Was that all you read of it?

A. Yes sir, I did not read any further; I had it but I did no want to read it as it seemed to be a repetition of the same thing.

67. Then you have not read the entire record in this case?

A. No sir, I have not.

68. Who indicated what portions of the record you should read

A. Nobody indicated that; they gave me three volumes—I ha the exhibits by the way, I have seen them—Exhibit 20, I had thos exhibits and they brought six volumes for me to look at in M Tichenor's office and I took three of them and read them at the hote and part of the time at Mr. Tichenor's office.

69. Did you take the three first or three last volumes?

A. I think the three first.

70. How did you happen to take the three first instead o

1792 the three last?

A. I took volumes 1, 2 and 3, and had intended to tak them all but when I returned those I said I would not take th others for I thought it was waste time.

71. Then you come here as an expert to testify, having read bu half the record and without any advice as to whether what you hav read covers the case or not. Is that the fact?

A. I have read what I have stated.

72. My question is, without advice as to whether the half of th record you have read was in any sense complete, you come here as an expert to testify and refer to what the record contains.

A. I do so without advice; I was told there was the evidence and I had better look at it to see what was required and I did so.

73. This Exhibit 20 that you have spoken of, was that given to you by the master in this case?

A. No, I think it was a copy I had.

74. Did you verify it with the copy on record here?

A. I did not.

75. When you speak of the labor shown by Exhibit 20, entering into your computation as to the cost of gas in the holder do you refer to the labor shown by Exhibit 20?

A. Yes sir, and some of it I have added; I did not see it mentioned in the exhibit and I knew it was necessary and should be there and I added it—I assumed that.

76. Did you cover those additions in your testimony yesterday by specific items?

Ans. I think I did.

77. In your testimony yesterday you added ½ a cent for purification, 1¼ cents for repairs and 1 2/100 of a cent to bring it up to 15 cents. Were those the additions you refer to?

A. Yes sir.

78. If any labor entered into the cost of gas in the holder
1793 other than the items which I have just named and other than the items appearing in Exhibit 20 you did not take that labor into account, did you?

A. I did to a certain extent and I will tell you how. I saw that coal was said to cost $2.60 per ton, that coal was charged at $2.80 and I assumed that included the labor of unloading it and bringing it into the works.

79. If it did not include that, your computation would be an error to that extent?

Ans. Yes sir, to that extent.

80. Did you make any other like assumptions in your estimate?

A. None but what you have named.

81. What proportion of fuel do benches of 6's consume as compared with benches of 9's in comparison with the amount of gas made?

A. Of course a bench of 6's would consume less than a bench of 9's; a bench of 9's would make more gas than a bench of 6's and make more coke; therefore, if I say 12 pounds of coke is used to the hundred pounds of coal carbonized, which is the way we usually figure and I figured it that way, it makes no difference whether it is 6's, 8's or 9's. I say 12 lbs. of coke per a hundred pounds of coal carbonized and do not specify the kind of bench at all; a bench of 9's uses more coal and more retorts and makes more gas.

82. Are you willing to go on record as stating that a bench of 6's can produce gas as economically as a bench of 9's, bench for bench?

A. Under certain conditions, yes sir—under certain conditions more so.

83. Can it do it in the production of 500,000 cubic feet per day?

A. In that case, a bench of 6's would be far preferable to a bench of 9's. I would not recommend benches of 9's in small gas
1794 works like that.

84. Would you stake your reputation as a gas expert on that statement?

Ans. Yes sir.

85. Calling your attention again to benches of 6's and 9's, which requires the more expenditure for labor per thousand feet of gas made?

A. In proportion to the gas made it would require about the same amount of labor per thousand feet.

86. You say about—be more specific, state whether you mean $1.00 or $100.00, I don't understand exactly what you mean by about—make a definite statement.

A. Say we have a bench of 6's; I consider one man is sufficient to take care of that bench of 6's, or I could illustrate it better this way. We have three benches of 6's, 18 retorts, I put three men to those 18 retorts; say I have two benches of 9's, 18 retorts, I put three men to them, two men could not handle it, it would be too much work for two men, it is according to the number of retorts to take care of.

87. Didn't you testify on direct examination that two men were sufficient to take care of two benches of 9's?

A. I don't remember, I might have done so; two men might do it.

88. You were testifying for the defendant yesterday and for the complainant today, does that make any difference?

A. No, two men might take care of two benches of 9's—strong powerful men; I have known men do that.

89. Are those the kind of men you put in yesterday as cheap labor?

A. No sir, they would have to be first class powerful men.

90. If you have but two men to benches of 9's why would not the labor be cheaper than with benches of 6's that required 3 men?

1795 A. It depends on what you pay your men and what kind of men they are.

91. Suppose you pay them the same.

A. If you paid them the same that would alter the case but you probably would not do that.

92. Suppose those men were the kind you had in mind when you fixed the wages yesterday and number of men to a bench.

A. I had in mind the best kind of men then.

93. Are not you talking about the same kind of men now that you were talking about to Mr. Tichenor yesterday?

A. You cannot twist me up like that.

94. Answer the question. Are you not talking about the same kind of men now?

A. Of course I am—Interrupted.

95. Then if you can get along with two men on benches of 9's can not you get along better than you can with three men on benches of 6's?

A. My recollection is, there was no number of men mentioned at all per bench in my estimate yesterday.

96. You gave the cost of distribution yesterday—I have it here.
Ans. Yes, I have it too; I say, so many men.
97. Then you went into the retort house matter?
A. Yes sir, I did, and I have the number of men here somewhere.
98. You stated yesterday that a retort could be ruined in one night, what did you mean by that?
A. By carelessness a retort might be ruined in one night; you might have a furnace in good working heat, almost white heat, and a man might go to sleep or get drunk and let the fuel burn down, as I have seen done, then the cold air rushes through there and the retort likely cracks and may fall to pieces.
1796 99. A man may be taken suddenly ill and that might happen.
A. Yes, if there is only one man in the works.
100. How do you avoid the occurrence of such things?
A. You know you usually try to employ men who are reliable and you seldom in a works, having 6 or 9 retorts, put but one man there; there is usually more than one man, so if one man is sick or gets drunk the other men notify the superintendent or get somebody else.
101. That involves having a superintendent or foreman there does it not?
A. One of the men may have that power; I have known that to be the case in a small place like Peoria—probably the head stoker will do that.
102. You have to have a foreman or some one to exercise his duties?
Ans. Yes sir.
103. Is that true day and night?
A. Yes, just the same.
104. That element would enter into manning the force of a plant, would it not?
Ans. Yes sir.
105. In that respect you would consider the gas business as safe as any other business on earth?
A. I have always found it so and I have had charge of many men for years and years.
106. You spoke yesterday of the difference in economy between benches of 6's and 9's in the matter of the amount of gas which had to be made varying. As to whether that actually would produce an economy in a bench of 6's as compared with a bench of 9's would depend, would it not, on the actual data as demonstrated by operation?
Ans. Yes, certainly.
107. How many retort houses in the United States were equipped with inclined retorts during the months of March, April and May, 1899
1797 Objected to as immaterial and incompetent.

A. To the best of my recollection there was only one in Louisville, Ky., and I am not very sure about the date—oh, yes, there were two, one at Louisville, Ky., and one at Bay Ridge, Kings County, Gas Illuminating Co., Brooklyn; I am not absolutely sure about the time, but I think it was about that time.

108. How many benches were there of that kind in the Bay Ridge plant?

A. 5 benches of inclined retorts.

109. Were they in existence in March, April and May, 1899?

A. To the best of my knowledge they were but I am not absolutely certain.

110. As a matter of fact, the Louisville plant was not even ordered in 1899, was it?

A. No, it was not built but they were building, it was in course of erection at that time.

111. How many other plants in the United States are now equipped with the inclined retorts?

A. None but quite a number are building, though.

112. You mentioned some inclined retorts in the Laclede Gas Company's works?

Ans. Yes sir.

113. When was that built?

Ans. In 1890.

114. Has the Laclede Company put in any retorts or benches of that kind since that?

A. No, they have done all they could to keep them out of the country.

115. Keep what out of the country?

Ans. Inclined retorts.

116. I asked you if that company had put in any benches of retorts of any kind since then?

A. Yes sir, they have put in benches.

117. Of inclined retorts?

1798 A. No, sir, old fashioned benches of 3's that nobody has today.

118. Do you recollect what the capacity of those 7 benches of the Laclede Company are?

A. I think it was a million cubic feet a day—the new retort house.

119. About how many gas plants are there in England?

A. I do not know how many altogether.

120. You said there was 67 equipped with inclined retorts?

A. Yes sir.

121. Don't you know there are over 900 equipped with the other kind?

Ans. No sir, I do not.

122. Do you know in a general way how many plants there are in Great Britain and the United Kingdom and on the continent?

A. No, I do not.

123. When you were investigating the value of these inclined retorts, didn't you ascertain what percentage of gas plants had them in England?

Ans. No sir, I did not.

124. You are familiar with the general plan of the works of the complainant company here?

Ans. Yes sir.

125. Have you examined the blue print showing the works?

A. I have seen it.

126. You have read Mr. Little's testimony with regard to the manner in which the works were laid out?

Ans. Yes.

127. Assuming that the plant of the complainant company is as described in Mr. Little's testimony, how would you get the coal from the cars to the benches?

A. I could not say that.

Mr. TICHENOR: I object to that as immaterial, for the reason the record shows the cost of the coal delivered and those were the figures actually used by the witness.

1799 Mr. RITCHER: The record shows what the cost was delivered on the cars; this witness has been testifying as to the labor required to produce gas down there, and I want to get at the labor from the car to the benches.

Mr. TICHENOR: I supposed that $2.80 per ton was the cost delivered in the works.

The MASTER: No, that is f. o. b. Peoria, that was the testimony of Mr. Little, as I understood it.

128. How would you get the coal out of the cars?

A. I don't know anything about the place; I have not seen it or any plan of it.

129. How would you generally get coal out of a car in the conduct of a gas plant?

A. In a number of ways; I have seen coal taken out by hand and teamed out and have seen other cars which were elevated and dumped into the coal shed.

130. Are either of those methods in vogue in towns of this size?

Ans. Yes sir.

131. Where?

Ans. At Morristown, they empty the coal cars from the bottom into the coal shed.

132. What is the output of the Morristown works?

A. About 32,000,000 a year.

133. What is the altitude of the track on which the coal is delivered?

Ans. About 15 feet above the floor of the coal shed.

134. Would you advise the dumping of cars where the railroad tracks are on the level of the ground?

Ans. No, I would not.

135. Where the railroad tracks are on the level of the ground, how would you get the coal from the cars?

A. I might find it good policy to elevate the track, if I had room to do it, but I suppose you could not do that, and it would have to be shoveled out.

1800 136. What would be the cost of the labor per ton for shoveling that coal out?

Ans. About 6 cents a ton, I should say.

137. Could you fill the coal shed at 6 cents per ton?

A. No.

138. What would it cost, assuming you filled your coal shed?

A. Probably the shoveling of it, if you had to trim it up high, etc., it would cost ten cents a ton—within that, I think.

139. How would you get that coal from the coal shed to the benches?

A. Lower it in wagons or if the works are small, wheel it there.

140. What would be the cost of the labor for doing that?

Objected to because the record shows that the stokers do that work themselves principally.

Mr. RITCHER: There is no such testimony in the record; you might infer it from your witness' testimony but I want to show it is not a fact.

A. Shall I answer that question?

141. That is what I asked it for.

A. Well, I was stopped by an objection, you know. In works of that size, the stokers usually do it, or men employed in the retort house usually do it and it is included in the wages.

142. Do they do that in a bench of 9's?

A. It don't make any difference about the size of the bench.

143. You stated this morning that one man could run a bench of 9's?

A. I said you might get a man that would do it but I would not have the heart myself to put one man to a bench.

144. Unless they were giants, some particular breed of men?

A. A strong, stout stoker could do it; the best man I ever had was a little man that did not weigh as much as I do by
1801 many pounds.

145. In running a bench of 9's how many pounds of coal are placed in each retort in charge?

A. That lies entirely with the management; there is no rule for that?

146. What are the limitations of that rule?

A. The limitations are really what the retort will hold and the heat put on it, if you want to push it to its limit, but that is not the rule; there is no rule for that at all.

147. As a gas engineer, have you not any idea as to how much coal should be put into a retort properly charged?

A. I know what I would do, I would charge a bench such as are described in your papers I have seen—I think one could easily put 350 pounds of coal into a retort; that would be about as much as I would want to put in every 4 hours.

148. That would make 18,900 pounds per day per bench, would it not?

Ans. Yes sir.

149. Would you expect your stokers to bring that coal from the shed into the retort house, draw the retorts, draw the coke and quench it?

A. No, sir, certainly not, I would not have the heart to do it.

150. Neither would the man, I think, have the heart to do it after he had done it once?

A. He would not keep it up long, but in benches of 6's one man could do it.

151. Didn't you just state that it made no difference whether it was a bench of 6's or 9's that one man could do it?

A. Not quite that way; I said when I spoke of putting in a man to a bench of 9's that you might do it, you might get a man to stand it, but as a rule you could not.

1802 152. Then you wish to modify your testimony in that respect?

A. If that modifies it, I do; I am not sure that I expressed myself right before.

153. In figuring the cost of gas in the holder yesterday, what did you figure the labor of unloading the cars and getting the coal from the shed to the benches at—how did you figure that in?

A. I took the number of men reported on the report—three thousand and some hundred men, that is adding up the number of days they worked for six months, as shown in "Exhibit 20."

154. Then if there were other men employed in that work that does not appear on that exhibit, it did not enter into your computation?

Ans. No sir, except for purification and repairs; I made allowance for that.

155. In your computation yesterday, what allowance did you make for boiler house labor?

A. In a little place like this, the retort house men usually take care of the boiler in my experience.

156. Do you refer to some of these giants or what breed of men do you refer to?

A. No sir, I run the works at Norfolk, Va., and the men there took care of the boiler all right.

157. What was the output at Norfolk?

A. When I was there first we sold 72,000,000 a year; we made a little more when I was there last.

158. You testified yesterday on the basis of 164,000,000 didn't you?

Ans. Yes sir.

159. Would you call that no difference from the Norfolk works?

A. I do not quite catch on to the meaning of that question.

160. You were speaking just now of the result in Norfolk, were you testifying from your personal experience?

Ans. Yes sir.

1803 161. Has that been what you have based your testiimony on in this case?

A. On my personal experience in one sense and my figures so far as I could get them from these exhibits.

162. Then in your testimony in chief on yesterday, you were testifying as to what you knew from personal experience, if I understand you?

Ans. Yes sir.

163. What would be the purifying labor, or work in a purrifying house in the production of 164,000,000 per year?

A. That would depend very largely on the manner of conducting that operation; I will explain what I mean if you desire.

164. Well, you need not go into that. What would be thee limit of the labor necessary there?

A. I have made gas for 5 months without ever having a penny's worth of labor in it; then again, you might spend several diollars; it is hard to define; I will have to explain it if you want to understand it.

165. You speak of coal gas, I suppose?

A. Coal and water gas, either or both. I am willing to explain it if you want it.

166. Does it cost more or less to purify coal gas or water gas?

Objected to as immaterial.

A. Ordinarily, the way it is managed now, it does not cost any more; the old way, the water gas cost the most but the way operations are conducted now there is scarcely any difference.

167. What labor do you figure on in connection with the ammonia concentrating plant and apparatus in the manufacture?

A. I could not specify that, but it is very little; it is mostlly done with steam pumps and steam pipes, and there is not much labor attached to it.

1804 168. When you arrived at the cost of gas in your examination in chief, you did it without being able to account for the labor in connection with the ammonia?

A. No, I can quote a case to you where there is no extra expense at all.

169. Did you base your figures on that assumption?

A. Don't you ask me questions like that—stop right there.

170. I asked you the question—Interrupted.

A. And I will answer your question, but I want you to ask me in a different manner.

171. Did you base your figures on that assumption?

A. I based my figures on the assumption there was no extra labor.

172. If there was extra labor, then to that extent your figures are incorrect?

A. My figures are correct because it can be done without extra expense; I know where it is done without extra expense.

173. Will an ammonia concentrating plant run itself?

A. No sir, but a man from the retort house can go and turn this steam off.

174. One of these giants would do that too, I suppose?

A. Yes, or a good little man could do it.

175. Who puts the coke into the yard and who loads it in the car or wagon in the estimate which you made in your examination in chief?

A. I made no allowance for that, for there is nothing shown in the record that I could see; I supposed the number of men given there as working were the men that did all the work; it states there for so many men, and I supposed that was all the men.

176. As a matter of fact, if that is done by other labor, then to that extent your figures are incorrect?

A. Yes, if it is done by other labor.

1805 177. Do you expect that the stokers will take the coal from the shed, bring it into the retort house, charge the benches, draw the coke, quench the coke and load the coke into wheel barrows, or other conveyance, and put it into the yard, load it on the cars, attend to the ammonia concentrator, attend to the purifying apparatus and attend to the boiler—do you consider all that the work of the stokers?

A. No, not at all, and I didn't say so either.

178. If in your estimate on direct examination you have assumed, inadvertently or otherwise, that all of that was done by the stokers, have you made an assumption which is not within the range of probability, at least, in the operation of a gas plant?

A. If I did so, yes sir, but I did not; as I have said, I supposed the number of men given there as working represented all the labor. If they are not all there, that is not my fault.

179. What is the nature of the apparatus, which you mentioned in your examination in chief, under which the inclined retort system can be charged by a child of six years?

A. Oh, I saw that in Edinburg, but that would not apply to your works here; you could put it in of course; I saw it in operation.

180. Do you know what the expense of that apparatus would be?

A. I have been told but I don't remember the figures, it is not much.

181. Do you know of any such apparatus which is being operated by a 6 year old child?

A. No, certainly not.

182. Did I understand you to say on direct examination that the cost of labor in the retort house in Louisville is from 40 to 65 per cent. less than the cost of labor in the retort house in Peoria by

reason of the fact that the retorts in Louisville are in-
1806 clined?

A. I did not specify Louisville; I said that an inclined retort system reduced the cost of labor, that it was claimed to reduce it, from 40 to 65 per cent.; I did not refer to any plant but generally; Mr. Barrett's figures are something like that, I did not say it of my own knowledge.

183. You have stated, I think, that the net cost of gas in the holder in Peoria was 12.23 cents per thousand before you added one or two fractions for purification?

Ans. Yes sir.

184. If the inclined retort system were introduced here, to what extent would that figure of 12.23 cents be reduced?

A. According to my recollection of my figures, the labor came to 9 cents and something, taking the men as reported as I stated a*hwile* ago. Now, with the inclined retort system, it could be reduced to about 3 cents per thousand feet, I believe.

185. In other words, you could put gas into the holder for about 6 cents?

A. No, you could save in the labor 5 or 6 cents per thousand cubic feet.

187. That would reduce the 12.23 to 6 or 7 cents, that is, based on these figures you say you have seen but you don't know anything about it yourself?

A. I beg pardon—I don't know anything about what?

188. The correctness thereof—you spoke about Mr. Barrett saying so and so?

A. Yes, but that is pretty strong to say I don't know anything about it; for I do know something about it; I don't know anything about what Mr. Barrett says, but I have written papers and read them before the gas associations and they are on record showing that I do know something about it, and I would not like to go on
1807 record here, even in a case like that, that I know nothing about it or I said so, for I do.

189. We will not change the record in any event?

A. All right.

190. Will you kindly name such cities as you can of 50,000 inhabitants and upwards, that are now using gas holders more than 25 years old?

A. Let me see. There is one at Norfolk, Va., that is over that many years old.

191. How many inhabitants there?

A. 60,000 they claim, there may be 40,000 or 50,000.

192. How old is that holder?

A. I could not say really how many years old; it was renewed once a good many years ago, but I could not give the exact date.

193. Do you know it has been up 25 years?

A. Yes, it was there when I first went there in 1877, and was in use then, and that is more than 25 years ago.

194. When were you there last?

Ans. 3 or 4 weeks ago.

195. Was the same holder there then?

A. It appeared to be the same, I could not really say.

196. Name some other city where the holders appears to be the same as it was 25 years ago?

A. The Metropolitan Gas Light Company of New York—Metropolitan branch of the Consolidated Gas Light Company.

197. When was that erected?

Ans. In sixty something.

198. Is the same holder there?

A. The same frame is there, whether it has been renewed or not I could not tell.

199. Tell me a few places you do know where a holder has been in use for 25 years?

A. Unless a man was there constantly he could not
1808 say. To the best of my knowledge and belief these same holders are still there; there is another one in the New York branch of the Consolidated Branch Company—a million foot holder; that was there in 1873, the same frame work, and for all I know the same holder was there.

200. You don't know whether the same holder is there or not, do you?

Ans. To the best of my belief, it is.

201. Were these holders in masonry tanks or steel tanks?

A. In masonry tanks.

202. Still in masonry tanks?

Ans. Yes.

203. Will you kindly name some more if you can?

A. I cannot think of any others now.

204. Do you know how many gas plants are in the United States?

A. Somewhere about 900, something like that, 800 or 900.

205. Do you know of any plant in cities of 50,000 inhabitants and upwards where the same engine and exhauster is being used to-day that was put in 25 years or more ago, if so, state?

A. Unless a change has been made very recently, there is an engine at the old Laclede works that was running about a year ago which was put there when the works were built at the foot of Howard street in the early '70's. I don't know just what date the Morristown works were built but the first engine put there is still running today; it was put into the old works, I think, all of 25 years ago, but I am not sure; there is also a number of other engines, I cannot recall them to mind just now, at works I have been in which appear to be the same, and I believe they are the same.

206. Are the holders, engine and exhauster in the Milwaukee plant the same as they were 25 years ago?

A. I don't know anything about the Milwaukee plant.

207. How about Indianapolis?

Ans. I have never been to Indianapolis.

1809 208. Or Cincinnati?

Ans. I could not say.

209. How is it in Cleveland?

A. I could not say about that either; I have been to those works but I never asked when the engines were put in or anything like that.

210. Do you know of any other city of 50,000 inhabitants or upwards where the engines and exhausters are still there after being in use 25 years?

Ans. I am not prepared to say just now.

211. You have stated you have seen a number of holders taken down that were not 25 years old—how did that happen?

A. I had two taken down myself at St. Louis; the holders had been there some 5 or 6 years and we dismantled the whole plant; it was one of those opposition plants and we wiped them off the earth or forced them to sell out, and it did me a great deal of pleasure, too.

212. Do you know of any other holders taken down and rebuilt?

A. There was another one at Portsmouth, Va., that was let go without water and allowed to rust out; that was removed and taken out a few weeks ago and a new holder built in place of it; it was a case of sheer negligence.

213. You take great pleasure in wiping out opposition plants, do you not?

Ans. You bet I do.

214. Have you known of engines and exhausters being rebuilt or replaced that have been in service a comparatively brief period?

A. Not any very brief period but I have known it to occur and have done it myself at the Laclede works where it was too small and I put in a larger one; that has happened at several works where the exhausters were too small and I put in larger ones.

215. That happens frequently, does it not, when the business outgrows the apparatus?

A. I could not say how frequently but it does happen.

1810 216. That is true of holders, also, is it not?

A. Not to so great an extent; people usually build a holder with a little foresight.

217. You spoke in your direct examination of electrolysis and city councils being the only hazards to the gas business in your estimation. I presume hostile and ill advised legislation by city councils was in your mind?

Ans. Certainly.

218. And you consider that a serious hazard where it occurs, do you not?

Ans. Yes sir.

220. Do you not consider natural gas a hazard of the gas business?

A. To some extent, but not so much so.

221. Is it not a very serious hazard where they find natural gas?

Ans. It depends upon the quantity where they find it.

222. Suppose they found it in sufficient quantity to supply the demand of the place where it was found?

A. I could not tell that; I found in one place where they thought they had plenty of natural gas they put down mains but did not get the gas.

223. I am asking you about places where it is found in sufficient quantity to supply the town, is it or not then a hazard and a serious one?

A. I cannot answer that question because you cannot tell whether you will find it in sufficient quantity—you never know.

224. Don't you know of a great many plants that have been dismantled by reason of the discovery of natural gas?

A. I don't know of one.

225. Are you familiar with the conditions in Pennsylvania, West Virginia and Ohio, where natural gas has been discovered and its effect upon coal gas plants?

A. In a few cases—only a few cases.

1811 226. Under what conditions will coal gas become explosive?

A. When mixed with a sufficient quantity of air.

227. Is it possible to mix coal gas with air?

A. Certainly, it is done right along.

228. Would you consider coal gas mixed with air as a hazard of the coal gas business?

A. If you mix them in sufficient quantities—a small quantity of air is a benefit, no hurt to it.

229. You spoke of an explosion of some purifying boxes, did that occur because coal gas got mixed with air?

A. No sir, the purifying boxes did not explode but the purifying house went up; the boxes kept on working.

230. Did that happen because gas got mixed with air?

A. The gas was escaping from the boxes and a man went in with a lighted lantern and up went the house, but the boxes kept right on, were not put out of use.

231. Explosions do occur, do they not in gas works by reason of the fact that gas is there?

A. There are very few records of it; the one I mentioned is the only one of two that I know of.

232. Very few are left to report it, usually?

A. We hear about them.

233. How many gas explosions in and about gas works, or connected with gas systems, have been reported or recorded during the past three years?

Ans. I could not say, I don't remember.

234. This negligence which produced conditions under which this purifying house blew up is something that has to be taken into consideration, has it not, in connection with the gas business as distinct from the putty business?

A. I don't know why it should be.

234. In case there was any leakage in the condensing and
1812 scrubbing apparatus of a gas plant, that would fill the room with an explosive mixture, would it not?

A. Provided the works were not run right and nobody there to look after things.

235. If that occurred, it would do it, would it not?

A. Certainly.

236. If the stokers were running that room, would not there be somebody there all the time to see whether there was any leakage in the apparatus?

A. You ask me an almost impossible question but I will answer you just as you asked it, no. There is a great deal to be said on that subject.

237. Suppose there was some back pressure in the purifying boxes that blew the seals, it would bring about the same result, would it not?

Ans. Yes, sir.

238. That is a hazard which is peculiar to the gas business and gas apparatus, is it not?

A. Not if the superintendent attends to his business, but if he puts a hay marker in charge of gas works it might happen.

239. It happens often, does it not?

Ans. No, not often.

240. Are not the seals blown with comparative frequency in the plant of a gas company?

A. They were never blown in my experience in any works of which I had charge.

241. You are testifying from your personal experience?

A. From my personal experience.

242. I think you mentioned a holder in St. Louis that burned without cracking the glass across the street.

Ans. Yes, sir.

243. Did it damage the holder any?

A. Yes, it was destroyed, of course.

244. I wish you would name any plants in cities of 50,000 or upwards where the service pipes, in the majority of instances,
1813 are from 20 to 25 years old?

A. I would like to say before answering that question that I have not had much experience in cities of 50,000 inhabitants or thereabouts; my experience has been in the city of St. Louis, which is considerably larger than that, and in the city of Norfolk, at that time smaller, some places smaller, and New York city, which is larger, so if you bind me down to 50,000—Interrupted.

245. I said 50,000 inhabitants or upwards, I think that gives you considerable lee way.

A. I have known services that were in 20 years.

246. I mean the majority of the entire service system of any company in a city of 50,000 inhabitants or upwards?

A. I was not there long enough to tell that.

247. Then you don't know of any, do you?

A. From my own personal knowledge, of course not.

248. Will you name any plant in cities of 50,000 or upwards having retort houses from 25 to 40 years old and now in use?

A. Yes sir, in New York city, several of them; in St. Louis several of them; in Norfolk, Va., there is only one. In New York city, there are three retort houses, with which I have been connected, which have been used longer than that, and they are there today; in Norfolk one has been there and is there in use today; in St. Louis there are several that have been used more than 25 years still in use today.

249. What sort of gas is made in Norfolk?

A. I could not say what they make now there; they are prepared to make both coal and water gas.

250. Didn't you testify yesterday that you installed a water gas plant in Norfolk?

Ans. Yes, they have both coal and water gas.

251. Don't you know that the water gas plant there is in operation today?

Ans. I do not.

1514 252. My question is if you know of any retort house now in use in the manufacture of gas that has been in use for the past 25 years?

A. The retort house is there at Norfolk.

253. Do you know they are manufacturing coal gas in the retort house there today?

A. You didn't ask me that, or I would have told you at once; you simply said retort house for making gas; I don't think you said it was a retort house making coal gas.

254. Well suppose you answer it in connection with retort houses manufacturing coal gas?

A. Where they are making coal gas continuously, there are two of them certainly in New York city, and I am certain they have been making coal gas for more than 25 years and probably more than 30 years; then at the Laclede gas works in St. Louis, station "B" and station "A," there are four I am positive of; to the best of my knowledge and belief there are a good many others but I am not certain.

255. Calling your attention to the four you have named, what portions of the retort house in those instances are the same material as was there 25 years ago?

A. In the works at St. Louis every portion except probably some of the slate and nails that hold the slate on the roof; as to the houses in New York, I never saw any change; I often see the houses but never saw any change, the same walls and apparently the same roof is there.

256. Is it not a fact that the benches of today are too large for the retort houses built 25 years ago?

A. For some retort houses, they may be, but not for those I have named.

257. Is it not true as a general proposition?

1815 A. In little country places it might be but not as a general thing.

258. Is it not true in nearly all the larger cities?

A. No, that is where it is not true.

259. Is it not true in Cleveland?

A. I could not say about Cleveland.

260. Is it not true in Cincinnati?

Ans. No sir.

261. Is it not true in Minneapolis?

A. I have never been there.

262. Is it not true in St. Paul?

A. I have never been there.

263. Is it not true in Milwaukee?

Ans. I could not say.

264. Is it not true in Kansas City?

Ans. I could not say.

265. Is it not true in Indianapolis?

A. I think the same retort house is there that was there before; they have even got a wooden floor there, by the way, in the retort house; I mention that as a novelty.

266. Name, if you can, any plants in cities of 50,000 inhabitants and upwards, where they have the same purifying boxes now they had 25 years ago.

A. I have really been out of the business, except as a consulting engineer, for the last 8 months, or something like that, and a great many may have been renewed in that time without my knowledge, but I will answer you to the best of my knowledge and belief anyhow. I believe the same boxes are in use at Norfolk, although they have made an addition to the works since; the same boxes are still at the Laclede works in St. Louis at the old station also at station "A," and I believe the same boxes are still in use in a number of other works I have seen.

267. Can you name any others in cities of 50,000 and upwards?

A. With absolute certainty, I could not. To the best of

1816 my knowledge and belief the boxes at the old Manhattan station are still there and there may be the same boxes up at the old 14th Street station.

269. Any others?

Ans. I could not say for certain.

270. Is it not true that the sulphur in the boxes and other destructive acids will destroy the covers in a very short time?

A. That depends on what you call a short time.

271. In 10 years?

A. In about 10 years, and sometimes in less time.

272. If the sides are of wrought iron, the sides will be destroyed too, will they not?

A. I have never seen a wrought iron box.

273. You know they exist, do you not?

A. Of late years. I want to qualify my answer. I have seen of late years some purifyers called the "Chollar" purifyer, they have wrought iron sides, but it is a different apparatus altogether.

274. Have not you ever seen any wrought iron square boxes?

A. No sir, I never have.

275. Do you know whether or not they exist?

Ans. I do not.

276. You spoke in your direct examination of the sale of purifying boxes for scrap iron and putting in larger ones—what was the necessity for such sale?

A. You could not dispose of the boxes; the best price you could get for them would be to sell them that way.

277. What did you want to dispose of them for?

A. They were laying in the yard and we had no use for them; we had larger boxes; the boxes had been arranged long before I came there.

278. The plant had outgrown the size of those boxes?

Ans. Yes

279. Is it not true that what you have just stated with re-
1517 gard to outgrowing the size of the purifying boxes is true of nearly every piece of apparatus in connection with a gas plant in any growing city?

A. In a certain time, the business certainly outgrows it.

280. And apparatus has to be replaced that is not worn out?

A. Probably so, yes.

281. Is it not also true that all this apparatus in actual practice is replaced long before it is worn out by reason of new inventions and improvements in one place or another connected with the manufacture of gas?

A. I don't remember any just now.

282. Have not you see- benches of 6's thrown out and replaced by benches of 9's because some one thought that was an improvement?

A. No sir, never have.

283. You have never seen a bench of 6's torn down and replaced before the bench was worn out, have you?

Ans. No, I have not.

284. Have you ever seen benches of 3's or 5's torn down and replaced by benches of 6's, 8's or 9's?

A. Yes sir, I have seen benches of 3's torn out because they were worn out and they tore them down and put larger benches in; it would pay better to put in larger benches.

285. And you think it was more economical to put in new benches

A. Yes sir, and instead of filling the arches with a few retorts, build larger arches; I have recommended it myself.

286. Do I understand you to say there has been no general improvement or progress in the gas business in the last 25 years in the way of improved apparatus, inventions, etc.?

A. I have not said that; there has been a good many improvements made.

287. You stated a few minutes ago that you could not name a single instance where apparatus was taken out to put in im-
1818 proved apparatus, will you kindly reconcile that statement with the one you have just made for my benefit?

A. I don't remember of any apparatus having been taken out and others put in place of it, but where new additions were made or new works built they frequently put in other apparatus.

288. But you know of no instance where an old works has been remodeled or rebuilt along the line of new improvements or inventions?

A. Yes sir. Take the case of a works where they have no P. & A. tar condenser; before that was invented, we just took the tar out some other way; we found it would be more efficient to put in an old works a new P. & A. tar condenser.

289. Is not that true of every piece of apparatus used in a gas works?

A. Yes sir, from time to time, when additions are made.

290. Do you know of one scrubber being substituted for another?

A. Yes sir.

291. That is frequent in the history of a gas plant, is it not?

A. It depends upon what you would call frequent.

292. Don't you know that purifyers are often changed and larger ones put in?

A. Not often; in 15 or 20 years, something like that, it might happen; I know scrubbers that were put in in 1883 and they are running today, but there is no improvement on that.

293. Do I understand you to say in your last answer that there has been no improvement in the process of scrubbing gas since 1883?

A. Some claim that there has, but I don't believe there has been any real improvement made; there has been some improvements claimed. For instance, the Chauntlet Hewlen Standard washer scrubber. A friend of mine out in St. Joe, Mr. Mitchell, the superintendent there, improved that and made it better; that is
1819 an improvement; it is the same principle; in that way improvements have been made.

294. You admit then improvements have been made, do you?

A. I do not say it was not improved; he claimed it was improved; I have had no experience with it.

295. So far as you know then there has been no improvements that are improvements?

A. Yes, there have been improvements made in the gas business; I want it distinctly understood there has been improvements made.

296. If you were building a gas works to-day would you use the same apparatus that was commonly in vogue in 1883?

A. No sir; and since you speak of it, I would not build a works

like you have done here now to-day; I would put a works there that would make more money.

297. Exactly, I don't think you would build a works like that either. In your examination in chief you testified that the Standard washer scrubber would be more economical than the Chollar scrubber—which is in the complainant's plant?

A. According to my opinion it would be, yes sir.

298. Is the initial cost of the Standard scrubber more or less than the Chollar scrubber?

Ans. Much greater.

299. The Standard washer scrubber requires mechanical power to operate it?

Ans. Yes sir;

300. Does the Choller scrubber?

Ans. No sir;

301. The Standard scrubber is subject to more depreciation than the Chollar scrubber?

Ans. Some.

302. You say you don't know what is the life of a Chollar scrubber?

Ans. Yes sir;

303. Who is this man Chollar that invented this scrubber?

A. One of my former assistants, now engineer of the Laclede gas works at St. Louis.

1820 304. He succeeded you there, did he?

A. No sir; he did not succeed me; he has the position I formerly had but he did not succeed me; there was a man between him and I.

305. What was the tenure of office of the man between you and Chollar?

Ans. Very short—about 10 months.

306. Referring to your visit to Peoria about 10 years ago, to which you have testified—you came then as a witness for the old company in a condemnation suit, did you not?

Ans. Yes sir;

307. Concerning property at the plant of the old company?

A. Yes sir; as nearly as I remember now.

308. Did you then make any examination of the soil in the city at large?

Ans. Not to any extent; I went around as I did this time.

309. You have made about the same examination this time you did at that time when here?

A. No, the last time I made a more extended examination because I was here longer; this time I have not made any examination.

310. You spoke yesterday of a trench you had inspected on S. Adams street?

Ans. Yes sir;

311. The trench was being dug to lay steam pipe?

A. So I was informed.

312. Do you know whether the soil throughout the city is the — as the soil you there inspected?

A. I don't know except from what I have heard.

313. Are you acquainted with any high-pressure systems that use cast iron mains?

Ans. No sir;

314. Do you know of any high-pressure systems of gas mains in cities of 50,000 and upwards?

Ans. No sir;

315. In May 1899, was there anywhere in the United States a high-pressure system of artificial gas for general distribution?

A. No, not that I know of.

1821 315. What did you mean in your direct examination when you stated cast iron pipe was universally used?

A. I should have said generally used, not universally. I mean gas companies everywhere, so far as I know, use cast iron mains for street work.

316. What is the effect of the high pressure system on the cost of the distribution of gas?

A. Reduces it greatly.

317. Where do they get the high pressure?

A. With the compression pumps.

318. Are those pumps necessary in an ordinary system?

A. No, not compression pumps.

319. How does it reduce the cost of distribution, then?

A. The cost for mains is very much less.

320. Do you take the cost of mains into consideration in the cost of distribution?

A. Yes, the interest charge is something.

321. Did you take that into consideration in your cost of distribution as you gave it yesterday?

Ans. No sir.

322. You are testifying for the complainant today, are you not?

A. In this hypothetical case, I assume a normal gas works, normal gas mains; I did not take high pressure mains into consideration at all but mains the same as you probably use here.

323. Would you advise a high pressure system in Peoria?

A. I do not see why you should have it; I see no use for it in Peoria; probably if you wanted to go down to Pekin, though, it would be a different thing.

324. If my recollection is correct, you mentioned a gas system of 160 miles in your direct examination that had a leakage of but 1½ per cent.—tell us about that?

1822 A. It was the main system of the Standard Gas Light Company of New York City; the works were built under the supervision of Joseph Flannery and I succeeded him—no, not him direct, but when I had charge of the works, of course, I had charge of the main system and reports were made to me.

325. Do you know what the leakage on that system is today?

A. No, I do not.

326. Do you know what it was 5 years after it was built?

A. I don't remember how long it was built before I took charge there; I could not say about that, but I know what it was the year I had charge there.

327. What is the percentage of leakage in the gas plants in Massachusetts?

A. I don't remember, although I have seen an account of it.

328. Do you know what the Massachusetts commissioners state in regard to that?

Ans. I don't remember.

329. Don't you know they say it is about 11 per cent.?

A. No, I don't remember.

330. What is the percentage of leakage on gas plants as shown by the United States Census Report of 1900?

A. I could not tell you.

331. Don't you know it is given as about 11 per cent.?

A. No, I don't know that.

332. What part does condensation play in the matter of leakage and unaccounted for gas?

A. Mostly a general part; there is very little condensation of gas that is gas; I have known gas to be in a holder for months; there is no condensation from that; what is usually called condensation is, gas being stored over water water vapor arises and naturally goes along into the mains and it is precipitated there and pumped out.

1823 333. Has that any effect on the leakage?

A. Not as vapor; you would find it difficult to condense gas to liquid under the ordinary pressure; it is not condensed gas.

334. You mean by that if it is a true fixed gas.

Ans. Yes.

335. But the feature you speak of now, as I understand you, would make no difference in the registration at the holder or at the consumers' meter?

A. No sir, because this water vapor gets into the gas after it has passed the station meter and it would not make any difference in the consumers' meter—it would not swell the bulk in it.

336. Is gas as commonly made a true, fixed gas?

A. As we gas men regard it under ordinary conditions.

337. You are speaking now from your personal experience?

A. Yes, and study of the subject.

338. Does not every water gas plant make a certain amount of vapor?

Ans. Certainly they do.

339. Is not that condensed?

A. It is generally condensed before it gets to the station meter.

340. Is it always?

A. I could not say about always, but always in my experience; it ought to be if their apparatus is properly constructed.

341. You testified yesterday there was no leakage in the plant at Texarkana at all?

A. Not at the start—none reported at any rate.

342. You mean by that the amount of gas sent out by the holder was the same as the registration of the consumers' meters?

A. For the short time I had charge of it, yes sir.

343. Was any correction made for pressure and temperature?

A. No sir, the man I had down there didn't know how.

1824 344. How about the consumers' meters, did they run slow or fast?

A. As a rule they run slow.

345. If a gas company is so unfortunate as to employ a manager who cannot correct the pressure and temperature, might not he run into a good many coincidents of that kind where the registration of the station meter was the same as the registration of the consumers' meters?

A. He might indeed, but the rule is so simple he could quickly learn it.

346. Was this man you speak of employed by you?

A. He was employed by the Texarkana Gas Company but I sent him there in the first place and you might say I employed him.

347. You spoke in your direct examination of tests for leakage before mains are covered; would any such test guard against leakage caused by electrolyis?

Ans. No sir.

348. Or from expansion and contraction if they became affected?

A. No sir.

349. Or by any disturbance from the laying of sewers or water mains?

Ans. Certainly not.

350. There are a good many causes which produce leakage that could *could* not be guarded against by the test you spoke of?

A. Yes sir.

351. Is it not true also mains are often laid under conditions not entirely within the control of the company and which determine the depth, etc., on account of other pipes being in the street and things like that?

Ans. Yes, that is true.

352. What is light?

A. Well, vibration of molecules of the atmosphere; I am not scientific and I cannot use those expressions as nice as I have read them in this testimony; the description of light there is

1825 pretty fair, though, as I believe Mr. Little gave it, and I will adopt his description of the molecules of the atmosphere producing light. In fact, I have read that is the case; I have read where men have produced a certain amount of vibration in a dark room and made it light as day; I don't believe it but it was in the Scientific American that I read it.

353. What affect has the rapidity of vibration upon that?

A. The greater the rapidity, according to the theory, the greater the light. My knowledge of that is entirely from reading.

354. Do you mean the greater the light or the whiter the light?

A. The brighter.

355. When you say brighter, do you mean whiter?

A. I should assume so—yes, whiter, brighter.

356. As I understand you, the greater the rapidity the whiter the light?

A. I think so. I think that is the way I have described it.

357. What has the color of light to do with the power of diffusion of the light?

A. I could not answer that; I don't know enough just now, I think, to speak on that subject.

358. Don't you know the whiter the light is, the less its diffusive power?

Ans. No, I don't know that.

359. As a gas engineer, you are unable to state what effect the color of light has upon its diffusive power, are you?

A. I would say I cannot answer that now.

360. What is the difference between the primary intensity of light and its diffusive power?

Ans. I could not answer as to that.

361. Does a photometer take into consideration the diffusive quality of light?

A. It is the only instrument we have with which to measure light.

1826 363. Does the photometer measure the diffusive power of light or its intensity?

A. It measures the light itself, the power of the light, the quantity of the light.

364. Are you familiar with the spectrum photometer?

A. I have seen it.

365. Does not that take account of the diffusive power of light?

Ans. I have had no experience with it.

366. Don't you know as a matter of fact that two lights, having the same candle power as measured by the ordinary photometer, might have widely different diffusive power?

A. I am not aware of that, no sir.

367. Have you never met that fact in any of your electrical experience?

Ans. I have not.

368. Do you know of any gas company in any city in the United States of 50,000 or upwards that sends out 17½ candle power water gas for illuminating purposes?

Ans. I do not.

369. If coal gas from 17 to 18 candle power is the brilliancy usually sent out, why not send out the same candle power in water gas?

A. Well, the water gas people have made the claim that they give better light, more and a brighter light than coal gas men are

able to give; that is the argument that brings a water gas company into a town.

370. Don't you know that there are a great many companies that own both kinds of apparatus?

Ans. Certainly.

371. And send out 17 to 18 candle power of coal gas and 24 candle power of water gas?

A. Not at the same time, no sir, they mix it.

371. When they change from one to the other they send out a higher power of water gas, do they not?

1827 A. State that question again.

372. When a company owning a coal gas plant changes to a water gas plant, it sends to the same consumers it formerly served a 24 candle power water gas in lieu of the 17 candle power coal gas it formerly supplied, does it not?

A. In speaking of my own experience, I have changed from water gas to coal gas and from coal gas to water gas and my aim was, and my instructions from my president was to send it out as nearly as possible of the same candle power, which I did; with water gas you can change candle power very easily; you have it at your command.

373. Is that good practice?

A. Companies don't send out either coal or water gas; they mix it where the works are large.

374. Is it common practice to send out water gas of the same candle power as coal gas?

A. I don't know of any common practice about it at all.

375. Have not you testified that you know of no city in the United States of 50,000 and upwards that sends out 17 candle power water gas?

A. I did.

376. Yet, you don't know what the common practice is?

A. It is not common practice; the common practice is to mix the two gases and send them out together.

377. Is it not the common practice when oil goes up in price to shut down the water gas and make coal gas?

A. It would be my practice.

378. Why don't they reduce the power of the water gas instead?

A. Very often they limit it by law to a certain given candle power.

1828 379. When they don't limit it by law, why don't they?

A. I don't know of any cause.

380. Don't you know that water gas of 18 candle power is not satisfactory to the customers?

A. No sir, I don't know anything of the kind; I don't see why it should not be; if coal gas of 18 candle power is satisfactory, I don't see why water gas of 18 candle power should not be.

381. If you don't know anything about the difference in the intensity of light, I don't wonder at it.

A. I think I know a great deal about it; I don't think any man in the United States can stand up and teach me my business. I have discussed it in gas associations and I know what I am talking about here; I didn't come to Peoria to learn that.

382. What gas plant in the United States now have apparatus for manufacturing ammonia sulphate?

A. I saw a very large one at Everett near Boston.

383. Is not that a by-product oven plant?

A. Yes, but they make gas for sale.

384. Have they such apparatus in any regular ordinary coal gas plant you know of?

A. I don't remember of any now, no sir; I have seen them in England but not in the United States; they have no ammonia trust in England.

385. How much greater would be the value of the residual made if sulphate was manufactured at the Peoria plant instead of condensed ammonia?

A. I could not say positively what it would be in Peoria but I think from what I know about the manufacture of sulphate it would be quite a little; I think the freight on the liquor that would be saved and the cost of concentrating the fluid would pretty near make the sulphate.

1829 386. Where is the market for ammonia today?

A. I could not tell you, but it would not be hard to find.

387. Do you know the relative price of the liquor and sulphate in the market today in quantity?

A. Sulphate ranges from $56. to $60. a pound; the liquor is as little as they can pay for it to the gas companies,—that they will accept.

388. Do you know any ammonia works today that will purchase liquor when they will not purchase sulphate?

A. Yes sir, they will purchase it and run it into the river rather than let the gas company work it up.

389. It depends on the market price of the sulphate or liquor whether you want one plant or the other, does it not?

A. If it were left to me and the works were large enough, I would make a sulphate for in my judgment you would make more money out of it; you can store the sulphate and it don't waste. If it were my works, I believe I would make a sulphate, I think it would be policy.

390. Did you ever operate a plant where they had a sulphate apparatus?

A. No sir, but I built a sulphate works and instructed the men how to operate it.

391. In your estimate of the cost of gas in the holder, as stated in your direct examination, did you take into consideration the cost of a watchman about the works?

Ans. No sir.

392. Or the cost of a blacksmith around the works?

A. No sir, not little works like that, for you don't need one; you have men on day and night; I never had any watchman on any works I had charge of.

393. If coke, breeze and screenings can be sold at a sufficiently good price, it might often be better policy to sell those
1830 and use fuel coal, might it not, in the operation of a gas plant?

A. It certainly would be.

394. Those are conditions that have to be treated as they arise?

A. Just so.

395. In case but two benches were being operated, instead of 7, would that materially reduce the labor in the boiler room and the labor to take care of the ammonia still, the labor in the condensing room, in the purifying room and in the yards?

A. It would reduce it all except in the boiler room.

396. Would it reduce them all proportionately?

A. I think so.

397. If it was necessary to have one man in the purifying room and one man in the condensing room for five benches, would that be reduced if you operated but two benches?

A. If it were necessary but it is not necessary to have men in those places; it is not common practice; that is an impossible condition; it is not good practice but if that practice was done, of course, that would make a change.

398. I think in your list of distributing expenses you provided for one foreman, did you not?

A. In the distributing department, yes sir—a man in general charge of the distributing work at a salary of a thousand dollars a year.

399. And you would expect that foreman to do what?

A. When they would be putting in service, I would expect him to go and direct the men where to go and put in the service; in the first place, he should direct the different men under him what to do in the morning, keep their time and do some little work, that is, if they were all at work at different points he might have to go and take charge of one point himself. In a plant of that size, there is hardly enough work for a man to do just to sit in
1831 the shop and direct the men. There is some work for him to do; he should help take meter statements at the end of the month with the rest of the men, in order to get them in quickly; he also might occasionally repair a meter or test a meter; he could do that without getting very tired; they might send a meter in and he could test it, it being a matter of but a few minutes, and if it must be repaired set it aside and send it away.

400. You have testified that meters ought to be tested frequently, would you expect the foreman to do that?

A. I should expect the meters to be brought in every two or three years and tested; it is not much work to do that.

401. Do you expect one foreman to take care of 2400 meters in addition to his other duties?

A. Yes sir, if they have only 2400 meters, he could do it very well, for it has been done under my experience. It depends upon what you understand the foreman ought to do.

402. That would mean the testing of 2 or 3 meters a day, and you would expect him to do that in addition to his other duties?

A. There are certain times when they would be testing meters all day long; they might test 20 meters some days and some days none at all.

403. Would you expect him to examine meters on an average of 2 or 3 a day?

A. I would expect him to do all the work in connection with his department that he could do.

404. (Int. 403 repeated to witness.)

A. Yes, if that is necessary.

405. And you would also expect him to have a general supervision over the street mains and services?

A. No, the general manager has general supervision over that.

406. With regard to whether there are leaks or things of 1832 that kind?

A. He would direct the men where to go and what to do, certainly.

407. He would have charge of the men who were to lay the services and direct them in a general way?

Ans. Yes sir.

408. And also in the manner of setting the meters?

A. Well, he would give orders from the office where the meter was to be set and send out the men to set meters at such and such places; it would be done under his direction.

409. He would also set gas stoves or attend to it?

A. He would get the order and tell the men where to put it.

410. And the same way with regard to complaints that came in?

A. Yes sir.

411. And relieving the mains and services of nap-thaline and things of that kind?

A. If there was any, yes sir—no, with reference to nap-thaline, that comes under another head, if you had nap-thaline trouble except in service, that might take a special gang of men; it would not happen often.

412. Did you take that into consideration in your estimate of the expenses?

Ans. Yes sir.

413 Where does it come in a general way?

A. I have provided in the works expenses for some men.

414. Are those the special gangs you refer to?

A. If you have any such, you might not have any in 10 years.

415. Have you made provision in your estimate for any special gangs?

Ans. No, I have not.

416. You have provided in your distribution expenses for three assistants under the foreman whom you say should be gas fitters at $2.00 per day—can you get three skilled mechanics supposed to be gas fitters at $60. per month when common laborers are get-
1833 ting $1.75 per day?

A. I don't know what you would do about that.

Mr. TICHENOR: I object to the question; the record shows that common labor costs $1.50 per day.

The MASTER: I think that is true.

Mr. RITCHER: That is what common labor costs when this plant was built but the witness is talking about operating a gas works to-day and counsel on the other side has taken us right up to today against our protest, and I now ask the witness the question whether when common laborers are getting $1.75 per day he can get skilled mechanics and gas fitters at $2.00 per day or something less than $60. a month.

The WITNESS: You can very often do that; I have gotten men on the plea of giving them steady work who were good mechanics commanding $3.00 per day, who were anxious to get work the year round for $60. per month.

417. That was during panic times, I suppose?

A. No, in ordinary fairly good times and good men, too.

418. How many miles of main do you calculate one horse and wagon will take care of?

Ans. I have not calculated on that at all.

419. On what theory, then, do you allow a horse and wagon in the distribution expenses?

A. The mileage given was 26½ miles; I have compared it with works under my observation where we got along without any horse at all, but I think it would be a good thing to have a horse and wagon, as it would save labor.

420. What was that boy to do you have put in at $270. a year?

A. I put him in to run errands or anything like that.

421. When you were running a gas works without a horse and wagon, how did you get your pipe around, your gas stoves, etc.?

A. The men had to push it around and I don't approve of that.

1834 422. You had to pay for that?

A. Yes, a horse and wagon would be much cheaper.

423. How do you take care of night complaints with two telephones?

A. I don't know what your practice may be here about that, but after a certain hour at night I should not take any complaints.

424. Do you think that good practice?

A. I think it good practice to get people to understand it is dangerous to fool about gas at night; you should not go near it with

a light; a half hour after lighting up time I think I should shut up shop.

425. If a leak springs in the night, you would leave it until morning, would you?

A. I don't see any reason why a leak should happen except in broken main or something like that.

426. Don't leaks ever happen at night?

A. I don't remember of any at night time.

427. Are not there broken fittings in houses?

A. People usually know about that during the day and have them fixed before night comes.

428. In your judgment no leak should be stopped at night, then?

A. Yes, if they occur, certainly, but even in large works and small works, I have been connected with both, and they have no man at night to attend to complaints except a short time after the lighting up hour; if anybody else does it, they can do it, but it has never been done in the places I know of.

429. There might be an earthquake and knock down this court house?

Ans. That might happen, of course.

430. You have heard of serious explosions taking place in the evening owing to leaking of gas, have you not?

A. I don't remember of any just now.

1835 431. You don't remember of 10 people being killed in Chicago in an explosion within the last 6 months, do you?

A. I believe I read about it.

432. You would leave such a leak as that until morning if it happened after night, would you?

A. No, but I would not go near it with a light.

433. In your cost for distribution, where have you made any allowance for legal expenses of the company operating the gas plant?

A. I have not made any.

434. How about repairs, supplies for your distribution department?

A. In this case, I assumed the works to be new and in order, not requiring any.

435. Your theory is that new works never require any repairs?

A. Not immediately, they should not; still, if you do allow it, it would not amount to much, it would not affect the result one-half of one per cent.

436. These figures you have made in regard to the cost of gas in the holder and cost of distribution, you made with considerable care, did you?

Ans. I think I did.

437. Do you think there are any errors in them?

A. There might be; I am not infallible.

438. If there are any serious errors, would it shake your confidence in the rest of your figures?

A. If there are serious errors, but I will not believe there are any until I see them.

439. You testified, I believe, that the cost of gas in the holder here was 12.23 cents per thousand without adding two or three fractions, which I will give you in a moment. You then added ½ cent for purification, 1.14 cents for repairs and 1.02 cents to make 15 cents—am I right?

Ans. Yes sir.

1836 440. How much would you have to have added to make it 20 cents?

A. 5 cents more.

441. In regard to the distribution, you made the total cost 14.93 cents without the service?

A. That is what I made and I found a mistake and added it all together stable expenses and all and corrected it this morning, and made it 16.44; I found I had made a mistake in the addition.

442. When did you make that correction?

A. This morning before I came here.

443. After you had been on the stand today?

A. No, before I came on the stand.

444. Then your testimony on direct examination is one cent out of the way?

A. My figures are right but my addition was not right, I said 14.93 and it figures out 16.44.

445. Then when you stated the cost of distribution was 15.43, if you had been correct in your figures, it would have been 16.43?

A. Yes, the same figures are here yet, I have not rubbed them out or changed them.

446. That brings the total cost 1 cent more?

Ans. Yes, 16.44.

447. If still other errors are discovered in your figures yesterday, you would begin to doubt the accuracy of the result, would you not?

Ans. I don't believe I made any other mistakes; I might have put things in that I knew nothing about, of course, but I don't think I made a mistake in figures.

448. I think you testified it would cost about $5,000. to rebuild 7 benches of 9's?

Ans. I did not testify to that.

449. What is the fact about it, if you did not?

A. Different men might charge different figures.

450. What would be the range, would it not be somewhere between $5,000. and $7,000.—about $750. a bench?

1837 A. What would you put in?

451. New retorts?

A. You would leave the regenerative furnaces there and just put in new retorts?

452. Yes, and settings, of course.

A. Just above the fire floor?

453. From the furnace up?

A. I should say for a bench of 9's, it would be about $500. or $600. a bench; it might be more or less.

454. What is your judgment as a gas engineer about that?

A. I could not have any judgment on that at all; we have to ask the builders what they charge and we ask different builders and usually accept the lowest bid.

455. Didn't you sell retort material for two years?

A. I solicited material but never made any price on it, I simply reported that certain people wanted retorts to the office.

456. Then you are not familiar with the prices?

A. Except from my own experience, I have had benches built and know what they cost.

457. You have testified that retorts must be renewed on the average once in two years, taking your figures of $600. for 7 benches, would require $4200. to renew the 7 benches, that would be $2100. a year, would it not for renewing retorts?

A. Do you want me to make the calculation now; if you do and will give me some paper, I will do so; I cannot guess at these things and I don't know that it will be $600. either.

458. Don't you know the standard price today everywhere is $750.?

Ans. No sir, I do not, there is no standard price, I absolutely know that.

459. What would it cost to renew 7 benches at $600.?

A. It would be $5400.

1838 460. If they cost $750., how much would it be?

A. $6750.

461. Calling your attention to the cost of gas in the holder, I note you allow 1.25 cents for repairs—how much would that amount to per annum for repairs on the output you figured on?

A. From figures I made here, it would be $2,059.70. I want to say right here that in these figures—Interrupted.

462. If you will just answer my questions, Mr. Tichenor will give you a chance to explain on re-examination.

A. Perhaps so.

463. I don't want any speech in my cross examination.

A. You make me say things, perhaps, that are not so; the questions are certainly misleading to me.

464. I want you to tell the truth for us.

A. That is what I am doing.

465. Can a new plant run 6 years without repairs and maintain its efficiency?

A. That depends, it may do so very easily.

466. You stated yesterday there ought to be a fund laid up even then?

A. Yes sir, I should allow a certain amount for repairs right along.

467. What are the conditions under which gas is sold at 75 cents at Cleveland, Ohio, as compared with the conditions in Peoria?

A. I am not very well acquainted with the conditions at Cleveland but I know they get their coal for very much less than they get it here.

468. Don't you know they supply gas in large quantities to the surrounding factories manufacturing edged tools?

A. No, I don't know that, but of course they sell a great deal more gas than they do in Peoria, which helps to cheapen it some, too.

1839

469. Is the same true of Cincinnati, Ohio?

A. Yes, more so than at Cleveland, I think.

470. You spoke of a gas plant in Danville, Va., that plant is owned by the city, is it not?

Ans. Yes sir.

471. Do you know what the method of accounting there is?

A. I do not.

472. Do you know whether under their system of accounts the gas is properly shown in their municipal retort, or the cost of gas?

A. I only believe it to be so, I don't know it.

473. Do you know whether the undertaking is profitable?

A. The superintendent told me they did not run it for profit but just to maintain itself.

474. Do you know whether it maintains itself or not?

A. The superintendent said it did, that is all I know about it.

475. He was an employé?

Ans. Yes, a city officer.

476. What has been the history of the gas business with reference to the cost of distribution. In other words, has the cost of distributing artificial coal gas been increasing or diminishing?

A. The cost of distribution has been increasing.

477. That is peculiarly true of the past 10 years?

Ans. Yes.

478. Do you know what proportion of capital is now invested in the gas business as compared with ten years ago per thousand feet of gas made?—whether it is greater or less than it was?

A. I don't know enough about it, and I would rather you would not ask me; it is getting on very dangerous ground, I would rather have nothing to say about that.

479. Do you know what price per hour it paid in England and on the continent for retort house men?

A. No sir.

1840

480. Do you know what price is paid for engineers in England or on the continent?

A. I don't know what is paid per hour for any class of labor in Europe.

481. Including common laborers, foreman, superintendent, coal passers and every other kind of labor?

A. I know what salary some superintendents and engineers get—a few.

482. You are not acquainted with what laborers get per hour there?

A. I have investigated that and have figures but I don't remember.

483. Do you know what the sales per mile of main are in England?

A. No sir, it is different in different places, like it is here.

484. What is the range per mile of main of sales in England?

A. I do not know, it differs but as a rule I believe it is considerably greater than here.

485. Do you know whether or not they furnish services free of charge in England?

A. In some cities where I was recently they make it a point to furnish services free of charge, so the general manager told me.

486. I think you said this morning that the candle power in England was from 14 to 16 candle?

A. It is nearer that than anything else except in Scotland it is much higher than that.

487. Were you acquainted with Harvey W. Brown of Minneapolis, a gas man, in his lifetime?

A. I was not much acquainted with him but I knew him.

488. Was he in his life time considered a high authority on gas matters?

Ans. I don't remember, I have met him but I don't know
1841 much about him.

489. You don't remember his general reputation in the gas world?

Ans. No sir, I don't remember it now.

490. In general in the United States, in cities of the size of Peoria, what is the average amount of gas sold per annum per mile of main?

Ans. I don't know.

491. Do you know in a general way, can you state within limits what amount would be sold per annum per mile of main in a gas main system in cities of 50,000 inhabitants and upwards?

Ans. No sir.

491. As a gas engineer, have you never had to consider that in connection with the output of a plant?

Ans. No sir.

492. What is the general average consumption per meter per annum in cities the size of Peoria and larger cities?

A. That differs greatly.

493. What average would you give?

A. I should say from 22,000 up to say 30,000 per meter per annum.

494. As a general proposition, would you consider that gas much in excess of 30,000 per annum would be sent out in a city of the size of Peoria or larger per meter?

A. That would depend on circumstances. Cities like Cleveland,

which, of course, is larger and other places might have abnormal consumers who might use a great deal, like Bridgeport, Conn., for instance.

495. You refer to manufacturers who use it as a fuel?

A. Yes, something like that, where people use a great deal of it.

496. Otherwise, it would fall below 30,000 on the average, would it not?

A. On the average, it would run in certain cities I have known, some only 22,000, others 30,000, some 25,000 and some 26,000. I think 27,000 or 28,000 would be a very good average unless
1842 there was some extraordinary taker of gas; if there were then it might range above that.

497. In arriving at the expense of distribution, you figured on that basis substantially, I presume?

A. No, I don't know that I did; yes, I did partly do that.

498. Can you give an estimate upon further consideration of about the output per mile of mains under the same general conditions?

Ans. I don't quite understand.

499. For instance, a city has ten miles of mains, another 100 miles of mains, another 160 miles, in cities of 50,000 and upwards what does general experience tell you as a gas expert as to how many feet of gas are consumed per mile of main laid. In other words, if you were going to develope a territory and put down a mile of mains, how much would there be consumed there?

A. I have put down a mile of main in considering leakage, but never in that way and I have forgotten the figures.

500. How many meters would you expect to have as a general proposition in a city located as Peoria is, with its general surroundings, to have an output of 164,756,000 cubic feet of gas per annum?

A. I made some figures on that because I have seen the number of meters that were reported and it did not seem possible they could send that amount of gas through those meters, about 7,000 and some odd, if I remember right; that would call for more capital than you call for; I don't know whether you admit that or not; if you have more meters you have to have more capital.

501. You would expect to place those meters on a 26 mile main system, would you?

A. You could have them on a 26 mile main system if closely enough set.

1843 502. Would you expect it in Peoria?

A. It could be certainly if you would have most of the people to take gas.

503. Would you expect it under conditions such as exist and such as you testified to on direct examination?

A. I could not speak about the miles of mains, I would not like to say anything about that, but the meters I assume could be

placed in Peoria on that mileage provided most of the people took gas.

504. If, as a matter of fact, it required about 70 miles of mains instead of 26 to distribute 164,776,000 cubic feet of gas per annum in Peoria, that would increase the cost of the distribution of gas, would it not?

Objected to as immaterial, not based upon any showing presented by the record but directly against the showing they themselves have made.

The MASTER: I think it admissible because of the contract marked "Exhibit 32" being in evidence.

A. Certainly that would increase the cost of distribution.

505. And that would require more men to take charge of those mains, would it not?

A. It would hardly require more men but the cost would be increased largely for meters.

506. How much additional expense would there be in main?

A. A good deal more, I think.

507. Say 16 inch to 4 inch main?

A. I could not tell you that.

508. Suppose the present system of 26 miles was extended proportionately to 70 miles, making 44 more miles, what approximately would be the increased cost?

Ans. Quite a little additional expense.

1844 509. Can you guess at it within 10,000 or 20,000 dollars.

A. I would not like to guess at it but that in proportion, yes sir; if you would increase the mileage about three times, I would simply take my cost for mains and multiply it by three in that proportion.

510. What would that be?

Objected to as immaterial and irrelevant.

The MASTER: After reading this contract, "Exhibit 32," I do not think that question is admissible, except so far as it increases the cost of distribution of gas as ascertained at the station meter. I don't think the question of the cost of distribution through the mains—Interrupted.

Mr. RITCHER: This witness don't know anything about that contract but he has been testifying on an out put of 164,000,000, the same as though it was distributed through our system, and I have a right to show what the facts would be if but one third of it was distributed through our system.

The MASTER: I think you have a right to show whether or not he took into consideration whether it was being distributed through that system.

511. In your figures in regard to distribution, do you assume the 164,000,000 feet of gas was distributed through the 26 miles of mains of the complainant company?

Ans. Yes sir.

512. And also through the meters of complainant company?

A. Yes sir, I include the station meter in that.

513. In the event that a company situated in a city under like conditions as Peoria distributes the same amount of gas per annum through a system of 70 miles of mains, would the cost of distribution be greater or less?

Objected to as incompetent, improper and immaterial.

The MASTER: As the question is a general one, I do not
1845 think it objectionable.

A. Of course, it would increase it.

514. In a city situated in general as Peoria is, what would be the additional cost for the main system?

Objected to same grounds as before.

The MASTER: The witness may answer subject to the objection, although my present impression is it is incompetent.

A. Well, you said for me to guess at it, but I did not guess at it, I multiplied it; it is three times as much as I have from these exhibits.

516. What would those figures be?

A. The original figures were for 26½ miles; now, three times as much is 79½ miles, and the cost say it is of 16 inch, 12 inch, etc., if it is all in proportion like that, there would be an additional cost for mains of $291,590.40. That is assuming the highest figure with the mains all under pavement, the cost would probably be a little less; for services and meters it would be $156,901.50, that covers the meters and connections and service pipes; the two added together make a total of $448,491.90. Now, the depreciation on that would be $17,939.67 at 4 per cent.; that would be the additional sum that would have to be provided for. In fact, it would be more than that; I will correct that for mains; I did not take 4 per cent. for mains and services, I took 5 per cent. for depreciation. The average for the whole thing is 4 per cent. all together but for mains and services alone I assume 5 per cent. and the aditional sum that should be allowed for depreciation of mains and services and meters would be $22,424.59 at 5 per cent.

517. Such an additional investment would require additional taxes, would it not?

Ans. I suppose it would.

518. And additional labor in attending to the same?

Ans. Yes.

1846 519. If as a matter of fact in the case of the complainant company but 55 million feet of gas were manufactured per annum and 50,000,000 of that 55,000,000 was actually sold through the system, would that increase or decrease the cost of distribution per 1000 cubic feet?

Objected to as incompetent and immaterial.

A. If 55,000,000 were manufactured and 50,000,000 sold through the system, that would leave only 5,000,000 to be sold otherwise, is that right?

520. No, I mean the 5,000,000 would be leakage?

A. The cost would be higher per 1000 according to my figures, of coyrse, because you assume 10 per cent. leakage there.

521. Assuming the leakage the same as your figures, 5 per cent., would it be lower or higher?

A. It would be slightly higher.

522. Would the same be true of the cost of manufacture, cost in the holder?

Objected to same grounds.

A. Yes sir, some little.

523. Everywhere the cost would be increased?

A. If you make only 55,000,000 instead of 164,000,000 feet it would cost you somewhat more; it would cost you no more for retort house labor in proportion but in other respects it would a little more, a small amount.

524. About how much more per thousand cubic feet?

A. I would not like to say that; it would not amount to a great deal, but I do not want to guess at it, and I could not figure it here now, for I would have to take a great many things into consideration.

Redirect interrogatories by Mr. TICHENOR:

1. I will ask you to state if it is not true that the testimony
1847 you have given has been based upon your own practical experience also upon your knowledge from study, investigation and otherwise as a gas engineer?

Objected to as not proper re-direct and having been fully covered on direct examination.

The MASTER: I think that question has been answered by this witness at least 20 times.

Mr. TICHENOR: If that is so, I do not care to have it answered again.

The MASTER: I recall the fact that he has stated quite a number of times he was testifying not only from his personal experience but from his knowledge, study and experience as a gas engineer.

2. State whether or not these inclined retorts put in at St. Louis some years ago, concerning which you have testified, were successful or unsuccessful?

Objected to as not proper re-direct.

A. They were failures.

3. Why?

Objected to as immaterial, incompetent, irrelevant and not proper re-direct.

A. The benches were built with certain weak spots which I pointed out before we built them to the president of the company and the agent of the manufacturing company that put them in, but my advice was not taken; I was overruled and we built them as the design was sent us, showing how they should be built, and they were failures, and that failure kept many men from building inclined retorts in this country; in the old country they had the same experience, the most notable failure was in London, the chief engineer of that company told me himself they had failed.

Mr. RITCHER: I object to that as hearsay.

1848 The MASTER: Yes, that is incompetent.

4. What was the special feature of the construction through which the retorts failed, if you know?

Objected to as not proper re-direct.

A. The retorts were not supported in front to keep them from sliding out, they were built at an angle of about 32 degrees and they should have had bracing in front of them which I wanted done but I was overruled and it was not put in, and the retorts slid into the fire room from 2 to 4 inches, which of course cracked and destroyed the recuperative tubes of the furnace and in that way became failures. Another reason was we had labor troubles, the men thought the new retorts would put a great many men out of work and we had a good many strikes on the part of Knights of Labor in St. Louis. In fact, I had one on my hands shortly afterwards and some one exploded an exhauster one night by putting a cartridge or something under it, and then we had to stop going further with it; then shortly after that I received an appointment in New York as chief engineer of the Standard Gas Company, and left there, and there was nothing further done with it.

5. What is the effect of gas, after passing the purifyers and as it goes into the holder, upon the metal of which the holder is composed?

Ans. Preservative.

6. How, if at all, is the outside of the holder in good practice protected?

Objected to as not proper re-direct.

The MASTER: Do you claim that is re-direct, Mr. Tichenor?

Mr. TICHENOR: Possibly not, but I have a right to ask any questions that I omitted on direct examination, and I do not care whether it is considered as re-direct or original examination.

The MASTER: The witness may answer subject to the objection.

A. Paint.

1849 7. What effect has the atmosphere as it exists in the vicinity of gas works upon a gas holder which is properly protected by paint?

Objected to as not proper re-direct.

The MASTER: I understand Mr. Tichenor to say that these questions were omitted in direct examination and I am permitting the witness to answer for that reason.

A. It has no affect if properly protected; I have never seen any affect.

8. What kind of soil is most favorable for long life in pipe if there is any difference in that respect?

Objected to as not proper re-direct.

The MASTER: Yes, it is very clear in my mind that that has been gone over.

Mr. TICHENOR: I don't remember of his distinguishing between different kinds of soil; he said that certain refuse had a tendency to depreciate the pipes.

The MASTER: The witness may answer if there is any doubt about it.

A. Sandy loam soil.

9. State whether or not in making up your figures, concerning which you testified yesterday in chief and today on cross examination you allowed the entire aggregate for stable and office expenses shown by the record made by complainant company for the year ending September 1, 1901, in addition to the $20. per month?

A. Yes sir, that was in addition to the $20. per month.

10. State whether or not at the time you made up your figures and allowed $930. insurance you knew the record showed in Mr. Little's testimony that the insurance actually paid by complainant company was $300. per annum?

1850 Objected to as immaterial.

The MASTER: State what you took into consideration.

A. No sir, I didn't know anything about the insurance at all; I just assumed the insurance to be $930.

11. Look at the paper now shown you marked "Copy of Exhibit 20", October 1901," on the first sheet, the same consisting of 10 pages, and state whether or not that is one of the documents from which your figures were taken concerning which you testified yesterday and today also?

Ans. Yes sir.

12. That has the figures "1" at the top of the page also has it?

Ans. Yes sir.

13. Look at the paper now shown you, bearing the figure "2" at the tope of the first page, also marked "Copy of Exhibit 20", October" on the first page, and cocsisting of 10 sheets, and state whether or not that is the other one from which your figures were taken?

Ans. Yes sir, that is the other one.

14. State whether or not those two documents contain all the figures which you have used regarding the manufacture of gas about which you have testified?

A. Yes sir, all with reference to the manufacture of gas; those are the documents from which I got the 12 cents and the fraction of gas made in the holder—from those two documents.

Defendant's counsel offers in evidence the two exhibits identified by the witness, the first being marked at the top of the page, "Figure 1, Egner," and the second one marked "Figure 2, Egner" being copies of "Exhibit 20" and ask- that they be incorporated in the record.

The MASTER: Are not they or the original of them already in evidence?

Mr. TICHENOR: Yes sir.

1851 The MASTER: Why do you reoffer them?

Mr. TICHENOR: Because their correctness has been questioned.

The MASTER: I will not permit them to be again copied into the record unless it is pointed out wherein they are incorrect.

Mr. RITCHER: All I want is some testimony that they are correct copies.

The MASTER: The master will assume they are correct copies unless there is some inaccuracy pointed out.

Defendant's counsel offers in evidence the following documents:

1. A certified copy of a portion of the proceedings of the city council of Peoria, Ill., dated March 21, 1899, the same being marked "Exhibit 34."

2. A certified copy of a communication or petition from complainant company to the mayor and city council of the city of Peoria, dated March 21, 1899, the same being marked "Exhibit 35."

3. A certified copy of the record of a portion of the proceedings before the city council of the city of Peoria, Ill., under date April 18, 1899, the same being marked "Exhibit 36."

4. A certified copy from the records in the recorder's office of Peoria county, Illinois, of a certificate of the complainant company of an increase of stock to $2,000,000., the same bearing date January 29, 1901, and being marked "Exhibit 22."

The foregoing four documents when offered were objected to by complainant as incompetent and immaterial.

Said documents are hereto attached marked "Exhibits 34," "35," "36" and "22."

Adjourned subject to the call of the special commissioner.

1851*a* *Official Proceedings.*

Council chamber.

PEORIA, ILL., *April* 18, 1899.

A regular meeting of the city council was held this evening, all the members being present except Aldermen Bryan and Lynch.

Franchises Granted.

Both of the ordinances granting franchises to the People's Gas and Electric Company were read by the clerk.

The first one read related to the laying of gas pipes and the furnishing of gas.

Alderman Oden offered a substitute to article 3, which was adopted, naming streets more numerous than in the ordinance, in which pipes are to be laid.

Alderman Gorman offered an amendment, in which it was provided among other things, that pipes, mains and service pipes shall be laid as not to interfere with or injure the pipes or mains owned by the city of Peoria or by any other persons or corporations.

On motion of Alderman Carroll, the amendment was laid on the table by 8 ayes to 4 noes.

Ayes.—Aldermen Carroll, Dechman, Kellerstrass, Hecht, Louis, Oden, Peck, Thode, Wolschlag.

Noes.—Aldermen Gorman, McFadden, Powell, Thode.

Alderman Thode offered an amendment, which was lost, providing for a deposit with the comptroller of $10,000 as a guarantee of the faithful performance of the provisions of the ordinance.

Alderman Oden offered a substitute for Alderman Thode's amendment, which was adopted as an amendment to article 4, providing for the deposit of $5000 to be returned when $50,000 shall have been expended, and to be forfeited if the company does not begin work or supply gas in the time specified.

Alderman Gorman made a motion, which was not seconded, providing that the company be compelled to parallel the former gas company.

Alderman Oden offered an amendment to article 6, which was adopted, providing that whenever any street is about to be permanently improved by paving or macadamizing, the commissioner of public works shall notify said company of such proposed improvement, and within sixty days after such notification the company shall lay its mains including all service pipes and connections to the curb line at its own cost and expense.

Exhibit 36. I. C. Pinkney, special master.

1851*b*

By unanimous vote of 12 ayes, the ordinances as amended were adopted.

Alderman Carroll then moved a reconsideration of the motion adopting the ordinance, and on motion of Alderman Oden the motion to reconsider was laid on the table.

STATE OF ILLINOIS, } ss:
County of Peoria, }

I, Robert M. Orr, city clerk of the city of Peoria, do hereby certify that I am city clerk of the said city of Peoria, and the keeper of the records of said city, and that the annexed and foregoing is a true copy of a part of the official proceedings of the city council held on the 18th day of April, 1899, of which it purports to be a copy, as the same appears among the records of my office.

Witness my hand and the official seal of said city this 12th day of March, A. D. 1902.

[Seal City of Peoria, Illinois. Chartered A. D. 1845.]

ROB'T M. ORR, *City Clerk.*

1852 United States circuit court room, Government building.

PEORIA, ILLINOIS, MONDAY, *August* 18, 1902—10 a. m.

Parties met pursuant to the call of the special master.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. R. C. Ritcher, appearing for complainant. Mr. Henry Mansfield, appearing for defendant.

BARTHOLOMEW M. LAWLER, called on behalf of the defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. State your name, residence and business?

A. Bartholomew M. Lawler; #1027 S. Washington St., Peoria, Ill.; am a saloon keeper.

2. How far is your place of business from the plant of the Peoria Gas & Electric Company?

Ans. I should judge about two blocks.

3. State whether or not you are a consumer of gas?

Ans. I am.

4. From what company do you get your gas?

A. The old gas company my bills come from—the Peoria Gaslight & Coke Company, I think; I am not certain as to the name but I know it comes from the old gas company.

5. Do you know how much you pay for the gas consumed by you in your place of business?

Ans. One dollar a thousand.
6. How long have you paid that rate?
A. I should judge about a year; I am not certain though.
7. Is that for all kinds of gas that is furnished or used by you whether for illuminating or fuel purposes?
Ans. Yes, sir.
8. Have you at any time since November 1900, paid any other or different price for any kind of gas furnished to you?
A. Yes sir; I have paid 75c. per thousand for fuel gas.
9. Do you remember when that was?
A. It was after August 1900; I started in there in August
1853 1900 but I didn't pay no attention to it.

Cross-interrogatories by Mr. IRWIN:

1. Do I understand you to say you have purchased fuel gas after November 1, 1901?
Ans. After August 1900.
2. How long did that continue?
A. We just used it in the fall of 1900.
3. You have not purchased any since about November 1, 1901, for 75c. per thousand?
Ans. I have not used it since then.

ANDREW PALMER, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name, residence and business?
A. Andrew Palmer; #923 S. Washington St., am in the saloon business at the same number.
2. Are you a consumer of gas?
Ans. Yes sir;
3. Do you know from what company you obtain the gas consumed by you?
Ans. It is the Peoria Gas-light & Coke Company.
4. How far is your place of business from the plant of the old company?
Ans. 2½ blo-ks, probably 3—something like that.
5. What price do you pay for the gas so furnished to you by the Peoria, Gas-light & Coke Co.?
A. Why, I don't know; I never figured it by the thousand, but I know what I pay. (Witness referring to gas bill) The last bill I paid was 60c. for one month.
6. How much gas was furnished according to that bill?

Objected to as immaterial, the old company not being a party to this suit, and also as not the best evidence.

The MASTER: I think the objection that it is not the best evidence is a good objection and the last answer of the witness shows it is evidenced by a written instrument.

1854 7. Will you let me see the gas bill to which you have just referred?

Ans. Yes sir; (Witness hands bill to counsel) It is the last bill I have paid.

Defendant's counsel offers in evidence the gas bill produced by the witness.

Objected to as incompetent and immaterial.

Said gas bill was read to the master in the words and figures following, to-wit:—

"PEORIA, ILLINOIS, *July* 31*st*, 1902.

H. Palmer, 171 Tobias Sommer, 923 S. Washington street, to Peoria Gas-light & Coke Co., Dr.

For illuminating gas:

	1st meter.	2nd meter.
Present reading	00	8800
Last reading	00	8200
	00	600

Total..... 00 cubic feet at $1 per M.....60.

(Stamp)
Paid.
Peoria Gas-light & Coke Co.,
August 11, 1902.
George Alps.

8. How long have you paid for gas at the rate shown by the bill just read in evidence?

A. I don't know that; I never paid any attention to what I paid by the thousand; I have paid for gas since the 1st, of October 1901, but I don't know what rate I have paid; I never took notice of that; I know I have *cheap enough gas.*

ADAM KOHL, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct examination by Mr. MANSFIELD:

1. State your name, occupation and place of business?

A. Adam Kohl; am manager of the Anhueser-Busch Brewing Association, Peoria branch, at # 1223 S. Washington street, Peoria, Ill.

1855 2. How far is that from the plant of the Peoria Gas-light & Co-Co.?

(Objected to as immaterial.)

A. About 3 or 4 blocks.

3. Is the Anheuser-Busch Brewing Association a consumer of gas in the city of Peoria?

Ans. Yes sir;

4. From what company, if you know, is the gas taken by the Anheuser-Busch Brewing Association?

A. So far as I know it is from the old gas company.

5. What price do you pay for the gas per thousand cubic feet so consumer by the Anheuser-Busch Brewing Association?

Objected to as immaterial, the old company not being a party to this suit.

A. The last bill, I believe, was $1.40 for 1400 cubic feet.

6. How long have you paid that price?

Objected to as immaterial.

A. I don't know exactly; a year about or a little longer.

THOMAS N. GORMAN, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. You are the same Thos. N. Gorman who has previously testified in this case, are you not?

Ans. Yes sir;

2. In your former testimony you were asked with regard to the prices charged by the Peoria Gas-light & Coke Co., during the time you have been connected with the company, and at what time, if any, the changes were made in the price of the gas sold by that company?

A. I ought to have come prepared for that question; I have that information down in the office and I will go and get it.

3. Has the Peoria Gas-light & Coke Co., any contracts, or did it have, for furnishing gas to any consumer in the city of Peoria at any price other than the current price that is now, or was in

1856 existence since September 1, 1900?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I do not see the materiality of that.

Mr. MANSFIELD: I would like to have it answered.

The MASTER: The witness may answer subject to the objection.

A. Yes sir;

4. With whom were those contracts made, if you know?

Mr. IRWIN: We object to the question as incompetent, immaterial and irrelevant to the issues in this case. The mere fact that the old

Peoria Gas-light & Coke Co., may have different contracts with all its customers could not effect the issues in this case, that company not being a party to this case and it not being an issue in this case as to what price they can or might furnish gas.

The MASTER: I have already indicated my view as to the materiality of the testimony; the witness may answer subject to the objection.

A. There are two or three contracts in existence between the old gas company and its customers.

5. Do you know where those contracts are at the present time?

A. No, I do not.

6. Have you got those contracts in your office?

Ans. No sir;

7. Would they be in the possession of the parties to whom the gas was furnished?

(Objected to same grounds as before.)

A. Well, there would be a dupiicate copy of the contract; there are two copies made out, one retained by the company and one by the consumer.

8. Where are those contracts, if you know, that were retained by the company?

Objected to as incompetent, immaterial & irrelevant.

A. I don't know.

9. Are they in the office of the Peoria Gas-light & Coke Co.?

Objected to same grounds as before.

A. I don't know; I don't know there whereabouts.

1857 10. Will you examine the files in the office of your company and find out whether or not those contracts are in the files?

Objected to same grounds.

A. Yes sir;

11. And if they are there will you produce them in court this afternoon when you testify as to the other matters asked you?

Objected to same grounds.

A. Yes sir.

12. Do you know with whom those contracts were made?

Objected to same grounds.

The MASTER: He may answer if he knows without attempting to give the contents of the contracts.

A. I think there is a contract of that kind in existence between the company and the Hotel Grant; I don't recall now any of the others.

(Witness excused for the present.)

JOHN N. WALL, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?
A. John N. Wall, agent for the Chicago Brewing Company.
2. Where about in Peoria is the place of business of that company?
Ans. #1212 S. Washington street.
3. How far is that from the plant of the Peoria Gas-light & Coke Co.?

(Objected to as immaterial.)

A. I would consider it about 2½ blocks.
4. Is the Chicago Brewing Co., a consumer of illuminating gas?
A. Yes sir;
5. From what gas company does it obtain that gas, if you know?
A. The only way I can tell is by looking at the receipt I
1858 have just paid one (Witness referring to paper) The Peoria Gas-light & Coke Co.
6. How long have you been taking gas from that company?

Objected to as incompetent, immaterial and irrelevant.

A. Since 1894.
7. Did you during that period burn any gas furnished by the Peoria Gas-light & Coke Co., for any other purpose than illuminating purposes?

(Objected to same grounds.)
The MASTER: I do not think I will allow you to go back quite that far Mr. Mansfield; I think you ought to confine it to a period of not more than 5 years at least.

8. Have you at any time since 1897, used any gas for any purpose other than for illuminating purposes?

Objected to same grounds.

A. I have. I use it to keep the temperature in the cooling room right in the winter time burning it in what is commonly called a gas stove; we burn gas at night in a little stove to keep the temperature as it ought to be.
9. What price did you pay in 1897, for the gas so furnished you for heating purposes?

(Objected to same grounds.)

A. I could not tell that.
10. Have you any bill or receipt in your possession from which you could acquire that knowledge?
A. I have not in my possession at the present time; we send all our bills and receipts to headquarters every month.

11. Would the books of your company show what price had been paid for gas so used since that time?

(Objected to same grounds.)

A. The books would show the amounts but they would not show how many cubic feet of gas we used; the only way I could show that would be to send to headquarters and get the receipts.

12. How much has your company paid for gas per thousand cubic feet during the last 18 months, if you know?

1859 Objected to same grounds.

A. One dollar per thousand cubic feet.

HENRY W. BICKNELL, re-called on behalf of the defendant, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. You are the same Henry W. Bicknell who has testified in this case before, are you not?

Ans. Yes sir;

2. How long have you been connected with the Peoria Gas-light & Coke Co?

A. A Little over two years; I came here in May 1900.

3. Are you acquainted with the price the Peoria Gas-light & Coke Co., has charged during the period in the city of Peoria for gas furnished for illuminating and heating purposes or fuel purposes?

Objected to as immaterial, incompetent and irrelevant.

A. No, from memory I could not give it; I could only give it from the records.

4. Would the records of your company disclose what prices have been charged for illuminating and fuel purposes and the times, if any, when a change was made in the prices?

Objected to same grounds.

A. Yes sir;

5. Will you examine those records and prepare yourself to testify with regard thereto this afternoon at 2 o'clock?

Objected to same grounds and also because the testimony would not be competent even if he did prepare himself in that way.

The MASTER: I don't know about your calling this witness again Mr. Mansfield, on the part of the defence; this has been the third time he has been on the stand to my recollection.

Mr. MANSFIELD: I guess that is right.

The MASTER: If you want him to go down to the office and get that information you can send him now and we will wait a few minutes.

1860 The WITNESS: Mr. Gorman has prepared the same thing, Mr. Mansfield; he has made up the schedule you requested made and what he will bring you will be the same thing.

6. Do you know of any special contracts in existence between the Peoria Gas-light & Coke Co., and the consumers of gas furnished by that company whereby it contracts to furnish gas at a different price than the current price now charged, or heretofore charged by the company?

Objected to as incompetent, immaterial, irrelevant, and a matter that could only be shown by the records in a competent way; the court has also decided the defendant has no right to these records and they cannot get indirectly what they cannot get directly.

The MASTER: I have already ruled on that this morning; I do not see the materiality of it; you will have to go further than this record has gone *fo* far, Mr. Mansfield, to make that inquiry competent.

Mr. MANSFIELD: Suppose we can show by these contracts that the Peoria Gas-light & Coke Co., has furnished gas in the city of Peoria at a much less rate than it is now being furnished—would not the presumption be that it was furnishing the gas at a profit?

Mr. IRWIN: We are not trying a case against the Peoria Gas-light & Coke Co.,

Mr. MANSFIELD: That don't make any difference.

The MASTER: I do not think that tends to show the cost of the manufacture of gas any more than that a railroad company gives an excursion at a rate much below the cost of transportation generally; in order to make this inquiry competent here you must go further; the master has heretofore ruled on this question and the court has sustained his ruling; you will have to connect the two companies in some way, show an identity of interest which would make what is done by one company competent evidence against the complainant and the record is insufficient in that respect; I do not think the testimony competent. The mere fact that a company may fur-

1861 nish gas to an individual at a certain price does not tend to establish the price; an isolated case is always objectionable as tending to prove any broad proposition like this is. For instance, it might be made to appear in this case that the complainant company furnished gas to its directors for nothing for their service as directors—you could not take that isolated fact as establishing the cost of the manufacture of gas any more than you can take the isolated case here of a few contracts made by the Peoria Gas-light & Coke Co. and establish the cost of making gas.

Mr. MANSFIELD: That is true, but suppose we can show there are 10 or 12 individual contracts outstanding, or suppose we can show there are 50 contracts outstanding, would it not be material.

The MASTER: It would not be material unless you can show an identity of interest between the complainant company and the Peoria Gas-light & Coke Co., What one individual may do in the way of

furnishing his wares to the public is one thing; what another may do is another thing.

Mr. MANSFIELD: Well, we would like to have the question answered subject to the objection.

The MASTER: The witness may answer subject to the objection but the court has already excluded that character of testimony and the master has also passed upon it. I want to say in connection with this objection that the mere knowledge of that fact alone I do not think is objectionable, but when the contracts come to be offered in evidence then an objection would be pertinent.

Mr. IRWIN: I do not think the fact is pertinent to the issues here; if the evidence in any form would be incompetent why does the fact become pertinent.

The MASTER: The mere fact as to whether or not there are contracts in existence tends to prove nothing; it is no evidence against anybody or no evidence of any fact except the existence of the contracts. Do you want the question answered, Mr. Mansfield?

1862 Mr. MANSFIELD: Yes sir;

The MASTER: He may answer subject to the objection.

A. I think there are five contracts in existence—contracts which were made before the people I represent came here—made by Thomas Coffee as president of the Peoria Gas-light & Coke Co.

7. Do you know with whom those contracts were made by the Peoria Gas-light & Coke Co.?

Objected to same grounds as before and also because it is a matter of record which the master and the court have held is incompetent evidence in this case; the witness has been advised heretofore by counsel for the Peoria Gas-light & Coke Co., to refuse to give the contents of records of the company and I think that same advice, were counsel for that company here now, would be given the witness at the present time.

The MASTER: The witness may answer subject to the objection.

A. The Hotel Grant; Planck Bros., laundry; Mr. Barnes, formerly editor of the Journal and the other parties I cannot remember who they were, but they were small ones that don't amount to anything.

MORRIS G. PLANCK, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?

A. Morris G. Planck; laundryman.

2. Where is your place of business now?

Ans. # 424 Fulton St.

3. Are you a consumer of gas in the city of Peoria?

A. Yes sir;
4. How long have you been?
Ans. Since 1893.
5. Have you any contract by and between yourself and any gas company in the city of Peoria as to the price to be charged for gas furnished you either for fuel or illuminating purposes?

1863 Objected to as incompetent, immaterial and irrelevant unless confined to complainant company.

The MASTER: I think he may answer whether he has a contract or not.

A. I have.
6. With what company is that contract made?

Objected to same reasons.

A. With the Peoria Gas-light & Coke Co.,
7. Have you that contract with you?
Ans. Yes sir;
8. Will you let me see it?
A. Yes sir; (witness hands counsel contract).
9. State the facts and circumstances which led you to enter into this contract by and between yourself and the Peoria Gas-light & Coke Co.?

Objected to as incompetent, immaterial and irrelevant.
The MASTER: I do not think it competent.
Mr. MANSFIELD: I would like to have the witness answer subject to the objection.
The MASTER: He may answer subject to the objection.

A. The contract was solicited by the company and as we found it to our advantage to make it we did so.

Defendant's counsel offers in evidence, for the purpose of being read into the record, the contract produced by the witness purporting to be a contract between the Peoria Gas-light & Coke Co. and Planck Bros., Laundry Co., dated April 7, 1900.
Objected to as incompetent, immaterial and irrelevant, and complainant also objects to having the same read into the record.
The MASTER: Do you expect to follow this up, Mr. Mansfield, and show this is not an isolated instance, but the general custom of the Peoria Gas-light & Coke Co.? That is, that it is the general rate charged to its consumers in the cityof Peoria?

1864 Mr. MANSFIELD: No sir; I am going to follow it up and show that at the time this contract was made and entered into the Peoria Gas-light & Coke Co., solicited people to enter into this kind of contracts and to the extent of that solicitation they admitted they could furnish gas to the citizens of Peoria at the price set forth in this contract at a reasonable profit.

The MASTER: I do not think it competent for the purpose of the inference; I do not think the fact that there are isolated cases where the company entered into contracts to furnish gas tends to prove the cost of the manufacture of gas and, I think, when you undertake to prove isolated cases you thereby preclude the idea of a general custom and it is only that feature of the case I think competent; I do not mean to be understood as intimating you cannot call anybody connected with the company and prove they can make gas for 75c. or less, but I hold you cannot offer contracts with individuals for the purpose of establishing the cost of the manufacture of gas.

Mr. RITCHER: I think the rule is general as the master states, but I think it astounding when it is with reference to another company not a party to this suit.

The MASTER: Yes, I think it comes clearly within the rule that proof of isolated cases is never competent to prove a general custom

Mr. MANSFIELD: The defendant thinks it important and would like to have the contract go in evidence subject to the objection.

The MASTER: I cannot exclude it if you insist on the offer and it may go in subject to the objection.

Mr. MANSFIELD: We then offer the contract and ask leave to substitute a certified copy for the record in place of the original.

The MASTER: Have you any objection to the substitution of a certified copy gentlemen?

Mr. IRWIN: Yes sir;

The MASTER: Then read the contract into the record, Mr. Mansfield, subject to the objections made. 1865

Whereupon said contract was read to the master in the words and figures following, to-wit:—

No. —.

A Contract.

Gas at fifty cents.

In consideration of being supplied with gas for light and fuel purposes at the rate of 50 cents per one thousand cubic feet by the Peoria Gas-light & Coke Co., of Peoria, Illinois, we hereby agree to take what gas we may require at premises No. 223–225 S. Mad. Ave., and new address if we move, Peoria, Illinois, for a term of 3 years from April 1, 1900, and pay for same monthly at said rate at its office on or before the 10th day of the month following in which the gas was used.

(Signed in duplicate) PLANCK BROS. LAUNDRY.

Address, 223–225 S. Mad. Ave.

Accepted by the Peoria Gas-light & Coke Co.

THOS. COFFEE, *Pres't.*

Peoria, Illinois, April 7th, 1900."

MILO PROCHAZKA, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?
A. Milo Prochazka; hotel business.
2. Are you a consumer of gas in the city of Peoria?
Ans. Yes.
3. From what company do you obtain the gas used by you?
A. From the Peoria Gas-light & Coke Co.
4. For what purpose do you use the gas so furnished?

Objected to as incompetent, immaterial and irrelevant.

A. For light and for fuel.
5. Have you any contract made and entered into by and between yourselves and the Peoria Gas-light & Coke Co., relative to
1866 the furnishing of gas?

Objected to as immaterial, irrelevant and incompetent.
The MASTER: He may answer whether he has a contract or not.

A. Yes sir;
6. Will you let me see that contract?
A. (Witness hands contract to counsel.)
7. Are you a member of the firm of Chas. Prochazka & Sons?
A. Yes sir; I am his son and one of the firm.

Defendant's counsel offers in evidence the contract produced by the witness, for the purpose of reading it into the record, purporting to be a contract by and between the Peoria Gas-light & Coke Co. and Chas. Prochazka & Sons, dated March 30, 1900.

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I suppose this contract is of the same character as the contract just offered in evidence between the same company and Planck Bros. Laundry?

Mr. MANSFIELD: Yes sir;

The MASTER: The ruling will be the same as it was with reference to the Planck Bros. contract.

Whereupon said contract was read to the master in the words and figures following, to-wit:

No. —.

A Contract.

Gas at fifty cents.

In consideration of being supplied with gas for light and fuel purposes at the rate of 50 cents per one thousand cubic feet by the Peoria Gas-light & Coke Co., of Peoria, Illinois, we hereby agree to take what gas we may require at premises No. 300–302–304–306

S. Adams—the Grant hotel, and new address if we move, Peoria, Illinois, for a term of 3 years from April 1, 1900, and pay for same monthly at said rate at its office on or before the 10th, day of the month following in which the gas was used.

(Signed in duplicate) CHAS. PROCHAZKA SONS.

1867 Address prop'rs the Grant hotel.

Accepted by the Peoria Gas-light & Coke Company.

THOS. COFFEE, *Pres't*,
By T. N. GORMAN."

THOMAS N. GORMAN, re-called on behalf of defendant, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. Are you prepared now to testify as to the prices charged during the last 5 years for gas by the Peoria Gas-light & Coke Co.?

Objected to as incompetent, immaterial and irrelevant to the issue in this case.

A. I have been instructed by the attorney of the Peoria Gas-light & Coke Co. not to answer the question and under those circumstances I refuse to answer.

2. You were asked when on the stand before if you knew or could obtain from any books or records in the possession of the Peoria Gas-light & Coke Co., what were the prices charged by said company for gas furnished to consumers used for illuminating and fuel purposes respectively. Are you at this time prepared to answer as to the prices charged by said company during the last 5 years and the changes in prices, if any, so made by said company?

Objected to as incompetent, immaterial, irrelevant and not the best evidence, the record being the best evidence.

The MASTER: The witness is simply asked if he is prepared to answer as to the prices. He may answer this question subject to the objection.

A. Acting under the instructions I have referred to in my former answer, my answer would be, that I am not prepared to answer any questions relating to the business of the Peoria Gas-light & Coke Co.

3. Could you, by an examination of the records of the Peoria Gas-light & Coke Co., obtain the necessary information to enable
1868 you to testify as to the prices charged by said company during the last 5 years for illuminating gas and fuel gas respectively, and also as — the changes that have been made, if any, by that company in the prices so charged by it?

Objected to as incompetent, immaterial, irrelevant and not the best evidence.

The MASTER: It does not appear from any answer this witness has made that he does not possess that knowledge without any further examination; he simply has declined to answer the question on the advice of counsel.

4. Have you a knowledge as to the prices that were charged by the Peoria Gas-light & Coke Co., for the last 5 years for gas furnished by said company for fuel and illuminating purposes?

Objected to as incompetent and immaterial and also because if the witness had the knowledge it would not be competent, not the best evidence.

The MASTER: I do not think, gentlemen, that is a matter within the exclusive knowledge of the records, or the knowledge of this witness; I think it is a matter of public knowledge and public information.

Mr. MANSFIELD: The fact of the matter is we can prove it in another way but we simply want to get it into the record.

The MASTER: If it has been charged to the public the public has as much knowledge of it as this witness; but, Mr. Mansfield, let me suggest to you, what may have been a uniform charge to the public is one thing; if you are seeking by this witness to prove what has been charged to particular individuals that is another thing.

Mr. MANSFIELD: I am seeking now to prove what were the current prices charged by the Peoria Gas-light & Coke Co., during the last 5 years for both illuminating and fuel gas—charged generally.

The MASTER: The witness may answer subject to the objection.

A. My answer with regard to that will be the same as my
1869 answer has been to the other questions. Do you want to know if I could give that information?

5. Yes sir.

Ans. Yes, I could give it.

6. You have that information within your own knowledge?

Objected to as immaterial.

A. I have it from knowledge I have acquired from the position occupied by me with the company.

Mr. MANSFIELD: The defendant insists upon an answer to the question.

The MASTER: The master has ruled on it, but the witness declines to answer on the advice of counsel. Now, if it turns out you cannot make this same proof by a number of witnesses that have knowledge of the facts as fully as this witness has, then the master might be willing to certify this matter to the court if you desire to carry it there.

Mr. MANSFIELD: The only thing is it would take numerous witnesses to prove it and it would seem to be a great saving of time and

expense to have this witness answer it now. I would like to have the matter decided by the master.

The MASTER: The master has already decided it so far as he can decide it.

Mr. MANSFIELD: We would like to take this matter before the court then.

The MASTER: You will have to wait until the 1st, of September.

Mr. RITCHER: If we can agree on what the fact is I am willing to stipulate what the prices were; I do not think this witness ought to testify to it over the advice of the attorney of the company; I think we can find out from general information, between now and the next hearing, what those prices were and stipulate as to that.

Cross-interrogatories by Mr. IRWIN:

1. You have testified you have been instructed by counsel for the Peoria Gas-light & Coke Co., to refuse to answer any ques-
1870 tion pertaining to the business of the Peoria Gas-light & Coke Co., I will ask you who that counsel is you refer to?

A. John S. Stevens, of Peoria, Ill., a partner in the firm of Stevens, Horton & Abbott of this city.

2. You have stated in your direct examination heretofore and a few minutes ago at this hearing, that you were able to answer the question from the information you had received from your position with the company—was that information obtained from the records of the company?

Ans. Yes sir;

Re-direct interrogatories by Mr. MANSFIELD:

1. At the same time you could testify to that from your own knowledge at the present time, could you not?

Ans. No sir;

2. You have knowledge of those facts, have you not?

A. I have knowledge of the fact but not sufficient from my own memory without referring to the books of the company to be able to give the information asked for concerning prices; it was a kind of a case of jumping jack for a while with regard to prices and a man would have to have a wonderful memory to recall them.

Adjourned by agreement to meet at the directors' room of the Equitable Trust Company, in the National Bank building, #152 Monroe St., Chicago, Ill., on Tuesday, August 19, 1902, at 10 o'clock a. m.

Directors' room, Equitable Trust Company, Nat. Bank bldg.

CHICAGO, ILL., TUESDAY, *August* 19, 1902—10 a. m.

Parties met persuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. R. C. Ritcher appearing for complainant. Mr. Henry Mansfield, city attorney, appearing for defendant.

LYMAN A. WALTON, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?

1871 A. Lyman A. Walton, vice president of the Equitable Trust Co.,

2. State whether or not you have been served with a subpœna to produce a certain trust agreement made and entered into by the holders of stock in the Peoria Gas & Electric Co., with John R. Walsh and Sumner R. Clarke as trustees and the Equitable Trust Co., of Chicago?

Ans. I have.

3. Have you that trust agreement in your possession?

Ans. I have.

4. Will you let me see it?

Ans. I cannot do it.

5. Why can you not do it?

A. It is a matter that concerns the Equitable Trust Company and our attorney has advised me I do not have to produce it in this matter.

6. Then upon the advice of counsel you refuse to produce it?

A. I do.

Mr. RITCHIE: May it please the master: As the attorney for the complainant in this suit I desire to renew the offer which I have made heretofore, namely, that I will produce a copy of that agreement without the signatures and will admit it has been duly executed by the Equitable Trust Co., by the managers and by sundry stockholders, and I will produce the original agreement for inspection by the special master so there can be no doubt that the copy offered in evidence is a true copy of the original. As attorney for the Equitable Trust Co., I think the trust company would violate its duty as trustee by revealing the paper with its signatures without an order of court.

The MASTER: Is this document called for now the agreement under which the stock was deposited with the trust company as trustee?

Mr. MANSFIELD: Yes sir. This is the trust agreement made and entered into of date December 19, 1900, is it not, Mr. Walton?

The WITNESS: Yes sir;

Mr. MANSFIELD: I think that identifies it. I would like
1872 to have an order on the witness by the master to produce the trust agreement mentioned in my previous question?

Mr. RITCHER: I object to the request as calling for something that is immaterial, irrelevant and incompetent.

The MASTER: This witness is a member of the board of directors of complainant company, is he not?

Mr. RITCHER: He has testified he is vice president of the Equitable Trust Company. I don't think he is a member of the board of directors of complainant company—are you Mr. Walton?

The WITNESS: No sir.

The MASTER: I do not think, under the stipulation of counsel, the defendant ought to require the witness to produce the original of this document except for the purpose embodied in the stipulation.

7. As vice president of the Equitable Trust Company you have that trust agreement in your possession?

Ans. I have.

8. And subject to being obtained by you if so ordered?

A. Yes sir.

Mr. MANSFIELD: We desire to except to the ruling of the master and reserve the question for the purpose of taking it before the court.

The MASTER: The ruling is made upon your right to ask the custodian to part with the possession of the original instrument.

Mr. MANSFIELD: I do not ask him to part with it but to produce it in court.

The MASTER: A certified copy is offered to you without the signatures subject to verification by the master.

9. Do you, in your capacity as vice president of the Equitable Trust Company, execute instruments and documents on the part of and for the Equitable Trust Company?

Ans. I do.

10. Did you, as such officer of the Equitable Trust Co., under and by virtue of the power, or any power that was obtained by the Equitable Trust Co., through or under that trust agreement
1873 made and entered into December 19, 1900, execute any other or further agreement by and between the Equitable Trust Co., and any other trustees or persons with reference to the property of the Peoria Gas & Electric Company in the city of Peoria?

Objected to as incompetent, immaterial and irrelevant.

The MASTER: It- materiality may appear; the witness may answer subject to the obtaction.

A. No.

Mr. MANSFIELD: That is all, Mr. Walton.

Mr. RITCHTER: I have a copy of the pool agreement of December 19, 1900, purporting to be between the owners and holders of shares of the capital stock of the Peoria Gas & Electric Company, parties of the first part, and Sumner R. Clarke and John R. Walsh, as managers, parties of the second part, and the Equitable Trust Company of Chicago, Illinois, a corporation, organized under the laws of the State of Illinois, party of the third part; the copy appears to have been executed by Sumner R. Clarke and John R. Walsh, as managers, and by the Equitable Trust Company, and I will admit that the original was also executed by sundry stockholders of the Peoria Gas & Electric Co., and I offer the copy to the defendant, provided the same is accepted, in lieu of the original called for by Mr. Mansfield. I desire further to state that I am entirely willing that the master when he has inspected the original shall state whether or not more or less than three-fourths of the entire capital stock of the company purports to be represented by those signatures without stating the exact amount, if my former offer is accepted.

Mr. MANSFIELD: I object to the offer relative to the trust agreement as being immaterial and incompetent until the exception made to the ruling of the master is passed on by the court.

Mr. RITCHER: We admit that the offer is irrelevant and immaterial.

1874 (The master examines the original pool agreement called for.)

The MASTER: After an examination of the original trust agreement called for by counsel for defendant I am inclined to hold that the evidence is incompetent and immaterial.

Mr. MANSFIELD: We except to the ruling of the master. Have you the secretary's book here, Mr. Ritcher?

Mr. RITCHER: Yes sir;

Mr. MANSFIELD: Will you let me see it?

Mr. RITCHER: I will hand it to you under our stipulation; if you do not accept our stipulation formerly made you will have to fish for it some other way.

Mr. MANSFIELD: I understand that stipulation was agreed to by us previously; all we want to do is to offer those parts of the record that are unsealed until the master has examined the record.

The MASTER: The master has not yet examined the sealed parts of the record; you can offer such parts of the record as you desire that are unsealed and I will then examine the sealed portions of the record and if I think parts of it not offered are material I will call attention to it.

Defendant's counsel offers in evidence from the secretary's book of the Peoria Gas & Electric Company the following records:

1. The record of the first meeting of the board of directors contained on pages 6 and 7.

2. The proceedings of the board of directors held at the office of Harding & Miller, #211 Main St., Peoria, Illinois, on the 8th,

day of May 1899, contained on pages 8, 9, 10, 11, 12 & 13, with the exception of the portion sealed, subject, however, to the inspection of the master and to his report as to whether such sealed portions of the record are material to the issue in this case.

3. The proceedings of the board of directors of the Peoples Gas & Electric Company contained on pages 14, 15, 16, 17, 18, 19, 20 & 21, with the exception of that portion of the record which
1875 contains the by-laws of the company adopted at the meeting.

4. The proceedings of the stockholders of the Peoples Gas & Electric Company as appears on pages 22, 23, 24, 25, 26, with the exception of the certificate of publication attached to page 25.

5. The proceedings of a meeting of the stockholders of the Peoria Gas & Electric Company contained on pages 27 and 28.

6. That portion of the proceedings of the board of directors contained on pages 29 and 30.

7. That portion of the proceedings of the board of directors contained on pages 31, 32, 33, 34, 35, 36, 37, 38, 39, and 40, with the exception of the sealed portions of such record, subject, however, to the right of the master under the stipulation to examine and declare whether any portion of the sealed record is material to the issue in this case, and if so, such portions of the sealed record as are found to be material are hereby offered.

8. The minutes of the stockholders' meeting contained on pages 41, 42, 43, 44, 45, 46, 47, 48, 49 and 50, the sealed portions thereof to be controlled by the stipulation in this case, with the exception of the notice of publication attached to page 45.

9. The minutes of a special meeting of the directors contained on page 51.

10. The minutes of a special meeting of the stockholders contained on pages 52, 53, and 54, with the exception of the notice of publication attached to page 53.

11. The record on pages 55 to 63 inclusive with the exception of that portion of the record that is sealed, which shall be governed by the stipulation in this case.

12. The minutes of the regular annual meeting of the stockholders contained on pages 64, 65 and 66.

13. The minutes of the regular meeting of the directors contained on pages 66, 67, and 68.

14. The minutes of a special meeting of the directors con-
1876 tained on pages 68, 69, 70, 71, 72, 73, and 74, with the exception of that part of the minutes which embody the by-laws of the company adopted at that meeting on pages 69, 70, 71, 72, 73, and 74.

15. Section 1, article 7, entitled "Dividends" on page 74.

16. Also that portion of the record contained on pages 75, 76 and 77.

17. The minutes of a special meeting of the directors contained on pages 78, 79 and 80.

18. The minutes of a special meeting of the directors contained on page 81.

(See pages 193–'4–'5.)

1877 Mr. MANSFIELD: I would like to have a stipulation that these are all the records of the complainant company.

Mr. RITCHER: Counsel for complainant certifies that the record book here presented contains to the best of his knowledge and belief all of the records of the meetings of the stockholders and board of directors of the complainant company whether the same be regular, special or otherwise. I know of no other records and believe there are none, and will further state that I believe the offers made by defendant's counsel includes all of the records of the regular or special stockholder meetings or meetings of the board of directors from the first meeting of the board of directors to the present time with the exceptions noted by counsel for defendant in making his offer of the records.

Mr. IRWIN: Counsel for complainant objects to all those portions of the record offered as incompetent, immaterial and irrelevant to the issue in this case, and if, on an inspection by the master, he finds any of the sealed portions of the record to be material in his opinion, the same objection is made to such portions of the record.

JOHN R. WALSH, called on behalf of the defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. State your name?
Ans. John R. Walsh.
2. Are you connected with the Akron Gas Co.?
Ans. Yes sir.
3. In what capacity?

Objected to as immaterial, incompetent and irrelevant.

The MASTER: I do not see the materiality of it.
Mr. MANSFIELD: It is preliminary.
The MASTER: The witness may answer subject to the objection.

A. I am a director.
1878 4. Are you not president of that company?
A. I believe I am.
5. Do you know at what price the Akron Gas Co. now furnishes gas to consumers in the city of Akron?

Objected to as immaterial and irrelevant.

A. I don't know.

Adjourned to meet at the Yates house, Syracuse, N. Y. on Friday August 22, 1902, at 10 o'clock a. m.

acted as a consulting engineer to gas companies and in what territories?

A. From about 1876, onwards up to the present time, mainly in Ontario.

9. To what extent, if at all, have you investigated and examined the plants of companies other than those with which you have been associated as you have testified?

A. Well, there are, I might say, almost scores of gas works in the United States I have visited whose working results I am more or less acquainted with and, so far as the statistics of those companies are available I am fairly familiar with their working results.

1880 10. What, if any, investigations have you prosecuted in foreign countries?

A. Well, as an old English gas man I have closely followed the results obtained in the British gas companies and am familiar from their published records as to what is being done in every detail of it.

11. State whether or not you are familiar with the details of structural work and also with the operation of gas works in this country and in Europe as well?

A. I am in every detail familiar with it.

12. For how long a period of time have you been reasonably familiar with the subject referred to?

Ans. For at least 30 years.

13. How long is it since you severed your connection with the Syracuse Gas Company?

Ans. Since October 1898.

14. And since that time have you continuously been associated with the Semet-Solvay Co.?

A. No sir; I started a chemical works in a special line that is now operating in this city.

14. How long have you been with the Semet-Solvay Co., in the capacity to which you have referred?

Ans. Nearly 1½ years.

15. In what business is that company engaged?

A. Well, the Semet-Solvay Company's main business is in the operation of coke ovens; that is to say, in the manufacture of coke and the recovery of the by-product; it is strictly a gas making business, and I might as well explain, that the Semet-Solvay Co. is a branch of the Solvay Process Co., but inasmuch as it is outside the line of business for which the Solvay Process Co., was organized or incorporated, the same men are incorporated under the title of the Semet-Solvay Co., for the operation of the by-product recovery ovens.

16. With what part of the business have you to do and have you since the time you became associated with that company?

A. Especially with the gas end of it.

Yates house, parlor "A."

SYRACUSE, N. Y.,
FRIDAY, *August* 22, 1902—10 o'clock a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. R. C. Ritcher appearing for complainant. Mr. Henry Mansfield and Mr. F. H. Tichenor appearing for defendant.

THOMAS LITTLEHALES, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. TICHENOR:

1. State your name and place of residence?

A. Thomas Littlehales; #715 E. Genesee St., Syracuse, N. Y.

2. What is your business?

Ans. Gas engineer.

3. How long have you been engaged in the gas business and how long have you been a gas engineer?

A. In 1866 I became a pupil of the engineer of the Crystal Palace District Gas Company in London, England; was subsequently manager of the West London Junction Gas Company, London, Eng., then for 24 years engineer and general manager of the Hamilton Gas-light Company, Hamilton, Ontario; then for nearly 3 years general manager of the Syracuse Gas Company, Syracuse, N. Y. at present
1879 I am adviser on gas matters for the Semet-Solvay Co., Solvay, N. Y.

4. Where is this company, to which you have just referred, located with reference to the city of Syracuse, N. Y.?

A. In the immediate suburbs of Syracuse.

5. During the time you have been connected with gas industries what part of the work have you performed?

A. I think everything around a gas works.

6. Specify generally, what ground you have covered in the performance of your duties in connection with gas companies as you have testified?

A. Well, I have done with my own hands almost every kind of work around a gas works up to its management.

7. State what, if any, experience you have had in the construction or reconstruction of gas works both with reference to the manufacturing plant and its pipe system?

A. I have reconstructed several gas works; among them, Hamilton, Ont., Brantford, Guelph, St. Catharine; I have built entirely new works and laid new mains, everything complete, in Barrie, Ont., and have at various times done consulting engineering work for several other companies.

8. From what period of time have you, to a greater or less extent,

1881 17. How extensive are the gas interests of this company coming directly under your charge?

A. Well, directly under my charge—none; I have no charge of them; I am simply an adviser on those matters—I wish to make that distinction. The best idea I can give you is that in the various plants of the company we carbonize—I think it is—1200 tons of coal a day.

18. Will you explain in a general way the character of this industry to which you have referred?

A. The Solvay Process Co., requires for its own use, to burn 500 tons of lime a day and upwards, a large quantity of coke and it went into these coke ovens mainly to supply that coke; up to the time of the introduction of what is known as the by-product recovery ovens nearly all the coke was made in what is known as beehive ovens, in which all the tar, all the ammonia and all the gas was entirely wasted, and when this particular form of by-product recovery oven was perfected in Germany, the Semet-Solvay Co., secured the rights for this country of that oven to operate the same; my special duty with the company was to show them how the gas from this particular form of oven could be made available for general public use.

19. What use is made of the by-products from your process as the business is prosecuted at Solvay?

A. The tar is distilled into its various products, benzole, carbolic acid and we are now starting an industry to make picric acid, that is used in making picrates for smokeless powder, and the ammonia is one of the vital necessities to the Solvay Process Co., in the manufacture of soda ash; it is the agent that produces the reaction.

20. What disposition is made of the gas?

A. The gas at present in Syracuse is simply used under the boilers, or under the caustic pots, or other appliances, simply
1882 to get rid of it; at some of the stations there is an excess over what they want and it is simply absolutely wasted; in Detroit, we have a plant there, and a contract has just recently been made with the Detroit Gas Co., to supply them from our Detroit ovens gas to the extent of two and a half million cubic feet per day.

21. As an adviser have you jurisdiction over all the various plants of the Solvay Process Co., in this country?

A. Yes sir; I think on any new departure in the matter of gas I would be consulted on it. I wish it distinctly understood I am not in active charge of the business; I am simply there as their adviser on the technical portion of the business.

22. State whether or not you know the processes under which gas is produced in the United States?

A. Yes, I think I may claim to be familiar with practically all the processes in general use.

23. How many are there in general use in this country?

A. Well, they might be divided into three main divisions, viz:—coal gas, water gas and oil gas, leaving natural gas, of course, out of

consideration. Then, of course, there are a great many companies running a combination of coal and water gas, and of the water gas processes, while they are all based upon one main principle, there are a number of variations under different names, but practically come down to the same general principle, known as the Lowe process; there are many forms of it, namely, Wilkinson, Flannery and various others.

24. State whether or not you are also familiar with the cost, production and distribution of gas from the different processes as the business is carried on in the United States?

A. I will say generally as from coal and water gas I am thoroughly familiar with it.

25. And have you been for some years past?

A. Ever since water gas was introduced.

26. From the standpoint of economy in production, which
1883 of the processes mentioned by you takes precedence?

A. That is largely a matter of local conditions. For example, nearness to coal mines, or nearness to oil fields—largely a matter of local conditions, and also the market for the residuals.

27. State whether or not you are familiar with the life of the various kinds of apparatus, mechanical appliances etc., entering into the formation of a complete gas plant?

A. I am thoroughly so.

28. Taking the manufacturing plant itself, will you please state the life of the various items which constitute it?

The MASTER: Are you referring to water gas or coal gas?

Mr. TICHENOR: I am referring now to coal gas plants only.

A. Of course different portions of a plant will have different periods of life and it will depend largely upon the character of the original installation, and whether it is a growing or non-growing locality, as to what the life of a plant will be. For example, in a rapidly growing place, if the works were made too small to start with, part of the plant would soon be outgrown, but if a proper view was taken with a view to future contingencies, the life would be much larger, because in one case apparatus would be discarded before it was half worn out and in the other case it would have a chance of living its life out. Now, a gasholder under fair conditions should have at least 50 years of life; I would consider retort arches should have from 20 to 25 years' life; the retorts themselves will perhaps have two years' life and so on; each plant varies largely, but taking the average I think it would be perfectly safe to assume from 20 to 25 years' life, one thing with the other. As an illustration, I think, I may say, that only a few months ago I happened to be valueing a gas plant that was being taken over by a city from the gas company and amongst other parts of the plant was a gas-
holder that had been built in 1851—this was in 1901 that the
1884 examination was being made—that holder had been in operation 50 years and the superintendent of the gas com-

pany, the man who built the holder and the experts on the other side, all contended that holder should last as long as it had lasted.

29. In what condition did you find that holder at the time of your examination?

(Objected to as incompetent and immaterial.)

The MASTER: I do not think it material or competent either being an isolated case.

Mr. TICHENOR: I would like to have the witness answer.

The MASTER: He may answer subject to the objection.

A. Good for 20 years' life.

30. Where was the gas works to which you have just referred?

Objected to same grounds.

The MASTER: He may answer subject to the objection.

A. At Kingston, Ontario.

31. What is the life of the purifyers, exhausters and such mechanical devices as are necessary in the operation of a gas works?

A. I myself put in a set of exhausters and—Interrupted——

Mr. RITCHER: We object to the witness stating an individual case in answering a question of this kind.

The MASTER: I think the question calls for the general rule.

The WITNESS: Is not what I know from personal experience better than anything else?

Mr. RITCHER: If you don't know anything else, yes sir;

The MASTER: The question calls for the general rule in that regard and counsel has already ascertained how you know it to be the rule.

A. I would place their life at from 20 to 25 years.

32. To what part are you now referring?

A. Exhausters and purifyers.

33. What portions of the purifyers are more especially sub-
1885 jected to depreciation?

A. The sides of the covers.

34. To what is that due and what protection is there from it, if any?

A. It is due to the fact that the water of the seal in which the lid drops to make it gas tight is largely impregnated with ammonia and sulphur which causes a rapid oxidation of the side plates and those will have to be renewed perhaps in 10 or 15 years unless the precaution is taken to keep the sides well greased at the time the purifyers are changed to prevent that oxidation.

35. To what extent will that extend the life or retard deterioration in the parts to which you have just referred?

A. It simply means a difference perhaps of 10 or 15 years—the care taken to preserve them or let them go may mean 10 or 15 years added to the original life easily.

36. Then your first statement had reference to the life of those

parts under ordinary conditions when those precautions were not taken?

A. No sir; under the average conditions they run; I would think it would require careful management and careful attention to secure 20 to 25 years of life out of the sides of purifyers—it would require careful management to do that; with neglect they would go sooner.

37. What is the life of the engine in such works?

A. 25 years easily.

38. State whether or not the service demanded of an engine in a gas works is greater and more destructive in its effects than that ordinarily imposed upon like engines?

A. I would not consider it in the slightest degree more than an engine under average conditions, for the simply reason that an engine is always well greased and that coat of grease or oil, as
1886 the case may be, prevents it from the oxidation which would otherwise take place—that is why.

39. To what especial unfavorable influences are the buildings themselves of a gas works subjected so far as pertains to depreciation, if there are any such?

A. Well take the roof of a retort house for example; the constant steam arising from the quenching of the coke, which contains more or less sulphurous vapors, and again converted into sulphuric acid, probably attacking the roof—that is one thing; then around the other plant the ammonia is very active and corrosion of metals has to be guarded against, of course, by proper coating, or painting of the metal; but the destructive influences are entirely from the outside.

40. What do you mean by that?

A. I mean to say the gas itself, from the beginning to the end, there is very little wear or injury either from chemical or other influences from the inside; all the wear and tear takes place from outside influences which can be gotten at and guarded against to a large extent.

41. State whether or not it is practicable to protect metal work from the influences to which you have referred?

A. Undoubtedly to a very large degree by coating either with tar preparations or anti-corrosive paint.

42. State whether or not the same practice lengh*t*ens the life of services?

Ans. Certainly, undoubtedly.

43. To what extent?

A. It is difficult to say because it would be so indefinitely prolonged by careful coating.

44. If service pipes are laid in sandy or gravelly soil, or in clay and are protected in the manner to which you have referred, what would be their ordinary life?

1887 A. You ask about two soils totally different; I should say an unprotected service would last probably 20 years in clay whereas in sand or gravel that same pipe would be destroyed in

much less time because the clay, being compact, keeps it from the oxidation, from being alternately wet and dry; I would consider in an ordinarily loamy sand or gravel an unprotected pipe would have about a 15 year average life, and a protected pipe may be would have 25 or 30 years' life.

45. What is the comparative expense of furnishing the protection that you have explained?

A. About one cent per foot.

The MASTER: You are referring now to service pipe?

Ans. Yes sir.

46. State what changes or improvements have been made in the coal gas industry, so far as pertains to construction and operation, within the past 25 or 30 years?

A. Well, principally in the form of retort construction, that is the greatest of all changes, by the addition of what is known as regenerative furnaces, insuring greater heats, more uniform temperature, and consequently a larger yield of gas from the same quantity of coal; then stepping further along, in retorts, which have made greater progress in Europe than in America, what is known as inclined retorts, but that is scarcely a factor in the United States as yet. Then in the purifying department within the last few years largely, the substitution of iron in the place of lime as a purifying material, costing very much less, and being very much more easily disposed of.

47. What has been the result of those changes so far as pertains to economical production?

Ans. To cheapen it.

48. To what extent has the introduction of the regenerative furnace diminished the cost of gas—I am not speaking of the diminution per thousand, but generally, as a general proposition?

1888 A. That is a pretty hard question to answer.

49. For what reasons then does the regenerative furnace reduce the cost?

A. By obtaining a larger production of gas per man per day, thus cheapening the labor; by obtaining a larger yield of gas from the coal, thus reducing the cost per thousand for coal. Those are the two principal reasons.

50. Measured by the quantity of gas produced which has the greater life, the regenerative furnace, or the old type furnace?

A. While the regenerative system would be shorter lived than the old setting it will produce more gas during its life time than the old setting, so in that respect, it would be the cheaper apparatus although costing more.

51. In coal gas plants of a capacity of from 550.000 to 750.000 cubic feet per day, what number of retorts per bench would be productive of the greatest economy in operation?

A. That would necessarily depend to a considerable extent on the particular requirements of the locality. For example, in a large city, where they have a large number of retorts in use, beds of 9

and 10 retorts are in use and can be most advantageously used because in lighting up a bench at a time their requirements are such as to take the make from one of those large benches, whereas, in a smaller bench perhaps the lighting up of three retorts at a time would be all they wanted, therefore the size of the bench must depend on the amount of gas required.

52. What would the fact be in a gas plant of the size mentioned in a town of about 65,000 inhabitants?

Objected to because no particular size has been mentioned.

The MASTER: Benches of 9's the witness has referred to.

Mr. IRWIN: He says 9's or 10's in large cities.

Mr. TICHENOR: My previous question referred to a gas
1889 plant of a certain size.

The MASTER: Yes sir; the witness may answer.

A. I personally would not think of putting in larger benches than 6's in a case like that for the reason that in the spring when you are dropping your benches, when you make this falling off six at a time would be the most you could afford to drop and in lighting up in the fall six would be as much as you could afford to put on at a time.

54. And for the other reasons you have given before?

Ans. Yes.

55. What hazards are there in the coal gas business now that were not in existence 20 or 25 years ago?

A. I know of none. Do I understand that relates to the manufacture?

56. I am referring to the gas business as a whole?

A. I know of none; of course, the question of competition comes in more actively now, but so far as the cost of production, or distribution or manufacture are concerned there are no greater risks I know of to-day than there were years ago. If I fail to catch the bearing of your question please excuse me.

57. That is all right. Do you know the city of Peoria, Ill.?

A. Not at all; I have never been there.

58. Do you know from the record in this case as it has been made up to this time its magnitude, the area which it covers, the general character of the soil there and topographical conditions?

A. Generally I think I do.

59. State whether or not you have examined in detail the works of complainant company as set out in this record?

A. Yes sir; a sort of specification of the works—the details. Yes, I have gone over that.

60. State whether or not you know what it would cost to construct
a plant of the magnitude of complainant's plant in the city
1890 of Peoria during the years 1899 and 1900?

A. I have made an estimate of the cost of such a plant.

61. Do you know what such cost would be?

Ans. I do.

62. Assuming that the real estate upon which the company's manufacturing plant is located cost $43.000, that it has the number of miles of mains shown by the record in this case, that it also has about 1758 meters in use, what would be the total cost of construction

A. Including the real estate on which the plant is located I estimate it at $384.192.00, as the cost.

63. That is inclusive or exclusive of the land?

A. Inclusive of the land—no, stop a moment! The construction less the land would be about $342.000, the land $43.000—perhaps my best answer to the question would be that I consider the whole capital required for such an undertaking $400.000; I think that answers the question fully.

64. What addition do you make to the figures given for the cost of construction including the land, to make up the $400.000, and why.

A. Taking the individual cost of the different parts involved I bring in the land and the works up to $225,000; the mains $125.108.73.

65. Upon what mileage of mains do you figure?

A. 26½ miles. The services $20.631.20; consumers' meters $13451.53 and allowing a working capital of $15808.54, makes a total sum of $400.000.00.

66. I will ask you to state the capacity allowed by you for the several items entering into the construction aggregating the figures you have given?

A. I have allowed for very, very much larger capacity than the plant that is already there, in some cases nearly double.

Mr. RITCHER: I move to exclude the answer inasmuch as
1891 the witness was asked to give an estimate based upon the plant described in the record.

67. What effect upon your figures would be produced by providing for the larger apparatus to which you have referred—would it cost more or less to put in the larger apparatus than it does the smaller specified in complainant's plant?

A. It would cost more for the larger plant, of course.

68. In what respects have you allowed for larger apparatus than that contained in complainant's plant?

A. Take for example the retorts; I allow for 14 benches of 6's, or 84 retorts as against seven benches of 9's and 1 enriching retort; that is, 63 working retorts and one oil retort making 64; I put in 84 retorts or an increase of 37%. According to the specifications there are in the works of complainant company two purifyers each 24 feet square, giving 1152 feet area of purifying surface; my estimate provides for six boxes 20 x 18 giving an area of 2160 feet or 87% larger; I use a larger purifying capacity because the purification is cheapened to a large degree by the enlarged area of the boxes and the slow speed with which the gas passes through the boxes.

As I understand there is there a gasholder of 300.000 feet capacity; my estimate provides for 563.000 feet capacity equal to 75% of the largest daily output.

69. What do you make the largest daily output—have you those figures before you?

Ans. Yes sir; 750.000 cubic feet.

70. To what extent would those items increase the cost over the cost of the corresponding items in complainant's plant—have you those figures?

Ans. No, I have not worked that out.

71. State whether or not the figures you have given are sufficient to complete in Peoria, Illinois, a plant with a maximum capacity of 750.000 feet per day with a milage of mains approximately 26½ miles?

1892 Objected to as incompetent, irrelevant and immaterial to the issues in this case.

The MASTER: Do you mean a plant as described in the record in this case?

Mr. TICHENOR: I am speaking of the plant the witness has estimated upon.

The MASTER: The witness may answer subject to the objection.

A. I think the figures I have given are ample to cover everything.

72. What would that plant be when completed with respect to being modern or otherwise?

(Objected to same grounds.)

A. The best modern equipment that could be obtained. I have provided in my cost for a works of a very much larger capacity than is at Peoria now, because, when I made my estimate, I did not know what the details of that plant were; I only knew there was an output of approximately 164.000.000 or a maximum of 750.000 cubic feet per day, then it was for me as a gas engineer to lay out what I thought was a works suitable for that and that is how I arrived at it.

73. Would the cost of complainant's plant, as described in this record, be greater or less than the one you have described?

A. It should be considerably less on account of the difference in capacity.

(The MASTER:)

74. By the difference in capacity you have given, do you mean to be understood that should decrease the cost of the Peoria plant in that proportion?

A. Not in that proportion but it should decrease it considerably. I can best illustrate it in this way. Take the cost of a gasholder, whereas in a small holder it may cost $150 per thousand storage and upwards in a large holder it may get down to $70 and even

$60 per thousand storage—the larger area makes a decreased cost per thousand storage.

Mr. TICHENOR: Does that answer the master's question?

1893 The MASTER: I think that makes the record show that the decrease in the cost of the Peoria plant should not be made in proportion to the increased capacity he has figured.

(Mr. TICHENOR:)

75. State whether or not you know the cost of manufacturing and distributing gas in the city of Peoria, assuming that the city along the river front extends for a distance of about four miles, that its extent back from the river is about one and a half miles, that its population is about 65,000, that the plant of complainant company is situate about in the middle of the city's length along the river; and assuming further, that the output is 164,000,000 cubic feet per annum; that gas coal delivered in the company's yards costs $2.80 per net ton; that coke is worth $3.25 per ton in that market; tar 5c. per gallon; ammonia 8c. per pound; that stokers get $65 per month, head stoker $70 per month and common labor $1.50 per day?

Objected to as not furnishing the proper elements upon which to base an answer.

The MASTER: I do not think you have included in that question all the conditions that should properly enter into the computation as shown by the record here.

Mr. TICHENOR: It appears to me I have.

The MASTER: How are you going to heat your furnaces?

Mr. TICHENOR: I think the witness understands how they are to be heated.

Mr. RITCHER: I don't care whether the question is changed; I simply want my objection noted.

The MASTER: The witness may answer subject to the objection.

A. Yes, I know what it should cost.

76. State whether or not you have gone over in detail the various elements entering into the cost of production and manufacture in Peoria under the circumstances and conditions named?

A. I have carefully.

1894 77. You may give, if you please, the details of your work together with results putting it in your own way and stating fully and at length all questions entering into such computation made by you?

Objected to as incompetent, immaterial and not based upon the facts as shown by the record as set forth in the previous hypothetical question.

The MASTER: The witness may answer subject to the objection.

A. The individual items that enter into the cost are as follows:—Coal $2.80 per ton, assuming a production of 4.90 feet per pound,

would cost 28.57 cents per thousand feet of gas made; for convenience I will state the figures taking a thousand feet of gas as a unit; taking the coal at 28.57 and deducting the residuals from that, coke, tar and ammonia, would represent 25.14, leaving the net cost of coal 3.43 per thousand cubic feet of gas; then add to that wages on the basis of 95c. per net ton of coal carbonized works out 9.69; salaries, assuming the half of the general manager's salary charged to manufacturing and half charged to distribution, which is the general rule in the gas business, would place the salaries of manufacturing at 1.52; purification 1c. per thousand, maintenance, general wear and tear—Interrupted——

78. Permit me to interrupt you. Will you please as you go along specify the figures from which those items per thousand feet are obtained?

A. By simply dividing the actual amounts involved. Take for example, say 16.734 tons of coal would be required, divide that by the quantity of gas produced and that gives the result per thousand feet and dealing with each of the items in the same way—Interrupted

79. Will you please give the figures all the way through?

A. Oh yes, the gross amounts do you mean?

80. Yes sir; and the details of your work?

1895 A. Had I better start again?

81. We want it complete—perhaps you had better start again?

A. Coal 4.90 feet per pound at $2.80 per ton requires 16734 tons, amounting to $46.857.14.

(The MASTER:)

82. Requires it for what—to produce this given quantity of gas? Ans. Yes sir;

(The SAME:)

83. What quantity do you refer to?

A. 164.000.000; that sum divided by the quantity of gas made gives 28.57 cents per t-ousand feet.

(Mr. TICHENOR:)

84. You may state what the record shows this company produced per ton of coal during the six months ending April 30, 1902, as compared with the figures you have used—4.90?

Objected to because the record speaks for itself; the witness don't have to state what the record contains.

The MASTER: I do not think it competent to have the witness state from the record.

Mr. TICHENOR: Proceed, Mr. Littlehale?

The WITNESS: The unit of comparison in the gas business is per

thousand feet of gas made. Now, from that amount just given we deduct for residuals—Interrupted—

The MASTER: What amount just given?

The WITNESS: The coal per thousand cubic feet—the amount; it works out per thousand cubic feet for coal 28.57 cents; now, we deduct from that the residuals, assuming a sale of 1050 pounds of coke per net ton of coal carbonized at $3.25 per net ton of coke, would give a gross sum of $28.552.33; assuming the sale of 11 gallons of tar, which would amount on that tonnage of coal to 184.074 gallons, at 5c. per gallon $9.203.70; assuming a production of 2.6 pounds of ammonia NH3 per ton, that equals 43.508 pounds of ammonia at 8c. per pound of NH3, amounting to $3480.64; those three items, coke, tar and ammonia amounts to $41.236.67, or
1896 25.14 cents per thousand cubic feet, which deducted from the 28.57 cents cost of coal leaves the net cost of coal per thousand feet of gas made at 3.43 cents—Interrupted—

The MASTER: For what?

The WITNESS: Per thousand cubic feet of gas; I am speaking of that as a unit all through. Then manufacturing labor, I assume for that 95c. per ton of coal, or a gross sum of $15.897.30, equal to 9.69 cents per thousand feet; salaries, assuming the half of the general manager's salary charg-able to manufacturing—$2500, or 1.52 cents per thousand cubic feet; purification $1640, or equal to 1c. per thousand cubic feet; general wear and tear, or maintenance of works $9840, equal to 6c. per thousand cubic feet; insurance $300; taxes $5500—total $5800, or equal to 3.53 cents per thousand cubic feet; advertising, stationary etc., $1230 or 75/100 per thousand cubic feet; sundries and general charges $5740 equal to 3.50 cents per thousand cubic feet, or a total amount of expenditures for the gas into the holder $48.267.77, equal to 29.42 cents per thousand cubic feet. That is the cost in the holder per thousand cubic feet made. Now, when the quantity of gas sold is used as a devisor it makes the cost per thousand cubic feet 30.34 cents per thousand.

85. What is the reason for that difference? and how is it obtained?

A. For example. Until the gas gets into the holder you have to take the gas made as the devisor, after it passes the holder you have to use the gas sold as the devisor, consequently, as the gas sold is smaller than the gas made, your devisor being less your cost is more, so it gives you for your gas made 29.42, but when you divide it by the gas sold it amounts to 30.34 cents—slightly increased.

86. What amount do you allow for unaccounted for gas between your holder and the place of consumption?

A. I have taken that as 450 cubic feet per mile of main per
1897 24 hours; there are two ways of figuring the unaccounted for gas, one as a percentage on the make, the other on the milage of mains; it is generally conceded that the milage of mains is the more correct method of measurement, that the percentage will

vary so much as often to be misleading. For example, if one main's milage is double the other with the same percentage it would be double the actual leakage, so that in quoting the leakage I took it as 450 feet per mile of main per 24 hours applying it to 26½ miles of mains; that is the basis on which that estimate is made.

87. Proceed?

A. We stopped at 30.34 cents. Now, our distribution charges; wages $9052.80, equals 5.61 cents per thousand feet; salaries $7544 equals 4.72 cents per thousand cubic feet.

88. I will ask you to state at that point whether or not you include in the item of salaries under distribution any part of the general manager's salary?

A. Yes sir; one half of it $2500; I assume the salary of the general manager to be $5000.

89. Proceed?

A. Wear and tear on the outside mains and services. General maintenance $3017.60 or 1.89 cents per thousand cubic feet; advertising, stationary etc., $1131.60 equal to 71/100 cents per thousand cubic feet; meter repairs $4526.40 equals 2.83 cents per thousand cubic feet; incidentals $2640.40 equal to 1.65 cents per thousand cubic feet, or a total cost at consumers' meters for all charges $76.180.57, equal to 47.75 cents per thousand cubic feet sold.

90. State whether or not you have made an application of those figures for the purpose of ascertaining the profits and loss account in operation, assuming that the cost of complainant's plant was $434.252.35?

Ans. I have, sir;

91. Will you please state in detail the result?

A. The total outlay, as previously stated up to consumers' meters per make of 164.000.000. cubic feet, was $76.180.57 equal to 47.75 cents per thousand cubic feet sold; add 8% as interest on cost of works, assuming that cost to be $434.252.35, it amounts to $34.739.72, or 21.76 cents per thousand cubic feet. Now, after allowing 450 feet per mile for leakage on the 26½ miles of mains would leave the gas for sale 159.647.000 feet at 75c. per thousand giving a total receipt of $119.736.25 or 75c. per thousand feet; deducting those two previous amounts, the expense of making and the 8% interest, would leave a balance of $8.815.96 equal to 2 3/10% on the capital of $434.252.35; that margin is equal to 5.49% per thousand cubic feet of gas sold. 1898

92. State whether or not you have made a similar computation based upon the cost of construction at $400.000, which you have stated was ample for the works in question?

Ans. I have.

93. What are the results?

Objected to as incompetent, irrelevant and immaterial.

A. Assuming a capitalization of $400.000 and on the same basis as the previous estimate the expense up to consumers' meters would

be the same as before; the cost of gas would be the same regardless of the capital; $76.180.57 equals 47.75 cents per thousand cubic feet sold; 8% on $100.000 capital outlay would be $32.000.00, equals 20.04 cents per thousand cubic feet sold; the gas sold would be the same as before $119.736.25 at 75c. per thousand, leaving a balance of $11.555.68, equal to 7.21 cents per thousand cubic feet or equal to 2.08 % on the capital employed under those conditions.

94. That is in excess of 8 % on the capitalization?

Ans. Yes.

95. State whether or not you have made any computation on similar lines based upon a different output from that which you have described?

Ans. I have.

96. What is the basis of this computation to which you refer?

1899 A. 150.000.000 output per annum instead of 164.000.000. a in the previous estimate.

97. What are the results of that computation—give the details?

A. On a make of 150.000.000. per annum with a leakage of 450 feet per mile of mains per day as before would leave gas for sale 145.648.000 cubic feet; to manufacture that gas on the same basis as before, 4.90 feet per pound of coal at $2.80 per net ton, the cost of coal would be, $12.856.80, equals 28.57 cents per thousand feet; made; the residuals to be deducted from that amount would be, coke 1050 pounds per ton, or a total of 8035 tons of coke at $3.25 per ton equals $26.113.75; tar, on the basis of 11 gallons per ton would represent 168.360 gallons at 5c. per gallon $8418.30; ammonia, on the basis of 2.6 pounds per ton of coal equals 39.795 pounds at 8c. per pound of NH3 amounts to $3183.60, or a total for residuals of $37,715.65, or 25.14 cents per thousand feet made, which deducted from the cost of coal leaves the net cost of coal $5141.15, or 3.43 cents per thousand feet of gas made; wages at 95c. per ton of coal amounts to $14.543.55 equal to 9.69 cents per thousand feet of gas made; salaries $2500 equal to 1.66 cents per thousand feet made; purification $1500 equal to 1c. per thousand feet made; wear and tear or maintenance $9000 or 6c. per thousand feet made; insurance $300, taxes $5500, together making $5800 equal to 3.86 cents per thousand feet made; sundries and general charges $5250.00 equal to 3.50 cents per thousand feet made, or the total cost into the holder per thousand feet made $44.859.70 equal to 29.89 cents per thousand feet made. At this point changing that into the cost per thousand feet sold the amount remains the same but it makes it 30.80 cents per thousand feet sold—the 29.89 made becomes 30.80 sold.

Then comes the distribution charges. Wages $8758.88 equal to 6c. per thousand feet sold; salaries $7282.40 equal to 5c. per thousand feet sold; wear and tear or maintenance $2767.31 equal

1900 to 1.90 cents per thousand feet sold; advertising, stationary, etc., $1092.36 equals 75/100 of a cent per thousand cubic feet sold; meter repairs $1369.44, or 3c. per thousand feet sold; in-

cidentals $2330.36 or 1.60 cents per thousand feet sold, or a total outlay up to consumers' meters of $71.440.45 equals 49.05 cents per thousand feet sold. That is the cost to consumers' meters on the basis of 150.000.000 feet made.

98. Proceed to make the application exactly as you did before if you have the figures?

A. The profit and loss showing on such a basis would be; expenses up to consumers' meters as previously given $71.440.45 equal 49.05 cents per thousand feet sold; 8 % on $434.252.35 would be $34.739.72, or 23.85 cents per thousand cubic feet sold; the receipts for gas sold, allowing a leakage of 450 feet per mile per day—the sales would represent 145.648.000 feet at 75c. per thousand $109.236.00. The two former items, expenses and 8 % dividend, deducted from that, leaves a margin of $3055.83, or 2.10 cents per thousand cubic feet, or 8 / 10 of 1 % on a capital of $434.252.35.

99. State whether or not in this deduction, to which you have just referred, you have made the same allowance for salaries, that is, salaries at the same rate as in your former deduction?

A. Absolutely the same all through; the only difference being the quantity of the output.

100. State whether or not you have made the application of those figures on the basis of an output of 150.000.000. to a capitalization of $400.000. in the place of the figures you have named?

A. With a capital of $400.000.00—which according to my first estimate I believe is ample for an output of 164.000.000.—the expenses up to consumers' meters, as previously given, would be $71.440.45 or 49.05 cents per thousand feet sold; 8 % on $400.000.00 would be $32.000.00 equal to 21.97 cents per thousand feet sold.

1901 Those two items deducted from the receipts for gas, which would be 145.648.000 feet at 75c. per thousand feet, would be $109.236.00 or 75c. per thousand feet, leaves a balance of $5795.55, equal to 3.98 cents per thousand cubic feet. The balance agreeing with the receipts.

101. You may state whether or not the figures you have given as showing the cost of production and distribution are fair, reasonable and the necessary sums to be expended for the purpose indicated.

A. I think so; I think everything is fairly covered.

102. You may state whether or not those figures cover everything in the shape of labor and material necessary to the production and distribution of the volume of gas testified about?

A. Yes sir.

103. State whether or not those figures, which you have given, are based upon manufacturing and distributing under normal conditions; that is to say, where no unusual conditions exist increasing or decreasing the cost of production or distribution?

A. I was assuming a make of 164.000.000. and 150.000.000. respectively. Now, as the consumption increases, the cost of production would diminish.

104. (Interrogatory # 103 repeated to witness.)

A. Yes sir; that is so.

105. Have you or have you not, in those figures provided for distribution in the usual manner of the whole of the make, that is, the 164.000.000. in one case and the 150.000.000. in the other?

A. Yes sir; except on the milage of mains.

106. State whether or not the 450 cubic feet per mile of mains which you have allowed for unaccounted for gas, is above or below the average for that item?

A. I think it is a fair item that ought to be attained and is attained in a great many well managed gas works and should
1902 be there maintained without any difficulty, especially in a new outfit. In a new outfit, of course, there should be less leakage than in an old one.

107. What is included under the term which you designate as leakage?

A. The better term would be, "Unaccounted for gas." Part of that arises from the gas being measured at a higher temperature on the works than it is measured at the consumers' meters; part from the condensation that takes place in the gas traveling through the mains; part from the consumers' meters, a percentage of them being slow or not registering the gas at all; part from the 10.000 joints in the street mains and services, sand holes possibly in the castings, defective welding in the service pipes and a great many causes of that sort which involve an amount of leakage that is more aptly described by the term, gas unaccounted for rather than leakage.

(The MASTER:)

108. As I understand you then this unaccounted for gas arises between the holder and the point of consumption?

A. Yes sir;—no, not all because the works station meter is prior to going into the holder and if that station meter happens to be in a warm location, or the gas has a short distance to travel along before it registers, that under some conditions, and in the summer time, the temperature may be so high the register will be a little higher, the gas will be a little more expanded than when it goes out into the mains in the streets, although in the larger works that is allowed for.

(Mr. TICHENOR:)

109. State whether or not among gas engineers there is an item of depreciation separate from the item of maintenance which is taken into account and, if so, in what manner?

A. Most gas companies in that respect are governed by the financial position in which they find themselves; every well managed gas company tries to get as liberal allowances for depreciation as they can, but there is another factor that must be
1903 brought into consideration. In most places especially in growing places, the depreciation from a growing business is more than a setoff to the depreciation of the works; that is a thing, which to

the credit side is often lost sight of; the appreciation in a growing locality is so great that it more than offsets the depreciation in the works.

110. Please explain in detail how the increase in production and consumption offsets the profit and loss account?

Objected to as incompetent, immaterial and irrelevant.

A. In this way. There are certain fixed charges that will be practically the same regardless of the output within certain limits. For example, a foreman of a small works must be a competent man, capable of handling the business, and if that company manufactures only 100,000 cubic feet per day that foreman will get pretty nearly as much money as he would get in a works making five times that amount of gas, consequently if you divide the foreman's wages by the thousand feet of gas made it is ten times as much in a smaller works as in a large works; the engine driver can just as well drive an engine passing 500,000 cubic feet of gas an hour, as he can an engine with four horse power passing 15 feet an hour, consequently the cost of production is enormously decreased by the increase in the output.

111. How would it be with reference to the general manager's salary?

A. The same way; all the fixed charges will be affected in a similar way.

112. In the case you have stated did you mean ten times greater or five times greater?

A. I said in the one case if it were one hundred thousand as compared with ten, of course, it would be ten times greater; the same with taxes.

1904 113. I understood you to make it one in five. Do you know the rate of increase in population in the city of Peoria as shown by the record in this case during the past 20 or 30 years?

A. Yes, so far as the record is concerned, I do.

114. State whether or not that increase in population is sufficient in your judgment to increase the cost of gas production and consumption sufficiently to take care of the item of depreciation to which you have referred?

Objected to as incompetent, irrelevant and immaterial and not applicable to the record in this case.

The MASTER: The witness may answer subject to the objection.

A. I believe it would judging from the comparatively rapid increase in population there would be a greater increase in the output of gas because it is a wellknown fact, established beyond any question, that the consumption *per capita* is larger as a place grows larger. For example, in a small town the consumption *per capita* of population may be perhaps a few feet or less per annum; the county town, or State capital, or large place may run up perhaps to 3000 or 4000 feet *per capita* of population per annum. Taking the

population of a place, if a gas man wants to find out what the consumption is, he asks what is the population of your place, and he will take the entire population and figure it, with such a population the annual consumption should be about so much, if he is familiar with the records of gas companies; that consumption will vary from less than one thousand *per capita* up to probably 7000 *per capita*, the reason being in the smaller place there is very little business done after six o'clock and in larger places later hours are in vogue; some places use light for advertising purposes; you go to a metropolitan city and you find a blaze of light all night consequently the longer hours of consumption in large places involve a very much larger *per capita* consumption, varying from 1000 feet *per capita* of population up to 7000, and in some cases
1905 possibly higher. I can give you the actual consumption in a great many places if you desire it.

115. State whether or not in connection wtth your business for many years as a gas engineer you have given any attention to the prices of gas stocks and particularly with reference to the rates of dividends being earned?

Ans. I have.

116. What is the value, if you know, of gas stock earning a dividend of 8 %?

Objected to as incompetent, immaterial, irrelevant and not based on the investment in any sense, or on the record in this case.

The MASTER: I do not think it material; I do not think that line of inquiry material or in any way tending to establish the cost of the manufacture or distribution of gas in any sense of the word.

Mr. TICHENOR: I should like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. I have never known a company able to pay an 8 % dividend whose stock was not at a considerable premium and sometimes at a pretty high premium. I know of companies paying a 10 % dividend whose shares have been for years past never quoted at less than $110 or $112, that is to say, $100 worth of shares would average $212.

Complainant objects to the answer for the same reasons the question was objected to and moves the court to exclude it.

117. State whether or not that ratio obtains substantially where the dividends are greater or less?

Objected to same grounds as before.

A. Well, the price of the shares are necessarily governed by the current value of money; if money is low the shares that are paying good dividends will necessarily average a higher price; they adjust themselves constantly and entirely in accordance with the money market the same as any other commodity.

1906 118. State whether or not it is practicable in a territory the size of Peoria to furnish coal gas at a nearly uniform candle power of 18 at consumers' meters?

Objected to as incompetent, immaterial and irrelevant.

A. I should say it was no difficulty whatever.

119. What change, if any, in candle power in the distance in question in this case, would there be from the holder to the point of consumption?

A. That would be governed by two things; First, the season of the year and consequently temperature; second, by the size of the mains. In summer time there would be very much less condensation than in the winter time. On the other hand, if the mains are large so the gas can pass through without undue friction there would be less deposit. Those are the two principal causes where the diminution of illuminating power comes between the holder and consumers' meters.

120. What, in your judgment, would be the maximum variation in the territory mentioned under extreme conditions of cold weather?

A. Well, I should not expect to find more than ¾ of a candle to one candle between the works and the extreme point of delivery.

121. What would be the expense of raising 18 candle power gas to 19?

Ans. About one to one and a half cents per thousand cubic feet; it can be done for less than that, but that would be a safe estimate and I might as well explain here that there are two methods of doing that; by enriching water gas it can be done very well for 1½ cents, if it were done with benzole, enriched by vaporing the gas with benzole vaporing as it leaves the works it could be done for perhaps a little less than one cent per thousand feet.

122. What, if you know, is the difference in illuminating power between coal and water gas of any given candle power?

1907 A. I do not understand that question, sir;

123. I will put the question in another way. What candle power of water gas is necessary to produce the same illumination as 18 candle power coal gas?

A. Well, 18 candle power gas is 18 candle power gas whether it is coal gas, water gas, oil gas, natural gas or anything else. 16 or 18 candle power gas is of that intensity regardless of its surroundings of production; 24 inches is 24 inches whether measured by a 24 inch rule or a two foot rule.

124. To what extent, if at all, does electrolysis imperil a gas plant, or operate as a hazard to the industry?

A. So far as my personal experience is concerned I think it has been greatly exaggerated; I have never come across a single case of injury in my own personal observation; I have seen some cases that others have met, but I have never come across a case yet I could attribute to electrolysis.

Objected to as incompetent, immaterial and irrelevant.

The MASTER: I do not see the materiality of it now, but it may become material; the witness may answer subject to the objection.

A. Varying from $3.20 to $3.50 per net ton, depending upon the location of the place; take such places as New Haven, Boston, Providence and Bridgeport—any of those places on the seaboard and about $3.19 to $3.20 would be a fair price; if you go inland it costs a little more than that because there would be the railroad freight added to the cost at the seaboard.

Cross-interrogatories by Mr. RITCHER:

1. You testified this morning with regard to the hazards of the gas business with reference to the changes which may have occurred during the last 25 years. Do you consider natural gas, where it occurs in quantities sufficient for supplying a city, a hazard of the gas business?

Ans. To some extent.

2. Where it occurs in quantities sufficient to supply the district or city where it is found, is it not a serious menace to the coal gas business?

Ans. Yes, under such conditions, of course.

3. How about the competition of electric light with coal gas as an illuminant, compared now as compared with 25 years ago?

A. I think it has been to increase gas.

4. Is it a hazard of the gas business in your judgment?

A. No.

5. Referring to electrolysis as a hazard of the gas business, do I understand you to say that a service pipe would not be attacked by electrolysis unless there was a wire from the tracks down to the service pipe?

A. You misunderstood me if you drew that inference.

1910 6. What did you mean by "the wire taking the current"?

A. I used that as an illustration as to how the current might get astray from the rails to the gas pipe and so-called electrolytic action result.

7. Is electrolytic action caused in no other way?

A. Only by the current; I know of no other way.

8. Does not the current pass without the medium of a wire or other metal-ic conductor from there the current exists to the pipes of a gas company?

A. Certainly not unless they are sufficiently near for the resistance to be insufficient to prevent the escape.

9. That would be true if there was a wire there—the current would take the line of least resistance?

A. Certainly, that was why I used the wire as an illustration.

10. I understand in your personal experience you have never observed any electrolytic action?

Ans. That is true.

Complainant objects to the answer so far as it relates to the personal experience of the witness and moves the court to exclude it.

The MASTER: No, I think that answer may stand; it is responsive to the question; as to what weight it is entitle- to will be determined hereafter.

125. Speaking from your knowledge of the subject as a gas engineer and outside of your own personal experience, what importance should be attributed to the question of electrolysis so far as pertains to its injurious or possibly injurious effects on gas plants?

A. I don't think it an important matter at all.

126. In a former answer you referred to cases presented to you by other gas engineers showing the results of electrolytic action Do you know of your own knowledge, from investigation or otherwise, that the results which you saw were actually from electrolysis?

1908 A. I had no means of knowing, but I had no reason for doubting.

127. What are your reasons for saying that in your judgment the question of electrolysis is of minor importance considered as a hazard to the gas industries?

A. First, because the leakage is a loss to the electric companies and they seek to curtail that loss at every point; it is a financial disadvantage to them and they do all in their power to return the current by efficient bonding and otherwise to save that loss; secondly, where the gas companies have discovered it even in very small degree they have charged it to the electric railways and electric light people and in some cases, I believe, have recovered damages, and therefor-, there are great efforts on both sides to restrict it to the smallest degree.

128. Where in the distributing system or in the piping is any such damage possible, and what are the conditions which make it so?

A. There are two points where damage comes from electrolysis; first, to the service pipes crossing from the main under the railway tracks, in some cases, where the ground has been made up; perhaps there may be a length of iron wire, perhaps a discarded telegraph wire, or something, which may have been dumped in a trench which forms a connection from the rails or close to the rails down to that service pipe; second; where the mains join; the pipes come end to end and sometimes there is a short distance where they don't touch and lead is interposed, and as the current is passing along from one pipe to the other the difference in the resistance sometimes causes electrolytic action that operates upon the lead and causes a leak around the joint. Those are the two main sources according to my experience and investigation as developed, as to loss from electrolytic action.

129. Do you know the cost of gas coal delivered in the yards in the different towns in the State of Massachusetts?

1909 A. I know the cost in some of them.

130. What is it?

11. Then your statement as to the circumstances under which it would occur is from hearsay?

A. No it is not; it is common sense.

12. Purely theoretical is it not?

Ans. No it is not.

13. Have you ever observed any electrolytic action in your personal experience?

Ans. No.

14. I think you testified the average life of a gas plant was from 20 to 25 years, did you not?

Ans. I did.

15. In the case you mentioned where you rebuilt a plant, was that due to the fact the plant had become destroyed through use?

A. No, renewed chiefly through growing capacity?

16. It is a fact, is it not, that one of the causes for rebuilding and reconstructing plants which occurs more frequently than any other, is the change in conditions requiring a reconstruction of the plant?

Ans. Yes sir;

1911 17. And that frequently occures long before the plant would otherwise have been worn out, does it not?

A. If a man knows his business he expects that and provides for it at the start.

18. In your judgment the foresight of a gas man should be as good as his hind sight?

A. No, I would not put it that way, but I say he ought to have foresight.

19. And in your testimony in this case you have proceeded on that assumption?

Ans. I have.

20. In addition to the ordinary wear of a gas plant and distributing system, it is a fact, is it not, that there are often local conditions which tend to depreciate the main system. For instance, such as the construction of sewers by the city or the laying of other pipes by companies not connected with your own, which disturbs the soil in the vicinity of your pipes?

A. Yes, but that belongs to all places; it is not exceptional to any one locality; it is universal.

21. That is one thing that might cause depreciation which foresight could not always provide against, is it not?

A. No, but that is universal; every gas man knows he has to face it.

22. The changing of grades by a city has the same effect, does it not?

Ans. Yes sir;

23. What care is necessary in handling the retort house of a gas company so as to avoid the burning out of the retorts by the heat coming off or other like accident?

A. Your question is a little indefinite for me to answer; I would like to have you make it clearer.

24. What would happen if the heat of the retorts was permitted to go down very suddenly and very appreciably?

1912 A. I guess the foreman of the retort house would get Hail Columbia.

25. Would the retorts themselves suffer?

A. Yes sir; extremes of heat or cold of neccesity would injure them, consequently the object is to keep the heat uniform as nearly as possible.

26. In case of any neglect on the part of the foreman, or on the part of any other employé who has charge of the retorts, great damage might result in a night, might there not?

A. You are asking me what might occur; I cannot say what might occur.

27. (Interrogatory 26 repeated to witness?)

A. I could not say; I cannot answer.

28. In other words then, neglect on the part of any of the employés of a gas company would not effect the depreciation of the plant in your judgment?

A. It might may be but I could not tell you to what extent; neglect is such a broad word.

29. If the retort house force got drunk and went off and left the retort house, would it damage the plant?

A. It might; it would depend on whether other men could be had to take their places.

30. If there were not others would it not ruin it?

A. I cannot answer a hypothetical question of that sort.

31. You are here to answer hypothetical questions and you answered them for counsel for defendant, will you not answer them for me?

A. I will if I can; there might be damage; I could not say to what extent.

32. What element of risk is there in an explosion which may occur at a gas plant or in its mains?

1913 A. I regard it as very slight.

33. Explosions do occur, do they not?

A. They do occur occasionally—semi-occasionally.

34. It is a fact the seals blow off in a gas house sometimes?

A. Yes sir.

35. If the house gets filled with gas and air mixes with it it forms an explosive vapor, does it not?

A. Yes, anywhere that gas and air get mixed it is the same; it is not confined to a gas works.

36. You spoke about having six purifying boxes. Is it not a fact that the tendency during the past four years or five years has been to two boxes rather than to even four?

A. Not in my experience; not in my observation.

37. What experience have you had in the last 3 years in that connection in the construction of gas plants?

A. None in the last 3 years, but in order that I may not be mis-

understood on that, in my judgment I think the very reverse of what you state is the fact to-day; I think the tendency is in the very opposite direction from that which you state.

38. Even during the period in which you have had no experience?

A. Yes, no personal experience, but I speak of my knowledge from the records of the business.

39. You have testified in regard to the greater economy of handling benches of 6's as compared with benches of 9's, owing to the fact you could shut down a bench of 6's with greater economy than you could a bench of 9's, if occasion required?

Ans. Yes sir;

40. As a matter of fact whether it would be more economical to manage benches of 9's or 6's could only — demonstrated by a year's run, or some period of running, showing what the actual experience was?

A. I beg your pardon, it would be demonstrated by common sense reflection.

41. Suppose the requirements of a certain city required 1914 the running of one bench of 9's and you had a bench of 6's, how many benches of 6's would it require to furnish what one bench of 9's would furnish—would it not require two benches of 6's?

A. It would; but you cite an impossible case—an utterly impossible case.

42. If at the end of a year's run the record showed that there was no variation in the demand for gas, where a bench of 6's would be of better coefficiency than a bench of 9's, then there would be no advantage in a bench of 6's in that regard, would there?

A. I cannot get at the meaning of your question.

43. (Int. 42 repeated to witness.)

A. Of course, if the record showed there was no difference there would be no difference; that is all there is to that.

44. In your estimate as to the cost of building a plant in the city of Peoria having an output of 750,000 cubic feet per day what did you estimate as the cost of the mains?

A. $125.108.73 for 26½ miles.

45. What did you estimate as the cost of the manufacturing plant?

Ans. $225.000.00.

46. What did you estimate as the cost of the services?

A. $20.631.20.

47. How many services did that cover?

Ans. 1758.

48. Of what length?

Ans. An average of about 50 feet.

49. What did you estimate the cost of the meters to be?

A. $13.451 00.

50. How many meters did that cover?

Ans. 1758.

51. Did that include the cost of placing the meters?
Ans. Yes.
52. How much did you allow for placing each meter?
A. $7.65, setting up—an average of the whole lot.
53. What was the cost of the tools and implements used in the construction of the plant?
1915 A. I included that in every item; each item would cover the cost of tools in connection with that particular job.
54. What sized meters did you cover in your estimate?
A. 413-3 lights; 1217-5 lights; 93-10 lights; 12-20 lights; 14-30 lights; 6-45 lights; 1-60 light; 1-100 light and 1-150 light.
55. What did you figure the cost of the 5 light meters at?
A. $6.34, setting up $1.50, or $7.59 set up.
56. What did you allow in your estimate of the cost of erecting the plant and mains for the salaries of officers, accounting expenses etc., during the period the plant was being erected?
A. Every item here includes all charges belonging to it.
57. Well, take each item and tell me what you allowed for such services then.
A. I included that in salaries; if the company had an engineer that engineer should be able to design all the work.
58. What did you allow for salaries in the cost of erecting that plant?
A. I have put about 5 % on the cost of the work.
59. Did you do that in your computation?
Ans. I did.
60. What was the cost of the main system before you had added that 5 %?
A. It would be 5 % less; I can work that out for you if you wish it.
61. Did you estimate the cost of these different items I have asked you about and then add 5 % to each item?
A. In making up my price I have added for supervision in each case as a separate item.
62. Have you your figures before you where you added that 5 %?
A. No sir; but it is part and parcel of the estimate of the mains.
1916 63. Then you did not add it, it was part and parcel of your estimate in the first place?
A. Yes sir; when I made up my estimate of the cost of mains I took first, my trench, then the pipe, the lead for joints, the labor in joints and everything else, then supervision and also contingencies, and the total formed my cost per foot laid.
64. Where did you calculate to buy this main pipe for this ideal plant you built in Peoria?
A. I would buy the pipe at the nearest point of manufacture.
65. Where would that be?
Ans. I presume probably in Chicago.
66. What was the price of 16 inch pipe f. o. b. Chicago, in 1899?

Ans. I suppose about $26 per ton.

67. What was the freight rate you figured on from Chicago to Peoria?

A. I did not figure it in that way; I only figured on what would be the cost of mains laid; we have to get our mains here at different distances the same as they do there.

68. Did you make any allowance for freight to the point where those mains were delivered?

A. I assumed $26 per ton at Peoria.

69. Are the prices of mains the same all over the United States irrespective of freight rates?

A. No sir; I bought them at $19 in 1897, here in this city—hundreds of tons of it.

70. Did you in 1899?

Ans. No sir.

71. Confine yourself to answering my questions and it will not be necessary to get back where iron was cheap. What did you allow for interest on the sum invested in that plant during the process of construction?

Ans. Nothing.

72. What did you allow for insurance during that period?

A. Insurance of what?

1917 73. Anything connected with the construction of the plant you are talking about?

Ans. I would not consider any insurance necessary.

74. What did you allow for rental of office or other headquarters during that period?

A. I allowed nothing for I did not take that into consideration.

75. What did you allow for legal expenses, organizing the company and attending to local contracts etc., during the construction of the work?

Ans. Nothing.

76. What did you allow for gas coal during that period for testing the plant and firing up and getting ready to deliver gas?

A. Nothing.

77. What did you allow for generator fuel during that period?

A. For what?

78. For starting up your plant and getting ready to run?

A. You have asked me that question before.

79. I beg your pardon. What did you allow for boiler fuel?

A. There is no boiler fuel until you begin running.

80. Don't you have to fire your plant up to get ready for running before you commence to deliver gas to consumers?

A. I don't know what you would want steam for.

81. What did you allow for fuel under the retorts?

Ans. Nothing.

82. What did you allow for gas coal in the retorts?

A. Nothing.

83. What did you allow for manufacturing labor and supplies during that same period?

Ans. There are none.

84. Don't you have to heat up your benches before you begin to deliver gas?

A. You asked me for manufacturing supplies before you were manufacturing—there are none.

85. Don't you have to make gas before you can sell it and
1918 test your works?

Ans. Yes, of course, you do.

86. What did you allow for the cost of the service pipes themselves—the material?

A. I took an average of 1½ inch pipe—assumed that as an average; the 1½ inch pipe I put at 5½c. a foot.

87. What did you allow for labor in laying those pipe?

A. I think it was 14 cents for trench and labor and everything complete, making the cost of the services about 19 cents per foot laid.

88. Where did you expect to purchase those service pipes in the spring of 1899?

A. Of the makers; either the National Tube Company or the Riverside Steel Company.

89. Where is the Riverside Steel Co., located?

A. At Wheeling, W. V.

90. Do you know what the freight is from Wheeling to Peoria?

A. No sir.

91. Did you take that into consideration in fixing the price of the service pipe?

Ans. No, I did not.

92. What were the size of the mains in the plant you said could be erected for $400,000?

A. 1758 feet of 16 inch; 20.768 feet of 12 inch; 3482 feet of 10 inch; 20.224 feet of 8 inch; 12.874 feet of 6 inch; 80.852 feet of 4 inch.

93. What price did you allow for your pipe—the different sizes?

Ans. All based on $26 per ton.

94. What did you allow for the labor of laying those mains?

A. Labor consists of two things, joining and trenching; the joints I allowed 5c. per foot and trench 22c. per foot on the 16 inch main. You see there is one joint every 12 feet.

95. Go on with the other sizes?

1919 A. 12 inch, jointing 4½c. per foot, trench 20c. per foot; 10 inch, jointing 2½c. per foot, trench 20c. per foot—the trench varies a very little according to the size of the main—8 inch, jointing 2.4 cents per foot, trench 17 cents per foot; 6 inch, jointing 1.8 cents per foot, trench 14 cents per foot; 4 inch, jointing 2c. per foot, trench 12c. per foot.

96. What do you mean by trench?

A. The digging, cutting and filling in the trench again.

97. Does that cover replacing pavement?

Ans. No sir;

98. Have you made any allowance for replacing pavements?

A. Yes sir; an average of $2 per square yard. for all surface uncovered.

99. How much surface did you estimate as being uncovered?

A. 39.945 feet—that pertains to the mains only understand, not services.

100. What did you allow for the services?

Ans. 6090 feet.

101. How much coke is produced per ton of coal carbonized under the figures you have testified about in your direct examination?

A. About 1250 to 1300 pounds.

102. How much of that coke would be used as fuel in the estimate you gave in your direct examination in producing gas?

A. From 20 to 25 %. In other words, I have allowed 1050 pounds for sale from every ton of coal produced.

103. As a matter -f fact if you take your highest figure of 1300 pounds carbonized and deduct 25 % it would leave 975 pounds?

A. Yes sir; if you take the two extremes.

104. I gave you the benefit of the highest figure, if you take the other figures you make it 925 pounds?

Ans. Yes sir;

105. Of the portion left, whether 925 pounds or 975 pounds, as you prefer, is it not a fact that there is about 100 pounds of that which is so fine you cannot get $3.25 per ton for it?

1920 A. No. As a matter of fact even more than 1050 lbs. is sold.

106. Is all the coke produced of a uniform grade?

Ans. No.

107. Is there any fine stuff in it that is not salable?

A. Yes.

108. The figures you speak of as more than 1050 lbs. sold—is that per net ton?

Ans. Per net ton.

109. How much breeze would you get out of that 1250 or 1300 lbs. of coal?

A. That would depend on a lot of conditions; the quality of the coal and the temperature at which it is carbonized.

110. How would it vary?

A. Probably 10%—no, not 10%—5% possibly.

111. What does breeze bring in the market when coke brings $3.25?

Ans. That depends upon local conditions; some gas works use the breeze for their own boilers in which case it is equal to the value of coke.

112. How much coke would be used for heating benches per ton of coal carbonized?

A. That depends upon the size of the benches.

113. In benches of 9's?

A. It would take from 20 to 25% of all the coke pr ·ced.

114. How much would be used for boiler fuel?

A. In a majority of cases the breeze that cannot be sold is used for boiler fuel.

115. If the breeze you speak of amounts to 5% of the 1250 or 1300 pounds, would that be sufficient for boiler fuel?

Objected to because the witness has not testified to anything of that kind; he simply said there was a variation in the quantity of breeze produced.

The MASTER: The witness fixed the average breeze produced at 5%. Now, the question is whether or not that 5% would be
1921 sufficient for the boiler fuel?

A. I think it would be a great deal more than sufficient and in addition they would have some for sale if they had a market for it.

116. Referring to the works where you say there had been more than 1050 pounds of first class coke for sale per net ton of coal carbonized—are those works small or large works?

A. Large works; when I say large works probably of 150,000,000. to 200,000,000, or thereabouts; I don't mean small works because in small works the percentage of fuel is very much larger.

117. In these 6 retort benches you speak of as the kind you would construct, what sort of retorts would you have—describe the nature of the retort itself?

A. Fire clay retorts of course.

118. About how large?

Ans. That would be a matter of choice.

119. You have stated that a certain plant you had in mind would cost so much money—I want to know what sort of retorts you were speaking of?

Ans. I should put in 21 x 15.

120. Would they be horizontal or inclined?

A. Horizontal. We speak of a retort by its height and width the length is almost uniformly the same, but there is a difference as to the area, the size and width of a retort.

121. In your estimate of the cost of putting gas into the holder at Peoria, you took gas coal at $2.80 per ton?

Ans. Yes sir.

122. Was that f. o. b. or in the yards?

A. Standing in the cars alongside.

123. And you allowed, if I understood you, 95c. per ton for the labor?

Ans. I did.

124. What did that cover?

A. That covered taking the coal from the cars and all labor pertaining to it until the coke is loaded onto the vehicle that takes it to the gas works—cars or wagons, as the case may be.

1922 125. Would that cover taking the coke into the sheds and piling it up when you have no immediate market for it?

Ans. Certainly.

126. What is covered among gas engineers by the expression, "labor of carbonizing"? Does that cover unloading from the cars?

A. Certainly; you cannot carbonize it unless you get it off the cars.

127. Nor you could not carbonize it unless it were mined. Does it cover the mining of the coal?

Ans. No.

128. What would it cost per ton to unload coal from the cars and put it in the sheds?

A. That depends upon the local facilities.

129. What do you allow for that in the estimate you made?

A. I allow to lay out my work so I could have the cars by the side of the sheds; that would probably mean seven or eight cents a ton to unload.

130. If your works were so constructed, the circumstances such, you could not take the coal from the cars for immediate use, but had to pile it in the yards—you have not covered that in your estimate have you?

Ans. I have covered storing coal, certainly.

131. What do you allow for putting it into the yards and piling it?

Ans. I told you 7 or 8c. a ton would cover that.

132. Would it make no difference whether it was taken directly from the car for use from the side of your works, or first piled in the yards and then taken from the yards?

A. Certainly, there would be a second handling.

133. What would that cost over taking it from the cars?

A. In the 95c. per ton that is included; no gas works can run without doing what you have described and the 95c. per ton is sufficient to cover all those expenses.

134. I understood you to say you would construct your works so you could run the cars on the side of the works and dump
1923 the coal from the cars?

Ans. Into the storage shed.

135. And you allow 7 or 8c. a ton for that?

A. Yes, for putting it in storage.

136. How much do you allow for taking it from storage to the retort house?

A. The retort men fetch in their own coal; that goes into the retort men direct.

137. How many retort men do you allow per bench of 9's?

A. I never run benches of 9's.

138. How many retort men do you allow to benches of 6's?

A. One man to a bench of 6's.

139. What is the duty of that man?

A. To bring in his coal, charge his retort and take the coke out into the yard.

140. And also tend to the fire and quench the coke?

A. Yes sir; he quenches the coke before he takes it out of the house.

141. Yes, I know that. How many tons of coal would a bench of 6's consume in 24 hours?

Ans. About 1800 lbs. per retort; it depends on the number of charges; 300 lbs. to the charge, each retort working four hours, it would be 1800 lbs. for a retort.

142. So there would be about 10.800 pounds for 24 hours?

A. Yes sir;

144. What did you allow for superintendent of the plant under your estimate?

Ans. $2500—the half of his salary.

145. What did you allow for superintendent at the works?

A. That I have included in the 95c. wages; that is wages; that is not a salary.

146. How much did you allow for that in your wages? How much would the man get per month?

A. $2.50 per day as foreman of the works.

1924 147. How much did you allow for your stokers?

A. About $2 per day; $1.75 or $2 per day.

148. Would you have any head stoker?

A. There would be no necessity for that; sometimes the head stoker gets 25c. a day extra, but he takes the place of the engine driver and looks after the engine and there would be no engine driver in that case.

149. How many stokers have you provided for under your figures here?

Ans. That would depend on how much I was running.

150. Take your 164.000.000. estimate, or a maximum make of 750.000 per day, how many stokers would you have for that?

A. There is a difference between winter and summer; if I was making 750.000 feet per day I could figure it out and tell you what it would be; I could not tell you offhand. How many benches would you want?

151. Enough to maintain that output?

A. For 750.000, all right, about 72 retorts—12 benches; that would be 24 stokers—12 during the day and 12 at night.

(The MASTER:)

152. Do I understand you to say that is the number of stokers you figured on in arriving at the price of manufacturing gas?

A. For a maximum make; I am asked now for a maximum make of 750.000 cubic feet a day; it would take 72 retorts to do that—benches of 6's; it would require 12 during the day and 12 at night; of course in the summer time, when less gas was being made, it would be less in proportion. I have made a mistake I see. It should be 84 retorts and it will take 16 men during the day and 16 at night, assuming one man to a bed.

153. You have just testified as to the number of men it would require to man the retorts on the assumption of an output of 750,000 per day maximum output. Suppose that the average output was 750,000 per day but varied from day to day during the
1925 year, sometimes being more than 750,000, and sometimes being less than 750,000, as you have testified, would the cost of the retort labor be more or less than a uniform 750,000 output?

A. You are asking me an impossible question.

154. You are unable as a gas engineer to answer that question, are you?

Ans. As you put it certainly, because it is an impossible question.

155. Upon a like assumption would the cost per thousand cubic feet of gas produced be more or less?

A. For stokers' wages it should be proportionate to the number of retorts you have because when you drop a bed a man is no longer paid and when you light a bed you put another man on to work and it does not vary so largely from day to day.

156. (Interrogatory 155 repeated to witness.)

A. The cost per thousand would be practically the same but the amount paid would be less as the manufacture was reduced.

157. As the manufacture shifts don't you often have to keep a man to a bench when you are not manufacturing the full output of the bench?

Ans. Sometimes that occurs, yes sir;

158. But it is something it is not worth while taking into consideration is it?

A. Certainly all things are worth taking into consideration.

159. Does it amount to enough to be very material?

A. No sir; I think the year around will be covered by what I said.

160. It would not make much difference between benches of 6's and 9's in that regard, would it?

A. Except in small works you would have a greater wastage.

161. It would not amount to much though as you have just stated?

A. I think it would be considerable; you are talking of
1926 two things utterly distinct and you are mixing them up in a glorious way.

162. What allowance have you made in your estimate of the cost of gas in the holder for the care of the purifying house, or the care of the ammonia apparatus?

A. I have classsd that all in one as wear and tear of plant, or maintenance equal to 6c. per thousand cubic feet of gas made.

163. Would that cover the wages of any one who attended to those things?

Ans. Certainly.

164. The wages of a watchman at the plant?

A. No sir; that goes to wages; that has nothing to do with wear and tear.

165. Where is that in your estimate?

A. There is no such thing as a watchman in a gas works where there is a staff of men, perhaps a dozen working day and night.

166. Then you have made no allowance for that?

A. Certainly not; when you have 12 men working you don't need a watchman outside of the 12 men.

167. What allowance have you made for the wages of the men attending to the tar and ammonia?

A. That is part and parcel of the carbonizing wages.

168. Who does that?

Ans. The yard men or purifying men?

169. What do you pay the purifying men and the yard men?

A. $1.50 per day—laboring men.

170. How many of those would you have in an output of 750.000 cubic feet per day?

A. Probably one man continuously in the purifying house would be ample.

171. How many in the yards?

A. Probably two. Let me explain to make the thing clear. In changin- a purifyer, when it has to be done, the foreman collects odd men around the plants; he wants half a dozen to do that;
1927 he changes them once a week or once a fortnight and takes men from another gang and as soon as the change is made the men go back to other jobs.

172. Who attends to the engine?

A. Sometimes the leading stoker for which he gets 25c. a day extra and sometimes they have a special engine driver.

173. What would you pay that extra engine driver if you had him?

A. $1.75 or $2.00 per day.

174. Then in addition to the stokers you would consider three ordinary laborers at $1.50 per day, an engineer at $1.75 per day and a plant superintendent at $2.50 per day sufficient employés to take care of a plant putting out 750.000 cubic feet of gas per day?

A. Yes, I think that would be about right to cover it varying of course, from time to time as the increase or decrease came.

175. In a city of the size of 50.000 inhabitants and upwards what in round numbers *if* the quantity of gas sold per mile of mains?

A. That will vary depending upon the character of the locality; in a manufacturing district or closely compact district it would be larger than in a s-arcely settled district.

176. In a city like Peoria how much would be the amount of gas sold per mile of main?

A. From one and a half to one and three-fourths millions per mile per annum.

177. What would be the average amount of consumption per meter in a city like the city of Peoria?

A. About twenty thousand I should expect.

178. In figuring the cost of gas, as you have testified in your di-

rect examination, you figured that this 164.000.000 cubic feet of gas passed through 26½ miles of main, did you not?

Ans. I did.

179. And was distributed through something less than 1800 meters?

Ans. I did.

180. If, as a matter of fact, that gas was distributed through
1928 50, or 60 or 70 miles of mains, that would raise your estimate of leakage, would it not?

Ans. Certainly.

181. It would still be 450 feet per mile of main?

A. Yes sir; I was estimating on a condition, not any problematic condition.

182. Your estimate would hold good under the problematical question just asked you, would it not?

Ans. Certainly 450 ft. per mile.

183. If the meters through which that 164.000.000. of cubic feet of gas was distributed amounted to 7000 instead of something less than 1800, the item of repairs of meters would also be increased, would it not?

Ans. Yes sir; proportionately.

184. Calling your attention again to your estimate of the cost per thousand cubic feet of gas in the holder, distributing 164.000.000. cubic feet a year, and also of 150.000.000. cubic feet a year, I will ask you what would be the effect upon the cost per thousand feet, as to whether it would increase or decrease if the output was but 55.000.000. cubic feet per year?

Objected to as incompetent, immaterial and not cross-examination.

A. Of course, the cost per thousand would be increased.

185. About how much would it be increased?

A. I could not tell you without making a calculation and it would take me some time to do it.

186. Would that increase of cost be true both in the manufacture and distribution?

A. It would be as to the manufacture, but as to the distribution practically only as to leakage, or very little; there would perhaps be an increase in distribution.

187. It would require more expense in the accounting department, would it not, presumably to take care of an out of 164.000.000. and collect the bills, keep the books etc., than it would to take care of an output of 55.000.000. under the same general conditions
1929 as prevail in Peoria?

A. Certainly if the number of consumers increased a greater number of bills would have to be made out and the expense would consequently be increased.

188. In case the output of a plant, such as you have described in

the city of Peoria, was but fifty or sixty million cubic feet per annum, would a 300.000 cubic foot holder be a proper size?

A. No, I should think there would be an excess of capacity there, or unnecessary capacity.

189. In that case you would not build a holder of 563.000. cubic feet capacity?

A. Certainly, my estimate was given for a 750.000 cubic foot maximum daily capacity.

190. And this plant you have estimated could be built for $400.000 is the plant upon which you have based your estimate of cost, is it?

Ans. Yes, certainly.

191. And that was with a milage of 26½ miles, was it not?

A. Yes sir;

Re-direct interrogatories by Mr. TICHENOR:

1. Under what conditions was your estimate with reference to the cost of distribution based?

Objected to as amply covered in the direct examination and not proper redirect.

The MASTER: I do not know that I understand the purport of your question, Mr. Tichenor, but perhaps the witness does and he may answer subject to the objection.

A. On 26½ miles of mains as the conditions exist.

The MASTER: You have been all over that if that was what you were seeking to draw out.

2. To what extent, if at all, did you take into account the question of the cost of piping and freight rates in making up your
1930 estimate of the aggregate cost of the plant to which you have referred?

(Objected to as not proper redirect.)

A. In my estimate for the cost of mains everything was taken into consideration. For example, assuming the cost of pipe laid down on the place at $26 a ton—of course, freight and everything is included in that although I have not made a separate item of freight but it is assumed I got the mains at $26 per ton laid down at Peoria, the freight is taken into consideration but not as a separate item; usually gas companies buy their pipe delivered on board the cars in their own town.

3. Suppose the capacity of complainant's manufacturing plant is 650.000 cubic feet per day, what would be the proper sized holder to handle that capacity?

Objected to as not proper re-direct.

A. I should reckon to have at least 75% of the maximum capacity in storage and if I could get more so much the better; so,

taking ⅓ of whatever quantity you select as your maximum capacity—I should want at least that; if I had 24 hours' maximum capacity so much the better, but I would want at least 75%; with a water gas plant you could do with less, but we are talking about coal gas plants.

4. In one of your computations you made 150,000,000 cubic feet per annum the basis—why did you do that? Where did you get the 150,0000,000 which you made the basis of that computation?

Mr. RITCHER: We object to the question as immaterial; counsel for defendant asked the witness that question himself and I don't see why he wants to make this witness a mind reader and find out why he was asked that.

The MASTER: I think I would like to know myself why he did that, or what was the necessity of doing it; he may answer the question subject to the objection.

1931 A. That was a hypothetical case to see what the difference would be as compared with the 164,000,000. cubic feet per annum.

(The MASTER:)

5. Why didn't you take 130,000,000. instead of 150,000,000.?

A. I might have taken any quantity but I simply took 150,000,000.; I might have taken any other quantity; it was simply to see what the difference was in the cost and the working results on a smaller sized operation.

(Mr. TICHENOR:)

6. Do you know what the output of the two Peoria companies was last year?

Objected to as incompetent, immaterial, having nothing to do with the issue here and not proper re-direct.

The MASTER: I do not think it proper re-direct.

Mr. TICHENOR: I don't think it is either; I ask it as an original question.

The MASTER: The witness may answer subject to the objection.

A. I do not.

7. Do you know what Brown's Directory states as the output of the Peoria companies for last year as appears in the issue of 1902?

Objected to same grounds and also as not the best evidence.

A. So far as my memory serves me the directory states it was 150,000,000 for the new company and 70,000,000, I think, for the old. Brown's Directory is here and I can refer to it.

8. I wish you would refer to the directory?

A. Come to think of it I believe that was the reason I took 150,000,000, because Brown's Directory gave it at that. (Witness referring to Brown's Directory.) The Peoria Gas-Light & Coke Co., is

given here at 100,000,000 and the other at 50,000,000, the two together making 150,000,000. That is it—150,000,000 was the consumption of the town and that was what I had in mind.

1932 9. You may state whether or not as the production varies from time to time the cost for retort labor per thousand cubic feet remains substantially constant?

Objected to as not proper re-direct being fully covered on direct examination and the witness was cross-examined on it.

A. Yes sir;

10. In answering a question propounded by counsel for complainant with reference to the size of plants which had produced more than 1050 pounds of coke per ton of coal for sale, you referred to those plants of 150,000,000 or 200,000,000 and upwards—did you mean 150,000,000 cubic feet or 200,000,000 cubic feet per annum output?

A. Certainly, the reason being so as to make the thing clear that a greater mass of retorts heated together mutually assist each other in the heating there being less percentage of cost by radiation, less fuel consumed per bench and consequently more left for sale; if you have one bench only heated you have two cold sides and two ends, if you have forty you have only two cold ends.

11. In a town the size of Peoria and covering the area it does, consuming 164,000,000 per annum, can you tell about how many meters would be in use under normal conditions?

A. I would have to divide the 164,000,000 by 20,000—that would be under normal conditions; that would be giving it in round numbers approximately.

12. Did you take that into consideration in making up your estimate of the cost of distribution?

Objected to as not proper re-direct.

A. No. I took the cost of distribution as I found the conditions; you see I have only taken the leakage at 450 feet per mile on 26½ miles; I have not taken the leakage on what does not exist before me or the interest on mains other than the 26½ miles.

Re-cross-interrogatories by Mr. RITCHER:

1933 1. In a plant having an output of 150,000,000 per year would 1050 pounds of coke be an average yield, or maximum yield?

A. I think it would be an average.

2. Suppose the sales were 50,000,000 feet of gas per year, what would the sale of coke be?

A. It would be less than that, of course.

3. About how much?

A. I could not answer that question, but I can explain that by saying there would be a larger percentage used for fuel in a small works.

(The MASTER:)

Q. I don't understand from what source you assume your figures in computing the 26½ miles of mains in Peoria you take the arbitrary price of $26 per ton for the iron pipe—why do you take $26 per ton for the iron?

A. That is the latest quotation I know of.

(The SAME:)

Q. You take the present market quotation?

A. Yes sir; I have also explained that I bought iron in 1897 as low as $19 a ton; I have taken $26 per ton as the current price.

Questions by Mr. TICHENOR:

Q. How did the cost of iron pipe in 1899 and 1900 compare with the cost at the present time, if you know?

A. I don't think it has varied more than a couple of dollars at a time; I could not answer that.

Q. Do you know whether it was higher or lower?

A. I could not tell that because for the past three years I have not bought any.

Q. My question was aimed at the prices in 1899 and 1900?

A. I think $26 per ton would amply cover it at that time.

Q. Then as I understand you there has been a heavy advance in iron pipe since 1897?

A. Certainly because in 1897 I bought it at $19 per ton.

Adjourned to meet on notice from the special commissioner.

1934 United States circuit court room, Government building.

PEORIA, ILLINOIS,
SATURDAY, *August* 30, 1902—10 o'clock a. —.

Parties met pursuant to notice by the special commissioner.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin and Mr. E. C. Ritcher appearing for complainant. Mr. Henry Mansfield, city attorney, appearing for defendant.

The MASTER: I have made a careful examination of the secretary's book, including the sealed as well as the unsealed portions of the records which were offered in evidence the other day by the defendant, under the stipulation of counsel appearing in this record, the same being objected to by counsel for complainant, and I have come to this conclusion as to the admissibility of the records.

I think the objection should be sustained to all the proceedings of the board of directors appearing on pages 6 and 7 of the record and the same excluded.

I think the proceedings appearing on pages 8 to 12 inclusive and the two first lines on page 13, are admissible and the objection will be overruled.

I think the proceedings appearing on page 21 relating to stock assignments etc., are admissible and the objection will be overruled, the balance of the record of the meeting of January 2, 1900, appearing on pages 14 to 21 inclusive, except that part I have just admitted relating to stock assignments etc. appearing on page 21, I think is inadmissible and should be excluded and the objection sustained.

The proceedings of the special stockholders' meeting appearing on pages 22 to 26 inclusive, I think should be excluded as inadmissible and the objection sustained.

The proceedings appearing on pages 27 and 28 I think are admissible and the objection will be overruled.

1935 The proceedings of the board of directors appearing on pages 29 to 40 inclusive I think are inadmissible and the objection to that portion of the record will be sustained.

The proceedings of the board appearing on pages 41 to 54 inclusive I think are admissible and the objection will be overruled.

The proceedings of the board appearing on pages 55 to 77 inclusive will be excluded and the objection sustained.

The proceedings of the board appearing on pages 78 to 80 inclusive I think are admissible and the objection will be overruled.

The proceedings on page 81 I think are inadmissible and as to such proceedings the objection will be sustained.

I have gone over this secretary's book very carefully and some of the sealed portions of the record I have admitted because I can see how it might have a bearing on some of the issues in this case. I have admitted every portion of the record that in my judgment was admissible or material under any issue in this case.

Mr. MANSFIELD: The defendant excepts to the ruling of the master in excluding any portions of the secretary's book offered in evidence.

Mr. RITCHER: I make the point that the exception is improper under the stipulation contained in this record.

Such portions of the secretary's book admitted in evidence by the master are in the words and figures following, to-wit:

1936 Called meeting of the board of directors of the Peoples Gas and Electric Company, held at the office of Harlin & Miller, 211 Main street, in the city of Peoria, Illinois, on the 8th day of May, A. D. 1899.

Present: Sumner R. Clarke, president; T. J. Miller, secretary and treasurer; B. Warren, Jr.; O. J. Bailey; Frank T. Corning; J. H. Littlewood, and P. B. Miles.

The meeting was called to order by Sumner R. Clarke, president, who announced that a quorum was present for the transacton of business.

The minutes of the last meeting of the board held at the office of Irwin & Slemmons, in the Niagara building, on the 20th day of March, 1899, were read and on motion approved.

The president then reported that the officers had proceeded to carry out the purposes for which the company was organized; had secured the petitions of property owners along a large portion of the streets, avenues and public highways in the city of Peoria to grant to the company the right to lay gas mains and distribute gas for light, heat, fuel and power purposes. * * *

That in pursuance to the prayer of said petitioners, the company had made application to the city council of the city of Peoria for licenses and franchises for such purposes.

And that in pursuance to such petitions and applications, the city council of the city of Peoria, Illinois, duly passed and adopted
1937 an ordinance entitled, "An ordinance granting the Peoples Gas and Electric Company the right to lay gas mains and poles and distribute gas in and along the several streets and highways in the city of Peoria, Illinois;" which ordinance was duly adopted by the city council of the city of Peoria, on the 18th day of April, A. D. 1899, and thereafter duly approved by John Warner, the mayor of said city. * * *

That in pursuance to the provisions of said ordinances, the president and secretary of the company had duly caused to be executed in the name of said company, proper acceptances of said ordinances and filed with the city clerk and comptroller of said city, as therein required; and also had caused to be executed in the name of the company, with good and sufficient sureties thereon, bonds payable to the city of Peoria for the amounts and conditioned as in said respective ordinances required, and also had deposited with the city treasurer of said city the sum of five thousand dollars in cash, as an evidence of good faith in the acceptance of said gas ordinance contract, on the conditions as required in said ordinance.

And the president asked that the same and all acts of the officers of the company in connection therewith be approved by the board of directors.

Mr. O. J. Bailey moved that the board of directors approve all acts of the officers of the company in securing said ordinances, franchises and licenses, and all other acts done or caused to be done by such officers necessary in compliance with the terms of said ordinances to make the same a binding contract between the City of Peoria and the Peoples Gas and Electric Company.

Said motion being duly seconded, the president announced that the question was upon the adoption of said motion and on a
1938 vote said motion received the unanimous approval of the board present. Thereupon the president announced that the motion was carried unanimously.

The secretary then read the resignation of Mr. Philo B. Miles as a director of the company, and on motion the resignation of Mr. Philo B. Miles was accepted.

The president then announced the next order of business would be the election of a member of the board to fill the vacancy caused by the resignation of Mr. Philo B. Miles.

r. F. W. Little was placed in nomination and there being no r nominations, on motion the secretary was instructed to cast unanimous ballot of the board present in favor of the election of F. W. Little as a member of the board of directors. The secre- on reporting the ballot as being so cast, the president then an- ced that Mr. F. W. Little was duly elected a member of the d of directors to fill the vacancy caused by the resignation of o B. Miles.

he secretary then read the resignation of Mr. B. Warren, Jr., as president of the company. On motion the resignation of Mr. Warren, Jr., as vice president was accepted by the unanimous of the board.

he president then announced that the next order of business was election of a vice president to fill the vacancy caused by the gnation of Mr. B. Warren, Jr., and Mr. F. W. Little being placed omination as vice president, and there being no other nomina- s, on motion the secretary was instructed to cast the unanimous ot of the board in favor of the election of Mr. F. W. Little to the e of vice president.

The secretary having reported the ballot as so cast, the presi- dent then announced that Mr. F. W. Little was duly elected to the office of vice president to fill the vacancy caused by resignation of Mr. B. Warren, Jr.

he secretary then read the resignation of Mr. O. J. Bailey as a ector of the company, and on motion the same was accepted by unanimous vote of the board.

he president then announced that the next order of business uld be the election of a member of the board of directors to fill vacancy caused by the resignation of Mr. O. J. Bailey, and Mr. man A. Walton was placed in nomination to fill such vacancy, there being no other nominations, on motion the secretary was tructed to cast the unanimous ballot of the board present in favor he election of Mr. Lyman A. Walton as a member of the board irectors.

he ballot being so cast the president thereupon announced that Lyman A. Walton was duly elected a member of the board of ectors of the company to fill the vacancy caused by the resigna- n of Mr. P. J. Bailey.

he secretary then read the resignation of Mr. Theodore J. ller, as treasurer of the company, and on motion the same was epted.

he president then announced that the next order of business uld be the election of a treasurer to fill the vacancy caused by the gnation of Mr. Theodore J. Miller, and Mr. Lyman A. Walton ng placed in nomination for such office, and there being no other minations, on motion the secretary was instructed to cast the animous ballot of the board present in favor of the election of r. Lyman A. Walton to the office of treasurer of the company.

Total	4477 shares	

It appearing that a quorum was present, the meeting proceeded to business.

It was moved by Mr. W. T. Irwin, the motion being duly seconded by Mr. F. W. Little, that Mr. Ferd Luthy be author-
1942 ized and instructed to cast the vote of all of the stockholders present and entitled to representation in said meeting in favor of the re-election of each of the following directors of the company to serve for the ensuing year and until their successors are duly elected and qualified, to-wit:

Sumner R. Clarke, Geo. H. Littlewood, Frank T. Corning, Benj. Warren, Jr., Lyman A. Walton, Theo. J. Miller, F. W. Little.

The motion having been put to a vote received the unanimous vote of all stock present in favor of its adoption, and was thereupon declared duly adopted.

Mr. Ferd Luthy reported that he had cast the vote of the stockholders present in favor of the above mentioned directors, and thereupon the president declared them and each of them duly and legally elected directors of this company to serve for the ensuing year and until their successors are duly elected and qualified.

It was duly moved and seconded that the meeting adjourn to May 15, 1900, at 3:00 o'clock p. m., and the motion being put to a vote was carried unanimously.

THEO. J. MILLER, *Secretary.*

" " "	Sumner R. Clarke.....	S. R. Clarke, trustee.....	50
" " "	Theo. J. Miller.....	Christina A. Miller.....	148

On motion duly seconded, it was resolved that such assignments be recognized, approved and confirmed.

On motion meeting adjourned.

THEO. J. MILLER, *Secretary.*

1941 PEORIA, ILLINOIS, *Mar.* 13, 1900.

Second annual meeting of the stockholders of Peoples Gas and Electric Company.

Pursuant to notice duly mailed to each stockholder, as provided by the by-laws of the company, the regular annual meeting of the stockholders of the Peoples Gas and Electric Company was heldl at the office of said company, in the city of Peoria, Illinois, on Tuesday, March 13, A. D. 1900, at 3.00 o'clock p. m., the president, Mr. Sumner R. Clarke, in the chair.

The secretary was instructed to call the roll, and it appeared that the following stockholders were present and represented at said meeting, to-wit:

"Peoples Gas and Electric Company, 420 Main street.

PEORIA, ILL., *May* 12, 1900.

"At a meeting of the directors of the Peoples Gas and Electric Company held at the office of said company, at No. 420 Main street, Peoria, Illinois, on the 12th day of May, A. D. 1900, the following resolution was adopted:

"Whereas, in the judgment of the directors of the Peoples Gas and Electric Company, it would be expedient and to the best interests of said company to increase the capital stock of said company to one million dollars;

"Therefore, be it resolved, That a special meeting of the stockholders of the Peoples Gas and Electric Company be, and the same is hereby called to be held at the office of said company, at No. 420 Main street, Peoria, Illinois, on the 14th day of June, A. D. 1900, at 3:00 o'clock p.m. of said day, for the purpose of submitting to
1944 a vote of such stockholders the question of increasing the capital stock of said Peoples Gas and Electric Company so that the same shall be one million dollars.

"And be it further resolved, That due and legal notice be given to all the stockholders of said Peoples Gas and Electric Company of the time, place and purpose of such meeting.

Now therefore, please take notice, that there will be a meeting of the stockholders of said Peoples Gas and Electric Company at the time and place and for the purpose set forth in said resolution.

SUMNER R. CLARKE,
FRANK T. CORNING,
B. WARREN, JR.,
THEODORE J. MILLER,
F. W. LITTLE,
Directors."

The president of the company being absent, the vice president called the meeting to order and acted as chairman of the meeting, as provided by the by-laws.

The secretary was ordered to read the foregoing notice convening said meeting. The same being done, the secretary also read the following affidavit, namely:

"STATE OF ILLINOIS, }
Peoria County, } *ss.*:

Theodore J. Miller being duly sworn, on his oath states that he is secretary of the Peoria Gas and Electric Company (formerly the Peoples Gas and Electric Company) and that on the 12th day
1945 of May, A. D. 1900, he deposited in the post-office at Peoria, Illinois, in a duly stamped envelope addressed to each stockholder of said company, the following notice, to-wit:

"Peoples Gas and Electric Company, 420 Main street.

PEORIA, ILL., *May* 12, 1900.

"At a meeting of the directors of the Peoples Gas and Electric Company held at the office of said company, at No. 420 Main street, Peoria, Illinois, on the 12th day of May, A. D. 1900, the following resolution was adopted:

"Whereas, in the judgment of the directors of the Peoples Gas and Electric Company, it would be expedient and to the best interests of said company to increase the capital stock of said company to one million dollars:

"Therefore, be it resolved, That a special meeting of the stockholders of the Peoples Gas and Electric Company be, and the same is hereby called to be held at the office of said company, at No. 420 Main street, Peoria, Illinois, on the 14th day of June, A. D. 1900, at 3.00 o'clock p. m. of said day, for the purpose of submitting to a vote of such stockholders the question of increasing the capital stock of said Peoples Gas and Electric Company so that the same shall be one million dollars:

"And be it further resolved, That due and legal notice be given to all the stockholders of said Peoples Gas and Electric Company of the time, place and purpose of such meeting.

"Now therefore, please take notice, that there will be a meeting of the stockholders of said Peoples Gas and Electric Company at the time and place and for the purpose set forth in said
1946 resolution.

SUMNER R. CLARKE,
FRANK T. CORNING,
B. WARREN, JR.,
THEODORE J. MILLER,
F. W. LITTLE,
Directors.

"And also caused a general notice of the time and place and object of such meeting, signed by said directors to be published in the Peoria Herald Transcript, a public newspaper published in the city of Peoria, Illinois, once each week for three successive weeks, the same being on the following dates, to-wit: on May 17, 1900; May 24, 1900, and May 31, 1900, as required by law.

THEODORE J. MILLER, *Secretary.*

"Subscribed and sworn to before me, this 14th day of June, A. D. 1900.

LIZZIE A. PULSIPHER,
[SEAL.] *Notary Public.*"

The chairman then instructed the secretary to call the roll of the stockholders and ascertain the number of shares present and represented at said meeting.

The roll being called the following stockholders were present in person and by proxy and entitled to representation at said meeting, to-wit:

1947	F. W. Little	750	shares	Present in person
	Theo. J. Miller	2	"	Present in person
	Lyman A. Walton	10	"	Present by proxy to F. W. Little.
	B. Warren, Jr.	50	"	Present in person
	Geo. H. Littlewood	50	"	Present in person
	John R. Walsh	3040	"	Present by proxy to F. W. Little.
	W. T. Irwin	25	"	Present in person
	Total	3927	shares	

The chairman thereupon instructed the secretary to read the proxies of John R. Walsh and Lyman A. Walton, and the same being in due form and properly stamped and authenticated, the chairman stated that 3927 shares of the capital stock of said corporation were present in person or by proxy and that the same constituted a quorum for the transaction of business.

W. T. Irwin thereupon offered the following resolution and moved its adoption, to-wit—

"Resolved, That the capital stock of this corporation be increased so that the same shall be one million dollars."

Said motion having been duly seconded, the chairman stated that the question was upon the adoption of said resolution and instructed the secretary to call the roll of stock present upon its adoption.

Said roll having been called the secretary reported 3927 shares of the capital stock of this company voting in the affirmative and none in the negative. The chairman thereupon stated that more than two-thirds of the whole number of the shares of the
1948 capital stock having voted in the affirmative the resolution was declared passed and adopted.

On motion duly seconded the president and secretary were thereupon instructed to file the proper certificates of the increase of the capital stock of this company, as provided in said resolution, with the secretary of state and with the recorder of deeds in the county of Peoria, in the State of Illinois, where the principal office of said corporation is located, as provided by law.

Mr. Ben Warren, Jr. then offered the following resolution, and moved its adoption, to-wit:—

Whereas, the capital stock of this corporation has been increased by vote of the stockholders in the manner provided by law, to one million dollars; and

Whereas, this corporation is possessed of assets including its several ordinance franchises in the city of Peoria, village of North

Peoria, village of Averyville and village of South Peoria, far exceeding in value the amount of the capital stock of said corporation now issued; and

Whereas, each stockholder of said corporation is interested alike in said property according to their respective holdings of the capital stock therein; therefore

Resolved, That it is the sense of this stockholders' meeting that the assets of this corporation are equal in value to the full amount of the authorized capital stock of one million dollars ($1,000,000), and that it is recommended that the board of directors pro rate
1949 the increase of said capital stock of five hundred thousand dollars ($500,000.00), among the present stockholders in said corporation in the proportion of their respective holdings, and that said capital stock be so issued as fully paid up and non assessible."

Said motion having been duly seconded, the chairman stated that the question was upon the adoption of the resolution and instructed the secretary to call the roll of the stock present on its adoption.

Said roll being called, the secretary reported 3927 shares of the capital stock of this company voting in the affirmative and none in the negative. The chairman thereupon stated that more than two-thirds of the whole number of shares of the capital stock having voted in the affirmative the resolution was declared passed and adopted.

W. T. Irwin then offered the following resolution and moved its adoption, towit:—

Resolved, That the action of the board of directors of this company in authorizing and directing the execution and issue of two thousand coupon bonds, for the sum of one thousand dollars each, payable in gold coin of the United States of the present standard of weight and fineness, and bearing interest at the rate of five per cent. per annum, and payable on the first day of July, 1930, and the giving of a mortgage or deed of trust for the purpose of securing the payment of said bonds, and the interest thereon, conveying to the Equitable Trust Company and its successors in trust, as trustee, all the property, rights, franchises, easements, privileges and immunities
1950 of this company, of whatever name or nature, real, personal or mixed, in possession or expectancy, now owned or possessed or which may be hereafter owned, acquired or possessed by this company, together with all tolls, incomes, revenues, rents, issues and profits thereof, is hereby approved, ratified and confirmed."

Said motion having been duly seconded, the chairman stated that the question was upon the adoption of the resolution, and instructed the secretary to call the roll of the stock present on its adoption.

Said roll being called, the secretary reported 3927 shares of the capital stock of this company voting in the affirmative and none in the negative. The chairman thereupon stated that more than two-thirds of the whole number of shares of the capital stock having voted in the affirmative, the resolution was declared passed and adopted.

Geo. H. Littlewood then offered the following resolution and moved its adoption, to-wit:

"Resolved, That of the thirty year five per cent. first mortgage bonds this day authorized to be issued, no more at the par value thereof shall be issued at any time than the amount of the capital stock of this company then outstanding."

Said motion having been duly seconded, the chairman stated that the question was upon the adoption of the resolution, and instructed the secretary to call the roll of the stock present on its adoption.

Said roll being called, the secretary reported 3927 shares
1951 of the capital stock of this company voting in the affirmative and none in the negative. The chairman thereupon stated that more than two-thirds of the whole number of shares of the capital stock having voted in the affirmative the resolution was declared passed and adopted.

On motion this meeting adjourned.

THEO. J. MILLER, *Secretary.*

Directors' meeting, special.

PEORIA, ILLINOIS, *December* 26, 1900.

Pursuant to notice according to the by-laws, a special meeting of the board of directors of the Peoria Gas and Electric Company was held at the company's office, in Peoria, Illinois, on Wednesday, the 26th day of December, A. D. 1900, at 4 o'clock p. m.

The following directors were present:

Sumner R. Clarke	F. W. Little
George H. Littlewood	Theo. J. Miller
B. Warren, Jr.	

The president, Mr. Sumner R. Clarke, presided.

On motion of Mr. B. Warren, Jr., seconded by Mr. George H. Littlewood, the following resolution was adopted by unanimous vote:

"Resolved, That the capital stock of the Peoria Gas and Electric Company be increased from one million dollars to two
1952 million dollars, and that a special meeting of the stockholders of this corporation be called for the purpose of submitting to a vote of such stockholders the question of such increase of the capital stock, and that such special stockholders' meeting be held at the office of this company in Peoria, Illinois, on January 29, 1901, at 4:00 o'clock p. m.

On motion, meeting adjourned.

THEO. J. MILLER, *Secretary.*

Stockholders' meeting, special.

PEORIA, ILLINOIS, *January* 29, 1901.

A special meeting of the stockholders of the Peoria Gas and Electric Company was held on the 29th day of January, A. D. 1901, at the hour of 4 o'clock p. m. at the office of said company, in Peoria, Illinois, pursuant to notice given by depositing in the postoffice, at least thirty days before the said 29th day of January, A. D., 1901, the following notice, properly addressed to each stockholder and bearing the requisite postage stamps, and signed by a majority of the directors of this company, to wit:

"Peoria Gas and Electric Company, 420 Main street, Peoria, Illinois.

PEORIA, ILLINOIS, *December* 26, 1901.

"A special meeting of the stockholders of the Peoria Gas and Electric Company will be held, pursuant to a resolution of the board of directors of said company, at the office of the company in Peoria, Illinois, on January 29, 1901, at 4 o'clock p. m. for the purpose of voting upon the proposition to increase the capital stock of said company from one million dollars to two million dollars.

SUMNER R. CLARKE,
GEORGE H. LITTLEWOOD,
B. WARREN, JR.,
F. W. LITTLE,
THEO. J. MILLER,
Directors."

Also by publishing for three successive weeks in the Peoria Herald-Transcript, a newspaper printed and published in the county of Peoria, Illinois, being the county in which the principal office of this corporation is located, as appears from the affidavit of the secretary on file, and the certificate of publication thereof, hereto attached, the notice hereinabove set forth, stating the time, place and object of such meeting.

The secretary presented to the meeting affidavit of the mailing of said notices and certificate of publisher as to the publication of said notice, and the same were ordered filed with the records of this company.

Mr. Sumner R. Clarke presided.

The meeting was called to order by Mr. Sumner R. Clarke, president, and the secretary of the corporation assumed the duties of secretary.

The secretary was instructed to call the roll of stockholders to determine the stock represented at the meeting, and thereupon the

1954 following stockholders were found to be present either in person or by proxy, to-wit:—

Sumner R. Clarke and John R. Walsh,—jointly	4993	shares	Present by proxy to F. W. Little.
Lyman A. Walton	1	"	" "
Sumner R. Clarke	1	"	" in person
George H. Littlewood	1	"	" "
B. Warren, Jr.	1	"	" "
F. W. Little	5001	"	" "
Theodore J. Miller	1	"	" "
Total	9999	shares present,	

and it appearing there were present and represented, either in person or by proxy, 9999 shares of the capital stock of the said company, out of a total of 10,000 shares, the president thereupon declared more than two-thirds of all of the capital stock of the corporation represented and present, and that the meeting was open for the transaction of the business specified in the call.

Thereupon Mr. F. W. Little offered the following resolution and moved its adoption, towit:

"Resolved, That the capital stock of this company be, and the same is hereby increased, so that the same shall be two million dollars."

And the question being upon the adoption of said resolution, the president instructed the secretary to call the roll of the stockholders upon the question of the adoption of said resolution, and thereupon the roll having been called, the secretary announced that 9999 shares of stock voted in the affirmative for the adoption of said resolution and that no votes were cast in the negative, and the said

1955 resolution having received votes representing more than two-thirds of all the stock of the corporation, the said resolution was declared duly adopted.

On motion of Mr. B. Warren, Jr. duly seconded, the president and secretary ware instructed to file the necessary certificate and to make publication of said increase of capital stock in the manner required by the statute.

On motion, the meeting adjourned to Tuesday, the fifth day of February, 1901, at 4 o'clock, p. m.

THEO. J. MILLER, *Secretary.*

Directors' meeting—special.

PEORIA, ILLINOIS, *October* 8, 1901.

Special meeting of the board of directors of the Peoria Gas and Electric Company, held at the office of the company, in the city of Peoria, Illinois, on the 8th day of October, 1901.

Present: Messrs. S. R. Clarke, B. Warren, Jr. F. W. Little, Theodore J. Miller.

The meeting was called to order by the president, who stated that the meeting had been called to consider the communication and request of the Peoria Gas Light and Coke Company for a proposition to furnish said company a sufficient amount of gas to supply
1956 its customers in the city of Peoria, Illinois, together with the terms and conditions upon which the same could be furnished.

After the reading of the communication and request, and a general discussion as to the feasibility of furnishing gas to said Peoria Gas Light and Coke Company, and it appearing that the capacity of the plant of this company was sufficient to furnish all the gas consumed in the city of Peoria, Mr. Warren offered the following resolution:

"Resolved, That the president be, and he is hereby authorized to make a proposition to the Peoria Gas Light and Coke Company to furnish it gas in sufficient amount to supply its customers, in pursuance to the request of said company, conditioned substantially as follows:

"*First.* That this company will furnish the Peoria Gas Light and Coke Company a sufficient amount of gas to supply its customers and consumers in the city of Peoria, Illinois, at the rate of seventy-five cents per thousand cubic feet of gas so furnished.

Second. That all leakage or loss of gas between its meter in its plant in said city, and the delivery thereof to its several consumers, shall be accounted and paid for at the rate of fifty cents per thousand cubic feet of gas.

Third. That to determine the amount of gas so furnished through the meter of the gas plant of the Peoria Gas Light and Coke Company and the loss or leakage thereof in delivering the same to the several consumers, the Peoria Gas and Electric Company, its officers and employees shall at all times have access to
1957–1959 the plant of the Peoria Gas Light and Coke Company for the examination of its station meter, and shall also have the right to read and take the measure of all meters set or placed for consumers.

Fourth. That this company shall have the right to connect, by suitable means pipes and connections of its gas plant and pipes with the meter and pipes of the said Peoria Gas Light and Coke Company in its plant, and shall have the right to enter into and upon the

premises of the said Peoria Gas Light and Coke Company for that purpose.

Fifth. That the contract for the furnishing of gas upon the terms and conditions aforesaid, shall extend for and during the period of ten (10) years.

Sixth. That settlement for all gas furnished shall be made monthly on or before the 15th day of the month following that for which gas may have been furnished as above."

Said resolution having been read, on motion duly made and seconded, was duly adopted by a unanimous vote of the board present, and the president was instructed to submit said proposition in due form to the Peoria Gas Light and Coke Company, pursuant to its request, and in case said proposition should be accepted by said Peoria Gas Light and Coke Company, the president and secretary, on motion were duly authorized to execute a contract on behalf of this company, upon the terms and conditions set forth in said resolution.

There being no further business before the meeting, on motion the same adjourned.

THEO. J. MILLER, *Secretary.*

1960 JOHN MADIGAN, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?
A. John Madigan; brick manufacturer.
2. Where do you reside?
Ans. 7th Ave., West Bluff, Peoria, Ill.
3. Have you ever had any business transactions with the Peoria Gas & Electric Co.?
Ans. Yes sir;
4. What was the nature of those transactions?
A. Why, I have purchased coke from that company.
5. When did you purchase that coke?
A. I purchased it in June and July 1902, some in August and some in September, as late as yesterday, 1902.
6. Did you purchase any at any previous time?
A. I have been purchasing it for 10 years.
7. Did you purchase coke at any previous time from the Peoria Gas & Electric Co.?
Ans. No sir;
8. What, if you know, did you pay for the coke you purchased from the Peoria Gas & Electric Co., in 1902, as you state?

Objected to as incompetent and immaterial.

A. $4.50 per ton at their works and I had to do the hauling; it would be $5.00 per ton if they had to deliver it at my works.

9. Did you ever buy any coke from any other firm or company in the city of Peoria?

(Objected to as immaterial.)

A. I have bought it off of the old company, the Peoria Gas-light & Coke Company; I don't know whether it is all one company now or not; I could not say.

10. When did you buy coke from the Peoria Gas-light & Coke Co.?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materiality of it at present but it may become material and the witness may answer subject to the objection.

1961

A. I have bought it right along every summer for the last 10 years.

11. Do you remember what you paid for the coke you purchased from the Peoria Gas-light & Coke Co., in the year 1897?

Objected to as incompetent, immaterial and irrelevant.

A. My books show I paid $3.00 and $3.50.

Complainant objects to the answer as incompetent.

The MASTER: I think the witness can testify to that independent of what his books show.

12. Do you know that of your own personal knowledge?

Ans. I do.

13. How do you know it?

A. I have looked over my accounts at my office to see what I paid for coke in years gone by.

Complainant objects to the answer as incompetent and immaterial his knowledge being received from records and accounts which are the best evidence.

The MASTER: I think if he has knowledge of it independent of any memorandum or book account it is competent.

Mr. IRWIN: He was just asked how he got his knowledge and he said from the books.

(The MASTER:)

14. Do you know what you paid for this coke independent of what your books show?

A. No I do not; I only know just what the books show except I know I have paid more for coke this season than I ever paid.

Complainant objects to the answer as immaterial and incompetent.

The MASTER: It may be admitted subject to the objection.

FRANK O. CUNNINGHAM, called on behalf of the defendant, bei first duly sworn, deposes and says.

1962 Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?

A. Frank O. Cunningham; my business is loaning money pri cipally.

2. How long have you been engaged in that business?

A. For myself 26 or 27 years.

3. During all that time have you been engaged in business in th city of Peoria?

Ans. Yes sir.

4. State what in your opinion, from your experience in the busi ness just designated, would be a fair return to investors for mone loaned upon the best real estate security in and about Peoria?

Objected to as incompetent, immaterial and irrelevant to any o the issues in this case.

The MASTER: I do not see the materiality of it.

Mr. MANSFIELD: I would like to have the question answered sub ject to the objection.

The MASTER: He may answer subject to the objection.

A. For what length of time past; rates have varied materially.

5. Confine yourself in your answer to the rates that have obtained in the city of Peoria for the last year?

A. From 5% to 5½% is the best rate of interest, that, as a rule, can be obtained on choice real estate security.

6. Has there been any change in that rate for the last 4 or 5 years, if so, what variation has there been?

Objected to as incompetent, immaterial and irrelevant to the issues in this case.

The MASTER: He may answer subject to the objection.

A. 4 or 5 years ago money was worth 6% and the broker got a little commission on top of that—an investor got net 6% on his money 5 or 6 years ago, but now an investor can only get from 4½% to 5% and 5½%.

7. When did the rates change?

1963 Objected to same grounds.

A. They have been gradually declining since 5 years ago.

8. In making a loan on real estate do you take into consideration any of the hazards that enter into the nature of the business as it is carried on?

(Objected to same grounds.)

The MASTER: I do not see the materiality of it.

Mr. MANSFIELD: I would like to have it answer subject to the ob jection.

The MASTER: The witness may answer subject to the objection.

A. Yes sir; we certainly do.

9. To what extent do you take into consideration the hazards?

Objected to same grounds.

A. As a rule we do not regard a manufacturing establishment, hotel property, churches or theaters—property of that as choice real estate security in loaning money.

10. What would be the difference in the rates of interest charged on property of that kind as compared with other kinds of property, if any?

(Objected to same grounds.)

A. If loans were made they would be made at a little stronger rate of interest—that is my experience; they are not considered as desirable property to invest on as security.

JOSEPH P. DURKIN, called on behalf of the defendant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?

A. Joseph P. Durkin; secretary of the Title & Trust Co., Peoria, Ill.

2. In the performance of your duties as secretary of that company do you investigate and make loans on real estate?

A. I do.

1964 3. Where are those loans made?

Objected to as incompetent, immaterial and irrelevant.

A. On property in the city of Peoria and on farm lands in the Stute of Illinois.

4. How long have you been engaged in the business of investigating and making loans on real property in and about the city of Peoria?

Objected to as immaterial.

The MASTER: I think it is myself but I cannot tell what it may lead to. The witness may answer subject to the objection.

A. About 12 years.

5. What in your opinion, based on your experience, would be a fair return to investors for money loaned upon the best real estate security in and about the vicinity of Peoria?

Objected to as incompetent and immaterial.

The MASTER: I do not see the materality of it.

Mr. MANSFIELD: I would like to have an answer to the question.

The MASTER: He may answer subject to the objection.

A. About 5% net to investors on city property.

BERNARD CREMER, called on behalf of the defendant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. State your name and business?
A. Bernard Cremer; am publishing a newspaper.
2. Are you engaged in any other business?
A. I am president of the German-American national bank.
3. Were you acquainted with Chas. V. Newman?
Ans. Slightly.
4. Were you associated with him in any business connection on or about the 7th, day of May, 1901?

1965 Objected to as incompetent, immaterial and irrelevant.
The MASTER: I cannot tell you whether it is material or not. The witness may answer subject to the objection.

A. I had nothing to do with him only I signed a paper for him once when he was getting up an ordinance or something.
5. Were you associated with him in endeavoring to obtain a certain ordinance from the city of Peoria entitled, "An ordinance granting to Charles V. Newman, his associates, successors and assigns the right to lay gas mains and distribute gas in and along the several streets and highways in the city of Peoria"?
A. No I took no part in it; I know he wanted me to see some parties at the time but I had nothing to do with it.
6. Did you see those parties?

Objected to as incompetent and immaterial.

A. I went to see Mr. Greenhut and made arrangements for him to see Mr. Newman; that was all.
7. Do you know what the result of Mr. Newman's conversation with Mr. Greenhut was?

Objected to same grounds as before.
The MASTER: Answer the question yes or no, Mr. Cremer?

A. It resulted in nothing.
The MASTER: No, answer yes or no?
Ans. Yes.
8. What did he have the conference with Mr. Greenhut about, if you know?

Objected to as incompetent, immaterial and irrelevant.
The MASTER: He may answer if he knows subject to the objection.

A. About organizing a gas company—I guess it was; there was an ordinance passed and he had some privileges and I guess it was about that.
9. Do you remember about what time that ordinance was passed?
Objected to as immaterial.

1966 The MASTER: The witness may answer subject to the objection. If the ordinance was passed of course that would be the best evidence.

Mr. MANSFIELD: I want to connect it up so this conference will appear to be in connection with that ordinance.

A. I don't know exactly: I know it was warm weather; I don't recollect whether it was a year or two years ago; I didn't pay much attention to it.

10. Do you know whether or not the ordinance you have reference to was an ordinance "granting to Charles V. Newman, his associates successors and assigns the right to lay gas mains in and along the several streets and highways in the city of Peoria"?

Objected to as incompetent, immaterial and irrelevant.

A. I think it was.

11. Do you know what the result was, if you do please state it, of the conference had between Chas. V. Newman and Mr. Greenhut relative to this ordinance I have referred to?

Objected to same grounds as before and also because it calls for hearsay.

The MASTER: I do not see the materiality of it yet; it seems to me it is wholly immaterial but the witness may answer subject to the objection.

Mr. IRWIN: It don't appear that this witness was even present at the conference, and as to the result, that would be only a matter of opinion; the only thing that would be competent, if competent at all, would be what was said between the parties.

The MASTER: I understand and as I say I do not now see the competency or materiality of it, but the witness may answer subject to the objection.

A. All I know is Mr. Greenhut objected to going into the deal; that is all I know to tell the truth.

12. Did Mr. Greenhut ever give any reason to you for not
1967 going into it, or organizing the company under the ordinance in question?

Objected to as immaterial, incompetent and irrelevant and calling for hearsay.

The MASTER: I do not see the materiality of it.

Mr. MANSFIELD: I would like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. He objected to going into anything new; he did not want any new business; that was what I understood.

13. Did you have any conversation with any other parties with reference to the organization of that company?

Objected to as immaterial irrelevant and incompetent.

A. No. I don't know whether it was one or two years ago; I think Tom Coffey sent Mr. Newman to me or sent him to Mr. Greenhut—I don't know any more what it was, but I had no talk about it much; I didn't pay any attention to it.

Mr. IRWIN: Complainant moves to exclude all the testimony of this witness on the grounds that it is hearsay, incompetent, immaterial and irrelevant.

The MASTER: I will take your motion.

Mr. MANSFIELD: We will allow it to be excluded.

MORRIS G. PLANCK, re-called on behalf of defendant, deposes and says:

Direct interrogatories by Mr. MANSFIELD:

1. You are the same Morris G. Planck who testified in this case a few days ago?

Ans. Yes sir.

2. How long have you been a consumer of gas for fuel and illuminating purposes in the city of Peoria?

Objected to as incompetent and immaterial.

A. Since September 1, 1893.

1968 3. Do you know what was paid for gas used both for illuminating and fuel purposes in the city of Peoria since January 1, 1897?

Objected to as incompetent and immaterial and having nothing to do with the issues in this case, this complainant company not being in existence at that time.

A. I could not tell without referring to our bills.

4. Have you those bills with you?

Ans. Yes sir;

5. Will you refer to your bill for January, 1897, and state what prices prevailed at that time for both fuel and illuminating *gas* gas?

Objected to unless it was gas purchased from complainant company; what business the witness might have had with some other corporation or individual could not cut any figure so far as the rights of the complainant company are concerned; also because the question asks for the prices of the old company and it is apparent it is an individual case.

The MASTER: He may answer subject to the objection.

A. (Witness referring to bills.) We were paying at that time for illuminating gas $1.35 per thousand cubic feet with a discount of 10c. allowed for prompt payment; for fuel gas we were paying 75c. per thousand cubic feet net.

6. Look further at the bills you have before you and state for how long after that time those prices prevailed in the city of Peoria and when, if at any time, a change was made in those prices?

Objected to unless it was some purchase or dealing with the complainant company.

A. (Witness referring to bills.) My bills are all alike for fuel gas; there is a little difference at different times for illuminating gas, but we have never paid any more than 75c. per thousand feet for fuel gas, and since the time of the making of our contract two years ago last April we have only paid 50c. per thousand feet.

1969 7. With whom was that contract made you now refer to?

A. With the Peoria Gas-light & Coke Co.,

8. Can you state what change, if any, was made in the price of illuminating gas and when such change or changes were made by an examination of the bills before you?

Objected to same grounds as before.

The MASTER: That is the same question and it has already been ruled on; the witness may answer subject to the objection.

A. I believe I stated the price January 1, 1897 was $1.35 gross with a discount of 10c.; there was a change made June 1, 1899; the illuminating gas was changed from $1.35 per thousand feet to $1.00 per thousand cubic feet net.

9. Was there any further change made in the price of illuminating gas after that time?

Objected to as immaterial and irrelevant.

A. Not until the new company came into the field.

10. Does it show by your bills whether any change was made then when the new company came into the field?

A. Not according to the bills; they all run at $1.00 per thousand, but the prices were made by allowing a discount.

11. What was that discount, if you remember?

Objected to as incompetent and immaterial.

A. I think, so far as I can remember, that we paid for illuminating gas at the rate of $1.00 per thousand cubic feet up to the time we made our contract with the old company.

12. Were the prices you have testified to the prevailing current prices charged by the Peoria Gas-light & Coke Co., to all people generally in the city of Peoria?

Objected to as incompetent, immaterial and irrelevant.

A. They were.

1970 13. You had no special contract with the Peoria Gas-light & Coke Co., up to the time you made the special contract

under which you are now paying 50c. for gas per thousand cubic feet?

Objected to same grounds.

A. None whatever.

The MASTER: Are you ready now to proceed with the cross-examination of Mr. Little, Mr. Ritcher?

Mr. RITCHER: Yes sir, and it will take but a few minutes.

The MASTER: You may call him for that purpose.

Cross-examination of FRANCIS W. LITTLE by Mr. Irwin:

1. In your direct examination on page 1571 you were asked with reference to the extension of your main system of complainant company subsequent to September 30, 1900, and, as I remember, you testified there had been no material extension since that date. I will ask you why your main system subsequent to that date has not been extended materially throughout the city?

Objected to as immaterial and incompetent.

The MASTER: I do not think it material, but think it proper cross-examination. I did not see the materiality of it when the witness was asked about it on direct examination and I think I so ru'ed.

Mr. IRWIN: As the defendant saw fit to force it in on direct examination I think we have a right to an explanation of it.

The MASTER: I think so; the witness may answer subject to the objection.

A. There were two primary reasons why we did not extend the main system. First, because we did not want to make any extensive improvements or extensions until after the outcome of
1970*a* this present suit had been determined because we felt we already had enough money at risk and did not care to jeopardize any more; and further, there were some districts where we sought to get rights for laying mains and the ordinance authorizing it was vetoed by the mayor.

(The MASTER:)

2. Do I understand you to mean by that answer that you applied by ordinance for the right to make an extension?

A. Yes sir; we applied for an ordinance authorizing certain extensions in the 8th ward where there were no pipes whatever owned by any gas company; the ordinance was passed by the council and vetoed by the mayor.

(Mr. IRWIN:)

3. In your direct examination heretofore you were asked by counsel for defendant pertaining to a contract between the Peoria Gas-light & Coke Co., and the complainant company in this case and as to how that contract came about, and you there referred to

a letter from Mr. McKinley as the moving element that brought about that contract—have you that letter with you?

Ans. Yes sir;

4. Will you produce it?

Ans. Yes sir. (Produces letter.)

5. Are you acquainted with W. B. McKinley whose name is attached to this letter?

Ans. Yes sir;

6. He is the president, or was at that time, of the Peoria Gas-light & Coke Co.?

Ans. Yes sir;

Complainant's counsel offers in evidence the original letter produced by the witness and asks leave to substitute a copy for the record as the original is part of the records of complainant company, the original to be produced at any time when desired by court or counsel.

Objected to as immaterial and irrelevant.

Whereupon said letter was read to the master, subject to the objection, in the words and figures following, to-wit:

1971 Office of the Peoria Gas-light & Coke Co.

Officers:
W. B. McKinley president & supt.
Geo. E. Macomber, sec. & treas.

PEORIA, ILL., *Oct. 2nd*, 1901.

To the Peoria Gas & Electric Company, Peoria, Illinois.

GENTLEMEN: A large amount of the machinery and apparatus of the Peoria Gas Light & Coke Company of this city has become in bad condition and repair by reason of its long continued use in the manufacture of gas, and in order to continue the manufacture of gas economically, it will require the expenditure of a large amount of money in the renewal and repair of certain parts of the machinery and apparatus in our plant.

It has been thought best by the board of directors of our company that in view of your gas plant being new and of ample capacity to manufacture all the gas in the city of Peoria, that it might be more economical for our company to purchase gas from your company sufficient to supply our consumers and customers at least for the present, so as to avoid the immediate outlay required for the renewal of our plant. To that end we would be pleased to have a proposition from your company for the furnishing of a sufficient supply of gas to the Peoria Gas Light & Coke Company to supply its consumers and customers, as we believe that an arrangement of this character might be made that would be of advantage to all parties interested without detriment or additional cost to gas consumers.

An early reply is desired, as, if no arrangement can be made with your company for the supply of gas, it will be necessary for us to proceed with the general repairs to our plant.

(Signed) W. B. McKINLEY,
Pres. P. G. L. & C. Co.

Exhibit "37." I. C. Pinkney, master.

7. In your direct examination you testified with reference to the contract Exhibit "32" between the Peoria Gas-light & Coke Co., and the Peoria Gas & Electric Co., under which your company was furnishing gas to that company, that you had received some notice of the termination of that contract—was that notice in writing?

A. Yes sir;

8. Have you the notice with you?

Ans. Yes sir;

9. Will you produce it?

Ans. Yes sir; (Produces notice.)

1972 Complainant's counsel offers in evidence the notice produced by the witness and asks leave to substitute a copy for the record.

Objected to as immaterial and irrelevant.

The MASTER: It may go in evidence subject to the objection.

Whereupon said notice was read to the master in the words and figures following, to-wit:—

"PEORIA, ILL., *Feb.* 15, 1902.

To the Peoria Gas & Electric Company, city:

You are hereby notified that by a vote of the board of directors of the Peoria Gas Light & Coke Company, we are instructed to notify you of our election to terminate the contract between said companies, dated October 21st, 1901, under the terms thereof; that this company will terminate the same at the expiration of six months from the date hereof, as provided by the terms of said contract.

PEORIA GAS LIGHT & COKE COMPANY,
By W. B. McKINLEY, *Its President.*"

Exhibit "38." I. C. Pinkney, master.

10. State whether or not that contract has been terminated in pursuance of the notice just read in evidence.

Ans. Yes sir;

11. About what date was it finally terminated?

A. We ceased to supply them with gas on the night of August 19, 1902.

12. In your direct examination you were asked for statements showing the amount of gas and the settlement therefor, between the

Peoria Gas-light & Coke Co., and complainant company, under the contract Exhibit "32," referred to, as well as for repairs and the work required to be done under that contract. You produced, as I recollect it, a number of statements marked Exhibit "33" showing the amount of gas furnished and also other statements which were not offered in evidence by defendant—Have you those other statements with you?

1973

A. Yes sir; I have the statements showing the amount of labor and material furnished to the Peoria Gas-light & Coke Co., under that contract for the *varies* services which the Peoria Gas & Electric Co., performed for the account of the Peoria Gas-light & Coke Co., in accordance with the terms of the contract.

13. Those statements are made up for what period?

A. They are in the form of monthly bills and are from October 24, 1901, to July 31, 1902.

14. Were those several monthly statements for the period named settled for as stated in your former examination and paid for by the Peoria Gas-light & Coke Co.?

Ans. Yes sir;

15. Will you produce those statements?

A. Yes sir; (Witness produces statements)

Complainant's counsel offers in evidence the statements produced by the witness, said statements being marked Exhibit "39" consisting of 9 sheets.

Objected to as immaterial and incompetent.

Mr. IRWIN: These statements are offered in evidence for the purpose of showing the complete transaction between the two companies under that contract.

The MASTER: They may be admitted subject to the objection.

Whereupon said statements were read to the master in the words and figures following, to-wit:

1974 EXHIBIT "39." I. C. Pinkney, Master.

(9 sheets.)

See Exhibits "33 & 45." This is not a duplicate.

1981 Re-direct interrogatories by Mr. MANSFIELD:

1. Could you, from an examination of the books of your company give an itemized statement as to where and when this work was performed as shown by these statements just read in evidence?

Objected to as not proper re-direct.

The MASTER: I do not think it proper re-direct, still he may answer that question as to whether or not he could do it from an examination of the books; it is only a preliminary question.

A. No sir; not all of it.

2. How do you know then this labor and material was furnished to the Peoria Gas-light & Coke Company, if you could not determine from your books where it was done or when it was done?

Objected to as not proper re-direct.

A. I think I explained that in my former testimony; we use what is known as a card system—Interrupted——

The MASTER: Yes, I remember you testified to that and I will not allow the record to be duplicated by going over it again. That was gone into fully by you Mr. Mansfield in your direct examination of this witness.

3. Are the statements you have produced here a copy of the bills that were furnished to the Peoria Gas Light & Coke Co., as testified to by you in your former examination?

A. Yes sir; they are copies of the bills that were rendered monthly to the Peoria Gas-light & Coke Company.

4. Was this all of the account, or were the items specified and the places where the work was done furnished to the Peoria Gas-light & Coke Company?

Objected to as not proper re-direct.

The MASTER: You are referring to Exhibit "39" just offered in evidence, are you?

Mr. MANSFIELD: Yes sir;

1982 The MASTER: I think that competent; the witness may answer subject to the objection.

A. The bills were given just as they are presented here—just as they were rendered to the Peoria Gas light & Coke Company; the bills when rendered were the cards which showed the amount and kind of work done and the place where done, but no copies were kept of those.

(The MASTER:)

5. This is an assembling of those accounts then in this form?

A. It could hardly be considered an assembling of the accounts; it covers the material as returned by the storekeeper in the original monthly storekeeper's reports, and the labor as taken from the monthly pay-rolls, which were the books of original entry of our company; the cards which showed the details of each transaction are corroborative evidence of this.

(Mr. MANSFIELD:)

6. Then so far as the items contained in these bills marked Exhibit "39" are concerned, you don't know what those items are and have no means of obtaining that knowledge from the books and records of your company?

Objected to as not proper re-direct, having already been answered both on direct and cross-examination.

A. The books and records of our company show merely the delivery of the material and the performance of the labor where that labor was used and probably as to the details of the material our books are silent; I am not absolutely sure with reference to the material since it may be that the storekeeper's supply tickets show just where the material was sent.

7. Is Exhibit "39" a copy of the original bills that were presented to the Peoria Gas-light & Coke Co.?

Objected to as already answered.

The MASTER: I think so, but he may answer it again if
1983 there is any doubt about it.

A. Yes sir.

8. From what source did you obtain this copy?

Objected to same grounds as before.

A. From the files in our office.

9. Did you not testify on direct examination that it was impossible for you to give a correct statement of the matters contained in this Exhibit "39"?

Objected to as misquoting the record and not a proper way of calling the attention of the witness to it.

The MASTER: No, I will not allow you Mr. Mansfield to cross-examine your own witness or impeach his testimony.

10. In your cross-examination you stated with reference to laying more mains in the city of Peoria that the reason you did not do so was on account of the pendency of this suit and you did not care to risk any more money—why was it you made the change with reference to the pipes you proposed to lay in the 8th ward in the city of Peoria?

A. Because there were no pipes whatever in that district and because the people living there were anxious to have a supply of gas and had frequently petitioned the company to furnish them with gas.

Defendant rests its case.

Adjourned by agreement until Monday, September 15, 1902, to meet at such place as may be designated by the master.

EXHIBIT "35." I. C. Pinkney, Special Master.

To the honorable mayor and city council of the city of Peoria, Illinois:

Your petitioner, The People's Gas and Electric Company, a corporation recently organized for the purpose of furnishing gas and electric light to the inhabitants of the city of Peoria, herewith presents its ordinance for the consideration of your honorable body, and also presents herewith certain frontage consents secured up to the present time. The company has ample financial support and intends, in good faith, to enter into the business of furnishing gas and electric light, if it receives an ordinance from your honorable body. The company respectfully asks that said ordinance receive your early and favorable consideration.

Respectfully submitted,

PEOPLE'S GAS AND ELECTRIC COMPANY,
By SUMNER R. CLARKE, *President.*

Official Proceedings.

Council Chamber.

PEORIA, ILL., *April* 18, 1899.

A regular meeting of the city council was held this evening, all the members being present except Aldermen Bryan and Lynch.

Franchises Granted.

Both of the ordinances granting franchises to the People's Gas and Electric Company were read by the clerk.

The first one read related to the laying of gas pipes and the furnishing of gas.

Alderman Oden offered a substitute to article 3, which was adopted naming streets more numerous than in the ordinance, in which pipes are to be laid.

Alderman Gorman offered an amendment, in which it was provided among other things, that pipes, mains and service pipes shall be laid as not to interfere with or injure the pipes or mains owned by the city of Peoria or by any other persons or corporations.

On motion of Alderman Carroll, the amendment was laid on the table by 8 ayes and 4 noes.

Ayes—Alderman Carroll, Dechman, Kellerstrass, Hecht, Louis, Oden, Peck, Thode, Wolschlag.

Noes—Alderman Gorman, McFadden, Powell, Thode.

Alderman Thode offered an amendment, which was lost, providing for a deposit with the comptroller of $10,000 as a guarantee of the faithful performance of the provisions of the ordinance.

Alderman Oden offered a substitute for Alderman Thode's amendment, which was adopted as an amendment to article 4, providing for the deposit of $5,000 to be returned when $50,000 shall have been expended, and to be forfeited if the company does not begin work or supply gas in the time specified.

Alderman Gorman made a motion, which was not seconded, providing that the company be compelled to parallel the former gas company.

Alderman Oden offered an amendment to article 6, which was adopted, providing that whenever any street is about to be
1983d permanently improved by paving or macadamizing, the commissioner of public works shall notify said company of such proposed improvement, and within sixty days after such notification the company shall lay its mains including all service pipes and connections to the curb line at its own cost and expense.

By unanimous vote of 12 ayes, the ordinances as amended were adopted.

Alderman Carroll then moved a reconsideration of the motion adopting the ordinance, and on motion of Alderman Oden the motion to reconsider was laid on the table.

STATE OF ILLINOIS, }

1983*g* UNITED STATES OF AMERICA, }
Northern District of Illinois. }

In the Circuit Court of the United States, Northern District of Illinois, Southern Division.

PEORIA GAS & ELECTRIC COMPANY }
vs. }
CITY OF PEORIA. }

Affidavit of Henry Mansfield.

STATE OF ILLINOIS, } ss:
Peoria County, }

Henry Mansfield, being duly sworn, on oath states that he is city attorney of the city of Peoria, Illinois, and as such is in charge of the defense in behalf of said city in the above entitled case.

Affiant further states that the Peoria Gas Light & Coke Company, a corporation of Peoria Illinois, received its charter from said State about the year 1855; that for many years prior to about October 24, 1901, it was engaged in manufacturing and selling gas in the ordinary way, for illuminating and fuel purposes in said city of Peoria, and in the territory adjacent thereto, and until about May 1, 1900, it was the only company engaged in the business aforesaid within said city and its suburbs; that while the said company so

continued the manufacture and sale of gas its business was identical in character with that now and heretofore carried on by complainant company in a part of the same district.

1983*h* Affiant further states that he has reason to believe, and does believe and so states that the books of account, statements, reports, etc., kept by said Peoria Gas Light & Coke Company in the usual and regular course of its business for the five years ending May 1, 1900, called for by a certain subpœna entitled in said cause, and duly and legally served on Henry W. Bicknell, in the service of said company, and who has testified herein, said subpœna having been served on the 25th day of June, 1902, a copy of which is hereto attached, for greater certainty, and made a part hereof, contain material, proper, pertinent and necessary to a proper defense on behalf of said City of Peoria in said cause; that from said material so called for affiant will be able to prove the cost of gas delivered to consumers in said Peoria district during said five years, together with all other facts of a material character in connection with said business, and that such proof will establish, or tend to establish, the fact that the ordinance passed by the city council of said city, fixing a maximum rate of seventy-five cents per thousand cubic feet to be charged by gas companies operating therein, is not unreasonable in respect to the maximum rate so fixed, but on the contrary that said price in every respect is fair and just to said gas companies, and in no manner operates as a hardship or injustice to them, or to either of them, or to any of the parties interested therein.

Affiant further states that substantially all the territory in the Peoria district reached by complainant company is now, and for many years last past has been supplied with gas service by said Peoria Gas Light & Coke Company; that complainant company began active operations in furnishing gas about May 1, 1900, its customers then and now being almost wholly within the field reached by said Peoria Gas Light & Coke Company.

[NOTARIAL SEAL.] HENRY MANSFIELD.

Signed and sworn to before me this 27th day of June, A. D. 1902.

MARY E. POWELL,
Notary Public.

1983*i* UNITED STATES OF AMERICA,
Northern District of Illinois, Southern Division, } ss:

The President of the United States of America to the marshal of the northern district of Illinois, Greeting:

You are hereby commanded to summon Thomas N. Gorman Henry W. Bicknell & Francis S. Kelley if he shall be found in your bailiwick, to be and appear before me, I. C. Pinkney, special master in chancery for the northern district of Illinois, southern

division aforesaid, at the United States court room, in the city of Peoria, on the 26 day of June at 2 o'clock p. m. and to bring with him and produce at the time and place aforesaid, to be used as evidence, all books of account of the Peoria Gas Light & Coke Company, of Peoria, Illinois, from May 1, 1895 to May 1, 1900, including any and all books in which were made any entries pertaining to the business of said company; also all said company's secretary's monthly and other reports to its board of directors, and to the company and to its stockholders for the same period; also all its treasurer's statements and reports to its board of directors, and to the company, and to its stockholders for the same period; also *and* all other reports, schedules, statements, papers, documents, data, memoranda, books and records of the said Peoria Gas Light & Coke Company, and of any and all of its officers, clerks and employés, for said period, pertaining to the business of said company, and especially with reference to its earnings, during said period, and every part thereof, and then and there to testify and the truth to speak in a case pending before me, wherein The Peoria Gas and Electric Company is complainant, and The City of Peoria is defendant.

Hereof fail not, under the penalty of the law, and have you then and there this writ, with the endorsement thereon in the manner in which you have executed the same.

Given under my hand this 25 day of June A. D. 1902.

1983*m* *Rebutting Evidence on the Part of Complainant.*

Directors' room, Equitable Trust Co., Chicago Nat. Bank bldg.

TUESDAY, *September* 23, 1902—10 o'clock a. m.

Parties met pursuant to call of the special commissioner.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. R. C. Ritcher and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield, city attorney, and Mr. F. H. Tichenor, appearing for defendant.

WILLIAM T. ABBOTT, called on behalf of the complainant, being first duly sworn, deposes and says.

Direct interrogatories by Mr. IRWIN:

1. State your name, residence and business?

A. William T. Abbott; Peoria, Ill; am a lawyer practicing in Peoria, Illinois.

2. You are one of the attorneys of record now in this suit?

A. I am.

3. Were you one of the attorneys at the time of the commencement of this suit?

Ans. I was not.

4. Do you remember about what time you became identified with this case?

A. It was either in the latter part of November or early in December 1901—after the first evidence had been taken in Chicago and Peoria.

5. Who employed you, if anyone, to become identified with this case?

A. The Peoria Gas-light & Coke Co.; I came into the suit at the request of Mr. McKinley, president of the Peoria Gas-light & Coke Company, it being his desire that I should attend the remaining hearings in the case with a view to a better preparation of a similar case of the Peoria Gas-light & Coke Company's, which was, and still is, pending in the same court.

6. Who, if anyone, pays you your fees for your attendance and work in the present case?

1984 Ans. The Peoria Gas-light & Coke Co.

7. Have you received any compensation from any other source?

A. I have not.

8. Do you expect any from any other source?

Ans. I do not.

9. What official position, if any, do you hold in the Peoria Gas-light & Coke Co?

Ans. I am secretary of the company.

10. How long have you held that position with the company?

A. Since May 1901.

11. As secretary of the company do you have access to and examine the records of the company?

Ans. I do.

12. Were you secretary of the Peoria Gas-light & Coke Co., at or about the time of the entering into the contract with the complainant in this case for the furnishing of gas in evidence dated in October 1901, and marked Exhibit "32"?

Ans. I was.

13. Have you with you the minutes of the proceedings of the board of directors of the Peoria Gas-light & Coke Co., pertaining to the contract Exhibit "32" in evidence, relative to furnishing gas to said company?

Ans. I have certified copies of those minutes.

14. Have you the first minutes of the proceedings of the board of directors where the matter came before your board?

Ans. I have.

15. Will you produce them?

Ans. Yes sir. (Witness producing minutes.)

16. On what date was that meeting held?

A. October 2, 1901. I now produce a certified copy of the minutes of a special meeting of the board of directors of the Peoria Gas Light & Coke Co., held on October 2, 1901, and hand the same to the master for the purpose of being marked for identification.

Mr. TICHENOR: We object to the use of the copy the original not being accounted for and that being the best evidence.

Mr. Irwin, of complainant's counsel, offers in evidence the copy of the minutes of the proceedings of a special meeting of the
1985 board of directors of the Peoria Gas Light & Coke Co., produced by the witness of date October 2, 1901.

Objected to as incompetent, improper and immaterial, and also as not proper evidence in rebuttal.

The MASTER: The minutes may be admitted subject to the objection made; I doubt, however, their competency as rebutting evidence.

17. Were there any other meetings of the board of directors of the Peoria Gas-light & Coke Co., pertaining to the contract marked Exhibit "32" for the furnishing of gas by the complainant company to the Peoria Gas-light & Coke Co.?

Objected to same grounds as before.

A. Another meeting was held on the 21st, day of October 1901, a certified copy of the record of which I now produce and hand to the master for the purpose of being marked for identification.

Mr. Irwin, of counsel for complainant, offers in evidence the cer-

tified copy, produced by the witness, of the minutes of the proceedings of the board of directors held on the 21st, day of October 1901.

Objected to as incompetent, improper, immaterial and not proper rebuttal evidence.

The MASTER: Same ruling.

18. Did the directors of the Peoria Gas-light & Coke Co., hold another meeting pertaining to said contract marked Exhibit "32" relative to furnishing that company gas by the complainant company?

A. A meeting was held on February 15, 1902, to discuss the proposition of terminating the said contract, a certified copy of the record of which I now produce and hand to the master to be marked for identification.

Mr. TICHENOR: The defendant objects to that portion of the foregoing answer purporting to state the purpose of the meeting and also because the answer is not responsive and moves the court to exclude it.

1986 Mr. IRWIN: I presume that part of the answer stating the purpose of the meeting would be incompetent as the paper would be the best evidence of that.

The MASTER: I think so, but still it will not do any harm.

Mr. Irwin, of counsel for complainant, offers in evidence the certified copy, identified by the witness, of the minutes of the meeting of the board of directors of the Peoria Gas-light & Coke Co., held on February 15, 1902,

Objected to as incompetent, improper, immaterial and not proper rebuttal; because the original is not accounted for and for the further reason that it is, as appears upon the face of it, purely an attempt to manufacture evidence to assist the complainant in this case.

The MASTER: The same ruling as before.

Whereupon the said certified copies of the proceedings of the board of directors of the Peoria Gas-light & Coke Company, held on October 2, 1901, October 21, 1901, and February 15, 1902, so offered and admitted in evidence were marked respectively Exhibits "40, 41 & 42" and were read to the master in the words and figures following, to-wit:—

1987 *Special Meeting of the Board of Directors of the Peoria Gas Light & Coke Company.*

Special meeting of the board of directors of the Peoria Gas Light & Coke Co., convened at the office of the company, in the city of Peoria, Illinois, on the 2nd day of October, A. D. 1901, at the hour of 9.30 o'clock a. m., at the call of the president.

Present: Abbott, Chubbuck, Johnson and McKinley,

The meeting was called to order by the president, who stated the object of the meeting to be to consider the condition of the gas plant

of the company in the city of Peoria, the repairs and improvements required to be made thereon, in order to continue the supply of gas to its consumers, and in case it may be thought best, to negotiate for the supply of gas required by this company with the Peoria Gas and Electric Co. whose plant is new and said to be of ample capacity to supply all the gas consumed in the city of Peoria.

The president also stated that a large amount of repairs would be required at once in order to continue to manufacture gas in the plant of this company economically and prevent heavy leakage and waste.

After a general discussion of the condition of the plant, the cost of repairs and renewals required to manufacture gas to deliver the same to its consumers economically, Mr. Chubbuck offered the following resolution, which on motion, duly seconded, was adopted by the unanimous vote of the board present, viz:—

Resolved: That the president be, and he is hereby authorized and instructed to negotiate with the Peoria Gas & Electric Co. for a sufficient amount of gas to supply the consumers of this company, and report his actions in that behalf to this board at an ad-
1988 journment of this meeting, to be convened at the call of the president as soon as such negotiations may be had, for the further consideration of this board—and

Be it further resolved, That all contracts for material and repairs toward the repair and renewal of the plant of this company be withheld until such negotiations with the Peoria Gas & Electric Co. may be concluded.

There being no further business before the meeting on motion the same adjourned to meet at the call of the president.

W. B. McKINLEY, *President.*

W. T. ABBOTT, *Secretary.*

STATE OF ILLINOIS, } ss:
Peoria County, }

I, W. T. Abbott do hereby certify that I am secretary of the Peoria Gas Light & Coke Company and keeper of its records; that the annexed and foregoing is a true copy of the records of a special meeting of the board of directors of the said company, held October 2nd, A. D. 1901, of which it purports to be a copy, as the same appears upon the records of said company.

Witness my hand and the seal of said company, this 17th day of September, A. D. 1902.

W. T. ABBOTT,
Secretary of the Peoria Gas Light and Coke Company.

[CORPORATE SEAL.]

1989 *Special Meeting of the Board of Directors of the Peoria Gas Light & Coke Co.*

Special meeting of the board of directors of the Peoria Gas Light & Coke Company held at the office of said comapny in the city of Peoria, Illinois, on the 21st day of October, A. D. 1901.

Present: Abbott, Stevens, McKinley and Johnson.

The meeting being called to order by the president, the secretary was instructed to read the minutes of the last preceding meeting, which on motion were duly approved.

The president then stated that he had sent a communication to the Peoria Gas & Electric Company as directed at the last preceding meeting of this board requesting said company to make a proposition to this company for the furnishing of a sufficient amount of gas to supply its consumers throughout the city of Peoria and adjoining territory, and that he had received a proposition for the consideration of the board which was in the hands of the secretary and that the secretary would now read the same which is as follows:

That the Peoria Gas and Electric Company will manufacture and furnish to your company a sufficient amount of gas to supply your consumers and customers upon substantially the following terms and conditions:

First. That the Peoria Gas & Electric Company will furnish to the Peoria Gas Light & Coke Co. a sufficient amount of gas of good quality, to supply its consumers in the city of Peoria, Illinois, at the rate of seventy-five cents per thousand cubic feet.

1990 Second. That all leakage or loss of gas between meter in the gas plant of said Peoria Gas Light & Coke Co. in said city and the delivering thereof to the several consumers of said Peoria Gas Light & Coke Co. shall be accounted and paid for at trate of fifty cents per thousand cubic feet of gas so furnished.

Third. That the amount of gas so furnished to be paid for at the different rates above designated shall be determined by the difference between the amount as shown by the station meter in the gas plant and the amount registered by the several meters set for consumers by the Peoria Gas Light & Coke Co. throughout said city of Peoria, and the Peoria Gas & Electric Company its officers and employés shall at all times have free access to the plant and premises of the Peoria Gas Light & Coke Co., to examine said station meter and shall also have the right to read and take the measure of all meters set to private consumers throughout said city of Peoria.

Fourth. That the Peoria Gas & Electric Company shall have the right to enter upon the premises of the Peoria Gas Light & Coke Co. and lay all necessary pipes and make all necessary connections with the meters and gas mains of the Peoria Gas Light & Coke Co. in its plant in the city of Peoria.

Fifth. That any contract entered into for the furnishing of gas above provided shall be for a term of not less than ten years.

Sixth. That settlement for all gas furnished shall be made monthly on or before the 15th day of the month following that for which gas may have been furnished as above.

Seventh. That the Peoria Gas & Electric Company shall have full charge during the term of any such contract of all meters set
1991 by the Peoria Gas Light & Coke Co., for the measurement of gas to its consumers, and shall have the right to make such repairs and changes from time to time as may be necessary to secure a proper measurement of any gas so furnished; and shall also have the right to make any repairs or improvements to any main, gas or service pipes owned by your company, to prevent unnecessary waste or leakage of gas, such repairs and improvements to be at the expense of the said Peoria Gas Light & Coke Company and to be made at cost.

After a general discussion of the proposition submitted by the Peoria Gas & Electric Company, Mr. Stevens offered the following resolution:—

Resolved, That this company hereby accept the proposition of the Peoria Gas & Electric Co. for the furnishing of gas to this company with which to supply its consumers and customers, and that the president be, and he is hereby authorized and instructed to enter into a contract with said Peoria Gas & Electric Company in the name of this company duly attested with its seal, for such supply of gas for a period not exceeding ten (10) years upon the terms and conditions in said proposition named, placed in proper contract form, with such additional recitals as will properly protect the interests of each respective company.

On motion, duly seconded, the president stated that the question was upon the adoption of the resolution as read, and the same receiving the unanimous vote of all the board present was declared duly adopted.

There being no further business before the board, on motion, the same adjourned.

W. B. McKINLEY, *President.*

W. T. ABBOTT, *Secretary.*

1992 STATE OF ILLINOIS, } ss:
Peoria County, }

I, W. T. Abbott, do hereby certify that I am secretary of the Peoria Gas Light & Coke Comapny and keeper of its records; that the annexed and foregoing is a true copy of the records of a special meeting of the board of directors of the said company, held October 21st, A. D. 1901, of which it purports to be a copy, as the same appears upon the records of said company.

Witness my hand and the seal of said company, this 17th day of September, A. D. 1902.

[CORPORATE SEAL.] W. T. ABBOTT,
Secretary of the Peoria Gas Light & Coke Company.

1993 *Special Meeting of the Board of Directors.*

PEORIA, ILLS., *Feb'y 15th* 1902.

A special meeting of the board of directors of the Peoria Gas Light & Coke Co. was held at the office of the company, in the city of Peoria, February 15th 1902, at the hour of ten o'clock a. m. pursuant to notice duly given by the secretary as provided by the by-laws.

Present: W. B. McKinley, W. L. Johnson, J. S. Stevens, and W. T. Abbott.

The president stated that the object of the meeting was to discuss the question of terminating the contract between this company and the Peoria Gas & Electric Company dated October 21st 1901, as the company was now delivering gas to consumers at a loss; and that it was desirable to terminate the said contract.

On motion of J. S. Stevens, duly seconded, the following resolution was adopted by unanimous vote:—

Whereas this company has been purchasing gas from the Peoria Gas & Electric Company at the rate of seventy-five cents per thousand cubic feet under the terms of a certain contract—dated October 21st, 1901, and

Whereas, it appears from the statement of the business of this company, that this company is delivering such gas to its consumers at a loss, by reason of the expense of the delivery of the same, and the operation of its office, etc.; and

Whereas, under the terms of said contract, the same may be terminated on six (6) months' notice upon the conditions therein expressed;

1994 Therefore, resolved: That the president of this company be, and he is hereby authorized and directed to take such steps as may be necessary to place the plant of this company in good repair, and that he notify the Peoria Gas & Electric Company, forthwith, that this company will terminate the said contract of October 21st, 1901, under the terms thereof, at the expiration of six (6) months from the date of the notice.

There being no further business, the meeting then adjourned.

W. B. McKINLEY, *President.*

W. T. ABBOTT, *Secretary.*

[CORPORATE SEAL.] W. T. ABBOTT,
Secretary of the Peoria Gas Light & Coke Company.

1995 19. Are you familiar with the business transactions between the complainant company and the Peoria Gas-light & Coke Co., under the contract referred to marked Exhibit "32"?

Ans. I am.

20. Can you tell the amount of gas furnished by the complainant company to the Peoria Gas-light & Coke Co., under the contract Exhibit "32"?

Objected to as incompetent and improper, the books of the company being the best evidence of what was actually done.

The MASTER: The witness may answer subject to the objection.

A. I can.

21. State if you please?

Objected to same grounds as before.

A. In round numbers one hundred and four million feet in the ten months of operation under that company.

22. State whether that contract was terminated in pursuance of the proceedings of the board of directors of the Peoria Gas-light & Coke Co., held on the 15th, day of February 1902?

Objected to as incompetent, improper and immaterial, the record being the best evidence of that.

A. It was.

23. About what date?

Objected to same grounds as before.

A. August 19, 1902—the night of August 19, 1902; the operation of the manufacturing plant of the Peoria Gas-light & Coke Co., being resumed on August 20, 1902.

24. Can you tell what amount of money was paid to the complainant company by the Peoria Gas-light & Coke Co., for gas furnished under the contract Exhibit "32," during the period the same was in force?

Objected to same grounds as before.

The MASTER: If he knows of his own knowledge he may state; he may answer subject to the objection.

1996 A. I can.

25. How much?

Ans. $76.654.87.

26. Can you state the amount of gas that was settled for by the Peoria Gas-light & Coke Company and paid to the complainant under the contract marked Exhibit "32"? at the rate of 75c. per thousand cubic feet as named in that contract?

Objected to as incompetent, improper, immaterial, not the best evidence and not proper rebuttal.

The MASTER: The witness may answer subject to the objection.

A. I can.

27. What amount was settled for in that way?

Objected to same grounds; same ruling by master.

A. In round number 94,400.000 cubic feet.

28. Can you tell the amount of unaccounted for gas that was settled for at the rate of fifty cents per thousand cubic feet as named in the contract Exhibit "32"?

Objected to same grounds; same ruling by master.

A. I can.

29. Will you please state?

A. Ten million and some odd thousand cubic feet.

29. Can you tell what was the cost of the distribution of the gas so purchased from the complainant during the existence of the contract marked Exhibit "32"?

Objected to same grounds as before.

The MASTER: I do not think it competent, gentlemen.

Mr. IRWIN: It simply goes to one of the particular features of this case as to what was the cost of the distribution of gas; the defendant has put in evidence as to what it would cost to distribute that amount of gas.

The MASTER: That is a matter in chief and besides it appears in this record the complainant company was to no expense as

1997 to the cost of the distribution of the gas.

Mr. MANSFIELD: All the expense of distribution was paid for by the Peoria Gas-light & Coke Company.

Mr. IRWIN: No, the only thing shown in the record is this; they took the amount of gas manufactured by complainant company and then proved what the cost would be to distribute that gas through 26½ miles of mains and 1758 meters. Now, anything we can show in rebuttal of that to show what it did cost to distribute that amount of gas is proper rebuttal on that testimony.

Mr. TICHENOR: We take the position that it is immaterial in this

case what cost or expense the Peoria Gas-light & Coke Co. may have incurred on account of distributing the gas, or what anybody else or any other corporation may incur; the question is, what the complainant company has incurred; those other matters are entirely immaterial in this inquiry.

Mr. IRWIN: The master can readily see from the testimony in the record as it now stands that it would give any court or any individual, that does not know the facts, a wrong impression; the testimony of the experts put on the stand by the defendant figured upon a false hypothesis; they charged up the expense of distribution of all of that gas that was manufactured to 26½ miles of mains and 1758 meters, the number of miles of mains and the number of meters the record at that time showed complainant had, and on cross-examination we asked them as to the average amount of gas used per meter throughout the country and if the amount they stated were charged up to this particular number of meters it would amount to over 100,000 feet a year to each consumer; the leakage was also charged up to that length of mains in stating what that amount of gas could be manufactured and delivered for in the city of Peoria.

Mr. TICHENOR: Our testimony was based on the fact as it actually existed there. Now, if under the conditions existing the
1998 Peoria Gas & Electric Company can manufacture and distribute gas at a less rate than can be done anywhere else in the country, we are entitled to the benefit of it; the condition is one they themselves created and we took it exactly as it exists; they reported their own meters in action and all the other details upon which the estimates of our experts were based.

Mr. IRWIN: We want to show the facts as they actually existed there; we propose to show this gas, instead of being distributed through 26½ miles of pipe was distributed, as a matter of fact, through nearly 80 miles of pipe and through 7000 meters instead of 1758 meters; we further propose to show that if we were delivering that amount of gas to ordinary consumers we would have to double our main system in extent and cost and more than multiply the number of our meters by three.

Mr. TICHENOR: That merely involves a trial of the other case with this one; I think we are entitled to have the testimony taken separately and it is an entirely immaterial matter what is done with that gas after it is delivered by complainant company or what expenses are attached to the distribution of it; complainant company had nothing to do with those expenses whatever.

Mr. IRWIN: The master will remember that we protested against going into the matter of the gas furnished the old company at all, we taking the position at the time, as the master will remember, that the testimony was incompetent, it being an abnormal condition and a matter with which the public had no concern, but the master and court both held the defendant had a right to go into the whole matter and the master has asked us to furnish statements concern-

ing the facts; as soon as the court decided that question we produced the contract between the companies and the contract is in evidence and I think we have a right to go into all the facts pertaining to that contract and the cost of the distribution of that amount of gas.

The MASTER: I do not think the testimony admissible and
1999 the master will adhere to his ruling.

Mr. IRWIN: We do not agree with the master and must insist on the question being answered until the court finally determines it.

The MASTER: If you desire to press the question the witness may answer subject to the objection.

Mr. IRWIN: We do.

A. I can.

30. Will you please state the cost of the distribution of the gas so purchased from the complainant company by the Peoria Gas-light & Coke Co., under the contract Exhibit "32" during the period the same was in force between said companies giving in detail the cost if you can?

Objected to as incompetent, improper, immaterial, not the best evidence and not proper in rebuttal.

The MASTER: The ruling will be the same; the witness may answer subject to the objection.

A. The total cost of the distribution for the 10 months of operation from November 1, 1901, to September 1, 1902, was $66.754.00 or 70 6/10ths, cents per thousand cubic feet of gas sold. That is made up of the following items:—First, salaries of men in the office clerical salaries $5166.66; second, repairs of mains and service pipes $2375.53; reading of meters etc., $1159.31; repairs of meters and setting meters $1973.04; labor and setting of gas stoves $1725.36; taxes for the 10 months $7621.04; insurance $299.25; advertising $1462.60; office expenses, which includes rental of telephone $1730.24; legal expenses, loss and damages $2578.77; incidentals $179.24, making the total of those items $26.291.04.

The other items included in the total I gave are as follows: Officers' salaries, taking one-half of the officers' salaries as charg-able to distribution, for the 10 months $3750; leakage $5000; depreciation, figured for the same period at the rate of 6% per annum
2000 or 5 % for the 10 months, $29.000; expense of resetting the retorts and minor repairs and putting them in operation, which is charged on the basis of 10/24ths, of the total expense of that renewal is $2713.00, making the total, disregarding cents, of $66.754.00. Those figures, reduced to cents on a thousand cubic feet of gas sold, would be, on the first list of items I gave in total 27 8/10ths, cents; on officers' salaries 4c.; on leakage 5c.; on depreciation 31c.; and on the proportion of the repairs, or resetting of retorts there would be over the ten months 2 8/10ths, cents, mak-

ing the total cost of depreciation per thousand cubic feet of gas sold 70 6/10ths, cents.

31. On what basis did you figure the depreciation in the figures just given in your examination as to the cost of the delivery of the gas sold by the complainant company to the Peoria Gas-light & Coke Company under the contract] Exhibit "32"?

Objected to same grounds as before and also because no proper foundation has been laid.

The MASTER: The ruling will be the same.

A. On the construction account of the company as appears from its books and substantially as it appears in the evidence of the witness Mathew Henebery.

32. How does the cost of the plant as appears from the books you refer to compare with the value of the plant as stated by the witness Henebery?

Objected to same grounds as before. Same ruling.

A. Mr. Henebery's statement was that the total investment would run up close to $600.000; the construction account, as carried on the books of the company, shows $580.000, and it was on the latter figure that I estimated the depreciation.

33. Have you made a computation as to the results of the operation under contract marked Exhibit "32" so far as they pertain to the business of the Peoria Gas-light & Coke Company?

Objected to as incompetent, improper, immaterial, not
2001 proper rebuttal, and because the witness has not qualified himself to answer. (Same ruling)

A. The amount received by the company for gas sold was $94.802.80; the amount paid to the Peoria Gas & Electric Company for gas purchased from it was $76.654.87; the cost of distributing the same, including only the items which I first mentioned as clerical salaries, repairs of mains and services, cost of reading meters etc., repairs of meters and setting same, labor and setting in connection with gas stoves, taxes, insurance, advertising, office expenses legal and loss and damage and incidental, which amount in the aggregate to $26.291.04, makes the total of those items of $102.945.91, which as against the income of the company for the same period shows a net loss to the company for those ten months of $8143.11, not including anything for officers' salaries, or any other element of the distribution expenses except those I have above enumerated.

34. Did that expense include anything allowed for depreciation, or interest on the investment?

A. Nothing for either of those items.

Cross-interrogatories by Mr. TICHENOR:

1. State whether or not the Peoria Gas-light & Coke Co., has had an accountant during the period covered by your testimony? If so, who?

Ans. It has; Mr. H. W. Bicknell.

2. Is he a skilled accountant?

Ans. He is.

3. State whether or not the books of account of that company have during all that time been in his exclusive charge and have been taken care of by him?

A. They have been in the office of the company and under his charge.

4. How many, if any, assistants has he had in keeping the accounts proper of the Peoria Gas-light & Coke Company?

A. Mr. Benson assists him to a considerable extent in his personal work.

2002 5. Is Mr. Benson also a bookkeeper?

Ans. He is.

6. What portion of the time, covered by the 10 months mentioned in your testimony, have you actually spent in that company's office?

A. It would be difficult to say; probably 2 or 3 times a week, varying from half an hour to an hour and a half or two hours.

7. What has been your business during the time in question?

A. I have been a practicing attorney engaged in general practice in the city of Peoria.

8. What is the name of the firm with which you have been associated during all that time?

Ans. Stevens, Horton & Abbott.

9. Is Mr. Stevens, a member of that firm, the same Mr. Stevens mentioned in the record of the proceedings of the board of directors of that company?

Ans. He is.

10. You and Mr. Stevens are both stock holders of that company, are you not?

Ans. Yes sir.

11. And have been for a number of years?

A. I don't know how long Mr. Stevens has been a stock holder; I have not been a stock holder for a very long period; I became a stock holder just prior to my election as secretary and director.

12. Did you become a stockholder for the express purpose of associating yourself with the company in that official capacity?

A. I was requested to become associated with the company in that way.

13. What, if any, work have you performed in the accounting of the company within the period covered by your testimony?

A. I should say that up to the beginning of this period of unusual operation my duties were entirely those relating to the company as a corporation, but during this period of 10 months' operation

2003 I have aimed to make myself thoroughly familiar with the details of the distribution and business as conducted during that time.

14. Did you do that for the purpose of testifying in this case?

Ans. Not entirely.

15. But in part you did, did you not?

A. Well, no, I would not say it was for the purpose of testifying in this case; it was for the purpose of thoroughly acquainting myself with the business with a view to preparation for the trial of the case of the Peoria Gas Light & Coke Company which is still pending.

16. What experience, if any, have you had in technical book-keeping?

A. I have had none in such systems of book-keeping as are there employed; my experience has been confined to simple book-keeping.

17. Is it not true that the basis for your testimony with reference to figures, concerning which you have testified, came from coursory examination of the book and through conversations with Mr. Bicknell, the accountant?

A. No, that is not wholly true, for this reason. The facts which I have testified to I have derived more largely from the vouchers themselves than from the books or conversation with Mr. Bicknell. Under the system of book-keeping which is practiced by the Peoria Gas Light & Coke Company the voucher itself is the foundation of all the subsequent book-keeping and the voucher has enclosed in it the bill for which the voucher evidences payment, the signature of the payee and upon the back of it, before any entry is made upon the books at all, the distribution of the different items to the proper account is made, so that an inspection of the vouchers for a given month show directly and in the first instance the expenses
2004 for that month without any reference to the books, but I have consulted the books, also, and am familiar with the manner in which the items in the various vouchers are distributed on the books.

18. Then your knowledge of the financial results for the period concerning which you have testified is based entirely upon work done by others, is it not, and as to the correctness of which you have no personal knowledge?

A. I have no knowledge of the actual delivery of any of the material or any of the items of the bills in these vouchers; I only know that the vouchers bear the receipt of the parties furnishing such items; of course the work of distributing those items on the book is done by others.

19. You have no personal knowledge of the amount of gas received from the Peoria Gas & Electric Company, have you?

A. I have that only from the record in the case and the records kept by the Peoria Gas Light & Coke Company.

20. The record in this case does not show the delivery for 10 months, commencing with November 1st, 1901, does it?

A. No, I think not exactly.

21. The examination commenced with October 26, 1901, and ended with May 5, 1902, did it not?

A. I have forgotten at this moment the last date.

22. And for all of your information pertaining to this question, you have depended on others, and the testimony you have given simply includes summaries obtained in that way or made up by you from information obtained in that way?

A. Summaries made up by me from the original books.

23. But as to whether those vouchers or the accounts are correct, you don't know?

A. As I have before stated, I simply know that those bills were paid; I could not, of course, say that I am familiar with the
2005 proper cost of any considerable number of those items.

24. During that period, did the book-keeper furnish or take off a trial balance monthly or otherwise?

A. I suppose he did, I know he did at times; I didn't see it always.

25. Did you ever go into the details of those trial balances for the purpose of ascertaining whether or not his work was correct?

Ans. No.

26. What personal knowledge have you that the vouchers, to which you have referred, were in fact signed by the people by whom they purport to be signed?

A. I know the signature- of a great many of them but there are some I don't know.

27. When did you for the first time learn that there was an intention of negotiating with complainant company for the purpose of obtaining from it your gas supply?

A. I could not say whether it was the morning of the day on which that special meeting of October 2, 1901, was held or the day before; as I recollect it, Mr. McKinley called that meeting and told me the purpose of the meeting before it was held but whether it was on that morning or the day before I would not be sure.

28. Does the record, to which you have referred, correctly show the time of the passage of the resolution accepting complainant company's proposition to furnish gas as of October 21st, 1901?

A. To the best of my recollection it does.

29. Prior to that time, was there any authority from the board of directors, directly or impliedly, to enter into any contract of that character with complainant company to your knowledge?

A. I don't think the matter had ever been discussed until Mr. McKinley came to Peoria at that time, that is, among the
2006 directors as a body; Mr. McKinley may have consulted with some of the other directors.

30. But if there was anything of that kind, you had no knowledge, whatever, of it?

Ans. No.

31. Do you remember the date on which that contract became operative?

A. I do not but it was some d-ys, I think, after the 24th of October.

32. Let me refresh your recollection by asking you if it was not the 26th of October?

A. It may be, I will not be sure about that.

33. The Peoria Gas Light & Coke Company's plant shut down not later than the 26th of October, 1901?

Ans. Yes sir.

34. And from that date and after all of its gas supply was furnished by the Peoria Gas & Electric Company?

Ans. Yes sir.

35. When was the pipe system, connecting the two companies' plants for furnishing that gas, put in?

A. I have no personal knowledge of that; I think it appears in the evidence of Mr. Robb; I don't know aside from that.

36. Was it put in to the best of your knowledge between the 21st of October and the morning of the 26th of October?

A. I know this that it was not put in until after the contract was made.

37. But it was put in during those five days, you think?

A. Yes sir.

38. What if anything did you have to do with installing that connection?

A. Nothing; as I said before, I know nothing about that except from the testimony of Mr. Robb.

39. Does this resolution of October 21, 1901, contain the only authority ever given by your board of directors with refer-
2007 ence to a contract of the character in question?

A. So far as I know, it does.

40. Can you state by what authority then a provision was incorporated in the contract itself providing for cancellation upon giving certain notice?

A. Yes sir, that was done under the following clause in said contract, "Upon the terms and conditions in said proposition named placed in proper contract for with such additional recitals as will properly protect the interest of each respective company," as the proposed arrangement was largely experimental to enable the company to determine by that experiment whether it would be better to purchase its gas of the Peoria Gas & Electric Company or at some future time restore its plant to working condition and again resume the manufacture of gas, that provision was inserted when the contract was drawn up a few hours later in the day, as I recollect it, of the day the meeting was held; that was the reason from the standpoint of the Peoria Gas Light & Coke Company why the provision was inserted; there may have been reasons from the stand point of the other company of which I h-ve no knowledge.

41. To what extent were the people then in control of the Peoria Gas Light and Coke Co. skilled in the gas industries?

A. Mr. McKinley is interested in other gas properties and at that time the works were in charge of a competent foreman; I do not now recollect just who was in charge at that time.

42. Is the foreman to whom you refer the same person elsewhere in the record characterized as the superintendent?

A. I mean that person.

43. That was Mr. Eustace, was it not?

A. Now that you recall it to my mind, I think it was Mr. Eustace.

44. Was Mr. McKinley interested in other gas properties in

2008 the State of Illinois?

A. I don't know where his other interests are.

44. How long have you known Mr. McKinley as a gas man?

A. Well, I could not say as to that, because I have only known Mr. McKinley some 5 or 6 months; Mr. McKinley, and those associated with him, acquired control of the property at a time when I was away from Peoria, and I did not meet him, I think, until the month of January, 1901.

45. Who, if anyone, acted as consulting engineer for your company prior to the entering into the contract in question?

A. I do not think there was any; Mr. Eustace performed such duties as ordinarily pertain to that position.

46. Do you know whether or not Mr. Eustace was skilled in the gas business to the extent of having definite and technical knowledge of the cost of construction, maintenance, manufacture, etc.?

A. I know nothing of Mr. Eustace's skill or experience except so far as appears from the record in this case.

47. Did the company at that time have any other adviser in gas matters?

Ans. I don't think they did.

48. With whom did you, as an officer of that company, come in contact in making the contract in question?

A. With Mr. McKinley prior to the meeting and with Mr. McKinley and the other directors who were present at the meeting.

49. With whom representing the complainant company?

A. I had nothing to do with the negotiations with the other company.

50. What knowledge or information did you and the other directors of your company have at that time respecting the fairness or unfairness of the price for gas provided for in that contract?

A. I could not answer for the other directors; for myself I trusted to Mr. McKinley as the executive head of the company to

2009 make such arrangements as he deemed advisable.

51. In connection with the negotiations which resulted in the making of that contract, who took the initiative in suggesting prices?

A. I don't remember; my recollection is that matter was almost entirely in charge of Mr. McKinley.

52. Is it not true that the first indication of what that price would be came from complainant company as referred to in the record of your meeting of October 21, 1901?

A. No, I could not say that.

53. Could you say it is not so?

A. I could say it was not so, so far as I have any knowledge.

54. Is it not also true that all of the planning and preparation and preliminary arrangements were prepared in the office of the complainant company and simply turned over to your company as a matter of form and ceremony to be acted on by the board?

A. No sir, I do not think that is true; (there was ample opportunity between the second day of October and the 21st of October for any amount of negotiation back and forth between the representatives of the respective companies, but what that was I have no knowledge.)

Defendant's counsel object- to that part of the foregoing answer enclosed in brackets as not responsive to the question, being the conclusion of the witness and improper, and moves the court to exclude it.

55. Is it not true that aside from Mr. Little, there was no man representing either company that claimed to have any special knowledge regarding the expense of operating a gas plant, taking in all its details from the commencement of the manufacture to the final delivery of the product?

A. No, I do not think that is true; Mr. McKinley had knowledge of those matters and Mr. Chubbuck also had some
2010 knowledge of the gas business.

56. You are the same gentleman, are you not, whose name appears in the record of this case as examining a number of the witnesses either in chief or in cross examination?

A. Yes sir.

57. And with one or two minor exceptions you have attended all of the sittings of the special commissioner when testimony in the case has been taken since the time you say you first became associated in the case?

A. Yes sir. (I would like to add to my answer that my original connection with the case was, as stated in my direct examination this morning, it being the request of Mr. McKinley that I attend the hearing with a view to a better preparation of our own case and my actual participation in the trial of this case has been entirely through the courtesy of counsel.)

Defendant's counsel objects to that part of the foregoing answer enclosed in brackets as not responsive and improper and moves the court to exclude it.

57. One item of expense detailed by you this morning is for legal expense, loss and damages, $2578.77—that includes, as I understand it, any outlay for legal expenses incurred by the company?

Ans. It does.

58. And that includes such compensation as has been paid to you for your services in this case at least up to the time those figures were closed?

Ans. Yes sir.

59. What other items enter into the aggregate figures stated other than payments made on account of legal services?

A. There are some other items but I do not recall now just what they are; a considerable portion of that, however, is for legal expenses in connection with my services in this case; there has been settlements of some losses on accidents, however, and it ex-

2011 cludes as well the services of our firm as counsel for the company in other matters not relating to this case.

(The MASTER:)

60. Do you mean your regular retainer?

A. Regular retainer.

(Mr. TICHENOR:)

61. What figure did you use as a basis of your estimate for depreciation on the plant?

A. $580,000.

62. Where did you get that?

A. From the construction account of the company.

63. Do you know anything about its correctness?

A. I do not except so far as it is verified by a witness for the defendant, Mr. Henebery.

64. Did he testify the plant had cost them that?

A. His testimony was that it would run close to $600,000. That was his testimony in one place in the record and in another place he said it was between $500,000. and $600,000.

65. That included also all betterments and improvements that had been incorporated in the plant including substitutions from the time he became connected with it in the 60's up to the ultimate disposition of his interests in the company, did it not?

A. Certainly, it was the plant as it stood at that latter date.

66. From what source did you get your estimate of the 6 per cent. depreciation?

A. From the record in this case, from a large preponderance of the witnesses.

67. You have no personal knowledge of that?

A. No, I have no expert knowledge of the business outside of what I have acquired in the trial of this case.

68. You applied that to the $580,000. did you?

A. Yes sir.

2012 69. During what portion of that 10 months was the manufacturing plant of the Peoria Gas Light & Coke Company in operation?

A. None at all except the last few days of August which were not considered.

70. Would the depreciation of the plant be just the same when standing idle as it would if in operation?

A. As a non-expert in the gas business, from my own knowledge

only, I should say a property of that kind would depreciate more during a period when it was not in use than it would when it was in actual operation.

71. Is it not true that your own witnesses testified that the largest element in causing depreciation about a plant is the presence of gases, sulphurous fumes, etc., arising from the manufacture?

A. That would be true of the retort house, and that element of depreciation was, of course, wanting during this 10 months of operation, but my judgment of it is that other elements would be there increasing it, if anything.

72. Would the engine, exhauster and connections, steam boilers, washers, purifyers, and all apparatus of that character depreciate the same when idle as when in operation?

A. The extent of it would, of coyrse, depend on the care taken of it; I do not wish to be understood as saying this would continue to be true for any indefinite length of time.

73. There would be no depreciation in the stack proper would there, standing idle?

Ans. You mean the stack of benches?

74. Yes sir, the destruction of those comes from the intense heat in operation?

A. Do you mean the depreciation of this particular stack or in general?

2013 75. This particular stack?

A. This particular stack was so worn out as to be useless on November 1, 1901, and as it had to be rebuilt entirely before the manufacturing operations could be resumed, it is hard to say what the depreciation would be under that state of facts.

76. What life did your witnesses place upon a stack?

A. I don't remember.

77. It was 20 or 25 years, was it not?

A. I have not it in mind at all.

78. Don't you remember the fact that this stack was just completed before the old company changed hands?

A. The record shows that it is true and in that 2 years the retorts had gone all to pieces.

79. You are speaking now of the clay retorts and not of the stack proper—you do not mean to say that the stack itself had gone to pieces?

A. No, certainly not.

90. The record shows the life of retorts to be about 2 years on the average?

Ans. That is the average of the testimony I believe.

91. Is it not true that substantially all of your knowledge upon the subjects covered by your testimony this morning comes from what others have told you and from a very cursory examination of accounts without going into that detail which would give you a skilled knowledge of any of those subjects?

A. I have already answered that as best I could, that my knowl-

edge comes from a personal inspection and not a cursory one of the original vouchers and from all that has been told me in explanation of the system under which the items in the various vouchers are transferred to the company's books prior to posting them into the ledger account.

2014 92. Is it not true that the only way by which you or anybody else could ascertain the correctness or incorrectness of all of that material pertaining to the accounting would be by having it carefully checked by an expert from the beginning to end or by doing it yourself provided you had sufficient expert knowledge—is there any other manner in which definite personal knowledge upon any question could be obtained?

A. I should consider that the examination which I have given to the accounts together with the fact that these are bills rendered and paid in the usual course of business would give me as good a knowledge on that subject as one could acquire unless he personally inspected and checked every item that came into the works or office and knew of his own personal knowledge of the cost thereof.

Mr. TICHENOR: Defendant now moves to exclude from the record all the testimony of this witness so far as it is based upon a counting in of the expenditures, outlays or disbursements of the company during the 10 months concerning which the witness has testified as incompetent, no proper foundation for the testimony having been laid, and improper; and by way of elaboration I desire to support my motion by a suggestion, already perhaps sufficiently intimated in the examination, that no one except a person who has actually kept the accounts or who has sufficient knowledge of accounting to examine them fully and arrive at his own conclusions could possibly be qualified to testify and then could only testify as to what the books themselves show and not as to whether they are correct or not, the books themselves being the best evidence of their contents.

Adjourned until Wednesday, September 24, 1902, at 10 a. m.

2015 Directors' room, Equitable Trust Co., National Bank building.

CHICAGO, ILL., WEDNESDAY, *Sept.* 24, 1902—10 a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. R. C. Ritcher and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield, city attorney, and Mr. F. H. Tichenor appearing for defendants.

Mr. ABBOTT: At a former hearing, when I was not present, some questions were asked with reference to a schedule of rates of the Peoria Gas Light & Coke Company, and some stipulation was made at that time with reference to its introduction. I have had prepared a statement of those rates from the year 1876 to the present

time which is a correct transcript from the books of the company, but so far as I know there is no person in existence who is able to vouch for the correctness of the entries in the books. This paper is a correct transcript from the books and if counsel for defendant cares to have this statement go in evidence under the stipulation which has been made, we have no objection.

Mr. TICHENOR: We will examine the statement and indicate what we desire in the matter.

DONALD MCDONALD, called on behalf of complainant, being first duly sworn, deposes and says:

Direct interrogatories by Mr. ABBOTT:

1. State your name and residence?

A. Donald McDonald; Louisville, Ky.

2. Are you the same Donald McDonald who has testified for complainant in this case at a former hearing?

Ans. I am.

2016 3. State whether or not you have read the testimony of Frederick Egner and Thomas Littlehales given in this case?

A. I read the testimony yesterday.

4. Are you familiar in a general way with the manufacturing plant of the Peoria Gas & Electric Company?

Ans. Yes sir, I examined it carefully prior to my former testimony.

5. State what necessary items of expense, in your judgment as a practical gas man, if any, were omitted by the witness, Frederick Egner, in his estimate of the cost of the distribution of gas in the city of Peoria, as shown by his testimony in the record of this case?

Objected to as incompetent, improper, immaterial, not the proper method of reaching a question of that character, and further objected to because it leads to the conclusion of the witness with reference to the testimony in question and his interpretation of what the witness had to say on that subject.

The MASTER: The witness may answer subject to the objection.

A. Mr. Egner included nothing for meter readers; as a matter of fact, it will take 28 days' work out of each month to read the 7,000 meters which I understand is the number to be read, and that will cost $672. a year; he included nothing for accident insurance and I think that would cost about $250. a year; he included nothing for complaint men and I think it would require as many as four men at $60. a month and part of their duty would be to answer fire alarms and turn off gas—that would amount to $2880. a year; I saw no estimate of his for meter repairers, which would take a man at about $70. a month and 2 helpers at about $45. per month, which would come to $1900. a year; it is not possible for one horse and

wagon to attend to the amount of business that number of meters and mileage of mains would make, so I have figured for another
2017 horse and wagon $240., and the driver for this wagon and a driver for the other wagon, Mr. Egner put in his estimate, would amount to $1080 a year for the two drivers, unless the city was of such a character that a bicycle could be used and a man could be found young enough to ride — bicycle; it would be necessary for the superintendent of distribution to have a buggy, for he could not get over that mileage of mains as often as he should without a buggy, and I have figured the cost of keeping that buggy at $240. a year—it would not need a driver; Mr. Egner has nothing in his estimate for legal expenses, loss and damage to persons and property; my opinion is that would cost on the average $4,000. a year—I mean people who are hurt and property that is damaged that a company must make good or else stand a lawsuit about it; Mr. Egner has no estimate for a stenographer; without a stenographer the manager would spend two thirds of every winter day answering letters of complaint about bills and services—I think a stenographer absolutely necessary to a gas company of that size, and it would take $720. a year to pay one; there is nothing included in Mr. Egner's estimate for a store keeper; one is necessary and it would cost $720. a year; there is nothing included for a superintendent of distribution; every gas company of any size must have one and $1200. a year would be a reasonable price for one; there is nothing included in his estimate for a crop of complaints—I will call them—that come every year from frost in the winter and nap-thaline in the spring and fall; an average of 10 men employed for 2 months would be a fair estimate for attending to that character of complaint and would cost about $1000. a year; the wear and tear on the horses and wagons, that is, a horse that cost $120. this year has to be sold for $40. three or four years hence—that would amount to about $180. a year; the hunting of leaks and repairing of mains and services, which has to be done every year, will require a foreman and
2018 a gang of about 5 men for about 5 months out of a year and I have figured $2730. as the cost of that; those supplies that are needed by these various gangs would come to about $50. a month during the 8 months they are employed, amounting to $400. a year; There is always a loss due to bad bills—I do not only mean bills not paid at all but bills from which deductions must be made before they are paid; I think one per cent. on the receipts would be a fair estimate for that—about $1500. a year; tools for these various gangs I estimate at $500. a year; these items make a total of $20,232. which must be added to Mr. Egner's estimate in arriving at the cost of the distribution of gas.

6. Have you computed on that basis what that would increase the cost of distribution per thousand cubic feet of gas on a distribution as assumed in interrogatories propounded to the witness Enger and, if so, how much is it?

Objected to same grounds as before. Same ruling.

A. It would amount to 12 9/10 cents.

7. What would that make the total cost of distribution on the hypothesis stated to the witness Egner, and assuming that such items as he took into consideration were correctly figured?

Objected to same grounds. Same ruling.

A. I do not remember the amount per thousand which Mr. Egner finally arrived at; he corrected it several times, but taking his figures and totalling them myself I find the total $27,089.85, which on an output of 156,541,000 cubic feet—that is the amount actually sold after deducting the 5 per cent. leakage which he deducted—would give a cost of 17 3/10 cents per thousand feet to which he adds half a cent for purification; 1½ cents for repairs and 1 2/100 cents for incidentals, giving a total of 20.32 cents as the cost
2019 of distribution. To those figures given by Mr. Egner add 12.9 and that would come to 33.1 cents.

8. Do those figures allow anything for depreciation or interest on the investment?

A. Neither his figures or mine allow for those items.

9. State whether or not in your opinion the item of legal expenses in the management of a gas plant is a persistent and regular item of expense even under normal conditions. If you state that it is, explain in what manner?

Objected to same grounds as before and also as not proper rebuttal.

The MASTER: I do not think it is rebuttal at all.

Mr. ABBOTT: It is rebuttal to the extent it is an item omitted by defendants' witnesses in their estimates of the cost of distributing gas, and it is further rebuttal on the grounds of a possible claim that any legal expense incurred in this suit is an unusual expense, and it certainly is proper for us to show by competent evidence in rebuttal, if such be the fact, that the legal expenses of such an organization is a persistent item under usual conditions and why. For those reasons, we respectfully insist on the question.

Mr. IRWIN: And it especially rebuts Mr. Egner's figures as to what would be the cost of distribution.

The MASTER: I do not think it rebuts his figures at all, it being simply a difference of opinion. The witness may answer subject to the objection.

A. I regret to say it is a persistent item; there are some years a gas company will get through without having occasion to consult a lawyer or pay any such charges but there will be a good many more years when the amount paid for such items will run away above the amount I have put it—there is no way of getting
2020 rid of it. A man threatens a suit against your company, you have to defend it or pay up. You have occasion to make a contract for coal and need a lawyer's advice and in the conduct of a business of that size and of that character my opinion is it is impos-

sible to conduct it without being compelled to continually pay expenses under the heading of legal expenses.

10. State if you please what necessary items of expense in your opinion, as a practical gas man, are omitted by the witness Littlehale in his estimate of the cost of the distribution of gas in the city of Peoria, as shown in his testimony in the record in this case, and on the hypothetical case as presented to him.

Objected to as assuming there were such omissions made and also as incompetent, improper, immaterial and leaving to the witness his interpretation of the testimony of the former witness and also because not proper rebuttal.

The MASTER: The witness may answer subject to the objection.

A. I am unable to answer it for the reason Mr. Littlehale made his estimate in cents per thousand feet for each item and I have no way of knowing what items he has included in those cents per thousand cubic feet. The fact is that it will cost a certain gross sum to run a business requiring a given number of meters and having a given mileage of mains and whatever the output happens to be has got to be prorated into that cost in arriving at the cost of distribution. I am not able to check Mr. Littlehale's figures and all I can say is they come to a very much smaller sum per thousand cubic feet than my own knowledge of the absolute necessary expenses of the distribution leads me to think sufficient.

11. State what in your opinion as a practical gas man is the more important element in determining the cost of distribution—whether it is the extent of the output, or the number of miles of pipe and number of meters, and explain your answer?

2021 Objected to as incompetent, improper, immaterial and not proper rebuttal. (Same ruling.)

A. The output has very little to do with it; a meter will require the same attention if it is selling 5,000 feet of gas per month as it would if it were selling 50,000 feet of gas per month; the determining factors are the mileage of mains, the number of meters to be cared for, the character of the streets and yards through which the services are laid; it will cost almost as much to run the distribution department during the summer months as it will during the winter months, yet the output in summer will not be one-third or one-fourth of what it is in the winter; if a competing company comes along and takes away half of your business, you cannot cut down your distribution expenses at all but you prorate them over the gas you distribute, so the cost of distribution would be doubled—I mean by taking away one-half of the business taking away one-half of the output. I want to add if it took away a portion of the meters you would be able to cut down to that extent the expense of distribution.

12. State what the average distribution of gas per mile of main per annum is in cities approximately the size of Peoria and larger?

Objected to same grounds as before.

The MASTER: I think that competent in rebuttal; he may answer.

A. It is about a million per annum per mile.

13. What is the average distribution of gas per annum per meter in cities approximately the size of Peoria?

Objected to same grounds as before.

A. It is about 20,000 feet per annum per meter.

14. State whether from your knowledge and experience as
2022 a practical gas man you would say it is true that the average consumption ever reaches six or seven thousand cubic feet per annum *per capita* in American cities?

Objected to same grounds as before.

A. I would say it did in places like the suburbs of big cities where rich people live where there is only one or two houses to a block and they are very large houses; in any ordinary city or town it would never reach any such average output *per capita*.

15. What is the average consumption *per capita* in America in cities approximately the size of Peoria where no unusual conditions exist either in the way of large manufacturers using gas for fuel or rich suburbs such as you include in your former answer?

Objected to same grounds as before.

A. It will run from 1500 to 2500—2500 would be high—2000 feet per annum per inhabitant is about a fair estimate.

(The MASTER:)

16. Do you mean *per capita* of the entire population within the city or within the district in which distributing mains are laid and gas supplied?

A. I mean in a city on the assumption the gas company will reach all the streets built up well enough to make it pay to lay mains; there will be a certain scattered population in every city which are not reached by mains.

(Mr. ABBOTT:)

16. How many meters in your opinion would be required for the distribution of 160,000,000 feet of gas per annum under usual and ordinary conditions in a city of the size, character and location of Peoria?

Objected to same grounds as before.

A. It would take about 8000 meters.

17. How many miles of mains in your opinion would be required to distribute 160,000,000 cubic feet of gas per annum in a city of the size, character and location of the city of Peoria under
2023 usual and ordinary conditions of gas distribution?

Objected to same grounds as before.

A. About 70 or 80 miles.

18. What provision would need to be made in the ordinary conduct of a business of a gas company in a city of the size, location and character of Peoria to repair and replace pipes and meters assuming a consu-ption of about 160,000,000 cubic feet per annum?

Objected to same grounds as before.

The MASTER: I do not think that rebuttal evidence but the witness may answer subject to the objection.

A. You would have to have a gang of men with a competent foreman to go over the town periodically, driving holes through the street pavements to see where gas will flash and burn, digging up and covering those places and repairing whatever leaks are found; if you fail to do that your leakage account will run so high there would be great loss and you would be apt to have explosions and axphyxiations also which cost a good deal.

19. How many men need to be employed for that purpose and what would be the expense attendant thereon?

Objected to same grounds as before.

A. I figure on a foreman at $3. a day and five men at $2. per day each for 7 months in the year, making a total of $2730. a year.

20. What provision would need to be made for the installation, maintenance and repair of services and mains in a city of the size of Peoria under ordinary conditions, assuming the company would send out 160,000,000 cubic feet per annum?

Objected to same grounds as before.

A. That was included in my last answer.

21. Did you note the amount allowed by the witness Egner for repairs?

2024 Objected to same grounds.

A. 1½ cents per thousand on the amount of gas sold.

22. In your judgment as a practical gas man, how far would that allowance made by the witness Enger go in maintaining the repairs of a gas plant?

Objected to same grounds.

A. It would not begin to cover it.

23. Would it in your judgment cover much more than the necessary repairs on the retorts in view of the rapid deterioration which takes place in them?

Objected to same grounds as before and also as leading and suggestive.

A. It would not.

24. If the amounts as estimated by the witness Egner for repairs were as a matter of fact no more than sufficient to cover the repairs

on retorts you may state whether or not the other items which you have given for repairs and replacements of mains, services and meters are necessary to be taken into consideration in determining the cost of the distribution of gas.

Objected to same grounds as before and also because the witness has fully answered.

The MASTER: I think that has been fully answered but he may answer again.

A. I would consider the expenses I indicate as necessary in addition to the amounts given by Mr. Egner.

25. In the management of the distributing department of a gas company, is it necessary to take into account the maintenance of tools and equipment of that department?

Objected to same grounds.

A. It is absolutely necessary; tools wear out and become lost and you have to replace them.

2025 26. What would you estimate to be the usual and ordinary expenses incident to that department?

Objected to same grounds.

A. I have included in my estimate $500. a year for that item.

27. Assuming that the Peoria Gas & Electric Company is delivering through its own distribution system an average of 20,000 cubic feet of gas per annum per meter and 1,700,000 cubic feet of gas per annum per mile of main, you will please state whether in your opinion as a gas expert the output of the Peoria Gas & Electric Company can be materially increased without additional extension of its main system and additional meters?

Objected to for the same reasons heretofore stated.

The MASTER: He may answer subject to the objection; I don't think it competent as rebutting testimony, however.

A. I would say that in order to get an increased output it would be necessary to lay new services, new mains and provide new meters; you have probably reached the maximum of the output per meter and per mile of main now.

28. Do you know the plant of the Louisville Gas Company in Louisville, Ky.?

Ans. Yes sir.

29. State whether or not that is equipped with inclined retorts?

Objected to same grounds as before.

A. It is equipped with a very fine system of inclined retorts.

30. Is that the system in Louisville equipped with inclined retorts referred to in the testimony of the witness Egner?

Objected to same grounds.

A. Yes sir, it is.

31. Is it the only one there so equipped?

Objected to same grounds.

2026 Ans. Yes sir.

32. State in a general way the location of that company's gas plant in the city of Louisville having special reference to its accessibility for the delivery of coal from the river and the cheap handling of coal and other material?

Objected to same grounds.

A. Their plant is located near the Ohio river and has also a railroad track running into it. In other words, they are well equipped for receiving either river coal or railroad coal.

33. What effect would that location have on the cost of coal delivered to the plant and actually delivered at the retorts?

Objected to same grounds.

A. It enables them to receive their coal much cheaper than they would do if they were in a city off of the Ohio river or if they were located away from the river in Louisville.

34. State if you know the prevailing prices charged by that company for fuel and illuminating gas furnished through its distributing system to the citizens of Louisville?

Objected to same grounds.

A. I am one of their customers and I know their prices; they charge $1.00 per thousand net for gas furnished for light and 75 cents per thousand net for gas furnished for fuel; the lighting price has been reduced within the last few years from $1.35 per thousand.

35. Of the total amount of gas furnished to consumers by the Louisville Gas Company, do you know the respective proportions sold for fuel and illuminating purposes?

Objected to same grounds.

A. I do know; they furnish 70 per cent. for light and 30 per cent. for fuel.

36. At the respective prices for fuel and illuminating gas
2027 which you have testified to and the proportionate amount sold for each, what is the average price received by that company for all gas delivered by it?

Objected to same grounds.

A. 92½ cents per thousand cubic feet.

37. State if you know the extent of the distribution system of the Louisville Gas Company, the number of miles of mains and services it has and the number of meters through which its gas is distributed?

(Objected to same grounds.)

A. They have about 180, miles of mains, 19,000 meters and I don't know how many services but the number of services is approximately the same as the number of meters, but not exactly the same.

38. State if you know the cost of Youghiogheny coal delivered at Louisville at the works of the Louisville Gas Company?

Objected to same grounds.

A. It is about $1.75 per ton on the average from year to year they get it by barge.

39. State if you know whether the Louisville Gas Company is operating under a special charter from the State of Kentucky, and if so, about when the same was obtained?

Objected to same grounds as before and also as not the best evidence.

The MASTER: I do not see the materiality of it. What difference does it make whether they operate under a general or special charter?

Mr. ABBOTT: That is a fact I cannot very well expose at the present time. I will state, however, that this line of examination is a foundation for further evidence.

The MASTER: The witness may answer subject to the objection.

A. They are operating under a special charter passed by
2028 the legislature about 1888 and concurred in by the city council of the city of Louisville. In other words, both the State and city are parties to it.

40. State if you know whether in accordance with the requirements of said company's charter, or any agreement between it and the city of Louisville by ordinance or otherwise, the said Louisville Gas Company furnishes a report to the city of Louisville, or State of Kentucky, as to the cost of manufacture and distribution of gas delivered by it in Louisville?

Objected to same grounds as before.

A. It makes no report to the State but it does report every year to the city of Louisville the cost of the gas and the other operations of the company.

41. Are those reports published, if so, under what authority?

Objected to same grounds as before.

A. They are published in the annual reports published by the city; the last one, however, was not published.

42. Are you familiar with the natural gas as a competitor of artificial gas?

(Objected to same grounds.)

A. Very familiar. Natural gas is such a serious competitor of an artificial gas company that if a natural gas is found in quantity

sufficient to supply the needs of a town, the artificial gas company there might as well go out of business; I advised a friend of mine in the artificial gas business that unless he could buy the natural gas wells to sell his plant and mains to them before they laid mains of their own. I did that from my own experience and observation as to the effect of the competition.

Cross interrogatories by Mr. TICHENOR:

1. With what gas company are you associated?

A. The Kentucky Heating Company of Louisville.

2029 2. In what business is that company engaged?

A. It furnishes natural gas and during those times of the year when the supply of natural gas is insufficient it makes artificial gas and sells it to the people.

3. Does it also furnish illuminating gas?

A. It does not. The law as expounded by the court of appeals of Kentucky says natural gas can be used for illuminating purposes but when mixed with artificial gas it must not be, so our practice in selling gas conforms to that decision and it is made our duty to see to it that our gas is not used for lighting purposes during the season of the year it is mixed and that is the season people want gas for lighting during the winter season.

Interrogatories by Mr. ABBOTT:

4. State whether natural gas is a competitor both with illuminating and with fuel gas and if it is a stronger competitor in either line state in which and your reasons therefor.

Objected to by defendants same grounds as before.

A. It is the strongest competitor in the line of heating and cooking, but for lighting purposes, also where the output is large enough to make the bills amount to anything, natural gas will drive out artificial gas every time; they use a Wellsbach burner as well as the other gas and the much smaller cost of it, the lower amount required to give light induces the hotels, restaurants and business places—all the people who burn a large quantity of gas, to change to natural gas, leaving the other gas company only the small consumers who don't think it worth while to make the change.

5. What elements, if any, in addition to the original source of supply, are there which lessens the cost of distribution of natural gas to a considerable extent as compared with artificial gas?

Objected to by defendants same ground as before and also because that question was all gone into in chief.

2030 A. The chief element is the larger output per meter; the next element is its freedom from any source of deposit in the mains and a consequent lessening of the number of complain-s that must be answered.

Mr. TICHENOR, resuming:

6. How long has your company been engaged in the business to which you have referred?

A. We began furnishing natural gas in 1889 and began supplementing it in 1893; I say our company—the original company went into bankruptcy and was re-organized in 1891 so the present company only dates from 1891; I was connected, however, with both companies.

7. And your answer refers to the entire period covered by the existence of both companies to date.

A. It does.

9. Has your company at any time since its organization in 1889 furnished illuminating gas in the city of Louisville?

A. We furnished a good deal of gas which was used for lighting, whether or not it was illuminating gas depends on how I construe the word.

9. My question was intended to cover that fact for light purposes?

A. I do not mean to quibble but that question was fought over in a three years' law suit; we furnish some for lighting purposes but we furnish a great deal larger quantity for heating purposes and the people use it for light.

10. Over what portion of the city of Louisville, as compared with the territory occupied by the Louisville Gas Company has your company operated and is it operating at the present time?

A. Generally speaking, the part of the city covered by our
2031 mains is more densely built up than the part of the city covered by the mains of the Louisville Gas Company.

11. Are you speaking now with reference to the entire distributing system of the two companies?

A. I am; of course, the Louisville Gas Company covers all the territory we cover and in addition they cover a good deal of territory we do not cover, and the territory they cover and we do not is not as well built up as that we cover.

12. Are you at the present time and have you in years past been furnishing gas to the citizens of Louisville for illuminating purposes?

Objected to as already answered, incompetent and immaterial.

A. We did furnish it for a little while and were enjoined by the court at the suit of the Louisville Gas Company on the ground it had the exclusive privilege of furnishing gas to the city of Louisville and on the further ground that our ordinance from the city limited our use of gas to heating purposes only and during the pendency of that injunction we allowed no one to use our gas for lighting and since the termination of that suit the use for lighting has been so limited; we have never encouraged it; the use of our gas for lighting had just gotten well started when this suit was brought and that stopped it; the reason it had just got started well

was that the Wellsbach burner, which is absolutely necessary to obtain light from natural gas, was only brought down to a cost where it could com- into general use about 1898 at the time this use I have spoken of begun.

13. Do we understand your testimony to the effect that natural gas cannot be used as an illuminant except through the Wellsbach burner?

A. Yes sir, that is true; you can get light from natural gas
2032 through what is called the Jumbo burner but the light is so bad and smokes the ceilings so that nobody would think of using it only the very poor.

14. Is it not true that for many years in the natural gas field in Indiana people have used natural gas exclusively for illuminating purposes?

A. Where that was done, it was a gas that carried with it a very large amount of vapor of oil which gives it a higher illuminating power than natural gas ordinarily has; where natural gas is found in the ground in conjunction with oil, it carries a little oil like benzine along with it and it will give a higher candle power than natural gas.

15. You have no knowledge, then, of the exact situation in the natural gas field on that question?

A. Yes sir, I have; I have been up there and inquired about it, looked at the grease in the burners and have seen them using gas there for illuminating purposes in the poorer class of houses.

16. Is it not also true for a number of years some of the towns were lighted exclusively with natural gas?

A. Through open tips? I know of no such case; I would not say there has not been such a case.

17. And the streets lighted in the same manner?

A. That is true; the streets, however, were lighted by what would not be called a gas light, it was a flambeau; a gas light is a thin flame smaller than a man's hand and in a flambeau the gas is first started by its own flame which increases the candle power and they burn it at from 100 to 150 feet per hour; those flambeaus were used to light the streets with.

18. What has been the output of your company per annum during the last 4 or 5 years?

2033 Mr. ABBOTT: We object to the question as not cross examination and inquiring into the private business of this witness, and we instruct him he need not answer the question unless he chooses to do so.

The MASTER: Answer the question subject to the objection.

A. I would rather not answer any questions specifically as to the Louisville Heating Company; we are continually engaged in competition with our rivals and every word I say under oath is carried to them; I found that out in my examination in the other case.

19. To what extent, if at all, does the operation of your company

in the city of Louisville affect the earning capacity of the Louisville Gas Company?

A. Wherever the law has allowed us to compete with them, we have driven them out entirely, that is, they do no cooking at all in the district our mains reach and as long as our gas was allowed to be used for lighting purposes they were seriously crippled by it and they have no domestic heating at all.

20. Does that fact account for their very low percentage of output used for fuel purposes?

A. To a large extent, I would say it did, but of course they have more than 100 miles of mains that don't parallel us, so in that district our competition does not injure them at all.

21. Then you have in all not more than 80 miles in the city?

A. We have not nearly that many; we have not as many as 40 miles; I would rather not say exactly how many we have.

22. Your system occupies the best portion for the kind of gas you are serving, does it not?

A. Generally speaking, yes sir; we pipe a great many streets occupied exclusively by laborers and mechanics and we find
2034 those streets excellent markets for gas, especially in summer; generally speaking our mains are laid in the district best for the sale of our gas.

23. What has been the growth of the business of the Louisville Gas Company since the introduction of natural gas as compared with the same question in other cities of corresponding size?

A. I know of no other city of corresponding size in which natural gas has been introduced under anything like the same circumstances as a competitor for artificial gas. By the same circumstances I mean hampered by legal restrictions as to its use.

24. Then the subject matter to which your last answer refers tends to curtail or limit the output of the natural gas if I understand you correctly?

A. It curtails its use a great deal more than it does its output; by that I mean a man that will use 40,000 feet a month for heating his house even if he were allowed to light it he would not use only 2,000 or 3,000 feet per month to light his house; so while it curtails its value to the consumer, it does not curtail its output much.

(The MASTER:)

25. I am not exactly clear in your testimony on this point. You have given the sum of $20,232, which you say should be added to Mr. Egner's estimate to correctly ascertain the cost of distribution of gas by the complainant company in the city of Peoria?

A. That is assuming that in all cases Mr. Egner put in a sufficient amount for the items which he did include. I have only added items which I consider Mr. Egner omitted entirely.

(The SAME:)

27. That is what I was going to get at. State whether or not you intend that gross sum which you say equals 12 9/10 cents per thousand cubic feet to be added to any estimate Egner made?

2035 A. It should be added to the estimate of 20.32 cents which is the figure resulting from Mr. Egner's figures when the errors in addition are corrected.

Re-direct interrogatories by Mr. ABBOTT:

1. Did you find any errors in the additions in Mr. Egner's evidence?

A. Mr. Egner himself called attention to several errors and I could not ascertain exactly what total he did finally arrive at, therefore, I took his figures totaled them correctly, divided them into outputs correctly and ascertained his figures came to 20.32 cents and my figures 12.9 must be added to that to arrive at the correct cost of distribution on the assumption that the allowances Mr. Egner made for the items he did include were sufficient.

(The MASTER:)

2. In other words, you put the cost at the figures he gave plus 12.9 cents?

Ans. Yes sir.

(The SAME:)

3. Whether some of your items are covered by him or not?

A. I am almost sure none of my additional items are covered by him; I think at least that amount must be added to his figures before you can arrive at the cost of distribution.

(Mr. ABBOTT:)

3. I think perhaps the last question asked by the master is a little misleading. Do you mean to be understood as saying that Mr. Egner's estimate on those items he did take into consideration are correct?

A. The master's question will not bear that interpretation.

(The MASTER:)

4. No, Mr. Egner fixed the amount for certain items for expenses and this witness adds an additional amount to those items and includes the amount allowed by Mr. Egner?

A. I include it but do not assume it is correct.

(The SAME:)

5. In other words, Mr. Egner's estimate is not correct in

2036 some respects and you add sufficient to make it correct?

A. No, I have not criticised at all any of the items Mr.

Egner has put into his estimate; I do not say they are right or wrong; I do say that Mr. Egner has omitted entirely a large number of items which are absolutely necessary and those items I have added together and find them to be 12.9 cents and on the assumption that Mr. Egner's totals were right his figures come to 20.32 cents, although he does not say so, and I add my 12.9 cents to the 20.32 cents resulting from Mr. Egner's figures without saying that is a correct figure because I have not verified it and don't wish to express an opinion that it is either too much or too little, but merely have not verified it.

FRANCIS W. LITTLE, recalled on behalf of complainant, deposes and says:

Direct interrogatories by Mr. ABBOTT:

1. You are the same Francis W. Little who has heretofore testified in this case both on behalf of the complainant and the defendant are you?

Ans. Yes sir.

2. Some evidence was offered by the defendant tending to show that the complainant company at some time had kept a bank account at the Commercial national bank in Peoria. State what is the fact in that regard?

Objected to as immaterial, incompetent, improper not rebuttal.

The MASTER: The witness may answer subject to the objection.

A. The complainant company never kept a bank account with the Commercial National Bank of Peoria.

3. What conversation, if any, did you ever have with Sumner R. Clarke with reference to the opening of such an account at
2037 the Commercial national bank?

Objected to same grounds as before. (Same ruling.)

A. We discussed the matter together and both reached the impression it might be a desirable thing to do but it was left to me and on further reflection I decided not to open the account.

4. State if you know whether or not the complainant company requires in the conduct of its business a working capital in addition to the investment actually shown by the record in its plant?

Objected to same grounds as before.

The MASTER: I do not think it competent as rebuttal but the witness may answer subject to the objection; I think I would take cognizance of that fact without any proof.

A. Yes sir, a working capital is necessary in the carrying on of the business.

5. Has it required such capital from the date of its organization to the present time?

Objected to same grounds.

A. Yes sir.

7. State in a general way for what purpose such capital is required and how much for the several purposes?

Objected to same grounds.

A. A working capital is necessary to carry supplies and materials in the service and meter department of the business, gas stove department and especially in the matter of providing the company with a sufficient supply of coal to take advantage of the market conditions with respect to coal; it is also necessary to have a working capital to enable it to carry on its business of selling coke, tar and ammonia. To explain further in this connection, the difference in the freight rate between the mines and Peoria on Youghiogheny coal is about 60 cents a ton between delivery by water to
2038 Cincinnati and rail to Peoria from Cincinnati, or all rail from the mines to Peoria. In other words, the all rail rate is about 60 cents a ton higher than the rate by way of Cincinnati. In getting coal by way of Cincinnati, however, it is necessary to take it and receive it at Peoria during the period when barges can come down the river as the storage facil-ties at Cincinnati are generally speaking inadequate; the condition of the water in the river frequently prevents any coal coming down for weeks and sometimes months at a time, and then a large number of tows will come down at once; under those conditions we have to get the coal in as many cars per day as we can take care of and store it with the result that at times we have a large accumulation of coal on hand which we have to pay for and hold it until we are ready to use it; the coke has to be handled in a somewhat similar manner; coke is demanded from us in large amounts at certain seasons of the year and in very small amounts at other seasons of the year and we have to accumulate it during the dull season to supply the demand at the more active season or sell it at greatly reduced prices; the summer months are usually the dull season in coke beginning about March and ending about the first of September. The tar market is in much the same condition; we accumulate tar in the wells during the winter months and sell it during the summer months largely to roofers and pavers. Ammonia we have to accumulate until we have at least a car and sometimes two cars on hand.

8. What is the result of making use of this working capital for the purpose of procuring a large amount of coal when freight rates are favorable on an economical working of the plant?

Objected to same grounds as before.

A. We save from 45 to 60 cents a ton in coal by reason of having a working capital sufficient to store the coal and as to a
2039 considerable proportion of our coke we get at least 50 cents and often a dollar more a ton for it than we could get if we had to sell it as produced and could not store it. It requires in

Peoria from $30,000. to $40,000. of a working capital to take full advantage of the coal, coke and tar market.

9. That your answer may be responsive, I will ask what working capital in your judgment could advantageously be employed and should be employed for an economical working of the plant under the conditions as they exist in Peoria?

Objected to same grounds.

A. I think we should never have less than $40,000. available working capital under the conditions existing in Peoria.

10. Directing your attention now to the contract under which complainant company furnished gas to the Peoria Gas Light and Coke Company which has been offered in evidence marked "Exhibit 32" you will please state what effect the enlarged output occasioned by the operation of your plant while furnishing the gas called for under said contract has had upon the general depreciation of the plant as testified to by you on your former examination?

Objected to same grounds as before.

The MASTER: I do not think that competent; I do not think it is rebutting testimony at all.

Mr. ABBOTT: The defendant put in evidence here what we claim is an abnormal condition and operation of the plant, and we certainly have a right on rebuttal to show first the effect on the plant as it at present exists as a result of that contract and in as much as their evidence in a large measure assumes a continuance of that operation we have a right to show if we can that such arrangement could not be continued with the plant in its present condition.

The MASTER: Suppose you rent it for any other purpose,
2040 it is a voluntary undertaking on your part. I think it competent for you to show, if you desire, what effect it had on the economic production of gas, but what effect it had as tending to depreciate the plant I do not see how it becomes material.

Mr. ABBOTT: It becomes material if those months of operation are material at all; we insist they are not, but if they are we certainly have a right to find out all about it.

The MASTER: I do not think it rebutting evidence; it was an undertaking on your part and if the increased output has anything to do with the cheapening of the cost of production that is one question, and if the increased output has anything to do with the depreciation of the plant that is another question.

Mr. ABBOTT: The master cannot mean to hold that under that contract any such facts can be shown as may be favorable to the defendant while those that are favorable to our contention are to be excluded; if this is in for any purpose it must be in for all purposes.

Mr. IRWIN: The master held and so did Judge Humphrey that they had a right to go into the whole work of the plant up to the time of the close of the evidence; if the defendant had a right to

go into it for one purpose we have a right to go into it for all purposes.

The MASTER: For all purposes tending to shed any light on the material inquiry in this case.

Mr. ABBOTT: The material inquiry is the cost of the manufacture and distribution of gas and after showing depreciation is an element of that if they had a right to show anything at all about this unusual operation we have a right to show the depreciation increased by it.

The MASTER: Have you the right to show it on rebuttal?

Mr. ABBOTT: We could not show it in chief for we could not anticipate it.

2041 The MASTER: You could have anticipated the defendant had a right to go into this question up to the close of the testimony, but I think the true rule in equity is this: You are not bound by any rigid rules of evidence and anything that tends to shed any light upon this inquiry is competent at almost any stage of the proceedings; I think the courts are tending to that inclination in regard to equity proceedings. I will admit the evidence subject to the objection and it will be for the court to determine its competency at this stage of the proceedings.

A. The depreciation, during the period referred to, of the manufacturing plant has been greater than normal and greater than the amount I previously testified to as to its probable depreciation, on account of the fact that during a considerable portion of the time the plant was run beyond its normal capacity and beyond the amount of gas for which it was intended. In other words, was forced, naturally resulting in a greater depreciation.

11. Please state whether the manufacturing plant of the Peoria Gas & Electric Company in its present condition is sufficiently large to enable it indefinitely to manufacture the volume of gas manufactured by it during the existence of the contract with the Peoria Gas Light & Coke Company, together with the volume manufactured for its own consumers?

Objected to same grounds as before.

A. No, it is not large enough to continue to make that quantity of gas indefinitely.

12. Would it be feasible in your judgment to continue such volume of manufacture with the present plant, if not, why not?

Objected to same grounds as before.

A. No, it would not be feasible to continue to manufacture that volume of gas in that plant for the reason that the working capacity of the retort house is about 600,000 feet a day—the max-

2042 imum being 630,000 feet a day when all the benches are in good condition. Under the contract referred to last winter we were forced to make 680,000 feet per day and it strained the plant;

the condensing plant was also forced beyond its capacity as it was designed, as shown in my testimony, originally as a 500,000 foot plant and the gas could only be made and furnished while the plant was new and before it became necessary to let down any of the benches for refilling or maintaining extensive repairs. For illustration. The scrubbers and condensers were in continuous operation during the ten months' period and at the close were almost completely stopped up and would have been stopped in a few weeks' longer use absolutely. It is also necessary, and the plant is so arranged, that the different parts of the apparatus can be by-passed for cleaning and repairing; that could not be done during any portion of that time we were furnishing gas under the contract to the Peoria Gas-light & Coke Company.

13. What additional equipment, if any, would be required for the manufacturing plant to enable it to furnish continuously the volume of gas manufactured by it during the ten months' period of that contract, and what substantially would be the cost of such additional investment?

(Objected to same grounds as before.)

A. It would require at least three additional benches of 9 retorts each with a house to cover them; an additional air condenser; an additional P. & A. tar extractor; another Chollar washer; two more scrubbers and probably one more purifyer. These apparatus would cost, including the foundations with the necessary building for housing the retorts, somewhere from $40,000 to $50,000.

14. In this connection I wish to ask you the reasons from the standpoint of the representatives of your company who had in charge the making of that contract, for the contract containing a provision enabling the same to be terminated at the option of
2043 either party on the notice therein stated?

Objected to same grounds and because the contract speaks for itself.

The MASTER: I think so; I do not think it makes any difference what the reason was; the contract is a contract; what reasons there were for making it is wholly immaterial.

Mr. ABBOTT: We would like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. On the part of the Peoria Gas & Electric Company the matter was determined by myself; I considered the insertion of that clause desirable because I felt quite sure our plant was insufficient to continuously make all the gas and I didn't know at the time what additional apparatus would be required to carry out the contract nor the amount of investment it would take.

15. Assuming that the gas sold by the Peoria Gas-light & Coke Company during the existence of that contract amounted substantially to 100,000,000 cubic feet, that the fair market value in cost of the said company's plant is $600,000, as testified to by a witness for

the defendant, Mr. Henebery, or $580.000, as testified to by another witness, you may please state how much should be added to the cost price of the gas to that company to cover depreciation on the said plant assuming that the depreciation is 6% per annum?

Objected to as incompetent, improper, immaterial, not rebuttal and also as assuming something which does not appear in the evidence; Mr. Henebery did not testify the cost of that plant was $600.000.

The MASTER: I do not think the question competent. Do you desire to press the inquiry?

Mr. ABBOTT: We do.

The MASTER: The witness may answer subject to the objection.

A. On the basis of the cost of the plant being $600.000
2044 the depreciation at 6% would add 36c. a thousand feet to 100,000,000 feet of gas and on the assumption that the plant cost $580,000. 6% depreciation would add 34.8 to the cost of 100,000,000 feet of gas.

16. That is on the assumption of 6% depreciation per annum?

A. Yes sir.

17. On the same assumption as in the previous question, how much should be added to the cost of that gas to cover the depreciation as stated and interest on the investment at 10% per annum?

Objected to same grounds as before. (Same ruling.)

A. Interest at 10% on a cost of $600.000. would add 60 cents a thousand feet to 100,000,000 feet of gas; on the assumption the plant cost $580,000. 10% interest on the cost would add 58 cents a thousand feet to 100,000,000 feet of gas.

18. Please state if you know what is the average distribution of gas per mile of main per annum in cities approximatelt the size of Peoria?

Objected to on the same grounds.

A. Depending somewhat upon local conditions, the average ranges between 1500,000 and 2,000,000 feet per mile of main per annum; under special favorable conditions it sometimes reaches a figure slightly in excess of 2,000,000 feet per mile of main where the territory is thickly built up and the competition of other fuels makes the use of gas economical and desirable.

(The MASTER:)

19. For lighting purposes?

A. For fuel more especially.

(Mr. ABBOTT:)

20. You may state also what is the average distribution of gas per annum per meter in cities approximately the size of Peoria under usual and ordinary conditions of distribution.

Objected to same grounds as before and also because no foundation has been laid.

2045 The MASTER: He may answer subject to the objection.

A. The usual and ordinary amount in cities of that size is about 20,000 feet per meter per annum excepting in the case of those large suburbs of still larger cities where gas is used very extensively for fuel purposes and for gas grates and in that event it may reach an average amount of 30,000 feet per meter; this, however, is very rare.

21. Is it true that the average consumption per annum *per capita* ever reaches 6,000 or 7,000 cubic feet per annum in American cities?

Objected to same grounds as before and also as leading and suggestive. (Same ruling.)

A. No sir.

22. What is the average annual consumption *per capita* in cities approximately the size of Peoria?

Objected to same grounds.

A. Excepting under the conditions just previously referred to, in the case of a high grade residential suburb of a very large city, the average sales *per capita* are from 1700 to 2200 feet, very rarely exceeding the latter figure, except in the case of some suburb such as I have referred to or other unusual conditions.

(The MASTER:)

23. How would it be in a city the size of Peoria?

A. I should say from 2000 to 2500 feet *per capita* would be more than the average; figures ranging between 2000 and 2500 feet would cover 90 per cent. of the cities approximately that size in America including the city of Peoria itself. In other words, the present gas consumption in Peoria is in excess of the average of cities of like size.

(Mr. ABBOTT:)

24. Would the location of large manufacturing industries using coal gas as a fuel in cities also increase the *per capita* and
2046 per meter consumption?

Objected to same grounds.

A. Yes sir, very largely.

25. State whether or not there exists in Peoria any of the unusual conditions to which you have referred either in the way of the use of gas by manufacturers or the existence of large rich suburbs?

(Objected to same grounds as before.)

A. No sir, there are no such special conditions in Peoria; there are no manufacturers that I know of that use any considerable

quantity of gas for fuel and there is no rich suburbs where the consumption of gas is large *per capita*.

26. How does the normal consumption per meter and *per capita* of gas distributed by the Peoria Gas & Electric Company through its own meters and services compare with the consumption in other cities of substantially the same size and character where there are none of those unusual conditions to which you have referred?

Objected to same grounds.

A. The consumption of gas through the mains and meters of the Peoria Gas & Electric Company is fully up to the average both as to meters and miles of main. In other words, the consumption per meter and consumption per mile of main is fully up to the average, in fact, a trifle in excess of the average.

(The MASTER:)

27. Is that true as to both gas used for illuminating and fuel purposes?

A. It was true when we kept separate accounts and I presume it is still true.

(Mr. ABBOT:)

28. What is the average annual consumption by customers of your company per meter?

Objected to same grounds.

A. The average consumption per meter per year is 20,193
2047 feet, that is, the amount of gas sold per meter per year is 20,193 feet, and the amount of gas sold per mile of main is 1,710,400 cubic feet.

29. I think you have already stated th-t those averages both per mile and per meter were fully equal to and a little in excess of the average of cities of similar size?

Ans. Yes sir.

30. In your opinion as an expert and practical gas man, state whether it would be possible to make a further development of the business of your company result in a larger consumption of gas through its present meters and main system and give your reasons for whatever conclusion you arrive at?

Objected to same grounds as before.

A. I see no reason to expect or to believe possible any material increase in the amount of gas consumed per meter or mile of main, since the amount is now up to and above the average and all I think that can reasonable be expected from the territory in question and further material increase must come, in my opinion, from an extension of the main system and securing new business in that way.

31. When you speak of an increase in the main system, state

whether or not you intend to include in that a further increase in the number of services and meters for the purpose of supplying the additional amount?

(Objected to same grounds as before.)

A. N-cessarily so; the additional consumers would each have to have an additional service and meter.

32. That I understand would also involve the additional expense of laying additional distributing mains?

A. Yes sir, additional distributing mains, services and meters; an additional investment would be required in other words.

33. State if you know what is the general practice of gas companies with respect to coating service pipes?

2048 Objected to same grounds as before.

A. Nearly all gas companies coat their service pipes.

34. What are the different materials used for that purpose?

A. Either tar or tar modified by using a little lime to neutralize the acid and some crude rubber with it, or a carbon paint of some sort; generally coating is some of the forms of tar paint.

35. In your former testimony concerning the normal life of services, etc,, did you base such evidence upon the theory that the service pipes were coated in some one of those manners?

Objected to same grounds.

A. Yes sir.

36. What is shown by experience in those matter- as regards the limitations of this protection given by such coating?

Objected to same grounds.

A. Coating does only a certain amount of good; in the first place I know of no material, and have never heard of any material, in the form of paint which will successfully resist acids and especially the acid actually found in the soils of public streets. Again, in order that the coating may dry and not be subject to undue abrasion and removal from mechanical causes, the pipes are almost universally coated before they are laid and allowed to dry; in securing them together the tools that are used necessarily break off or rub off a portion of the coating, leaving at the point of the attack with the tools an exposed part of the pipe which rusts as readily as if there had never been any coating there; in a measure that can be prevented by coating the pipe at the tool mark after putting in the ditch but that comes off in part by almost immediately refilling the ditch and my observation and experience has been that the tool marks leave a bare spot which is subject to the action of the acids in the
2049 soil and the other causes which produce injury to the pipes, but of course, if a pipe is pitted at that point, eaten through at that point, as frequently happens, it is just as bad as if no portion of the pipe had ever been coated.

37. That is no part of the pipe is stronger than ——

A. (Interrupting.) Weakest part.

38. Do you know whether or not the information given to the expert witnesses called by the complainant prior to their examination included information as to the coating of service pipe?

Objected to for the reasons heretofore stated, that being clearly a matter for investigation in chief.

The MASTER: I think so; I don't think it competent.

Mr. ABBOTT: We think it clearly rebuttal for this reason, we have introduced evidence in chief as to the depreciation in the average life of service pipes; the defendant has introduced evidence tending to show that if the pipes were coated their life would be longer and we certainly have a right to rebut any inference which may be drawn from that line of defense by showing our pipes were coated and that the expert witnesses who estimated the life of those services did it on the basis of the pipes being coated.

The MASTER: Were not you obliged to do that anyway in chief whether the defendant introduced any evidence or not touching that question. The witness may answer, however, if you want to press the inquiry subject to the objection.

Mr. ABBOTT: We certainly do.

A. Yes sir, all the witnesses knew that the services were coated and that that was the practice of the company.

39. What is the effect of the imperfections in paint and
2050 coating referred to by you upon the machinery in the manufacturing plant of the company with reference to the possibility of keeping the same absolutely protected?

Objected to same grounds as before. (Same ruling.)

A. I know of no paint which will hold against the action of the sulphurous fumes converted into sulphuretic acid by the moisture around gas works or which will hold against the presence of ammonia; every paint I know of, or have ever heard of, will be disintegrated by the action of these fumes and gases and in a relatively short time, if the machinery is in operation constantly, it is manifestly impossible to keep it painted; it can only be successfully painted by throwing it out of use, which can be done at certain times, and is done at certain times, but it is utterly impossible in my judgment to use any form of paint or coating of pipes which will, be anything like an absolute protection of the metal against the fumes and gases present in a gas works.

40. What is the effect, if any, of the contraction and expansion of the machinery and apparatus on the protection which can be furnished by any coating of which you have knowledge?

Objected to same grounds. (Same ruling.)

A. As to all pieces of apparatus, such as condensers, scrubbers, purifyer covers and apparatus—and apparatus of that sort, there is

considerable expansion and contraction which is transmitted to the joint with the result that the paint is broken at the joint of the metal and water gets in there, or the water due to sweating, condensation of moisture, gets in there, or the metal is attacked at those points by the injurious gases and fumes about the works.

41. And would it not be a fact that under those circumstances the whole apparatus would be affected by the exposure at
2051 certain points in the apparatus in a similar manner as you have already testified and entire service pipes would be affected if it were affected at points near the joints.

Objected to on same grounds and also as leading and suggestive.

A. Unquestionably the injury to a sheet at the joint would be equivalent to an injury to the entire sheet; it would amount to the same thing if the metal is destroyed at that point, it might in a majority of instances, be as well destroyed throughout its entire area and surface.

42. How does the expansion and contraction of the different pieces of apparatus in a gas works correspond to that made use of in other manufacturing establishments?

Objected to same grounds as before.

The MASTER: If he knows, he may answer subject to the objection.

A. It is greater by reason of the different changes in temperature; the fact you are handling hot material instead of cold creates more contraction and expansion—the difference between working temperatures, and where a piece of apparatus for any reason lies idle.

43. What operating causes are there, if any, which result in a depreciation of the covers of purifyers which can be effectively guarded against by merely painting the same?

Objected to same grounds. (Same ruling.)

A. The fact that sulphuretic acid and ammonia is always present in and about purifyers, or the purifyer seals; or as I stated before this will destroy any paint I know anything of, or any kind of grease I know anything of, and will permit injurious acid and fumes to attack the metal itself; of course, we always protect it, so far
2052 as we can, but nothing I know of is an absolute protection against corrosion of the covers of the purifying boxes.

44. What is the cost generally to gas companies in your experience with respect to painting or coating the covers of purifying boxes?

(Objected to same grounds.)

A. The cost is not excessive; paint that is used being paint which costs about 75 cents per gallon—tar that has been prepared by the use of lime and rubber costing about 25 cents a gallon; crude oil costing 3 or 4 cents a gallon; it is more a question of an opportunity

to get at them to paint them when the boxes are in use. If they are in constant use, they are not available for being painted.

45. That is, if I understand you correctly, it involves temporary cessation of some parts of the plant necessary to the economical and proper manufacture of gas?

A. Yes sir, the cover has to be thrown out of use long enough to permit the paint to dry before it is put back into the wet seals.

46. Under the treatment you have just described, what is the average life of a cover of a purifying box?

Objected to same grounds and also because the witness has already covered that in his former testimony.

The MASTER: I think so, but the witness may answer subject to the objection.

A. 7 or 10 years.

47. If the plant of the Peoria Gas & Electric Company in its original construction had been equipped with benches of 6's instead of benches of 9's, what, if any, additional space would have been required for retort house purposes in order to give the retort house the same capacity as a plant as it exists today?

Objected to same grounds.

The MASTER: The witness may answer subject to the objection.

2053 A. One bench of 6's requires almost exactly the same ground area that a bench of 9's does. In other words the ordinary space between the centers of the arches of a bench of 6's is 12 feet 6 inches and in a bench of 9's 12 feet 7½ inches, so a bench of 9's occupies but 1½ inches more ground space than a bench of 6's; a bench of 9's has a capacity larger per retort than a bench of 6's; in ordinary operation 50,000 feet to a bench of 6's is about all that can be gotten out of them having due consideration to the quality of gas being produced; a bench of 9's will readily produce 90,000 feet per bench and even can be pushed above that without any material sacrifice to the quality of the gas, so that, you would have to have at least 11 benches of 6's to equal the productive capacity of 7 benches of 9's which would increase the ground area and the size of the retort house a little more than 50%.

48. At the time of the construction of your plant, or rather the planning for its construction, did you investigate and consider the advantages which you have enumerated of benches of 9's over benches of 6's?

(Objected to same grounds.)

A. Yes sir, it required very little investigation to dispose of that question, and further, because in the situation at Peoria, for the reasons I stated this morning, it was very desirable we should have the very largest possible coal storage area and we did not wish to sacrifice any coal storage for any unnecessary reason, and aside from that, we further considered benches of 9's much more econom-

ical and much better adapted to the gas making business at Peoria than benches of 6's and are still of the same opinion.

49. What effect, if any, does the increasing use of fuel gas have upon the advantages of benches of 9's over benches of 6's?

2054 A. They render it unnecessary to lay off benches in the spring; about the time the winter lighting business grows lighter, the fuel business commences and the fluctuation of the daily output between winter and summer is not nearly so great as before the advent of fuel gas.

50. Some evidence has been offered by the defendant in this case touching advantages claimed for small purifying boxes and using more of them. I wish you would state what the advantages are, if any, in the use of the larger boxes in the way of securing economy of space or in any other manner any economical operation of the plant?

Objected to same grounds and also assuming something that is not in evidence.

The MASTER: The witness may answer subject to the objection.

A. The use of the largest available boxes and the least in number is more economical than to use more boxes of smaller area both from the standpoint of investment and operation; the larger boxes cost less per unit of capacity and they are easier to operate for the reason there is a less number of valves and connections to be taken care of and in emptying the boxes a very much larger amount of oxide can be dumped in one operation. In other words, if your boxes have sufficient capacity so one box will handle the daily make of gas the other box can be thrown out of service, the oxide dumped and revivified and put back into the box cheaper than with a number of small boxes; there are less valves to leak and they occupy much less ground area, take less building space.

2055 Mr. ABBOTT: I now desire to ask the witness some questions relating to the operation of the plant during the year following September 1, 1901, preparatory to offering such statements in evidence, but before doing so, I desire to have the following statement of counsel incorporated into the record.

May it please the master: At a previous hearing, the master stated he desired a statement showing the actual cost of the manufacture and distribution of gas, from September 1, 1901, to September 1, 1902. In the opinion of counsel for complainant, a statement covering the manufacture of gas subsequent to October 24, 1901, and prior to August 20, 1902, would be immaterial, irrelevant, misleading and not pertinent to the issues in this case; and so far as complainant is concerned, were it not for the request of the master, counsel would merely offer operating statements from September 1, 1901, to October 24, 1901, and operating statements from August 20, 1902 to the present time. Out of deference, however, to the wishes of the special commissioner, we have prepared a statement

showing the cost of manufacture and distribution from September 1, 1901, to September 1, 1902, under conditions as shown by the record, and in substantially the same general form as the operating statements heretofore offered in evidence by the complainant in chief; and we now produce such statements for such action
2056 in the premises as to the special commissioner may seem proper, but we do not desire to offer the same in evidence as evidence adduced by and on behalf of the complainant in rebuttal or otherwise, deeming the same to be as heretofore stated, irrelevant, immaterial, misleading and not pertinent to the issues, but simply showing the result under unnatural and abnormal conditions, which have not ceased.

Q. Have you prepared a statement showing the cost of manufacture and distribution of gas by the complainant company from September 1, 1901, to September 1, 1902, including the gas manufactured for the Peoria Gas Light and Coke Company, under the contract in evidence marked, Exhibit "32," but not including the cost of the distribution of the gas by that company for gas furnished by your company to it?

A. Yes sir, I have.

Q. From what source did you obtain the data and information for the statement you produce?

A. From an examination and inspection of the original vouchers of the company showing the payment of the money; an examination of the original vouchers and bills of lading, showing the receipt of the coal; from an examination and inspection of the original daily statement of the gas makers at the works, showing the amount of coal used and the amount of residuals produced, and from taking these vouchers and checking them over against the summaries in the books of the company.

2057 Q. Have you also a statement showing such details of the operation of the works as do not pertain strictly to the cost of production and distribution?

A. Yes sir, I have prepared a statement which shows the amount of gas made during the period, the amount of coal used to make the gas, the amount of each kind of residual produced, the amount of gas sold and delivered at the holder of the Peoria Gas Light & Coke Company, the amount sold to the consumers of the Peoria Gas & Electric Company, statements as to candle power, and all of the facts of which we have record pertaining to the results of the manufacture and distribution of gas.

Q. Will you hand those two statements to the master to be marked as exhibits?

A. I will.

(Said statements are marked by the master, Exhibits 43 and 44.)

Q. State whether the totals, as shown on Exhibits 43 and 44, which are the statements referred to in my last preceding interrogatories,

are true totals as shown by the books and vouchers of the Peoria Gas & Electric Company and represent all the actual expenditures made by the said company during the period they purport to cover in and about the operation of the gas plant of said company in the manufacture and distribution of its gas, during the period of from September 1, 1901 to September 1, 1902?

Objected to by defendant as incompetent, improper and
2058 immaterial.

The MASTER: The witness may answer subject to the objection.

A. Yes sir.

Q. Are the vouchers, duplicate vouchers and sub-vouchers showing all expenditures in detail now present in court for inspection and examination by the special commissioner and counsel for the parties?

Objected to by defendant, same ground.

A. Yes sir.

Q. Do these statements marked Exhibit 43 and 44 contain true and correct compilations as taken by you from the documents to which you have referred?

A. Yes sir.

Mr. ABBOTT: I now hand to the special master said exhibits marked "Exhibit 43 and 44," for his instruction as to their further disposal.

The MASTER: Hand them to counsel for defendant.

(Mr. Abbott of counsel for complainant, hands said exhibits to defendant's counsel.)

Mr. TICHENOR: If the master pleases, we object to evidence being put in the record by method of this character, for the reason it is irregular, unwarranted and without any proper authority whatever. If counsel proposes to make any use of the statements, the only way that can properly be done is to offer them in evidence in
2059 the regular and usual manner, and give us an opportunity to interpose such objections as we may think proper. It is only an attempt to get something into the record without assuming the responsibility of it in any manner, and without in any way being bound by it.

Q. Where can be found the original vouchers showing the itemized cost of each and all of the expenditures shown in these statements marked Exhibits 43 and 44?

A. They are in the office of the Audit Company of Illinois, 416 New York Life building, Chicago.

Q. Can you produce them?

A. Yes sir.

Mr. TICHENOR: If the master please: My objection was not aimed

at the absence of the original source of the evidence, or as to the correctness of these exhibits referred to; it was purely as to the method being employed. We wish to be understood, however, that we are not waiving that question at all, as it will be time to raise that when the subject matter is properly presented.

The MASTER: I will say to counsel for defendant that under the ruling of the court and the master as well, I think it incumbent on complainant to go into that question, covering the period elapsing from September 1, 1901, up to the time the taking of testimony is closed in this case; I think that is clearly indicated by the ruling of the court on that question.

Mr. MANSFIELD: That is very true, but it seems to me if counsel for complainant do not want to take advantage of the ruling of the court and the master on that question, and do not want to assume the introduction of those exhibits, they certainly should not be allowed to go in in any other manner.

2059½ It is stipulated, by and between counsel for the respective parties, that the record in this case shall show the close of the testimony as of the date of September 30, 1902; that counsel for complainant will introduce all of their testimony on or before said date, with the exception of the operating statement of complainant company for the month of September 1902, similar in character to the operating statements already introduced; that said operating statement shall be prepared and put in evidence as early as possible after October 1, 1902, and not later than October 10, 1902; that counsel for defendant shall have an opportunity to cross-examine the witness Francis W. Little up to and including October 15, 1902.

Upon the failure of either of the parties to comply with this stipulation they shall be deemed to have waived the right to offer any further testimony hereunder, unless the taking of testimony shall have been delayed by the special master in this case.

Chicago, Ill., September 24, 1902.

E. C. RITCHER,
W. T. ABBOTT,
W. T. IRWIN,
Solicitors for Complainant.
F. H. TICHENOR,
HENRY MANSFIELD,
Solicitors for Defendant.

O. K.
HUMPHREY, *J.*

Adjourned by agreement until Thursday, September 25, 1902, at 10 o'clock a. m.

2060 Directors' room, Equitable Trust Co., National Bank building.

CHICAGO, ILL., THURSDAY, *Sept.* 25, 1902—10 a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner; Mr. W. T. Irwin, Mr. R. C. Ritcher and Mr. W. T. Abbott, appearing for complainant; Mr. Henry Mansfield, city attorney, appearing for defendant.

Mr. ABBOTT: Under the ruling of the master, complainant offers in evidence the operating statements heretofore identified by the witness for the year from September 1, 1901, to September 1, 1902, said statements being marked by the master "Exhibits 43 and 44."

Mr. MANSFIELD: Under the statement made by counsel for complainant, the defendant objects to this method of introducing said operating statement, for the reason it is irregular, unwarranted, and without any proper authority whatever; if counsel propose to make any use of the statements, the only way it can properly be done is to offer them in evidence in the regular and usual manner and take upon themselves whatever responsibility is attached to the introduction of the evidence: at this time, we desire to have it understood these objections merely refer to the evidence as being introduced under the statements made by counsel for complainant.

Mr. RITCHER: If I understand counsel for defendant aright, he makes no objection to the competency of the evidence offered but merely objects because we offer it under the ruling of the master and not of our own initiative. Am I correct?

Mr. MANSFIELD: And for the further reason it is not proper rebuttal.

The MASTER: The exhibits may be admitted subject to the objection.

Whereupon said operating statements marked "Exhibits 43 and 44" were read to the master in the words and figures following, to-wit:

2061 EXHIBIT "43." I. C. Pinkney, Master.

Operating Statement for Year September, 1901, to August, 1902.

Gas sold to P. G. L. & C. Co			104,634,200	
Gas sold as per consumers' meters			47,412,300	
Total expenditures as per statement below				152,046,500 c. f.
				$122097.36
Less value of residuals made:				
22,870,354 lbs. coke	at $3.25	per ton	$37028.19	
1,237,070 " breeze	" 1.00	" "		
31,700 " retort carbon	12.00	" "	618.53	
200,607 gal. tar	at .05	" gal	190.20	
68,694.3 lbs. ammonia	" .08	" lb	10030.35	
			5495.56	
				53542.83
Net actual cost without depreciation or interest				68554.53

Net cost per thousand cubic feet of all gas sold after deducting value of all residuals made	.456
Cost per thousand cubic feet of gas sold to consumers of Peoria Gas & Electric Co. after deducting value of all residuals made and including depreciation at 6½ % on cost of property excluding cost of real estate	1.036
Cost per thousand cubic feet of gas sold to consumers of Peoria Gas & Electric Co. after deducting value of all residuals made and including depreciation at 6½ % on cost of property excluding cost of real estate and including interest at 10% on cost of property	1.952

2062 EXHIBIT "43" (Continued).

2062a *Corrected Statement.*

EXHIBIT 43. Record, vol. 7, 2062.

Gas made (Exhibit "44") during year Sept. 1, 1900, to August 31, 1901	158,454,200 c. f.
104,276,900 was delivered to Peoria Gas Light & Coke Co.	
47,412,300 " " consumers of Peoria Gas & Elec. Co.	
1,015,800 " gas donated.	
152,705,000 total amount of gas sold and delivered.	
Total expense of Peoria Gas & Elec. Co., Exhibit "43," vol. 7, page 2062	$122097.36
Value of residuals, as per Exhibit "43"	53362.83
Net actual cost of gas sold and donated, without depreciation or interest, according to Exhibit "43" in which a mistake has been made in adding up value of residuals	$68734.53
Total expense of Peoria Gas & Electric Co., as per vouchers (Rec. vol. 7, page- 2103 to 2129)	$111,336.68
To which add insurance and taxes, $7916.34, making	$118790.27
Or a difference of $3307.09 toward cheapening the cost of gas; all of which is in attorneys' fees, except $15.27.	
Net actual cost per thousand cubic feet, after deducting value of residuals, as per expense as shown by Exhibit "43"	.45 + cents
Net actual cost per thousand cubic feet, as per vouchers (Rec. vol. 7, page- 2103 to 2129), to which has been added insurance and taxes, as per Exhibit "43" after deducting value of residuals	.428 cents
Actual cost per thousand cubic feet as per vouchers to which taxes and insurance has been added, but not including item for legal expenses, loss and damages amounting to $13,187.93 (vouchers Rec. vol. 7, pages 2103–2129)	.342 cents
Actual cost per thousand cubic feet of gas as per vouchers, to which has been added, insurance and taxes, and after allowing depreciation on basis of Mr. Cowdery's testimony, (Rec. vol. 1, pages 266 to 268) as being	
2062b	
5 per cent. on cost of manufacturing plant or	$7214.63
1 " " " " " mains	1200.81
5 " " " " " services	1928.75
7 " " " " " meters	922.18
Total depreciation according to Mr. Cowdery	$11266.37
(Or depreciation at .073 per thousand cubic feet)	.415
Actual cost per thousand cubic feet of gas as per vouchers, to which has been added insurance and taxes, and after allowing depreciation at .073 cents per thousand cubic feet of gas sold and donated, and after allowing interest at 8 % on total value of plant, as of date Sept. 1, 1902	.638
If sale of all gas sold and donated was made at 75 cents per thousand cubic feet, a surplus would remain of .118 cents per thousand cubic feet, or	$17012.96
Allowing leakage on gas furnished by Peoria Gas Light & Coke Co., through any new pipes, on basis of percentage of loss experienced by complainant company during period covered by operating statement "43," or a leakage of .032 per cent	3336.86
	$13676.10

Still leaving a surplus of $13676.10, and after *a* allowing 8 per cent. interest on an increased capital of $100,000 to extend the mains and buy meters, and install services so that complainant company may furnish all gas consumed in the city of Peoria, you have remaining $5676.10 with which to pay additional clerical services, additional taxes, etc. Or actual cost per thousand cubic feet of gas sold and donated, as per vouchers, to which has been added insurance and taxes, and after allowing depreciation at .073 cents per thousand cubic feet, and interest on total value of plant, as of date Sept. 1, 1902, at 5 per cent. per annum..... .558

2062c If sale of all gas sold and donated was made at 75 cents per thousand cubic feet, a surplus would remain of (.192) nineteen cents and two mills per thousand cubic feet, or..... $29319.36

Deducting amount allowed for leakage..... 3336.86

Still leaving a surplus of..... $25982.50

Or 5 per cent. on $586,387.20 with which to pay interest on increase capital, necessary to extend mains, buy meters and install sufficient services to deliver gas to all consumers in the city of Peoria, and pay depreciation on the extra capital so invested.

2063 EXHIBIT "44." I. C. Pinkney, Master.

2065 Direct examination of F. W. LITTLE resumed by Mr. Abbott:

70. What has been the price of Youghiogheny coal f. o. b. cars on the side tracks in Peoria during the period from September 1, 1901, to September 1, 1902?

Objected to as incompetent, improper and not proper rebuttal.

The MASTER: Answer subject to the objection.

A. The price of Youghiogheny coal during the period mentioned has varied between $2.80 per net ton and $3.65 per net ton; the last quotation I had and the last purchase of coal I made was at the price of $3.65 per ton delivered on cars in Peoria, which was a few weeks ago.

71. At what price have you charged Youghiogheny coal in the figures presented by you pertaining to the cost of the manufacture of gas as shown in Exhibits "43 and 44"?

Objected to same grounds as before.

A. In September, 1901, $2.66 4/10; in October $2.67 1/10; in November $2.69; in December $2.70; in January, 1902, $2.86 8/10 in February $2.86; in March $2.86; in April $2.94 7/10; in May $2.91 7/10; in June $2.94 4/10; in July $3.12; in August $3.20. These prices represent the cost of the coal to the company delivered in the coal shed including the cost of unloading from the cars to the coal shed; during all this time, a portion of the coal used was received under contracts ranging from $2.65 f. o. b. cars to $3.65 f. o. b. cars, which explains the variation in the monthly figures.

72. Is that the reason also why you have been unable to charge the cost of Youghiogheny coal in making up your statements at less than the actual market price of such coal for any given month?

(Objected to same grounds.)

A. Yes sir; the tendency of the market has been a rising one and each month some portion of previous contracts has
2066 lapped over.

73. If you have not already stated you may now state what proportion of the working capital required by complainant company is used in carrying Youghiogheny coal in the manner stated?

Objected to same grounds as before.

A. From one half to two thirds of the working capital has been required to carry coal stock.

74. Where the cost of Youghiogheny coal used by complainant company appears in the record to be $2.80 per ton, state whether that price is f. o. b. cars or covers the labor of unloading the cars, etc.?

(Objected to same grounds as before.)

A. That is f. o. b. cars as a general proposition.

75. Have you read the testimony of the witnesses, Frederick Egner and Thomas Littlehale, as given in this case?

Ans. Yes sir.

76. Do you know "Exhibit 20" which was used as the basis in the interrogatories propounded to such witnesses?

Ans. Yes sir.

77. What is "Exhibit 20"?

A. It purports to be a copy of a record kept at the works of the Peoria Gas & Electric Company by the superintendent, showing the cost of gas up to the outlet of the benches.

78. State whether that is a complete record of the cost of all labor and material entering into the manufacture of gas to the time of its being put into the holder of the company?

Objected to as incompetent, improper, immaterial, not proper rebuttal, as the exhibit in question was offered in chief.

The MASTER: The witness may answer subject to the objection.

A. No, it is not a complete record.

79. State whether in the actual manufacture of gas by complainant company other items of labor or cost outside of those shown in "Exhibit 20" necessarily enter into the cost of the production
2067 of gas by complainant company during the period covered by "Exhibit 20" and what other, if any?

Objected to as immaterial and incompetent. (Same ruling.)

A. The exhibit in question does not take into account the salary of the superintendent of manufacture at $125. per month, which enters into the cost of the gas at the works; one half of the storekeeper's salary which is charged to the manufacture of gas, the storekeeper receives $60. per month and $30. per month of his salary should be charged to the cost of the gas at the works; one day engineer who receives $60. per month; one day foreman and helper in the boiler and condenser rooms who receives $50. per month; one night engineer who receives $55. per month, and an average of three yard men engaged in handling coke, cleaning purifyers, dumping drips, and other work about the yards at $50. per month each, making a total of $470. per month additional labor. The exhibit in question does not cover the expense of general repairs around the works which varies in amount and which would aggregate, perhaps, from $1000. to $1500 per year under present conditions—possibly more.

80. State whether or not in your opinion as an expert and a practical gas man, as well as from your experience in the management of complainant's plant, all of the items you have now enumerated necessarily enter into the cost of the manufacture of gas in addition to those items which appear in "Exhibit 20"?

A. Yes sir, they all do and I should add that "Exhibit 20" does not include another necessary expense, which is the resetting and refilling of benches; the retorts will last probably two years and will cost from $600. to $650. per bench for refilling and that in addition is a necessary expense to be taken into account.

2068 81. Do you regard it as either feasible or practicable to have the retort house men attend to these various items of labor which you have testified to as necessary outside of "Exhibit 20"—is such a method feasible or practicable in the ordinary operation of a gas plant?

A. No sir, not under ordinary conditions and certainly not under the conditions existing in Peoria; the boilers, ammonia apparatus, engines, exhausters, condensers and scrubbers are entirely separate from the retort house, and the retort house men cannot possibly look after that portion of the apparatus. I regard the employment of a superintendent of manufacture and a store keeper as necessary also to the economical operation of a plant.

82. Does "Exhibit 20" contain any allowance for taxes on the manufacturing plant?

A. No sir, it does not.

83. In your judgment and experience, is the item of taxes on a

manufacturing plant a proper and necessary item to be taken into consideration in determining the cost of manufacturing gas.

The MASTER: You need not prove that; the master will take judicial notice of the fact that it is.

A. Yes sir, in this connection, I want to say that under the system of accounting which we use, and which is coming into general use, the taxes and general expenses are not charged direct to the cost of manufacture; that came from a practice adopted a good many years ago of sub-dividing the expenditures by a gas company under three heading, viz: manufacture, distribution and repairs; under the old system one half of the general expenses were charged to manufacture—I mean by that, the salaries of officers, taxes and items of that sort, were charged to manufacture and the other half to distribution. In our accounts we do not adopt that method but classify all of those items under the general head of "Ex-
2069 pense" and do not charge them to the manufacturing cost of the gas. Under the system adopted by Mr. Egner in his estimate of cost half of the taxes should be charged to manufacturing.

84. Did you also note the testimony of the witness Egner with reference to his estimate of the cost of distribution of gas in the city of Peoria?

A. Yes sir, I have examined it quite carefully.

85. State what necessary items, if any, from your experience as a gas man, were omitted by the witness Egner in his estimate of the cost of distribution of gas in the city of Peoria as shown by his testimony in this case?

Objected to as incompetent, improper, immaterial and not the proper method of reaching a question of that character; and further object to the question because it leads to the witness' conclusion with reference to the testimony of Mr. Egner and allows the witness to place an interpretation upon the evidence given by him.

The MASTER: The criticism to your question, Mr. Abbott, in the master's mind is this; you do ask whether those are necessary or not, but I think you ought to go further and show the fact, if it is a fact, that those are expenses incurred and paid by complainant company; there are lots of things necessary to be done in life that are not done.

Mr. ABBOTT: I expect to follow the question up by showing the facts; this is an expert question.

The MASTER: The witness may answer subject to the objection.

A. Mr. Egner made no allowance for the reading of meters which will require labor equal to 28 days at $2.00 per day, amounting to $56. per month, or $672. a year; he makes no allowance for complaint men and men to answer fire alarms and this will
2070 require four men at $60. per month each, and one of the men engaged in this service will require a horse and wagon which

will cost at least $20. a month or $240. a year; these two items will amount to $3120. a year. During the fall, winter and spring, men will be required to look after frost and nap-thaline stoppages in mains, services and meters, and the cost of that will be not less than $1000. a year; meter repairers are not allowed for by Mr. Egner that will require one meter man at $70. a month and two at $45. per month, making a total for labor in that connection of $1920. a year; one half of the storekeepers' wages should be charged to the distribution account at $30. per month or $360. a year; there will be required at least two drivers for the wagons at $45. per month each, or $1080. a year; there will also be required a superintendent of distribution, who will have general charge of the distribution of the gas, his salary will amount to $1200. a year and in addition he should be provided with a horse and buggy which will cost $240. a year more; the manager should also have a stenographer at $60. a month or $720. a year; wear and tear on the horses, buggy and wagon will amount to at least $60. per year—that is merely for the maintenance of them. I consider accident insurance necessary in this department of the business and the premium will amount to about $250. a year. In the summer season it is always necessary to go over the main and service system hunting for leaks, repairing mains and guarding against injury to the main system caused by other contractors putting in sewers, laying water mains, telephone conduits, etc., which will require for not less than seven months out of a year a gang of 5 men under the charge of a foreman: these men should receive $2. per day each and the foreman $3.00 per day, which will amount to $2730. a year; the materials they will use in their work will aggregate $400. to $500. a year; the tools lost
2071 and destroyed in the course of a year's work in the distribution department will amount to not less than $500. a year. The bad bills, that is to say, bills which cannot be collected, will amount to one per cent. of the total aggregate of the bills. I should add for legal expenses and for loss and damage on an average, year by year, about $4000. a year, and put the amount of the bad bills at $1500. *dollars*, that makes the omissions aggregate $19,752., amounting to about 12½ cents per thousand cubic feet on the amount of gas sold under Mr. Egner's estimate.

86. You mean that increases his estimate 12½ cents per thousand cubic feet on the amount of gas sold?

Ans. Yes sir.

87. You may state whether or not all of those items, with reference to which you have testified, necessarily entered into the cost of the distribution of gas in the city of Peoria during the period in question in addition to the items in the estimate of the witness Frederick Egner, as the same appears in the evidence?

Objected to for the same reasons last stated.

The MASTER: The witness may answer subject to the objection.

A. I consider all of these expenses as necessary expense in the dis-

tribution of the amount of gas stated by Mr. Egner under the conditions existing in Peoria during the period mentioned and under ordinary average conditions.

88. In addition to the items in reference to which you have testified, did as a matter of fact all the items testified to by the witness Egner actually go into the distribution?

Objected to same grounds as before. (Same ruling.)

A. To that form of question I should say no. I do not understand Mr. Egner's testimony to be what was done in Peoria but to be in answer to hypothetical questions based upon what he consid-
2072 & 2073 ered to be necessary in a town the size of Peoria under average conditions.

89. Assuming the conditions testified to by Mr. Egner to be correct, you may state whether in your judgment and from your experience the other items, with reference to which you have testified necessarily entered into the cost of the distribution of gas in the city of Peoria during the period in question.

Objected to same grounds as before. (Same ruling.)

A. Yes, sir, in addition to the amount testified to by Mr. Egner.

90. What would you say as an expert generally and having knowledge of conditions in Peoria of the estimate of the witness, Littlehale, as to the cost of the distribution of gas during the period in question?

Objected to same grounds as before stated, applying it to the evidence of Mr. Littlehale. (Same ruling.)

A. Mr. Littlehale's estimate was made in such a general way and in such general terms it is pretty difficult to analyze it and show in detail what he omitted without knowing in detail what he included; the average amount of his estimate in my judgment is far too low.

91. State if you know what has been the average consumption per annum per meter of the Peoria Gas & Electric Company of the gas delivered through its own mains, services and meters to its own consumers during the year from September 1, 1901, to September 1, 1902?

Objected to because the same is already in evidence, appearing in "Exhibit 44," and for the further reason that it is incompetent, immaterial, not proper rebuttal and not the best evidence.

The Master: The witness is asked for a fact and he may state if he knows subject to the objection.

2074 A. Slightly over 20,000 feet per year per meter.

92. What was the consumption per annum per mile of main during the same period and under the same circumstances?

Objected to same grounds.

A. Slightly over 1,700,000 cubic feet per year.

93. On that consumption per annum per meter and per mile of main, please state whether in your opinion, as a gas expert, the output of the Peoria Gas & Electric Company can be materially increased without additional extension of its main system and additional meters?

Objected to as immaterial, incompetent and not proper rebuttal.

The MASTER: I think so, Mr. Abbott.

Mr. ABBOTT: We would like to have the question answered.

The MASTER: The witness may answer subject to the objection.

A. No, I don't think it can be materially increased.

94. In determining the cost of the distribution of gas, what factor is of the greatest importance in determining such cost, the extent of the output or the number of miles of pipe and number of meters through which the gas passes. Explain fully your conclusion in that regard?

Objected to as immaterial, incompetent, not proper rebuttal.

The MASTER: I don't think it proper rebutting testimony but I think it a material and proper inquiry and one on which the master would like to have some information, and the witness may answer subject to the objection.

A. The cost is determined almost entirely by the number of miles of main and by the number of meters in use, and number of services.

95. Explain further how it is true that the number of miles of mains and the number of meters is so important a factor in
2075 the cost of the distribution of gas?

Objected to same grounds as before. (Same ruling.)

A. Labor cost outside of the office and the clerical work inside of the office is determined by the number of miles of mains, the number of services and number of meters which have to be looked after or read and entered on the books of the company; if your consumption is very large per mile of main, the fixed labor charge for looking after that main will be spread over a very much larger unit and very much larger output; if on the other hand your consumption is small per mile of main the same labor cost will be required to look after the mains and similarly with the services, if the service passes a large amount of gas it will not leak any more or be more apt to leak or require more attention than if it is passing a small amount of gas; also with meters, if a meter passes a thousand or fifteen hundred feet of gas per month, it costs no more to read that meter or repair that meter than if it were passing a smaller amount of gas, say 500 or 100 feet per month; the same is true in connection with the office work; it is the number of bills to be gotten out and not the amount of the bills that determine the cost of that work. In other words, within very wide limits these expenses are fixed expenses, irrespective of the quantity of gas sold unless that quantity

is very large or very small per meter or per consumer or per mile of main, as the case may be.

(The MASTER:)

96. Does the leakage cut any important factor in the cost of the distribution of gas?

A. Yes sir, in two ways; it is important because of the loss of the gas itself and it becomes again important because of the cost of the labor required to supervise and keep your main system tight; those are important and necessary expenses.

2076 (The MASTER:)

97. What I refer to is the actual leakage, notwithstanding these precautions, a factor to any considerable amount in the cost of the distribution of gas?

A. Yes sir always.

(Mr. ABBOTT:)

98. Did you note the testimony of the witness Littlehale in regard to the appreciation of an investment in gas properties in a growing town?

Ans. Yes sir.

99. To what extent, if at all, does that appreciation compensate for the depreciation of a plant as has been testified to by yourself and other witnesses in the case?

Objected to as incompetent, improper, immaterial, not a proper method of reaching a question of that character, and for the further reason it allowed this witness to interpret the evidence of Mr. Littlehale and allowed this witness to reach a conclusion with reference to that evidence.

The MASTER: As I recollect Mr. Littlehale's testimony, he stated that the increase in population more than compensated for the depreciation of the plant by reason of the increased consumption of gas. That was the substance of it on that point, was it not?

Mr. ABBOTT: I did not understand it exactly that way.

The MASTER: The witness may answer subject to the objection; I think it competent rebutting testimony, as I remember Mr. Littlehale's evidence?

A. I do not think it compensates for it at all; I do not think there is any such thing; I think there is nothing but inevitable bankruptcy to any company that conducts its business on that theory.

100. Will you state fully your reasons for such a conclusion?

Objected to same grounds (Same ruling.)

A. It is clearly evident to me that street mains, services and

meters and all the property of a gas company must in course
2077 of time be worn out or become antiquated and unfit for further use, and it is equally evident that some provision must be made for the replacement of that apparatus and property when it is worn out. Now, unless that is done as you go along by a proper fund, it means either that the company must go into bankruptcy or it must borrow the money, pledging something it expects to have in the future for a replacement of it, or it must fail in its obligations to supply the public with gas; it seems to me there is no escape from it.

101. Would it not be a fact in that connection that the appreciation of the property, as testified to by the witness Littlehale, as taking place in a growing community would in itself involve an extension of the mains and services commensurate with the growth of the city and an expense in accordance therewith.

Objected to same grounds.

A. There is not the least doubt if the business increases there must be a larger investment to handle it and the appreciation of the property, if there is any, comes wholly from the increased investment of capital in the property. There is only one condition I can think of where there would be any appreciation of that sort and that would be in the case of an exclusive franchise, an exclusive right fixing definitely by contract a rate for gas which could not be reduced and assuming there was no other competition which forced a reduction in prices.

102. Have you a copy of the statement of account rendered by your company to the Peoria Gas Light and Coke Company for gas delivered to it up to the 19th day of August, 1902, and also for the labor and material furnished up to September 1st, 1902, under the contract in evidence marked "Exhibit 32"?

A. Yes sir, they are in the form of three bills.

2078 103. Please hand the same to the master to be marked as an exhibit.

A. I will. (Said three bills are marked by the master "Exhibit 45.")

104. State whether these three bills fastened together which you have produced and had marked "Exhibit 45" were rendered in the course of business in the same manner as the bills for the months preceding, beginning with December 1, 1901, which were furnished by you to counsel for defendant and identified as "Exhibits 33" and offered in evidence by the defendant?

A. Yes sir, these are copies of the bills rendered on September 1, 1902, to the Peoria Gas Light & Coke Company in the usual course of business and under the provisions of the contract marked "Exhibit 32."

Mr. ABBOTT: Now, if the master please, we desire on behalf of the plaintiff to offer these three bills marked "Exhibit 45" in evidence

in connection with similar bills offered by the defendant marked "Exhibit 33" for the purpose of making the record complete as to the entire time covered by the contract marked "Exhibit 33?"

Objected to as not proper rebuttal and incompetent.

The MASTER: The bills may go in evidence subject to the objection.

Whereupon said bills marked "Exhibit 45" were read to the master in the words and figures following, to-wit:

2079. EXHIBIT "45." I. C. Pinkney, Special Master.

6,926,500	cu. ft.	$5026.90

2082 Mr. ABBOTT: Now, if the master please, at the last hearing we intended to offer a statement of the cost of the plant made to June 30, 1902, similar in character to the one which was offered in the early part of the complainant's case, showing the cost of the plant to September 1, 1901, and to make that more complete we desire to reserve the right to bring that statement down to the day of the close of the taking of evidence and offer it at the same time and under the same conditions as the operating statements, to the close of business on September 30, 1902.

The MASTER: The master will reserve any decision on that until the offer is made; I do not see any objection except it operates as a duplication of the record so far as it includes anything already in evidence as to the cost of the plant.

Mr. ABBOTT: We offer it in an effort to be perfectly fair with the court and master on their ruling that we shall bring this evidence down to the close of the taking of testimony and for no other purpose.

The MASTER: I understand that perfectly but the suggestion occurred to me if there were any additional costs that has been incurred in the manufacturing plant or distribution system, this might be offered. I assume it is an assembling of all the accounts put in concrete form.

Mr. ABBOTT: Yes sir, it is an easier way of getting at it than to ask questions about it.

The MASTER: I do not see any objection to its being put in in that way.

Mr. MANSFIELD: I now move the court on behalf of the defendant to exclude all the foregoing evidence of Mr. Little based upon conclusions obtained by him from an examination of the evidence of Mr. Littlehale and Mr. Egner for the reason that the course
2083 of inquiry was improper and incompetent and was not the proper way of reaching questions of that character; and I

urther object because it necessitated Mr. Little's placing an inter-
retation upon the evidence as offered by Mr. Littlehale and Mr.
Egner.

The MASTER: The motion will be denied so far as the master is
oncerned. The weight to be given to the testimony of any witness
s with the master but the right to exclude testimony is another
roposition.

Adjourned by agreement to meet in the United States court room, Government building, Peoria, Ill., on Friday, September 26, 1902, at 2 o'clock p. m.

2084 United States circuit court room, Government building.

PEORIA, ILL., FRIDAY, *September* 26, 1902—10 a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. R. C. Ritcher and Mr. W. T. Abbott, appearing for the complainant. Mr. Henry Mansfield, city att'y, and Mr. F. H. Tichenor, appearing for defendant.

J. M. ROBB, re-called on behalf of complainant, testifies as follows:

Direct interrogatories by Mr. ABBOTT:

1. You are the same J. M. Robb who has previously testified in this case on behalf of both the complainant and defendant?

A. Yes sir;

2. During the period in which the Peoria Gas & Electric Co., was supplying gas to the Peoria Gas-light & Coke Co., under the contract in evidence marked Exhibit "32," state what, if anything, you had to do with the distribution of the Peoria Gas-light & Coke Co.?

Objected to as incompetent, improper and immaterial, not proper rebuttal.

The MASTER: The witness may answer subject to the objection.

A. I was the superintendent of the work of distribution for the Peoria Gas-light & Coke Company, had charge of its mains and service work, removing settings and reading their meters—in fact, all of their distribution work.

3. In the course of such work during said time, state whether or not you became familiar with the extent of the main piping system of the Peoria Gas Light & Coke Co. in the city of Peoria?

Objected to same grounds. Same ruling.

A. Yes sir, I did.

4. What is the present mileage of the mains of the Peoria Gas Light & Coke Co. in the city of Peoria?

2085 Objected to same grounds. Same ruling.

A. Substantially 57 76 / 100 miles.

5. Does that include some mileage, if so, how much, that was put in during the last 6 months?

A. It includes about 8,000 feet that was put in during the past 6 months.

6. State if in a similar way you have familiarized yourself with the number of meters in use by that company during the period in question?

Objected to same grounds. Same ruling.

A. Yes sir, I did.

7. What was the number of meters in use by the Peoria Gas Light & Coke Company, through which it distributed gas to customers during the period of operation under this contract "Exhibit 32"?

A. 4,490 meters and some more, I have forgotten the number over 90.

8. Did the number change to a considerable extent during those months of operation under that contract?

Objected to same grounds. Same ruling.

A. Some additions were made but the number was not materially changed.

9. State whether or not, from your knowledge of the distribution of the distributing system of the Peoria Gas Light & Coke Co. during the period in question, the gas sold and delivered by the Peoria Gas & Electric Co. to the Peoria Gas Light & Coke Co. was sold and delivered by said last named company to its customers through its own piping system and meters, that is, of course deducting for leakage?

Objected to same grounds as before and also as calling for the conclusion of the witness.

2086 The MASTER: No, he asked for his personal knowledge, I think. The witness may answer subject to the objection.

A. Yes sir.

Adjourned subject to call of special commissioner.

Directors' room, Equitable Trust Co., Chicago National Bank bldg.

CHICAGO, ILL.,
THURSDAY, *October* 16, 1902—10 o'clock a. m.

Parties met pursuant to the call of the special commissioner.

Present: Judge I. C. Pinkney, special commissioner. Mr. W. T. Irwin, Mr. R. C. Ritcher and Mr. W. T. Abbott, appearing for complainant. Mr. Henry Mansfield, city attorney, Mr. F. H. Tichenor appearing for defendants.

The MASTER: The master having delayed the hearing of this testimony five days after the period fixed for resuming it by the stipu-

lation last entered into, five days' additional time will be given in which the taking of the testimony shall be closed.

Complainant's counsel offers in evidence and reads to the master a schedule of the prices charged to consumers for gas by the Peoria Gas Light & Coke Co. from 1897 to 1902 inclusive, showing the dates at which changes of prices were made, which said schedule of prices is marked "Exhibit 46" and is in the words and figures following, to-wit:

2086½ *Prices Charged to Consumers by the Peoria Gas Light & Coke Company from* 1897 *to* 1902, *Inclusive.*

Exhibit 46. I. C. Pinkney, master.

2087 Direct examination of F. W. LITTLE resumed by Mr. Irwin:

105. On pages 1948 and 1949 of the record is a resolution that was adopted at a meeting of the stockholders of the Peoria Gas & Electric Co. held on the 14th day of June, 1900, requesting the board of directors of the complainant company to declare a stock dividend of $500,000 increase of the capital stock of the corporation among its several stockholders according to their respective holdings. I will ask you if the board of directors ever declared any stock dividend in pursuance of the request of the resolution adopted at the stockholders' meeting referred to?

Objected to as incompetent, improper, immaterial and not proper rebuttal.

The MASTER: The witness may answer subject to the objection.

A. No, they did not.

106. Was any stock dividend ever declared by the board of directors of complainant company among its several stockholders in

pursuance to the resolution referred to or any other resolution to your knowledge?

Objected to same grounds. Same ruling.

A. No.

107. Was there ever any stock dividend declared or issued by the board of directors to the stockholders?

Objected to same grounds as before and also as leading and suggestive. Same ruling.

A. No sir, no stock dividend was ever declared or issued at all.

108. Did the board of directors ever take any action upon the resolution adopted at the stockholders' meeting referred to?

Objected to same grounds. Same ruling.

A. No sir.

2088 109. Have you prepared a statement showing the cost of the manufacture and distribution of gas by the complainant company from September 1, 1902, up to and including September 30, 1902, including the gas manufactured and delivered by complainant company during that period?

Objected to as incompetent, improper, immaterial and not proper rebuttal.

The MASTER: No, it is not offered as rebutting testimony. As I understand it, it is offered in view of the ruling of the court and master and it is incumbent on the complainant to show it.

Mr. ABBOTT: And offered under the stipulation so far as the objection to its competency goes.

The MASTER: It has not been offered yet, the witness is simply asked if he has prepared such a statement.

A. Yes sir, I have prepared a statement showing the cost of gas sold during the period mentioned.

110. Look at the paper marked "Exhibit 47" and state if that is a statement of the cost prepared by you?

A. Yes sir, it is.

111. State what the paper now shown you marked "Exhibit 48" represents?

A. It shows the amount of money expended by the Peoria Gas & Electric Co. in the construction of its gas plant and property *yp* to the close of September 30, 1902.

112. From what source did you obtain the data and information from which the statements marked "Exhibit 47 and 48" were made?

A. From an inspection and examination of the original vouchers of the company showing the payment of the money made for the different purposes shown in the statement.

113. Who made the compilations included in "Exhibits 47 and 48" referred to?

Ans. I did.

2089 114. Are they correct?

Ans. Yes sir.

115. Are the figures showing the respective amounts of money and the amount of raw material, residuals, etc., as shown upon "Exhibit 47" correct according to the compilations as made by you from the original vouchers?

A. Yes sir, they cover all of the expenditures for materials and labor made by the company for operation of the property during the month of September, 1902, excepting such purchases as were made in bulk and where the purchases exceeded the requirements of the company for the month in question. In that case, the materials were charged into the store room and the amount of material left on hand in the store room at the close of the month is not shown in the statement.

115. Is the amount of the material remaining in the store room charged or shown in the figures on "Exhibit 47" representing the cost of the manufacture of gas during that period?

A. No sir, no materials which were left in the store room are considered at all in the statement.

116. Does the statement marked "Exhibit 48" with reference to the cost of the plant—are the different items and amounts respectively as shown upon such exhibit correct?

Ans. Yes sir.

117. Are the vouchers, duplicate vouchers and sub-vouchers showing all expenditures in detail now present in court for examination by the special master and counsel constituting the several items shown upon "Exhibits 47 and 48" referred to?

A. They are all now in the office of the Audit Company of Illinois, room 416, New York Life building, Chicago, and will be brought into court if desired.

118. Will you produce them for the examination of the court or counsel if desired?

Ans. Yes sir.

Mr. RITCHER: I think under the stipulation they ought to

2090 be present and if the master will take a recess for five minutes we will bring them in.

The MASTER: I think that is the technical language of the stipulation and the master will suspend the taking of evidence for a few minutes until they can be brought in.

Mr. TICHENOR: If the master please, we are desirous of doing anything that can be done to expedite matters and we do not want to stand on any technicality if counsel for complainant will show us the same courtesy we can get along rapidly; we will waive this question if they will give us the figures we have asked them to give us.

Mr. RITCHER: We are not asking for any waiver.

The MASTER: I have no knowledge of what you have asked for, Mr. Tichenor.

Mr. TICHENOR: We want the operating statements for the months of September and October, 1901, and for the month of August, 1902.

Mr. RITCHER: That was refused at the last hearing and they were going to Springfield before Judge Humphrey on that point among others and I do not see any occasion for reopening it; we do not ask them to waive this matter; we will bring the vouchers in in a few minutes.

Mr. TICHENOR: I do not see how that could be true because we had not at that time reached the point where we were ready to take testimony at all.

Mr. RITCHER: You did ask for those statements—you asked for the whole year's statement by months.

Mr. TICHENOR: We subsequently waived all that.

Mr. RITCHER: That is what I say and there is no occasion for reopening it.

Mr. IRWIN: If the master please, the vouchers representing the expenditures prior to September 1, 1901, entering into the
2091 cost of the plant as well as those pertaining to the construction and operation of the plant and the cost of manufacturing gas, have been redistributed in their numerical order by the bookkeepers of the Audit Company of Illinois, and it will take some little time to sort them out so as to produce them again in court. The Audit Company's employés are now at work making that assortment and as soon as they can be sorted out will be brought into court.

The MASTER: You now refer to the vouchers and sub-vouchers relative to the plant and its operation at what time?

Mr. IRWIN: Prior to September 1, 1901.

The MASTER: The master will not go into that again.

Mr. RITCHER: Are you ready, Mr. Little, to bring in the vouchers from September 1, 1901, to September 30, 1902, at once?

Mr. LITTLE: Yes sir.

The MASTER: The master will not allow you to go back to matters already closed in this case under any consideration whatever, except upon express directions of the court. If counsel for defendant desires the vouchers and sub-vouchers touching any additional expenditures as shown by "Exhibit 48" with reference to the manufacturing plant, I think they should be produced under the stipulation as well as the vouchers and sub-vouchers relating to the cost of manufacture and distribution of gas for the month of September, 1902, and I think it the duty of complainant to produce them.

Mr. LITTLE: They will be here in a few minutes.

119. What changes have been made in the cost of the manufacturing plant of the complainant company as shown by "Exhibit 48" as compared with "Exhibit 2" heretofore offered in evidence?

Objected to as incompetent, improper, immaterial and not proper rebuttal.

The MASTER: I do not see how it is competent as rebutting
2092 testimony; of course the cost of the manufacture and distribution of gas up to September 30, 1902, has been called for and any additional expenditure on the manufacturing plant might be competent in that respect.

Mr. IRWIN: That is the purpose of the question.

The MASTER: But I think it ought to be limited to such necessary additional expenditures as have been made to the cost of the plant as already shown; if that is the purport of your question, the witness may answer subject to the objection.

A. The question calls for the manufacturing plant only.

Mr. IRWIN: When I refer to the plant I refer to the whole plant both the manufacturing and distributing portions of it.

Mr. TICHENOR: We wish our objection to stand to the question as amended.

A. The land and building account has been reduced by about $11,000. arising from the sale and leasure of real estate below Rye street owned by the company and the main system, meters, services and manufacturing plant have been increased by this amount and also by about $5,000. more, making the total investment about $5,000 more than at the date of the statement marked "Exhibit 2."

120. Where was this real estate you mentioned as having — sold situated and what was its condition as compared with the plant of the complainant company?

A. It was across Rye street from the manufacturing plant of the company and located in St. John's subdivision; it was vacant property used for storage purposes and was separated from the plant of complainant company by Rye street.

121. Are all the vouchers, duplicate vouchers and sub-vouchers showing additional expenditures and changes in the cost of the manufacturing plant as shown by Exhibit "48" now present in court for inspection and examination by the special commis-
2093 sioner and counsel for the respective parties to this suit?

A. Yes sir, including the manufacturing and distributing plant both.

122. Are all of the vouchers, duplicate vouchers and sub-vouchers showing all expenditures in detail now in court for inspection and examination by the special commissioner and counsel for the respective parties showing the expenditures made in the summary contained in "Exhibit 47"?

A. The vouchers are now being gotten together and I cannot answer that until about two o'clock.

123. Can you have the vouchers present in court by the coming in of court after the noon recess for the month of September 1902, as shown by "Exhibit 47"?

Ans. Yes sir.

Mr. IRWIN: We now ask the master to suspend the hearing until two o'clock for those vouchers to be brought in.

The MASTER: No, go on with your examination.

Mr. IRWIN: I want to offer these exhibits in evidence but I think under the stipulation these vouchers have to be in court.

The MASTER: No, I don't think so, you can offer them now.

Mr. IRWIN: I now offer in evidence on behalf of complainant the statement marked "Exhibit 48" referred to and identified by the witness.

Objected to as incompetent, improper, immaterial and not proper rebuttal.

The MASTER: It will be admitted subject to the objection.

Mr. IRWIN: I now offer in evidence on behalf of complainant the statement marked "Exhibit 47" identified by the witness.

Objected to same grounds as to "Exhibit 48."

The MASTER: Under the stipulation of counsel for complainant that the vouchers, duplicate vouchers and sub-vouchers will be produced after the noon recess, the statement will be admitted
2094 subject to the objection.

Whereupon said statements marked Exhibits "47 & 48" were read to the master in the words and figures following, to-wit:

Operating Statement, Month of September, 1902.

Gas sold as per consumers' meters..... 4,089,400 c. f.

2096 Cross interrogatories by Mr. TICHENOR:

1. What was the total of account No. 1, salaries of officers, for the month of September, 1901?

Objected to as not cross examination.

The MASTER: He may answer subject to the objection.

A. I cannot tell you.

2. Have you any data or memorandum or source of information from which you will be able to reply to the interrogatory propounded?

A. I have nothing in my personal possession from which I could give you the information.

3. Is there anything in the possession of your company that will furnish such information?

Ans. Yes sir.

4. In what form is it and where is it?

A. It is in the form of vouchers in the office of the Audit Company of Illinois where the accounts are kept.

5. Does it appear there in an aggregate item or in separate items composing all the different vouchers for that particular month?

A. I think it appears in two or possibly three vouchers.

6. Is it not true that your accounts each month are assembled under the respective headings to which they belong and summarized and do not your accounts show summaries of the various items for the several months?

Objected to as incompetent, immaterial and not cross examination.

The MASTER: The witness may answer subject to the objection.

A. Yes sir.

7. Then it is possible, is it not for you to state from those accounts the total for the month of September under item No. 1, salaries of officers after having refreshed your recollection by reference to the proper source of authority?

Objected to same grounds. Same ruling.

2096½ A. Well, to state definite and positively just what has been the expense it would be necessary for me to refer to the original vouchers; to state what somebody else has done in the assembling of those accounts would be another matter that I could do.

8. Is it not true that your system of book-keeping is of such a character that any error occurring in the accounting department would be detected by you in the regular performance of your duties as general manager?

Objected to same grounds. Same ruling.

A. No, that is not part of my duty as general manager of the

company; I could do it by making a thorough audit of the accounts of the company and could detect an error if one existed; but that is not part of my regular work.

9. Do you know whether or not the accounting of the complainant company is correctly kept by the Audit Company of Illinois?

Objected to same grounds. Same ruling.

A. As a general proposition it is; I think the accounting there is no more subject to error than is ordinarily the case.

10. During the time you have been associated with complainant company, state whether or not you have discovered any errors in the accounting department.

Objected to same grounds. Same ruling.

A. Yes, I have discovered some errors there.

11. Where were those errors made?

Objected to same grounds. Same ruling.

A. In the office of the Audit Company.

12. How frequently have those errors been made?

Objected to same grounds. Same ruling.

A. I think only a few times.

13. Who made the discovery that those errors had been committed?

Objected to same grounds. Same ruling.

2097 A. My answer is only as to errors which I myself have personally discovered.

14. In what way did you discover them?

Objected to same grounds. Same ruling.

A. By checking through and examining the accounts and comparing them with the vouchers.

15. Was that in your preparation of material for use in this particular case?

Objected to same grounds. Same ruling.

A. A part of the errors in question were and some were not.

16. Is the work of the company in charge of your accounts audited from time to time?

Mr. ABBOTT: We would like to have the same objection noted to all of these questions relating to the details of the bookkeeping as it was all covered thoroughly by counsel for defendant when this witness was on the stand as their witness and nothing was asked him on his direct examination in rebuttal to which these questions either directly or indirectly or by inference could refer. The witness was also cross examined on the mode and character of the book-

keeping thoroughly on his original examination when on the stand in chief.

The MASTER: I am admitting this evidence on the assumption that it relates to matters that have arisen since September 1, 1901, up to the present time.

Mr. ABBOTT: Then it ought to be confined to that time.

Mr. TICHENOR: That was my intention but perhaps I have not stated it with sufficient clearness; it has reference only to those matters now before us.

17. Did the errors to which you have referred occur in the accounts for the period commencing September 1, 1901, and ending August 31, 1902?

2098 Objected to same grounds. Same ruling.

A. Some of the errors occurred during that period.

18. Has there been any general checking and auditing of the accounts of your company as kept by the Audit Company of Illinois for the period last referred to?

Objected to same grounds; objection overruled.

A. Well, there is a checking of their accounts each month by the auditor of the company and I think the treasurer checks them, but as I said, it is not part of my duty to make such a general checking excepting as I went over the vouchers and accounts generally in connection with this case.

19. Are the examinations and auditings to which you have just referred the only ones required by the management of your company?

Objected to same grounds. Same ruling.

A. Yes, the only ones I know of.

20. Are all of the various accounts of your company entering into the annual statements ending with August 31, 1902, assembled and cumulative in the same manner you have testified with reference to item No. 1?

(Objected to same grounds. Same ruling.)

A. In a general way, yes sir.

21. Is it also true that those several summaries from month to month appear upon the books of your company?

Objected to same grounds. Same ruling.

A. Yes sir;

22. Will you make an examination of those accounts for the purpose of ascertaining what those several summaries are for the months of September and October 1901, and August 1902, and be prepared to testify to them on the convening of court this afternoon?

Objected to as incompetent, immaterial and not cross-examination

and for the further reason it does not appear the items in question are in the proper custody of this witness; and also because
2099 the witness has testified that he would have to testify to somebody else's work if he testified concerning them.

The MASTER: The question is only whether he could do it or not and he may answer that.

A. I could not do it by the convening of court this afternoon.

23. How much time would be required to enable you to prepare yourself to answer the question?

Objected to same grounds.

The MASTER: I think he may state how much time it would take.

A. To give you the total amounts charged to the various accounts would necessitate an examination of the vouchers and also all of the storeroom reports and a separation of the electric from the gas accounts and that would take a considerable period of time, I could not say just how long; it would take several days to do it.

24. Is it not true that the items for the separate month corresponding to those appearing in Exhibit "43," are shown in totals in your books of account for the gas department only?

Objected to same grounds. (Admitted subject to objection.)

A. No. If you will refer to my original testimony on the question of the method of keeping the accounts you will see just what I made reference to now as to the time required to get at that I think I testified—in fact, I have a clear recollection of testifying, as to the manner of keeping those accounts, beginning with the voucher register where all accounts, gas and electric, are registered; then the transfer of those into the ledger, which covers merely the cash expenditures of the month; then the storeroom reports which show what material had been received into the store room and what has been charged out to the gas department; the general books kept of the store room account covers both the gas and electric department and to get at what goes out of the gas storeroom to the gas department necessitates an examination of the original supply
2100 tickets and requisitions for material showing what is charged; those are not finally assembled until they reach the general ledger of the company—there is no summarizing of them until they reach the general ledger.

25. Is it not true they are there assembled and summarized by months?

(Objected to same grounds. Same ruling.)

A. There is no balance struck each month for the various accounts; the account is carried by them all to the close of the fiscal year. Account No. 1, for illustration, starts with the beginning of the year and to see how much was charged each month would necessi-

tate a separation of the items charged in that month to that account, the balance carried right on; the account is not closed until the close of the fiscal year.

26. Then it would necessitate a substraction from month to month in order to determine—Interru pted——

A. Addition and substraction both.

27. Do you take off a trial balance each month?

Objected to same grounds as before. Same ruling.

A. I do not; I presume the accountants do.

28. Is it not true that the trial balance shows the totals of all the various items entering into your accounting which you have arranged under 31 heads?

Objected to same grounds. Same ruling.

A. The trial balance shows the totals of these accounts from the beginning of the fiscal year up to the period when it is taken off.

29. But not for a month?

Ans. Not for a month.

30. Are all of the vouchers for the month of September entering into your annual operating statement Exhibit "43" in court at the present time?

A. (Witness examining vouchers.) I think they are all here; I find the summaries are here of the storekeepers' reports and I see
2101 some supply tickets are here, and if they are here all are here.

31. Is the same thing true with regard to the vouchers for October 1901?

Ans. Yes sir;

32. Is it also true with regard to the vouchers for the month of August 1902?

Ans. Yes sir;

33. As those vouchers now are is there any separation of them as to months for the period covered by your annual statement ending August 31, 1902?

Ans. No sir;

34. Are they in such shape you can readily separate them for the months concerning which you have been examined, viz: September and October 1901, and August 1902?

Ans. Yes sir; I think so.

35. In a general way how many vouchers are there for each of those three months?

A. My recollection is there are 1050 vouchers spread over a year and probably a fair and equal division for each month would be probably about 100 original and 100 duplicates for each month.

36. Those you refer to as duplicates are strictly duplicate vouchers, are they?

Ans. Yes sir;

(Recess until 2 o'clock p. m.)

Interrogatories by Mr. IRWIN:

Q. Are the vouchers, duplicate vouchers and sub-vouchers showing all expenditures in detail of the cost of the manufacture and delivery of gas from September 1, 1901, to September 30, 1902, now present in court for the examination of the special master and counsel?

Ans. Yes sir;

Q. Does the statement marked Exhibit "47" contain a true and correct compilation as taken by you from the vouchers to which you have referred?

Ans. Yes sir;

Mr. IRWIN: Complainant now renews the offer of Exhibit "47" in evidence.

The MASTER: It is already in evidence; it is not necessary
2102 to offer it again.

(Vouchers, duplicate vouchers and sub-vouchers referred to presented and examined by counsel for defendant.)

Cross-interrogatories by Mr. TICHENOR, resuming:

37. State whether or not an account is kept by your company by the month of all material passing through your storeroom and appearing in what you have referred to as a storeroom account?

A. Yes sir; there is an account.

The MASTER: This inquiry is limited is it, Mr. Tichenor, to cover this period?

Mr. TICHENOR: Yes sir. I will state that our examination upon these vouchers is limited to the months of September and October 1901, and the month of August 1902.

38. Will you state the manner in which your storeroom account is kept and when with reference to each month that is made up doing so as briefly as you can?

A. Nearly all materials, which are purchased for the company are charged to the storeroom account when the invoices are received this is the rule and the only exception to it is in the case of some small office supplies or things of that sort; an invoice when received at the office of the company in Peoria goes to the storeroom office and is checked with the original order on which the goods were bought and entered in the storekeeper's books, then stamped with his stamp, and signed by him and returned to me after which it is approved by me and forwarded to the treasurer's office in Chicago the charges to the storeroom are made on the vouchers and the vouchers are made up by assembling the various invoices which have come in during the month—the invoices being made up beween the 10th, and 20th, of the following month as the checks are mailed and the voucher sent out the duplicate voucher is retained and a charge to the storeroom

and for that matter, to any other account is made on
2103 the back of the voucher at that time, those charges being made on the back of the duplicate vouchers; at the expiration of each month the storekeeper makes up a series of journal entries and a statement of the account; these are based upon requisitions made on the storekeeper for materials signed by the heads of the different departments; these requisitions are attached to the journal entries and form a part of them; in addition the storekeeper makes a general summary of all charges, which as a rule are summaries of the various journal entries made out by him, and also makes a statement showing the condition of his storeroom. That is to say, the amount of property on hand at the beginning of the month, amount received during the month, any labor which may have been put upon articles in the storeroom during the month, the amount issued during the month and the amount on hand at the close of the month. These various journal entries and reports are attached together and from them the bookkeeper in the office of the Audit Company makes up a final journal entry which is entered on the journal of the company. I think I make it clear that the material as a rule, unless the invoice shows on its face it is to be charged directly to some account, all passes through the storeroom, and the storekeeper's reports with the accompanying requisitions shows what goes out of the storeroom, and what should be charged to the operating account or construction account for that particular month.

39. Will you state what requisitions were made on your storekeeper for the month of September 1901, detailing in items, and as you advance, state the account to which each of those several items was charged, making your reply as brief as possible?

A. A requisition was made on him in September 1901, for 24675 lbs. of coke and 1500 lbs. cannel coal which was charged by him to account No. 13, aggregating $42 87. Another requisition was made on him for 915,941 lbs. of Youghiogheny gas coal which was
2104 charged by him to "gas and coal account" No. 14, aggregating $1220.03. Another requisition was made on him for 87,200 lbs. of screenings and 41,400 lbs. of breeze which was charged by him to "boiler fuel account" No. 15, aggregating $62.95. Another requisition was made on him for 190,635 lbs. of coke which was charged by him to "bench fuel acct." No. 16, aggregating $313.40. Another requisition was made on him for 198 galls. of gasoline which was charged by him to "enrichers acct." No. 20, aggregating $25.74. Another requisition was made on him for 564,100 lbs. of coke sold, which was charged to "sales acct." No. 40 aggregating $1400.73. Another requisition was made on him for 321,600 lbs. of coke, which was charged by him to "sales acct." No. 40 aggregating $563.86. Another requisition was made for manufacturing supplies which was charged to account No. 18, aggregating $47.24. Another requisition was made for miscel-aneous supplies and expenses which was charged to account No. 26, aggregating $16.11. Another requisition was made

for meter repair parts, aggregating $6.33 and was charged to account No. 27. Another requisition was made for materials used in gas house machinery repairs, charged to acct. No. 30, aggregating $8.09. Another requisition was made for material used in the extension of mains, charged to acct. No. 33, aggregating $50.26. Another requisition was made for material used in the manufacturing plant, charged to the manufacturing plant acct. No. 34, aggregating $192.45. Another requisition was made for meters placed in the houses of consumers and was charged to acct. No. 35, aggregating $117.16. Another requisition was made for material used in connection with new services, which was charged to account No. 36, aggregating $89.08. Another requisition was made for tools and implements which was charged to account No. 37, aggregating $4.45. That covers all of the materials issued out of the storeroom in the gas department during September 1901.

40. What is your reason for charging the coke in the same manner you make other charges out of the storeroom
2105 account—explain briefly the foundation for that charge?

A. The entire amount of coal produced in any month. In fact, the entire amount of all residuals produced in any month, is charged into the storeroom at the close of the month; the amount which is used in the heating of benches, or other operation of the plant, is then charged with its proper amount and the storeroom gets credit at the end of the month. This is done for the purpose of showing through general accounts of the company just what residuals are produced each month and what are used each month in the operations of the company.

41. Can you state the different quantities of the various residuals charged into the storeroom during the month of September 1901 That is, I mean produced?

A. Not here. I did not bring into court the statements or journal entries showing charges to the storeroom; I can secure them, however.

42. You have them separated for each month?

Ans. Yes sir;

43. Can you state the various items entering into your operating statement for the month of September 1901, so far as they appear in the vouchers of your company for that month?

A. The only way I could do that would be to take the various vouchers, classify them, and add the amounts together for each account number. In other words, there may be a number of vouchers charged to account- Nos. 1, 2 or 3, as the case may be; I would have to take those and make up a statement—compilation from the vouchers.

44. You have before you vouchers representing all of those expenditures for the month of September 1901?

A. Yes sir; I think I have all of the vouchers here representing expenditures for the month of September 1901.

45. Do those various vouchers show the different accounts to which they were charged at the time?

2106 A. Yes sir, although by reason of the storeroom system, which I have explained, the original vouchers may charge certain articles to the storeroom—to ascertain what amount was issued out of the storeroom I should have to turn to the storeroom reports, which I have here, and which are with those vouchers.

46. Are those the reports concerning which you have just testified?

A. Yes sir. As a foundation for the store room reports and as constituting the original entry, a supply ticket is produced in this form (handing supply ticket to counsel) working order number, account number, requsition from the foreman to deliver this material, and the store keeper's report that he has delivered it—the amount of it—the amount of each particular item.

47. That is all embodied in the material you have already given?

A. Yes sir, that is summarized in the material for the month of September.

48. Will you state what items of expenditures enters into your operating account for the month of September, 1901, other than those to which you have already referred; detailing the items and the different account numbers to which they are charged?

A. Do you care to have the names of the parties to whom the payments were made?

49. No sir, simply the amounts and the account.

A. Do you care for the voucher number?

50. No.

A. Legal expenses account No. 9, $176.10, salaries of officers, account No. 1, $150—Interrupted.

The MASTER: Before going further, is this examination for the purpose of testing the accuracy of the books from which these statements marked "Exhibits 47 and 48" are taken?

2107 Mr. TICHENOR: No sir.

The MASTER: What is the purpose of it?

Mr. TICHENOR: To show what the operating statements for September and October, 1901, were separately.

Mr. RITCHER: The complainant objects to this evidence because it was put in under the stipulation and is not cross examination.

The MASTER: If the purpose of this is to ascertain the correctness of the statements marked "Exhibits 47 and 48" and the correctness of the sources from which these statements were compiled, it is unquestionably cross examination, but if it is an attempt to go into the expenditures connected with the manufacture and cost of the distribution of gas, then I think under the stipulation it is not proper.

Mr. RITCHER: That is my understanding exactly.

Mr. TICHENOR: What stipulation does the master refer to?

The MASTER: The stipulation on page 139 of the record; the purpose of that stipulation as I understood it was to save incumbering the record and simply allow inquiry to be made concerning any vouchers the correctness of which were challenged. I have already ruled in this case that I regarded that stipulation as binding on all such matters up to the time of the close of the taking of this testimony; but understand me, if this is offered for the purpose of testing the witness's knowledge of the accuracy of the sources from which "Exhibits 47 and 48" is compiled I think it entirely proper. I will be glad to hear from you Mr. Tichenor.

Mr. TICHENOR: Probably the suggestion of the master covers all I want to say; I think it cross examination.

The MASTER: I think it proper as cross examination for the purpose I have already indicated but I do not see how it is competent under that stipulation if it is gone into for any other purpose.

2108 Mr. TICHENOR: We do not understand that stipulation has anything whatever to do with any matters subsequent to September 1, 1901.

The MASTER: As I have already ruled on that, I think it was a stipulation that was designed to cover, and should be held to cover inquiry along that line during the whole period covered by the operation of this plant up to the time of the close of the taking of evidence.

Mr. TICHENOR: But if the master please, from what was done on the other side, it is clearly apparent that ruling had not been adhered to, because another stipulation was made in Chicago the other day to cover certain specific ground, that is to obviate the necessity of putting in the vouchers from which "Exhibits 47 and 48" are compiled.

Mr. RITCHER: That stipulation was simply made to reaffirm the former stipulation under the master's ruling.

Mr. TICHENOR: It certainly was a new stipulation, although it might have been an enlargement of the preceding stipulation for the purpose of making it applicable to the present case.

The MASTER: Do you refer to the stipulation made at the hotel one evening?

Mr. TICHENOR: I do not remember when it was made but it was with reference to this same question. Counsel for complainant were going to bring in the original vouchers and then a stipulation was made in reference to them.

Mr. RITCHER: It was simply reaffirming the old stipulation; we were going to Springfield to see Judge Humphrey about it to find out whether the master's ruling was right, that the old stipulation was in force.

Mr. IRWIN: We simply wanted to know whether the master and court would take the same view as to the old stipulation.

2109 Mr. RITCHER: The only reason the old stipulation was not specifically mentioned was that it was not necessary, as the only purpose of the last stipulation was to extend the time for in-

troducing these statements, and when the counsel for defendant withdrew their objection as to the competency of the statements, the ruling of the master was affirmed. That was the only reason we did not go to Springfield.

Mr. TICHENOR: If they had put in that material as the other had been put in, this line of examination would have been entirely unnecessary, I presume, assuming it was accurately done.

Mr. MANSFIELD: These two monthly statements become very material in the view we take of the case and they have offered them in evidence as a summary and I think we have a right to find out on cross examination what was paid out during the month of September and October.

Mr. RITCHER: The defendant has put in their side of the case and tried to show what was the amount manufactured, etc., and they should have put this in then, they cannot do it now.

Mr. MANSFIELD: We have a right to cross examine on the evidence submitted to the master.

Mr. IRWIN: Yes, but this is not a cross examination of the witness; if there are any vouchers during these months you want to contest; you have a right to cross examine him on them.

Mr. TICHENOR: The witness has testified these statements are based upon these vouchers compiled by himself from an examination of them all.

The MASTER: Yes, I have that in mind.

Mr. TICHENOR: Now, it certainly is competent for us to examine him with reference to any or all of these vouchers if we see fit on cross examination, commencing at the beginning and going through to the end of the year.

2110 Mr. RITCHER: There would be some sense in that but there cannot be any sense in examining him as to a part unless they want to challenge the accuracy of such vouchers.

Mr. MANSFIELD: You don't know what we are going to do in regard to it.

Mr. RITCHER: I think I know.

Mr. MANSFIELD: Before we get through with the witness, we may go through all of them, but we have a right to select what months we desire.

Mr. RITCHER: If you are going through all of them, there is some sense in that and I can see that you have a right to do that if you challenge the accuracy of the statements.

Mr. MANSFIELD: There are other statements made by Mr. Little in his testimony covering these very months and we have a right to go into the vouchers on which these exhibits and his testimony has been based.

The MASTER: As a matter of cross examination only; I have already indicated you have that right.

Mr. TICHENOR: We tried once before to examine Mr. Little on certain matters and the master ruled we were out of order because they were open to us on our former cross examination of the wit-

ness, now we are making them a matter of cross examination and we do not feel we can be shut off because they are such.

The MASTER: I have tried to make myself clear to counsel. If this line of examination is made for the purpose of testing the accuracy of "Exhibits 47 and 48" as to the summary therein given, it is unquestionably proper cross examination and the master is not inclined to limit you to any particular month or any particular time so long as it is confined within the period of a year preceding September 30, 1902; in other words, going back to September 1, 1901.

2111 Mr. TICHENOR: That is within the period covered by their examination of this witness and we think we are not limited on cross examination to one specific purpose; we have a right to go into any and all questions their examination has opened up and that certainly covers any field properly filled by the vouchers themselves.

Mr. RITCHER: You have no right to put in the vouchers for the stipulation was made for the purpose of avoiding that.

Mr. TICHENOR: We are not putting in the vouchers.

Mr. RITCHER: You are doing what we started out to do and stipulated to avoid.

The MASTER: If you want to pursue that course on the defense you may proceed; the master has already indicated his views on the matter and I shall not exclude the testimony if you want to take that course.

Mr. TICHENOR: We want the testimony.

The MASTER: But I want you to understand the master's attitude in the matter; it is competent for the purpose of testing the witness's knowledge of the accuracy of "Exhibits 47 and 48" and testing the accuracy of the sources from which those exhibits were compiled.

Mr. TICHENOR: We are insisting, as we have already stated, that we have a right to examine the witness upon these vouchers for any and all purposes and that we are not limited to one particular line of inquiry or for the purpose of proving or disproving any particular line.

Mr. MANSFIELD: It is especially referred to in the stipulation that the vouchers shall remain in the court room until all the evidence is submitted in this case for the purpose of having the same examined by the attorneys and the master; how can we make any argument upon the accounts for September and October, 1901, unless we know what those accounts are? If we wanted to make an

2112 argument on them we could go to the vouchers and argue upon that basis but what would the court know about it? The evidence would not be in the record and the court could not tell whether what we said was true or not.

Mr. RITCHER: You made a stipulation which is in the record.

Mr. MANSFIELD: We claim that the evidence we are now putting in comes within the stipulation.

Mr. IRWIN: You have a right to make whatever compilations you desire from the vouchers and put it in evidence if you want to.

The MASTER: Proceed Mr. Little with your answer.

The WITNESS, resuming: To account No. 2, $104.17; to account No. 3, $7.67; to account No. 2, $25.; to account No. 3, $3.04; to account No. 10, $10.25; to account No. 23, $25.; to account No. 9, $68.

Let me explain here that I am not detailing any charges to the store room for the reason that the charges for the store room are sufficient to give the operating expenses; if I gave you the charges for the store room all you could do would be to carry the balance forward from the previous month and strike a balance, which would not help this case any.

51. In other words, the items you are now giving constitutes the material that you used in making up your operating statement and is made up in exactly the same way?

Ans. Yes sir.

52. That is exactly what I want.

A. To account No. 2, $30.; to account No. 11, $2.91; to account No. 17, $267.72; to account No. 21, $32.23; to account No. 23, $45.69; to account No. 24, $21.73; to account No. 26, $10.50; to account No. 27, $15.71; to account No. 30, $12.59; to account No. 1, $100.; to account No. 2, $225.; to account No. 4, $65.; to account No. 11, $3.18; to account No. 17, $303.25; to account No. 21, $4.80; to account No. 23, $77.91; to account No. 24, $13.27; to account No. 26, $1.95; to account No. 27, $6.00; to account No. 30, $2.25; to account No. 11, $16.96; to account No. 11, $.25; to account
2113 No. 11, $.25; to account No. 11, $3.90; to account No. 11, $39.50; to account No. 2, $10.; to account No. 10, $6.00; to account No. 4, $65.; to account No. 11, $2.25; to account No. 11, $21.56; to account No. 5, $144.; to account No. 3, $2.; to account No. 11, $3.20; to account No. 3, $4.50. To these charges which I have read should be added the charges from the gas store room which I previously read.

53. Have you now covered completely the items for the month of September, 1901, included in the operating statement?

A. I have covered the correct charges in connection with the operation of the company during September, 1901, excepting the proportionate share of the taxes; I do not recall in running through these vouchers a voucher covering rental (Witness examining vouchers) There is no charge for rentals I see on examination of the vouchers.

54. Can you tell the amount of gas produced by your company in the month of September, 1901?

Objected to as not cross examination, not proper under the stipulation.

The MASTER: He may answer subject to the objection.

A. I have not the information here.

54. Can you tell the amount of coke produced in the month of September, 1901?

Objected to same grounds. Same ruling.

A. I have not that information with me.

55. Have you with you your sales account for the same month?

Objected to same grounds. Same ruling.

A. No sir, I have not.

56. Where is the material covering the last three questions?

Objected to same grounds. Same ruling.

A. The information covering the residuals produced is in the office of the Audit Company of Illinois; the information as to the amount of gas made and sold is in the office of the company in Peoria.

2114 57. Have you also in the office at Peoria the account of sales for that month?

Objected to same grounds. Same ruling.

A. Do you refer to gas sales?

58. No, sales of residuals.

A. Yes sir. I do not, however, take into account in any of these statements the amount of residuals sold.

59. No, I understand that. What items do you include in account No. 9?

A. Legal expenses and loss and damage; that includes all legal expenses, compensation of attorneys and their expenses, or the expenses of any nature connected purely with litigation; loss and damage includes the expenses incident to damage claims against the company, based on personal injuries or damages of any nature for which the company is liable.

60. Would that include property losses as well as personal injury?

A. Yes sir, as a general proposition but that would be subject to some exceptions. For illustration, an explosion blowing up a meter, that meter would be charged to meter repairs and would not go into the loss and damage account.

61. In the month of September, 1901, was there any expenditures except purely for legal services?

A. I cannot answer that off-hand, I don't remember.

62. Are you able to state whether or not your company had any personal injury claims adjusted during that month?

A. I don't remember definitely; I remember of settling a claim about that time, two claims, in fact, but whether they were in August, September or October, I could not say.

63. Will you now give us the expenditures for the month of October, 1901, treating it in the same manner you did those of

2115 the preceding month and if you can conveniently do so you may take first your store-room account, as you did before?

A. In the store room there was charged, to account No. 11, $70.81; to account No. 14, $2,184.57; to account No. 15, $118.72; to account No. 16, $633.89; to account No. 18, $25.69; to account No. 20, $21.; to account No. 24, $57.82; to account No. 27, $1.20; to account No. 29, $13.71; to account No. 30, $45.14. The above accounts cover the materials issued out of the store room for the month of October, 1901.

The following expenditures are in addition: To account No. 2, $25.; to account No. 3, $6.; to account No. 4, $8.; to account No. 6, $152.50; to account No. 10, $5.; to account No. 11, $1.60; to account No. 23, $25.; to account No. 9, $18.

64. What was that item in account No. 9 for?

A. That was expenses of a trip made by myself from Peoria to Chicago on September 26 and 27, 1901; it was not charged out, however, until October.

There was charged to account No. 1, $150.; to account No. 2, $104.17; to account No. 2, $23.15; to account No. 3, $3.07; to account No. 10, $5.; to account No. 4, $2.50; to account No. 10, $24.02; to account No. 9, $75.

65. What was that item?

A. That was a bill of W. T. Irwin for services in connection with tax matters, appearing before the board of review.

To account No. 2, $35.; to account No. 11, $5.; to account No. 17, $310.57; to account No. 21, $5.20; to account No. 23, $59.81; to account No. 24, $21.06; to account No. 26, $8.32; to account No. 27, $11.32; to account No. 29, $9.50; to account No. 30, $36.07; to account No. 31, $4.29; to account No. 2, $216.25; to account No. 4, $65.; to account No. 11, $5.65; to account No. 17, $556.64; to account No. 21, $23.03; to account No. 23, $171.49; to account
2116 No. 24, $14.95; to account No. 26, $13.65; to account No. 27, $5.25; to account No. 29, $6.30; to account No. 30, $43.; to account No. 31, $.54; to account No. 10, $225.21; to account No. 6, $3.50; to account No. 9, $253.15; to account No. 3, $7.; to account No. 10, $1.40; to account No. 3, $.84; to account No. 10, $10.; to account No. 2, $5.; to account No. 9, $25.;

66. What is that for?

A. That is a bill of the National Surety Company for premium on bond given in this case.

To account No. 10, $53.87; to account No. 10, $9.50; to account No. 10, $19.25; to account No. 3, $.15.

These items cover the expenditures for the month of October, 1901.

67. Will you now take the month of November, 1901, and treat it in the same way.

104. What was that for?

A. Attorneys' fees and expenses in this case.

To account No. 2, $104.17; to account No. 3, $10.52; to account No. 1 $208.33; to account No. 2, $57.50; to account No. 4, $6.92; to account No. 11, $5.84; to account No. 17, $676.12; to account No. 21, $38.33; to account No. 23, $112.75; to account No. 24, $9.29; to account No. 26, $12.75; to account No. 27, $12.85; to account No. 28, $1.35; to account No. 30, $46.72; to account No. 4, $26.; to account No. 3, $5.25; to account No. 6, $35.15; to account No. 9, $57.50.

105. What was that for?

A. That was my personal expenses on two trips to Chicago. That covers the month of June, 1902.

106. Will you now please read the month of July, 1902, in the same manner?

A. In the month of July, 1902, there was charged for material

issued out of the store room :—to account No. 4, $100.; to account No. 11, $232.93; to account No. 14, $4,007.80; to account No. 15, $169.53; to account No. 16, $672.51; to account No. 18, $52.92;
2127 to account No. 23, $13.86; to account No. 24, $31.29; to account No. 26, $89.50; to account No. 27, $5.85; to account No. 28, $15.24; to account No. 30, $112.62; to account No. 31, $.10.

In addition there was charged :—To account No. 2, $104.17; to account No. 1, $208.33; to account No. 2, $57.50; to account No. 11, $4.; to account No. 17, $684.02; to account No. 23, $128.55; to account No. 24, $19.25; to account No. 26, $6.; to account No. 27, $3.40; to account No. 28, $1.50; to account No. 30, $38.57; to account No. 2, $10.; to account No. 3, $10.95; to account No. 4, $6.; to account No. 6, $25.; to account No. 10, $15.80; to account No. 23, $50.; to account No. 3, $2.84; to account No. 2, $305:; to account No. 4, $68.20; to account No. 11, $4.02; to account No. 17, $696.80; to account No. 21, $33.50; to account No. 23, $150.49; to account No. 24, $10; to account No. 26, $1.75; to account No. 27, $14.05; to account No. 29, $4.75; to account No. 30, $5.12; to account No. 9, $100.

107. What was that for?

A. Fees and expenses in this case.

To account No. 3, $1.30; to account No. 10, $4.30; to account No. 3, $46.87; to account No. 9, $117.50.

108. What was that for?

A. Fees and expenses in this case.

To account No. 10, $32.25; to account No. 10, $4.75; to account No. 4, $7.; to account No. 10, $5.; to account No. 10, $14.35. I believe that is all for July.

109. Please treat the month of August, 1902, in the same way.

A. In the month of August, 1902, there was issued from the store room materials charged :—To account No. —, $100.; to account No 11, $242.36; to account No. 14, $3,403.68; to account No. 15, $106.33; to account No. 16, $547.37; to account No. 18, $29.66; to account No. 23, $3.28; to account No. 24, $68.99; to account No. 26, $25.56; to account No. 27, $3.02; to account No. 28, $14.79; to account No. 30, $832.36.

2128 In addition there was charged :—To account No. 3, $9.45; to account No. 10, $1.50; to account No. 9, $467.80.

110. What was that for?

A. All excepting $54. was for attorneys' fees and expenses in this case.

To account No. 10, $9.75; to account No. 10, $9.50; to account No. 9, $331.80.

111. What was that for?

A. Attorneys' fees and expenses in this case.

To account No. 10, $18.20; to account No. 3, $7.50; to account No. 4, $8.; to account No. 6, $15.15; to account No. 9, $51.

112. What was that, please?

A. Traveling expenses for myself. To account No. 2, $57.50; to

account No. 11, $3.40; to account No. 17, $789.91; to account No. 21, $24.65; to account No. 23, $121.22; to account No. 24, $17.46; to account No. 26, $2.20; to account No. 27, $12.53; to account No. 28, $2.93; to account No. 30, $24.85; to account No. 1, $208.33; to account No. 2, $104.17; to account No. 3, $11.94; to account No. 9, $92.89.

113. What was that for?

A. Services and expenses of a witness in connection with this case.

To account No. 2, $305.; to account No. 4, $65.; to account No. 11, $3.55; to account No. 17, $680.17; to account No. 23, $119.51; to account No. 24, $13.26; to account No. 26, $5.75; to account No. 27, $6.21; to account No. 28, $1.; to account No. 30, $7.37; to account No. 31, $3.08; to account No. 3, $11.05; to account No. 4, $1.; to account No. 6, $36.90; to account No. 9, $24.

114. What is that item?

A. Traveling expenses of myself.

To account No. 10, $15.60; to account No. 23, $25.; to account No. 3, $10.02; to account No. 10, $58.; I believe that covers the month of August, 1902.

2129 115. Please take the month of September, 1902, and t-ear it in the same way.

A. In the month of September, 1902, there was charged for materials issued out of the store room:—To account No. 11, $236.56; to account No. 14, $1,577.17; to account No. 15, $89.24; to account No. 16, $271.85; to account No. 18, $9.35; to account No. 20, $15.30; to account No. 24, $52.05; to account No. 27, $15.01; to account No. 28, $25.69; to account No. 29, $27.33; to account No. 30, $127.73;

In addition there was charged:—To account No. 2, $56.40; to account No. 11, $3.50; to account No. 17, $476.37; to account No. 23, $107.26; to account No. 24, $10.21; to account No. 26, $7.; to account No. 27, $23.02; to account No. 28, $1.36; to account No. 30, $85.48; to account No. 1, $208.33; to account No. 3, $3.31; to account No. 3, $.10; to account No. 10, $.25; to account No. 6, $12.; to account No. 2, $104.62; to account No. 2, $303.73; to account No. 4, $66.75; to account No. 11, $4.51; to account No. 17, $380.21; to account No. 21, $31.80; to account No. 23, $125.59; to account No. 24, $17.67; to account No. 26, $6.98; to account No. 27, $11.88; to account No. 28, $4.85; to account No. 29, $44.37; to account No. 30, $47.33; to account No. 3, $8.23; to account No. 4, $2.; to account No. 6, $37.50; to account No. 9, $460.50.

116. What was that please?

A. All excepting $54.50 of it is for fees and expenses in connection with this case; the $54.50 is for certified copies from the city clerk, frontage petition and ordinance and traveling expenses. To account No. 3, $3.75; to account No. 10, $5.30; to account No. 10, $7.; to account No. 3, $3.50; to account No. 9, $840.80.

117. What is that for?

A. Attorneys' fees and expenses in connection with this case. To account No. 10, $5.50; to account No. 9, $545.75.

118. What is that for?

A. Attorneys' fees and expenses in connection with this case.
2130 To account No. 3, $5.50; to account No. 3, $.90. I believe that is all for September, 1902.

Mr. RITCHER: The complainant moves to strike out all of the testimony of Mr. Little with reference to these vouchers as incompetent and improper under the stipulation in this case.

119. I asked you yesterday with reference to *where* the account of gas produced, residuals manufactured, and sales account of residuals for the period beginning September 1, 1901, and extending to September 30, 1902. I understood you to testify that those matters, except as to the account of residuals produced, are in the Peoria office and that the account of residuals is in the Chicago office. Is my understanding correct?

A. The account of all of those matters is in the Peoria office and also in the Chicago office as to the amount of residuals produced in each month.

120. In making up the annual statement, concerning which you have testified, marked "Exhibit 43," in what manner did you arrive at the quantity of residuals shown by the statement?

A. The statement shows the amount of residuals produced and those figures were arrived at by careful computation made by myself from the original books of entry at the office of the Peoria Gas & Electric Co. situated at the gas works at Peoria.

121. Are you prepared to testify as to the extent of variation in quant-y of residuals produced from month to month or from one part of the year to another?

A. No sir, not now.

122. Is the proportion between the coal carbonized and residuals produced comparatively constant or variable?

A. Comparatively constant; the ammonia varies more or less in a month but the percentage of coke made to coal carbonized and the number of gallons of tar produced per ton of coal carbonized
2131 runs nearly uniform.

123. Are you able to state the reason for the variation in the quantity of ammonia produced?

A. Yes sir, it comes in our works from two causes; one is the fact that the absorber of the ammonia apparatus was eaten out by the action of the acids and had to be replaced and for several months the amount of ammonia ran down and another cause is occasioned by a change of engineers; a new man is very apt not to watch his apparatus carefully enough and the production of ammonia decreases.

124. What proportion does the cost of material and labor used by your company in the manufacture and distribution of gas in the city of Peoria bear to the total cost as heretofore given by you?

Objected to as incompetent.

A. I do not quite understand your question; the statement which I prepared shows the material and labor separately and shows just how much was spent for material and how much for labor.

125. In asking the question, I thought perhaps you might have made computation for the purpose of ascertaining that, not especially with reference to this case but in your studies as a gas man.

A. That varies very materially during the different months of the year and under different conditions; there are certain of the expenses that are variable with the output within certain limits and other of the expenses that are fixed and are irrespective of the out put; so no rule that I know of can be formulated in that way.

The MASTER: I want to say to counsel that this question was put by defendant's counsel at the request of the master; I think the fact may be deducible from the record in this case but I thought if the witness had personal knowledge of that fact from his long intimacy with the business it would aid the master in determining that question which is material in this case.

2132 The WITNESS: I want to add to my testimony what I think I made clear yesterday, that these vouchers read by me do not cover the taxes and insurance, or rather the *pro rata* share of taxes and insurance for any month.

Adjourned by agreement to meet in Peoria at such place as may be designated by the special master on Monday, October 20, 1902, at 10 o'clock a. m.

2133 City attorney's office, room No. 209, city hall.

PEORIA, ILL., MONDAY, *October* 20, 1902—10 o'clock a. m.

Parties met pursuant to adjournment.

Present: Judge I. C. Pinkney, special commissioner; Mr. W. T. Irwin and Mr. W. T. Abbott appearing for compl'nt; Mr. Henry Mansfield, city attorney, and Mr. F. H. Tichenor appearing for defendant.

Cross examination of F. W. LITTLE resumed by Mr. Tichenor:

126. Are you now prepared to testify as to the gas made and gas sold each month during the year commencing September 1, 1901?

A. Yes sir.

127. You may state those quantities by months, separating them into the two parts of made and sold, as you proceed.

Objected to as immaterial and not cross examination.

The MASTER: The witness may answer subject to the objection.

A. The gas made in each of the months was as follows:—In September, 1901, 4,388,100 feet; in October, 7,895,500 feet; in November, 17,359,800 feet; in December 18,848,400 feet; in January, 1902,

17,379,400 feet; in February, 15,370,100 feet; in March, 15,575,300 feet; in April, 13,722,400 feet; in May, 12,993,000 feet; in June, 13,154,300 feet; in July, 12,101,100 feet; in August, 9,670,800 feet. A portion of the gas which I have stated was made in November, 1901, was actually made in October, 1901, and was all put into the November account for convenience in accounting.

The gas sold in each month was as follows:—In September, 1901, 4,186,200 feet; in October, 4,691,400 feet; in November, 4,294,900 feet; and also 13,066,200 feet was sold to the Peoria Gas Light & Coke Co.; in December, 4,351,600 feet, and also 13,177,000 feet sold to the Peoria Gas Light & Coke Co.; in January, 1902, 4,479,400 feet, and also 12,611,400 feet sold to the Peoria Gas Light &
2134 Coke Co.; in February, 3,741,400 feet, and also 12,537,200 feet sold to the Peoria Gas Light & Coke Co.; in March, 3,769,300 feet, and also 9,985,300 feet sold to the Peoria Gas Light & Coke Co.; in April 3,478,700 feet, and also 10,102,300 feet sold to the Peoria Gas Light & Coke Co.; in May, 3,435,300 feet, and also 8,853,800 feet sold to the Peoria Gas Light & Coke Co.; in June, 3,608,000 feet and also 9,024,800 feet sold to the Peoria Gas Light & Coke Co.; in July, 3,753,300 feet, and also 8,349,700 feet sold to the Peoria Gas Light & Coke Co.; in August, 3,622,800 feet, and also 6,926,900 feet sold to the Peoria Gas Light & Coke Co.

128. Are you now prepared to state the quantity of the various kinds of residuals produced by your company during the same period?

A. Yes sir.

129. You may state those, if you please.

A. The following amounts of coke was made in the various months. In September, 1901, 770,740 pounds; in October, 1,262,304 pounds; in November, 2,605,911 pounds; in December, 3,014,933 pounds; in January, 1902, 2,647,982 pounds; in February, 2,379,122 pounds; in March, 2,060,145 pounds; in April, 1,616,011 pounds; in May, 1,593,573 pounds; in June 1,432,005 pounds; in July 1,604,023 pounds; in August, 1,883,605 pounds.

There was made of breeze in September, 1901, 41,400 pounds; in October, 29,500 pounds; in November, 85,600 pounds; in December, 69,470 pounds; in January, 1902, 180,000 pounds; in February, 209,000 pounds; in March, 144,000 pounds; in April 128,000 pounds; in May 107,000 pounds; in June 60,000 pounds; in July 82,000 pounds; in August 101,000 pounds.

There was made of tar:—In September, 1901, 6,051 gallons; in October, 10,708 gallons; in November, 19,290 gallons; in December 22,182 gallons; in January, 1902, 20,115 gallons; in February, 18,922 gallons; in March, 18,646 gallons; in April,
2135 & 2136 20,217 gallons; in May, 16,406 gallons; in June, 18,570 gallons; in July, 17,500 gallons; in August, 12,000 gallons.

There was made of ammonia in September, 1901, 1,282.2 pounds; in October 1,645.2 pounds; in November 5,987.2 pounds; in Decem-

ber, 7,541.6 pounds; in January, 1902, 7,743.1 pounds; in February, 6,023.8 pounds; in March, 6,847.1 pounds; in April, 7,328.8 pounds; in May, 6,163.1 pounds; in June, 7,241.1 pounds; in July, 6,142.1 pounds; in August, 4,749 pounds.

There was made of retort carbon, 31,700 pounds in March, 1902. This was the accumulations of previous months; none has been produced since.

130. During how many months had that carbon been accumulating if you know?

Ans. Probably 12 or 15 months.

131. It would approximately, then, be a year's accumulations?

A. Yes, approximately so.

132. Are you able to state the quantity of coke and breeze used by your company in the process of manufacture during the period in question?

Objected to as immaterial and not cross examination.

The MASTER: The witness may answer subject to the objection.

A. Yes sir.

133. You may state that, if you please.

There was used of coke in the month of September, 1901, 190,635 pounds; in October, 390,078 pounds; in November, 607,761 pounds; in December, 653,554 pounds; in January, 1902, 637,475 pounds; in February, 550,716 pounds; in March, 540,414 pounds; in April, 125,283 pounds; in May, 37,920 pounds; in June, 68,498 pounds; in July, 371,299 pounds; in August, 323,675 pounds.

All of the breeze produced was used each month.

134. At what prices were the coke and breeze used in your manufacture charged?

2137 A. They were charged out of the store room at the same price which they were charged into the store room; the coke at the uniform price of $3.25 per ton and the breeze at the uniform price of $1.00 per ton.

135. At what prices did your company sell its coke during the year covered by your testimony at this time?

Objected to as immaterial and not cross examination.

The MASTER: The witness may answer subject to the objection.

A. From $2.65 per ton up to, I think the highest was $4.75 per ton, which included the delivery charges.

136. At what places did you deliver where the gross price was $4.75, if you remember?

Objected to same grounds. Same ruling.

A. I don't remember all of them but at Sioux City, Iowa, Des Moines, Iowa, Boone, Iowa, Council Bluffs, Iowa and several places in Wisconsin and Minnesota.

137. By including delivery charges, do I understand you to mean transportation charges to destinations?

Ans. Yes sir.

138. Did you deliver any in Peoria at the maximum price of $4.75?

Ans. No sir.

139. What was the highest price you received for coke delivered in Peoria?

Objected to same grounds as before. Same ruling.

A. I think $4.50 was the maximum price for any coke delivered in Peoria which was crushed coke.

(The MASTER:)

140. Was it higher in market value than common coke?

A. Yes sir, about 50 cents a ton higher than common coke; I spoke of it as crushed coke, I should properly say screened coke. When we want to size the coke, we screen it; in some works
2138 it is crushed and sold under the name of crushed coke.

(Mr. TICHENOR:)

141. Are you able to state what proportion of your coke sales were made for Peoria delivery?

Objected to same grounds as before. Same ruling.

A. I should say a little less than one half of the coke during the period mentioned was sold in Peoria.

142. During what period of time within that year, were the prices at the maximum which you have given for Peoria delivery and also for outside delivery?

Objected to same grounds. Same ruling.

A. The highest price was in the latter part of August, 1902, and along in December, 1901, and January, 1902; we have a scale of prices for coke furnished in small lots by wagons which is usually 50 cents a ton higher in the winter time than in the summer, but the winter schedule was put into effect in the latter part of August, 1902, on account of the coal strike which caused us to pay a higher price for coal.

143. Are those small lots, to which you have referred, delivered by your company?

A. No sir. That is to say, they are delivered at our expense but not by our own people; we contract that delivery.

144. What is the cost of such delivery per ton?

Objected to same grounds. Same ruling.

A. 50 cents a ton anywhere within the limits defined by Western avenue, an irregular line along the upper part of the bluff near to and about Nebraska street, and I think either Cornhill street or Mary street in the northern part of the city; beyond those limits we pay an extra cent a bushel.

145. That would be approximately two miles from your works would it?

Ans. Approximately, yes sir.

2139 146. Was all of the coke which you sold during that period for the Peoria delivery delivered by wagons?

Objected to same grounds. Same ruling.

A. No, probably not one twentieth of it was delivered by wagon; the great bulk of it was delivered by steam road.

147. What was the transportation charge per ton for such as was delivered by rail?

Objected to same grounds. Same ruling.

A. Well, that depends somewhat on circumstances; P. & P. U. delivery within the city limits are $1.50 per car plus 25 cents in and 25 cents out, for weighing, making the charge $2.00 a car, which is about 7½ cents a ton on the average; then, if we have to deliver to the Rock Island, there is another transfer charge of $1.50 and if the coke goes beyond Western avenue or north of the Rock Island yards there is an additional charge.

148. On the average, how did the expense of delivery by rail correspond with that of wagon deliveries within that period?

A. It is cheaper to deliver by rail where you can.

149. Do you know about what the difference would be per ton?

A. I should say on the average there would be 30 cents a ton difference.

150. Are you able to state from recollection substantially how the price for coke ranged during the different months of that year?

Objected to as immaterial and not cross examination.

The Master: Admitted subject to the objection.

A. In car lots the price during September, 1901, averaged about $3.20 per ton delivered—$3.20 to $3.50. I may as well explain that what coke we sell in Peoria as a rule we sell on yearly contracts to the various industries here. I refer now to coke, which is sold in

car lots. The general price for that is $3.50 a ton delivered,

2140 out of which we pay the brokerage commission to the coal company here, who make the contracts for us, of 10 cents per ton, so it nets our company about $3.40; that has been the average price throughout about all of the last year and up to the present time on coke sold in Peoria; the Peoria consumption is not sufficient to use our production and coke accumulates during the late winter and the summer periods. The coke which was sold out of town through the period referred to averaged about $3.50 a ton in the winter time and beginning say in March fell off to $2.75 and in fact as low as $2.65, the bulk of it was sold; that is, some three thousand tons was sold at from $2.65 to $2.90 through the summer; as long as that lasted, that remained the price and it was cleaned up in August; since then we have sold coke generally speaking on con

tracts to the inductries; we took one additional industry in fact two additional industries in the past summer at the price of $3.50 per ton delivered. In wagon loads the usual price is at the rate of $4.50 per ton delivered in the winter time and $4.00 per ton delivered in the summer time, the bulk of it being crushed or screened coke.

151. Do I understand that any part of this coke which you delivered by rail has been at the higher price which you have specified of $4.50 or $4.75?

A. No sir, there has been none of the coke delivered by rail at a higher figure; I don't recollect any at a gross figure of over $3.50.

152. Is there any difference in the market prices between coke produced in a regular coke oven and gas house coke?

Objected to as immaterial and not cross-examination and not proper rebuttal.

The MASTER: Is there anything in evidence in the record that they produced more than the one kind and character of coke here?

Mr. TICHENOR: No sir, but I want to get the information.

The MASTER: Well, he may answer subject to the objection.

2141 A. Yes, a very great difference. As a general proposition, the oven coke is graded into two classes called foundry coke and furnace coke; either foundry or furnace coke must be very much harder than gas house coke and usually sells in the market at from 50 cents to $2. a ton more than gas coke.; this is subject to the one exception that certain districts, particularly West Virginia and portions of Ohio, produce a grade of soft coke which, although it burns as long as foundry or furnace coke, does not gain the necessary strength of structure to permit of its use for foundry and furnace purposes; this coke is used in malt house-, distilleries, brick yards, bakeries and other places where gas house coke is usually sold and in fact in this market determines the price which can be got for gas house coke.

153. I think you have testified heretofore that your tar is all handled on contract for a term of years, or on contract running for a considerable length of time?

A. Yes sir, our tar is under contract until next January or February with Bushell & Sons of Peoria.

154. And have you also contracts for the disposition of your ammonia product for a period?

A. Yes sir, we have a contract which runs about a year or a year and one half longer with the Michigan ammonia works for that.

155. And as a rule that is the way you dispose of those residuals?

A. Yes sir, we have not sold either tar or ammonia to anyone else than through the contractors.

156. In what way do the transactions between your company and the old company during the year in question, so far as pertains to material and labor furnished by you, enter into your annual statement marked "Exhibit 43"?

2142 A. Only, I think, to the extent that the amount of gas sold to the Peoria Gas Light & Coke Co. is included in the statement; I think there is nothing else in the statement which refers or relates to any transaction between the Peoria Gas & Electric Company and the Peoria Gas Light & Coke Co.

157. Then, I understand you to say that none of the charges made by your company against that company for labor or material in such street or other work as you did for its account, is charged in "Exhibit 43"?

A. No sir, none of the material or labor furnished to them on their account is included in the operating expenses as shown on that statement; that statement covers only the operation of the Peoria Gas & Electric Company.

158. Then, in your accounting all of those items were kept entirely separate?

Ans. Entirely separate, yes sir.

159. That labor for the old company, during the time your contract with that company was in force, was furnished by your company, was it not?

A. No portion of the labor in this statement was; we furnished certain labor and material under the terms of the contract.

160. That is what I mean?

A. Yes, we performed certain services for them under the terms of the contract.

161. Was that labor performed by regular employés of your company or were they extra men?

A. They were all additional men with the exception that a portion of the time of the street foreman and shop foreman and of Mr. Robb, the superintendent of distribution, was put in on the work of looking after matters pertaining wholly to the business of the Peoria Gas Light & Coke Co.

162. The labor itself then, as I understand, was not done
2143 by your regular men?

A. Not as a rule; there was some necessary overlaps in case of complaint or a hurry call to set a mater or something of that sort.

163. In what manner was the accounting done in those instances where the work was performed by your regular men?

Objected to as immaterial and not cross examination and not proper rebuttal. Same ruling.

A. Whatever time they put in on the matters of the Peoria Gas Light & Coke Co. was charged to the Peoria Gas Light & Coke Co. in other words, every man turned in every day a diary showing the number of hours' work he put in on a given working order; in that case all work performed for the Peoria Gas Light & Coke Company's working order were gotten out with a number showing the character of the work and if one of our men worked, we will say, five hours, one hour or half an hour, or any portion of time, on work for

the Peoria Gas Light & Coke Co. in turning in his time at night, he showed the length of time he had worked on that particular job number and in making up the pay rolls the distribution was made accordingly.

164. And was the time employed for the other company deducted from the man's regular time with your company?

Objected to same grounds. Same ruling.

A. Yes. You see a man working 10 hours a day would have his time distributed over the several classes of work he was doing, and that portion of his time which was charged to the old company would not appear in our expense statement.

165. Then if one of your regular men worked for your company 5 hours a day on a given day, and 5 hours for the old company, in your expense statement it would show as though he had worked 5 hours for your company?

A. Yes sir, his time would only be put in at 5 hours for 2144 our company.

166. In your statement marked "Exhibit 48" what does the item under labor in account No. 32 include?

A. That includes the labor in erecting the buildings at the gas works, or any additions to the building.

167. Up to September 30, 1902.

A. Yes, and that includes the labor which was furnished by the company itself; it does not include any labor furnished by contractors on contracts.

168. What is the meaning of those two items in that account for exactly the same amount?

A. In the general ledger of the company, we have only 6 property accounts; those are, "general expenses," "manufacturing," "distribution," "miscellaneous," "plant," "additions to property." As I explained in my original testimony, the first four subdivisions run only up to May 1, 1900, and there has been no entry in those accounts subsequent to that time. That leaves as the property account or as often termed, "construction accounts" on the general ledger merely, "plant and additions to property." Now, "plant" and "land and buildings" in this particular case happens to mean the same thing. In other words, there is no sub-division of the plant account and the plant account contains now only the cost of land and buildings that was left in that way with the expectation that at some time we might want to sub-divide that still further and on the general ledger account everything appears as "plant" that is now included in account No. 32—"land and buildings."

169. And "plant"?

A. Land and buildings is the only thing included in plant account.

170. What is the reason that item is so much smaller than it was in the corresponding account as of September 1, 1900?

2145 A. Because in the early part of this summer we sold a piece of property in St. John's subdivision for about $11,000. and credited the money when received to that account.

171. Outside of that particular sale and the corresponding credit, has there been any addition to that item?

A. Nothing of any great importance; there may have been some small amount; I do not now recall any.

172. Is that the only item, with the exception of these small matters to which you have just referred, entering into the labor account under No. 32 that materially affects it in those two years?

A. I do not recall now any difference between the account September 30, 1900, and September 30, 1902, and I do not recall anything, except that one item of $11,000. of any importance which would affect that account.

173. By reference to the corresponding item as of date September, 1900, it then stood $51,510.16?

A. Yes, that was September 1, 1900.

174. In what manner do you account for that difference?

A. That was undoubtedly due to the fact that at the close of the year 1900, when the general audit of the books was made, it was found that some contractors' bills were included under the head of labor which were subsequently closed over to the material heading and the difference made in that way. You will notice that the total investment was $98,322. at that time as against $87.919. now. If the $11,000. is added to the account as it appears September 30, 1902, it would make almost the exact total investment as shown by the statement of September 1, 1900, and I have an indistinct recollection—and yet what I believe to be an accurate recollection—that at the date of the general audit of the books at the close of the fiscal year, it was discovered that contractors' bills had been put
2146 into labor which should have gone into material; that would be my explanation of the difference.

175. Under which one of the headings in account No. 32 does that land appear, either in your statement of September 1, 1900, or September 30, 1902?

A. In the statment of September 30, 1902, it appears under the head of material—the land itself, and I think also appears under the same heading in the statement of September 1, 1900.

176. There is a large difference, is there not, between the item of material in account No. 32 in your statement of September 1, 1900, and that of September 30, 1902?

A. Yes, there is.

177. How do you account for that?

A. Probably it is due entirely to this fact which I stated before, that in making up the statement as of September 30, 1902, which was taken from the books and vouchers of the company, the bills of some contractors were put into labor which were subsequently transferred to material.

178. Can you tell by taking the differences as to whether or not

the change in those accounts can be accounted for in that manner?

A. Yes, I am very positive that is the correct explanation, for this reason; that the greater portion of the work in connection with the construction of the plant was done by contract and our own men, who were regularly on our pay roll, did relatively little of that work. As between what is labor and what is material, it is often difficult to discriminate and I now recall the fact that in discussing that matter with the auditor and treasurer of the company we finally concluded—and this conclusion was reached some time after the preparation of this particular statement of September 1, 1900—that we would put into the column hereafter only the labor that appeared on our own pay roll so in checking it up we
2147 could readily check the labor column against our pay roll although the work furnished, or the thing of value furnished, by a contractor might be wholly labor, we would yet put it in the material column so the labor column would balance with our pay roll, and I have no doubt whatever it was in consequence of that understanding we arrived at that the change was made.

179. There has been no change in your land except the one to which you have referred?

A. No sir, nothing except the sale of the piece of property I referred to.

Re-direct interrogatories by Mr. ABBOTT:

1. In making up the annual statement marked "Exhibit 43" is any of the material or labor furnished to the Peoria Gas Light & Coke Company under their contract, and which appears in the account offered in evidence marked "Exhibit —, and which has been paid for by that company as testified, included in the operating expenses of your company as appears in said annual statement?

A. No sir, no portion of either the material or labor.

2. Referring to the statements you made on your cross examination with reference to the amount of gas sold from month to month during the period from September 1, 1901, to August 30, 1902; do the amounts which you gave there as of gas sold to the Peoria Gas Light & Coke Co. include the amount settled for by that company at the rate of 50 cents per thousand feet as leakage or unaccounted for gas?

A. Yes sir, the amount as given includes all gas furnished to them, whether the gas was paid for at 50 cents or 75 cents per thousand feet.

3. You referred several times to a difference in the price of coke furnished here in the Peoria market. I will ask you if any con-
2148 siderable portion of that was sold at the maximum price you mentioned except such as would be delivered in an occasional wagon load?

A. No sir.

4. You also spoke of the fact that in some instances higher price had been gotten for coke during the present summer on account o the increased price of coal. In that connection you may state wha the ruling market price of Youghiogheny coal is at the preser time?

Objected to as incompetent, improper, immaterial, not proper r direct. (Admitted subject to the objection.)

A. The ruling price today is $5.30 per ton on board cars Chicag or $5.50 per ton on board cars Peoria.

5. In the statements which you made at length on your cro examination with reference to the amount of material charged ou from the store room from month to month, at what rate did yo figure the price of Youghiogheny coal, that is in connection wit this store room account and in making up your annual statemer "Exhibit 43"?

Objected to same grounds as before. Same ruling.

A. That coal was charged out at whatever the store room un for the month was. That is to say, we take at the close of eac month the total amount of coal which has been received durin the month and the prices we have paid for it and charge it out that unit price; that averaged from $2.80 for the most of it to $3. for a small portion of it.

6. I will ask you what price your company has to pay for Youg iogheny gas coal at the present time in this city for the purpo of gas manufacture?

Objected to same grounds. Same ruling.

A. We are paying now $4.25 a ton; I bought 2,000 tons in Se tember at $4.25 on track here in Peoria and that is the co
2149 we are now using.

7. In handling the vouchers, with reference to which y were asked on cross examination, you stated, I believe, that the were all the vouchers that appeared with reference to the expen tures for each given month as you testified. Do you mean to understood that those vouchers on which you were examined are of the vouchers relating to the expenditures of your company any one of those months?

A. No, I did not mean to be understood that they represented t entire expenditures of the month; they represent the cash payme made in that month so far as was practicable.

8. My question related to the possibility of loss of any vouch in their handling by the different people who have to do wi them—whether such possibility of loss exists?

A. Oh, yes, there is some possibility of loss.

9. What system, if any, do you have of checking over these st room accounts for the purpose of correcting them, that is, is t

done from month to month or is it done once a year with reference to the monthly send-out from the store room?

A. There is a checking and correction of errors at the close of the fiscal year; the daily manufacture of coke, tar, ammonia all residuals and the daily use of the coal is kept track of so far as is possible without too great cost; the wagons are hauled over a scales to determine the amount of coal but there is always a difference, and generally a shortage, between the amount of coal as appears from the weighing of the cars, and the amount as determined by the total weight of the small wagons which bring it into the house; those differences are carried along and checked out at the close of the fiscal year on December 31st; the same way with the coke and the tar and ammonia; we can only arrive at the actual
2150 production of each month approximately, not correctly.

10. Were such corrections made in connection with the annual statement you made up marked "Exhibit 43" and was that statement made up with reference to the corrected store room account?

Ans. Yes sir.

11. And do those corrections appear in the statement which you gave of the amount of material charged out from the store room from month to month in your testimony now on cross examination?

A. No, those statements don't appear there.

12. When you made up the annual statement marked "Exhibit 43," state what you did with reference to personal instruction and examination of the vouchers which were made the basis of that statement?

The MASTER: Oh, I think you have been all over that Mr. Abbott:

Mr. ABBOTT: It is for the purpose of making the record perfectly clear and comprehensible on any minor discrepancies that may appear between the annual statement and any figures which may be produced as the result of the cross examination of this witness. In this cross examination, the witness has simply hurried over the vouchers without a close examination of them, whereas in making up the annual statement, he personally inspected them and had personal knowledge of their proper distribution.

The MASTER: You want to show that "Exhibit 43" is correct and "Exhibit 47" may possibly be wrong, do you?

Mr. ABBOTT: No, "Exhibit 47" is for the month of September only, but I desire the witness shall have an opportunity to make clear any discrepancy which may occur between "Exhibit 43," which the witness knows to be correct, and figures which may be made up by counsel or experts from his testimony on the vouchers on cross examination.

The MASTER: It occurs to me the witness has explained it
2151 fully but if there is any doubt about it, the witness may answer.

A. I made a personal examination and verification of the original vouchers and all original entries and personally made up the computation from them which is contained in the statement marked "Exhibit 43."

13. I will ask you if there is any further explanation you desire to make of the connection between the vouchers, with reference to which you were interrogated on cross examination, and the annual statement you made up marked "Exhibit 43" further than you have already made.

A. I think I stated in my cross examination that the vouchers did not include taxes or insurance or items of that sort; neither do they include any journal entries other than those made up from the store room reports at the close of each month. Now, there are certain items of labor which are put upon material in the store room and there are also certain accounts which are carried in what we term an adjustment account which adjusts discrepancies and differences which arise at any time either in the manufacturing or distributing account which are not included in the vouchers.

14. Do the vouchers for any given month show all the expenditures for that month or if there are any differences state how those come about,—I mean if any in addition to what you have stated with reference to the fact that some journal entries are made as you have testified?

A. The vouchers sometimes—I may say quite often—as registered in any month may not necessarily mean the expenditures or expenses for that particular month for the reason it is the custom of the company to pay on the 20th of the month for all material received during the preceding month, provided the invoice is on hand to be checked up and audited by the 10th of the month, but
2152 it frequently happens that people from whom we buy material fail to get the invoice of it in in time to be paid, so there is quite often an over-lap and in attempting to separate the expenses of any particular month from the preceding month one must go to the vouchers to see when the material was received or to some source other than to the vouchers to see when the material was received that should have been charged.

Complainant rests in rebuttal.

Sur-rebuttal Evidence.

MATHEW HENEBERY recalled on behalf of defendant, testified as follows:

Direct interrogatories by Mr. MANSFIELD:

1. You are the same Mathew Henebery that testified before in this case, are you not?

A. Yes, I have testified once.

2. How long were you connected with the Peoria Gas Light & Coke Co.?

A. I guess it must be 20 or 25 years.

3. Are you familiar with the items of expense that enter into the cost of the manufacture of gas in a general way?

Objected to as incompetent, immaterial and not sur-rebuttal.

The MASTER: Do you limit *to* his experience in the city of Peoria, Mr. Mansfield?

Mr. MANSFIELD: Yes sir, it is simply a preliminary question.

The MASTER: I do not see any objection to his answering the preliminary question; it is simply a qualifying question anyway.

A. As a general thing, I passed on the items of expenses always, as I was on the auditing committee most of the time I was connected with the company.

4. From your connection with the Peoria Gas Light & Coke Co. and your position on the auditing committee, can you tell what was the average annual legal expense that your company was put to in conducting its business of manufacturing gas and distributing it in the city of Peoria during the time you were connected with that company?

2153

Objected to as incompetent, immaterial, not proper sur-rebuttal and because the question refers to a specific instance and not to general knowledge of the subject.

The MASTER: I don't think it competent as sur-rebuttal but the witness may answer subject to the objection.

A. Well, now, it depends altogether on what kind of expenses you have reference to.

The MASTER: What do you mean by legal expenses, Mr. Mansfield?

Mr. MANSFIELD: Such expenses as are absolutely legal in their character—paying attorneys.

The WITNESS: I think while I was connected with that company $250. per annum would cover everything in the way of legal expenses—$2.00 to $2.50.

5. What do you include in legal expenses?

Objected to as incompetent, immaterial, not sur-rebuttal, referring to a specific instance and not to general knowledge covering the subject.

A. My idea in my answer was attorneys' fees and such matters, damage suits—anything of that kind—I would include them for the time I was connected with the company; I think $250. would cover everything to the best of my knowledge.

6. Does your last answer include all damage claims that were settled by the company either in or out of court?

A. That will include them during the number of years I was in

on the average per annum. I would further state, if not ob-
2154 jected to, that I really don't remember of but one damage suit which we compromised and one of the men that compromised it is here now; that is the only damage suit I ever knowed the company had; that was one up on Jefferson street.

7. Was there a suit brought upon that claim?

A. I could not say whether there was or not but I think not.

8. It was settled out of court, was it?

A. That is my opinion of it; Stevens, Horton & Lee settled it.

9. Do you know how many horses and wagons were used by the Peoria Gas Light & Coke Co. subsequent to 1895 in the usual course of their business?

Objected to as incompetent, immaterial, not sur-rebuttal, and referring to a specific isolated instance and not as to the general rule covering such business.

The MASTER: The witness may answer subject to the objection.

A. Well, for the most of the time, we had but one horse and wagon.

10. When if at any time did you have more than one horse and wagon.

Objected to same grounds. Same ruling.

A. After we got into the electric light business, then we mixed backwards and forwards and they got more there but not in the gas company; we had but one.

11. You had one horse and wagon then that was exclusively used in conducting the gas business?

Objected to same grounds. Same ruling.

A. Yes, that is all I remember; of course, we had a good deal more hauling at times than one wagon could do. For instance, when a shipment of pipe come that was not delivered at the yards we had to have it hauled by team.

2155 12. How frequently did that occur?

Objected to same grounds. Same ruling.

A. We had to go outside very little for outside help to haul our iron.

13. Do you know about how much the average annual cost would be for teams hired outside of the one wagon of the Peoria Gas Light & Coke Co.?

Objected to same grounds. Same ruling.

A. Why, maybe $100. some years and some years nothing; perhaps there would be 5 or 10 years we would have no iron.

Cross interrogatories by Mr. ABBOTT:

1. Were you on the auditing board during all the time of your connection with that company?

A. Yes, I believe I was.

2. And during all that time the bills for legal services loss and damages came under your supervision?

Ans. Yes.

3. And you think your recollection of that matter at the present time is fairly clear?

Ans. I think so, yes sir.

4. Do you recall any instance in which your account for legal services for a year would run less than $200. or $250.?

A. Well, I don't know.

5. Were there not some years when it went considerably more than that?

Ans. It may be.

6. During the time that the proceedings in eminent domain by the Peoria Terminal Railway Company was pending against your company, were not your expenses for legal services during those years considerably in excess of that amount?

A. Yes sir, if you include them.

7. That case was tried twice in the circuit court of Peoria county, was it not?

Ans. Twice.

2156 8. And after the first trial, it went to the supreme court, did it not?

Ans. I think not.

9. Do you remember what your expenses for legal services was in connection with the first trial of that case?

A. They were very heavy.

10. They amounted to several thousand dollars, did they not?

A. Yes.

11. Do you know what the expenses were in connection with that case on its appeal to the supreme court, if it went there?

A. I am not so well posted on that; I was not aware it went to the supreme court.

12. You do remember, however, its being tried a second time in the circuit court of Peoria county, do you not?

A. I don't remember that; I think we had but one trial; I know we had a man from Chicago down to attend to that for us.

13. It was Larry Harmon, was it not?

Ans. Yes sir.

14. Was he here at the first trial?

A. He was here at one trial.

15. To refresh your recollection, I will ask you if it is not true that the case was tried here in the circuit court of Peoria county and then a year or two afterwards it was re-tried here and it was on the second trial that your local attorneys were assisted by Larry Harmon of Chicago?

A. I don't remember that he tried the first case.

16. Were not your expenses on that trial, I mean the second trial, for legal services very heavy?

A. You mean the one Larry Harmon was in?

17. Do you remember what the charge for legal services was in connection with that case?

A. Yes, I remember what Larry Harmon charged us; he charged us $100. a day.

2157 18. Do you remember about how long the trial lasted?

A. I don't know but I think he got paid for five days.

19. Was it not much more than that?

A. Maybe it was.

20. Did not his bill run into the thousands for legal services in that case?

Ans. No.

21. You also employed Peoria attorneys in the trial of that case, did you not?

Ans. Well, I don't remember.

22. I will ask you if Mr. Tichenor and Judge Evans did not also participate in the second trial of that case?

A. By the way, yes, I know Judge Evans and Mr. Tichenor were in the case at some time, but I think it was the time Mr. Harmon was in it.

23. Did they render a bill for legal services?

A. Oh, I don't know what their bill was; I took particular notice of Harmon's bill because I thought it was pretty expensive; I don't remember the other bills.

24. You don't know now whether they rendered a bill for those services or not?

Ans. I do not.

25. Is it not a fact that the Peoria attorneys on that second trial of that suit were paid over a thousand dollars?

A. I could not say as to that, but I know Judge Evans was in one suit in connection with that condemnation case; I was of the opinion that it was at the same time Larry Harmon was here.

26. Your recollection about that is not so clear as it is with reference to the small average amount you have given?

A. No sir, it is not.

27. In that same suit you also had a number of expert witnesses employed, did you not?

Ans. Yes sir.

28. Did you have any expense in connection with them?

2158 A. Yes, some of them were very heavy.

29. How much, if you recollect, was the expenses in connection with the fees of expert witnesses in that case?

A. I remember one man, I believe, who charged $100. a day—an expert engineer.

30. Who was that, Mr. Egner?

Ans. I could not say who it was.

31. You had several of them here, did you not?
A. I don't know how many there was; I think two or three but I don't know in particular what any of them charged.
32. They all charged for their services, did they not?
A. I could not say as to that.
33. Is it not a fact that none of them charged less than $100. per day and traveling expenses?
A. I could not say, I know one did charge $100.
34. During the years that suit was pending, your expenses for legal services and fees of expert witnesses and other costs in connection with that suit were very heavy, were they not—running into thousands of dollars?
A. They were about $7,000., I think, in connection with that case; that was about the only suit we ever had, I think.
35. I believe you stated on direct examination that you considered your estimate of $250. a year would include legal expenses and the settlement of loss and damage claims?
A. Yes, I did, but I did not have reference to that condemnation suit in that answer.
36. Did you also pass on the vouchers which were used in the settlement of loss and damage claims?
Ans. Yes sir.
37. And you recollect at this time of but one in all that period?
Ans. I do not recall but one.
38. Do you remember the case of Elizabeth Harrington down near Steubenville street who claimed to have been injured
2159 by suffocation by gas in her house one winter when the ground froze up—I think it was the winter of 1895-'96?
A. I don't recollect it at all.
39. You don't know how much was paid her in the settlement of that case?
Ans. No sir.
40. Do you recollect not quite so long ago, I think in the summer of 1898-'99 of an explosion in a basement on North Washington street claimed to have occurred because of a defective meter?
A. Yes, I remember that.
41. There was at least one person killed and two or three injured in that explosion, was there not?
A. No, nobody was killed.
42. Was not a woman so fatally burned that she died a day or two afterwards?
A. Oh, yes, I remember that.
43. You don't know what was paid in the settlement of the claims arising out of that explosion, do you?
A. I don't think there was a cent; I don't know of one cent being paid in that case (because it evidently did not come from the gas).

Complainant objects to that part of the foregoing answer enclosed in brackets as not responsive and moves the court to exclude it.

44. Do you remember an explosion down on South Washington street near Thomas & Company's wholesale fruit house where Tom Ballantine received injuries?

Ans. Yes sir.

45. Was that case settled?

Ans. Yes sir.

46. There was money paid in that settlement, was there not?

A. There was some money paid to Ballantine.

47. Do you remember how much?

A. I don't know, the Coffeys done that themselves.

2160 48. Is it not a fact that Ballantine was paid upwards of $500. as a compromise of his claim for injuries received in that explosion and that the gas company also paid the expenses of repairing the building, amounting in all to upwards of $2,000.?

A. I want to deny that; while I may be wrong, I don't think there was ever such money paid out.

49. Are you sure about that?

A. I know they compromised with Ballantine. You ought to know what he was paid because it came through your office, and about anything being paid to the building, I know nothing about that.

50. What was this case up on North Jefferson street you mentioned on direct examination?

A. I don't know; you know more about that than I do.

51. But I am not on the witness stand.

A. My understanding of that case was it was compromised for $1,500.

52. That is a fact. All of these loss and damage claims which have been mentioned occurred within the last 6 or 7 years, have they not?

A. Yes, within the last seven years anyway.

53. Don't you remember also an explosion up on Knoxville avenue in which an entire family named Allmon claimed to have been asphyxiated by gas?

A. I remember something about it.

54. Do you know anything about what the situation of their claims at present is?

Ans. I know nothing about it.

55. Do you know whether or not suits are now pending in the circuit court of Peoria county brought by all the members of that family claiming to have been injured at that time?

2161 A. I don't know; I think that occurred since the old company sold out.

56. You mean it has occurred since April, 1900, since you sold out your interest?

A. Since the Coffeys sold out.

57. Did not that accident occur the previous December?

A. I think not but I may be mistaken.

58. You say during the time you were active in the management

of the Peoria Gas Light & Coke Co. it had only one horse and wagon for doing its business?

Ans. That was all.

59. Is it not a fact that the officers were receiving salaries which enabled them to furnish to a large extent their own horses and buggies or did not they furnish them for use in running about the city and attending to such matters as the officials attended to?

Objected to as not cross examination and calling for a conclusion.

The MASTER: He is asked for the fact and may answer subject to the objection.

A. There was but one horse and wagon; the Coffeys and Robison and myself were officers and I had my own horse and buggy at my own expense.

60. And Robison had his?

A. I suppose so, and the Coffeys had theirs.

61. All complaints about meters and defective service were attended to promptly with this one horse and wagon, were they?

A. That is my idea.

62. You had no complaints come to the office with regard to delay in attending to those matters at any time?

A. It may be but they were all settled up as soon as possible.

Re-direct interrogatories by Mr. MANSFIELD:

2162 1. You have testified with regard to a condemnation suit of some property that was owned by the Peoria Gas Light & Coke Co.—where was that property located?

A. Down at the gas works.

2. Was it a part of the ground upon which the manufacturing plant was situated?

Ans. Yes sir.

3. Did the condemnation of that piece of property have anything to do with the manufacture of gas?

Objected to as incompetent, immaterial, calling for a conclusion and not proper re-direct.

A. No, that had nothing to do with the manufacture of gas.

4. Was it a suit or proceeding that might have occurred to any manufacturing industry that had property located in the same locality?

Ans. Yes sir.

5. And it was a suit brought by the Peoria Terminal Railway Co. against the Peoria Gas Light & Coke Co.?

A. I think that was it.

6. For a railroad right of way through those premises?

A. Yes sir.

Re-cross interrogatories by Mr. ABBOTT:

1. You were a witness, were you not, on both trials of that condemnation case?

Ans. Yes sir.

2. And you were in court practically during the greater part of each trial, were you not?

A. Well, I forget all about one trial, if there was two—yes I was, I was interested.

3. Is it not a fact that the claim was made by your company at that time and attempted to be established on the trial of that case that the taking of this ground by that railroad company would cripple and damage severely your manufacturing facilities there?

2163 Objected to as immaterial.

The MASTER: The witness may answer subject to the objection.

A. Well, it only would have an affect on one article or item there, and that would be a holder, and that is away from the manufacture of gas altogether.

4. Do you remember the testimony of Mr. Coffey in that case?

Objected to as immaterial and incompetent. Same ruling.

A. No sir, I do not.

5. Was it not claimed and did not Mr. Coffey testify that the taking of that strip of ground would, to such an extent, diminish your storage capacity that the cost of the manufacture of gas would be considerably increased owing to the fact you would not then be able to get your coal by water during the navigable season and store as much as you formerly had done?

Objected to same grounds. Same ruling.

A. He may have given such an answer as that.

6. Was not it so considered by your company at the time?

A. Well, they talked a good deal about that getting coal from the South.

(Mr. MANSFIELD:)

7. Did you ever bring any coal in by water?

A. Not to my knowledge, no.

(Mr. ABBOTT:)

8. You did bring coal by water down the Ohio river, did you not. I don't refer to bringing coal to Peoria by water but did you not make use of the facilities for bringing coal down the Ohio river during the season?

Objected to as incompetent and immaterial. Same ruling.

A. That had nothing to do with that; we made our contracts

with men who came here selling coal and, of course, they got it here the best way they could, but that was the way they generally shipped I understood; they shipped it that way down the Ohio river to Cincinnati and then by rail to Peoria.

2161 9. Is it not a fact that it has always been claimed by the gas company here that it ought to have a large storage capacity for the purpose of taking advantage of cheap rates on the Ohio river?

Objected to on same grounds and also as not cross examination.

A. I don't know; I had nothing to do with the buying of coal.

LESLIE ROBISON, recalled on behalf of defendant, deposes and says:

Direct interrogatories by Mr. TICHENOR:

1. You are the same Leslie Robison who testified once before in this case, are you not?

Ans. Yes sir.

2. State whether or not you know the average annual expenditure of the Peoria Gas Light & Coke Co. during the period you were connected with it for legal services?

Objected to as incompetent, immaterial, not proper sur-rebuttal and also because it refers to a specific isolated plant and not as to the general expenses of such business.

The MASTER: Answer subject to the objection.

A. Well, I know generally, I could not give it exactly; I think $250. per year would have paid our attorneys' fees while I was connected with the company—strictly attorneys' fees, not costs or damages—the first 15 years I don't believe we paid $100. a year; in the last 7 or 8 years it was considerable.

3. Do you remember the condemnation case of the Peoria Terminal Railway Co. against your company?

A. Yes, very well.

4. Outside of the expenses of that suit, what did you pay for legal services during the 10 or 11 years ending with 1896 or 1897?

Objected to same grounds as before and also as entirely too remote to have any bearing on this case. Same ruling.

2165 A. I had better describe it a little. This suit you speak of on upper Jefferson street was after I was out of the company and this Allmon suit was after my time; the condemnation suit and this one down here with Thomas & Co. and the Hudson suit were the only three suits that amounted to anything while I was there and I think it was 24 or 25 years, and the attorneys' fees, figuring those three suits the one at Thomas & Co.'s, the Hudson suit and

condemnation suit, I believe $250. a year would pay the attorneys' fees for the 24 years including those three suits.

5. Leaving out of the account the expense of that condemnation proceeding, how much to the best of your recollection did you pay for legal services during the 10 or 11 years ending about the year 1896 or 1897?

A. Outside of the condemnation proceedings and outside of those other suits?

6. Those other cases were after 1896 and 1897 except the condemnation case.

A. Outside of those three suits, I don't believe we paid $500. attorneys' fees.

7. Is it not a fact that during that period you did not pay $100. attorneys' fees?

A. I don't know that we paid anything; some of our directors were pretty well informed and kept us out of law suits.

8. During the time you were connected with the company, was any suit whatever brought against you for personal injury or any claim of that kind?

Objected to as incompetent, immaterial, calling for an isolated instance and too remote to have any bearing on the issue in this case.

The MASTER: Answer subject to the objection.

2166 A. I don't remember whether there were suits brought on this Hudson case and on that Harrington case down on Cedar street which you have spoken of or not but it is my understanding we advised with our attorneys on the subject and settled the claims. As I remember it, there was very little attorneys' fees mixed in with it.

9. When did you sever your connection with the Peoria Gas Light & Coke Co.?

A. It seems to me it was in May, 1898.

10. How long were those claims prior to the termination of your connection with the company?

A. Well, the Hudson suit, the Thomas suit and the Harrington case were all shortly before that—not very long; all within say three, four or five years.

11. Are you able to state how much your company paid for damages upon claims made of that character during the time you were connected with it?

A. Well, it would be only general.

12. To the best of your recollection what was it, and you may name the different cases, if you recall them?

A. I don't remember that although I helped audit those bills and voted on them; it is so long ago it has completely gone from me; I could not tell the amount we paid Mrs. Harrington or how much we paid down here; I don't think we paid Mrs. Harrington very much; the Thomas suit down here, I think, cost us probably $1500.,

the whole thing, if I remember rightly, and the Hudson claim I have no recollection of what that cost us, if anything.

13. What is the best of your recollection with regard to the expense of settlement of the Harrington suit if at this time you have any definite recollection?

A. I only remember now it was not very large; I could not for the life of me tell how much it was; you don't want guessing at it and I cannot remember.

2167 14. During the time you were connected with the company, how many horses and wagons did it have and use in its business?

A. We always kept one horse and a one horse wagon for going around making repairs, etc.; we only kept one that I remember of, but we hired some hauling done, as Mr. Henebery said; we hired the pipe delivered.

15. To what extent did you hire pipe delivered and what were the expenditures for items of that character?

A. Well some years nothing, I think other years more; when we were laying down considerable pipe we had to haul that pipe around take the car load of pipe and deliver it around on the streets; I should say $100. a year on the average to deliver the pipe; some years it was nothing at all and some years $300. or $400.; I remember one year we delivered 40 car loads and I should say it cost us $300. that year to deliver it.

16. When you were delivering this large quantity of pipe to which you have referred, were you engaged in construction work or was that in repair work?

A. Sometimes it was in replacing old pipe with larger pipe and sometimes it was new pipe in new places—extensions; it was charged to construction mostly that kind of pipe.

17. And the hauling also would go into construction account?

A. Certainly. Well, there would be a little hauling in repairs if you call it repairs.

18. I am speaking of the large items to which you have just referred?

A. We never had any hauling done for a small amount of repair pipe.

Cross interrogatories by Mr. ABBOTT:

1. How did you take your meters from the shops to the various houses?

Ans. In the one horse wagon.

2168 2. You had your own horse and buggy during that time, did you not?

Ans. Certainly.

3. And that you used yourself for whatever attention you gave to the gas company's work?

Ans. Yes sir.

5. And Mr. Henebery did the same?
Ans. Yes sir.
6. Did Coffey have a horse and buggy?
A. Yes sir, and I think he owned his own horse and buggy; don't think the company paid anything for it.
7. The company had the benefit of it without expense except far as it would be included in the salary?
A. I don't think we were ever paid for any horse feed.
8. Do you remember about how long that condemnation suit w pending?
A. No, I don't remember just how long.
9. Were you a witness on both trials?
Ans. Probably.
10. You remember there were two trials of the case, dod you no
Ans. I am at a loss to remember whether there was one or two.
11. Did you ever figure up about what your total legal expens were in connection with that case including attorneys' fees, fees expert witness and other expenses?
A. Yes sir, the cost of that suit was over $7,000., attorneys' fe witness' fees, court costs, etc.—mostly witness fees.
12. After that suit was brought you regarded it as necessary defend it, did you not to protect your droperty rights?
A. Since you have asked me the question, I will say I did n think that suit ever ought to have been brought; I think it ough to have been settled; I had one of the same kind and settled it an it did not cost me a dollar.

Complainant objects to the answer as not responsive and mov the court to exclude it.

13. (Interrogatory No. 12 repeated to witness.)
2169 A. Certainly.
14. And as you had to defend it, these outlays went in a a necessary part of the company's outlay for those years assumin it was necessary to defend the suit—is that true?
A. I suppose it is; the expenses were necessary.
15. You say during the first 16 or 17 years of your connectio with that company you had practically no expense for attorneys a you recollect it now?
Ans. Yes sir.
16. Then in the next few years, your legal expenses increased t some extent?
Ans. Yes sir.
17. It is a fact, is it not, that they increased because the risk o explosions became greater as the plant and distributing system be came older?

Objected to as incompetent, improper, not cross examination, and calling for a conclusion.

The MASTER: The witness is asked whether or not that is a fac and he can tell what he knows as to that being a fact or not.

A. I always thought the damages were in proportion greater as the business of the company was greater.

18. And as the plant grows older?

A. I do not think it grows any older; we always renewed our pipe, renewed our works and kept them up in good order.

19. And it is necessary to do that in order to prevent such things happening?

A. To manufacture gas economically and properly, it is necessary to keep the plant in good shape.

20. You stated also that your expenses for attorneys' fees proper during those first 15 or 16 years were very small—they increased, did they not during the last 5 or 6 years of your connection with the company?

A. They did on account of these things mentioned here.

2170 21. Were not the charges for legal services during the last four or five years of your connection with the company considerably in excess of $250. a year?

Ans. Certainly.

22. Did not it run over $500. a year for the last 5 or 6 years of your connection with the company?

A. I think it did counting the condemnation suit, the Harrington suit and the Thomas suit.

23. Outside of the condemnation suit, in the regular work and conduct of your business, including settlements of these various damage suits, did not your legal expenses average for attorneys' fees during the last 5 years of your connection with the company over $500. a year?

A. I don't think they did, not strictly for attorneys' fees.

24. Do you remember about that explosion down on South Washington street near Thomas & Co.'s?

Ans. Yes sir.

25. What did you state you paid there?

A. I think our damage there all together was about $1500.

26. Was it not more than that; was not Ballantine paid over $500. and then did not the company also attend to the matter of repairs down there which cost upwards of $2,000?

A. I don't think it was so much as that.

27. They did do that, whatever the expense was?

A. Yes sir, we repaired it but I never thought it cost that much; I put it at $1,000. at the outside.

28. I understand you to say that these Allmon suits came up after your connection with the company?

A. I believe so.

29. You don't recollect at this time what was paid in settlement of the claim that grew out of the explosion on North Washington street at the Hudson store?

2171 A. I remember the fact of the explosion very well but I don't remember what it cost us.

30. And this suit on North Jefferson street was settled after you went out?

COPY BOUND CLOSE IN CENTER

A. Yes sir, I didn't have anything to do with that.

31. So you don't know what was paid for that?

Ans. No.

32. Don't you know and is it not a fact that suit was brought on the Harrington claim and the suit was substantially ready for trial and a jury either wholly or partially empaneled when the suit was settled as a result of a conversation between Mr. Edwards and his client on the one hand and yourself, Mr. Coffey, Mr. Horton and myself on the other hand?

Ans. I don't remember.

33. But you know the claim was settled and something was paid but you don't know how much?

Ans. Yes sir.

34. I think you testified on your former examination in this case that you were a practicing attorney at that time?

Ans. Yes sir.

35. Is it not a fact that during the early years of your association with the Peoria Gas Light & Coke Co. that in discussing these various matters which came up from a legal standpoint you were able to and did advise the directors on a great many matters?

Objected to as incompetent, improper, immaterial, and not cross examination. Same ruling.

A. I don't remember to have advised them in any case we ever had in court.

36. I do not refer so much to cases in court as I do to those matters that would naturally come up in a directors' meeting involving your legal relations and on which the ordinary corporation would be compelled to consult an attorney—you did advise them on such matters as that?

A. To some extent but not a great deal.

37. I will ask you whether it is not a fact that by your skill and knowledge in legal matters you were able to and did keep
2172 the company out of litigation to a large extent during those years?

A. To a small extent; I don't remember that we had questions that involved law to any considerable extent.

Re-direct interrogatories by Mr. TICHENOR:

1. Is it not true that the Almon cases referred to were brought against the city of Peoria alone and the gas company was not made a party at all and that such cases as have been tried were against the city alone?

A. I was not a director at that time and don't know; I don't think I was.

2. Did you ever receive any compensation whatever from the company during the period you were connected with it for any advice you may have given in a directors' meeting?

A. Not for attorneys' fees.

Re-cross interrogatories by Mr. ABBOTT:

1. You considered your salary adequate, did you, for the services you rendered in that way?
A. I did not take it into consideration.
2. You are not a practical gas man?
A. No sir, not with reference to the manufacturing of gas.

This was all the evidence in the case.

2173 Whereupon said statements marked Exhibits "47 & 48" were read to the master in the words and figures following, to-wit;—

Operating Statement, Month of September, 1902.

Gas sold as per consumers' meters	4,089,400 c. f.	
Total expenditures as per statement below		$7250.76
Less value of residuals made:		
747,965 lbs. coke at 3.25 per ton	1215.44	
69,000 " breeze " 1.00 " "	34.50	
- - - " retort carbon " " "	- -	
6,111 gal. tar " .05 " gal	505.55	
2242.9 lbs. ammonia " .08 " lbs	179.42	
		1734.92
Net actual cost without depreciation or interest		$5515.84
Net cost per thousand cu. ft. of gas sold after deducting value of all residuals made		1.348
Cost per thousand cu. ft. of gas sold to consumers of Peoria Gas & Electric Co. after deducting value of all residuals made and including depreciation at 6½% on cost of property excluding cost of real estate and including interest at 10% on cost of property		2.794

Exhibit 48. I. C. Pinkney, master.

2175 Circuit Court United States, Northern District of Illinc
Southern Division.

PEORIA GAS & ELECTRIC Co., Complainant,
vs.
CITY OF PEORIA, Defendant.

I, the undersigned special master in said above entitled cause, hereby certify that, on the 5th day of November, 1901, at the ho of 10 o'clock a. m. on that day at the city of Chicago, Illino appeared before me as such special master, Mr. W. T. Irwin a Mr. E. C. Ritsher, solicitors for the above named complainant, a Mr. Henry Mansfield, city attorney of the City of Peoria, Illino as solicitor for the above named defendant; and it was then a there agreed by the respective solicitors for the parties to this cau that Mr. Charles P. Watson, stenographer, was in all repsects sat factory to report the testimony and proofs taken before me, and was then and there designated by me as such stenographer, and t usual oath of stenographer was by counsel waived, and the meth of procedure upon the hearing was then and there by me regulat as follows: The complainant will introduce such testimony a proofs as it may deem advisable.

That thereupon, on said day and place, and on subsequent da and places as in the record of said testimony appears, all the w nesses, whose testimony appears in the record hereof, were produce and personally came before me as witnesses, for and in behalf the complainant and defendant respectively, and whose testimon was and is urged to be material and necessary in said cause by t respective parties thereto. And said witnesses being first

2176 me duly sworn on their respective corporal oaths to testif the truth, the whole truth, and nothing but the truth upo the matters in controversy in said cause; and each being orall examined before me, at the dates and times as by their respectiv depos*i*tions is shown, then testified as the same appears and is full set forth in the record thereof, which is herewith returned as a pa of this my report, numbered,—vols. one (1) to seven (7) inclusiv and marked, "Schedules of proofs, "B".

I further certify that the exhibits by me duly certified as such were, as appears in the record of said hearing and taking of sai depositions, duly offered in evidence before me, and were by m then and there received as such, and are by me returned with sai depositions, said exhibits being by me marked from one (1) to forty eight (48) both inclusive, and with the exception of exhibit marke "one (1)", being plat of complainant's piant, are attached to th schedules of proofs marked "B".

I further certify that said depositions were taken under an orde of reference from this court, dated May 20th, 1901, and by agree-

ment of the parties to this cause, at the times and places as in and by said schedule of proofs marked Exhibit "B" fully appears.

Dated this 3rd day of June, A. D. 1903.

ISREAL C. PINKNEY,
Special Master in Chancery Aforesaid.

Supreme Court of the United States.

OCTOBER TERM, A. D. 1905.

No. 33.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

THE CITY OF PEORIA, Appellee.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS.

BRIEF ON BEHALF OF APPELLANT.

This is an appeal from a decree entered by the Circuit Court for the Northern District of Illinois, Southern Division.

The bill of complaint in this case based the jurisdiction of the court upon a constitutional question, and the decree of the court below having denied to the complainant the relief sought, the appeal is brought directly to this court as involving a federal question.

Complainant, the Peoria Gas and Electric Company, in 1899 obtained from the City of Peoria, a municipal

corporation under the general laws of Illinois, a franchise ordinance permitting it to establish and operate a gas plant. This ordinance was granted under powers delegated by the state to municipalities. (Clause 13, Art. V, Chapter 24, Revised Statutes of Illinois.) The ordinance was accepted in writing by the Peoria Gas and Electric Company; a bond was filed under its provisions, and it became a binding contract between the corporation and the municipality.

In the year 1900 the Common Council of the City of Peoria, acting under the same delegation of authority by the state, passed an ordinance fixing the maximum price of gas at 75 cents per 1,000 cubit feet, which ordinance contained penal clauses and other provisions deemed to be unlawful and unreasonable.

Complainant thereupon filed its bill in chancery, praying for an injunction against the City of Peoria to restrain the enforcement of the last mentioned ordinance.

The bill alleged that the controversy presented a federal question—

1st. Because the attempt of the city council to fix the maximum price at which complainant should sell its product was an attempt on the part of the municipality by state authority to violate the contract created by the franchise ordinance of 1899.

2d. Because the maximum price fixed by the ordinance in question was so unreasonably low that the enforcement of the ordinance would result in the confiscation of the property of the complainant company

without due process of law and a violation of the Fourteenth Amendment.

The answer of the municipality asserted that the ordinance fixing the price was passed under delegated authority and was the act of the state; that the price fixed was reasonable, and that whether reasonable or not, the complainant was estopped from denying the reasonableness of the price so fixed.

A preliminary injunction was granted, issue was joined and the case was referred by agreement of the parties to a special master, to take proof and report his conclusions.

After 2,000 pages of evidence were taken, the case was fully argued before the master and the master filed his report, finding—

1st. That the ordinance fixing the price was passed under legislative authority.

2d. That the price fixed was so unreasonably low, that its enforcement would result in the confiscation of complainant's property.

3rd. That there was no merit in defendant's contention based on estoppel, and

4th, that the complainant was entitled to the relief prayed in the bill.

Exceptions were filed to the master's report and argued before the Hon. J. Otis Humphrey, District Judge, then sitting as Circuit Judge for the Northern District of Illinois, Southern Division.

The case was taken under advisement and in due sea-

son the court rendered an opinion to the effect that it appeared to him from the evidence that the complainant had violated the anti-trust laws of the State of Illinois, and that therefore it had no standing in a court of equity for the protection of its property or other rights and the court directed that the bill should be dismissed *without a determination by the court of any of the issues raised by the pleadings.*

A decree was entered in the form directed by the court and an appeal taken therefrom to this court.

The Bill of Complaint as Amended.

The *bill of complaint* (Rec. 4-20) alleges that the charter of the complainant company authorized it to construct and operate gas works; that the city of Peoria in 1899 granted to it an ordinance franchise permitting it to construct and operate a gas plant and lay mains along certain streets, etc. The franchise ordinance, set forth in full in the bill of complaint, provided, among other things, that the complainant should file a bond in the sum of $1,000, as indemnity against negligence during construction; that the work under the ordinance should begin within six months and be completed within eighteen months from the date of acceptance of the ordinance; that $5,000 in cash should be deposited with the treasurer of the city, to insure prompt work under the ordinance; and that the ordinance should take effect from and after its passage and the *acceptance* thereof by the company and the *filing* and *approval* of the bond therein required.

The bill sets forth *verbatim* the *agreement of acceptance* executed by the company through its proper officers and under its corporate seal. It alleges the filing of the bond, the deposit of the $5,000 in cash and the compliance on the part of the Gas Company with all the conditions of the ordinance; and alleges that by reason of such acceptance and compliance the same became a *binding contract between the city and the Gas Company.*

The bill of complaint sets forth (Rec., 17) the ordinance passed by the city council in 1900 fixing the maximum price of gas at 75 cents per 1,000 cubic feet and containing other provisions, among which may be noted a requirement that such gas so furnished shall afford "a light of not less than 18 candle power, to be measured and ascertained *at the place of consumption* in said city;" also a provision that any corporation charging more than 75 cents per 1,000 cubic feet, or which shall furnish gas of less than 18 candle power, shall be subject to a penalty of not less than $25 nor more than $200 for each and every offense; also a provision that any corporation refusing to furnish such gas at the price named shall be subject to a penalty of not less than $25 nor more than $200 for each and every refusal, and containing a further provision that "*all ordinances or parts of ordinances in conflict with this ordinance are hereby repealed.*"

The bill of complaint denies the right of defendant to pass an unreasonable ordinance—which denial is explained and modified by the subsequent amendment of the bill.

The bill further alleges (Rec., 18, 19) that for the

reasons stated the price ordinance is an attempt to impair the rights of contract between complainant and the city; that it is an attempt to take private property for public use without just compensation; that its enforcement will deprive complainant of its property without due process of law and will deny to complainant the equal protection of the law in violation of the Constitution of the United States.

In support of the federal questions raised, the bill further alleges that the penalties provided in the price ordinance are unreasonable and unauthorized; that it is impossible, for reasons stated specifically, to furnish gas of a uniform 18 candle power at the point of consumption; that the ordinance was passed without investigation as to the cost of gas, and, finally, that the rate fixed in the price ordinance is so unreasonably low that its enforcement will bring ruin and destruction to the property and business of complainant, representing an investment of $450,000; that complainant can not manufacture and deliver gas to consumers of the quality manufactured by it, or of the quality required by the ordinance, at the price fixed by the ordinance, and that such price is so unreasonably low that complainant, if compelled to comply with said ordinance, will be unable to meet its fixed charges and expenses, its property will be confiscated and it will be rendered insolvent.

The bill contains apt allegations showing that by reason of the penal provisions of the price ordinance its enforcement would result in a multiplicity of suits and

that the case presented is a proper one for equitable relief.

The bill of complaint concludes with a prayer for a preliminary injunction against the enforcement of the price ordinance, and prays that upon final hearing the said ordinance may be adjudged invalid, null and void, and that the municipality and its officers may be permanently enjoined from enforcing the same against complainant; and for general relief.

The *amendment* to the bill of complaint (Rec, 32, 33) eliminated the paragraph of said bill in which it had denied the right of the city to pass the ordinance and inserted in lieu of such paragraph an allegation that the city council had passed the said price ordinance under the authority granted to the city by the legislature contained in Clause 13, Sec. 1, Art. V, Chap. 24, of the Revised Statutes of Illinois, relating to the powers of cities and villages, being the provision of the statute under which the original franchise ordinance was granted. The amendment then alleges that the city also claims the power to pass the price ordinance under the police powers delegated to municipalities by the legislature. (Clause 66, sec. 2, Art. V., chap. 24, Revised Statutes.) The amendment then alleges that the act of the legislature under whic. the original franchise ordinance was passed and under which the price ordinance was adopted does not authorize a municipality to pass *such* an ordinance as the price ordinance in question, for the reason that said ordinance would have the effect to impair the rights of complainant under said original fran-

chise ordinance, *the same being a contract* entered into and existing under state authority. The amendment further alleges that the said price ordinance in its operation would deprive complainant of its property without due process of law, and in effect would deny to complainant the equal protection of the laws, in violation of the provisions of the Constitution of the United States.

The Answer.

The answer of the municipality (Rec., 21–29) admits the allegations of the bill with respect to the granting of the franchise ordinance, its acceptance by the complainant, the expenditure of large sums of money under the terms thereof, and "*that it substantially complied with the terms and provisions of said ordinance on its part to be kept and performed as alleged in said bill.*"

The answer then avers that prior to the time that the complainant obtained its franchise ordinance another gas company was manufacturing and selling gas to the City of Peoria and its inhabitants, which gas company, for convenience, may be designated "the old company."

The answer avers that prior to the passage of the franchise ordinance the promoters of the new company made sundry representations to the citizens of Peoria and to the members of the city council to the effect that if a franchise ordinance was granted to the complainant, it would enter into *bona fide* competition with the old company and the price of gas would be materially reduced.

The answer further avers that after the franchise or-

dinance was granted, bitter competition ensued, and at one time the price reached the low point of 30 cents per 1,000 cubic feet.

The answer then avers that shortly before the passage of the price ordinance both corporations agreed that they would no longer compete for the sale and delivery of gas, and thereupon fixed the price at $1.15 net for light and 75 cents net for fuel, and the answer charges that such agreement was "in direct *violation* of the *representations* and agreements of said Peoria Gas and Electric Company with the citizens of said City of Peoria and the common council of said city when said ordinance was obtained, and by virtue of which, said ordinance and the franchises thereunder were granted to the Peoria Gas and Electric Company, and that said Peoria Gas and Electric Company, by reason of its deceptive promises and false and fraudulent representations, was enabled to obtain the right of way and lay down its pipes in the streets," etc. (Rec., 27).

The answer avers that said price ordinance was passed in good faith by the common council under its delegated powers (Rec., 28), and in the belief that it had the power to pass ordinances for the promotion of the welfare of the inhabitants of said city, and to prevent acts of oppression, injustice and extortion from being practiced against said inhabitants.

The answer denies that the rate fixed by the price ordinance is unreasonable, and avers in effect that, even though unreasonable, complainant *is estopped* from pleading such fact.

The answer further avers that no sufficient reason exists for the interposition of a court of equity, and prays that the bill be dismissed.

Replication and Order of Reference.

A replication was duly filed to the answer and thereafter the following order was entered in said cause (Rec., 38):

> "Now come the parties, by their solicitors, and by agreement in open court it is hereby ordered that Mr. I. C. Pinckney, of the City of Peoria, in said district and division, be and he is hereby appointed a special commissioner, to take the proofs herein and report the same, with his findings and conclusions herein, with all convenient speed."

Pursuant to the order of reference, more than two thousand pages of testimony were taken in the case during a period of more than a year, and the case was argued before the special commissioner appointed by agreement of the parties.

Special Commissioner's Report.

The special commissioner filed his report, containing twenty-six findings of fact and twenty-five conclusions of law.

The findings of the special commissioner fully sustained the contentions of complainant on all points necessary to the relief sought. These findings are substantially set forth on p. 58 *et seq.*

The Action of the Court.

Notwithstanding the elaborate findings of the master and the efforts of both parties to obtain a decision on the merits, the court, of its own motion, found that the complainant had violated the anti-trust statutes of the State of Illinois and therefore declined to pass on the issues raised by the pleadings. (Rec., 139, 143.)

It is proper to here note that *the question of whether or not the complainant had violated the anti-trust laws of the State of Illinois was not raised by the pleadings in this case; that no findings of the master were predicated thereon*, and that *none of the exceptions filed* to the master's report *specifically mentioned the said anti-trust laws of the State of Illinois or requested findings relating thereto.*

The Opinion of the Court.

The opinion of the court is as follows (Rec., 139):

> "This matter comes up on exceptions to the master's report. I believe both complainant and defendant have filed exceptions to certain affirmative holdings of the master, and both parties have also filed exceptions because the master failed to hold—omittted to hold—upon certain other questions. Without undertaking to specify the facts about this long list of exceptions, this record shows that complainant's bill was filed on September 18, 1900, seeking to enjoin the enforcement of an ordinance of the City of Peoria fixing the maximum rate for gas, which ordinance had been passed on the 4th day of the same month—September, 1900.

"The bill avers that the city council had no power to pass the ordinance; that the rate as fixed by the ordinance is unreasonably low; that its enforcement would deprive the complainant of its property without due process of law, and would deny to complainant the equal protection of the laws, thus raising a federal question on the Fourteenth Amendment to the Constitution of the United States. The answer of the city avers that the complainant has entered into an illegal combination or understanding with the old gas company; second, that whether that be so or not, the complainant is estopped to deny the the validity of this ordinance or the reasonableness of this rate by certain acts of its own at the time its franchise ordinance was passed; third, that the city council had power to pass the ordinance in question; and fourth, that the rate fixed was a reasonable one. I am of the opinion that the averment of the answer which I have first mentioned has been so fully proven by this record that it must be conclusive of the case. The Illinois anti-trust law, as construed by the Supreme Court of Illinois, leaves no doubt in my mind that this record shows, on the part of this complainant, a violation of that act. The manipulation of the stock of both companies, the use of the mains of both companies, the performing by complainant's servants of the business of both companies, the simultaneous agreement of rates between the officers of both companies, and the contract in evidence between the two companies,—all lead to the inevitable conclusion that there was an understanding between complainant and the old company such as the Illinois act prohibits. A court of equity will not assist complainant to reap the fruits of such unlawful combination. The exception on the part of

the city to that part of the master's report which omits to find in accordance with this view will be sustained, and I need not enlarge upon the other numerous questions raised by this record. The bill will be dismissed at complainant's costs. Counsel for the city may prepare the order."

Decree.

Subsequently a decree was entered, finding, among other things, that "the complainant unlawfully entered into a combination agreement or understanding with the Peoria Gas Light and Coke Company * * * to regulate or fix the price at which gas should be furnished people and citizens of the defendant, the City of Peoria, by the complainant, and the said Peoria Gas Light and Coke Company, contrary to and in violation of the *statutes of the State of Illinois, approved June 11, 1891, and in force July 1, 1891*; and that the complainant is therefore, without equity and that the injunction heretofore issued in this cause should be dissolved." (Rec., 142.) (Italics not in decree.)

Thereafter, in accordance with the provisions of the decree, a bond in the sum of $150,000 was filed by the complainant and an appeal perfected to this court.

ASSIGNMENT OF ERRORS.

1. The court erred in dismissing complainant's bill of complaint as amended, in manner and form as shown by the record of said suit and proceedings.
2. The court erred in refusing to grant the complainant the relief asked and prayed for in and by said com-

plainant's bill of complaint as amended and in not entering a decree in favor of complainant in accordance with the prayer therein.

3. The court erred in rendering its opinion and in finding therein that complainant was not entitled to equitable relief. (Opinion rendered February 8, 1904, and filed March 24, 1904.)

4. The court erred in holding in his said opinion as follows:

> "The Illinois anti-trust law, as construed by the Supreme Court of Illinois, leaves no doubt in my mind that this record shows on the part of this complainant a violation of that act in the manipulation of the stock of both companies, the use of the mains of both companies, the performing by complainant's servants of the business of both companies, the simultaneous agreement of rates between the officers of both companies, and the contract in evidence between the two companies, all lead to the inevitable conclusion that there was an understanding between complainant and the old company, such as the Illinois act prohibits. A court of equity will not assist complainant to reap the fruits of such unlawful combination. The exception on the part of the city to that part of the master's report which omits to find in accordance with these views will be sustained."

The court erred because—

a. Said anti-trust act of the State of Illinois was not applicable to the case under the pleadings, nor raised thereby.

b. If so applicable said anti-trust act is in conflict with and in violation of the provisions of the Constitution of the United States and the amendments thereto.

c. Complainant was not attempting "to reap the fruits of such unlawful combination," or seeking to have any rights enforced which arose out of the same.

d. No exception was filed by defendant raising this question.

e. Such conclusion is not warranted by the evidence.

5. The court erred in making the order of February 9, 1904, in which he ordered, adjudged and decreed

> "That the exceptions made and filed herein on behalf of the defendant City of Peoria against the failure of the special master, I. C. Pinckney, to find in his report on file herein, that the complainant prior to the commencement of this suit had formed entered into and become a party to an illegal and unlawful combination, pool, trust, combination or agreement with the Peoria Gas Light and Coke Company (the old gas company), should be and the same is hereby sustained."

6. The court erred in holding in final decree

> "That the complainant unlawfully entered into a combination, agreement or understanding with the Peoria Gas Light and Coke Company * * * to regulate or fix the price at which gas should be furnished the people and citizens of the defendant, the City of Peoria, by the complainant, and said the Peoria Gas Light and Coke Company, contrary to and in violation of the statute of the State of Illi-

nois, approved June 11, 1891, and in force July 1, 1891."

for the following reasons:

a. Such statu was not pleaded in defendant's answer.

b. No evidence had been introduced or offered under the same.

c. It had not been made the basis of any of defendant's exceptions to the report of the special master.

d. It had not been considered by the court in rendering its opinion of February 8th, or in the order of the court following such opinion on February 9, 1904.

e. Such finding in the decree as was not warranted by the evidence.

f. The said alleged illegal agreement or combination was not properly a defense to complainant's bill as amended, wherein it sought to enjoin the defendant City of Peoria from enforcing an ordinance which would deprive complainant of its property and rights contrary to the provisions of the Federal Constitution.

7. The court erred in sustaining defendant's exceptions, or any of them, to the facts found by the special master (said master having been appointed by agreement of the parties), and in neglecting and refusing to confirm the said report except as to the 5th exception taken by complainant thereto, and in thereby denying to complainant the protection afforded it by the Constitution of the United States and the amendments thereto.

8. The court erred in not holding that the ordinance of the City of Peoria in controversy in this case is in conflict with and violation of the provisions of Section 10 of Article I of the Constitution of the United States, and of the Fourteenth Amendment thereto, in that by the said ordinance, as appears from the evidence and from the report and findings of the special master, the complainant is—*first*, deprived of property without due process of law; *second*, deprived of and denied the equal protection of the law; *third*, that its private property is taken thereby for public use without just compensation; and *fourth*, that said ordinance impaired the obligation of a prior contract between said company and the city.

9. And the court further erred in refusing and neglecting as a court of equity to take cognizance of the case as disclosed by complainant's bill of complaint as amended, the evidence in support thereof, and the report of the special master, and instead of so doing dismissing the complainant's bill.

10. The court erred in admitting any evidence (complainant having specifically objected thereto) touching the question of an alleged illegal combination or understanding between complainant and the Peoria Gas Light and Coke Company, as such controversy was and is wholly collateral to and in no manner connected with the case made and the relief sought by complainant's bill, or raised by the answer.

11. The court erred in refusing to grant the relief

prayed for in the complainant's bill of complaint as amended and ordering a dismissal of the same at the cost of complainant.

BRIEF.

The questions for discussion in this court naturally present themselves in the following order:

I. Jurisdiction of the Federal Court.

II. The Jurisdiction of the Supreme Court on Appeal.

III. Consideration of the Decision of the Court Below.

IV. Consideration of the Merits of the Case.

I.

THE JURISDICTION OF THE FEDERAL COURT.

The jurisdiction of the Circuit Court was based solely upon the ground that the suit was one arising under the Constitution of the United States.

The bill alleged that the maximum price ordinance passed by the City of Peoria under delegated powers was such that it *impaired the obligation of the franchise contract* theretofore entered into between the complainant and the City of Peoria; and the bill further alleged that the enforcement of the maximum price ordinance would result in the *taking of complainant's property without just compensation and would deprive complainant of its property without due process of law.*

WHERE THE BILL OF COMPLAINT SETS UP BY APT AVERMENT THAT A MUNICIPAL ORDINANCE (PASSED UNDER STATE AUTHORITY) IMPAIRS THE OBLIGATION OF A CONTRACT OR DEPRIVES COMPLAINANT OF HIS PROPERTY WITHOUT DUE PROCESS OF LAW, OR WITHOUT JUST COMPENSATION, OR DENIES TO COMPLAINANT THE EQUAL PROTECTION OF THE LAW, THERE IS PRESENTED A FEDERAL QUESTION OF WHICH THE FEDERAL COURT HAS JURISDICTION REGARDLESS OF CITIZENSHIP.

Joplin v. *Light Co.*, 191 U. S., 150.

City Ry. Co. v. *Citizens' Street Ry. Co.*, 166 U. S. 567.

Walla Walla v. *Walla Walla Water Co.*, 172 U. S., 1.

St. Paul Gas Light Co. v. *St. Paul*, 181 U. S., 142.

Vicksburg Water Works Co. v. *City of Vicksburg*, 185, U. S., 65.

City of Cleveland v. *Cleveland City Railway Company*, 194 U. S., 516.

Pacific Electric Co. v. *City of Los Angeles*, 194 U. S., 112.

This rule has been followed in numerous cases in the Circuit Courts and Circuit Courts of Appeals, some of which follow:

Los Angeles City Water Co. v. *City of Los Angeles*, 103 Fed., 711.

Haverhill Gas Light Co. v. *Barker*, 109 Fed., 094.

Cleveland Gas Light & Coke Co. v. *City of Cleveland*, 71 Fed., 610.

Indianapolis Gas Co. v. *City of Indianapolis*, 82 Fed., 245.

Mercantile Trust & Deposit Co. v. *Collins Park & Belt Ry. Co.*, 99 Fed., 812.

American Water Works & Guaranty Co. v. *Home Water Co.*, 115 Fed., 171.

Consolidated Water Co. v. *City of San Diego*, 93 Fed., 849.

Southwestern Missouri Light Co. v. *Joplin*, 101 Fed., 23.

Pacific Electric Co. v. *City of Los Angeles*, 118 Fed., 746.

1. THE FRANCHISE CONTRACT RELIED UPON BY COMPLAINANT.

In 1899 the City Council of the City of Peoria granted to complainant a franchise ordinance permitting it to construct and operate gas works within the City of Peoria, which said franchise ordinance is set forth in full in the bill of complaint. (Rec., 5–12.)

The franchise ordinance was passed under the powers delegated to municipalities by the Legislature of the State of Illinois, and contained in Clause 13, Section 1, Article V, chapter 24, of the Revised Statutes of Illinois, which reads as follows:

> "§ 1. The city council in cities, and the president and the board of trustees in villages, shall have the following powers: * * *
>
> "*Thirteenth*—To regulate the opening therein [in streets] for the laying of gas or water mains and pipes, and the building and repairing of sewers, tun-

nels and drains, and erecting gas lights, *Provided, however,* that any company heretofore organized under the general laws of this state or any association of persons organized, or which may be hereafter organized, for the purpose of manufacturing illuminating gas to supply cities or villages, or the inhabitants thereof, with the same, shall have the right, by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."

The ordinance franchise of 1899 not only granted to complainant the right to construct and operate gas works, but contained other provisions, which made it clearly a contract between the city and the company. It provided, among other things, that the complainant should file a bond in the sum of $1,000 as indemnity against negligence during construction; that the work under the ordinance should begin within six months and be completed within eighteen months from the date of the acceptance of the ordinance; that $5,000 in cash should be deposited with the treasurer of the city to insure prompt work under the ordinance; that the company should *from time to time extend its mains upon request of the city*; and that the ordinance should take effect from and after its passage and acceptance thereof by the company and the filing and approval of the bond therein required. A formal agreement of acceptance was duly executed by the company and filed with the city. The bond and indemnity required by the ordinance were filed and ap-

proved by the city, and the ordinance became a binding contract between the city and the company; on the faith of which the company expended $450,000.

The franchise ordinance in question contained no provision as to the price to be charged by the company for gas. In the absence of specific provision in that regard the law is that the company is presumed to have the power to fix a reasonable price for its product.

When a corporation is chartered under the general incorporation law with the right to manufacture and sell gas, the right to charge a reasonable price is a right implied, and one that forms part of the charter contract with the state, which can not be impaired by legislation.

New Memphis Gas Light Company v. *City of Memphis*, 72 Fed. Rep. 952.

Cleveland Gas Light & Coke Company v. *City of Cleveland*, 71 Fed. Rep., 610.

Capital City Gas & Light Co. v. *Des Moines*, 72 Fed. Rep., 818. 829

People ex rel. St. Louis v. *Laclede Gas Company*, 102 Mo., 479.

The company contends that by implication of law its franchise contract gave to it the power to fix a reasonable price for its product.

THE IMPAIRMENT OF THE CONTRACT.

In the year 1900 the City of Peoria passed the maximum rate ordinance, the enforcement of which this suit seeks to enjoin.

This maximum rate ordinance is as follows (Rec. p. 17):

"AN ORDINANCE REGULATING AND FIXING THE MAXIMUM PRICE OF GAS IN THE CITY OF PEORIA.

Be it Ordained by the City Council of the City of Peoria:

SECTION 1. That the maximum price of gas furnished the City of Peoria, and the citizens thereof, and all consumers of gas therein, shall not exceed the sum of seventy-five (75 cts.) cents per thousand cubic feet; such gas so furnished to afford a light of not less than eighteen (18) candle power, to be measured and ascertained at the place of consumption in said city, by the most modern appliances known to science, for measuring the candle power of illuminating gas; and the Peoria Gas Light and Coke Company, and the Peoria Gas and Electric Company, and any other company, corporation, person or persons who are now, may hereafter furnish gas to consumers in the City of Peoria, are hereby authorized and empowered to charge all consumers of gas in said city a sum not in excess of seventy-five (75 cts.) cents per thousand cubic feet.

SEC. 2. That any company, corporation, person or persons who shall, in violation of the provisions of the preceding section, charge or require the City of Peoria, or any citizen thereof, or any consumer of gas therein, to pay for gas furnished it or them, or either of them, a sum in excess of seventy-five cents (75 cts.) per thousand cubic feet, or who shall furnish to said City of Peoria, or any citizen thereof, gas less than eighteen (18) candle power, shall be subject to a penalty of not less than twenty-five ($25.00) dollars, nor more than two hundred ($200.00) dollars for each and every offense.

SEC. 3. That any company, corporation, person or persons who shall remove any meter or meters

from the house, store, factory or premises of any consumer of gas in the City of Peoria, against the will and consent of such consumer of gas who is willing to pay for gas furnished him, it or them by any company, corporation, person or persons, the price established and fixed in Section One (1) of this ordinance, shall be subject to a penalty of not less than twenty-five dollars, nor more than two hundred ($200.00) dollars for each and every offense; *Provided, however*, that any company, corporation, person or persons furnishing gas to consumers in the City of Peoria, shall have the right to remove any meter or meters for the purpose of repairing the same, on condition that such meter or meters so removed shall be replaced or a new one substituted in its place within twenty-four (24) hours of the time of removal of any such meter or meters.

SEC. 4. This ordinance shall be in force and effect from and after its passage and due publication, as provided by law: *Provided*, that nothing herein contained shall impair the obligation of any contract in existence between the City of Peoria and either of said gas companies above mentioned.

SEC. 5. All ordinances or parts of ordinances in conflict with this ordinance are hereby repealed, subject to the proviso contained in Section Four (4) of this ordinance.

Passed in council this fourth (4) day of September, A. D. 1900.

HENRY W. LYNCH, *Mayor.*

ATTEST:

ROBT. M. ORR, *City Clerk.*"

The Common Council of the City of Peoria in passing the maximum rate ordinance relied upon the powers dele-

gated to it by the State of Illinois under Clause 13, Section 1, Article V, Chapter 24, of the Revised Statutes of Illinois, already quoted, and also under the police powers delegated to municipalities by the Illinois Legislature. Subdivision 66 of Section 1, Article V, Chapter 24, which reads as follows:

> "To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

So far as the power to pass said maximum price ordinance is predicated upon Clause 13, Section 1, Article V, the city must rely upon the *same delegation of power under which it passed the original franchise ordinance*, and in this view the validity of the maximum price ordinance requires—

(1) That the power to fix rates is a continuing power, irrespective of the price which may be fixed in the original franchise ordinance when granted; or

(2) That where the franchise ordinance fails specifically to fix the rate, the city retains the power to legislate in that regard, with the right to exercise such power at any time in the future; or

(3) That said Clause 13 of Section 1 of the Cities and Villages Act delegates to cities independent authority to reduce rates at the pleasure of the common council.

The complainant contends that the franchise ordinance of 1899 constituted a contract, and that after the acceptance of such franchise ordinance any attempt of the city

to fix the price at which the company's product should be sold impaired the obligation of the contract so existing between the city and the company.

City of Cleveland v. *Cleveland City Ry. Co.*, 194 U. S., 517.

The city undoubtedly had the right under the statute to place a price in the franchise ordinance when granted, and the company could then have elected whether to enter into the contract tendered at the rate named therein.

But the city named no rate in the contract ordinance, and the company thereupon entered into the contract, thereby covenanting to furnish gas at the rate implied by law, to wit, a reasonable one.

It is respectfully insisted that the city, by failing to name a price in the franchise ordinance, did in fact write into said ordinance "a reasonable price" as effectually as though the rate was specifically fixed, and that thereby *it exhausted its power to legislate further with respect to the contract in question, especially as the theory of a "continuing power would result in violation of contract rights."*

If the power of the common council to pass the maximum rate ordinance be predicated upon the Police Power delegated to municipalities by the Cities and Villages Act, the ordinance none the less impairs the obligation of the franchise contract.

An ordinance, when accepted and acted upon, becomes

a contract and can not be annulled or amended without the consent of both parties.

City Ry. Co. v. *Citizens' St. Ry. Co.*, 166 U. S. 557.

People ex rel. City of Pontiac v. *Central Union Telephone Co.*, 192 Ill., 307.

Chicago Municipal Gas Light Co. v. *Town of Lake*, 130 Ill., 42.

City of Belleville v. *Citizens' Horse Ry. Co.*, 152 Ill., 171.

2. The Taking of Complainant's Property for Public Use Without Just Compensation, and Without Due Process of Law.

If, in the judgment of the Court, the action of the common council in passing the maximum rate ordinance did not impair the contract rights of complainant, an examination of the record conclusively shows that the *enforcement* of the maximum rate ordinance would result in the taking of complainant's property for public use without just compensation, and in denying to complainant the equal protection of the law, contrary to the provisions of the Fourteenth Amendment to the Constitution of the United States.

The bill of complaint alleges, and the master found, that the cost to complainant of manufacturing and distributing gas in the Peoria territory (exclusive of interest on moneys actually invested) is in excess of the sum of 75 cents per thousand cubic feet, the maximum rate fixed by the ordinance, and that the City of Peoria, in passing such ordinance, exercised its delegated power

unreasonably, imposing such regulation upon complainant as to compel it either to abandon its business of manufacturing and distributing gas in the City of Peoria (a course prohibited by the price ordinance) or to suffer financial loss and injury in continuing it. The bill alleges, and the master found, that in other respects the ordinance in question is unreasonable, and that complainant will be unable to comply therewith. (Rec., 57, finding 14; Rec., 51, finding 12; Rec., 61, finding 25.)

It follows, therefore, that, whether the action of the City of Peoria be challenged because the city sought unlawfully to impair the obligation of the contract, or whether it be challenged because the city sought under delegated authority to modify a contract, but passed an unreasonable ordinance with respect thereto, the Federal Court would in either event take jurisdiction.

> *Walla Walla* v. *Walla Walla Water Co.*, 172 U. S., 1. and cases cited in this brief, pp. 19, 20, 29.

3. The Right to Equitable Relief.

Upon well-settled principles of equity jurisdiction and the repeated utterances of this court, the bill upon its face is clearly cognizable in equity.

The penal provisions of the ordinance, coupled with the averment that more than 2,000 consumers are served (Rec., 16), fully support the allegations of the bi llin regard to "innumerable suits and a multiplicity of actions."

That a court of equity has jurisdiction to restrain the enforcement of a void ordinance where such relief will

prevent a multiplicity of suits and where there is no sufficient or adequate remedy at law for the protection of property, is established by abundant authority.

If an ordinance is invalid, as in contravention of complainant's constitutional rights, a federal court of equity alone can declare it void and afford to complainant the complete relief to which it is entitled.

Where a municipality threatens to, and, unless restrained by law, will enforce the penal provisions of such an ordinance, a court of equity has power to restrain it.

The avoidance of a multiplicity of suits to defend against penal actions likely to be brought by thousands of consumers is alone sufficient ground for equitable interference.

Anticipation of such illegal action by the city or its citizens is of itself sufficient.

II.

THE JURISDICTION OF THE SUPREME COURT ON APPEAL.

The bill of complaint, as amended, contained the proper allegations in legal and logical form and presented a controversy arising under the Constitution of the United States.

While the opinion of the court below did not pass upon the merits of the case, and the decree dismissed complainant's bill upon a point wholly collateral to the issues, such dismissal nevertheless operated to deny to complainant the constitutional rights invoked by the bill of complaint, and an appeal, therefore, was taken to this court under Section 5 of the Judiciary Act of 1891 (26 Stat., 826, 827), on the ground that the case was one in which a law of a state (*i. e.*, a municipal ordinance) was claimed to be in contravention of the Constitution of the United States, and that such ordinance impaired the obligation of the contract contained in complainant's franchise ordinance, and also resulted in the taking of complainant's property without just compensation and without due process of law.

The courts have repeatedly decided that, where the bill shows a suit which does really and substantially involve a right which depends upon the construction or application of the Federal Constitution, then, even though the decision of the case in the court below turned upon some other point, and that court did not decide the federal question involved, *such question, nevertheless, remains*

in the case, and an appeal therefrom goes properly to the Supreme Court, and not to the Circuit Court of Appeals. The case is, therefore, properly in this court on appeal, although the Circuit Court did not decide the federal question involved.

III.
CONSIDERATION OF THE DECISION OF THE COURT.

THE COURT BELOW ERRED IN HIS FINDINGS OF FACT.

While the court below held as a matter of law that the complainant had no standing in a court of equity, this conclusion could only have been reached by reason of an erroneous interpretation of the evidence, and it is, therefore, desirable to examine the findings of fact in the Court's opinion before addressing ourselves to the law.

It is proper for this court on appeal to look to the opinion of the lower court when the same is made a part of the record to ascertain the grounds of the decision,

Loeb v. *Columbia Township*, 179 U. S., 472.

That portion of the opinion of the court covering his findings of fact is as follows (Rec., 139):

> "*The Illinois anti-trust law* as construed by the Supreme Court of Illinois, leaves no doubt in my mind that this record shows on the part of this complainant a violation of that act in the *manipulation of the stock of both companies, the use of the mains of both companies, the performance by complainant's servants of the business of both companies, the simultaneous agreement of rates between the officers of both companies, and the contract in evidence between the two companies*, all lead to the inevitable conclusion that there was an understanding between complainant and the old company such as the Illinois act prohibits. A court of equity will not assist complainant to reap the fruits of such unlawful combination." (Italics not in opinion.)

Let us consider the Court's findings of fact *seriatim*:—

a. As to "*the manipulation of the stock of both companies.*"

There is absolutely nothing whatsoever in the record pertaining to the capital stock of The Peoria Gas Light and Coke Company (the old company). It does not appear that the complainant owns a single share of stock of the old company. It does not appear that any stockholder of the complainant owns a single share of stock of the old company.

The court apparently based its findings upon the *supposed* contents of the voting-trust agreement entered into by stockholders of complainant only, but which defendant and the court evidently imagined was also participated in by stockholders of the old company. (Defendant's exceptions, 45–49; Rec., 92.)

It is pertinent to observe that the so-called voting-trust agreement was not in evidence, although it appears from the record that the agreement was produced in court; was examined by the special master, and was ruled out by the special master as irrelevant and immaterial. (Rec., 1563.) It was clearly within the province of the defendant to have secured an order from the court directing the admission of the voting-trust agreement as evidence, if the defendant believed it to be competent, material or relevant. Upon the argument before the court the pool agreement was again discussed, and it was the duty of the court to place the instrument in evidence if it proposed to pass upon its contents. And again the court did not see fit to make a part of the

record an instrument which the court *failed to examine, but upon the supposed contents of which the court based its opinion.*

Moreover, the record does disclose that *the complainant was not a party, either directly or indirectly,* to the so-called voting-trust agreement. (Rec., 1563.)

b. As to "*the use of the mains of both companies.*"

It appears from the evidence that one of the old company's mains, which supplied the service pipes of about a half dozen customers, had become unfit for use; that the patronage of the half dozen customers did not then warrant the relaying of the main; that the old company made an arrangement with the complainant by which, instead of laying a new pipe at that time, the service pipes of the half dozen customers were attached to the mains of the complainant; that the old company collected from its half dozen customers the same as before and paid the amount of those bills to the new company—not turning over even this half dozen customers to the new company. (Rec., 696, 697.)

It appears from the record that the new company has upwards of 26 miles of mains; that the old company has upwards of 59 miles of mains. It appears that the customers of the new company number nearly 2,500, and that the customers of the old company number about 4,500. And yet, despite the magnitude of the operations and the properties of both companies, they are, by the opinion of the court, found guilty of conspiracy because the complainant accorded to the old company a courtesy which affected 6 gas consumers out of a total of 7,000

and 1 block of main out of a total of 85 miles. If the doctrine of *de minimis non curat lex* has no application here, we submit that the general equitable doctrine of *fairness* should relieve the complainant from censure.

c. As to "*the performing by complainant's servants of the business of both companies.*"

This statement in the opinion will be considered under paragraph "**e**" below, as the only services performed by complainant's employes for the old company were those under the contract therein considered.

d. As to "*the simultaneous agreement of rates between the officers of both companies.*"

It appears from the evidence that after a period of ruinous competition, during which gas was sold by both companies at a price greatly below the cost of production, some of the officers of the companies met in Chicago and it was suggested that both companies had been losing money long enough and that such prices ought to be made as would at least cause such loss to cease. Parties present upon the occasion in question testified positively that the only representative of the old company present was Mr. McKinley, and that he left the conference before any agreement was reached; that thereafter the new company determined upon a proper price to be charged and the old company followed suit. The evidence demonstrates that the rate so made was entirely reasonable and proper, and there is nothing in the record which shows that there was any *agreement* whatsoever between the companies to charge the same price or to

maintain the price so made. *Moreover, as a matter of fact, the rates of the two companies did not remain the same except for a period of about 90 days.* (Rec., 1353.)

Apart from statutory prohibition, there is no law to forbid corporations, even those enjoying public service franchises, from conferring in regard to charges and fixing upon the same rates, provided the rates so fixed and established are in themselves reasonable to the public.

U. S. v. *Trans-Missouri Freight Association*, Circuit Court of Appeals, 8th Dist., 58 Fed. Rep., p. 58.

Manchester & Lawrence R. R. Co. v. *Concord R. R. Co.*, 66 N. H., 100; 20 At., 383.

e. As to "*the contract in evidence between the two companies.*"

It appears that upon October 24, 1901, the old gas company entered into a contract with complainant whereby complainant agreed to manufacture gas and deliver the same into the holder of the old company for a limited period of time, while the old company was completing repairs to its plant. It further appears that the plants of the two companies were adjoining and that gas was delivered by the new company into the holder of the old company without the exercise of any public franchise or the use of any public property.

Had it not been for the fact that there was a competing company, with a finely equipped plant, contiguous to the plant of the old company, the latter company

would undoubtedly have completed its repairs, at some inconvenience to itself, without shutting down its plant. It deemed it the better business policy to effect the arrangement stated and to rebuild and renovate its plant under this arrangement, with the maximum of economy.

It is noteworthy that the contract in question was entered into more than a year subsequent to the filing of the bill of complaint in this cause; that it existed for a period of but ten months and was terminated more than a year before the court heard the arguments in this cause.

The facts as above stated are found to be true by the report filed herein by the special master (appointed by agreement of the parties), who took the evidence and saw and heard the witnesses. (Rec., p. 53.)

During this ten months' contract between the two companies all of the gas manufactured by the complainant for the old company was delivered into the holder of the old company and was by the old company sent through the mains of the old company to its consumers. The new company manufactured the gas required for its own consumers, placed the same in its own holders and distributed the same to its consumers. It was stipulated in this ten months' contract that the complainant's servants should perform certain duties for the old company at the expense of the old company. The contract provided for a certain price for the gas so manufactured and delivered to the old company, with a deduction for leakage, and the contract shows upon its face that the stipulations as to duties to be performed by complainants' servants

were inserted for the protection of the complainant in order that it might determine the amount of gas lost through leakage or otherwise and might place a check upon such waste by having charge of the reading of meters and the repairing of breaks in the mains of the old company.

It is an astounding doctrine, if such be the law, that a complainant, who comes into court with clean hands, can by a temporary act of business accommodation (*performed more than a year after the pleadings have been settled—and fully completed and abandoned more than a year before the hearing of the cause*) be denied rights guaranteed to it by the Constitution of the United States and which have heretofore been accorded even to the vilest criminal at the bar.

If the contract in question were vicious and pertinent to the issues in the case, the doctrine of *locus poenitentiae* would apply. As a benign contract and wholly collateral to the issues, it can not properly be made an excuse for denying to complainant its constitutional rights.

THE COURT BELOW ERRED IN APPLYING THE LAW TO THE FACTS SO ERRONEOUSLY FOUND BY HIM.

Whether or not there be any basis in the record for the statements in the Court's opinion, even a casual examination of the record will disclose that the Court's findings are neither pertinent nor proper under the pleadings in this case.

It is a fundamental rule of law that the illegality of corporate acts can not be raised collaterally, especially when the action is not one to enforce the illegal agreement, and no rights are predicated upon it.

Rector v. *Hartford Deposit Co.*, 190 Ill., 387–388.

New Memphis Gas Light Co. v. *City of Memphis*, 72 Fed. Rep., 952.

Lafayette Bridge Co. v. *City of Streator*, 105 Fed. Rep., 729.

L. S. & M. S. Ry. Co. v. *Smith*, 173 U. S., 698.

Gilbert for use v. *American Surety Co.* (*C. C. A.*, 7th Circuit), 121 Fed., 494.

Connolly v. *Union Sewer Pipe Co.*, 184 U. S., 450; 46 L. Ed., 679.

Macginnis v. *B. & M. Con. Co.* (Mont.), 75 Pac. 89.

Kinner v. *L. S. & M. S. Ry. Co.*, 69 Ohio St., 376.

Planters Bank v. *Union Bank*, 16 Wall., 483; 21 L. Ed., 473.

Strait v. *Nat. Harrow Co.* (C. C.), 51 Fed., 819.

Dennehy v. *McNulta*, 30 C. C. A., 422; 86 Fed., 825.

The Charles E. Wiswall Co. v. *Scott*, (C. C. A., 2nd Circuit), 86 Fed., 671.

National Folding Box and Paper Co. v. *Robertson*, (C. C.), 99 Fed. 985.

Harrison v. *Glucose Sugar Refining Co.*, 53 C. C. A., 484; 116 Fed., 304.

A fortiori, a collateral attack will not be permitted even under a special statute, if the statute is not pleaded or its

inhibition challenged by the issues in the case, especially where the remedy given by the statute is cumulative and differs from or is in addition to that given by the common law. Moreover, such defense must be set up by plea and not by answer.

Chicago & Alton Ry. Co. v. *Dillon*, 123 Ill., 570.

Haskins v. *Alcott*, 13 Ohio State, 210.

Denton v. *Moore's Administrator*, 2 Tenn., 168.

Neagle v. *Kelley*, 146 Ill., 465.

Chambers v. *Chambers*, 4 Gill. & Johnson's Rep. (Md.), 438.

New Jersey Patent Tunning Co. v. *Turner*, 14 N. J. Eq., 329.

Curtis v. *Mastin*, 11 Paige's Chancery Rep. 15.

Dyer v. *Lincoln*, 11 Vt., 301.

1 Daniel's Chancery Pleading and Practice, 5th Ed., 630.

Farley v. *Kittson*, 120 U. S., 303, and cases cited.

Sullivan v. *Portland, etc., R. R.*, 94 U. S., 806.

Dey v. *Dunham*, 2 Johnson Ch. (N. Y.), 182.

Crutcher v. *Trabue*, 5 Dana (Ky.), 82.

Hudson v. *Hudson's Admr.*, 6 Munford (Va.), 352.

Prince v. *Heylin*, 1 Atkins, 494.

The principle above contended for, except so far as the foregoing cases relate to formality in pleadings, has been upheld in numerous cases in which foreign corporations seeking to recover or protect their property have been met by the defense that they had violated or failed to

comply with the provisions of some local statute in compliance with which only would they have the right to do business in such State.

Smith v. *Little*, 67 Ind., 549.
St. L. etc. R. R. Co. v. *Fire Association of Philadelphia*, 60 Ark., 325.
Schlitz Brewery Co. v. *Ester*, 86 Hun (N. Y.), 22.
Delaware, etc., Telegraph & Telephone Co. v. *Pesauken Twp.*, 116 Fed., 910.

Such collateral attack is expressly forbidden in the Federal Courts since their jurisdiction is not conferred, and it can not be withdrawn or limited, by the legislation of the States.

Blodgett v. *Lanyon Zinc Co.*, 120 Fed., 893.

In this connection it is pertinent to observe that the record may be searched in vain to find a single specific reference to the Illinois Anti-Trust Statute of 1891, either in the pleadings, the evidence, the Master's report or the exceptions thereto.

It is also well established by the authorities that a defense must either be technically pleaded or the facts constituting such defense must be properly alleged and relied upon on the hearing of the cause in support of such defense.

Eyre v. *Potter*, 15 How. (U. S.), 42.
French v. *Shoemaker*, 14 Wall. (U. S.), 314.
Babbitt v. *Dotten*, 14 Fed., 19.
Spies v. *Chicago, etc., R. R. Co.*, 40 Fed., 34.
Britton v. *Brewster*, 2 Fed., 160.
Affirmed in 4 Fed., 808.
Price v. *Berrington*, 15 Jurist, 999.
7 Eng. L. & Eq., 254.

Wilde v. Gibson, 1 H. L. Cases, 605.
Ferraby v. *Hobson*, 2 Phillips, 255.

Harrison v. *Guest*, 8 H. L. Cases, 481.
Hickson v. *Lombard*, 1 H. L. Cases, 324.
Tillinghast v. *Champlin*, 4 R. I., 173.
Fisher v. *Boody*, 1 Curtis (U. S.), 206.
Dashiell v. *Grosvenor*, 66 Fed., 334, affirmed in 162 U. S., 425, but not deciding this point.
Leighton v. *Grant*, 20 Minn., 345.

The Court should also note that the only evidence in the record upon which the Court might hang its finding of a violation of the anti-trust act was introduced in support of a distinct issue, which issue did not involve the Illinois anti-trust statue of 1891, but was the issue of estoppel. Moreover, the Court in its opinion specifically declined to consider the defense of estoppel.

In defendant's answer (Rec., 21) it is alleged that the complainant in obtaining its franchise ordinance had represented that it would compete with the old gas company in Peoria. The answer charges that these representations were violated, and avers (Rec., 26) "upon information and belief that *an agreement and understanding* now exists between said corporations that they will not compete for the sale of gas and that the price therefor shall be determined only upon mutual agreement. * * * Respondent charges that said agreement and combination was and is in direct violation of the representations and

agreements of said Peoria Gas and Electric Company with the citizens of said City of Peoria and the common council of said city when said ordinance was obtained."

It will be observed that the answer does not even charge complainant with any "*unlawful*" agreement or understanding, but merely makes the averment (upon which the court predicated his anti-trust decision) in support of the defendant's plea of estoppel—which plea of estoppel was fully considered by the master and disposed of in his report adversely to defendant. (Rec., pp. 50, 61.)

Even were it permissible to set up the Illinois Anti-Trust Statute of 1891 *collaterally, and even though such act had been specifically set forth in the answer, it would not have been a proper defense in this case.*

The only possible purpose for which a violation of the Illinois Anti-Trust Statute of 1891 might be urged would be:

(1) For the purpose of inflicting upon complainant the criminal penalties of the act.

(2) To show that complainant was a criminal under, the act.

The criminal penalties of the act could not be inflicted in this proceeding, and, though inflicted, would not constitute a defense in the case.

The Illinois Anti-Trust Act of 1891 (Starr & Curtis, Vol. 1, 2d edition, p. 1252) is as follows:

"An act to provide for the punishment of persons, copartnerships or corporations forming pools, trusts and combines, and mode of procedure and rules of evi-

dence in such cases. (Approved June 11th, 1891. In force July 1st, 1891. L. 1891, p. 206.)

"Pools, trusts and combines described. Sec. 1.

"*Be it enacted by the people of the State of Illinois, represented in the General Assembly.* If any corporation organized under the laws of this or any other State or country, for transacting or conducting any kind of business in this State, or any partnership or individual or other association of persons whosoever, shall create, enter into, become a member of or a party to any pool, trust, agreement, combination, confederation or understanding with any other corporation, partnership, individual or any other person, or association of persons, to regulate or fix the price of any article of merchandise or commodity, or shall enter into, become a member of or party to any pool, agreement, contract, combination or confederation to fix or limit the amount or quantity of any article, commodity or merchandise to be manufactured, mined, produced or sold in this State, such corporation, partnership or individual or other association of persons shall be deemed and adjudged guilty of a conspiracy to defraud, and be subject to indictment and punishment as provided in this Act.

"2. Organization or combination and issue of trust certificates prohibited. Art. 2. It shall not be lawful for any corporation to issue or to own trust certificates, or for any corporation, agent, officer or employees, or the directors or stockholders of any corporation to enter into any combination, contract or agreement with any person or persons, corporation or corporations, or with any stockholder or director thereof, the purpose and effect of which combination, contract or agreement shall be to place the management or control of such combination or combinations, or the manufactured product thereof, in

the hands of any trustee or trustees, with the intent to limit or fix the price or lessen the production and sale of any article of commerce, use or consumption, or to prevent, restrict or diminish the manufacture or output of any such article.

"3. Violations of act—penalty. Art. 3. If a corporation or a company, firm or association shall be found guilty of a violation of this act it shall be punished by a fine in any sum not less than five hundred dollars ($500) nor more than two thousand dollars ($2,000) for the first offense, and for the second offense not less than two thousand dollars ($2,000) nor more than five thousand dollars (5,000), and for the third offense not less than five thousand dollars ($5,000) nor more than ten thousand dollars ($10,000), and for every subsequent offense and conviction thereof shall be liable to a fine of fifteen thousand dollars ($15,000); provided, that in all cases under this act either party shall have the right of trial by jury.

"4. Officer, agent or receiver of corporation, individual, etc., violating act. Art. 4. Any president, manager, director or other officer or agent or receiver of any corporation, company, firm or association, or any member of any company, firm or association, or any individual found guilty of a violation of the first section of this act may be punished by a fine of not less than two hundred dollars ($200), nor to exceed one thousand dollars ($1,000), or be punished by confinement in the county jail not to exceed one year, or both, in the discretion of the court before which such conviction may be had.

"5. Contracts, etc., violative of act, void. Art. 5. Any contract or agreement in violation of any provision of the preceding sections of this act shall be absolutely void.

"6. Purchasers of product or manufacture violating

act discharged from payment. Art. 6. Any purchaser of any article or commodity from any individual, company or corporation transacting business contrary to any provision of the preceding sections of this act shall not be liable for the price or payment of such article or commodity, and may plead this act as a defense to any suit for such price or payment.

"7. Fines—recovery. Art. 7. The fines hereinbefore provided for may be recovered in an action of debt in the name of the people of the State of Illinois. If, upon the trial of any cause instituted under this act to recover the penalties as provided for in Section 3, the jury shall find for the people, and that the defendant has been before convicted of a violation of the provision of this act, they shall return such finding with their verdict, stating the number of times they find defendant so convicted, and shall assess and return with their verdict the amount of the fine to be imposed upon the defendant in accordance with said section 3; provided, that in all cases under the provisions of this act, a preponderance of evidence in favor of the people shall be sufficient to authorize a verdict and judgment for the people."

It is apparent on the face of the act that its penal provisions are enforceable only by the State through its judicial department.

The defenses sanctioned by the act are especially enumerated, and do not include the idea of relief in an action such as the one at bar.

An examination of the bill of complaint discloses that complainant does not seek relief under any contract prohibited by the Illinois anti-trust act; that is to say, the complainant does not attempt to enforce any rights predicated upon the alleged combination.

Moreover, section 6 of the act, if violated by complainant, would be available for defense only in case of a consumer of gas being sued by complainant for the price thereof; and, even in such a case, the consumer could not fix the price he would pay. It would be the contract price or nothing.

If complainant had violated the Illinois Anti-Trust Law of 1891, or any other criminal statute, such fact would not bar the rights of complainant in this suit.

The contrary has long since been set at rest by decisions in this very circuit.

Gilbert v. *American Surety Co.*, 121 Fed., 494.

Star Brewery Co. v. *United Breweries Co.*, 121 Fed., 713.

Connolly v. *Union Sewer Pipe Co.*, 184 U. S., 540,

and by the following cases:

Armstrong v. *American Exch. Bank*, 133 U. S., 433.

Planters' Bank v. *Union Bank*, 16 Wall., 483.

Armstrong v. *Toler*, 11 Wheat. (U. S.), 258.

Brooks v. *Martin*, 2 Wall. (U. S.), 70.

Sharp v. *Taylor*, 2 Phillips' Ch., 801.

McBlain v. *Gibbs*, 17 How. (U. S.), 232.

In the absence of a finding in a direct proceeding that complainant had violated the Illinois Anti-Trust Act of 1891, the position taken by the court below amounts at most to a charge that complainant being deemed by the court to be a criminal, does not come into court with "clean hands," and, therefore, is not entitled to equitable relief.

The doctrine that "he who comes into equity must come with clean hands" is subject to well-defined limitations, and under the limitations of that doctrine the maxim is not applicable to the facts in this case, because

a. The illegal acts charged in the court's opinion are not connected with the matter in litigation so that they in any manner affect the equitable relations subsisting between the two parties at the time the suit was commenced, and,

b. All of such acts, except the circumstance of the change of price on August 1, 1900, took place after the commencement of the suit.

Moreover, the maxim above noted is always confined to misconduct in regard to or at all events connected with the matter in litigation, so that it in some measure affects the equitable relations subsisting between the two parties and arising out of the transaction. When a court of equity is appealed to for relief, it will not go outside of the subject matter of the controversy and make its interference depend upon the conduct of the moving party as to matters in no way affecting the equitable right which he asserts against the defendant or the relief which he demands.

It is enough, we submit, that the Illinois Anti-Trust Act of 1891 permits the purchaser of goods to retain the commodity and refuse payment therefor, under a strict enforcement of said penal statute. And this Court will not extend the scope of said penal statute under such circumstances,—because Federal Courts have repeatedly held that it is not "public policy," but, rather, "public scandal," to uphold a dishonest act, and to permit a litigant to present a dishonest defense.

Gilbert, use etc., v. *American Surety Co.*, 121 Fed. 499.

Connolly v. *Union Sewer Pipe Co.*, 184 U. S., 540.

IV.

CONSIDERATION OF THE MERITS OF THE CASE.

As heretofore stated, the bill of complaint presented the following issues:

The maximum price ordinance of 1900 was alleged

to be in contravention of the Constitution of the United States, in that—

a. Its operation would impair the obligations of the franchise contract of complainant with the City of Peoria.

b. Its enforcement would result in confiscating the property of complainant and taking its property without due process of law and without just compensation, and in denying to complainant the equal protection of the law.

The defendant accepted the issue tendered, and in addition presented the following issue for a defense, to wit: That complainant was estopped from invoking the protection of the Constitution of the United States.

In so far as the validity of the ordinance complained of turned upon its unreasonableness, the complainant sought to establish its position by presenting evidence with respect to the cost of manufacturing and distributing gas, and it conceived that the proper elements to be taken into consideration in determining such cost, were:

1. The cost of a suitable plant.

2. Actual cost of the manufacture and delivery of gas per thousand cubic feet, exclusive of depreciation and interest on the investment.

a. The cost of raw material from which gas is manufactured.

b. The cost of labor involved in the manufacture of gas.

c. The cost of distributing gas when manufactured.

d. The cost of administration, repairs and maintenance.

e. Allowance for the value of residuals produced.

3. The losses occasioned by depreciation.

4. The hazards of the business.

5. The requirements for an adequate return on moneys actually invested.

1. *The cost of a suitable plant:* Complainant, in support of the inquiry as what would be the proper cost of a manufacturing plant and distributing system suitable for carrying on its business, introduced evidence showing the actual cost of complainant's plant. This plant was new and vouchers were introduced covering every dollar expended in the construction of the plant, and amounting to $434, 252.35. (Rec., 164, 349.) Expert gas engineers and contractors were placed upon the stand and testified:

a. That the *cost* of complainant's plant was in fact less than would ordinarily be required in the construction of a similar plant, owing to the fact that it was built under favorable conditions both as to the price of labor and materials.

b. That the *fair market value* of complainant's plant at the time of the filing of the bill of complaint was in excess of $450,000, exclusive of any value contained in its franchise.

c. That complainant's plant was admirably adapted for complainant's business, and was of proper size and modern in every detail.

2. *Actual cost of the manufacture and delivery of gas per thousand cubic feet exclusive of depreciation and interest on the investment.*

Upon the question of cost of manufacture and delivery of gas, the defendant introduced its operating statements (Rec. 350–353 and 667–691) from the date of the completion of the plant up to the time of the filing of the bill of complaint, and also from the time of filing the bill of complaint to the date of the closing of evidence in this case. These operating statements accompanied in every case, by the detail vouchers, showed the actual cost of every material entering into the production of gas, the actual cost of labor employed, the actual amount of gas produced, the actual amount of residuals obtained, and the price at which the residuals were sold, thus enabling the master to compute with absolute accuracy the actual cost of every foot of gas produced.

In addition to this, the complainant presented the testimony of experts in the manufacture of gas and the management of gas plants, and demonstrated that the results achieved in the operation of complainant's plant were of the highest order, both as to quantity, quality and economy of production.

3. *The losses caused by depreciation.*

In treating the subject of depreciation the complainant produced expert testimony showing that depreciation is an element of expense entirely distinct from repairs and maintenance, and is occasioned by the following elements and forces.

a. Natural destruction occasioned by the action of the elements, including natural wear and tear.

b. Special destruction occasioned by the disintegrating chemical vapors about a gas plant.

c. Antiquation, resulting from the fact that new improvements and inventions, require the replacement of apparatus as a measure of economy and to avoid the introduction of competition.

d. Arbitrary changes of grade by city councils requiring the system of mains to be either lowered or raised at various points, or abandoned.

e. Shifting of residence and business localities requiring, *e. g.*, a four inch main to be replaced by a sixteen inch main, or putting the work of a four inch main on a sixteen inch main.

f. Damage to the system of mains by street improvements, such as the building of sewers, the laying of water pipes, and other occupation of the streets.

g. The necessity of remodeling or abandoning and rebuilding an entire plant to meet the increasing requirements of a growing city from time to time.

Upon the question of depreciation, it appeared that the annual charge required to meet the same would average about six and one-half per cent.

4. *The hazards of the business and the proper interests return in view thereof.*

Upon the hazards of the business like testimony was introduced showing the difference in risk between an investment in real estate securities or other like collaterals

and an investment in a manufacturing industry, and especially a gas plant. It was urged by complainant, and supported by the testimony, that inasmuch as complainant was asking for an adequate return not upon its capital stock nor upon any bond issue, nor upon any amount of indebtedness which might exist, but merely upon the actual money invested, to wit, the actual cash which would be required to reproduce its investment at the time of the passage of the ordinance in question, it was fitting that the hazards of the business should be considered in determining what would be an adequate income to be derived from the moneys invested.

Among the hazards taken into account by the various expert witnesses may be mentioned the following:

a. Competition of other forms of light and heat, including natural gas.

b. Explosions, asphyxiation, and similar accidents peculiar to the business.

c. New inventions, revolutionary in character, which destroy the value of the property, as distinguished from mere antiquation.

d. Hazards occasioned by city government changing its public lighting system from gas to electricity, or otherwise resulting in the absolute destruction of the investment, represented by the entire public lighting system.

e. Electrolysis, *i. e.*, the destruction of mains through the action of vagrant electric currents from electric street railroad systems, &c.

f. Permanent and fixed character of the investment and limited field of operation preventing the removal of the "stock in trade" to more favorable localities.

g. Immense capital invested as compared with the receipts of the business.

h. Ill-advised municipal and state legislation.

The concensus of opinion among the witnesses established the proposition that if ordinary real estate mortgages secured upon income-bearing property, having a value of twice the amount of the loan, having a varied use and carrying adequate insurance, called for the return of from four to six per cent. upon the moneys invested therein, it must follow that an investment in a gas property containing no margin of security and subject to peculiar hazards should bring a return of from eight to ten per cent. upon the moneys therein actually invested.

The Report of the Special Commissioner fully Sustains the Contentions of Complainant on all Points Necessary to the Relief Sought, and such Report Should be Confirmed without Remanding the Cause.

The gist of the Special Commissioner's Report is as follows:

(1) The maximum rate ordinance was passed under State authority.

(2) The maximum rate fixed by the ordinance was so unreasonably low that the enforcement of the ordinance

would result in the taking of complainant's property for public use without just compensation and without due process of law, and in denying to complainant the equal protection of the law.

(3) That, therefore, the maximum price ordinance was void, and complainant was entitled to the relief sought by the bill, and that "an injunction should be allowed, perpetually enjoining the defendant, its officers and agents from enforcing, or attempting to enforce, the provisions thereof against complainant, as prayed in and by its bill herein." (Rec., p. 62.)

It will be observed that the decree of the court below did not overrule or modify the findings of the Special Commissioner in regard to any matters pertinent to the relief sought by complainant. It is, therefore, respectfully submitted that the findings of fact and law made by the Special Commissioner stand to the same extent as if recited in the final decree of the court below; and when the ground upon which the court below denied equitable relief fails, the report of the Special Commissioner remains as the judgment of the court in this cause. This view is entitled to unusual consideration, inasmuch as the Special Commissioner was appointed by agreement of the parties—the effect of which circumstance is discussed in this brief at page 72 *post*.

Moreover, all of the exceptions filed by the defense are general in their character, and none of them are supported by special statements of the Commissioner, or by reference to the evidence bearing on the exceptions relied upon by defendant.

Exceptions are to be regarded only so far as they are supported by the special statements of the Commissioner or by a reference to the particular testimony on which the exceptant relies.

Harding v. *Handy*, 11 Wheaton, 103–126.
Jaffrey et al. v. *Brown* (C. C. Ga.), 29 Fed., 476.
Green v. *Bishop*, 1 Clifford, 186.
Bridges v. *Sheldon*, 18 Blatchford, 295–307.
Lockhart v. *Horne*, 3 Woods, 542.

Believing, therefore, that the master's report should be approved, it is desirable to present for the consideration of this court—

THE FINDINGS OF FACT MADE BY THE SPECIAL MASTER.

The findings of the special commissioner upon the facts may be summarized as follows:

1. That complainant constructed a gas plant in a suitable locality and laid twenty-six and one-half miles of mains for distribution of gas, and commenced distribution about May 1, 1900. (Rec., p. 46.)

2. That at the time of the institution of this suit it had installed about two thousand service pipes and had in use 1,758 meters—these service pipes being installed and the meters set without charge to consumers. (Rec., p. 47.)

3. That the actual cost of complainant's plant and distributing system was $434,252.35 (Rec., p. 47.)

4. That the plant so constructed was well designed

for the prudent and economical manufacture of coal gas, and represented the highest efficiency, not only for the economical production of gas, but also for the production of the valuable by-products known as coke, coal tar and ammonia liquor, the sale of which tends to reduce the net cost of the manufacture of coal gas. (Rec., p. 47.)

5. That up to the time that complainant secured its charter from the State, the prices fixed by the old gas company were, for illuminating gas, $1.35 gross, or $1.25 net per thousand cubic feet if paid on or before the 10th day of the month next following and 75 cents net per thousand cubic feet for fuel gas. (Rec., p. 47.)

6. The cost of the production of coal gas can not be ascertained by any fixed standard; the cost of raw materials necessary to its production are variable. Necessary labor in the successful operation of complainant's plant including its distributing system and also its manufacturing plant, have no fixed, invariable scale. The market value of residuals obtained is likewise an uncertain feature (Rec., p. 51.)

7. Depreciation exists and continues in a coal gas plant notwithstanding repairs that are necessary to be made to maintain its working efficiency, and it is an expense in the cost of the manufacture and distribution of gas that is outside of and in addition to repair expenses. (Rec., p. 52.) "The depreciation of a manufacturing coal gas plant, under the evidence in this case, may be conservatively found to be five per cent. per annum on the first cost." (Rec., p. 51.)

8. Commissioner's finding number 17 (Rec., p. 52):

"The first cost to complainant in the manufacture and distribution of coal gas in the City of Peoria may be said to be covered by the following charges, viz :

Interest at the rate of five (5) per cent. per annum on the cost of its manufacturing plant and distributing system, which at the close of the taking of testimony in this case was $439,725. This sum represents its fair market value, and only the money then invested therein by complainant; also depreciation at the rate of five (5) per cent. per annum on the cost of the manufacturing plant less the price paid for the real estate on which it is located; five (5) per cent. per annum depreciation on the cost of the service connections installed; nine (9) per cent. per annum depreciation on the cost of consumers' meters; five (5) per cent. per annum depreciation on the amount invested in tools, furniture and fixtures; two (2) per cent. per annum depreciation on the cost of distributing mains; also the cost of the material used; necessary labor; repairs to system; leakage or unaccounted for gas as shown by the difference of registration in the station meter register and consumers' meters; uncollectible accounts, taxes and office expenses."

Commissioner's finding 18. (Rec., p 52.):

"From the cost as so ascertained should be deducted the value of residuals obtained from each ton of gas coal carbonized."

In the presentation of its case before the special commissioner, complainant was somewhat embarrassed from

the fact that in none of the so-called rate cases in which legislatures or municipalities had fixed maximum rates to be charged by railroads, street railroads, gas or water companies, were the various elements of a reasonable rate so organized as to permit the classification of such cases with reference to any particular element of cost. The last mentioned findings of fact involve the consideration of the law under which the federal courts have heretofore acted in determining upon the reasonableness of rates in the cases before them. Some of the cases which follow include a discussion of the reasonableness of the rates generally, while others include several of the elements of cost as we have classified them. The following cases taken together, we respectfully submit, are a sufficient warrant for this finding of the special commissioner.

Smith v. *Ames*, 169 U. S., 466.

Reagan v. *Farmers Loan & Trust Co.*, 154 U. S., 362.

New Memphis Gas Co. v. *City of Memphis*, 72 Fed., 952.

Clyde v. Richmond & Danville Ry. Co., 57 Fed., 436.

Covington & Lexington Turnpike Road Co. v. *Sandford*, 164 U. S., 578.

So. Pacific Co. v. *Board of Railroad Commissioners of Cal.*, 78 Fed., 236.

San Diego Land and Town Co. v. *National City*, 74 Fed., 79.

Milwaukee Electric Ry. & Light Co. v. *Milwaukee*, 87 Fed., 577.

Bryner, et. al. v. *Butler Water Co.*, 179 Pa., 231; 36 L. R. A., 260.

San Diego Water Co. v. *City of San Diego* (Cal.), 38 L. R. A., 460.

together with the numerous cases cited in this brief, pp. 19, 20, where the question is discussed as to the impairment of contract obligations and the confiscation of property through unreasonable regulation.

9. The gas manufactured by complainant from September 1, 1900 (the date of the maximum price ordinance), up to September 1, 1901, as shown by the evidence, cost the complainant in the holder, per thousand cubic feet, 77 9-10 cents after deducting from the cost of production, the market value of all residuals obtained from the coal carbonized. The cost was upon the basis of an output of about fifty-one million cubic feet per year, and does not include the cost of distribution (Rec., p. 53) nor depreciation; nor the hazards of the business; nor interest on the investment.

10. It appears from the evidence that complainant company is capitalized at two million dollars, on no part of which have the holders of its stock ever received any dividends whatever, nor have any been declared by its managing board. The salaries of its officers do not seem to be extravagant or in excess of the amount usually paid by others engaged in like business enterprises; the vice-president of the company, being also its active business manager. Its working capital, comprised of its bills receivable and cash on hand is not in excess of the

amount required to enable it to take advantage of favorable market prices for the material entering into the production of coal gas. *It is not seeking in this case the right to charge for gas a price that will enable it to pay dividends on its capital stock.* (Rec., p. 55.)

11. Commissioners' Finding 26 (Rec., p. 55.):

> *"At the close of the taking of the evidence in this cause complainant's manufacturing plant and distributing system were in a high state of working efficiency as regards the economical manufacture and distribution of coal gas; the management of its affairs, skillful and prudent; yet notwithstanding these favoring conditions, it is conclusively shown by the decided weight of the evidence, that the income it would receive from the sale of gas as shown by consumers' meters in use, at the rate of seventy-five cents per thousand cubic feet, together with the market value of all residuals produced per ton of coal carbonized, will not yield an income sufficient to meet the amount of actual depreciation to its plant, the expenses incident to the making of necessary repairs thereto, and a normal interest charge on the amount of money invested in such plant."*

And it will be observed that the commissioner refused to consider the item of "hazards of the business" in arriving at a normal interest charge (Rec., p. 55).

A Further Unreasonable Provision of the Ordinance.

It was contended by complainant in its bill of complaint that the provision of the maximum price ordinance requiring complainant to furnish gas of eighteen candle power at the *place of consumption* was unreasonable and impossible of performance.

Upon this contention, supported by the evidence, the commissioner made the following finding:

Commissioner's finding 12 (Rec., p. 51):

> "The license granted by the defendant, the City of Peoria, on April 18, 1899, contains no requirements as to the candle power of gas to be furnished by complainant, neither is it practicable under the present method of conveying gas from the place of manufacture to a point of consumption to maintain eighteen candle illuminating power at all points of consumption without the excessive use of enrichers in its manufacture. Where this is attempted by the producer it results in discomfiture to the consumer by smoking when ignited and the giving off of unpleasant odors."

The Arbitrary and Ill-considered Action of the City Council in Passing the Ordinance.

Upon the question of the good faith of the City Council in passing the maximum-rate ordinance, the master found (Findings of Fact, No. 11, Rec., p. 50).

> "The ordinance in controversy in this case was not passed by the Common Council of the City of Peoria for about eighteen months after the time that complainant procured its original license from the city. At the time the ordinance fixing the maximum price of gas was pending, and before its adoption by the City Council, it appears complainant, through one of its officers, stated to the Mayor of Peoria and to some of the members of the City Council that gas could not be made by it at the maximum price fixed by this ordinance, and the Mayor was then requested either personally or through any representative of

the city he might select to make an examination of the books of the complainant to ascertain, for the guidance of the council, what it was then costing complainant to manufacture gas, and what would be the probable cost in the future. *There is no evidence in the record in this case showing or attempting to show that the defendant ever sought the opportunity or privilege of making any investigation of complainant's books that had been offered it for the express purpose of guiding its legislative body in fixing in the ordinance it then had under consideration reasonable and fair rates to be charged for gas in the city.* Nor is there one word of testimony in denial that such an opportunity was tendered it by the complainant, nor is there any evidence that defendant had knowledge on this subject from any other source."

The foregoing conclusion gives an added touch of viciousness to the ordinance, it being the law that the city must exercise its right to regulate rates, *not arbitrarily, but intelligently*, and after due investigation.

Milwaukee Electric Railway & Light Co. v. *City of Milwaukee*, 87 Fed., 577.

Mercantile Trust Co. v. *Texas Pacific R. R. Co., et al.*, 51 Fed., 529.

New Memphis Gaslight Co. v. *City of Memphis*, 72 Fed., 952.

The Defense of the City Based on Estoppel.

The answer of defendant contains sundry averments that complainant had secured its franchise ordinance by making false representations to the City Council.

While the decree of the Court specifically excludes any consideration of this defense, it is now proper to advert to it in the consideration of the general merits of the case.

Upon the issue of estoppel the evidence shows—

First. That the alleged representations were not made by the complainant company.

Second. That such representations were not authorized by any corporate action of the complainant company.

Third. That all the representations in question were made prior to the time of the adoption of the franchise ordinance and became merged therein.

Fourth. That such representations, not being incorporated in the franchise ordinance, could not have been a controlling consideration in the passage of the same.

Upon this issue the master found (Rec., p. 49):

> "It does not appear, however, that any corporate action taken at any time by complainant authorized such statements or representations, nor does it appear that in any such statements or representations any fixed rate at which complainant would furnish gas to consumers was stated, the substance of them being that 'the price would be cheapened.'"

The Master's Finding of Law 23 (Rec., p. 61).

> "Under the facts as found, the estoppel set up by the defendant can not be sustained. If the rate fixed by the ordinance of September 4, 1900 had been prescribed in the original license to complainant, a question much more difficult to a correct decision in that regard would be presented."

The doctrine of estoppel can not be invoked in this case without doing violence to fundamental principles governing the binding force of corporate acts and destroying the elementary principles which uphold the binding force of written contracts.

Garlinghouse v. *Whitwell*, 51 Barbour, 208,
Hurt v. *Riffle*, 11 Fed. Rep., 790.
Union Mutual Life Ins. Co. v. *Slee*, 123 Ill., 57.
Chandler v. *White*, 84 Ill., 438.
Hill v. *Epley*, 31 Penn. State, 331.
Davidson v. *Young*, 38 Ill., 152.
Mason v. *Harper's Ferry Bridge Co.*, 28 W. Va., 649.
Lash v. *Rendell*, 72 Ind., 475.
Stoddard v. *Johnson*, 75 Ind., 20.
Plinner v. *Lord*, 9 Allen, 455.

So far as we have been able to find, no court has ever held that mere considerations of opinion could create an estoppel; nor have expressions made in good faith been held to create an estoppel where the party invoking the doctrine was in a position to secure information upon which to base an independent judgment, and where the party making the representations did not do so in the form of a guaranty.

It was entirely within the power of the City Council of the City of Peoria to have inserted maximum rates in the franchise ordinance in accordance with the alleged representations of individual stockholders. If it relied on the alleged representations and at that time placed upon them the same

construction for which it now contends, it is fair to presume that the City Council would have embodied the maximum rate in the ordinance. The franchise ordinance is a contract and merges all negotiations and represents the final conclusions of the parties thereto, and it is a fair presumption that when the franchise ordinance was passed in its existing form, both parties were content that the question of the rate to be charged either be left to the operation of natural laws, or if regulations were attempted that the rate fixed would be a reasonable one after due investigation and according to law.

This principle applied fundamentally to written contracts in general (*i. e.*, that their effect may not be varied by parol evidence, but that all negotiations are presumed to be merged in the contract itself), is applied also to *ordinance contracts.*

Curtiss v. *City of Waterloo*, 38 Iowa, 266.

Commissioners v. *Hunt*, 33 Ohio St., 169.

Bridges et al. v. *Board of Supervisors*, 56 Miss., 817.

Nor was it proper or legitimate for the court, over the specific objections of complainant, to inquire into the motives which induced the city council to pass the ordinance.

Farmers Loan & Trust Co. v. *C. P. & S. Ry. Co.*, 39 Fed., 143, 153–156.

That a corporation can not be estopped by the unauthorized representations of the stockholders is apparent from the following cases:

American Preservers Co. v. *Norris*, 43 Fed., 711.

Davis Wagon Wheel Co. v. *Davis Wrought Iron Wheel Co.*, 20 Fed., 700.

Moore & Handley Hardware Co. v. *Towers Hardware Co.* (Ala.), 6 So., 41–43.

Bartlett v. *Kinsley*, 15 Conn., 327.

Jones v. *Williams* (Mo.), 39 S. W., 489.

Moreover, if this question of estoppel should be deemed material to a decision of the case, the record discloses that the representations upon which the estoppel is based were not false or fraudulent, but were carried out in good faith.

(Record pp. 781, 819, 820, 872, 887, 918, 992, 998, 1041, 1055, 1070, 1090, 1091.)

THE COMMISSIONER'S CONCLUSIONS OF LAW.

The principal conclusions of law of the special commissioner (not already discussed) and the authorities in support of the same now follow:

1. The commissioner states the main question before him as follows: (Second conclusion of law, Rec., p. 57.)

> "In this case the following federal question is presented,—does the ordinance adopted by the defendant on September 4, 1900, in and by which the maximum price to be charged for gas in the City of Peoria is fixed, violate the provisions of the Constition of the United States wherein it provides that no person shall be deprived of his property without due process of law, and further, that private property shall not be taken for public use without just compensation?"

2. The commissioner's answer to this question is found in the sixth conclusion of law (Rec., p. 58), and the eighteenth conclusion of law (Rec., p. 60).

> "6. The fact being established that complainant can not manufacture and distribute gas to the citizens of Peoria at the maximum rate fixed by the ordinance, it then follows that:
>
> a. The ordinance is void because by it the city has gone beyond the powers conferred by the laws of the State of Illinois which confer upon it the power to regulate the price to be charged for gas. It constitutes the exercise of a lawful right in an unreasonable manner; and
>
> b. The enforcement of the ordinance requiring complainant to furnish gas to the citizens of Peoria at the point of consumption at the maximum price therein fixed would constitute the taking of private property for public use without just compensation, and in that respect is in violation of the provisions of the Constitution of the United States.
>
> "18. *The evidence in this regard shows that the maximum rate fixed by the above ordinance is so unreasonably low as to require the complainant to furnish gas to the citizens of Peoria at a price below the cost of manufacturing and distributing it. The enforcement of it would constitute the taking of the property for public use without just compensation. This is prohibited by the fourteenth* (14) *amendment to the Federal Constitution.*"

These conclusions of the commissioner find ample support in the following cases, in many of which it is submitted the evidence was far less conclusive of the threatened injury to complainant's property and property rights than in the case at bar.

Indianapolis Gas Co. v. *City of Indianapolis*, 82 Fed., 245.

Citizens Street Railway v. *City Railway Co.*, 56 Fed., 746.

Same case affirmed in Supreme Court, 166 U. S., 557.

Walla Walla v. *Walla Walla Water Co.*, 172 U. S., 1.

Mercantile Trust & Deposit Co. v. *Collins Park and Belt R. R. Co.*, 99 Fed., 812.

Southwestern Missouri Light Co. v. *City of Joplin*, 101 Fed. 23.

C. M. & St. P. Ry. v. *Minnesota*, 134 U. S., 460.

Haverhill Gas Light Co. v. *Barker*, 109 Fed., 694.

Cleveland Gas Light & Coke Co. v. *The City of Cleveland*, 71 Fed. Rep., 610.

3. That the question of the reasonableness of such ordinance and as to whether the limitations are reasonable or unreasonable as between the public and a public service corporation, are ultimately questions for judicial, not legislative determination. (Master's finding 15, Rec., pp. 59–60.)

Stone v. *Trust Co.*, 116 U. S., 307.

C. & N. W. Ry. Co. v. *Dey*, 35 Fed., 866.

Clyde et al. v, *R. & D. Ry. Co.*, 57 Fed., 436.

The Findings of the Special Commissioner Appointed by Agreement of the Parties are Entitled to Peculiar Weight.

The Special Commissioner in this case was appointed under stipulation and by consent of both parties. Such a consent, entered as an order of Court, is "a submission of the controversy to a tribunal of the parties' own selection, to be governed in its conduct by the ordinary rules applicable to the administration of justice in tribunals established by law. Its findings, like those of an independent tribunal, are to be taken as presumptively correct, subject indeed, to be reviewed under the reservation contained in the consent and order of the Court, when there has been manifest error in the consideration given to the evidence or in the application of the law, but not otherwise."

Farrer v. *Bernham*, (Cir. Ct. of App. 5th Cir.) 75 Fed. 136.

Trustees Dartmouth College v. *International Paper Co.*, 132 Fed., 91.

Davies v. *Schwartz*, 155 U. S., 631.

Third Nat. Bank v. *Nat. Bank.* (C. C. A., 5th Circ.), 86 Fed Rep., 852.

The Elton. (C. C. A., 4th Circ.), 83 Fed. Rep., 519.

Walker v. *Kinnare.* (C. C. A., 7th Circ.), 76 Fed. Rep., 101.

Moline Plow Co. v. *Carson.* (C. C. A., 8th Circ.), 72 Fed. Rep., 387.

Phœnix Furniture Co. v. *Put-in-Bay Hotel Co.* (C. C. for N. D. of Ohio), 66 Fed. Rep., 683.

The order of court, submitting this case to the special master, for his determination, was as follows:

> "Now come the parties, by their solicitors, and by agreement, in open court, it is hereby ordered that I. C. Pinckney, of the City of Peoria, in said district and division, be and he is hereby appointed a special commissioner to take the proofs herein and report the same, with his findings and conclusions herein, with all convenient speed." (Rec., p. 38.)

In *Kimberly* v. *Arms, supra*, the court says:

> "When the parties consent to a reference of a case to a master or other officer, to hear and decide all the issues therein and report his findings, both of fact and of law, and such reference is entered as a rule of the court, the master is clothed with very different powers from those which he exercises upon ordinary references, without such consent, and his determinations are not subject to be set aside and disregarded at the mere discretion of the court: A reference, by consent of parties, of an entire case, for the determination of all its issues, though not strictly a submission of the controversy to arbitration (a proceeding which is governed by special rules), is a submission of the controversy to a tribunal of the parties' own selection, to be governed in its conduct by the ordinary rules applicable to the administration of justice in tribunals established by law.
>
> 'To disregard the findings and treat the report as, a mere presentation of the testimony is to defeat, as we conceive, the purpose of the reference and disregard the express stipulation of the parties. We are, therefore, constrained to hold that the learned court below failed to give to the findings of the

master the weight to which they were entitled, and that they should have been treated as so far correct and binding as not to be disturbed, unless clearly in conflict with the weight of evidence upon which they were made."

In *Davies* v. *Schwartz*, *supra*, the Court says:

"While it was held that the court could not, of its motion, or upon the request of one party, abdicate its duty to determine by its own judgment the controversy presented, and devolve that duty upon any of its officers, yet where the parties select and agree upon a special tribunal for the settlement of their controversy, there is no reason why the decision of such tribunal, with respect to the facts, should be treated as of less weight than that of the court itself, where the parties expressly waive a jury, or the law declares that the appellate court shall act upon the finding of a subordinate court."

CONCLUSION.

We can not impress upon the court too strongly the position in which the complainant will be most unfairly and unjustly placed in the event of an affirmance of the decree below without any decision as to the validity of the maximum rate ordinance. The circuit court compelled complainant as a condition precedent to appeal to file a bond for $150,000 conditioned "that if the said complainant shall not prosecute its appeal with effect and make its plea good, then the said complainant shall well and truly pay and refund to the said City of Peoria for the use of such of the inhabitants thereof as are con-

sumers of gas furnished by the said Peoria Gas and Electric Company, complainant, all excess, over seventy-five cents per thousand cubic feet charged and collected by said complainant from such consumers and all damages that may accrue to said city and said consumers of gas by reason of the restraining order heretofore entered and continued in said cause by reason of the appeal herein." (Rec., p. 143.)

If the complainant is to be denied equitable relief, it will follow that the city can claim the forfeit of the bond, notwithstanding the fact that the special commissioner appointed by agreement of the parties has declared the ordinance unreasonable, unconstitutional and wholly void.

Nor in such event can this complainant ever find a *locus poenitentiæ*, for this record shows that every act upon which the Court below based its finding of combination had ceased to exist at the time of the closing of the evidence in the case, it appearing (Record, pages 1353 and 1717) that even the alleged agreement as to rates did not continue for more than four months after the filing of the bill. The complainant can not, therefore, further purge itseif of its alleged offenses.

Moreover, by reason of the nature of its business, it can not remove its stock in trade to a more friendly locality, and, being a public-service corporation, it will not be permitted voluntarily to go out of business—this very ordinance requires it to exercise its franchise at the bidding of the public, and prescribes exorbitant penalties for each and every refusal on its part to furnish gas at the prescribed rate upon request.

An affirmance of the decree, therefore, would mean that this corporation, unable further to purge itself of the criticism of the Court below, handicapped by the utter impracticability of removing its property, denied the right of going out of business, and beset by conditions which the special commissioner declared meant financial ruin, must continue to operate its plant until such time as its property, valued at $500,000, has been dissipated or its affairs wound up through the merciful intervention of a receiver in bankruptcy.

For the foregoing reasons, it is submitted that the decree of the court below should be reversed, and that this court should enter a decree in accordance with the special commissioner's report or should remand the case, with instructions to the court below to enter such a decree.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

THE CITY OF PEORIA, Appellee.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS.

Suggestions by Complainant in Regard to Petition of City of Chicago for Leave to File Brief.

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

Referring to the petition of the City of Chicago for leave to file a brief in this cause, it is suggested that—

1. The question argued in petitioner's brief is admittedly unnecessary to a decision of the case now be-

fore the Court. The fear that this Court in its opinion herein may commit itself upon a question involved in another suit is, therefore, groundless.

2. The question which petitioner presents appears to be vital to a proper decision of the case of Darius O. Mills *vs.* City of Chicago *et al.* It, therefore, can best be considered in the orderly hearing of that case.

3. The suit of Darius O. Mills *vs.* City of Chicago *et al.* is not pending in this Court, and there is no certainty that said suit will ever be docketed in this Court.

Respectfully submitted,

E. C. RITSHER,
W. T. IRWIN,
W. T. ABBOTT,

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

THE CITY OF PEORIA, Appellee.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS.

Suggestions by Complainant in Regard to Petition of Darius O. Mills for Leave to File Brief.

To the Honorable, the Chief Justice and Associate Justices of the Supreme Court of the United States:

It would be presumptuous for complainant to object to the filing of a brief by one who comes as *amicus curiæ*. It may pertinently be observed, however, that

1. The question sought to be raised by petitioner's brief is admittedly unnecessary to a decision of the case

before the Court. The argument of the question, therefore, will not aid the Court in determining the issues in this case. Hence, "petitioner is apprehensive" that the authorities in support thereof "may not otherwise (than by petitioner's brief) be called to the attention of the Court."

2. The suit of Darius O. Mills *vs.* The City of Chicago *et al.*, is not pending in this Court, and as it appears that the question of appeal lies not with Darius O. Mills but with the City of Chicago, petitioner is unable to assure the Court that said suit will ever be docketed in this Court.

3. The manifest fear of Mr. Mills that this Court may commit itself upon a question involved in another suit is groundless. Should this Court indulge in an *obiter dictum* in the opinion filed in this case, the Court has no such pride of opinion as to be bound thereby should the question in which petitioner is interested come before it in due course.

Respectfully submitted,

E. C. RITSHER,
W. T. IRWIN,
W. T. ABBOTT,

United States Supreme Court

OCTOBER TERM, 1905.

No. 269.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

CITY OF PEORIA,
Appellee.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS, SOUTHERN DIVISION.

STATEMENT.

This case arises on a bill filed by appellant to restrain appellee from enforcing an ordinance fixing a maximum rate of 75 cents per thousand cubic feet to be charged the consumers of gas within the City of Peoria and also prescribing a penalty for each violation of the ordinance.

Prior to 1899, for a period of nearly fifty years, the Peoria Gas Light and Coke Company, organized under a special charter, had manufactured and furnished gas to the City of Peoria and its citizens.

Mathew Henebery became connected with this old company some time about 1875. (Rec. p. 1218.) At that

time it was $60,000.00 in debt. The management which then took hold made a highly prosperous company of it.

Out of the receipts this debt was soon paid. Additional real estate was bought at $6,000.00 or $7,000.00. A water gas plant was installed at $80,000.00. A retort house and other betterments were built at an expense of $60,000.00. The company also purchased $55,000.00 of the $100,000.00 of the shares of the capital stock of the General Electric Company, which at that time furnished the electric lights, public and private, of the city. They also loaned $50,000.00 of their surplus and, in addition to all this, paid annual dividends of ten per cent. and, in addition thereto, annual salaries to the officers of $5,000.00, $3,000.00 and $1,000.00.

When Henebery quit, in April, 1900, this old company had a surplus of $80,000.00, and he sold his stock, which was $50.00 per share on its face, at $218.35 per share.

This company, when he first became connected with it, was selling gas at $3.50 per thousand cubic feet. This was reduced in a short time to $2.50. This rate prevailed for a short time and then it was reduced to $2.00 and then it was reduced to $1.25 net for light and 75 cents net for fuel gas. This had been in force some time when Henebery sold out. These reductions were all voluntary.

There was still another reduction by this company to $1.00 for light and 75 cents for fuel about the time the new company obtained its charter, in the spring of 1899.

At that time the consumption of gas for fuel and light

was about equal, making the average price at which the old company was manufacturing and selling gas 87½ cents per thousand cubic feet. (Rec. p. 1218, *et seq.*)

So enormous had been the profits of this old company that the citizens of Peoria were ready to encourage the organization of a new company.

Theodore J. Miller and Sumner R. Clarke, of the City of Peoria, and John R. Walsh, of the City of Chicago, recognizing the situation as a favorable one to obtain an advantageous concession from the City of Peoria, took steps to promote the organization of a new company.

John R. Walsh's connection with the enterprise was carefully concealed by the local promoters and several local capitalists and business men were induced to become subscribers to the stock by representations on the part of the local promoters that it was to be a competitive company with the old, and that it was to be a Peoria enterprise and would result in furnishing gas to Peoria citizens at very much reduced rates.

The stock was, in fact, all subscribed for by Peoria parties, Sumner R. Clarke subscribing for much the largest amount thereof. Application was then made to the City Council for an ordinance permitting the new company, which was first incorporated as the Peoples Gas and Electric Company, to erect a plant and occupy streets and alleys for the purpose of laying mains thereon.

To obtain the passage of this ordinance, the promoters and stockholders of the new company interviewed the

aldermen and represented to them that it was a Peoria company and a Peoria enterprise and that granting it the license asked would result in furnishing gas at a much lower rate than the old company were demanding, and in some instances saying that it could and would be furnished at 75 cents per thousand; and in other instances, as confirmatory of the above statement, repeating that the officers of the old company had declared they would put the price of gas down to 50 cents if the new company attempted to go ahead with its enterprise.

Persuaded and induced by these statements, an ordinance was passed in April, 1899, by the City Council of Peoria, permitting the Peoples Gas and Electric Company to construct and operate and maintain gas works in the City of Peoria and lay mains on streets and alleys for distribution, etc.

It was understood, as Mr. Clarke says, that Peoria parties would take one-third of the stock and Mr. Walsh the rest. This, however, was known only to Mr. Clarke and Mr. Miller.

But one assessment (twenty per cent.) was made on the $500,000.00 of the capital stock and no more was ever paid in by the subscribers. This assessment was afterwards repaid to the Peoria subscribers with interest. (Rec. pp. 1407, 1408, 1459.)

In pursuance of this same covert plan of the organization, as conceived by the promoters, Miller, Clarke and Walsh, soon after the passage of the ordinance giving the right to commence operations, Clarke, on January 2d, 1900,

assigned a large block of the stock to Walsh—3,040 shares, and another block of 750 shares to Little. (Rec. p. 1608.)

To make things doubly sure, all the local directors were asked to resign, and confidants of Walsh elected in their places. To assure the continuance of Walsh's exclusive control of the gas business, Mr. Little says it was understood when he, Little, became interested in the company that all the stock should be held as a unit and a continuity of the management be preserved during a period of years. (Rec. p. 1405.) In pursuance of this understanding, nearly all the stock of the company was placed in the hands of Sumner R. Clarke and John R. Walsh as trustees and to be held by them and voted by them as per a certain agreement likewise signed by the stockholders and held by the Equitable Trust Company of Chicago, but which the Master refused to permit defendants to inspect or put in evidence. (Rec. p. 1563.)

Mr. John R. Walsh through these agencies and by these methods had thus become master of a most favorable contract and privilege from the City.

In May, 1900, the new company increased its capital stock to the sum of one million dollars. The original stock being for $500,000.00, this increase amounted to $500,000.00. (Rec. p. 1611.)

The stockholders and directors regarded the rights and privileges which they had obtained under the ordinance from the City of such value that they, by resolution of record, declared the assets of the company of value equal to the increased amount of this capital stock, and directed

that it all be issued as paid-up stock to the then stockholders in proportion to their then holdings. (Rec. p. 1613.)

The new company's name was changed to the Peoria Gas and Electric Company. Its capital stock was increased to two millions. It erected a large and commodious plant for a city the size of Peoria, laid its mains and service pipes, and with about two thousand customers commenced operations about March 11th, 1900. The price from March 11th to March 21, 1900, was 90 cents net for light and 65 cents net for fuel gas.

The old company had lowered its rate and the new company met the cut in price by a 30-cent rate for both light and fuel.

The former owners of the old company had now sold out their holdings and a new lot of men were in control of that company. (Rec. p. 1224.)

W. B. McKinley, of Champaign, Illinois, a general operator in gas plants, became the president and practically the manager and director of the policy of the old company. There soon arose a friendly and intimate relation between these two competing companies.

Mr. Eustace, the superintendent of manufacture of the new company, was permitted to take that place for the old company, and their superintendent of distribution, Robb, for the time being became their superintendent of manufacture. (Rec. p. 1183.)

Eustace, while superintendent of the old company's

manufacture, maintained a confidential relation towards Little, the general manager of the new company.

The two companies soon arrived at the point where they wished and sought means to suppress the competition they were in, that they might raise and maintain a higher price to consumers.

They held a conference in Chicago for this very purpose. (Rec. p. 1350.) Mr. W. B. McKinley, the president of the old company, was there. Mr. Walsh was there. Mr. Little says when he came in, the statement was made that *the time had come to stop carrying on an unprofitable business, and the question arose as to what was fair and equitable rates, and the discussion was entirely on these lines.* He says Mr. McKinley had had experience and been identified with a number of gas plants for several years, but he didn't remember who suggested the rate, whether himself or Mr. McKinley. The general talk was on the advisability of making those rates, but he didn't remember who *made the suggestion of rates that were adopted.*

The rate adopted was $1.15 net for light and 75 cents net for fuel gas. (Rec. p. 1353.)

Immediately following this conference and the adoption of this rate, there appeared in the Peoria papers, at the same time, in exactly the same language, notices from each of the companies to the public of the adoption of this rate, to take effect on July 31st, 1900. (Rec. p. 1351, Rec. p. 26.)

Mr. Little says he caused the notice to be published

for the new company, but didn't know who did it for the old company, but further says he knew that the old company made the same rate at the same time; that he knew before he made this advance that the old company intended to do likewise.

In furtherance of this combination between these two competing companies to suppress that competition and raise the price of gas to the consumer a few months thereafter they, the two companies entered into a written agreement (Rec. pp. 1357-1468) by which the old company shut down its manufacturing plant and the new company connected up a service pipe with the old company's mains and furnished the old company gas at 75 cents per thousand. The old company, by its own employees, attended to the collection from its own customers and conducted its business as before except the manufacturing.

The new company made the repairs of mains, service pipes, etc., for the old company and charged them therefor.

By this arrangement, the old company no longer had it in its power to compete by reducing the price of gas to 75 cents. This arrangement was to continue for a period of ten years with the privilege of cancelling it on six months' notice by the old company any time within the first two years.

When the two companies united in raising and fixing the price of gas to $1.15 net for light and 75 cents net for fuel gas, the City took action to control the rate and in September, 1900, adopted an ordinance providing that the maximum price for gas furnished the citizens of Peoria and

all consumers of gas in said city should not exceed the sum of 75 cents per thousand cubic feet and that the gas so furnished should not be less than 18 candle power, to be measured at the place of consumption, etc., and that the Peoria Gas Light and Coke Company and the Peoria Gas and Electric Company or any other company, corporation or person who were then or might thereafter furnish gas to consumers in the City of Peoria were authorized and empowered to charge all consumers of gas in said city a sum not in excess of 75 cents per thousand cubic feet. This ordinance also provided a penalty of not less than $25.00 nor more than $200.00 for each violation thereof. (Rec. p. 17.)

After the adoption of the foregoing ordinance by the City, the complainant on the 18th of September, 1900, filed its bill in the United States Circuit Court charging that the City had no power or authority to enact the ordinance and charging and averring that the rate fixed by the City was unreasonable and that the ordinance was unreasonable and void, and prayed for and obtained an injunction against the City of Peoria and its officers from enforcing such ordinance during the pendency of the suit.

This bill the defendant answered averring and setting out certain false and fraudulent representations made by the promoters and stockholders of the complainant to the City Council of the defendant for the purpose of obtaining the passage of the ordinance, granting it the privilege of manufacturing and distributing gas in the City and averring that the promoters and stockholders of the complainant had, to obtain the passage of such ordinance, represented

that they would compete with the old company in the manufacture and sale of gas and could and would furnish it at 75 cents per thousand cubic feet and that they were, therefore, estopped to deny that such rate was reasonable.

The defendant also answered averring that it had authority to pass the ordinance fixing the rate and that the rate was reasonable and denying that the ordinance was unreasonable or void.

The defendant further answered that the question as to whether the State had delegated to the City its power and authority to regulate rates was not a federal one and that the complainants were estopped to assert a want of authority in the city to regulate the rate of charges to a consumer.

The defendant also answering alleged that prior to the enactment of the ordinance fixing the rate, that the complainant had entered into a combination, agreement or arrangement with the Peoria Gas Light and Coke Company to regulate or fix the price of gas to be sold to the citizens of the City of Peoria and that in pursuance thereof the two companies had at one and the same time published notices in the newspapers of the City of Peoria in words and figures identical, of an advance in the price of gas, and that an agreement or understanding exists between said corporations that they will not compete in price for the sale of gas and that the price therefor shall be determined mutually between them, by which arrangement and agreement all competition and reduction of prices was precluded, and that said ordinance fixing the maximum rate of charge was adopted in good faith to protect the said City and its

inhabitants from the oppression and illegal combination of complainant and the Peoria Gas Light and Coke Company.

A general replication was filed to this answer and a preliminary injunction issued restraining the City from the enforcement of the ordinance during the pendency of the cause.

On the 20th of May, 1901, the cause was referred to Mr. I. C. Pinkney, as a Special Commissioner, to take the proofs in the cause and report the same with his findings and conclusions therein with all convenient speed.

The Special Commissioner took the proofs of the respective parties and reported the same together with his conclusions both of law and fact. He found in brief that while the stockholders made representations as to the reduction of the price of gas upon which the complainant company procured the adoption of its ordinance, yet that the corporation complainant had not authorized the making of any such statements and therefore was not prejudiced by them. He found likewise that the City had authority under its police power to pass an ordinance regulating the price of gas, but he also found with much detail as to the evidentiary matter that the rate fixed by the ordinance of September, 1900, was less than the complainant company could afford to manufacture and distribute gas for and that the ordinance was therefore unreasonable and void. He wholly omitted and neglected to find anything in regard to the alleged unlawful combination between the two old companies, alleged to have been entered into in July, 1900, in violation of the Anti-Trust Act of Illinois, enacted in 1891.

Exceptions were taken and filed by both parties to the report of the Master, covering in minute detail every fact alluded to or mentioned by the Master. The case was heard before the Circuit Court on the report of the Master and the exceptions thereto.

Judge Humphrey, in deciding the case, February 8th, 1904, delivered the following opinion:

"This matter comes up on exceptions to the Master's "report. I believe both complainant and defendant have "filed exceptions to certain affirmative holdings of the "Master, and both parties have also filed exceptions because "the Master failed to hold—omitted to hold—upon certain "other questions. Without undertaking to remember or "specify the facts about this long list of exceptions, this "record shows that complainants' bill was filed on Septem-"ber 18, 1900, seeking to enjoin the enforcement of an "ordinance of the City of Peoria fixing the maximum rate "for gas, which ordinance had been passed on the 4th day "of the same month—September, 1900.

"The bill avers that the City Council had no power to "pass the ordinance, that the rate as fixed by the ordinance "is unreasonably low, that its enforcement would deprive "the complainant of its property without due process of "law, and would deny to complainant the equal protection "of the laws, thus raising a Federal question on the four-"teenth amendment to the Constitution of the United "States. The answer of the City avers that the complain-"ant has entered into an illegal combination or understand-"ing with the old gas company; second, that whether that

"be so or not, the complainant is estopped to deny the "validity of this ordinance or the reasonableness of this "rate by certain acts of its own at the time this franchise "ordinance was passed; third, that the City Council had "power to pass the ordinance in question; and fourth, that "the rate fixed was a reasonable one.

"I am of the opinion that the averment of the answer "which I have first mentioned has been so fully proven by "this record that it must be conclusive of the case. The "Illinois Anti-Trust Law, as construed by the Supreme "Court of Illinois, leaves no doubt in my mind that this "record shows, on the part of this complainant, a violation "of that act in the manipulation of the stock of both com-"panies, the use of the mains of both companies, the per-"forming by complainant's servants of the business of both "companies, the simultaneous agreement of rates between "the officers of both companies on the contract in evidence "between the two companies—all lead to the inevitable "conclusion that there was an understanding between com-"plainant and the old company such as the Illinois act "prohibits. A Court of equity will not assist complainant "to reap the fruits of such unlawful combination. The "exceptions on the part of the City to that part of the "Master's report which omits to find in accordance with "this view, will be sustained, and I need not enlarge upon "the other numerous questions raised by this record. The "bill will be dismissed at complainant's costs. Counsel for "the City may prepare the order." (Rec. p. 139.)

In accordance with the views expressed by the Court, a decree was entered reciting that the cause having come

on for a hearing on the bill of complaint, the answer of the defendant, the replication thereto, and the report of the Master therein and the exceptions thereto and the evidence reported by said Special Master, and the Court having heard the arguments of Counsel, and being fully advised in the premises, finds from the evidence taken and reported in said cause, that the complainant unlawfully entered into a combination, agreement or understanding with the Peoria Gas Light and Coke Company (another corporation organized and doing business under the laws of the State of Illinois, and engaged in the business of furnishing gas to the citizens of the defendant, the City of Peoria, in competition with the said complainant) to regulate or fix the price at which gas should be furnished the people and citizens of the defendant, the City of Peoria, by the complainant and the said Peoria Gas Light and Coke Company contrary to and in violation of the Statute of the State of Illinois, approved June 11th, 1891, and in force July 1st, 1891, and that the complainant is, therefore, without equity, and that the injunction theretofore issued in the cause should be dissolved.

It was therefore ordered, adjudged and decreed by the Court that the injunction theretofore issued in this cause be and the same was thereby dissolved and that the complainant's bill of complaint be and the same was thereby dismissed for want of equity and that complainant pay the costs of the suit to be taxed, etc. (Rec. 141-143.)

From this decree an appeal has been taken and this cause brought to this Court.

Our contention is that the Court below was right in

his opinion and decree finding that the complainant had entered into an unlawful combination with the Peoria Gas Light and Coke Company to regulate or fix the price of gas and that the bill was filed against the City of Peoria in aid of this unlawful combination and to enable it to reap the fruits of its unlawful conduct; that a court of equity will not extend its aid to accomplish such an end and that the bill was therefore properly dismissed for want of equity; that the City had the power and authority to pass the ordinance fixing the rate to be charged, subject only to the condition that such rate must be reasonable; that the Court below not having passed on this question but having disposed of the case on another question, this Court is not called upon to determine whether the rate fixed is reasonable or not, because if the finding of the Court below is affirmed it is unnecessary to determine whether the rate was reasonable or not and if this Court should reverse the Court below, it would not examine the voluminous testimony on the question of the rate being reasonable until it had been first examined and passed upon by the trial Court. And, further, that in the event this Court should examine the record as to this question, that the evidence is sufficient to show that the rate fixed is a reasonable one.

BRIEF.

I.

The Unlawful Combination.

The opinion of the trial Court and the decree herein disclose the fact that this case was determined solely upon the finding that the evidence showed that complainant and the Peoria Gas Light and Coke Company had entered into a combination or understanding to regulate and fix the price of gas to consumers in the City of Peoria in violation of the Anti-Trust Act of Illinois, passed in 1891.

This Act is as follows:

"AN ACT to provide for the punishment of persons, "co-partnerships or corporations forming pools, trusts and "combines, and mode of procedure and rules of evidence in "such cases. (Approved June 11th, 1891. In force July "1st, 1891, p. 206.)

"Pools, Trusts and Combines described. Sec. 1. Be "it enacted by the People of the State of Illinois, repre- "sented in the General Assembly, If any corporation organ- "ized under the laws of this or any other State or country, "for transacting or conducting any kind of business in this "State, or any partnership or individual or other associa- "tion of persons whosoever, shall create, enter into, become "a member of or a party to any pool, trust, agreement, "combination, confederation or understanding with any

"other corporation, partnership, individual, or any other "person, or association of persons, to regulate or fix the "price of any article of merchandise or commodity, or shall "enter into, become a member of or a party to any pool, "agreement, contract, combination or confederation to fix or "limit the amount or quantity of any article, commodity or "merchandise to be manufactured, mined, produced or sold "in this State, such corporation, partnership or individual "or other association of persons shall be deemed and "adjudged guilty of a conspiracy to defraud, and be subject "to indictment and punishment as provided in this Act.

"2. Organization or combination and issue of trust "certificates prohibited. Art. 2. It shall not be lawful for "any corporation to issue or to own trust certificates, or for "any corporation, agent, officer or employes, or the directors "or stockholders of any corporation to enter into any com- "bination, contract or agreement with any person or per- "sons, corporation or corporations, or with any stockholder "or director thereof, the purpose and effect of which com- "bination, contract or agreement shall be to place the man- "agement or control of such combination or combinations, "or the manufactured product thereof, in the hands of any "trustee or trustees, with the intent to limit or fix the price "or lessen the production and sale of any article of com- "merce, use or consumption, or to prevent, restrict or "diminish the manufacture or output of any such article.

"3. Violations of Act—Penalty. Art. 3. If a cor- "poration or a company, firm or association shall be found "guilty of a violation of this Act, it shall be punished by a "fine in any sum not less than five hundred dollars ($500)

"nor more than two thousand dollars ($2,000) for the first "offense, and for the second offense not less than two "thousand dollars ($2,000) nor more than five thousand "dollars ($5,000), and for the third offense not less than "five thousand dollars ($5,000) nor more than ten thous-"and dollars ($10,000), and for every subsequent offense "and conviction thereof, shall be liable to a fine of fifteen "thousand dollars ($15,000); provided, that in all cases "under this Act either party shall have the right of trial by "jury.

"4. Officer, agent or receiver of corporation, indi-"vidual, etc., violating act. Art. 4. Any president, man-"ager, director or other officer or agent or receiver of any "corporation, company, firm or association, or any member "of any company, firm or association, or any individual "found guilty of a violation of the first section of this Act, "may be punished by a fine of not less than two hundred "dollars ($200), nor to exceed one thousand dollars "($1,000), or be punished by confinement in the county "jail not to exceed one year, or both, in the discretion of "the Court before which such conviction may be had.

"5. Contracts, etc., violative of Act, void. Art. 5. "Any contract or agreement in violation of any provision "of the preceding sections of this Act shall be absolutely "void.

"6. Purchasers of product or manufacture violating "Act discharged from payment. Art. 6. Any purchaser "of any article or commodity from any individual, company "or corporation transacting business contrary to any pro-

"vision of the preceding sections of this Act shall not be "liable for the price or payment of such article or com- "modity, and may plead this Act as a defense to any suit "for such price or payment.

"7. Fines, recovery. Art. 7. The fines hereinbefore "provided for may be recovered in an action of debt, in the "name of the people of the State of Illinois. If, upon the "trial of any cause instituted under this Act to recover the "penalties as provided for in Section 3, the jury shall find "for the people, and that the defendant has been before "convicted of a violation of the provisions of this Act, they "shall return such finding with their verdict, stating the "number of times they find defendant so convicted, and "shall assess and return with their verdict the amount of "the fine to be imposed upon the defendant in accordance "with said Section 3; provided, that in all cases under the "provisions of this Act, a preponderance of evidence in "favor of the people shall be sufficient to authorize a verdict "and judgment for the people."

The foregoing Act is not to be confused with the Act of 1893, which by reason of provisions therein contained was held by this Court in *Connolly* vs. *Union Sewer Pipe Co.*, 184 U. S., 540, to constitute class legislation and to render the Act void.

Nor can the Act of 1891 above set out be said to be affected by the Act of 1893, because the Act of 1893 did not contain any provision expressly repealing the Act of 1891; and the Act of 1893 being void cannot be said to repeal the Act of 1891 by implication.

An amendment to the Act of 1891 was passed in 1897, the provisions of which were open to the same objection as the Act of 1893, namely, that it constituted class legislation. This amendment of 1897 is like the Act of 1893 void and can have no effect upon the original Act of 1891.

The Supreme Court of Illinois has lately passed upon these questions as follows:

"It is urged that the Act of 1891 is rendered uncon-"stitutional by the amendment of 1897, and it is also said "that the Act of 1891 was repealed by an Act entitled "An "Act to define trusts and conspiracies against trade, declar-"ing contracts in violation of the provisions of this Act "void, and making certain acts in violation thereof misde-"meanors, and prescribing the punishment therefor and "matters connected therewith"; approved June 20, 1893. "(Laws of 1893, p. 182.) "The questions here raised are "somewhat akin to each other and will be considered to-"gether.

"The Act of 1893 did not expressly repeal the Act of "1891, and from a comparison of the provisions of the acts "we are of the opinion that there is no such repugnancy "existing between the two that the latter would effect a re-"peal, by implication, of the former. Furthermore, the "Legislature evidently did not intend to repeal the Act of "1891 by the Act of 1893, as upon the day upon which the "latter Act was passed the former was amended, and the "Act of 1891 was again amended in 1897. In the case of "*Connolly* vs. *Union Sewer Pipe Co.*, *supra*, the Supreme "Court of the United States had before it for consideration "the Act of 1893, and it was there held that the entire Act

"was unconstitutional and void, as being in conflict with "the provisions of the fourteenth amendment of the Con- "stitution of the United States, in this: that it improperly "discriminated in favor of agricultural products or live "stock in the hands of the producer or raiser. If the Act "of 1893 is void as being in conflict with the Federal Con- "stitution, as it, in view of the decision in *Connolly* vs. "*Union Sewer Pipe Co., supra*, must be held to be, it seems "too plain for argument that it could not have worked the "repeal of the Act of 1891. *Raymond* vs. *Hartford Fire* "*Insurance Co.*, 196 Ill., 329-344.

"The amendment of 1897 to the Act of 1891 was in "the form of a proviso to Section 1 of that Act and reads "as follows: "Provided, however, that in the mining, "manufacture or production of articles of merchandise, the "cost of which is mainly made up of wages, it shall not be "unlawful for persons, firms or corporations doing business "in this State to enter into joint arrangements of any sort, "the principal object or effect of which is to maintain or "increase wages." Under the decision in the Connolly case "it is clear that this amendment is unconstitutional and "void, as being an unlawful discrimination in favor of the "persons sought to be exempted by the amendment from "the operation of the Act of 1891, as amended by the Act "of 1893. If the amendment of 1897 sought to be incor- "porated into said statute is void, it necessarily would make "no change in the original Act, and that Act would stand, "as amended by the Act of 1893, as the legislative will. "The discrimination contained in the Act of 1893, and that "sought to be incorporated into the Act of 1891, as amended "in 1893, by the amendment of 1897, are of the same

"character, and both are obnoxious to the fourteenth "amendment to the Constitution of the United States. The "obnoxious provision in the Act of 1893 carried down with "it the entire Act, as the Court held the obnoxious pro- "vision was so intimately connected with the subject matter "of the Act that it could not be separated from the body of "the Act without destroying the entire Act. Such conse- "quence, however, does not follow the failure of the amend- "ment of 1897. The Act of 1891, as amended by the Act "of 1893, was a valid statute. That Act, as amended, and "the Act of 1897, are separate and distinct acts, passed by "different legislatures, and the subsequent unconstitutional "Act, which is without force, can have no effect to over- "throw and render void the legal and constitutional ex- "pression of the legislature as manifested by the Act of "1891, as amended in 1893.

"It is suggested the constitutional method of passing "amendments in this State, which requires "the section "amended shall be inserted at length in the new Act," "requires a holding to the effect that the section sought to "be amended is necessarily repealed, even though the sub- "ject matter sought to be incorporated into the section fails "by reason of the fact that the amendment is unconstitu- "tional and void. We cannot agree with this view. The "amendment of 1897 does not, in terms, repeal Section 1 "of the statute of 1891. If any part of the Act of 1891 is "repealed it must be a repeal by implication and because "the amendment is in conflict with the original Act or a "part thereof. But the amendment is unconstitutional and "void. It therefore repealed no part of the Act upon which "it was fruitlessly sought to be engrafted as an amendment.

"(*Ex parte Davis*, 21 Fed. Rep., 396.) Repeals by impli-"cation are not favored (*People* vs. *Nelson*, 156 Ill., 364), "and in *Childs* vs. *Shower*, 18 Iowa, 261, it is said (p. "272): If the repealing clause was positive and uncondi-"tional and under circumstances which indicated a design "to repeal the old law at all events, it would doubtless be "operative, though contained in a statute which was uncon-"stitutional. So, on the other hand, it seems clear that an "unconstitutional enactment would not repeal, by mere "implication, a former law."

"We therefore, conclude, both the Act of 1893 and the "amendment of 1897 being unconstitutional and void, they "do not repeal, by implication, the Act of 1891, or any part "thereof, as amended in 1893.

The People vs. *Butler Str. Foundry*, 201 Ill., 236-257.

Chicago, Wilmington and Vermilion Coal Co. vs. *The People*, 214 Ill., 421-454.

The constitutionality of the Act of 1891 has likewise been affirmed and its provisions applied and enforced in the following cases:

Ford vs. *Chicago Milk Shippers Co.*, 155 Ill., 166.

Harding vs. *American Glucose Co.*, 182 Ill., 557.

C. W. & V. Coal Co. vs. *The People*, 214 Ill., 421.

The purpose and object of forming the complainant Company and granting it the privilege of erecting factories

and entering upon the streets of Peoria for laying pipes was to obtain competition and a reduction of the price in the furnishing of gas.

(Rec. pp. 794, 828, 898, 1082, 1093, 1116, 1042, 1049, 1057, 1065, 1071.)

The complainant did enter the same field and the same territory in the City of Peoria and became a competitor with the Peoria Gas Light and Coke Company in furnishing gas to the citizens of Peoria. (Rec. pp. 1328-1343.) Mr. Little, the General Manager, saying in a general way, "Our piping system competes with that of the Peoria Gas Light and Coke Company." (Rec. p. 1337.)

The old Company had reduced its price to one dollar at the taking out of the charter by the new Company, the result of threatened competition, and had operated under this rate of charge until the new Company commenced March 11th, 1900.

When the complainant commenced operations on March 11th, 1900, and fixed its charges at 95 cents for light and 65 cents for fuel gas, the old Company as a result of the actual competition reduced its charges to 50 cents.

Thereupon as a further result of actual competition the new Company reduced its charges for both light and fuel to 30 cents and the old Company met this price.

This condition of things continued until July, 1900. Then the two companies sought a way out of the competition which they had entered upon.

Walsh owned practically all the stock of complainant and controlled its management. Walton, the Treasurer, and Little were his confidential men.

Little had been sent to Peoria by Walsh for the express purpose of assuming the active management of the complainant Company for him.

The Coffey's, Farrelly, Robison, and Henebery, the stockholders, and operators of the old Gas Company, had parted with their holdings, selling their stock, in April, 1900, for over 400 per cent. of its face value. William McKinley, of Champaign, had become the President and dictator of the policy of the old Company. Macomber, its Treasurer, lived in Maine.

Mr. Little narrates the circumstances leading to and resulting in a combination of the two Companies on prices. He says, on July 31st, 1900, we made a change to gross rate $1.25 for light, 85 cents for fuel, 10 cents off if paid before the 10th day of the month. The old Company made the same rate at the same time.

The question was asked him, "What if any conferences were there between the officers of your Company and the officers of the old Company or any representation of the two Companies with reference to the advance in the rates on or about July 31st, 1900?"

He said, "We had a conference in Chicago. I was in Chicago and had a talk in the office of either the Chicago National Bank Building or the Equitable Trust Company." (Rec. p. 1350.)

I went over there and talked with Mr. Walsh, and I think Mr. McKinley, President of the old Company, was there.

When I came in the statement was made that the time had about come to stop carrying on an unprofitable business and the question arose as to what was fair and equitable rates; what we thought ought to be charged and the discussion was entirely on these lines. Mr. McKinley had had experience and been identified with a number of gas plants for several years. I don't remember who suggested the rate, whether I or Mr. McKinley. The general talk was on the advisability of making those rates and I don't remember who suggested the rates that were adopted. (Rec. pp. 1349-1358.)

Immediately following this interview or conference in Chicago the two Companies caused identical notices of the advance in the prices to be published in the newspapers of Peoria, as follows:

Gas for fuel, 75 cents net. Gas bills falling due September 1, will be rendered at the following rates:

For gas used for light $1.25 per thousand cubic feet.

For gas used for fuel, registered through a separate meter, 85 cents per thousand cubic feet.

Gas for fuel, 75 cents net. Gas bills falling due September 1, will be rendered at the following rates:

For gas used for light $1.25 per thousand cubic feet.

For gas used for fuel, registered through a separate meter, 85 cents per thousand cubic feet.

A discount of 10 cents per thousand cubic feet will be allowed on all bills paid before September 10, making the net rates:
Lighting gas, $1.15;
Fuel gas, 75 cents.

Customers now using gas for light and fuel, where only one meter is set on the premises, will please call at the office of the Company, and arrange for an additional meter.

PEORIA GAS LIGHT & COKE COMPANY,
127 N. Jefferson Avenue.

A discount of 10 cents per thousand cubic feet will be allowed on all bills paid before September 10, making the net rates:
Lighting gas, $1.15;
Fuel gas, 75 cents.

Customers now using gas for light and fuel, where only one meter is set on the premises, will please call at the office of the Company, and arrange for an additional meter.

PEORIA GAS & ELECTRIC COMPANY,
420 Main Street.

(Rec. p. 26.)

He says that the foregoing notices as set out in defendant's answer are correct and that they were published at the time in the papers.

He claims that the rate so far as the complainant was concerned was determined toward evening of the day of the Chicago conference, but pretends he does not know when the old Company arrived at the same conclusion. But there seems to have been a further conference at which Walton was present, for Little says that prior to the time he advanced complainant's rates he knew the Peoria Gas Light and Coke Co. was to make an advance; that this information came to him from Mr. Walton (Rec. p. 1350);

that he had talked the matter over with Mr. Miller and Mr. Clarke and the conclusion as to their price was fixed at that time; and that there was an understanding that the Peoria Gas Light and Coke Co. would increase its rates.

It appears therefore that there was a conference between the officers of these two companies in Chicago for the express purpose of agreeing or combining upon a rate.

It appears that the question was fully talked over and that either Little or McKinley suggested the rate.

It appears also that before Little put the rate in force, he knew the old Company was to advance its rate and that there was in fact an understanding that the old Company would advance its rate.

While Little had gone home from the conference in the evening and Walton and Walsh remained with McKinley, who represented the old Company, and no doubt the final determination of the rate was made, and then Little obtained his definite information from Walton, as he said he did, that the old Company was going to advance the rate also.

This rate could only have been the one suggested in the conference at Chicago and set forth in the published notices.

The advertisement or notice of this advance in rates, coming at the same time to the same papers, in the same words and punctuation, was no mere coincidence but conclusive evidence of the complete understanding and arrangement between the two companies to regulate and fix the price of gas.

This is as strong as circumstances are ever found to establish an unlawful combination short of a written contract.

Friendly and intimate relations from this time on existed between these companies, strongly indicative of the understanding which Little says had been arrived at between them as to prices.

The complainant Company soon commenced furnishing gas to some service pipes of the old Company on South Adams street in the city. Soon an exchange of communication took place between them by which the new Company agreed to furnish to the old Company from its factory all the gas the old Company required for its 4,500 or 5,000 customers at 75 cents per thousand. (Exh. 32, Rec. p. 1466).

Both companies however continued the mutual rate to their general customers.

Robb, the superintendent of distribution for the complainant Company and complainant's employees under him, thereafter looked after the mains, service pipes and meters of the old Company and made repairs thereon and received his orders in regard thereto from officers of the old Company, but received pay therefor only from the new Company.

Robb's Testimony, Rec. pp. 646-1378 to 1381.

The old Company, after the execution of the contract (Exh. 32), ceased to manufacture gas, although much of its plant had been rebuilt but a few months before.

McKinley made Eustice, the superintendent of manufacturing for the complainant Company, custodian of the manufacturing plant of the old Company and also directed him to tear down the retorts and sell them the best he could, leaving that entirely to Eustice. He received no pay from the old Company.

The execution of this contract (Exh. 32) was a mere afterthought. While the communication from the old Company to the new, asking for such an arrangement, was dated October 2nd, 1900, and the contract is said to have been entered into October 21st, 1900, they had their understanding long before that, for Robb says (Rec. pp. 1203-1204), that he had charge of the work, and under the direction of Mr. Little, in September, 1901, put in the main, 16 inches in size, 800 or 900 feet long, from the purifiers of the complainant Company to the station meter of the old Company for the purpose of delivering gas to the Peoria Gas Light and Coke Company.

The old Company was not going out of business. On the contrary, it continued to exercise its franchise and distribute gas to its customers and maintained its corporate organization in full force.

But it went out of the manufacturing business and became dependent on the complainant Company for its gas. This it would not and could not have done if there had not been an understanding and combination between these companies as to the price which should be charged the consumer.

It is true there was a provision in the contract by

which it could be terminated on six months' notice during the first two years of the ten years it had to run and that complainant claims it was terminated in 1902 and no more gas furnished under it.

But this was only after it became apparent the question of an unlawful combination was likely to embarrass the complainant. The two companies being operated under a common understanding, it was easy to procure the cancellation of it.

The old Company must still take its gas from the new Company, for it had directed Eustice to dismantle and sell its retorts. It had been reduced to such a condition that it would have to be rebuilt to manufacture gas. (Rec. pp. 1177-1178.)

It is to be noted also that there is no pretense of any change in the understanding as to rates at which both companies continued to furnish gas to their customers.

The foregoing facts and circumstances establish our contention that the complainant Company was guilty of entering into an unlawful combination or understanding with the old Company in violation of the Act of 1891, within the following rules:

"It makes no difference that the agreement for the "illegal combination is not a formal written agreement. It "may be a verbal agreement or understanding, or scheme "not embodied in writing but evidenced by the action of the "parties."

Harding vs. *American Glucose Co.*, 182 Ill., 617.

"A mere tacit understanding to work a common pur-"pose is all that is essential to a guilty, actionable combina-"tion. Individual intent by two or more persons to do an "unlawful act, or do a lawful act by unlawful means, is the "first step in that regard. Next follows concurrence be-"tween such individuals, not concurrence of action merely, "but concurrence of mental intent to effect the common "purpose, each to aid the others in that regard.

"Mutuality in the undertaking may be secured without "any express agreement and without a spoken or written "word between the conspirators or a meeting of the mem-"bers of the combine, or their even all knowing each other, "or the precise things to be accomplished or plans for its "accomplishment either in a general way or in detail, being "distinctly stated by any member of the combine to any "other member. If there is a meeting of minds, brought "about in any way to accomplish the common purpose, the "essentials of a guilty combination are all satisfied."

C. W. & V. Coal Co. vs. *The People*, 214 Ill., 453.

Patnode vs. *Westenhaver*, 114 Wis., 460.

"It does not matter that the understanding did not "amount to an absolute monopoly.

C. W. & V. Coal Co. vs. *The People*, 214 Ill., 452.

United States vs. *Knight*, 156 U. S., 1.

But further, while "The corporation as an entity may "not be able to create a trust or combination with itself, its "individual shareholders may, in controlling it, together

"with it, create such a trust or combination as will consti-
"tute it with them, alike guilty of an unlawful combina-
"tion."

Ford vs. *Chicago Milk Shippers Asso'n*, 155 Ill., 166-180.

Taking into view the way in which the complainant Company was formed and its stock manipulated; the fact that Miller and Clarke were mere adjuncts to Walsh in promoting the enterprise; that Walsh's name and connection was kept secret from all other subscribers until an ordinance and consent was obtained from the City; that the Peoria people were induced to become subscribers and directors for the purpose of obtaining more favorable action by the City; that the subscription of these Peoria people were obtained through erroneous impressions created by the promoters as to what the Company would do; that as soon as the privilege or grant was obtained from the City, Clarke assigned the bulk of the stock to Walsh; that it was understood, as Clarke says, among the promoters from the first that the Peoria parties could have one-third the stock and Walsh would take the rest. (Rec. pp. 1009-1010.) That no bona fide assessment was ever made on the stockholders for money to carry out the enterprise; that the only assessment ever made of 20 per cent. was repaid the subscribers with interest. (Rec. pp. 1405-1408-1409.)

That the plant in fact was built at an expense of $434,000 without resort to the capital stock for the means so to do; that Walsh was the capitalist of the promoters and already experienced in and connected with the organization of gas plants and business (Rec. pp. 1004-1005).

That as soon as operations commenced the Peoria directors were asked to step aside and Walsh, and Little and Walton, his personal confidants, were installed in their places. (Rec. pp. 1012-1017.) That the stock of all these parties was placed in the control of Clarke and Walsh as managers under a trust agreement, held by the Equitable Trust Company; that this was in pursuance of an understanding between the promoters when Walsh became interested, that the stock would be held as a unit and a continuity of management preserved during a period of years. (Rec. pp. 1405-1261.) That thus Clarke and Walsh secured the sole management of the gas business of this Company for a period of years; that thereafter no stockholders' meeting had been held; that the directors of the Company were not consulted about the business of the Company and only performed formal acts; it is a legitimate inference that a trust arrangement existed between the complainant Company itself and these two managers, Clarke and Walsh, who have by the trust agreement, a continuity of management of this gas business for a period of years to the exclusion of the Company itself by its board of directors; all tending to an unlawful combination to regulate and fix prices and create a monopoly in the gas business in violation of the Act of 1891.

Ford vs. *Chicago Milk Shippers Co.*, 155 Ill., 166.

In so far as the understanding and agreement between the two companies tends to restrain or prevent one of them from discharging its full duty to the public in the manufacture and distribution of gas, even if the restraint is but partial, and makes the one Company dependent on the

other for its supply of gas and enables them thus to maintain one uniform rate or price for both companies, it is against public policy and a violation of the statute, and unlawful.

"In the instance of business of this character it "presumably cannot be restrained to any extent whatever "without prejudice to the public interest al Courts decline "to enforce or sustain contracts imposing such restraint, "however partial, because in contravention of public policy."

Gibbs vs. *Baltimore Gas Co.*, 130 U. S., 396, 408, 409, 410.

The foregoing authorities show the construction placed by the Supreme Court of Illinois upon the Anti-Trust Act of 1891 in question. The cases of *Ford* vs. *Chicago Milk Shipper's Co.; Harding* vs. *American Glucose Co.*, and *Chicago, Wilmington & Vermillion Coal Co.* vs. *The People*, each involved a charge of violation of this statute and are directly in point.

From a consideration therefore of the foregoing facts as they appear of record, and the construction of the statute in question as above indicated, we submit that the trial Court was fully justified in his opinion when he said, "The "Illinois Anti-Trust Law, as construed by the Supreme "Court of Illinois, leaves no doubt in my mind that this "record shows, on the part of this complainant, a violation "of that Act in the manipulation of the stock of both com- "panies, the use of the mains of both companies; the per- "forming by complainant's servants of the business of both "companies; the simultaneous agreement of rates between

"officers of both companies, and the contract in evidence "between the two companies—all lead to the inevitable "conclusion that there was an understanding between com- "plainant and the old Company such as the Illinois Act "prohibits."

II.

This brings us to the final conclusion of the trial Court, that a Court of Justice "will not aid the complainant to reap the fruits of such unlawful combination."

The rates of the old Company of $1.00 and $1.25 had enabled it to maintain a surplus of $80,000 in April, 1900, and maintained the stock of $50.00 per share at the price of $218.35, which was actually received for it.

There was one thing in the way of restoring those rates and magnificent profits and that was the competition between the two companies. This competition was highly beneficial to the public, its maintenance for the common good. The public and the City had a direct interest therein.

If competition was removed, then the City had the right and power as shown above, for the common good and general welfare, to limit the charge to a reasonable rate.

While this suit is not for the enforcement of any of the provisions of the unlawful understanding or combination between the two corporations, it is in aid thereof, and to enable the complainant to reap the fruits thereof. They were bound under the law to take into account not only the understanding at which they might arrive as to the rate to be charged, but also the authority and power of the City to limit that rate.

Having arrived at an understanding and combination between themselves as to the rate, unlawful as such conduct was, they might have reaped the reward of their combination and advance of rates had it not been for the interest that the public has in their business and the power and authority of the public through the City to enforce respect for that interest by an ordinance regulating such rates.

The complainant must therefore avoid the effect of the acts of the City in asserting its power to limit the rates, in order to get the benefits of its unlawful combination.

The suit therefore seeking to enjoin the city from enforcing its ordinance is directly in aid of the performance of the unlawful combination, understanding or agreement and to enable it to obtain the fruits of its unlawful conduct.

But this Court has said, following the language of the Supreme Court of Massachusetts, that the rule of law is of universal operation, that none shall, by the aid of a Court of justice, obtain the fruits of an unlawful bargain.

Gibbs vs. *Baltimore Gas Co.*, 130 U. S., 396-412.
Citing *Russell* vs. *DeGrand*, 15 Mass., 35-39.

It is a maxim of equity that a complainant must come with clean hands to invoke the aid of the Chancellor.

It is a shock to the conscience and our sense of justice and right that a party who has been guilty of entering into an arrangement or agreement with another in direct violation of a prohibitory, penal law should call upon a Court of equity to stay the hand that has the right, the power and

the duty to prevent it from reaping the benefits of its unlawful conduct.

The Gibbs case, *supra*, illustrates this position. In that case the illegal or unlawful combination or agreement was, as in this case, between two gas companies to regulate and fix the rates to customers. In that case, as in this, such combination was prohibited by statute. The action was at law, not on the illegal contract, or to enforce any of its provisions, but to recover compensation, by one who had merely negotiated and assisted in bringing about the unlawful combination.

He was not seeking to recover the immediate fruits of the unlawful bargain, but compensation from one of the parties for bringing it about, and it was held he could not, recover.

If a Court of law makes such an answer in that case, equally emphatic must be the answer of a Court of equity in the present case.

It is true that the appellant insists that the City of Peoria had no power or authority under the statutes of Illinois to regulate the price or charges at which appellant should furnish gas to consumers, and that therefore the City had no interest in or concern with the action of the two companies in fixing rates.

We insist however in the first place that the appellant is in no better position to ask relief on the ground that the City had no power to regulate the charges than it is on the ground that the rates prescribed are so low that the ordinance is unreasonable.

The attempt to stay the power of the City to enforce the ordinance, no matter on which ground, was to enable the appellant to reap the fruits of the unlawful combination with the old Company.

But if the power of the City to enact an ordinance regulating appellant's charges for gas furnished to consumers, is important in this connection, then we insist that the appellant is estopped, by bringing its action in the Federal Court, to claim that the State had not delegated its power to the City.

If the appellant contends that the ordinance is void for want of power under the State law to enact it, then it raises a question depending for its solution on the laws of Illinois and does not involve a federal question. In such case the Federal Court would be without jurisdiction.

Mayor, etc. of Savannah vs. *Holst*, 65 C. C. A., 449-450.

Peoples Gas Light & Coke Co. vs. *Chicago*, 114 Fed. Rep., 384.

Peoples Gas Light & Coke Co. vs. *Chicago*, 194 U. S., 1-14.

To maintain its standing in this Court, the appellant must abandon its contention that the City had no power under the State law to adopt an ordinance regulating its rates.

But in any event, the City of Peoria under the laws of Illinois, had power to regulate by ordinance the price at which gas should be furnished to consumers, subject only

to the rule that obtains as to all ordinances, viz: that such ordinance must be reasonable.

The ordinance granting to the appellant the privilege of constructing and operating gas works and laying gas mains and pipes in the streets and distributing gas, did not fix the rate of charges to consumers. Nothing was contained in it on this question. There was no contract whatever between the City and appellant as to the scale of charges.

The ordinance is as follows:—

"*Be it ordained by the City Council of the City of Peoria:*

"SECTION 1. Subject to the terms and conditions of "this ordinance, there is hereby granted to the Peoples Gas "and Electric Company, a corporation created and existing "under and by virtue of the laws of the State of Illinois, its "successors and assigns, the right to construct, repair, "maintain and operate gas works in the City of Peoria, to-"gether with the right of way along, upon and under all "the avenues, streets, alleys, highways, and public places in "said city, for the purpose of placing, operating, repairing "and maintaining one or more lines of gas mains and pipes "and all necessary feeders, service pipes, branches, cutoffs "and manholes in connection therewith, for the distribution "of natural or manufactured gas for light, fuel, heat and "power purposes.

"SECTION 2. That in pursuance to the petition of the "owners of the land representing more than one-half of the "frontage on the streets, avenues, and public highways

"hereinafter named, the right and authority, is hereby "granted to said Peoples Gas and Electric Company, its "successors and assigns, to construct, lay and maintain gas "mains, pipes, branches, feeders, service pipes, cutoffs, and "manholes, in and under and along the following named "streets, avenues, and highways in the said City of Peoria, "Illinois, for the purpose of furnishing the said City and "the inhabitants thereof with gas for light, fuel, heat and "power, viz:

(Here follows the names of the streets and avenues, etc.)

"Also the right and authority to connect the same "with mains, pipes, feeders and service pipes that may be "laid and maintained in and along any other streets, "avenues and highways in said City for the purpose afore-"said.

"SECTION 3. Provides that the complainant Company "shall enter into a bond of a thousand dollars to protect the "City and all persons or corperations, damaged or injured "by reason of negligence, etc.

"SECTION 4. Provides that the Ordinance is granted "on condition that the Company shall within six months "from date of acceptance begin the construction of gas "works and within eighteen months of acceptance begin the "manufacture and supply of gas.

"And also that within thirty days from the passage of "the Ordinance, they will deposit with the City Treasurer, "the sum of Five Thousand ($5,000.00) Dollars security

"for compliance with the provisions of this Section, to be "returned when the Company shall have expended Fifty "Thousand ($50,000.00) Dollars in the purchase of "property, etc.

"SECTION 5. Provides that the Company shall lay "mains, etc., when required, under certain conditions, by "the City.

"SECTION 6. Specifies the regulation and conditions "under which streets may be opened for the purpose of lay-"ing service pipes and mains.

"SECTION 7. The rights and privileges hereby granted "by this Ordinance are granted for a term of ninety-nine "(99) years from and after the acceptance of this Ordinance.

"SECTION 8. Provides that it shall take effect from "and after its passage. Passed April 18th, 1899. (Rec. "pp. 5 to 12.)

The Commissioner or Special Master to whom this case was referred, in his conclusion of law found and reported under the foregoing ordinance and the statute hereinafter set out, as follows:

"The City of Peoria (defendant) has the right under "the law of the State of Illinois to pass ordinances regulat-"ing the maximum price to be charged for gas furnished "by complainant to its citizens, subject, however, to the "well established principle that such ordinances must be "reasonable." (Rec. p. 57.)

To this finding of the Master, the complainant

excepted, but the Court below did not pass upon this exception unless it was inferentially involved in the finding and decree which was entered.

The business of the complainant is materially benefited by the franchise granted it by the State and the privileges granted it by the City. The business itself is of a *quasi* public character.

By entering upon this business under the powers and privileges granted the complainants, its property became "affected with a public interest, and ceased to be *juris privati* only."

The complainant having devoted its property and business to a use in which the public has an interest, it in effect has granted to the public an interest in that use and must submit to be controlled by the public for the common good.

Munn vs. *People of Illinois*, 94 U. S., 113.

Gibbs vs. *Baltimore Gas Co.*, 130 U. S., 396-408.

New Orleans Gas Co. vs. *Louisiana Light Co.*, 115 U. S., 650-659-660.

People vs. *The Chicago Gas Trust Co.*, 130 Ill., 268.

Chicago Gas Light & Coke Co. vs. *Peoples Gas Light & Coke Co.*, 121 Ill., 530.

City of Danville vs. *Danville Water Co.*, 178 Ill., 299.

State, ex rel., vs. *Gas Co.*, 34 Ohio State, 512.

Zanesville vs. *Gas Light Co.*, 47 Ohio St., 1.

The State of Illinois, by statute, has delegated its police power to regulate its rates to the City of Peoria.

The Statute of Illinois then and still in force in regard to the powers of the City Council, provide as follows:

"SECTION 1. The City Council in Cities, and Presi-"dent and Board of Trustees in Villages shall have the "following powers:

* * * * * *

"Thirteenth. To regulate the openings therein "(streets) for the laying of gas or water mains and pipes "and the building and repairing of sewer, tunnels and "drains and erecting gas lights; *provided*, however, that "any Company heretofore organized under the general laws "of this State or any association of persons organized or "which may be hereafter organized for the purpose of "manufacturing illuminating gas to supply cities or villages "or the inhabitants thereof with the same, shall have the "right by consent of the Common Council (subject to "existing rights) to erect gas factories and lay down pipes "in the streets or alleys of any city or village in this State, "subject to such regulations as any such city or village "may by Ordinance impose. * * * * *

"Sixty-sixth: To regulate the police of the City or "village, and pass and enforce all necessary police Ordi-"nances."

Revised Statute of Illinois, Chap. 24, Art. 5.

The statute above set forth under the authority of which the City was acting in granting the complainant the

privileges contained in the ordinance vests in the City the most comprehensive police power, making all such grants of privilege to corporations for the purpose of erecting factories and laying mains on the streets or alleys, "Subject to such regulations as any such City or village may by ordinance impose."

These regulations must be such as is for the "common good." They clearly refer to such control as the State might exercise under its police power and this power by this statute is delegated to the City. The power to regulate rates of charge is one of these police powers.

Munn vs. *People*, 94 U. S., *supra*.

New Orleans Gas Co. vs. *Louisiana Light Co.*, 115 U. S., 656-659-660.

Owensboro vs. *Owensboro Water Works Co.*, 191 U. S., 308.

This power to regulate rates is a governmental power continuing in its nature, which if it can be bargained away at all can only be by words of positive grant and if any reasonable doubt exists in regard thereto it must be resolved in favor of the existence of such power.

Owensboro vs. *Owensboro Water Works Co.*, 191 U. S., 308-370.

Boston Beer Co. vs. *Massachusetts*, 97 U. S., 25.

It is to be noted that the statute first provides that such companies as the complainant may erect gas factories and lay down pipes in streets and alleys with the *consent of the Common Council* and then adds further that such acts shall be "subject to such *regulations* as any such City may

by ordinance impose," thus showing that the matter of *regulation* was something different and additional to the *consent* of the City and is to be distinguished from conditions imposed as part of the consent.

This power to regulate, being a power of government, continuing in its nature, it follows that it may be exercised from time to time by succeeding Councils, as the exigencies of the case require.

Railroad Commission Cases, 116 U. S., 307-325.

Not only is this power to regulate a continuing one, but, the grant of this power to the City is as broad as the police power of the State to regulate. This Court in construing similar language, where it was contended that the reservation by statute, to the General Assembly of the power to prescribe in the government of corporations, "Such regulations and provisions as it may deem advisable" was not intended the power "to interfere with the internal business management of the corporation itself," held the construction contended for was too narrow. The question was whether this language is broad enough to cover the act of the Legislature authorizing cities to regulate charges for water service, and it was held that it was.

Freeport Water Co. vs. *Freeport City*, 180 U. S., 587-596.

THE POWER OF THE CITY TO PASS AN ORDINANCE REGULATING RATES MAY BE PREDICATED ALSO ON CLAUSE SIXTY-SIX ABOVE SET OUT WHICH VESTS GENERAL POLICE POWERS OF THE STATE IN THE CITY.

It is true Justice Grosscup in the case of *Mills* vs. *City of Chicago, et al.*, 127 Fed. Rep., 731, held that this clause was intended only to authorize the cities to organize a police force in the nature of a constabulary.

But he failed to note the construction put upon this clause by the Supreme Court of the State, although in a former opinion in the case of *Peoples Gas Light & Coke Co.* vs. *Chicago*, 114 Fed. Rep., 384, he held that this was a question of State law; and this being so the construction of this statute by the State Court should be followed:

In a case before the Supreme Court of Illinois the question was whether the city had authority to pass an ordinance prohibiting the keeping open of a place of business on Sunday.

The only authority for such an ordinance was the general grant of police power contained in this subdivision 66 of Sec. 62 of Article 5 of the City and Village Act which authorized cities to "regulate the police of the city or village "and enforce all necessary police ordinances."

The Court said, "It is insisted this clause only refers "to the organization and regulation of a police force. We "think this is a too narrow construction—that the clause is "not limited in its application to police officers; *but may*

"extend to and embrace a subject matter of police regula-
"tion under the general police power of the State."

McPherson vs. *Village of Chebanse*, 114 Ill., 46-49.

The same Court in a late case said, "Paragraph 66 "confers upon cities power to regulate the police of the city "or village and pass and enforce all necessary police ordi- "nances. We held in the case of *McPherson* vs. *Village* "*of Chebanse*, 114 Ill., 46, that the power conferred under "this clause is not limited in its application to the organiza- "tion and regulation of a police force, but it is extended to "embrace the subject matter of police regulation under the "general police power of the State."

City of Chicago vs. *Gunning System*, 214 Ill., 628-634-635.

This police power of the State is "that inherent or "plenary power which enables the State to prohibit all "things hurtful to the comfort, safety and welfare of society "and may be termed "the law of overruling necessity." "Anything which is hurtful to the public interest is subject "to the police power and may be restrained or prohibited "in the exercise of that power. All rights, whether tenable "or untenable, are held subject to this power.

Chicago vs. *Gunning System*, 214 Ill., 635.

It is under this same police power as shown by cases above cited that the State has the right to regulate the rates of charges of public service corporations. The case at bar pointedly illustrates the statement that it is "the law of overruling necessity," for the two gas companies made an

unlawful combination, which stifled and suppressed competition and left the City and its citizens subject to the exactions of an absolute monopoly.

There was certainly in this situation an "overruling necessity" which called for the exercise of that general police power vested in the City by virtue of clause 66.

But if any doubt remained as to the power of the City to adopt and enforce the ordinance in question from a consideration of clause 13 or 66 alone, such doubt will be removed by a consideration of the two together.

"An ordinance may derive its validity from several "different grants of power, and not depend solely upon any "single section or clause of a statute."

Gundling vs. *City of Chicago*, 176 Ill., 340-347.

Chicago vs. *Gunning System*, 214 Ill., 628.

It certainly would be no strained construction to hold that the general police power applied to all subjects with which the City was authorized to deal. It was clearly authorized to deal with the matter of distributing gas by gas companies. The exercise of the general police power mentioned in clause 66 with reference to this subject would certainly include fixing rates and charges of the Company in making such distribution.

We contend therefore that the City had the power and authority to regulate the rates of complainant. That the City had a direct interest in the rates which complainant sought to establish by its combination or understanding with the old gas Company; that complainant by its bill is

seeking the aid of a Court of equity to enable it to carry out and reap the fruits of an unlawful understanding or arrangement with the Peoria Gas Light & Coke Co. in a matter in which the City had a direct interest and authority to act; that the object of the bill is against the policy of the law and was properly dismissed for want of equity.

III.

Was the Ordinance Reasonable?

Whether the rate fixed by the ordinance complained of was a reasonable one or not is a question of fact and its determination was rendered immaterial to the decision of the case by the view the trial Court took on the question of unlawful combination.

If the finding and decision of the trial Court is correct and the bill was properly dismissed for want of equity because it was in aid of an unlawful combination and to enable complainant to reap the fruit of its unlawful conduct, the inquiry as to whether the rate fixed by the ordinance is reasonable or unreasonable is likewise immaterial in this Court.

If, however, this Court should find that the trial Court had erred in its finding and decree, still this Court would not, as we understand the practice here, enter upon an examination of the record as to the reasonableness or unreasonableness of the rate because this question was not examined and passed upon in the trial Court.

The findings of the Special Master and the exceptions thereto on this question were not disposed of.

The Court expressly limited his determination to a finding as to the unlawful combination and a dismissal of the cause on this ground and none other.

To determine the question of the reasonableness of

the rate now would require the examination by this Court of a voluminous record, going into extended detail of the methods of manufacture, the expenses of equipment and operation; the elements taken into consideration by the various expert witnesses in determining the cost of manufacture and distribution of gas and thus entail upon the Court, labor that must consume a great deal of time.

Before this Court is called upon to do this it is entitled to have these questions passed upon by the trial Court. This view was expressed by this Court in a case involving a determination of the reasonableness of the rate fixed by railroad commissioners, and again in a case where was involved the reasonableness of the rate of charge fixed by ordinance for furnishing water by a water company; in the latter case the Court saying:

"The other contention made by appellee is that the "rates fixed by the City are unreasonable. Upon this "contention we shall not pass. It depends upon many "questions of fact and of values to which the Circuit Court "gave no attention and on which it expressed no judgment. "It is better for a trial Court to determine such questions "in the first instance.

Owensboro vs. *Owensboro Water Works Co.*, 191 U. S., 358-372.

Chicago, Milwaukee, etc., Ry. vs. *Tompkins*, 176 U. S., 167-179.

For the foregoing reasons we shall suggest on this question only a few things appearing in the record, showing that the City was not acting recklessly and without due

regard to the rights of the complainant in fixing the rate complained of.

From the facts heretofore pointed out the promoters and those immediately connected with the Companies organization made such representation to the City Council and to some who became subscribers to the stock that the City was justified in inferring that the complainant could manufacture and sell gas at 75 cents per thousand cubic feet and realize a fair profit on the actual investment.

It is to be noted also as a strong circumstance that the old Company which had for several years been furnishing gas at $1.25 net for light and 75 cents for fuel, had been able to pay 10 per cent. dividends and accumulate a large surplus; that for one year before the complainant had commenced actual operations the old Company had reduced its price still further and were selling light and fuel at an average of 87½ cents at the time the complainants commenced actual operations, and at the time the old Companies' stockholders sold out in April, 1900, to McKinley and his associates the old Company had a surplus of $80,000 and its stock sold at a premium, bringing $218.00 for each $50.00 share.

If on rates averaging 87½ cents to $1.00 per thousand such a surplus could be accumulated and maintained and its stock in the face of actual competition maintained at such a high premium, it would seem to any fair-minded person that 75 cents per thousand would give a fair profit on the actual investment.

Furthermore, Mr. Henebery and Mr. Robison, each of

whom had been for many years stockholders and directors of the old Company and intimately connected with its business, testify that in their opinion gas could be manufactured and sold in Peoria at 75 cents per thousand at a fair profit.

These conclusions and deductions of Mr. Robison and Mr. Henebery were estimates based on the earnings of the old Company, and on the basis of its business transacted. Robison had been director and president for twenty years prior to 1898, and Henebery director and treasurer for twenty-five years prior to April, 1900.

Much weight should attach to the opinions of these two witnesses, especially in the light of what Little, the manager for the complainant, said. He testified, "the "treasurer has known more about the cost of manufacture "even than I did or the officers of the Company." (Rec. p. 1342.)

If people who are handling the business part of gas enterprises give the matter study and attention enough I do not see why they could not acquire a reasonable, definite and accurate knowledge pertaining to the cost of gas production and distribution and the profits connected with it."

Frederick Egner, who is a gas engineer, with extended experience in England and Germany, as well as this country, and who was intimately acquainted with the plant and business of the Peoria Gas Light and Coke Company, says that the cost of manufacturing gas in Peoria is not to exceed 30 cents per thousand. (Rec. p. 1493.)

Thomas Lyttalis, a general gas engineer, with experience in England, Canada, and this country, says gas can be manufactured in Peoria at 30 cents per thousand, and allowing for leakage, wear and tear, it can be produced for 47.75 cents per thousand. (Rec. pp. 1566-1579.)

In determining what is a reasonable rate the stockholders of the complainant are not the only persons whose rights or interests are to be considered. The rights of the public are not to be ignored. As said by this Court in another case, "It is alleged here that the rates prescribed "are unreasonable and unjust to the Company and its "stockholders but that involves an inquiry as to what is "reasonable and just for the public.

Covington & L. Turnpike R. Co. vs. *Sandford*, 164 U. S., 578.

Even though the business is divided between two companies so that each has fewer consumers and therefore less profits this does not of itself justify raising the rate above what would be profitable if one company alone had the entire business.

Covington & L. Turnpike Co. vs. *Sandford, supra.*

The City of Peoria was consuming from 150,000,000 to 165,000,000 cubic feet of gas per year.

The estimates and calculation of the witnesses for the complainant are based upon the sale by the complainant Company of only one-third of this total consumption or a little over 50,000,000 per year. It is also admitted that it is much more expensive per thousand to furnish only 50,000,000 than 150,000,000.

The basis therefore of the conclusions of complainant's witnesses is wrong and their conclusions upon which the Master based his report are wrong.

It is further to be borne in mind that, the data from which complainant deduces its conclusions as to what is the cost of production is taken from the period when complainant was inaugurating a new plant and its customers few and its business necessarily more expensive than when it would become thoroughly established. (Rec. pp. 383-384-339.) Furthermore that all this data was made after the filing of the bill and is practically evidence made to order for the purpose of supporting the bill in this case. This is enough to cast doubt on all its estimates of the cost of production.

From Exhibit "43" we may find the amount of gas sold by the complainant Company during the month of September, 1901, also the value of the residuals and the amount of the operating expenses and in this way the cost of gas.

The gas sold was		4,186,200 cu. ft.
Total expenditures per month as per vouchers, including proportionate share of taxes and insurance		$4,441.45
Residuals made—coke	$1,252.45	
Breeze	20.70	
Retort carbon	15.85	
Tar	302.55	
Ammonia	102.57	
Total		$1,694.12
Balance being net cost of gas sold		$2,747.33
Cost per thousand cubic feet		65 6-10 cents.

It appears from this same operating statement, Exhibit "43," that for the year after complainant commenced furnishing all the gas for both companies making its entire output 152,000,000 cubic feet per year, it was able to manufacture this gas at the cost of 45 6-10 cents per thousand.

This shows that it is 20 cents per thousand cheaper to manufacture the entire output for the City than only one-third thereof and the Master's finding is in error on this question.

Complainant's operating statement shows that the cost per thousand on an annual production of 51,178,300 cubic feet the cost per thousand at the consumers' meter was 77 9-10 cents, while it clearly appears from the same statement as indicated above that the cost when producing 152,000,000 is 46 5-10 cents. By this comparison it appears manufacturing the entire output by one plant and one company would be 32 3-10 cents cheaper.

Whether the rate is a reasonable one should be determined, as we contend, on the authority above cited, by the cost of production of the entire output by one management; that is by the method it could be done cheapest. This only would properly conserve the rights of the public.

We now call attention to the estimates of complainant's witnesses. In answer to a hypothetical question they respectively testified as to the cost of producing gas on the basis of the output being 50,000,000 per year, as follows:

J. H. Eustice	Rec. p. 383	$ .80
E. G. Cowdery	Rec. pp. 338-339	.83
E. G. Pratt	Rec. p. 408	.85
I. N. Knapp	Rec. p. 554	.87
K. N. Mitchell	Rec. p. 520	.89
L. Kellogg	Rec. p. 536	.90
D. McDonald	Rec. p. 621	1.01

In the above testimony as to the cost no consideration was taken of the residuals. But the record discloses that on a basis of manufacturing 51,198,300 cubic feet the value of the residuals were $20,373, or .39.7 cents per thousand.

Deducting the value and amount realized from the residuals per thousand cubic feet, that is .39.7 cents, from the cost given by the foregoing witnesses, and we have as the net cost of production for each witness the following:

J. H. Eustice	$ .40.3
E. G. Cowdery	.43.3
E. G. Pratt	.45.3
I. N. Knapp	.47.3
K. N. Mitchell	.50.3
L. G. Kellogg	.61.3
Harvey W. Brown	.66.3

The average of these, about 50 cents per thousand as the fair net cost, would leave 25 cents per thousand as the profits which was realized under the rate fixed by the ordinance in question.

If the manufacture of the entire output by one plant would make this net cost 20 cents less, it would make the net cost 30 cents, the price at which both Companies reduced it when their competition was at its height.

The above figures explain why the old Company which

had two-thirds of the entire output in the beginning was willing to make three to five-year contracts at 50 cents per thousand. It would afford them a profit even at this figure.

There are also many elements improperly taken into consideration by complainant in estimating the cost of the production of gas, such as expense of litigation in this case, and other matters; an excessive profit on the money invested, viz: 10 per cent.; the allowance for depreciation without taking into account the increase in value of the plant and its earning capacity with the growth of the city which largely exceeds the estimated depreciation.

We insist as above suggested that a careful analysis of the testimony will show that the rate fixed is a reasonable one. But understanding from the cases cited that this question will not now be examined by this Court, we refrain from making a complete analysis of the evidence on this subject; as it would make this brief needlessly long and prolix.

We respectfully submit that for the reasons above indicated the decree of the Court below should be affirmed.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

CITY OF PEORIA.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS.

PETITION FOR LEAVE TO FILE A BRIEF ON BEHALF OF DARIUS O. MILLS.

To the Honorable the Chief Justice and Associate Justices of the Supreme Court of the United States:

Darius O. Mills, petitioner above named, who is not a party to the above entitled cause, but who, as party to another pending suit, has a large pecuniary interest in the question of the power of the city councils in the state of Illinois to fix by ordinance the price of gas furnished within the corporate limits of said cities, respectfully presents this his petition for leave to file a brief in the above entitled cause on said question of power, and, as grounds why his petition should be granted, respectfully shows to the court as follows:

That he is the complainant in another suit now pending in the Circuit Court of the United States for the northern district of Illinois, commenced July 6, 1903, wherein the city of Chicago and the People's Gas Light and Coke Company are defend-

ants, and wherein is involved the question of the power of the city council of the city of Chicago, under the laws of the state of Illinois, to fix the price of gas furnished within the corporate limits of the said city of Chicago, under an ordinance passed by the city council of said city on October 15, 1900, in all respects similar to the ordinance passed by the city council of the city of Peoria on September 4, 1900, under consideration in the case at bar.

That the power and authority of the city council of Peoria to pass said ordinance of September 4, 1900, is claimed by that city to have been conferred by section 1, article V of the City and Village Act of said state (1 Starr & C. Ann. Stat., 2d ed., pp. 689, 695, 707); and that the validity of the said ordinance of the city of Chicago is drawn in question in your petitioner's pending suit upon the ground that said statute does not confer any such power.

That in your petitioner's said suit against the city of Chicago and the People's Gas Light and Coke Company, now pending and undetermined, an injunction to restrain the city of Chicago from enforcing said ordinance because of its invalidity was granted by the Circuit Court of the United States for the northern district of Illinois, on the ground that no such power existed in the city council, and the court, by Grosscup, Circuit J., delivered an opinion holding such ordinance of the city of Chicago to be without authority and void, which will be found reported in 127 Fed. Rep. 731. The numerous authorities upon which such decision was based are cited in the brief presented herewith, which your petitioner is appre-

hensive may not otherwise be called to the attention of the court.

That the ordinance involved in your petitioner's said suit is the same ordinance considered by this court in the case of the *People's Gas Light and Coke Company* v. *City of Chicago*, 194 U. S. 1, in which case, although fully argued, the point of the power of the city council was not decided by the court because, among other things, it appeared that the bill in that suit had been dismissed without prejudice to another suit to test the question of power on the part of the city council of Chicago.

It is proper to add that since the commencement of your petitioner's suit the legislature of the state of Illinois, in 1905, has attempted to confer upon the city council of Chicago the express power to fix and regulate the price of gas, and that, in your petitioner's case as in the case at bar, no question is presented as to the validity of such subsequent legislation, the only point being that in September and October, 1900, no authority had been conferred by the legislature of the state of Illinois upon the city council of Chicago or the city council of Peoria to fix and regulate the price of gas.

All of which will more fully and at large appear in the proposed brief which is presented herewith.

NEW YORK, October 23, 1905.

CITY OF PEORIA, APPELLEE.

MOTION AND NOTICE.

JUDD & DETWEILER (INC.), PRINTERS, WASHINGTON, D. C. 19004

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1905.

No. 33.

PEORIA GAS AND ELECTRIC COMPANY, APPELLANT,

vs.

CITY OF PEORIA, APPELLEE.

Now come James Hamilton Lewis, corporation counsel of the city of Chicago, and Henry M. Ashton, special counsel for said city, and move that leave be granted them to file within fifteen days or within such time as shall be fixed by the court a reply to the brief filed in the above-named case by William D. Guthrie, counsel for Darius O. Mills.

JAS. HAMILTON LEWIS,
Corporation Counsel of City of Chicago.
HENRY M. ASHTON,
Special Counsel for City of Chicago.

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1905.

No. 33.

PEORIA GAS AND ELECTRIC COMPANY, APPELLANT,

vs.

CITY OF PEORIA, APPELLEE.

To Messrs. EDWARD C. RITSHER and WM. T. ABBOTT, Chicago, *Attorneys for Appellant;* Mr. WINSLOW EVANS, Peoria, *Attorney for Appellee;* Mr. WILLIAM D. GUTHRIE, New York, *Attorney for D. O. Mills:*

You are hereby notified that on Monday, the 6th day of November, 1905, at the opening of court on said day, or as soon thereafter as counsel can be heard, we shall move that leave be given James Hamilton Lewis, corporation counsel of the city of Chicago, and Henry M. Ashton, special counsel for the city of Chicago, to file, within fifteen days from said date or within such time as shall be fixed by the court a brief in reply to the brief filed by William D. Guthrie, as counsel for Darius O. Mills in said cause, and shall base said motion upon the affidavit of Henry M. Ashton, copies of which motion and affidavit are hereto attached.

JAS. HAMILTON LEWIS,
Corporation Counsel of City of Chicago.
HENRY M. ASHTON,
Special Counsel of City of Chicago.

STATE OF ILLINOIS, } ss.
County of Cook, }

Henry M. Ashton, being duly sworn, on oath states that on the second day of November, A. D. 1905, before 5 p. m. on said day, he served the above-described notice and copies of the motion and affidavit attached to said notice upon Messrs. Edward C. Ritsher and William T. Abbott, 152 Monroe street, Chicago; Mr. Winslow Evans, Peoria, Illinois, and Mr. William D. Guthrie, 52 Williams street, New York city, by depositing in the United States post-office in the city of Chicago, postage prepaid, and addressed to each of the attorneys above mentioned at their respective addresses, copies of the foregoing notice and of the motion and affidavit thereto attached.

HENRY M. ASHTON.

Subscribed and sworn to before me this 2d day of November, A. D. 1905.

[SEAL.] MARSHALL GALLION,
Notary Public.

IN THE SUPREME COURT OF THE UNITED STATES, OCTOBER TERM, 1905.

PEORIA GAS AND ELECTRIC COMPANY, *Appellant*,
vs.
CITY OF PEORIA, *Appellee.* } No. 33.

STATE OF ILLINOIS, } ss.
County of Cook, }

Henry M. Ashton, being first duly sworn, on oath states that he is the special counsel for the city of Chicago in the suit of Darius O. Mills *vs.* The City of Chicago and The People's Gas Light and Coke Company, now pending in the

circuit court of the United States for the northern district of Illinois, eastern division thereof.

This affiant further states that on the 30th day of October, 1905, William D. Guthrie, counsel for Darius O. Mills in the suit last mentioned and now pending in the said circuit court of the United States for the northern district of Illinois, eastern division, was granted leave by this court, as this affiant has been informed, to file and did file a brief covering some forty-four pages as a friend of the court and for the reason that the above-entitled cause involves the question as to whether the cities and villages in the State of Illinois had the power by ordinance to regulate the price of gas charged by them, and that the same question is involved in the said suit of Mills *vs.* The City of Chicago.

This affiant further states that neither himself nor the corporation counsel of the city of Chicago had any notice or knowledge until the 1st day of November, 1905, that said application had been made or granted, and this affiant states that the said city of Chicago has the same interest in being permitted to file a brief in this cause as did the said Darius O. Mills, and for that reason the motion of this affiant and the said James Hamilton Lewis, as attorneys for the city of Chicago, should be granted and they should be given leave, within fifteen days or within such time as may be fixed by the court, to file a reply to the brief of said William D. Guthrie.

HENRY M. ASHTON.

Subscribed and sworn to before me this 2d day of November, A. D. 1905.

PEORIA GAS AND ELECTRIC COMPANY, *Appellant*,

vs.

CITY OF PEORIA.

Appeal from the Circuit Court of the United States for the Northern District of Illinois.

BRIEF ON BEHALF OF DARIUS O. MILLS, PARTY TO ANOTHER PENDING CASE INVOLVING THE QUESTION OF POWER OF CITIES IN ILLINOIS TO FIX THE PRICE OF GAS.

WILLIAM D. GUTHRIE,
Of counsel for Darius O. Mills.

Washington, October 30, 1905.

[19,367]

SUPREME COURT OF THE UNITED STATES,

OCTOBER TERM, 1905.

No. 33.

PEORIA GAS AND ELECTRIC COMPANY, *Appellant*,

vs.

CITY OF PEORIA.

APPEAL FROM THE CIRCUIT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS

BRIEF ON BEHALF OF DARIUS O. MILLS, PARTY TO ANOTHER PENDING CASE INVOLVING THE QUESTION OF POWER OF CITIES IN ILLINOIS TO FIX THE PRICE OF GAS.

STATEMENT OF THE QUESTION PRESENTED.

The case at bar involves the validity of an ordinance of the city council of the city of Peoria, passed September 4, 1900, providing that "the maximum price of gas furnished the city of Peoria and its citizens and all consumers of gas therein, shall not exceed the sum of seventy-five cents (75 cts.) per thousand cubic feet"; prescribing the quality of gas so furnished, and imposing upon "any company, corporation, person or persons" who shall exact a greater sum "a penalty of not less than twenty-five ($25) dollars, nor more than two hundred ($200) dollars for each and every offense," and a similar penalty for each and every permanent removal of a meter from the premises of any

such consumer of gas who is willing to pay for the gas furnished him "the price established and fixed" therein (record, pp. 17, 48).

By an amendment to the bill of complaint, it was alleged "that the only power or authority vested in said city to pass such ordinance" was "the supposed authority granted to it by the legislature of the State of Illinois as contained in clause thirteen, sec. 1, art. V, chap. 24 of the Revised Statutes of Illinois, of the general incorporation act for cities, towns and villages in said State" (which clause is then set out in full in said amendment), and also "by virtue of the general police powers delegated to it by the legislature of the said State of Illinois" (record, pp. 32–33). The provisions thus alleged as the supposed basis of power and authority to pass the ordinance in question may be more conveniently referred to as subdivisions *thirteenth* and *sixty-sixth* of section 1, article V, of the City and Village Act, approved April 10, 1872, in force July 1, 1872 (1 Starr & C. Ann. Stat., 2d ed., pp. 689, 695, 707), which read as follows:

> "§ 1. The city council in cities, and president and the board of trustees in villages, shall have the following powers: . . .
>
> "*Thirteenth.*—To regulate the openings therein [in streets] for the laying of gas or water mains and pipes, and the building and repairing of sewers, tunnels and drains, and erecting gas lights: *Provided, however*, that any company heretofore organized under the general laws of this state, or any association of persons organized, or which may be hereafter organized for the purpose of manufacturing illuminating gas to supply cities or villages, or the inhabitants thereof, with the same, shall have the

right, by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."

"*Sixty-sixth.*—To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

The bill of complaint, among other things, prayed that "the said ordinance of September 4th, A. D. 1900, may be adjudged and delared invalid, null and void" (record, p. 20).

In the answer of the "City of Peoria to the bill of complaint as amended" (record, p. 32), it was alleged "that as to the allegation in said bill that said ordinance is void for want of power in the city council of said city to pass the same, respondent can neither admit nor deny such statement, but alleges that said ordinance was passed in good faith by said common council and in the belief that it had power to pass ordinances for the promotion of the welfare of the inhabitants of the said city and to prevent acts of wrong, injustice and extortion from being practised against said inhabitants" (record, p. 28).

The special master, to whom the cause was referred, concluded as a proposition of law that "the city of Peoria (defendant) has the right under the laws of the State of Illinois, to pass ordinances regulating the maximum price to be charged for gas furnished by complainant to its citizens" (record, p. 57, conclusion 4), and again, that "the state has conferred upon defendant the right, within its corporate boundaries, to lay out

streets, to regulate the use of the same, and to grant complainant the right to occupy the same for the purpose of laying its mains and connecting service pipes for the distribution of gas, subject, however, to such regulations as it might by ordinance impose" (record, p. 58, conclusion 9). The final conclusion, however, was that "the ordinance in controversy in this case is unreasonable in respect to the price as therein fixed," and that "the enforcement of its provisions against complainant would constitute the taking of the property of the complainant without due process of law" (record, pp. 61–62, conclusion 25).

The Circuit Court, however, while recognizing the existence of the questions "that the city council had no power to pass the ordinance, that the rate as fixed by the ordinance is unreasonably low," and "that its enforcement would deprive the complainant of its property without due process of law," declined to decide either of these questions because of its decision that the complainant, having entered into an illegal combination in violation of the Illinois anti-trust law (act approved June 11, 1891, in force July 1, 1891; L. of Ill. 1891, p. 206), the bill of complaint should be dismissed for want of equity and the injunction theretofore issued to prevent the enforcement of said ordinance should be dissolved (record, pp. 98, 140, 142, 144). The complainant thereupon appealed to this court, and the injunction was continued pending such appeal (record, pp. 143, 145).

The question of the power of the city council of the city of Peoria to enact the ordinance of September 4, 1900, under the provisions of law above set out, is, therefore, before the court, and, if the decision of the

Circuit Court dismissing the bill for want of equity, because of the complainant's alleged violation of the Illinois anti-trust statute, be not sustained, the questions decided by the master as to the power to enact the ordinance and as to its reasonableness will then be squarely presented. With the question of reasonableness this brief is not concerned. The question, however, of the power of city councils under the City and Village Act of 1872, to fix the price of gas, applies alike to the city councils of Chicago and of Peoria, and this brief is filed on behalf of Darius O. Mills, who is the complainant in a suit now pending in the Circuit Court of the United States for the northern district of Illinois, wherein the power of the city council of Chicago under the provisions of that statute to pass an ordinance on October 15, 1900, in all respects similar to the ordinance of the city council of Peoria, passed September 4, 1900, is drawn in question. The decision of Circuit Judge Grosscup on demurrer to the bill of complaint in such other pending suit is reported as *Mills* v. *City of Chicago*, 127 Fed. Rep. 731, and reference thereto will show that the ordinance there involved and the question of power to enact it are substantially identical with the ordinance and question of power in the case at bar, and that the court held that no such power had been delegated to the city council of Chicago.

Subsequently, in May, 1905, the legislature of Illinois expressly conferred upon the city council of the city of Chicago the power "to prescribe by ordinance maximum rates and charges for the supply of gas" (L. of Ill. 1905, p. 11[illegible]; see appendix to this brief).

As the ordinance in the case at bar is alleged to have been passed and adopted by the city council of the city of Peoria "under the supposed authority granted to it by the legislature of the state of Illinois as contained in" the statute above set out (record, p. 32), and as the answer of the city of Peoria "alleges that said ordinance was passed in good faith by said common council and in the belief that it had power to pass ordinances for the promotion of the welfare of the inhabitants of said city" (record, p. 28), and as the invalidity of said ordinance is claimed, not only because of the want of power in the city council under the laws of the state of Illinois, but also, because it is so unreasonable in its operation as to deprive the complainant of its property without due process of law and deny it the equal protection of the laws, in violation of the constitution of the United States (record, p. 19), which latter claim was sustained by the master to whom the cause was referred (record, pp. 60, 61, conclusions 18, 25), this is not a case where the jurisdiction is defeated because it proceeds alone upon the theory that the ordinance in question was void because it was not passed under legislative authority and hence was not action by the state of Illinois within the meaning of the Constitution (*Hamilton Gas Light Co.* v. *Hamilton City*, 146 U. S. 258, 265; *Barney* v. *City of New York*, 193 U. S. 430, 437). On the contrary, the case comes well within that class of cases where the jurisdiction is sustained because it appears that the defendant grounded its right to enact the ordinance in question upon supposed legislative authority which it assumed had been

delegated to it by the state in a designated act of the legislature, and which act, if construed as conferring the authority claimed, would violate rights secured by the Constitution. The master, as stated above, actually construed the statute as conferring the authority claimed and held that rights secured by the federal constitution had been violated (record, pp. 57, 58, 59, 61, conclusions 4, 9, 12, 18, 25). *Hamilton Gas Light Co.* v. *Hamilton City*, 146 U. S. 258, 265–266; *City Railway Co.* v. *Citizens' Railroad Co.*, 166 U. S. 557, 564; *Penn Mutual Life Insurance Co.* v. *Austin*, 168 U. S. 685, 694; *Walla Walla* v. *Walla Walla Water Co.*, 172 U. S. 1, 7–10; *St. Paul Gas Light Co.* v. *St. Paul*, 181 U. S. 142, 147–148; *Vicksburg Waterworks Co.* v. *Vicksburg*, 185 U. S. 65, 81–82; *Davis & Farnum Mfg. Co.* v. *Los Angeles*, 189 U. S. 207, 216–217; *Cleveland* v. *Cleveland City Ry. Co.*, 194 U. S. 517, 530–531; *Savannah, Thunderbolt, &c., Ry.* v. *Savannah*, 198 U. S. 392, 396.

In such a case, it is well settled, this court is not restricted to the consideration of the federal question, but acquires jurisdiction of the entire case and of all questions involved in it. *Field* v. *Barber Asphalt Co.*, 194 U. S. 618, 620–621; *Davis & Farnum Mfg. Co.* v. *Los Angeles*, 189 U. S. 207, 216; *Penn Mutual Life Insurance Co.* v. *Austin*, 168 U. S. 685, 695; *Scott* v. *Donald*, 165 U. S. 58, 73; *Press Publishing Co.* v. *Monroe*, 164 U. S. 105, 111; *Chappell* v. *United States*, 160 U. S. 499, 509; *Casey* v. *Houston, &c., Ry. Co.*, 150 U. S. 170, 181; *Horner* v. *United States*, 143 U. S. 570, 576–577.

I.

THE ESTABLISHED RULES OF STATUTORY CONSTRUCTION APPLICABLE TO THE POWERS OF MUNICIPAL CORPORATIONS.

In the case of *Barnett* v. *Dennison*, 145 U. S. 135, 139, Mr. Justice Brown, delivering the unanimous opinion of the court, said:

> "It is the settled doctrine of this court that municipal corporations are merely agents of the state governments for local purposes, and possess only such powers as are expressly given, or implied because essential to carry into effect such as are expressly granted."

This principle was reiterated in the strongest language in *Atkin* v. *Kansas*, 191 U. S. 207, 220.

And such is also the settled doctrine in Illinois. Thus in *City of Chicago* v. *Blair*, 149 Illinois, 310, 318, the Supreme Court of Illinois said that—

> "The tendency of municipal government to arrogate to itself power and to encroach upon the rights of the citizen has led to the establishment of the statutory rules of construction limiting its powers to those expressly granted, or arising, by reasonable and necessary implication, from the grant."

And in the recent case of *Coquard* v. *Village of Oquawka*, 192 Illinois, 355, 365 (1901), the court said:

> "This court, as well as the Supreme Court of the United States, has quoted with approval the rule laid down by Judge Dillon in his work on Municipal Corporations, that 'a municipal corporation possesses and can exercise the following powers and no others: First, those granted in express words; second, those necessarily or fairly implied in or incident to the powers expressly granted; third, those essential to the declared objects and purposes of the corporation

—not simply convenient, but indispensable' (*Cook County* v. *McCrea*, 93 Ill. 236; *Huesing* v. *City of Rock Island*, 128 *id.* 465; *Merrill* v. *Monticello*, *supra*[1].) 'Any reasonable doubt concerning the existence of power is resolved by the courts against the corporation, and the power is denied.' See, also, *Marsh* v. *Fulton*, 10 Wall. 676; *Ottawa* v. *Carey*, 108 U. S. 110; *Jonesboro* v. *Cairo*, 110 *id.* 192; *Kelly* v. *Milan*, 127 *id.* 139."

In *Kiel* v. *City of Chicago*, 176 Illinois, 137, 141, the court said:

"The power to pass an ordinance and impose a penalty for its violation is to be strictly construed, and is not to be extended, by implication, to persons or things not expressly within the terms of such power."

So, also, in *Smith* v. *McDowell*, 148 Illinois, 51, 62, the court said:

"These municipal corporations are instrumentalities of the state, exercising such powers as are conferred upon them in the government of the municipality. Their power is measured by the legislative grant, and they can exercise such powers only as are expressly granted, or are necessarily implied from the powers expressly conferred."

See, also, *Freeport Water Co.* v. *Freeport City*, 180 U. S. 587, 598; *Citizens' St. Ry.* v. *Detroit Railway*, 171 U. S. 48, 54; *Detroit Citizens' St. Ry. Co.* v. *City of Detroit*, 64 Fed. Rep. 628, 639; *Old Colony Trust Co.* v. *City of Atlanta*, 83 Fed. Rep. 39, 44, affirmed 88 Fed. Rep. 859; *Cleveland City Ry. Co.* v. *City of Cleveland*, 94 Fed. Rep. 385, 396, affirmed

[1] 138 U. S. 673, 681.

194 U. S. 517; *Laugel* v. *City of Bushnell*, 197 Illinois, 20, 27; *Town of Drummer* v. *Cox*, 165 Illinois, 648, 650; *City of Chicago*, v. *McCoy*, 136 Illinois, 344, 353; *Seeger* v. *Mueller*, 133 Illinois, 86, 94; *Emmons* v. *City of Lewistown*, 132 Illinois, 380, 384; *Huesing* v. *City of Rock Island*, 128 Illinois, 465, 477; *Lewisville Natural Gas Co.* v. *State*, 135 Indiana, 49, 51; *City of Noblesville* v. *Noblesville Gas, etc., Co.*, 157 Indiana, 162, 167; *Muncie Natural Gas Co.* v. *City of Muncie* (Ind. 1903), 66 N. E. 436, 438; *In re Pryor*, 55 Kansas, 724, 727; *City of St. Louis* v. *Bell Telephone Co.*, 96 Missouri, 623, 628; *Wabaska Electric Co.* v. *City of Wymore*, 60 Nebraska, 199, 202; *Schroeder* v. *Gas & Water Co.*, 20 Pa. Superior Ct. 255, 259; *Tacoma Gas & Electric Light Co.* v. *Tacoma*, 14 Washington, 288, 291; *State ex rel. Telephone Co.* v. *City of Sheboygan*, 111 Wisconsin, 23, 38.

It necessarily follows from these decisions that all doubts concerning the existence of power in a municipal corporation are to be resolved against it and in favor of the citizen, and that the presence of a fair and reasonable doubt is fatal to the existence of such power. *Minturn* v. *Larue*, 23 How. 435, 436; Dillon Municip. Corp., 4th ed. § 89; *Seeger* v. *Mueller*, 133 Illinois, 86, 94; *Emmons* v. *City of Lewistown*, 132 Illinois, 380, 384; *Coquard* v. *Village of Oquawka*, 192 Illinois, 355, 365; *Laugel* v. *City of Bushnell*, 197 Illinois, 20, 27; *Lewisville Natural Gas Co.* v. *State*, 135 Indiana, 49, 51; *Schroeder* v. *Gas & Water Co.*, 20 Pa. Superior Ct. 255, 259.

In the case of *Laugel* v. *City of Bushnell*, 197 Illinois, 20, 27, decided in June, 1902, since the adoption of the ordinance in question, the Supreme Court of Illinois used the following language:

> "The court [referring to the case of *Emmons* v. *City of Lewistown*, 132 Ill. 380, 384, *supra*], correctly remarked that to concede that it was doubtful whether the legislature had granted such power was to deny the existence of the power."

And in *Seeger* v. *Mueller*, 133 Illinois, 86, the court had said (p. 94):

> "Any fair, reasonable doubt concerning the existence of any power is resolved against the corporation, and the power is denied."

So, in *Interstate Com. Commission* v. *Railway Co.*, 167 U. S. 479, 494, this court in denying that Congress had empowered the Interstate Commerce Commission to fix transportation rates, among other things, said:

> "The question debated is whether it vested in the commission the power and the duty to fix rates; and the fact that this is a debatable question, and has been most strenuously and earnestly debated, is very persuasive that it did not. The grant of such a power is never to be implied."

And, in *City of Fort Scott* v. *W. G. Eads Brokerage Co.*, 117 Fed. Rep. 51, 54, the Circuit Court of Appeals for the eighth circuit, Sanborn, C. J., delivering the opinion of the court, among other things, said:

> "Municipal corporations are the creatures of the statutes under which they are organized and operated. By those statutes their powers are granted, measured and limited. Beyond the limits of the powers there expressly granted and those fairly im-

plied therefrom or incident thereto, they cannot lawfully act or agree to act, and a fair and reasonable doubt of the existence of a corporate power is fatal to its being."

In the light of these established principles, we may now analyze the statutory provisions relied on by the city of Peoria as conferring the power to fix or regulate the price of gas.

II.

APPLICATION OF THE ESTABLISHED PRINCIPLES OF CONSTRUCTION TO THE STATUTE UNDER CONSIDERATION.

It cannot be seriously contended that the City and Village Act of 1872 conferred the power to fix the maximum price of gas in express terms. The only claim is that the power may be implied as incident to the following powers expressly granted to city councils, viz.: (1) to provide for the erection of gas factories and the laying down of pipes, and (2) to regulate the police of the city and to pass and enforce all necessary police ordinances. The scheme of the act of 1872 is that of a general statute covering the incorporation of cities and villages and dealing in a comprehensive form with the powers to be exercised by them. Certain specific powers were delegated to the city council in cities, including the powers above stated, which are conferred in and by the *thirteenth* and *sixty-sixth* subdivisions of section 1, article V, of the City and Village Act of 1872, *supra* (1 Starr & C. Ann. Stat. 2d ed., pp. 689, 695, 707), as follows:

"§ 1. The city council in cities, and president and the board of trustees in villages, shall have the following powers: . . .

"*Thirteenth.*—To regulate the openings therein [in streets] for the laying of gas or water mains and pipes, and the building and repairing of sewers, tunnels and drains, and erecting gas lights: *Provided, however,* that any company heretofore organized under the general laws of this state, or any association of persons organized, or which may be hereafter organized for the purpose of manufacturing illuminating gas to supply cities or villages, or the inhabitants thereof, with the same, shall have the right, by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."

"*Sixty-sixth.*—To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

Aside from the fact that there is nothing in the language above quoted which would imply any intention to vest the important power of fixing and regulating the price of gas, an analysis of the City and Village Act of 1872 will show conclusively that the legislature did not intend to delegate to the city council the power to regulate the rates or prices of gas companies.

The statute expressly dealt with the subject of delegating to city councils the power to regulate the rates or charges of those engaged in various businesses, but it omitted any delegation of power to regulate the price or charges of gas. Thus, the express power was delegated to city councils—

1. "To fix the rate of wharfage and dockage" (Art. V, subdiv. 36).

2. "To prescribe the compensation" of hackmen,

omnibus drivers "and all others pursuing" like occupations (subdiv. 42).[1]

3. "To establish ferries, toll bridges, and license and regulate the same, and, from time to time, fix tolls thereon" (subdiv. 87).

4. "To authorize any person or private corporation to construct and maintain [water works] at such rates as may be fixed by ordinance" (Art. 10, subdiv. 1).

These provisions are found in the same statute of which other provisions are now claimed impliedly to authorize the fixing of the price of gas.[2] Indeed, they are all subdivisions of the same section which purports to enumerate the powers of cities and villages in the state,[3] except the provision as to waterworks, which will be found in a subsequent article of the same statute.[4]

In *pari materia* to these provisions expressly conferring municipal power to fix the rates of charge by individuals or private corporations for certain designated *quasi* public services, are also other statutes, namely, conferring power on any city or village to "fix the rates of toll" on bridges and ferries owned by it (L. of Ill. 1877, p. 61; 1 Starr & C. Ann. Stat., 2d ed., p. 818; L. of Ill. 1881, p. 57; L. of Ill. 1891, p. 72; 1 Starr & C. Ann. Stat., 2d ed., p. 819); authorizing cities, towns and villages owning and operating water-works to "assess and collect" such

[1] This has been construed to include street cars. *Union Traction Co.* v. *City of Chicago*, 199 Illinois, 484, 519.

[2] City and Village Act, L. 1871–1872, p. 218.

[3] § 1 of art. V, subds. 13th, 16th, 42nd, 66th, 87th, p. 227 *et seq.*

[4] § 1 of art. 10, p. 259.

"rates for the use and benefit of water" supplied by such waterworks as they "shall deem just and expedient" (L. of Ill. 1873, p. 191; 1 Starr & C. Ann. Stat., 2d ed., p. 864); providing that "the county board shall fix the rate of ferriage at each ferry" (R. S. of Ill. 1845, p. 253; R. S. of Ill. 1874, p. 531; 2 Starr & C. Ann. Stat., 2d ed., p. 1957), and shall also "fix the rates of toll" on toll bridges (R. S. of Ill. 1845, p. 253; R. S. of Ill. 1874, p. 1060; 3 Starr & C. Ann. Stat., 2 ed., p. 3904), and "fix from time to time such rates of toll to be charged" on toll roads "as may be deemed just and proper and for the public good" (L. of Ill. 1877, p. 211; 3 Starr & C. Ann. Stat., 2d ed., p. 3908); directing the board of railroad and warehouse commissioners to make "a schedule of reasonable maximum rates of charges for the transportation of passengers and freight and cars" on railroads doing business in the state (L. of Ill. 1873, p. 139; L. of Ill. 1873–1874, p. 129; L. of Ill. 1885, p. 232; 3 Starr & C. Ann. Stat., 2 ed., p. 3314); declaring that said board "shall, also, have power to fix the rate of charges for the inspection of grain" (L. of Ill. 1871–1872, p. 768; 3 Starr & C. Ann. Stat., 2d ed., p. 3322; L. of Ill. 1897, p. 301); and prescribing "the maximum charge for storage and handling of grain" (L. of Ill. 1871–1872, p. 769; L. of Ill. 1877, p. 170; 3 Starr & C. Ann. Stat., 2d ed., p. 3323.)

It, therefore, appears that the legislature was entirely familiar with the terms usually employed in conferring upon a municipality the power to fix rates and charges. Manifestly, if it had intended to confer power to fix the price of gas it would have done so when the subject of gas

was under consideration, by the use of the same exact and simple language deemed by it necessary for that purpose in the case of street cars, hackmen, wharves, docks, ferries, toll bridges, waterworks, railroads and grain elevators. As Mr. Justice Brewer said in *Interstate Com. Commission* v. *Railway Co.*, 167 U. S. 479, 495, speaking of the power to regulate rates:

> "The language by which the power is given had been so often used and was so familiar to the legislative mind and is capable of such definite and exact statement that no just rule of construction would tolerate a grant of such power by mere implication."

It is, therefore, reasonable to assume that the legislature deemed it necessary to confer the power to fix rates by express words, as it did in the case of street cars, hackmen, wharves, docks, ferries, toll bridges, waterworks, railroads and grain elevators and that its omission of any grant of such power in respect of gas and other public utilities is of conclusive significance, and precisely as if it had declared that it would not grant the power. The case of *City of Cairo* v. *Bross*, 101 Illinois, 475, 478, would seem to be exactly in point. The court, by Mr. Justice Mulkey, there said:

> "When the legislature, by the general incorporation act, declares that the corporate authorities of cities and villages organized and acting under its provisions shall have power to license certain occupations and kinds of business, specifically enumerating them, such declaration must, by a familiar canon of construction, be construed precisely as if the act in express terms inhibited the licensing of all trades and occupations not contained in the enumeration. In discussing this principle, the Supreme Court of

> the United States, in *Thomas* v. *West Jersey Railroad Co.*, 101 U. S. 82, says: 'Conceding the rule applicable to all statutes, that what is fairly implied is as much granted as what is expressed, it remains that the charter of a corporation is the measure of its powers, and that the enumeration of those powers implies the exclusion of all others.'"

In *C. & N. W. Ry. Co.* v. *City of Chicago*, 148 Illinois, 141, 159, the court quotes with approval the following from Endlich on Interpretation of Statutes, sec. 399:

> "Where there is in the same statute a particular enactment, and also a general one, which, in its most comprehensive sense, would include what is embraced in the former, the particular enactment must be operative, and the general enactment must be taken to affect only such cases within its general language as are not within the provisions of the particular enactment."

And in *Kiel* v. *City of Chicago*, 176 Illinois, 137, 140, the court expressly limited one of the very provisions now in question, namely, clause 66, conferring power to pass police ordinances, and said:

> "The powers conferred by the last two clauses are express powers specifically enumerated, and by a familiar canon of construction it will be presumed the act in express terms inhibited the licensing of all trades and occupations not contained in the enumeration. The principle is, that a power may be fairly implied as to police, but where a power is expressly enumerated in the charter of a corporation that is the measure thereof, and the enumeration of such power implies the exclusion of all others. *City of Cairo* v. *Bross*, 101 Ill. 475; *Huesing* v. *City of Rock Island*, 128 *id.* 465. Clause 66, having reference to authority to

pass police ordinances, does not extend the express power conferred by the provisions of clause 91."

The point now being discussed arose in *Tacoma Gas & Electric Light Co.* v. *Tacoma*, 14 Washington, 288, as to water and gas regulation, and the principle of construction so firmly established by the Illinois decisions was applied. It was held that no power existed in the municipality to fix the price of gas, the court, by Scott, J., saying (p. 293):

> "It is worthy of note that the legislature thus in two paragraphs relating to kindred subjects, expressly conferred the power to fix the price of water, and withheld it as to gas or other light, *thus limiting the power over purveyors of gas to 'regulation.'* . . . It is sufficient to say, however, that the legislature having passed a general law upon the particular subject, the power to fix such rates must be found therein, if at all."

So, in *City of St. Louis* v. *Bell Telephone Co.*, 96 Missouri, 623, 632, holding that the general police power to "regulate" telephones and telephone companies, did not include the power to fix maximum telephone rates, the court, by Black, J., said:

> "To say that under this general power the city may fix rates for telephone services would be going entirely too far. *This conclusion is manifest when we consider that the charter points out with particularity those cases in which the city may fix rates and charges.*"

Not only has the legislature thus by conferring power to fix rates other than gas rates expressed its intention to withhold the power to fix gas rates, but it has even more directly expressed that intention by its special action on the subject of gas rates in the act of June 5,

1897 (L. of Ill. 1897, p. 177) and in the act of May 18, 1905 (L. of Ill. 1905, p. 111).

This power over prices does not seem to meet any of the tests of implied powers (Dillon's Mun. Corps., sec. 89, already cited), but is a power which stands by itself, and may be granted or not as the legislature may see fit, being so essentially distinct from other powers that it cannot be granted by implication.

A.

AS TO SUBDIVISION THIRTEENTH OF SECTION 1, ARTICLE V, OF THE CITY AND VILLAGE ACT.

Subdivision *thirteenth* of section 1, of article V, of the City and Village Act of 1872 confers power "to regulate the openings" in streets, and makes the erection of gas factories and the laying down of pipes "in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."

Applying to this provision the settled rules of construction heretofore adverted to, it is clear that the legislature never intended thereby to delegate the power to fix the prices to be charged for gas. It was so construed by the Circuit Court of the United States for the northern district of Illinois in the case, now pending in that court, of *Mills* v. *City of Chicago*, 127 Fed. Rep. 731, where Circuit Judge Grosscup held that the city council of Chicago had no power to fix gas rates, and said (p. 734):

> "The chief claim of the city is based on the thirteenth section. The section reads as follows:
>
> "'To regulate the openings therein [in streets] for the laying of gas or water mains and pipes,

and the building and repairing of sewers, tunnels and drains and erecting gas lights: *Provided, however*, that any company heretofore organized under the general laws of this state, or any association of persons organized or which may be hereafter organized for the purpose of manufacturing illuminating gas to supply cities or villages, or the inhabitants thereof, with the same, shall have the right, by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose.'"

"Read as an entirety, the section clearly grants no general power to regulate rates. Thus treated, the last clause, 'subject to such regulations as any such city or village may by ordinance impose,' relates back to, and is limited by, the opening clause which is taken up solely in the regulation of openings in streets for the laying of gas or water pipes. But the court is asked, first, to divorce the proviso from the balance of the section, so that the proviso may stand as a section apart, and then to interpret the concluding clause as if the word 'regulations' was meant to include the rates at which gas should be manufactured and sold, as well as the manner in which the gas factories should be erected and the pipes laid. I do not feel myself at liberty to close my eyes to the proviso. Presumably it was meant to be read in connection with the whole section. But if I did, it would be unavailing. The context shows that the last clause was not intended to confer upon the city council plenary power to regulate rates, as well as the manner in which gas factories should be erected and pipes laid down. The mere laying of gas pipes, and the installation of gas plants, together with their repair, are the subject matter of a power widely separable in circumstance and in substance, from power

to deal with the rates at which gas shall be manufactured and sold. The first belongs naturally to the city whose streets are to be occupied, for it is related intimately with the supervision of streets; the latter, with equal reason, is foreign naturally to the city, for the city is one of the parties in interest; and power to regulate prices ought not, in the usual course of affairs, to go to a party interested. Until there is legislation, more unmistakable than the language used in this section, to indicate a purpose to grant the city power to fix rates, I shall not hold that such was the legislative intent. Unquestionably the power resides somewhere in the state, but until consciously delegated to some other body it remains in the state's general repository of power, the general assembly of the state.

"I may add that in this interpretation, I am but following the opinions of Mr. Francis Adams, Mr. Wm. G. Beale, Mr. C. S. Darrow, and Mr. John W. Green, rendered by them severally as corporation counsel, as also what I take to be the opinion of Mr. Walker, during his incumbency of that office."

The opinions referred to are printed at length in an official publication entitled "Opinions of the corporation counsel and assistants from January, 1872, to March, 1897," which was published in the latter year "by direction of the city council under the supervision of the corporation counsel," Mr. William G. Beale. These opinions, emanating from the legal department of the principal city of the state, the officers of which are charged with the duty of rendering such opinions, and upon the precise question, involving as well the power of the city of Peoria as that of the city of Chicago, are entitled to great consideration. Chicago Charter of 1863, c. III., § 7, L. 1863, p. 50; City and Village Act,

Art. VI., §§ 2, 3, L. 1871–1872, pp. 236, 237; Mun. Ord., 1881, p. 192, 1890, p. 428, 1897, vol. 1, p. 15; *People* v. *Kipley*, 171 Illinois, 44, 77; *People* v. *Fidelity and Casualty Co.*, 153 Illinois, 25, 39; *Potter* v. *Hall*, 189 U. S. 292, 298, 300; *Southern Pacific Railroad Co.* v. *Bell*, 183 U. S. 675, 682, 685; *Hewitt* v. *Schultz*, 180 U. S. 139, 156, 157.

The power conferred is the power of "regulation" in respect of the streets and alleys, and the power to fix rates of charge by public utility corporations using the streets or alleys is never to be implied as incident to such power of regulation.

In *St. Louis* v. *Western Union Telegraph Co.*, 149 U. S. 465, 471, it was pointed out that this power to fix rates was not incident to a power to regulate the use of streets, Mr. Justice Brewer saying:

> "The relation of a telephone or telegraph company to its patrons, after the use of the streets has been granted, does not affect the use, and power to regulate the use does not carry with it by implication power to regulate the dealings between the corporation having such use and its individual patrons."

In *City of St. Louis* v. *Bell Telephone Co.*, 96 Missouri, 623, 629, the court, by Black, J., said:

> "The city places some reliance on its general power to regulate the use of the streets. This power extends to new uses as they spring into existence from time to time, as well as to uses common and known at the time of the dedication or grant of the power to the municipal corporation. *Ferrenbach* v. *Turner*, 86 Mo. 416. The erection and maintenance of telephone poles is one of these new uses; and is a proper use of the streets. *Julia Building Ass'n* v. *Bell Telephone Co.*

88 Mo. 258. That the company is subject to reasonable regulations prescribed by the city, as to planting its poles and stringing its wires and the like, is obvious. Such regulations have been obeyed by this defendant.

"Conceding all this, we are at a loss to see what this power to regulate the use of the streets has to do with the power to fix telephone charges. The power to regulate the charges for telephone service is neither included in nor incidental to the power to regulate the use of streets, and the ordinance cannot be upheld on any such ground."

In the recent case of *State ex rel. Garner* v. *Missouri & K. Telephone Co.* (Missouri Supreme Court, June 1, 1905), 88 S. W. Rep. 41, a city charter had been framed under a constitutional grant of such power to the city "for its own government, consistent with and subject to the constitution and laws of this state," and under an enabling act of the legislature pursuant thereto authorizing the proposed charter "to provide for regulating and controlling the exercise by any person or corporation of any public franchise or privilege in any of the streets or public places of such city." The charter so framed contained an express provision authorizing the city to fix the maximum rates for telephone service, but it was held that this provision was unauthorized and void. Referring to the power of the city to frame a charter for its own government, the court said (p. 43):

"The regulation of prices to be charged by a corporation intrusted with a franchise of a public utility character is within the sovereign power of the state that grants the franchise or that suffers it to be exercised within its borders, and that power may be with

wisdom and propriety conferred on a municipal corporation; but it is not a power appertaining to the government of the city, and does not follow as an incident to a grant of power to frame a charter for a city government."

And, referring to the power given the city to regulate and control the use of the streets, the court said (p.44):

"Under the power the city may regulate the planting of poles, wires, etc., or require the wires to be put under ground, or do anything within reason to render the use of the street by the private corporation as little of injury to the public as may be. But the section does not confer on the city the power to regulate the prices to be charged by the telephone company for its service to the inhabitants of the city."

In *State* v. *Sheboygan*, 111 Wisconsin, 23, 38, 39, the court, by Bardeen, J., said:

"The fixing of maximum charges for use of telephones or service in the city is said to be a lawful police regulation to prevent extortion. This is based upon the assumption that the power of police control possessed by the city is unlimited. Such is not the fact. Such power is inherent in the state, and is a necessary attribute of sovereignty. . . . The power to regulate charges was not included in or incidental to the power to regulate the manner of using streets. There was not the remotest relation between them. The attempt of the city to justify its position on that ground must fail."

In the case of *In re Pryor*, 55 Kansas, 724, it was held that a municipality did not have the power to fix maximum gas rates under a general grant of power to regulate, and the court, by Martin, C. J., said (pp. 724, 728, 729):

"In certain cases the state may fix and regulate

the prices of commodities and the compensation for services, but this is a sovereign power, which may not be delegated to cities or subordinate subdivisions of the state, except in express terms or by necessary implication. . . . Under the section of our statute hereinbefore fully quoted, a gas or water company may lay its pipes and mains through the streets of a city only with the consent of the municipal authorities, and *under such regulations as they may prescribe*; but the regulations are only as to the laying of pipes and mains, and have nothing to do with the price of the gas or water passing through the pipes and supplied to consumers."

In *Old Colony Trust Co.* v. *City of Atlanta*, 83 Fed. Rep. 39 (affirmed 88 Fed. Rep. 859), District Judge Newman said (pp. 43, 44):

"First, the power of 'regulation' does not necessarily embrace the power to fix rates of charge. There are many matters for it to cover without embracing this latter power. The city unquestionably has the right, within any reasonable limit, to regulate the speed of cars and other matters connected with their movement on the streets; where poles shall be placed in the case of overhead wires; how wires shall be located, and their location with reference to other wires and the safety of the same; and to do many other things which might be noted with reference to the occupancy of the streets, protection to life and limb thereon, and all such matters as involve the safe and orderly use of the streets over which it has, under the legislature, full power and control. . . . We hold, moreover, that, before the city can exercise the power to fix rates of fare for a street-railroad company, it must obtain that power in express terms, or it must arise by necessary implication from the words used in the legislative act. The power of the state over the

> subject-matter need not be discussed. We are dealing with the power of a municipality, a creature of the legislature, which derives all its authority from the legislature, and can only act within the limits of the legislative grant."

In *Lewisville Natural Gas Co.* v. *State*, 135 Indiana, 49, 52, the court held that a legislative grant of authority to a municipality to provide "regulations for the safe supply, distribution and consumption of natural gas" did not confer power to fix the price of such gas, and unanimously overruled the contrary decision in *Rushville* v. *Rushville Natural Gas Co.*, 132 Indiana, 575, 584, rendered the year before by a divided court. In its opinion in the *Lewisville* case, the court quoted the rules of construction for the ascertainment of municipal powers as laid down by Judge Dillon and approved by the Supreme Court of Illinois in numerous cases (cited *supra*, p. 8, *et seq.*), and added (p. 52):

> "There is not a word or a syllable to be found in this act indicating that the general assembly had in view any other purpose than that of securing the safe supply and use of natural gas. To secure the safe supply and use of natural gas is one thing, and to fix the price at which gas shall be supplied is another and quite a different thing. In our opinion, it was not the intention of the general assembly to confer, by the act above set out, the power to regulate the price at which natural gas should be furnished. It follows that the conclusion reached in the case of the *City of Rushville* v. *Rushville Natural Gas Co.*, *supra*, was erroneous and should be overruled."

The *Lewisville* case has ever since been followed in Indiana without dissent; and the rule that the specific power to fix the price of gas is not to be in-

cluded in a general municipal power of regulation is firmly established in that state. *City of Noblesville* v. *Noblesville Gas, etc., Co.*, 157 Indiana, 162, 166; *Muncie Natural Gas Co.* v. *City of Muncie* (Ind. 1903), 66 N. E. 436, 438; *Rushville Nat. Gas Co.* v. *Morristown* (Ind. App. 1903), 66 N. E. 179, 181.

In *Schroeder* v. *Gas & Water Co.*, 20 Pa. Superior Ct. 255 (1902), statutory power of a city "to make ordinances, by-laws, rules and regulations, not inconsistent with the constitution and laws of the commonwealth, for the maintenance of the peace, good government and welfare of the city, and its trade, commerce and manufactures" (which power was said by the court to be "but a defined statement of the police power of any municipality") was held not to include the power to fix rates for water to be supplied by a water company.

To the same effect are *State ex rel. City of St. Louis* v. *Laclede Gas Light Co.*, 102 Missouri, 472, 486; *Wabaska Electric Co.* v. *City of Wymore*, 60 Nebraska, 199, 202; *Tacoma Gas & Electric Light Co.* v. *Tacoma*, 14 Washington, 288, 293; *Detroit Citizens' St. Ry. Co.* v. *City of Detroit*, 64 Fed. Rep. 628, 639; *Cleveland City Ry. Co.* v. *City of Cleveland*, 94 Fed. Rep. 385, 396, affirmed 194 U. S. 517. And a diligent search has failed to disclose the decision of any court to the contrary.

The case of *Commonwealth* v. *Gage*, 114 Massachusetts, 328, is not, as the head note may seem to indicate, authority for the proposition that municipal power to fix a maximum fare for the carriage of persons in hackney carriages may be derived from a simple grant of authority contained in the Massachusetts General Statutes, c. 29,

§ 14, "to make regulations for carriages." An examination of that section together with other authorities cited in the opinion, shows that there could have been no intention of basing the municipal power to fix the rates of hackney coachmen on that provision alone. The power which the city of Boston exercised had been expressly and unequivocally conferred upon it by statute, and this source of its power must have been in the mind of the court when its short opinion was rendered. The statute was probably so familiar to court and counsel that there was no occasion to refer to it at length in the opinion, and no question as to the sufficiency of municipal authority appears to have been raised or discussed. The section of the General Statutes referred to in the opinion (section 14 of c. 29) expressly recognizes as unimpaired "the right of a city to make by-laws relating to the same subject." The opinion also refers to *Commonwealth* v. *Stodder*, 2 Cush. 562, 574, and *Commonwealth* v. *Duane*, 98 Massachusetts, 1. In the latter case, the existence of sufficient municipal authority was assumed without reference to the statute conferring it. In the former case, however, the authority of the city to regulate hackney coachmen under the statute of 1796, c. 32, is cited, section 6 of which act reads in part as follows:

> "And be it further enacted, that a major part of the selectmen be authorized and empowered to make such rules and regulations, establishing the rates and prices to be paid for the carriage and conveyance of persons in said hackney coaches within the limits of the town of Boston, as they may from time to time judge reasonable, regard being had to the time and distance."

This power of the selectmen was not abrogated by the charter of the city of Boston (Mass. L. 1821, c. 110) enacted pursuant to the second article of amendment to the Massachusetts Constitution, adopted in 1820. On the contrary, section 13 of the charter expressly confirms and reinvests all of the pre-existing powers of the selectmen "in the mayor and aldermen, as hereby constituted, as fully and amply as if the same were herein specifically enumerated." The effect of the city charter was only to change the form, not the powers, of the city government. *Hill* v. *Boston*, 122 Massachusetts, 344, 356.

To avoid misunderstanding, it should be emphasized that the power here referred to is a power to *regulate* charges, *i. e.*, to establish at any time what they shall be, or what they shall not exceed. This is totally distinct from a power to fix charges as a condition of the grant of the right to occupy or tear up the streets, or to prosecute any business within the municipal limits. Where a municipality has exclusive control over its streets, it may grant rights in them upon such reasonable terms as it may see fit, including a limitation on the charges which the party using the streets may require the public to pay for the services rendered. Such a limitation of charges is merely an exercise of the contractual powers of a municipality, and has nothing whatever to do with its police power, or with any power analogous thereto. *People* v. *Suburban R. R. Co.*, 178 Illinois, 594, 604; *People's Gas Light & Coke Co.* v. *Hale*, 94 Ill. App. 406, 420; *Freeport Water Co.* v. *Freeport City*, 180 U. S. 587, 593, 598; *Decatur Gas Light Co.* v. *City of Decatur*, 120 Illinois, 67, 68.

The decisions in *Union Traction Co.* v. *City of Chicago*, 199 Illinois, 484, and the *Water* cases, so-called (*City of Danville* v. *Danville Water Co.*, 178 Illinois, 299; 180 Illinois, 235; 186 Illinois, 326; 180 U. S. 619; *Rogers Park Water Co.* v. *Fergus*, 178 Illinois, 571; 180 U. S. 624; *Freeport Water Co.* v. *Freeport*, 186 Illinois, 179; 180 U. S. 587), also tend strongly to sustain the proposition that the city has no such power of regulation as is claimed in the case at bar. In the *Traction* case, it was held that two subdivisions of the same section of the City and Village Act conferring power (*forty-second*) "to license, tax and *regulate* hackmen, draymen, omnibus drivers, carters, cabmen, porters, expressmen, and all others pursuing like occupations, *and to prescribe their compensation*," and (*ninety-sixth*) "to pass all ordinances, rules, and make all regulations proper or necessary to carry into effect the powers granted," conferred authority to fix maximum street car fares. A careful consideration of the statutory provisions involved in that case will show that the legislature fully understood the limited scope of a general municipal power to *regulate* and clearly expressed its intention that such power should have only limited scope and should not include the power to fix maximum charges. This is apparent when it is appreciated that, after conferring the general powers "to license, tax and *regulate*," the legislature, in order to confer power to fix charges, deemed it necessary to add the words, "*and to prescribe their compensation*."

In the *Water* cases, it was held, among other things, that section 1 of article 10 of the City and Village Act

(1 Starr & C. Ann. Stat., 2d ed., p. 786) conferring municipal power "to authorize any person or private corporation to construct and maintain the same [water works] *at such rates as may be fixed by ordinance*, and for a period not exceeding thirty years," was sufficient to authorize the fixing of maximum water rates by various municipalities throughout the state. The decision on this point in each case was based solely upon the plain expression, "such *rates* as may be fixed by ordinance," certainly not upon any implication from the general power to regulate water works and water companies or to pass and enforce police ordinances found elsewhere in the same statute. 178 Illinois, 311–312; 180 U. S. 587, 593, 601.

B.

AS TO THE SIXTY-SIXTH SUBDIVISION OF SECTION 1, ARTICLE V, OF THE CITY AND VILLAGE ACT.

Subdivision *sixty-sixth* of section 1, article V, of the City and Village Act of 1872, confers power—

> "To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

It would surely be an extraordinary stretch of language to hold that this general grant to the city council of power to regulate the police of a city and to pass and enforce necessary police ordinances was intended by the legislature to invest the city council with the governmental or legislative power to regulate rates. The statute does not delegate to the city council general police power but simply power to pass and enforce "necessary police ordinances." There must needs be a vast difference between a grant of power to regulate the police of a city or village and to pass police ordinances,

and a delegation of the police power of a state. Speaking of the latter, Mr. Justice Harlan said, in *New Orleans Gas Co.* v. *Louisiana Light Co.*, 115 U. S. 650, 661: "In its broadest sense, as sometimes defined, it includes all legislation and almost every function of civil government."

In the pending case of *Mills* v. *City of Chicago*, 127 Fed. Rep. 731, where the court decided the precise question now under consideration, Circuit Judge Grosscup said (p. 734):

> "It is plain to me that the sixty-sixth section, while granting power to regulate the police of the city or village, cannot be enlarged to include power to regulate the prices of gas. The power delegated by the state to the city is not the police power of the state. To so construe it would be to invest the city with nearly all the powers of the state—make the city practically a state by itself. Such manifestly was not the purpose of the section."

The consequence of now holding that a grant of power to pass and enforce all "necessary police ordinances" included a power to regulate the price of gas, water, telephones, electric lights, warehousemen, etc., etc., would be a great deal more than merely sustaining this particular ordinance. It would necessarily involve holding that the provision quoted was intended to grant to the smallest village as well as to the largest city unlimited police power, as absolute as that of the state itself, according to the broadest view of police power that has ever been taken; for, if the phrase "necessary police ordinances" covers the regulation of the price of gas, it must also cover not merely the

regulation of prices for all other public services, but the regulation of all other acts except those relating to taxation and finance. In fact, if clause 66 could receive the interpretation now contended for by the city, all but four or five of the other ninety-five clauses in article V would be superfluous. In order to sustain the city's contention, a rule of statutory construction hitherto unknown in jurisprudence must be formulated and declared.

It must be clearly evident to the court, as the only reasonable and true construction, that the legislature simply intended to confer upon the municipalities of the state the power to regulate their local police or constabulary, as it is termed in England, and to pass such necessary police ordinances as are appropriate or adequate to protect the public morals, the public health and the public safety and to promote the good order and peace of the community.[1]

The saying is, indeed, trite that most of the confusion in the law results from the use of inappropriate or indefinite terminology. It would obviously tend to avoid much confusion if the term, "police power" were confined and limited to those restraints upon private rights and liberties or to those punishments which the morals, health, or peace of the community may require, and if other legislative enactments, such as the regulation of the rates of public carriers, warehousemen and those

[1] 4 Blackstone Com. 162; Bentham's General View of Public Offenses (Edinborough ed. of Works, Part IX, p. 157); *Wilkie* v. *City of Chicago*, 188 Illinois, 444, 450–451; *Wice* v. *C. & N. W. Ry. Co.*, 193 Illinois, 351, 353.

engaged in more or less public occupations, were embraced within the term "general governmental or legislative powers." Rules observed by the courts in construing statutes relating to public health, morals, or peace, have no application whatever to many statutes relating to the use of property, the carrying on of trade or business, etc. For example, it has been repeatedly held that the right to exercise the police power cannot be parted with by the legislature because "no legislature can bargain away the public health or the public morals."[1] Yet, a legislature could clearly grant to a railroad, gas, or water company the right to charge fixed rates, and such a grant, duly accepted and based on consideration, would be held to be a contract protected by the federal constitution. Nevertheless, it could be suggested, as we have seen above, that such a grant would be a bargaining away of the police power, because the right to regulate charges has been said to be embraced within the police power. Many other examples might be given to illustrate that the loose use of the term "police power" is misleading, that this term should be confined to statutes or regulations affecting the public health, morals, or safety, and that other subjects of legislation, such as the regulation of rates, should be recognized as coming within the scope of those general governmental powers which are inherent in the legislative branch of our form of republican government. A classification of this kind would simplify the consideration of many cases, and would avoid much apparent conflict. Rules which are wise and necessary in construing police

[1] *Stone* v. *Mississippi*, 101 U. S. 814, 819.

power in the narrower sense indicated, would then be recognized at once to be not at all applicable to the discussion of other governmental powers.

Professor Thayer, in a note to his work "Cases on Constitutional Law," part II, 693, comments on the misuse of the term "police power," and, among other things, says:

> "Discussions of what is called the 'police power' are often uninstructive from a lack of discrimination. It is common to recognize that the subject is hardly susceptible of definition, but very often, indeed, it is not perceived that the real question in hand is that grave, difficult, and fundamental matter,—what are the limits of legislative power in general? . . . But often, the discussion turns upon the true limits and scope of legislative power in general,—in whatever way it may seek to promote the general welfare."

So, also, in *Lake Shore & Mich. South. Railway* v. *Ohio*, 173 U. S. 285, 297, Mr. Justice Harlan said:

> "It may be that such legislation is not within the 'police power' of a state, as those words have been sometimes, although inaccurately, used. But in our opinion the power, whether called police, governmental or legislative, exists in each state, by appropriate enactments not forbidden by its own constitution or by the Constitution of the United States, to regulate the relative rights and duties of all persons and corporations within its jurisdiction, and therefore to provide for the public convenience and the public good."

And in the late case of *Knoxville Water Co.* v. *Knoxville*, 189 U. S. 434, 437, Mr. Justice Holmes, delivering the opinion of the court, said that it was "unnecessary

to consider whether the regulation of water rates is properly to be classed as a police power."

The court has not yet been called upon to differentiate "police powers" from "general governmental powers," but it cannot be doubted that when an appropriate case requires it to pass upon the subject, it will make the distinction and point out that the term "police power" should be confined to the narrower sense which we have indicated.

But the police power of a municipality is clearly something very much more limited than that of a state. A municipality has no powers inherent in sovereignty. Its police power is just as strictly limited by its charter as is any of its other powers. In fact, the broader the view taken of the inherent police power of a state, the more strikingly it contrasts with the limited and derivative police power of a municipality. No state, it is safe to say, has ever made a general grant to any municipality of such police power as the state itself possesses, to be exercised, within the corporate limits, as fully as the state could exercise it. On the contrary, such police power as is granted is always a restricted power, in some states broader and in others narrower, but always limited to what the legislature may regard as the needs of the municipality and its inhabitants. Hence Judge Dillon, in referring to municipal police power in general, does not treat it as a comprehensive power, granted as such, but merely as the aggregate of such particular powers as the legislature has seen fit to grant in regard to matters of police. He says: "Many of the powers exercised by municipalities fall within what is known as

the *police power* of the state, and are delegated to them to be exercised for the public good. Of this nature is the authority to suppress nuisances, preserve health, prevent fires, to regulate the use and storing of dangerous articles, to establish and control markets, and the like." (Dillon's Mun. Corps., sec. 141.)

In *Wilkie* v. *Chicago*, 188 Illinois, 444, 450, the city had passed an ordinance requiring each master plumber to pay a license fee of thirty dollars a year and imposing penalties for performing any plumbing work without taking out such license. The legislature had also prescribed certain conditions upon which plumbers might exercise their calling. A bill was filed to enjoin the enforcement of the ordinance, and the Supreme Court said:

> "A city has no inherent power to license any occupation or to exact a license fee from any person. The power to do so must be found in its charter, and it must be either expressly given or be a necessary incident to the carrying out of a power so granted. The power must be plainly and unmistakably authorized by the legislature. In this case, the power to enact sections 1415 and 1421 is claimed by virtue of clause 66 of section 1 of article 5 of the act for the incorporation of cities and villages, which gives the city council power 'to regulate the police of the city or village, and pass and enforce all necessary police ordinances,' and clause 78 of the same section, which authorizes the council 'to do all acts, make all regulations which may be necessary or expedient for the promotion of health or the suppression of disease.' If a city council attempts to exercise the powers so conferred, it is, of course, necessary that there should be some substantial relation between the means employed and the end authorized by the charter. *An ordinance passed in fulfillment of the objects embraced within the provisions*

in question must have some tendency to promote the public health, morals, security, comfort and welfare or to suppress disease. So far as this record shows, there was no connection whatever between the ordaining by the city council of sections 1415 and 1421 and the police power or the promotion of health or the suppression of disease. The bill to which the demurrer was interposed sets out the sections already quoted, and they are the only ones before us. The requirement of a license, with the exaction of a license fee, may be a proper and convenient means of regulating the business, but if there was any provision of the ordinance, in connection with the license under section 1415, designed to promote health or suppress disease, or coming within the exercise of the police power, it does not appear. Manifestly, it does not improve the health of the public or suppress disease to collect $30 from a plumber.

"There is no more relation between the public health and the collection of $30 from a person engaged in plumbing than there would be from a person engaged in any other business or occupation which in no way affects the public health. So far as the record shows, the city has done nothing except make a demand for $30 per year from each plumber, and there is not a trace of regulation for the public health or comfort or suppression of disease in the provision. As a mere exaction of money could not have the slightest tendency toward the ends contemplated by the clauses of the charter relied upon, the demurrer could not be sustained on the ground that such exaction was an exercise of the powers conferred by such clauses. The city has no power to tax the occupation of plumber, and does not claim to have such power."

This case is particularly instructive, because it demonstrates that the power to pass police ordinances is al-

ways confined within narrow limits and does not include the governmental power to regulate rates or license occupations. Otherwise, the court would have held that the power to pass police ordinances, if commensurate with what is usually the police power of the state, would necessarily have included the power to license plumbers or any other occupation.

So, also, the power granted by the City and Village Act to enact and enforce all necessary police ordinances (the very power under which the ordinance now in question was attempted to be passed) was held in the case of *Wise* v. *C. & N. W. Ry. Co.*, 193 Illinois, 351, 353, not to authorize an ordinance forbidding passengers from getting on or off trains in motion, unless permitted by those in charge, a regulation which, no one would doubt, was within the police power of the legislature. In that case, the court said:

> "Clause 66 of paragraph 62, article 5, of the act for the incorporation of cities and villages, provides that the city council shall have power 'to regulate the police of the city and pass and enforce all necessary police ordinances.' This is the provision of the statute relied on as conferring power on the city to pass the ordinance, and it can be sustained, if at all, only under the police power conferred on the city by this provision of its charter. In *Culver* v. *City of Streator*, 130 Ill. 238, in defining the police power, we said (p. 243): 'That power may be defined, in general terms, as comprehending the making and enforcement of all such laws, ordinances and regulations as pertain to the comfort, safety, health, convenience, good order and welfare of the public.' This definition is certainly broad enough to cover all the power the city had to pass the ordinance. The provision of the general in-

> corporation act is a delegation by the general assembly to the city of Chicago of police power to pass and enforce all necessary police ordinances—that is, ordinances necessary for the comfort, safety, health, convenience, good order and welfare of its inhabitants. . . . It is difficult to conceive of the necessity, as a police regulation, for such an ordinance, and it is only necessary police ordinances that the city is authorized to pass. True, by the word 'necessary,' 'indispensable' was not meant, but only such ordinances as would be conducive to, or beneficial or effective in, the promotion of the comfort, safety, health, convenience, good order, or general welfare of the municipal public."

See also *Kiel* v. *City of Chicago*, 176 Illinois, 137, 141; *Huesing* v. *City of Rock Island*, 128 Illinois, 465, 477.

Illustrations such as the above might be multiplied, but it must be sufficiently clear that the police powers of municipal corporations are not unlimited, and that no attempt to exercise municipal police powers can be upheld by a court unless it be clearly shown to have been authorized by the legislature.

In *State* v. *Sheboygan*, 111 Wisconsin, 23, it was contended that the fixing of maximum charges for the use of telephones in the city was a lawful police regulation to prevent extortion. The court said (p. 38):

> "This [contention] is based upon the assumption that the power of police control possessed by the city is unlimited. Such is not the fact. *Such power* is inherent in the state, and is a necessary attribute of sovereignty. It does not pass to the minor divisions of government except by express grant or by necessary implication from other powers granted."

So, in *In re Pryor*, 55 Kansas, 724, 728, it was said:

> "In certain cases the state may fix and regulate the prices of commodities and the compensation for services, but this is *a sovereign power*, which may not be delegated to cities or subordinate subdivisions of the state, except in express terms or by necessary implication."

It may even be questioned whether the words "or by necessary implication" do not go too far. No instance of any grant of such a power by implication was referred to, and none has been found after the most painstaking research.

See the very recent case of *State ex rel. Garner* v. *Missouri & K. Telephone Co.* (Missouri Sup. Ct., June 1, 1905), 88 S. W. Rep. 41, 43.

Upon this point it need only be added that if the language of clause 66 above quoted is so comprehensive as to include all the police powers which the legislature itself, as the sovereign legislative body, could exercise, most of the cases decided in Illinois in limitation of the powers of municipal corporations were entirely erroneous. The cases cited from the courts of Illinois, holding that particular powers did not exist in municipalities, related to matters which were clearly within the general police power of a legislature, if we use that term in its broadest sense. In each case, the power existed, as it exists in almost every municipality in the country, to adopt police ordinances, but until very recently the view has never been seriously advanced that the grant of the power to regulate the police or constabulary of a city or village and to pass necessary police ordinances

was commensurate with the governmental police power of the state itself.

CONCLUSION.

For these reasons, it is submitted that the city council of Peoria did not in 1900 possess the power to fix and regulate the price of gas.

WASHINGTON, October 30, 1905.

WILLIAM D. GUTHRIE,
Of counsel for Darius O. Mills.

APPENDIX.

(L. of Ill. 1905, p. 110.)

An Act to confer upon the city of Chicago the power and authority to sell surplus electricity and to fix the rates and charges for the supply of gas and electricity for power, heating and lighting furnished by any individual, company or corporation to said city of Chicago and the inhabitants thereof.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:*

That upon the adoption of this act in the manner hereinafter provided the city of Chicago shall have the power and authority to sell surplus electricity for heat, light and power within the corporate limits of said city, and is hereby empowered to prescribe by ordinance maximum rates and charges for the supply of gas and electricity for power, heating and lighting furnished by any individual, company or corporation to such city and the inhabitants thereof. Such rates and charges to be just and reasonable and may be fixed for a period not exceeding five years and in case the corporate authorities of any such city shall fix unjust and unreasonable rates and charges, the same may be reviewed and determined by the circuit court of the county in which said city is situated: *Provided*, that nothing in this act contained shall be construed as enlarging the powers now conferred by law upon said city to own, construct or acquire electric lighting plants, or as permitting said city to sell electricity so long as the same is needed for light, heat and power for municipal purposes.

§ 2. This act shall not be in force until the question of its adoption shall first have been submitted to the electors of such city and approved by a majority of those voting thereon. The city council of the city of Chicago may direct by ordinance that the question of the adoption of this act by the city of Chicago, be submitted to popular

vote at any general, city or special election in and for the entire city coming not sooner than thirty (30) days from and after the passage of such ordinance. The city clerk of said city shall certify the passage of such ordinance to the proper election officials and it shall thereupon be the duty of such election officials to submit the question of the adoption of this act by the city of Chicago to popular vote. The city clerk of the city of Chicago shall also give at least thirty (30) days' notice of such election by publishing a notice thereof in one or more newspapers of general circulation within such city.

§ 3. The ballots to be used at such election shall be in the following form:

For the adoption of an act entitled "An act to confer upon the city of Chicago power and authority to sell surplus electricity and to fix the rates and charges for the supply of gas or electricity and to fix the rates and charges for the supply of gas or electricity for power, heating and lighting furnished by any individual, company or corporation to said city of Chicago and the inhabitants thereof."	Yes	
	No	

If a majority of the votes cast upon said proposition at said election shall be voted for the adoption of this act it shall thereby and thereupon be adopted by and be in force in the city of Chicago.

Approved May 18, 1905.

IN THE

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, A. D. 1905.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

CITY OF PEORIA,
Appellee.

Appeal from the Circuit Court of the United States for the Northern District of Illinois.

Brief on Behalf of the City of Chicago, Party to Another Pending Case, Involving the Question of the Power of Cities in Illinois to Fix the Price of Gas.

JAMES HAMILTON LEWIS,
Corporation Counsel,
Solicitor for City of Chicago.

HENRY M. ASHTON,
Special Counsel for City of Chicago,

DAVID K. TONE,
Of Counsel.

WASHINGTON, NOVEMBER 21, 1905.

GEO. HORNSTEIN CO., PRINTERS, CHICAGO

the streets, the question occurs what regulation was there intended. The word "regulate" was a familiar word in legal nomenclature at the time the act in question was passed. The Federal Constitution provides, Article 1, Section 8, Clause 3, that Congress shall have power "to regulate commerce with foreign nations and among the several states and with the Indian tribes."

The rule is settled by a long line of decisions of this court and other courts that the word "regulate," as used in the Federal Constitution, conferred upon Congress the right to prescribe what taxes, duties and imposts might lawfully be levied upon interstate commerce, and to prescribe the maximum rates to be charged by public service corporations, engaged in such commerce.

It is plain that the legislature intended that the manner and method of laying gas pipes in the public streets should be regulated by the city council. It is equally plain that the legislature intended that gas companies could erect their factories and lay down their pipes in the streets and alleys of any city or village, subject to such further regulations as such city or village might by ordinance impose. It is equally clear that the word "regulations," as used in the last clause of Subdivision Thirteenth, referred to the exercise by the city or village of such portion of the police power of the state as was essential to prevent said gas companies from imposing upon the citizens unreasonable charges, or making against said citizens unreasonable discriminations.

It is a familiar rule that a public service corporation may be required, under the police power of the state, to do two things:

First: To furnish its commodities at a reasonable price.

Second: To furnish to every citizen upon equal terms.

The two methods of regulating gas companies last referred to were unquestionably the ones the legislature of this state had in mind when the City and Village Act above referred to was passed. It is unreasonable to assume that the broad and comprehensive language contained in the last clause of Subdivision Thirteenth would have been used had the legislature only intended to regulate the laying of gas pipes within the public streets, for that question had already been covered by prior particular and specific language, dealing with that very subject.

But counsel tells us that the general language, "subject to such regulations as any such city or village may by ordinance impose," should be construed to mean the same as the particular language above quoted in reference to regulating streets.

Independently of the absurdity of such a contention as a general principle of statutory construction, we must here bear in mind that the doctrine contended for by counsel is also directly contrary to the rule laid down by the legislature of Illinois for construing general provisions.

The Revised Statute of Illinois of 1845, page 473, reenacted in the revision of March 5, 1874, Hurd's Revised Statutes of Illinois, 1899, Chapter 131, Section 1, paragraph one, is as follows:

> "All general provisions, terms, phrases and expressions shall be liberally construed in order that the true intent and meaning of the legislature may be fully carried out."

The legislature of Illinois, then, was familiar with the rule of construction above quoted, and when it imposed upon corporations erecting gas factories within the state

the condition that said companies should be subject to such regulations as cities or villages might by ordinance impose, the legislature knew that the general language in reference to regulations should be liberally construed for the purpose of carrying out the intent of the legislature.

Construing the word "regulations" to mean nothing more than what had already been contained in the particular language above quoted, would be adopting a strict rather than a liberal construction, and would be directly contrary to the statute above quoted, and the repeated decisions of the Supreme Court of Illinois, construing that statute.,

People v. *City of Chicago*, 152 Ill., 546-51.
People v. *Hinrichsen*, 161 Ill., 223-27.
Givins v. *City of Chicago*, 186 Ill., 399-403.
People v. *Harrison*, 191 Ill., 257-66.

In *People* v. *City of Chicago*, *supra*, the court, applying this statute, said, page 551:

> "The General Assembly, in the act revising the law in relation to the construction of the statutes, lays down as the first rule to be observed the following: 'All general provisions, terms, phrases and expressions shall be liberally construed, in order that the true intent and meaning of the legislature may be fully carried out.' (2 Starr & Curtis Ann. Stat., Chap. 131, Sec. 1.) A thing within the intention is regarded as within the statute though not within the letter, and a thing within the letter is not within the statute unless within the intention."

In *People* v. *Hinrichsen*, *supra*, a narrow technical construction was contended for, similar to the one made by counsel for Mills in this case and the Supreme Court of Illinois said, page 227:

> "The legislature of this state, by the provisions of chapter 131 of the Revised Statutes, declared certain rules for the construction of statutes then in force or that might be thereafter enacted, and by the first and second subdivisions of section 1 of that chapter it is provided: 'First, all general provisions, terms, phrases, and expressions shall be liberally construed, in order that the true intent and meaning of the legislature may be carried out; second, words in the present tense include the future.' The legislature having declared these among other rules of construction of statutes, in the enactment of the law now under discussion must be considered as having used the language contained therein with knowledge of the principles of statutory construction and interpretation as adopted by the courts and declared by legislation."

In *People* v. *Harrison*, *supra*, the court, after quoting the above statute to the effect that general provisions, terms, phrases and expressions should be liberally construed, said:

> "The intention is to be gathered from the necessity or reason of the enactment and the meaning of words enlarged or restricted according to the true intent. (*Castner* v. *Walrod*, 83 Ill., 171; *Cruse* v. *Aden*, 127 *id.*, 231.) That which is implied is as much a part of the statute as that which is expressed."

It may be well, before proceeding further in this discussion, to call attention to another rule of statutory construction contended for by counsel for Mr. Mills, which is equally unsound. The sixty-sixth subdivision of Section 1 of Article V of the City and Village Act confers upon cities and villages the power "to regulate the po-

lice of the city or village, and pass and enforce all necessary police ordinances."

It is contended by counsel for Mr. Mills that the last portion of that subdivision, namely "to pass and enforce all necessary police ordinances" refers merely to the constabulary of the city or village and does not confer upon the municipality general police powers within its borders.

As we shall hereafter note, the construction contended for is directly contrary to the repeated decisions of the Supreme Court of Illinois. The last portion of the subdivision above quoted has been construed by the Supreme Court of the State of Illinois to mean that the municipality has, under that clause, the power to pass all ordinances that are necessary for the protection of the public health, the public morals and the public welfare.

And, as we shall also hereafter point out, the power to regulate the price charged by a public service corporation, doing business wholly within the municipality and dealing in a commodity that is indispensable for the health, safety and comfort of its inhabitants, is a part of the police power which was delegated to cities and villages under the sixty-sixth subdivision above quoted.

Counsel has invoked the doctrine that the enumeration of particular powers, by implication excludes from the legislative intent powers not enumerated, and in support of that proposition has cited a large number of authorities. And counsel argues that because the power to fix the rate of wharfage and dockage, and to prescribe the compensation of hackmen, and to establish ferries and toll bridges, and to fix tolls thereon, and to fix water rates, was conferred upon municipalities by express language to that effect, therefore the power to fix the rate at which

gas should be sold, not being enumerated in any of these provisions, is to be excluded from the legislative intent, and this, even though language amply sufficient to confer that power is contained in other independent general provisions of the statute.

The rule of interpretation in question is not to be applied in the unqualified manner claimed by counsel. Endlich on the Interpretation of Statutes, thus states the limitation of the rule, page 559, Section 399:

> "Whether the expression of one thing is to operate as the exclusion of another, is clearly a mere question of intention, to be gathered from the statute by the usual means and rules of interpretation."

And Sutherland, in his work on Statutory Construction, Volume 2 (2nd Edition), Section 491, page 916, thus states the same rule:

> "This maxim, like all rules of construction, is applicable under certain conditions to determine the intention of the lawmaker when it is not otherwise manifest. Under these conditions it leads to safe and satisfactory conclusions; but otherwise the expression of one or more things is not a negation or exclusion of other things."

The rule contended for is also subject to another important qualification. It is true that the enumeration of certain things in a statute by implication excludes other things not enumerated, but the rule has no application where in one portion of the statute certain particular things are enumerated and in another portion of the statute, general language is used that was clearly intended to embrace other things than the ones before enumerated in the other part of the statute.

IN THE

Supreme Court of the United States

OCTOBER TERM, A. D. 1905.

PEORIA GAS AND ELECTRIC COMPANY,
Appellant,

vs.

CITY OF PEORIA,
Appellee.

Appeal from the Circuit Court of the United States for the Northern District of Illinois.

Brief on Behalf of the City of Chicago, Party to Another Pending Case, Involving the Question of the Power of Cities in Illinois to Fix the Price of Gas.

STATEMENT OF THE QUESTION.

The appellant, the Peoria Gas and Electric Company, is a corporation organized under the General Incorporation Act of the State of Illinois and subsequent to the adoption by the state of the City and Village Act, approved April 10, 1872. On the 4th day of September, 1900, the City of Peoria passed an ordinance which provided that the maximum price of gas furnished to the City of Peoria and its citizens should not thereafter exceed the sum of 75 cents per thousand cubic feet, and prescribing the quality of said gas, and providing penalties for

violation of the provisions of said ordinance. The complainant, the Peoria Gas and Electric Company, filed a bill in equity in the Circuit Court of the United States for the Northern District of Illinois, to restrain the enforcement of said ordinance upon two grounds:

First: That the complainant could not afford to manufacture gas at the price above specified, and that the ordinance in question would compel it to conduct its business at a loss, in violation of the 14th amendment to the Federal Constitution.

Second: Upon the ground that the City and Village Act of the State of Illinois, approved April 10, 1872, and in force July 1, 1872 (1 Starr & Curtis Ann. Stat., 2 Ed., pp. 689-707), did not confer upon cities and villages within the State of Illinois, the right to regulate the price of gas.

On October 15, 1900, the City Council of the City of Chicago passed a similar ordinance to the one above described, also fixing 75 cents per thousand cubic feet as the maximum price to be charged for gas within the City of Chicago.

Darius O. Mills filed a bill in equity against the City of Chicago and the People's Gas Light and Coke Company in the Circuit Court of the United States, for the Northern District of Illinois, seeking to enjoin the enforcement of the above ordinance on the alleged ground that the corporation had refused to act, and that suit is now pending and undisposed of, and that bill also questioned the right of cities and villages in the State of Illinois during the year 1900 to regulate the price of gas.

The City and Village Act of 1872 confers upon city councils within the State of Illinois, certain powers that are enumerated in some ninety-six subdivisions, the ones

particularly pertinent to the question here under consideration being Subdivisions 9, 11, 13 and 66 of Section 1, Article V, found on page 274 in Hurd's Revised Statutes of Illinois for 1899:

> "Section 1. The city council in cities, and president and the board of trustees in villages, shall have the following powers: * * * "
>
> "Ninth: To regulate the use of the same. (Referring to streets.) * * * "
>
> "Eleventh: To provide for the lighting of the same. (Referring to streets.) * * * "
>
> "Thirteenth: To regulate the openings therein (in streets) for the laying of gas or water mains and pipes, and the building and repairing of sewers, tunnels and drains, and erecting gas lights: Provided, however, that any company heretofore organized under the general laws of this state, or any association of persons organized, or which may be hereafter organized for the purpose of manufacturing illuminating gas to supply cities or villages, or the inhabitants thereof, with the same, shall have the right, by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."
>
> "Sixty-sixth: To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

Counsel has discussed the above subdivisions under two heads, numbered respectively A and B, and we will pursue the same classification in our reply.

A.

AS TO SUBDIVISION THIRTEENTH OF SECTION 1, ARTICLE V OF THE CITY AND VILLAGE ACT.

Subdivision Thirteenth of Section 1 of Article V of the City and Village Act of 1872, above quoted, provides that corporations organized for the purpose of manufacturing illuminating gas to supply cities or villages with the same, shall have the right, "by consent of the common council (subject to existing rights), to erect gas factories, and lay down pipes in the streets or alleys of any city or village in this state, subject to such regulations as any such city or village may by ordinance impose."

This statute, then, confers upon gas companies the right to carry on their business and occupy the streets and alleys of cities and villages within the State of Illinois, upon two specific conditions:

First: That said companies must obtain the consent of the common council of said cities; and

Second: They must submit themselves thereafter "to such regulations as any such city or village may by ordinance impose."

The appellant, the Peoria Gas and Electric Company, derived its sole right to erect its factory and to lay down its pipes in the streets and alleys of the City of Peoria from the statute above quoted, and it obtained its consent to engage in the business of manufacturing gas from the City of Peoria.

In passing the ordinance reducing the price of gas to 75 cents per thousand cubic feet, the City of Peoria was but exercising its power of prescribing by ordinance the regulations under which the appellant should conduct its business within the City of Peoria.

The contention of appellant now is that the words, "subject to such regulations as any such city or village may by ordinance impose," refer solely to regulations respecting the laying of the pipes of the gas company in the streets and alleys of such city. The most superficial examination of this clause in connection with other language bearing on the question of streets and alleys will show that that contention is untenable.

Subdivision Ninth, in reference to streets, says: "To regulate the use of the same." The first part of Subdivision Thirteenth says: "To regulate the openings therein (in streets) for the laying of gas or water mains and pipes and the building and repairing of sewers, tunnels and drains and erecting gas lights."

It would appear, then, that the legislature, in Subdivision Ninth, above quoted, and in the first clause of Subdivision Thirteenth, just quoted, had fully and specifically covered the right of the city to regulate the laying of gas pipes and mains in the streets. There was no occasion and no necessity for any further language on that subject.

The regulation referred to in the last clause of Subdivision Thirteenth must of necessity, by a familiar rule of statutory construction, have had reference to other kinds of regulations.

It is a settled rule in the construction of statutes that full force and effect should be given to every phrase and word, and the presumption should never be indulged in that any clause or phrase is meaningless or is a mere repetition of prior language.

Discarding, then, as untenable, the contention that the "regulations" referred to in the last clause of Subdivision Thirteenth, had reference to the laying of gas pipes in

for Mills, was a case where the telephone company derived its right to use the public streets for its business directly from the state. The court held that the right of the municipality "to regulate its streets" did not confer upon the city the right to regulate telephone charges. As we have already observed, the legislature of this state has conferred upon municipal corporations two distinct powers on this subject:

First: The power of a municipality to regulate its streets and the laying of gas pipes therein.

Second: To impose upon gas companies erecting factories within the State of Illinois from time to time "such regulations as any such city or village may by ordinance" prescribe.

The last power above referred to, which is broad and comprehensive in its terms, was never conferred at all upon the municipalities in the numerous cases relied upon by counsel for Mills, and hence they are not in point in this case.

The case of the *City of St. Louis* v. *Bell Telephone Co.*, 96 Mo., 623, is of the same character. There the telephone company was granted a franchise from the state to transact its business, and the only power conferred upon the municipality was "to regulate its streets." The court there merely held that the power to regulate streets did not carry with it the power of the municipality to prescribe the maximum rates. Had the Missouri statute contained a specific provision in reference to the power of the municipality to regulate its streets and had the telephone company been given the right to transact its business within the municipality, subject to such regulations as the city council might by ordinance impose,

then the question before that court would have been similar to the one here under consideration.

The case *In re Pryor*, 55 Kansas, 724, is of the same character, for there the only power conferred upon the municipality was to regulate the laying of the pipes and mains in its streets.

The case of *Lewisville Natural Gas Co.* v. *State*, 135 Ind., 49, is of the same character. The question there before the court was the construction of a single section of the Statute of Indiana that conferred upon boards of trustees of the town the right, "to provide by ordinance reasonable regulations for the safe supply, distribution and consumption of natural gas within the respective limits of such town." The court there properly held that the word "safe" was a limitation upon every word in the act and that the legislature were there dealing solely with provisions for the public safety. This thought was strengthened, the court said, from the well known dangerous and combustible character of natural gas.

It is unnecessary to point out that the wide and comprehensive powers embraced within the statute here under consideration were not contained in that act, and it is also important to bear in mind that the State of Indiana had no statute providing that general terms, phrases and expressions should be liberally construed.

Other cases are cited by counsel for Mills along the same line, but an examination of the facts of each particular case will disclose that none of the cases have any tendency to sustain the contention of counsel.

Counsel also quotes from Judge Grosscup's opinion, to the effect that the interpretation contended for by counsel for Mills had been placed upon this statute by a num-

ber of the corporation counsels of the City of Chicago. The pages on which those opinions are to be found are not pointed out either by counsel or by Judge Grosscup. A painstaking examination of the opinions by the various corporation counsels named fails to sustain the claim thus broadly made. Some of the counsel referred to did not at all give the opinion contended for, others referred to the question in a rather vague and cursory way.

The opinions of Mr. Adams and Mr. Darrow, which are the only ones that deal with it in any extended way, are based upon lines of reasoning that are directly contrary to the decisions of the Supreme Court of Illinois above quoted from, and hence are entitled to no weight.

In this regard we may say that it is true that where the meaning of the statute is doubtful, the long continued and uniform construction placed upon that statute by the highest law officers of the government enacting it is entitled to some weight. Such opinions, however, should be disregarded if they are based upon reasons that are contrary to the decisions of the courts. The opinions are only entitled to weight in cases of doubt. There is no doubt in the case at bar. The power to regulate is conferred by plain and unambiguous language.

Again, it is only the opinion of the highest law officer of the government enacting the law that is entitled to such weight. The act in question was passed by the legislature of the State of Illinois. To come within the rule contended for, counsel would have to show that his view had been sustained by the uniform and long continued opinions of the attorney generals of the state.

It is plain that the opinions of some of the corporation counsels of one municipality in the state are not entitled to any consideration, for if each municipality within the

State of Illinois could make a law on this subject by its own practical construction, the result would be that we would have as many different laws on this question as there would be divergent views by the corporation counsels of the respective municipalities. Chicago would have one law, Peoria a different one, and Springfield still another. An argument that leads to consequences so absurd must necessarily be erroneous.

B.

AS TO THE SIXTY-SIXTH SUBDIVISION OF SECTION 1, ARTICLE V OF THE CITY AND VILLAGE ACT.

Subdivision Sixty-sixth of Section 1, Article V of the City and Village Act of 1872 confers upon the city council the power "To regulate the police of the city or village and pass and enforce all necessary police ordinances."

Much is said in the argument of counsel for Mills about the opinion of Circuit Judge Grosscup in the case of *Mills* v. *City of Chicago*, 127 Fed., 731. Judge Grosscup held in that opinion that the power "to pass and enforce all necessary police ordinances" was not intended to invest the municipality with the general police powers of the state, so far as the municipality was concerned, but that the Sixty-sixth Subdivision of said section related merely to regulating the constabulary of cities and villages. To use Judge Grosscup's exact language, page 734: "The section looked, not to the police powers of the state in its wide constitutional sense, but to police in the sense of a local constabulary."

Judge Grosscup probably was not aware when he rendered this opinion, that the identical language had been passed upon by many decisions of the Supreme Court of

Illinois, and that Judge Grosscup's contention was utterly refuted by the opinions of that court.

It is unnecessary to remind this court that where a statute has received a settled construction by the highest court of the state enacting it, that construction is binding upon the Federal Court. It is therefore useless to determine as an original proposition whether Judge Grosscup's opinion is right or wrong, for the very question now under consideration had already been decided adversely to Judge Grosscup's ruling by many prior decisions of the Supreme Court of Illinois.

The identical argument contained in Judge Grosscup's opinion was addressed to the Supreme Court of Illinois in the case of *McPherson* v. *Village of Chebanse*, 114 Ill., 46. The village there had enacted an ordinance prohibiting persons from keeping open their places of business in the village on Sunday. There was no authority conferred upon the cities and villages in the state to pass a Sunday-closing ordinance, except by virtue of Subdivision Sixty-sixth of Section 1 of Article V above quoted. Speaking on this very point, the court said, page 49:

> "Subdivision 66, of Section 62, Article 5, of the 'Act to Provide for the Incorporation of Cities and Villages' (Rev. Stat. 1874, p. 221), gives the power 'to regulate the police of the city or village, and pass and enforce all necessary police ordinances.' Under this grant of power, we are of opinion there is found authority for the passage of the ordinance.
>
> "It is insisted this clause only refers to the organization and regulation of a police force. We think this a too narrow construction—that the clause is not limited in its application to police officers, but may extend to and embrace a subject matter of police regulation, under the general police power of the state."

The *McPherson* case, *supra*, then, is a direct authority for the proposition that Subdivision Sixty-sixth, *supra*, confers upon municipalities within the state the general police powers of the state, so far as said power is necessary for the carrying on of the municipal government, and that the power there conferred is not, as Judge Grosscup contended, limited to the regulation of the village constabulary. That opinion has ever been adhered to by the Supreme Court of Illinois.

The same question was again before the Supreme Court of Illinois in the case of *City of Chicago* v. *Gunning System*, 214 Ill., 629. It was there held that the power to regulate the manner and method of using signs and bill boards upon private property was properly embraced within paragraph 66, *supra*. After quoting with approval the *McPherson* case and the *Gundling* case above referred to, the court said:

> "Paragraph 66 confers upon cities power to regulate the police of the city or village and pass and enforce all necessary police ordinances. We held in the case of *McPherson* v. *Village of Chebanse*, 114 Ill., 46, that the power conferred under this clause is not limited in its application to the organization and regulation of a police force, but it is extended to embrace the subject matter of police regulations under the general police power of the state."

Again, the court, in the same case, speaking of the nature of the general police power of the state that was conferred upon cities and villages by Subdivision 66 of Section 1, Article 5, said:

> "The police power of the state is an adherent or plenary power, which enables the state to prohibit all things hurtful to the comfort, safety and welfare

> ize municipalities to pass reasonable ordinances covering said subject. Paragraph 66 confers upon cities power 'to regulate the police of the city or village and pass and enforce all necessary police ordinances.' We held in the case of *McPherson* v. *Village of Chebanse*, 114 Ill., 46, that the power conferred under this clause is not limited in its application to the organization and regulation of a police force, but it is extended to embrace the subject matter of police regulation under the general police power of the state."

The case above quoted from is on all fours with the case at bar. Every argument advanced by counsel in support of the contention that a failure to enumerate the regulation of the price of gas when the other subjects were under consideration, by implication excluded the granting of that power in subsequent subdivisions, are equally applicable to the *Gunning* case above quoted from.

It appears in the language of counsel "that the legislature was entirely familiar with the terms usually employed" in conferring upon a municipality the power to regulate the use of signs and hand bills. The failure, however, of the legislature in the *Gunning* case, *supra*, to use in reference to regulation of hand bills upon private property "the same exact and simple language deemed by it necessary for that purpose" in the case of the use of signs upon public property, was not regarded by the Supreme Court of Illinois as any reason for holding that the power to regulate the use of signs upon private property was not embraced within the general language of subdivision sixty-sixth.

Again, in *McPherson* v. *Village of Chebanse*, 114 Ill., 46, the question before the court was whether the Village of Chebanse had under the City and Village Act of

Illinois, above referred to, the power to prohibit persons from keeping their places of business within the village open on Sunday.

The ninety-sixth subdivision of Section 1 of Article V of the City and Village Act contained numerous specific and precise enumerations of powers conferred upon cities and villages of exactly the same kind as those in reference to providing for the closing of places of business on Sunday, and yet not one word is said in any of the ninety-six subdivisions in reference to the powers of cities and villages to prescribe Sunday closing ordinances.

Counsel for the Village contended in the *McPherson* case, *supra*, that the power was found in Subdivision 66 of Section 1 of Article V, which reads as follows: "To regulate the police of the city or village, and pass and enforce all necessary police ordinances."

Counsel for the defendant contended that the granting of power to pass certain specific regulations should be construed as if the statute in express terms had inhibited the granting of powers not enumerated, and counsel cited in support of his proposition, page 46, the case of *City of Cairo* v. *Bross*, 101 Ill., 475, the very case so much relied upon by counsel for Mills in his brief.

The court held that this argument was untenable and said, referring to the general grant of power contained in Subdivision Sixty-sixth of Section 1, Article V:

> "Under this grant of power we are of opinion there is found authority for the passage of the ordinance."

Sunday-closing regulations were thoroughly familiar to our Anglo-saxon forefathers. Such laws had been in

existence in England and in the Atlantic States for generations. The legislature had delegated to the municipality by exact and simple language, numerous police powers of a kindred character and the legislature were familiar with Sunday-closing regulations and with the kind of language that could be used for the purpose of granting the authority to municipalities to make such regulations in the same precise and direct way that other powers had been granted.

All of the above arguments, however, were held untenable by the Supreme Court of Illinois in the *McPherson* case, *supra*, and the existence of the power to enact Sunday-closing ordinances under the general grant of Subdivision Sixty-sixth was fully sustained.

We might multiply authorities from the Supreme Court of Illinois on this question, but a further citation of them would seem unnecessary. It must be clear that the doctrine contended for by counsel has no application to the question here under consideration. But it is unnecessary to pursue this discussion any further for there is no law that requires the legislature to use exactly the same words in conferring legislative powers upon a municipality.

The word "regulate" as applied to any business or calling, means the right to prescribe the maximum charges that can be made by persons engaged in that line of business. The precise question was before the Supreme Court of Colorado in *Golden Canal Co.* v. *Bright*, 8 Colo., 148. There an act of the legislature was passed, conferring upon county commissioners authority "to regulate the use of water for irrigation." The question before the court was whether the language above quoted was sufficient to authorize the commissioners to

prescribe the maximum price to be charged for water. The court held that such power was conferred by the language above quoted from the title of the act, and said, page 149:

> "In the law before us the legislature attempts to regulate the use of water thus furnished and sold by respondent and others who engage in such enterprises. Prominent among the matters involved in this regulation is the price to be charged; the phrase, *regulating the use*, is not confined to the forbidding of injustice in the distribution, the prevention of waste or the apportionment in times of scarcity; it is broad enough to include the frustration of unfair exactions, and the fixing of reasonable rates. To deny this would be to give the expression a narrow and restricted meaning, instead of construing it liberally, with a view to carrying out the legislative intent."

In *Denninger* v. *Recorder's Court*, 145 Calif., 629, the question before the court was whether the Constitution of the State of California had delegated to municipal corporations the right to regulate gas rates. The provision conferring that power was as follows:

> "Any county, city, town or township may make and enforce within its limits all such local police, sanitary and other regulations as are not in conflict with general laws."

Speaking of the authority conferred by this language the court said, page 631:

> "By this section the people have made a direct constitutional grant of the police power of the state to every municipal corporation for local purposes. It is conceded by the petitioner that the general grant of legislative power in the constitution of a state

includes the power to regulate gas rates by statute, and that this power may be delegated by statute to municipal corporations. If this is so, and if the regulation of gas rates by the state is an exercise of the police power, it would be difficult to say why, in the absence of more specific provisions in our Constitution, relating to this matter, the municipal corporations of the state could not by virtue of the section above quoted, adopt and enforce within their local limits ordinances as comprehensive, both as to the establishment of rates and the infliction of penalties, as the statutes which the legislature is competent to enact for the state at large."

By Article 1, Section 8, Clause 3 of the Federal Constitution, Congress was given the power "to regulate commerce."

It has been held that the word "regulate" as used in that instrument, conferred upon Congress, the exclusive right to prescribe what taxes, duties and imposts might lawfully be imposed upon Interstate Commerce and to regulate the maximum rates to be charged by public service corporations engaged in such commerce.

Speaking on this subject, this court said in *Welton* v. *State of Missouri*, 91 U. S., 279-81:

> "The power to regulate conferred by that clause upon Congress is one without limitation; and to regulate commerce is to prescribe rules by which it shall be governed,—that is, the conditions upon which it shall be conducted; to determine how far it shall be free and untrammelled, how far it shall be burdened by duties and imposts, and how far it shall be prohibited."

So this court, in defining the word "regulate," said, in *St. Louis* v. *Western Union Telegraph Co.*, 149 U. S., 465-9:

> *"The word 'regulate' is one of broad import. It is a word used in the Federal Constitution to define the power of Congress over foreign and interstate commerce and he who reads the many opinions of this court will perceive how broad and comprehensive it has been held to be."*

In *Kaiser* v. *I. C. R. R. Co.*, 18 Fed., 151, the question before the court was whether the power "to regulate commerce with foreign nations and among the several states," conferred upon Congress by the Federal Constitution, embraced the power to regulate the maximum rates to be charged by railroad companies engaged in interstate commerce.

In determining the meaning of the word "regulate," as used by our Constitution, the court said:

> "To fix or limit the charges for such transportation is to regulate commerce."

In *Ames* v. *Union Pacific Railroad Co.*, 64 Fed., 165, Mr. Justice Brewer, speaking on the same subject, said, page 178:

> "But within the scope of the word 'regulation' as commonly used, is embraced the idea of fixing the compensation which the owners of railroad property shall receive for the use thereof."

Numerous cases are cited by counsel to the effect that the right of a municipal corporation to control its streets and alleys and to regulate the laying of telephone and telegraph wires, does not confer upon the municipality any authority to regulate rates. We do not at all dispute the soundness of those decisions. For instance, the case of *State* v. *Sheboygan*, 111 Wis., 23, cited by counsel

All the cases cited by counsel for Mills are where the legislature had enumerated particular things and then remained silent. Of course, under those conditions, the things not enumerated were by implication excluded. The rule contended for has never been applied to a case where there was in one portion of the statute an enumeration of particular things, and in another portion of the statute, a general provision which clearly was intended to embrace other things than the ones contained in the particular enumeration.

The case of *City of Chicago* v. *Gunning System*, 214 Ill., 628, contains a forcible refutation of counsel's contention. That case involved the construction of the very statute now under consideration, namely Subdivision Sixty-sixth of Section 1, Article V of the City and Village Act. There, the City of Chicago passed an ordinance, regulating the size and method and manner of placing bill boards upon private property within the City of Chicago. A bill in equity was filed by the Gunning System, claiming that while the City of Chicago had the right to regulate signs and bill boards upon streets and alleys and public property of the city, no such power had been conferred upon the city council by the legislature of the state, in reference to regulating the placing of signs on *private* property.

Section 1 of the City and Village Act of the State of Illinois, dealing with the power of the city council, contains ninety-six subdivisions. Subdivision Seventeenth of said Act is the only one that contains any reference to regulating bill boards and signs, and that subdivision conferred upon the city council the following powers:

> "To regulate and prevent the use of streets, sidewalks, and public grounds for signs, sign-posts, awn-

ings, awning-posts, telegraph posts, horse troughs, rocks, posting hand bills and advertisements."

The doctrine contended for by counsel was there invoked that the granting to the city council of the power to regulate the use of signs and hand bills upon the streets, sidewalks, and public grounds, without saying one word about regulating the use of signs and hand bills upon private property, by necessary implication excluded the power of the city council to make any regulations in reference to placing said signs and bill boards upon private property.

The Supreme Court of Illinois held that the particular enumeration of the right of the city to regulate the use of signs on the streets and public places did not by implication exclude the right of the city to regulate the use of signs upon private property and further held that that power was conferred by Subdivision Sixty-sixth of Section 1, Article V.

Speaking on this subject, the court there said, page 634:

> "It is claimed by appellee that under clause 17 of section 2 (should be section 1), article 5, of the City and Village Act, the city can regulate and prevent the use of signs on the streets and public places of the city; that this is a specific provision relating to signs, and that the power thus expressly granted cannot be added to by the general language found elsewhere in the act, and that there is no authority conferred by statute upon municipalities to regulate bill boards erected upon private property. We cannot agree with this contention, but are of the opinion that there is ample power, under paragraphs 66 and 75 of section 1, article 5, of the City and Village Act (Hurd's Stat., 1899, p. 277), to author-

sonal view and was neither intimated nor suggested by the Supreme Court of Illinois. Indeed, the very reasoning of that court by which it reached the conclusion that the City of Chicago had no such power would as a necessary corollary deny the exercise of that power by the state. The inhabitants of a state have the right to go and come when and where they will, so long as so doing does not interfere with anybody else's rights or the public welfare.

Counsel for Mr. Mills says that it would "tend to avoid much confusion" if the term "police power" were confined to narrower limits and if it were so interpreted as not to embrace the power of the government to regulate the rates charged by public service corporations.

We wish to suggest that there is at the present time no confusion on that subject. The question we are here dealing with is the construction of a statute of the State of Illinois. The right of the government to regulate the charges of a person devoting his property to a public use has been held by the Supreme Court of Illinois to be the exercise of the police power. The decisions in that regard are uniform and conclusive. Those decisions are binding upon this court in interpreting the same statute. Again, we do not believe there is any confusion on that subject in the decisions of this court. Ever since the decision by this court of *Munn* v. *Illinois*, 94 U. S., 125, governmental regulations in reference to the rates charged by persons devoting their property to a public use have been interpreted by this court to be the proper exercise of the police power. Counsel's argument that a definition of the police power different from the one previously expounded and declared by the courts, would tend to avoid confusion, should be addressed to the legislative and not to the judicial department of the government.

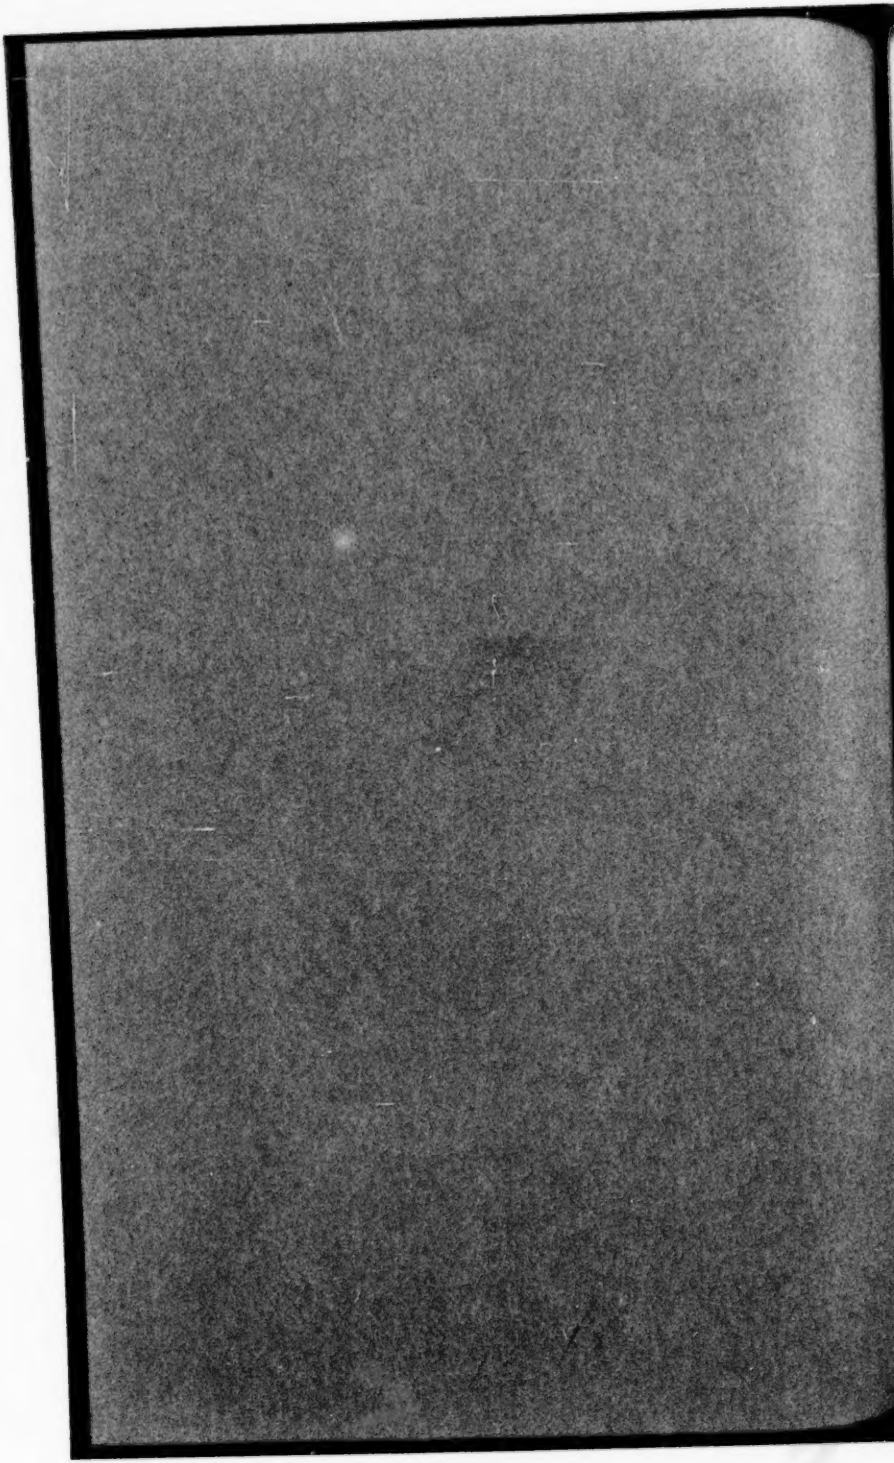
Counsel also calls attention to the act of the State of Illinois, approved May 18, 1905, conferring upon the City of Chicago the power to sell surplus electricity and to fix the rates and charges for the supply of gas and electricity and argues that the passage of that act tended to prove that the city had no power prior thereto to regulate the price of gas. The passage of that law in no wise tends to prove that the power to regulate the price of gas did not exist in prior legislative acts. The law in question gave the City of Chicago the power to sell surplus electricity, something that it had never possessed under any prior grant of power. Again, it provides that where the manufacturer of gas claims that the rate fixed is unreasonably low, an application must be made to the Circuit Court of the county in which said city is situated for the purpose of determining that question. Those were important innovations in the law that fully justfied the legislature in enacting it. Again, the power of the city to regulate the price of gas had been questioned and the fact that the legislature out of abundant caution inserted that provision into the present act in no wise tends to show that the power had not been conferred under previous legislative acts.

We respectfully submit that the power to regulate the price of gas during the year 1900 was vested in the city council of the City of Peoria as a part of the police power of that municipality, delegated to it under the statutes of the State of Illinois.

JAMES HAMILTON LEWIS,
Corporation Counsel,
Solicitor for City of Chicago.

HENRY M. ASHTON,
Special Counsel for City of Chicago.

DAVID K. TONE,
Of Counsel.



Supreme Court of the United States.

No. 33.—October Term, 1905.

Peoria Gas and Electric Company, Appellant, *vs.* The City of Peoria, Appellee. } Appeal from the Circuit Court of the United States for the Northern District of Illinois.

[January 2, 1906.]

This was a bill filed in the Circuit Court of the United States for the Northern District of Illinois by the Peoria Gas and Electric Company to restrain the enforcement of an ordinance passed by the defendant, fixing the price of gas. A decree was entered in the Circuit Court dismissing the bill, and the case was brought directly here, as involving a constitutional question.

The facts are these: Prior to 1899 for a period of many years the Peoria Gaslight and Coke Company had manufactured and furnished gas to the city of Peoria and its citizens. The business had been profitable and the stock was valuable. In 1899 the plaintiff company was organized to construct gas works in Peoria, and that city, by ordinance, granted to it a franchise permitting it to construct and operate a gas plant and lay mains along certain streets, etc. It is charged that in order to obtain this franchise the promoters of the plaintiff company represented that it was to be a Peoria company and enterprise, and that it would furnish gas at a cheaper rate than the old company; that in fact it was a scheme of certain Chicago capitalists, who, as soon as the ordinance was passed and the plant constructed, appeared as owners of substantially the entire stock. After the new company was organized and its plant constructed the two companies became competitors, the competition being so sharp that in the early summer of 1900 the new company lowered its price to 30 cents per thousand cubic feet for both light and fuel gas. On July 31, 1900, after a conference between the managers of the two companies, both raised the rate to $1.15 net for light and 75 cents net for fuel gas, to take effect August 1, 1900. The announcements of this raise in the rates were published in the Peoria papers on the same day, each announcement being in precisely the same language. On September 4, 1900, the city passed an ordinance providing that the maximum price for gas should be 75 cents per thousand cubic feet, and that the gas to be furnished should not be less than eighteen candle power.

of society, and may be termed the 'law of overruling necessity.'"

In the case of *Gundling* v. *City of Chicago*, 176 Ill., 340, the court said, again construing the power conferred upon cities and villages under Paragraph 66 of Section 1, Article 5 of the City and Village Act, and said, page 348:

> "The regulation of the police power is hardly susceptible of exact definition, as the exigencies of each case are varying, and the cases are innumerable where the health of the inhabitants of the municipality may be in some degree endangered. When the city council considers some occupation or thing dangerous to the health of the community, and in the exercise of its discretion passes an ordinance to prevent such a danger, it is the policy of the law to favor such legislation, as being humane and essential to the preservation and protection of the community. Municipalities are allowed a greater degree of liberty of legislation in this direction than any other."

Again in *Culver* v. *City of Streator*, 130 Ill., 238, the court thus defined the police power of the state:

> "That power may be defined in general terms as comprehending the making and enforcement of all such laws, ordinances and regulations as pertain to the comfort, safety, health, convenience, good order and welfare of the public."

Again in *Wice* v. *C. & N. W. Ry. Co.*, 193 Ill., 351-53, the police power conferred upon cities and villages by Subdivision 66 of Section 1 of Article V of the City and Village Act was thus defined:

> "The provision of the general incorporation act is a delegation by the general assembly to the City of Chicago of police powers to pass and enforce all

necessary police ordinances—that is ordinances necessary for the comfort, safety, health, convenience, good order and welfare of its inhabitants."

It is difficult to conceive how powers more comprehensive could have been conferred upon a municipality than the ones embraced within the interpretation of Subdivision 66, *supra*, by the Supreme Court of Illinois in the case last quoted from.

We have quoted at great length from the decisions of the Supreme Court of Illinois, construing Subdivision Sixty-sixth of Section 1, Article V, for the purpose of showing that the powers conferred upon cities and villages by the legislature, as construed by the Supreme Court of Illinois, is wide, comprehensive and all prevailing. As this statute has been construed by the Supreme Court of Illinois, it intended to confer upon the municipality all the police power that the state itself might rightfully have conferred upon the municipality with reference to regulating the safety and welfare of the inhabitants within its borders.

Much is said by counsel for Mills about the derivative police powers of a municipality. It is true that the police power of the municipality is "derivative," but if by that language it is meant to imply that it is insignificant or unimportant, the contention is unfounded. The power of Congress is strictly derivative. Congress can exercise no power except that which in express terms or by necessary implication was conferred upon it by the Federal Constitution. Even the state legislature itself is in the exercise of derivative governmental powers. Under our theory of government, all governmental powers reside in the people and can only be exercised by any form of government, federal, state or municipal, except in so far as

governmental powers have been delegated to those respective bodies by the people.

There is no reason in law or in theory why the powers conferred upon municipalities should be construed in any other way, or subjected to any other test than are the powers conferred upon other departments of our government. Powers as important for the preservation of life, liberty and property as any ever exercised by either the state or federal government, are constantly administered by the cities and villages within the United States. The comfort, safety and welfare of millions of our inhabitants are ever dependent upon the proper exercise by municipal corporations of the functions that have been delegated to them by the state. The same broad and comprehensive rule of construction that was adopted by Justice Marshall in the celebrated case of *Gibbons* v. *Ogden*, 9 Wheaton, 1, in construing the implied powers of Congress over interstate commerce under the federal government should be adopted by our courts in construing the police powers delegated to municipal corporations.

It was fortunate, indeed, that a man possessing the pre-eminent wisdom and the matchless logic of Justice Marshall was called upon to lay down the landmark of the law in reference to the implied powers of Congress to regulate interstate commerce. Had that task devolved upon some modern judge, imbued with technical notions and narrow ideas in reference to the construction of governmental powers, it is possible that the most important power of the federal government over interstate commerce might by construction have been frittered away and the entire destinies of the nation changed.

We have already observed that under the decisions of the Supreme Court of Illinois, cities and villages are in-

vested with all the police power of the state that is necessary for the preservation of the public health, the public welfare and the public morals, so far as those powers, however, relate solely to municipal affairs.

It only remains to consider whether the regulation of rates of a gas company doing business wholly within a municipality and engaged solely in supplying its inhabitants with heat and light, is the exercise of the police power of the municipality. It is settled by a long line of authorities that the regulation of rates to be charged by a public service corporation comes within the exercise of the police power.

Munn v. *Illinois*, 4 Otto, 113-125.
Farwell v. *City of Chicago*, 71 Ill., 269.
City of Chicago v. *Rogers Park Water Co.*, 214 Ill., 212-23.
Cooley on Constitutional Limitations, 2nd Ed., pp. 734 and 735.

In *Munn* v. *Illinois*, 94 U. S., 125, this court said, in speaking of the police powers of the government:

> "Under these powers the government regulates the conduct of its citizens one toward another, and the manner in which each shall use his own property, when such regulation becomes necessary for the public good. In their exercise it has been customary in England from time immemorial, and in this country from its first colonization, to regulate ferries, common carriers, hackmen, bakers, millers, wharfingers, inn-keepers, etc., and in so doing to fix a maximum of charge to be made for services rendered, accommodations furnished and articles sold."

The Supreme Court of Illinois said, in *Farwell* v. *City of Chicago*, 71 Ill., 269, in speaking of an ordinance

which prescribed the maximum rates to be charged by hackmen and draymen, page 272:

> "The spirit of the ordinance is, to bring the class of carriers therein named under the police regulations of the city. It is designed to operate upon those who hold themselves out as common carriers in the city for hire, and to so regulate them as to prevent extortion, imposition and wrong to strangers and others compelled to employ them, in having their property or persons carried from one part of the city to another. This is a rightful exercise of the police power. (Cooley Const. Lim., 201.)"

Again, in *City of Chicago* v. *Rogers Park Water Co.*, 214 Ill., 212-223, the court said, in referring to an ordinance regulating the price of water, page 223:

> "In the exercise of the police power the state may require that the individual so manage and control his own property that the public health, public peace and public welfare may be conserved. Usually, the police power is invoked to restrict the owner in those uses of his property which he might have as a matter of natural right, so as to conform to the welfare of established society. It is said to be founded on two maxims: First, 'So use your own property as not to injure others;' and second, 'The safety of the people is the supreme law.' (22 Am. & Eng. Ency. of Law, 2d Ed., pp. 916-918.)"

It thus appears that under the settled decisions of the Supreme Court of Illinois, the right to regulate the maximum charges of a public service corporation is the exercise of the police power of the government. If a corporation is engaged in state commerce or in a calling wherein it deals with the people of the state at large, the right to regulate charges is the exercise of the police

power of the state. Where, however, a public service corporation, like a gas company, is given the right to do business solely within a municipality and upon the express condition that it may erect its factory and lay down its pipes and mains, subject to such regulations as the city council may by ordinance prescribe, it is plain that the right to regulate the price to be charged by such a public service corporation is the exercise of the police power of the municipality within which it transacts its business.

In *City of Chicago* v. *Gunning System*, 214 Ill., 628, the court said, in speaking of the police powers of the state that were delegated to the City of Chicago under the authority "to pass and enforce all necessary police ordinances," that it was "that inherent or plenary power which enables the state to prohibit all things hurtful to the comfort, safety and welfare of society, and may be termed the law of overruling necessity."

It is a familiar rule of law that a public service corporation must serve all persons upon equal terms. In other words, that it has no right to discriminate against individuals in the same conditions and circumstances. For instance, could the appellant Gas Company charge within the City of Peoria 75 cents per thousand cubic feet from some of its customers and exact the sum of $1.00 per thousand cubic feet from others? Suppose the appellant Gas Company should attempt to do so. Would the City of Peoria have the right to pass an ordinance and to prescribe a penalty for its violation, requiring the appellant company to deliver gas to all of its inhabitants upon terms of equality? That such a power would exist on the part of the City of Peoria we believe is unquestioned. That such a power would be the exercise of

precisely the same kind of a police power as that prescribing a maximum rate is equally unquestioned. That both of the above powers could be exercised by the municipality under the general police power of the state, delegated by it to municipal corporations under Subdivision 66 of Section 1, Article V, would follow as a necessary corollary. Or to put the question a little differently: Should the municipality pass an ordinance requiring gas to be delivered to every consumer at the same rate and prescribing a penalty for its violation, and suppose that the corporation refused altogether to deliver gas to some of its consumers, would it be seriously contended that the right to compel the delivery of gas to every consumer at the same rate, would be beyond the police power of the municipality? Or could the Gas Company withdraw its service arbitrarily and at its will from any or all of the inhabitants of the city without being subjected to municipal regulation? The supply at reasonable rates and upon terms of equality to all the inhabitants within a municipality, of gas for heating and lighting purposes is certainly a regulation that is necessary for the preservation of the health, safety and the general welfare of its inhabitants. To contend that a corporation, having obtained the right to erect its factory and lay down its mains, subject to municipal regulation, may demand a price so exorbitant that no consumer can pay it, and thus leave the inhabitants of the city in darkness and without fuel, is to argue that a municipality would be powerless to enact reasonable regulations for the preservation of the health, comfort and welfare of its inhabitants.

The cases cited by counsel for Mr. Mills from the Supreme Court of Illinois are not in any way inconsistent with the views above expressed. In the case of *Wilke* v.

City of Chicago, 188 Ill., 444, relied upon by counsel, the city passed an ordinance requiring each master plumber to pay a license fee of $30 per year and imposing a penalty for a violation of said ordinance. The court held that the ordinance in question was not the exercise of any police power of a municipality for it had no tendency to promote the health, comfort or welfare of its inhabitants, but amounted merely to taxing every person pursuing that calling, the sum of $30.

The ordinance did not aim at suppressing extortion or at regulating the manner and method of doing work within the municipality, but merely demanded point blank a certain sum of money. It is plain that the question there under consideration was profoundly different from the one now before the court.

The case of *Wice* v. *C. & N. W. Ry. Co.*, 193 Ill., 351, was an ordinance forbidding passengers from getting on or off trains while they were in motion unless permitted by those in charge and prescribing penalties for its violation.

The court denied the power of the City of Chicago to pass the above ordinance, not because the authority to do so was a state, as distinguished from a municipal power, but the power was denied solely because the ordinance had no tendency to promote the safety, welfare or health of the inhabitants of the city. The court there said:

> "It is difficult to conceive of the necessity, as a police regulation, for such an ordinance and it is only necessary police ordinances that the city is authorized to pass."

Counsel says in reference to this case that no one would doubt that the making of such a law was "within the police power of the legislature." That is counsel's per-

On September 18, 1900, the plaintiff filed this bill of complaint, setting forth its organization, the ordinance under which it was given authority to occupy certain streets and that of September 4, 1900; alleged that the latter ordinance was invalid as establishing a rate which was not renumerative and in effect confiscatory, and was thus taking private property for public use without just compensation and depriving the plaintiff of its property without due process of law. The city answered, narrating the circumstances attending the organization of the plaintiff and the passage of the ordinance authorizing it to occupy the streets and supply the city with gas, with the representation made at the time, and claimed an estoppel by reason thereof, showing also the rates which had been the result of competition, the raise in price by the two companies, charged that this was by agreement between the companies, alleged that the ordinance of September 4 was passed in good faith and to prevent extortion by the companies, and also that the rate fixed was reasonable. While the answer alleged that the fixing of the rates from the first of August was by agreement between the two corporations, it did not, in terms, plead that the agreement was in violation of any particular statute.

By consent a special commissioner was appointed to take the proofs and report the same with his findings and conclusions thereon. He took an enormous amount of testimony, the printed record in this court amounting to 1,780 pages. From it he found and reported that the rate prescribed by the ordinance of September 4 did not furnish compensation, was confiscatory in its effect, and therefore unreasonable. Exceptions were taken by both sides to different portions of his findings and conclusions of law. On a hearing before the Circuit Court the question of the reasonableness of the rates prescribed was ignored, the court found that the increase in rates on August 1, 1900, was the result of an illegal combination between the two gas companies and in violation of the Illinois anti-trust law of 1891, that, therefore, the plaintiff was not entitled to any relief against the ordinance of September 4, and entered a decree dismissing the bill.

The anti-trust act of Illinois, approved June 11, 1891, (Laws 1891, p. 206,) forbids the entering into any "pool, trust, agreement, combination, confederation or understanding . . . to regulate or fix the price of any article of merchandise or commodity," and punishes the same by fine. Sections 5 and 6 are as follows:

"5. Any contract or agreement in violation of any provision of the preceding sections of this act shall be absolutely void.

"6. Any purchaser of any article or commodity from any individual, company or corporation transacting business contrary to any provision of the preceding sections of this act shall not be liable for the price or payment of such article or commodity, and may plead this act as a defense to any suit for such price or payment."

Subsequently and in 1893 another act was passed, which was held by this court in *Connolly* v. *Sewer Pipe Company*, 184 U. S. 540, to constitute class legislation, and to be void. An amendment in 1897 to the act of 1891 was subject to the same objection. The Supreme Court of Illinois has since held that the act of 1891 was not repealed by the act of 1893 or the amendment of 1897, and is still in force. *The People ex rel.* v. *Butler Street Foundry*, 201 Ill. 236, 257; *Chicago, Wilmington & Vermilion Coal Co.* v. *The People*, 214 Ill. 421, 454.

Mr. Justice BREWER delivered the opinion of the Court.

This case was tried on one theory and decided on another. While that does not always and necessarily constitute error, yet, under the circumstances, as disclosed by the record, we are of opinion that injustice has probably resulted and that there should be a reversal of the decree and a further examination in the Circuit Court. As stated in the findings of the commissioner, the bill proceeds upon the theory that the ordinance of September 4, 1900, impaired the rights of contract theretofore existing between the parties, that its enforcement would constitute the taking of private property for public use without just compensation, that the penalties prescribed for a violation of the ordinance were exorbitant and not sanctioned by the laws of the State of Illinois, while the answer justified the provisions of the ordinance by the statements and representations made by the stockholders in the company to the city council at the time the plaintiff's franchise was sought, and alleged that the rate therein fixed was reasonable. On these questions the stress of the controversy was rested. The court entirely ignored them and placed its decision on the single ground that the two companies had by agreement attempted to fix their prices, and therefore came within the scope of the Illinois anti-trust law—an act which had not been in terms referred to either in the pleadings or the report of the master.

There was no positive evidence and no finding by the commissioner of an agreement between the two companies, and while from their action an inference might be drawn that they had entered into some agreement in respect to rates on August 1, 1900, neither its terms, scope nor duration were shown. It also appears from the testimony that that rate was continued by the old company only until January 1, 1901, when an even rate of one dollar per thousand was established, and that this latter rate was on September 1, 1901, also established by the new company, the plaintiff herein. Whether this action of the new company in adopting the rate which had been kept in force by the old company since January 1, 1901, was the result of agreement or an independent act on its part is not shown. It appears further that in October, 1901, the plaintiff entered into

a contract with the old company to supply it with gas for the use of its customers and that, the latter company desisting temporarily from manufacture, this contract continued in force until August 19, 1902, but this was found by the commissioner to have been a purely private business arrangement between the companies and without relation to the charges made by either to its customers. Doubtless it, together with the evidence of changes in holding of stock, tended to show at least a cessation of competition between the two companies, if not of a unity of control or agreement between them.

We shall assume that there was testimony from which the court justly found that the rates announced on August 1 were fixed by an agreement between the two companies. We shall also assume, though without deciding, that while that agreement was in force and the parties were acting under it, neither could recover for the gas that it furnished, nor could this plaintiff question the validity of the ordinance of September 4. But although the stringent provisions of the Illinois anti-trust law may apply to the case of an agreement between two gas companies fixing the price of gas, and even if while the parties are proceeding under it any party receiving gas may avoid payment therefor on that ground, and the city likewise be upheld in an ordinance establishing maximum rates which are not remunerative, yet the making of such an agreement does not subject the companies to a perpetual penalty. Parties making an agreement, unlawful by the anti-trust act, may while the agreement is in force be subject to its penalties, but whenever they cease to act under it the penalties also cease. The punishment adheres to the offense and stops when the offense itself stops. Now it is in evidence that the prices were changed by the old company on the 1st of January, 1901—five months after the alleged agreement for a uniform rate—and that for months thereafter each company was charging a different rate, but the decree was one of absolute dismissal—an adjudication that the ordinance of September 4 was valid, an adjudication which became *res judicata* for all future litigation, and this in the face of the finding by the commissioner, undisturbed by the court, that the rates established by it are not remunerative, and thus work a gradual confiscation of the property belonging to the plaintiff.

We think that under the circumstances the decree should be reversed and the case remanded with instructions either to refer it to a commissioner for further findings, with leave to take additional testimony if that be deemed necessary, showing the terms and duration of the alleged agreement between the two companies, and how far it was acted upon by them, or that the court should itself undertake this investigation and make like findings.

The decree of the Circuit Court is

Reversed.
